Ray's 'Ritin'

By RAY MARTIN

Elsewhere in this issue (that's a standard form for referring to something in the paper that you haven't the slightest idea where it's going to appear)—elsewhere in this issue there's a picture of a 1907 fair booth which brings back nostalgic memories.

I love a fair. I always have. I guess, since there's a considerable amount of ruble blood flowing in my veins. Hick from the sticks, I like the smell of the fair, the sawdust, the noise, the constant cloud of dust, the barkers, the moaning of the unhappy cattle and all that jazz.

It goes a way back there—long before there was a square box in the living room that you stare at and it stares back at you, (I believe it's called television.)

Anyway, I loved the fair—dust, barkers, moaning cattle and all. As I said, I still do.

These days you seldom see anything in the fair publicity that mentions the grain sorghum exhibits, the cattle or the poultry. Most of the hand-outs that the fair promotions departments send to this newspaper deal instead with such things as the atomic displays, the super musicals from N. Y., and the football games. The big fairs, I mean. Maybe the smaller ones are still so naive that they think a fair is for the exhibition of crops and livestock.

It's the latter type of fair that I'm getting all mushy over now, just thinking of them.

Being the son of a county agent, I used to help put up fair displays. In those days there was no blue-print by which you put together a fair booth. You could—and did—exhibit anything and everything that your county produced in the way of a crop. Nowadays a fair booth is put together by a score card and judged accordingly—with about as much individuality and personality as (See RAY'S, page 7)

Clyde Bray Dies Unexpectedly

Funeral services for Clyde Allen Bray, Sr., 65, who died at Green Hospital and Clinic Monday after a brief illness, were held at the First Methodist Church at 3 p.m. Wednesday, conducted by Rev. T. G. Craft, pastor of YL Methodist Church. He was assisted by Rev. R. N. Huckelhoe, assistant pastor of the First Methodist Church, Lubbock.

Burial was in Earth cemetery with arrangements made by Singleton Funeral Home.

Bearers of the body were Travis Clements, Billy Hodges, Jack Schuster, John Smith, Joe Ferris, and C. W. Weeks. Honorary pall bearers included Gill Wollard, Jess Osborn, John Farley, W. B. McAdams, Spencer Beers, T. L. Glasscock, Othel Jennings, Dee Brown, Gerald Allison, H. H. Carlyle, Woody Lambert and E. V. Bartlett.

48 Jurors Summoned For Civil Court Term

District Judge E. A. Bills has called a jury term of civil court starting Monday, Sept. 24. It was announced Thursday, and names of 48 prospective jurors were posted.

Only six cases are slated at present for the September term, which probably will be followed by a criminal term. An August grand jury returned 22 indictments.

Schools Observe Safety Program

Muleshoe schools are participating actively in "Texas School Traffic Safety Week," proclaimed by Governor Price Daniel for this week. Neal Dillman, superintendent said.

One of the features which students are asked to fill out is a check list which asks such questions as: Has the family car passed all state safety requirements? Are brakes, tires and all lights in good working condition? Is the car always operated within the legal speed limit? Have you reminded all members of your family that they should never ride with any driver who has been drinking? Have you reminded all members of your family that safety on the highways requires obedience to all traffic laws?

Below the check list is a student safety pledge which asks the pupil to "agree to help in the crusade by reading the questions and presenting the information to all members of my family."

The check sheet tells the pupils that 2,314 persons were killed and 132,000 were injured on Texas streets and highways in 1961.

To further point up the necessity of school traffic safety, pupils are given a safety quiz on a multiple-choice plan which includes 25 questions.

137 Bailey County Farmers Seek Sugar Beet Allotments For 1964

One hundred thirty-seven Bailey county farmers will grow sugar beets in 1964 if acreage allotments are granted.

This is the number who signed non-binding "intention to plant" agreements here last week. Actually the sign-up was a survey, needed to indicate the interest in sugar beets here for use in Washington when allotments are granted. At present the area has relatively small acreage allotments, but if a sugar mill is built in this part of the southwest, vastly increased allotments will be necessary to support the mill.

It was for this reason that the

Cases slated for the civil docket include:

Paul Reed vs. Jerry Ivan Ellison, suit on injury.

Wayne George vs. City of Lubbock, suit for damage.

Eugene Clark vs. Leo Bartley individually and Leo Bartley doing business as Little Gulf Service Station, suit for damage.

Curie Landrum vs. Texas Employers Insurance Association, compensation suit.

Willie Strong et ux vs. Clark Seales, et ux, R. L. Roubinek, suit for damages.

Jurors called included:

From Muleshoe: R. A. Bradley, Morgan Locker, Ed Ary, Mrs. Johnny McMurtry, Byron Griffiths, George Bragg, Clyde Holt, Mrs. John Fried, Elbert Hamilton, Mrs. A. J. Gardner, Mrs. Howard Cox, Dick Bell, Olan Burrows, R. Q. Botkin, Jack Oberhaus, Frank Swint, Robert Hooten, Benny Chapman, Clinton Kennedy, Lonnie M. Bass, Harvey Bass, and George Wheeler.

Exchange Pupils For '63-64 Sought

Muleshoe pupils who might like to spend a year abroad as an exchange student should begin to consider the matter now if they would like to attend a foreign school during the 1963-64 school term.

That advice came from Mrs. A. J. Lenderson, who is in charge of the American Field Service program here. She and Mr. Lenderson were American parents for last year's foreign exchange pupil here, Helene Belkaert from Belgium.

Mrs. Lenderson has details of the program and the requirements which pupils must meet in order (See EXCHANGE, page 7)

Our Road 84 Called 'Stepchild'

For 6 millions Texans who journey from the southeast up through the Plains and into New Mexico and Arizona, U. S. 84 is their logical route, yet it is a "stepchild" highway, Texas Parade says in a two-page spread this month.

This non-interstate arterial highway starts at Roscoe just off the flamboyant U. S. 80 near Sweetwater and stretches off to the northwest through such busy towns as Snyder, Post, Lubbock, Littlefield and Clovis. Yet it is (See 'STEPCHILD', page 7)

Polio Kickoff Highly Successful, 'Make-up' Planned For Sunday

Bailey County's first Operation SOS kicked off last Sunday with even better results than its sponsors could possibly hope for when 4,132 men, women and children trekked through junior high school and ate the tiny vaccine-saturated sugar cubes.

Operation Type I would have been considered good if 80 percent of the population had turned out for the immunization project here, but the response considerably bettered the 80 percent mark.

With a follow-up next Sunday for those who were unable to take the vaccine last Sunday, sponsors will be able to write off Type I SOS as among the most

successful projects ever staged in Muleshoe.

Dr. Ray Santos, chairman of the SOS program for the Bailey County Medical Society, was pleased with results, but he said there still is need for others to take the vaccine, especially Spanish-American people.

He explained that many of these people have large families and should be especially certain to take the vaccine.

He said the crews will be at the junior high school again this Sunday from noon until 6 p.m. to give the vaccine to those who were missed last Sunday. Again it will be Type I that will be administered. Those who received

this vaccine last Sunday will not take Type II until next month—30 days from the time the first vaccine was taken.

The program was sponsored by the Bailey County Medical Society, a unit of the four-county Lamb - Bailey - Hockley - Cochran Medical Society.

People began lining up outside junior high school long before the zero hour of 12 noon, and by the time the program actually started, crowds had queued up far down the school's sidewalk. A slight delay was experienced when it was discovered the frozen vaccine had not thawed out in time which accounted for the stackup at the outset. So great was the demand, however, that volunteer crews were seldom able to get far ahead of these waiting for the vaccine.

Apparently the halt called by the Canadian government in administering Type III vaccine had little or no effect on those waiting to get Type I vaccine. It had been feared this might whittle the ranks of vaccine-seekers.

The program was a success throughout the area. Littlefield reported 6,900 received the initial vaccine last Sunday. Olton's mark was 2,100, and Amherst gave 1,505 vaccine tablets, and Levelland 9,000. Morton counted its total at 1,900.

Sponsors figure that to give 4,132 cubes Sunday they had to give out one cube every five seconds and during the first two hours the rate was even dizzier—one every second.

Bond Election May be Called For November

With a bit of luck, plus some pretty fast work by bonding experts, Bailey County commissioners may be able to squeeze a bond election vote for courthouse remodeling onto the November 6 general election ballot.

This was the word Wednesday of County Judge Glen Williams, who said the county commissioners will meet Friday, Sept. 28 to go over next-to-final plans for the proposed courthouse overhaul project.

The commissioners and the architectural firm which has been working on the drawings have just about completed drafting plans for the structure.

Here to go over the drawings with the commissioners will be Herman B. Riherd, architect with Butler & Riherd, Lubbock, and Jack Gray of Dittman & Co., San Antonio. Gray, whose home is in Lubbock, will discuss financing with the commissioners. He will figure the cost estimate, maturity schedule, etc. as based on the county's budget and its financial statement. A copy of the budget was sent to Gray recently.

If the bonding firm and the architect complete their work by October 8, the commissioners can order the election that day for November 6, date of the general election. The law, Judge Williams explained, requires that an order for an election must be called not later than 15 days not more than 30 days before the date of the election.

Judge Williams said he did not know what kind of a bond program will be presented by Gray. (See VOTE, page 7)

Improved Mules Go Traveling Again, to Meet Tulia This Week

By J. C. SPAIN

Muleshoe Mules, improving, but still on the losing side of the ledger, took stock again this week after dropping an 18-14 heart-breaker at Seagraves last Friday night.

They meet Tulia this Friday night in another inter-conference tilt, their third such game. They still have four games to go before the ones that count drop into place on the schedule; that game will be with Morton here October 19.

The Mules spotted the Seagraves' Eagles 12 points in the first quarter, a lead which they were never able to overcome.

Seagraves scored in the first few minutes of the game with Sammy Faulkner running 37 yards for the touchdown. James Petty's pass for the point after the touchdown was incomplete and the score was 6-0 in favor of the Eagles.

The Mules' ran three plays and punted. The Eagles ran one

play, fumbled and Muleshoe still couldn't move the ball on the ground or in the air and had to kick again. In six plays the Eagles moved the ball to Mules' 16-yard line and then drew a five yard penalty for offsides. Jerry Crump then ran around end from the 21-yard line and scored standing up. PAT again was no good.

Don Finn, Mules' Fullback, took the kick on Mules' 30 yard line and moved it to the 46. In 13 (See MULES, page 7)

The US Department of Agriculture is to hold a hearing September 25 to determine which of the 16 competing areas across the nation will get the allotment.

Lillie was optimistic about the chances for the area getting the 35,000 ton sugar allotment for 1964. He spoke to some 70 area farmers, members of the Curry County Sugar Beet Association.

Farmers there also signed the non-binding allotment requests. The plan included a capital contribution agreement which calls for each participating farmer to pay \$1 per ton of beets delivered until aggregate amount (See FARMERS, page 7)

Roddam Repeats, Wins Again In Journal's Football Contest

For the second week in a row, L. C. Roddam, 510 West Second, walked off with the top prize for the week in the Journal's football contest.

He tied with Ralph Broyles, Route 1, Friona, in picking teams, each getting seven right. However, Roddam picked Seagraves over Muleshoe while Broyles favored Muleshoe to win and it was this wrong guess that put Broyles in the second spot. Last week Roddam nosed Howard Splawn.

Meantime, the contest is continuing and may be found on page 3B this week. Five bucks goes to the winner and three to the second placer. Grand prize wins \$50 expense money and two tickets to the January 1 Cotton Bowl game.

Sponsors include: Bailey County Electric Co-op, Assn., Baker Farm Supply, Inc., Bovell Motor Supply, Alsip Insurance Agency, Paul's Restaurant (See RODDAM, page 7)

SECOND CHECK — L. C. Roddam, for the second straight week, won first place in the Muleshoe Journal's football contest. Here he's shown receiving his check from Polly Otwell, Journal bookkeeper.

Sandra Harris spoke to the group complimenting them on their interest and cooperation during her term as Worthy Advisor. She presented each of the Rainbow Girls officers with new ribbons she had made.

The local Order of Rainbows are to participate in an area meeting to be held in Plainview in which the District Grand Worthy Advisor will be honored at a tea.

Los Planos Club Accepts Members Los Planos Study Club met in the First National Bank Community Room, Tuesday, September 11, at 7:30 p.m. All members were present except two. Four new members were accepted in to the organization.

Mrs. Blanche Lenderson gave a most interesting program on art. While speaking on the subject she also painted a beautiful still-life picture.

Hostesses for the meeting were: Euleta Stockard and Jo Ann McGuire.

Some 76 guests called during the evening to meet Dr. and Mrs. Gleason and the Fosters. The Gleasons were married on August 11. She is the former Margaret Mabry. The Fosters moved to Muleshoe from Tahoka on July 18. They have two children, Virginia Lynn, 16 months, and Gregory Scott, age 2 months. Dr. Foster is associated with Gleason at the Muleshoe Animal Clinic.

The serving table was appropriately decorated with a centerpiece of bronze and gold mums and a clever figurine of a bespectacled veterinarian holding a small dog in his arms.

In addition, seven prominent corporations and two leading governmental agencies will send qualified representatives to Pensacola to familiarize the midshipmen with the latest techniques and advancements in aviation and space research.

Eula Embry Entertains Progressive Home Club

Progressive Home Club met Thursday in the home of Eula Embry with eight members and one visitor present. Lola Bryant drew the hostess gift.

Members of the club voted to entertain their husbands and friends with a supper at 7 p.m. on September 25.

During the meeting a box of fall and winter clothes were packed to send to the club's adopted girl at Girlstown near Whiteface.

The program was on the subject of covering shoes and was presented by Zida Mae Black.

After delicious refreshments were served by the hostess, the club adjourned with the next meeting date set for September 27 with Vera Engleking as hostess.

TOURS IN NEW MEXICO

Mr. and Mrs. Cecil Davis were accompanied by Mrs. A. L. Davis on a vacation in northern New Mexico recently.

The trio went first to Eagle's Nest where they enjoyed trout fishing in Eagle's Nest Lake.

From there, they traveled to Red River passing over the Red River Pass which Mrs. A. L. Davis enjoyed the scenery of the canyons from the ledge-like road.

Leaving there, after several days at the Lewis Ranch Resort, the Davises toured several other points of interest and especially enjoyed Taos and its many museums, parks, art shops and scenic side trips.

The output of 60 million acres of U.S. cropland moved abroad last year as exports.

College Students

Faces that have long been familiar in the classrooms of Muleshoe High School are taking their places among those of other college students in many institutions of higher education. REV. DON MURRAY

Muleshoe Minister To Preach in Japan

The Rev. Don Murray, pastor of the First Baptist Church here, has been invited to preach in a nation-wide evangelistic crusade designed to reach every person in Japan during the spring of 1963.

Mr. Murray will preach in a revival at Matsuyama, Japan, as part of the vast Japanese Baptist New Life Movement.

A total of 147 Baptist evangelists were named to preaching assignments in the vast Baptist New Life Movement in Japan, slated March 26-May 6.

Participants in the nation-wide crusade were selected by a committee from the Japan Baptist Convention and the Baptist General Convention of Texas. Their names were officially released for the first time this week by the committee.

The evangelists will be members of three-man teams including laymen and musicians who will participate in nearly 150 revivals in major Japan cities.

The revivals will be preceded by five area-wide crusades in major metropolitan areas in Japan, with television and radio expected to take the Gospel message into nearly every Japanese home in the nation.

About 300 Baptist laymen and musicians will be named to participate in the effort within the next few months by the Japan Crusade committee.

Dr. K. Owen White, chairman of the committee and pastor of the First Baptist Church of Houston, said the crusade is one of the greatest campaigns in the history of Christianity.

Evangelist Billy Graham will be one of the major speakers in the five area-wide crusades.

Campaigns in the 145 Japanese cities will be held during a one-month period, with about 40 revivals each week. The teams of American evangelists will be in Japan for about two or three weeks.

The Far East Broadcasting Company in Manila has agreed to broadcast crusade sermons in nine languages throughout Asia, including major portions of Russia and Red China.

Evangelist Graham recently said concerning the crusade, "I doubt there is a greater spiritual need in the world than in modern Japan. After the war, we took away their faith in the emperor, but as yet we have not been able to replace it with another faith."

"There is an emptiness, frustration and spiritual vacuum in Japan that is frightening," said Graham. "If Japan goes Com-

YOUR HEALTH

Care Until 15 Key to Child's Dental Health

AUSTIN — "Pedodontics" is a big word with a simple meaning: the care and treatment of children's teeth. A major part of pedodontics is preventive dentistry, and preventive dentistry for the very young is one great hope for a realistic solution to our dental woes.

If a child's teeth are properly cared for up to about age 15, a strong foundation is laid for minimizing dental troubles in later years.

At about six months of age, the four front teeth—two upper and two lower—begin to peek through the gums. These are the incisors cutting teeth. By age seven to 11 months, four more teeth, upper and lower, start coming through. These are the lateral incisors, positioned on either side of the central teeth.

Then Mother Nature wisely skips a few spaces so as to properly shape the jaw. In 12 to 16 months, the back teeth or molars come in. Then the cuspids show through to fill in the spaces between. At about 24 months, the second molars come in. Up to this point all teeth which have erupted are primary teeth. Although temporary, they are vital. They help shape the face, help the youngster learn to speak distinctly, and help him nutritionally.

While all this has been going on, the permanent teeth are slowly developing in the jaw bone so they can come forth at the proper time.

The first permanent teeth to erupt are molars — sometimes called "six year" molars simply because they emerge at about age six. Because they do not replace the first teeth, but come in just behind them, these molars tend to confuse parents who think they are also temporary.

This error can lead to unfortunate consequences. Since the "six year" molars are permanent teeth, they will not be replaced if lost.

Family dentists strongly emphasize the importance of watching for the six year molars. They are important to the structure of

the mouth. The manner in which they interlock with their opposite teeth will determine the eventual shape of the jaw, facial contour and regularity of alignment of other teeth.

Because of their importance, these first teeth are often referred to as the "keystone of the dental arch."

The strength or weakness of adult dental health, barring loss of teeth through accidents—can invariably be traced to habits of preventive dentistry learned or left unlearned in childhood. And when it comes to preventive dentistry, the pedodontist is a child's best friend. (A weekly feature from the Health Education Division, State Department of Health.)

IT'S THE LAW in Texas

A public service feature of the State Bar of Texas

Our courts decide where our rights and our security conflict. For example, in the days of the rubber hose, police sought easy confessions. But, today, the US Supreme Court allows only voluntary confessions to go into evidence at a trial. Those obtained by force or threats are barred.

Recently the Supreme Court spelled out what it means by "voluntary":

1. In one case the sheriff brought the accused into court. The judge told of his rights and of the charges against him. The prisoner said: "I'm guilty. I killed the woman."
2. A rancher had lassoed him, but the sheriff had stepped in to protect him from a gathering crowd.

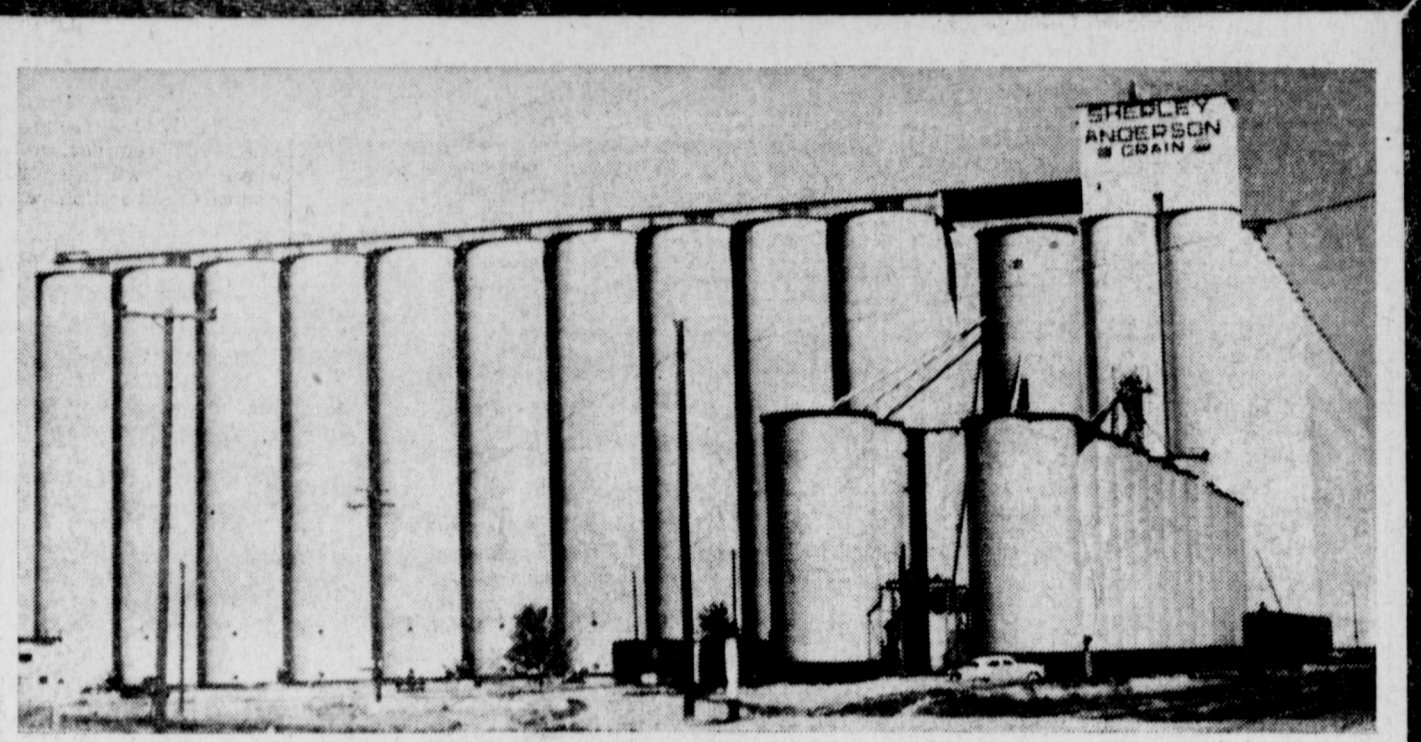

Despite the roping, the court found the confession voluntary and upheld it. For only the judge and the prisoner's protector were in court when he confessed. No force or threat.

But the US Supreme Court rejected another conviction when the "Totality" of the conduct of the officers amounted to a denial of "due process of the law."

It concerned a 19-year-old prisoner who had only fifth grade education.

Why did the Supreme Court upset this conviction? Because the trial court admitted a coerced confession in evidence. Officers had arrested the prisoner without a warrant, had held him without much food for two days, and had not allowed him to see anybody he knew. Finally, the police chief had told him that a mob outside wanted to "get him", but if he "confessed", the police could hold them off. He broke down and "confessed."

Such confessions, the court held, were not an "expression of free choice."

Teachers Attend TSTA Meeting

A workshop for local TSTA leaders in district 7 was held Tuesday night at Alderson Junior High School in Lubbock with keynote address given by Mrs. Fred B. Norris, president of TSTA of Texas.

Following the banquet in the cafeteria, discussion group meetings were held. Then at another general session, resolutions adopted by the various groups were presented to be forwarded to the state executive committee. Officers from Muleshoe attending were Neal Dillman, Byron Hardgrove, Milton Oyler, Joyline Costen and Elizabeth Watson.

Three Men Named To Labor Board In Bailey County

Three Bailey County men, Carrol Pouncey, John Gunther and Cirico Escamilis, will serve as a county farm labor committee and meet with John R. Poote, Manager of the Texas Employment Commission office, to review the total seasonal employment needs developed by the TEC.

The committee was presented with the figures of the TEC that Bailey county will be short 1,025 cotton pickers during the peak period of the cotton harvest. This shortage will be met by the importation of Mexican National Bracero workers.

Mrs. Garth's Rites Held in Muleshoe

Funeral services for Lucy Viola Garth, 73, a resident of this area for 25 years who died at Green Hospital and Clinic Monday were held at the First Baptist Church Wednesday. Conducting were Rev. J. E. Moore, Abilene; Rev. Don Murray, pastor of the First Baptist Church here, and Rev. Clarence Coffman, Littlefield.

Burial was in Bailey County Memorial Park with Singleton Funeral home in charge of arrangements. She was the wife of Grover John Garth.

Pallbearers were her grandsons, Earl Schmitz, Monroe Schmitz, O. T. Garth, George Moraw, Charles Moraw, Larry Garth, Carl Buck and Jo Hays.

Survivors, in addition to her husband, are four sons, Royce Garth, Muleshoe; Alton Garth, Lubbock; Wayne Garth, Frona, and Claude Garth, Comanche, Okla.; and four daughters, Mrs. C. L. Schmitz, Seagraves; Mrs. Charles Stallcup, San Antonio; Mrs. Rudolph Moraw, Muleshoe; and Mrs. James Dobbins, Grand Prairie; one sister, Mrs. L. M. Ray, Crosbyton, and a brother, C. J. Tiery, Terrell. Also surviving are 19 grandchildren, 17 great grandchildren and one great, great grandchild.

Mrs. Garth was born in Jack County, Sept. 23, 1883. The Garths lived in Crosbyton before moving to this area.

domestic farm workers existing in Bailey County and the shortage of workers, if any, which must be met by importing Mexican Nationals to harvest the cotton crop. Under public law 78, the TEC must supply this information to the Secretary of Labor who must limit the number of Mexican Nationals to be used in this county by granting a "ceiling". The committee consults with the local office manager to assist him in estimating the number of workers who will be needed, based on current local conditions affecting the cotton crop.

"Ceilings" granted by the Secretary of Labor limiting the importation of Mexican Nationals into this area will be posted in Goodland, Enochs and Bula and in the county agent's office, and in the county courthouse.

a row of fence posts. Maybe it's because of this that nowadays I seldom visit the agri. displays when I'm making the rounds of a fair.

But I remember those good old days. We started in at about 7 o'clock in the morning with buckets, bundles, bushels or stalks of everything and we built it from scratch. If we were lucky we got through around midnight—Six hours or so before the opening of the fair. Why, I recall that every drugstore in town sold out of Demisson's crepe paper long before 9 p.m. the night before the fair, because it took yard after yard of crepe paper to make a fair booth a success.

And then when you were all through with it, you stood back and admired the pure artistic beauty of this thing of agriculture that you had created. And it was good.

Any self-respecting fair booth contained at least four borders for the backboard. You started maybe with a row of corn, laid end to end in an exacting framework pattern. Then just inside that you put a spread of kafir. The corn probably was the red variety and the kafir being white gave you a color contrast. Inside that you put a row of some green product and then inside that open cotton bolls were meticulously glued to the backboard.

Once the border had been put on, you proceeded to lay out an intricate scene for the centerpiece—a farm scene in which crops again were used to "paint" the scene.

Usually it took all morning to put this backboard together. The "floor" portion went faster, but again you crammed it full of farm products—the more the merrier, because you were attempting to tell the world, through your booth, that your county was a diversified county that grew just about everything from mustards to king-sized watermelons.

And that's the way it went. After that you could go out and enjoy the fair—the dust, the unhappy cattle, the pitch men at the carnival and the farm machinery displays.

Now there's where I spent a lot of time—at the farm machine displays. Remember the big, old-fashioned threshers that were always on display and I can even remember the steam tractors that pulled them. These unwieldy black tractors chugging around the display, dragging their awk-

ward threshers behind them, made an awesome sight with their tremendous power (20 horsepower downhill) and I can still remember the thrill that went up and down my spine as I witnessed these demonstrations. Now THERE was real power farming. Oh, boy, what was the world coming to.

Just to reassure myself that the horse was not going to be sent off to the glue factory immediately supplanted by these monsters of the mechanical farm world, I went right on over to see the horses in the horse barn. The Percheron which stood so majestically in his stall switching a proud tail up over his broad back, completely oblivious of the fact that eventually those machines out there would replace him—except on beer posters.

As I say, I like a fair. I've waded ankle deep in dust, slithered through the muddy livestock buildings, had my ears almost deafened by the high-pitched crowing of the roosters in the poultry barn, and have ridden everything on the carnival grounds (Dad being a county agent I got passes) and have eaten tons of cotton candy, greasy hamburgers and leake-warm pop. I've sat through many a bingo game where I finally won a \$1.98 berry bowl set for the low price of only \$40 in dimes.

But it was all fun. Don't mind me if I'm out of town this weekend. I think there's a pretty good fair going on over at Podunk.

plays, with the complete backfield sharing toting homers, quarterback Kenny Heathington carried the ball over for a TD from the Lyard line. Jimmy Cabrera kicked the extra point and the score was 12-7 when the first half ended.

Fumbles and penalties dominated the third quarter as neither team could cross the goal line. On the last play of the quarter, Jerry Crump forced his way to one from the six-yard stripe. On the first play of the 4th quarter, Sammy Faulkner pushed over for the TD. PAT pass play was incomplete and the score stood at 18-7.

Muleshoe ran two plays, fumbled and the Eagles took over on their own 48-yard line but couldn't move the ball and punted. Jerry Harrison took the punt on the Muleshoe 18 and ran 82 yards for a Mule TD. Jimmy Cabrera's kick was good for one point and the score stood at 18-14 in favor of the Eagles.

The Eagles then took possession and tried to run the clock out but lost the ball on downs at the Mules' 25 yard line. Muleshoe tried three passes but all were incomplete and the clock ran out with the score 18-14.

contributed by all growers and land-owners in the factory area equals \$5 million.

This money, it was pointed out, would be an inducement to bring a better sugar industry to the area and would be used in construction costs for the proposed \$20 million plant.

Lillie told the Curry county group that some 80,000 acres had been signed up in the Hereford area, and it was estimated that Curry county will sign for 50,000 acres.

Breaking down the costs for sugar beet production, Lillie, who probably will be manager of the plant when and if it is built, said equipment needed by farmers would cost about \$7,000. This did not include tractors and trucks. He said seed costs vary from \$3 to \$5 per acre.

"After he has studied the budget and our potential in this county, he will recommend the length of time needed to pay off the bonds," Judge Williams said. Many such bonds are scheduled on a 30-year repayment plan.

The present plans call for a general enlargement of the present structure on three sides and refacing the building. One of the big changes will be in the sheriff's department and jail facilities. This will be in the form of an all-new-addition to the building.

If you have fruit sherbet in your freezer, it will make a festive first course for Sunday dinner. After spooning cut-up fresh fruit into sherbet glasses, add a small scoop of the sherbet to each. Fresh mint, if it's available, makes a pretty garnish.

to qualify for the American Field Service program.

She said pupils considered must be "good, all-round students, and must have had two years of foreign language. "It is not necessary that the pupils considered be straight A students," she explained, "but they must be good all-around pupils."

Muleshoe does not have an exchange pupil this year, but a pupil from abroad probably will be stationed in Muleshoe next year.

Pupils interested in the exchange pupils program are asked to contact Mrs. Lenderson at 3-0380, or get in touch with the American Field Service.

years. Along the strip itself, nearly a quarter of a million Texans live, and the road is a key artery for all the towns it touches.

The magazine says the highway is of major importance to South Plains counties which it has found are bucking the trend of the times, the trend of larger cities to grow larger and smaller ones smaller. The counties are gaining in population and the cities and towns within them are growing at an even faster rate.

Muleshoe, for example, has increased in population by nearly 60 percent during the last decade, Texas Parade points out. "The county sits on an immense underground water reservoir which is being developed for intensive irrigation," the article says.

The highway department study revealed that congestion will be acute within 10 years. Here in this county the problem is even greater since 84 and 70 join here

and continue as one to Clovis.

The prospective \$12 million cost of providing an adequate facility for the South Plains section is broken down by the Highway department thusly: Parmer County, \$926,000; Bailey County, \$840,000; Lamb County, \$5,039,000; Lubbock county, \$2,375,000; Garza County, \$526,000, and Scurry County, \$2,066,000.

The money which could take this part of U. S. 84 out of the "stepchild route" classification of highways in Texas is not yet in sight, the magazine says.

Texas Parade says the need of some of these "stepchildren" is more urgent than others. "But," it adds, "there is merit to them all for the serious attention of Texans who would recognize that each project is a part of a statewide problem: That local partisans may achieve their desires quicker by banding together for a statewide assault on their collective problems."

Among his many accomplishments, being founder of the High Plains Research Foundation was perhaps his most prized act. He toured the Plains for three months promoting the business, and finally got it started largely through his efforts.

FROM DOWN UNDER — Many species of sponges found off the Florida Keys are again attracting divers as well as beautiful formations of coral. The sponge on the left is known as a grass sponge, less valuable than the wool sponge pictured on the right. The wool sponge is the largest found near the Keys in many years. The coral (center) was brought up from the reefs off Little Torch. They are on display at the airport office.

Off The Runways

By DORIS KINSER

At dawn on Saturday, September 1, Mr. and Mrs. Bobby Murrell and Mr. and Mrs. Jimmy Herring, accompanied by flight instructor Morgan Locker, took off from Muleshoe Flying Service in an Aztec for Florida.

The flight served as a dual purpose: a combination multi-engine training flight for Murrell and Herring and a week's vacation on Little Torch Key.

Murrell, at the controls on the flight down, had experience in three phases of flying, visual pilotage, Omni, and instrument.

After filing a flight plan with the Lubbock FAA station, Murrell flew Omni and pilotage on the first leg of the trip to near Meridian, Miss., where they landed for refuel and breakfast. The let-down at Meridian was made on instrument at Key Field, a large airport used by both civilian aircraft and military jets, with a ceiling of 800 feet.

The group had breakfast at the terminal restaurant which is built largely of glass surrounding a lush tropical garden.

For the last leg of flight, Murrell filed a flight plan there to Key West and as the sky remained overcast, he received instruction in instrument flying. Near Cross City, Fla., they flew out of the overcast and skimmed over huge, puffy, cumulus clouds.

At Ft. Myers, Murrell had his first experience in crossing an air defense area. Restriction in the area require a pilot to contact their station and give the pilot identification, the type craft being flown, the altitude, and time the craft is to enter the zone. There is a 3 minute lee-way on an estimated time of penetration and pilots failing to comply will find themselves with jet escorts

to the runway. Murrell entered the zone 1 minute ahead of his estimate. From Ft. Myers, they flew over the water on to the Keys and circled low for an aerial view of the Islands.

Murrell and Herring first learned something of life under the water and after several lessons, learned to use some of the diving equipment. Murrell said their first look at all the fish, large and small, swimming about gave them quite a start at first and they headed back to the surface! But after some time, they decided that it might be alright, so they ventured farther and farther away from the boat and finally went on down to bottom. They dived for lobster, shells, coral and sponges.

During one outing the group spotted a sting ray they judged to weigh about 50 pounds and Locker decided to shoot it with a spear gun. The sting ray has tremendous power in water. Locker tied a 100 foot nylon rope to the rail on the edge of the cabin cruiser and to the spear gun handle as he knew he could not hold the fish. He then lowered himself into the water and scored a hit. The sting ray began to whiplash with his sword-like tail striking dangerously close. Locker went to the surface with the sting ray about six feet away headed in the same direction. Locker vaulted over into the boat without the use of a ladder and the fish came up out of the water, went back under and broke the shaft of the spear and disappeared.

One afternoon was spent visiting with Captain Cook on his island. Captain Cook is the only living relative of the famous Captain Cook, the discoverer of Hawaii and Christmas Island. The group found him to be quite an interesting character and his home a novelty. It is filled with relics from the floor of the ocean dating back to the days of old pirate ships.

They spent one day touring Miami, riding the korn train, a trip to the monkey jungle and other points of interest.

Murrell and Herring were interviewed by Pat Parks, feature writer for the Key West Herald, and appeared in the Sunday edition with pictures dressed in jeans, boots, and cowboy hats. Miss Parks wrote the feature from the Texas Cowboy angle describing their work, life on the Texas Plains, and their vacation in the Keys.

The flight home was made with Herring at the controls of the twin-engine Aztec. Herring began training recently and this was his first twin training.

They returned to Muleshoe late Saturday, afternoon.

D. J. Cox, Young Bula Farmer, Gets Top Young Farmers Award for Area

By Mrs. John Blackman
BULA—D. J. Cox, farmer in the Bula Community, was named outstanding Young Farmer of Area 1, Young Farmers Organization, at the second annual convention of the Area 1 Young Farmers chapters, held Saturday in Plainview. Cox was presented the award at the banquet held in Estacado School cafeteria.

There were six entrants from 900 members in Area 1, which includes 28 counties from east to Oklahoma border, west to New Mexico line and south to 18 miles south of Lubbock.

Cox will represent Area 1 at the state Young Farmers Convention to be held at the Texas Hotel in Fort Worth, Jan. 3-4 and 5, 1963.

Southwestern Public Service Co., presented Cox with a major electrical appliance of his choice and plaques to other outstanding award winners.

Cox, born and reared in the Bula Community is the son of Mrs. Lorene Cox, and the late Cecil L. Cox, Route 1, Sudan. He is a 1949 graduate of Bula High School, and is 31 years old. His family includes his wife, Laverne, son, Steve, and a daughter, Jolene.

He farms nearly a section of land with 208 acres in cotton and the rest in grain sorghum. In 1960 he built a three bedroom

brick home on his land.

In addition to being an aggressive farmer and experimenting with new methods and practices for increased yields, the young farmer is also an inventor.

He holds a patent on some of his farm machinery modifications and one pending on a cleaner elevator for a cotton stripper.

Cox received a scholarship to Texas A&M at his high school graduation. The following summer he farmed with his father and worked at a gin. He saved \$1,600 toward furthering his education. By the time to start to college the next fall, he had decided on farming and marriage instead of college.

Along with farming Cox did custom spraying and combining and managed to save enough to buy some land in 1951. He, with a neighbor, was stricken with a drought for several years, then D. J. went to hunting for water on his land and now has enough water for his cotton acreage and some feed.

Cox has a keen outlook on farming and says that in farming, "You are a free moral agent to do as you choose. You are free to work and reap or do nothing and not reap.

Man against the sky

The telephone lineman is another active symbol of service at General Telephone.

He climbs a pole with spur-like "climbers" strapped to feet and legs, and is silhouetted against the sky held firmly by his safety belt.

With the tools hanging from his belt he installs new wires and cables, and repairs lines when storms, wind and ice damage them.

He is one of many folks at General Telephone who suggest the convenience of another telephone in your home, now that the busy fall season is here. They save steps, are available in many colors, cost pennies a day. Call the Business Office now.

The Cuban Cancer

An extraordinarily alarming report comes from Robert S. Allen — a leading writer on national and international affairs. His first paragraph says: "Soviet technicians have begun installing 'electronic counter equipment' in Cuba that can be used to interfere with U.S. missiles launched from our major test center at Cape Canaveral, Florida."

This equipment, Allen goes on, consists of jamming and tracking devices. Soviet technicians have been sent to Cuba to put them into operation. They also can be used to interfere with our aircraft guidance control and ground-air communication systems.

The situation is so serious that President Kennedy sent his chief military advisor, General Maxwell Taylor, an officer of the highest abilities, to the Caribbean to find out the facts and to report upon their significance.

It is certainly obvious that no move of such ominous importance could have been made except upon the authority of the highest Soviet officials — primarily, Premier Khrushchev. And, if General Taylor learns what Allen obviously expects him to learn, this means that the Soviet Union, of which Castro is simply a willing pawn, is determined to establish an effective military base some 90 miles from U. S. territory. The cancerous Cuban situation may force this government into taking actions of the most far-reaching portent.

Special Privilege

Senator Goldwater recently devoted a newspaper column to the special privileges the labor unions enjoy. Among them: "Almost total immunity under the anti-trust laws. Immunity from taxation.

"Authority to use union funds for purposes not related to collective bargaining, even where union membership is compulsory.
"Power to compel workers to join the union as a condition of continued employment."

This sampling does not, by any means, exhaust the list. Senator Goldwater lists at some lengths other important areas where the unions are given, under law, privileges denied to other organizations and groups.

The Senator makes it clear that he is not suggesting that all special rights now enjoyed by labor should be abolished. But he does believe that Congress should re-examine the entire question of unlimited power for labor unions with a view to reducing their power.

Most of the special privileges of the unions were given them when they were small and weak and needed help. Now they are huge and powerful and rich, and are legally able to perform acts that would bring the full weight of government down upon an industry pursuing comparable policies. The need is not to deprive labor of legitimate rights. It is to prevent labor from destroying the legitimate rights and protections of the rest of us.

Youth to Aid Church Service

Morning worship at the First Presbyterian Church here will be marked by the Youth Fellowship assisting the pastor in the worship service this coming Sunday.

Various members of the Youth Fellowship will preside at worship and the pastor will preach on the "Suffering Servant", from

Isaiah 53.
Following the morning worship there will be a covered dish lunch at the church. Members and friends are invited by the church to come and share this fellowship.

After the lunch a special meeting of the congregation will be held. Rev. John Hill of Littlefield will preside as moderator of the meeting.

"The public is given a cordial invitation to worship with us," the Rev. Finis Hodges, pastor of the church, said.

THE SANDHILLS PHILOSOPHER

Philosopher Looks at the Cuban Situation and Looks and Looks

Editor's note: The Sandhills Philosopher on his Johnson grass farm discusses the Cuban problem this week, without making much dent in it.

Dear editor:
I was talking with a man in town the other day who keeps up with things in the world and he said it was time we did something about Cuba.

"Whatta you mean? I asked.
"I mean it's time President

Kennedy did something about Cuba, that's what I mean."

"Whatta you suggest he do?"
"Me suggest? That's not my job. That's his."

I came on back home and got to thinking about this and decided he's right.

Something ought to be done about Cuba. Something ought to be done about the Berlin wall. Something ought to be done about Russia, about the Congo, India, Algiers. Something should have been done about Hitler before he got cranked up, something should have been done about the Kaiser, about Attila, the Hun, Julius Caesar, the driver who nearly ran over me when I was coming back from town, high taxes, economic depressions and the next man who's going to go berserk and shoot up his family.

The trouble is, there are some problems that can't be solved ahead of time. There are too many things in life that can't be headed off.

Regardless of how violent and dangerous a family squabble next door is, and regardless of how wrong one side is and how right the other is, where's the man who can solve it by wading in himself?

It's wrong for Castro to trample the Cubans with the aid of the Russians, but it might be wronger to start an atomic war about it. Don't ask me.

I'll tell you, being President is a fine job, but it sure has its drawbacks.

Running the world, like raising a family, has problems no man has the answer to. You can do what you can, but half the time it won't work. The kid will either grow out of it or he won't.

Something ought to be done about Cuba, all right, just as something ought to be done about this Johnson grass farm. I'd rather think about Cuba, though. I know what ought to be done about this farm.

Yours faithfully,
J. A.

Tough new '63 Chevrolet Trucks are here!

...THE ONES THAT WHIPPED THE BAJA RUN...TOUGHEST UNDER THE SUN... TO SHOW THE WORTH OF NEW ENGINES, FRAMES AND SUSPENSIONS!

Sometimes the caravan crept along for hours in low gear. It took 17 days to go 1,066 miles! This is the road near Loreto.

Round trip from Detroit to the end of the Baja Peninsula is over 8,000 miles.

Millions of years ago nature fashioned a proving ground for trucks that man can never duplicate. Today it is known as the Baja (bah' hab) California Peninsula, Mexico.

These pictures give you only a bare idea of the place. The road is fine for 140 miles below the U.S. border. Then the beating begins. Rocks and hard-baked ruts bang, jab and jerk the trucks from stem to stern. Loose sand makes them struggle and strain. Dust chokes them. Heat roasts them. Rivers drench them.

The Baja Run took this Chevrolet truck caravan 17 days to go the 1,066 miles.

All the trucks performed magnificently. Not one was forced to drop out because of mechanical difficulty.

Trucks that can take this kind of beating can take on your toughest truck jobs. Come in now and see tough quality-built '63 Chevrolet trucks with all their new improvements.

Freshman Team Loses Opener

Muleshoe's Freshman football team was defeated by Plainview in their opener which was played there last week. The score read 22 to 14 at the sound of the final whistle.

The game was tied up at the end of the third quarter with a score of 6-6. The Muleshoe team was penalized 75 yards and suffered set-backs on drives during the fourth quarter and the breaks continued to fall for the Plainview team.

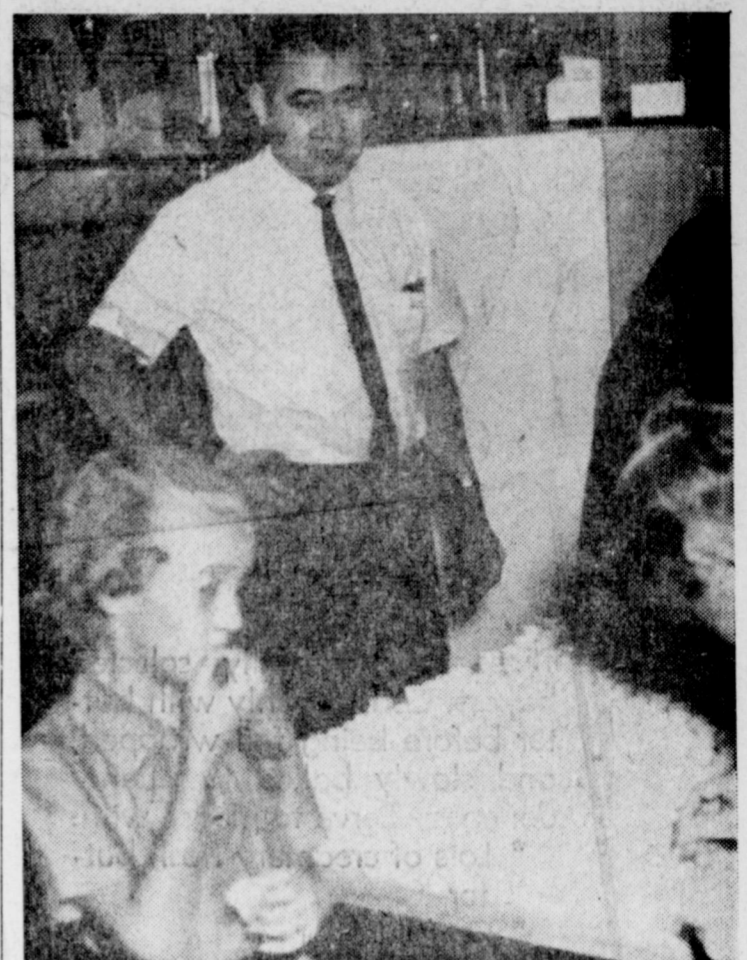

Coach Coleman said the team made a good showing and he feels they have a good season ahead of them.

Adams was the outstanding player with an average of 6 yds. per carry and was credited with the first touchdown and extra point.

Mike Parker ran 75 yards on a kickoff return for a touchdown in the fourth quarter.

The Freshmen team will play Farwell there on September 27.

ADVERTISE IN THE JOURNAL

NO. 1 IN LINEUP — When sponsors of SOS opened the doors to let a total of 4,132 persons take the vaccine, at the very start was this lass, Gretta Bamberts 8, Route 3, Muleshoe. She is the daughter of Mr. and Mrs. Carl Bambert. Watching is Dr. Ray Santos, chairman of Operation Type I here. (Journal Photo & Engraving)

When a recipe for a cake directs you to "bake until done," bake the cake until a cake tester, a toothpick or a broomstraw inserted in the center, comes out clean. The cake should also shrink from the sides of the pan and spring back when lightly touch-

ed with a finger—and we mean lightly! If you're a new cook, all three signs of doneness should reassure you.

Count on having about 1 1/2 cups of sauce from a pound of apples.

Adams was the outstanding player with an average of 6 yds. per carry and was credited with the first touchdown and extra point.

Mike Parker ran 75 yards on a kickoff return for a touchdown in the fourth quarter.

The Freshmen team will play Farwell there on September 27.

ADVERTISE IN THE JOURNAL

NO. 1 IN LINEUP — When sponsors of SOS opened the doors to let a total of 4,132 persons take the vaccine, at the very start was this lass, Gretta Bambers 8, Route 3, Muleshoe. She is the daughter of Mr. and Mrs. Carl Bambers. Watching is Dr. Ray Santos, chairman of Operation Type I here. (Journal Photo & Engraving)

When a recipe for a cake directs you to "bake until done," bake the cake until a cake tester, a toothpick or a broomstraw inserted in the center, comes out clean. The cake should also shrink from the sides of the pan and spring back when lightly touch-

ed with a finger—and we mean lightly! If you're a new cook, all three signs of doneness should reassure you. Count on having about 1 1-2 cups of sauce from a pound of apples.
