

STOCK YARDS DAILY JOURNAL

The St. Joseph Journal Publishing Co., Publishers.

W. E. WARRICK, Editor and Manager.

Largest Outside Circulation of Any Paper Published in Buchanan County, Mo.

Entered at the Postoffice in St. Joseph, Mo., as Second Class Matter, September 3, 1897.

SUBSCRIPTION RATES: Daily, per year, \$1.00; Daily, six months, \$0.60; Daily, three months, \$0.35; Daily, one month, \$0.15; Tri-Weekly, per year, \$2.00; Semi-Weekly, per year, \$1.50; Weekly, per year, \$1.00.

In asking change of address, please state your former postoffice. State whether your paper is Daily, Tri-Weekly, Semi-Weekly or Weekly.

Do not send checks on country banks. Remit with postal order or draft, payable to St. Joseph Journal Publishing Company.

Advertising Rates Furnished on Application.

Usual 20 per cent commission allowed postmasters, who are authorized to take subscriptions.

Optimism concerning the wheat crop situation simply will not do.

Cattle market seems sort of sensitive to the influence of receipt figures nowadays.

Agricultural education will form an important section of the International Congress of Agriculture at Ghent, Belgium, in June.

More than 200 hounds will take part in the biggest fox hunt ever run in Missouri, which is scheduled to be held in Saline county, beginning May 19 and continuing four days.

Distillery-fed cattle are arriving on the eastern markets in comparatively liberal numbers. This to a certain extent has curtailed the eastern shipping demand at western markets.

Every year Kansas calls for a larger number of recruits for her army of harvesters. With a bumper grain crop in sight Kansas will need forty thousand helpers during harvest season.

Dr. George Kerscheneitner, the German veterinarian expert, is impressed by the success of the American public schools in the task of assimilating immigrants.

WHEN IOWA LAND WAS CHEAP. Edwin Hewitt, of Denver, Colo., formerly a member of the wholesale grocery firm of Hewitt Bros., Des Moines, recently wrote to the Ida County Pioneer, telling of the days in the early seventies, when he traveled in that part of Iowa when land was worth only \$5 an acre.

FOREST FIRE LOSSES. The Department of Agriculture has been figuring up the losses by fires on the national forests for the calendar year 1912, and finds that they were the lowest of recent years.

THE GOOD RECORD IS ATTRIBUTED TO first, favorable weather conditions in most localities, and second, the increased efficiency of the fire-fighting organization.

DARROW WITHOUT MONEY Funds Being Raised in Chicago to Aid Defender of McNamara

Chicago, Ill., May 8.—Officers of the Chicago Federation of Labor have begun raising funds for the financial aid of Clarence Darrow, the attorney who defended the McNamara brothers at Los Angeles and who will soon face his third trial for bribery in the California city.

The Flakes Kept the Ground Warm.

Daddy's Beatime Story — And the Raindrops.

DADDY asked Evelyn, "where do the little snowflakes go when their winter's work is done? You told us once that their work was to keep the ground warm in winter, so that the little flowers and other growing things could come up in the springtime."

WHERE FEEDER LOSES

President Waters said: "The way out is found chiefly in grading up the beef stock to higher standards, so they will put their fat inside the steak instead of outside the body cavity."

BASEBALL NEWS

DRUMMERS BEAT WICHITA. Take Ten Inning Battle From the Cellular Chambers.

St. Joseph celebrated its first western invasion yesterday by defeating "Doggie" Hughes' ball tossers by a score of 5 to 2 in ten innings.

TO KEEP FARMER ON FARM IN WOMAN'S REALM

Washington, D. C., May 8.—Farming because farming pays is to be abrogated by the Department of Agriculture in the rebuilding of rural industry. Appeals to city folk, based on a love of nature and the outdoors, will not be the rule hereafter.

TO FIGHT "FULL CREW LAW"

St. Louis, May 8.—Announcement was made here that a conference of railway presidents and the general managers has decided to invoke the referendum in order to revoke the "full crew law" passed by the last legislature.

A BUILDING BOOM ON HERE

St. Joseph's Increase in Building Operations for March 225 Per Cent. Figures compiled by one of the building trades papers of the country and sent to Building Inspector Powell, show that during the month of March St. Joseph stood at the head of every city in the country in the increase in the percentage of building, compared with March, 1912.

WON STORY FEATURE.

Oskaloosa Boy Carried Off College Prize in Contest. Ames, Ia., May 8.—Lucy F. Ricker, daughter of John F. Lacey, of Oskaloosa, won the agricultural feature story contest at Iowa state college for the prizes offered by the Iowa Agricultural Experiment Station.

WAS CATCHING TROUT.

Wisconsin Man Arrested for Fishing in Own Pond. Cashton, Wis., May 8.—Charles Culver, lawyer and capitalist, is in trouble with the state authorities, all because he is so fond of fishing that he constructed a private pond on his property and stocked it at his own expense and has been taking trout from it whenever the fancy moved him.

BUY 10,000 CATTLE IN FLORIDA.

Oklahoma City, Okla., May 8.—The largest single shipment of cattle into Oklahoma is now being made. The 191 ranch recently purchased 10,000 head of cattle in Florida. They will be fattened and sold. The entire shipment will require approximately 400 cars.

ANOTHER OLD ONE GONE WRONG

"There's always room at the top," said the Sphinx. "Take a look at us and guess again, replied the Pyramids. Give a woman a rocking chair and a handkerchief and she is prepared to weep with the whole world. Every woman who does all her own work knows what it means to exceed the speed limit.

FLAG OF DISTRESS

How a Defiant Daring Young Man Ended Long Standing Deadly Feud.

By GERTRUDE MARY SHERIDAN. "It's in the blood, I tell you, Floyd Darrell. Get rid of it, by from it, avoid it as you would a pestilence, or it will destroy you! I bid you go, and at once—anywhere, away from here, where you will meet your fate if you remain."

It was a solemn, eventful moment in the life of young Darrell, returned after many years to the wild, barren district where he had been born. He stood just outside a rude log structure that had once been a storage shed. Near by were the cindered ruins of an old-time mansion; all about the little dip in the landscape reared the grim, rugged Tennessee mountains.

A grand old man with whitened hair, once a powerful giant, and still having a mighty frame and firmness and decision apparent in every lineament of his bronzed, scarred face, had addressed him—Ogden Blair, mountaineer, judge and political leader, the sole survivor of the great Blair-Logan feud that had entered many a bloody page in the record of Dawson county. "Come here," he said, and he forcefully dragged his visitor by the arm to the open doorway, and pointed an impressive finger at its rude interior. "You see that table, set for six? Always so, and the four vacant chairs we join, my niece, Eugenia, and I, at each meal, remind us of the stalwart, noble sons who fought and died sustaining the Blair family honor. I am the last of my line. A month ago Hank Logan and his raiders burned down the house. Later he sent word that if I did not move he would end the vendetta with me. Move!" cried the old man till his voice echoed ringingly to the nearest towering hill. "Why, my sons would arise from their graves to curse me, if I gave up the fight of fifty years in which never a Blair turned his back to a foe. Here I live and die. But you—lad, I knew and loved your father. He was a 'gun man,' and his father before him. It was born in them. Now, why have you come back, to be tempted with

oak tree a bird had built its nest. As the morn broke, its twitterings gave place to soft, plaintive coolings, and then, as the sun arose it burst into all the full melody of rich, harmonious sound. A solitary figure toiled up the steep side of a wild mountain, passed the tree, and crossed the dividing line of the bad lands. It was Floyd Darrell.

What was behind him caused a wistful, longing sadness he tried to shake off. What faced him he did not know, but the first warning menace greeted him as he leaped a narrow ravine, and a shot told that the jealous dominions of Hank Logan were under vigilant patrol. A stranger had no business there. Any district man might avoid being mistaken for a revenue officer in disguise if he showed his colors—a flag of truce. A somber foreboding prevented this with Darrell. He felt that money would not avail. Then it was face to face, and the quickest man would win.

Twice during that morning a bullet sped dangerously close to the head of the persistent adventurer. Darrell kept on his way until afternoon, when he saw coming down a narrow gorge path some horsemen. Swinging himself down a network of vines to a ledge, he crouched there.

The horsemen dashed by. About to attempt to regain the cliff surface, Darrell started as he heard a moan beyond a light screen of greenery. Upon a narrow shelf of stone lay a little child. It had apparently stumbled over the edge of the cliff. Its face was bruised and bleeding, and a second it would have rolled into fathomless depths below. Just in time Darrell reached the little girl.

He climbed back to the higher ground, carrying the dazed child in his arms tenderly. Two hours later a body of horsemen came dashing towards him. He held the child aloft as a signal of distress, a living flag of truce.

The moment the leader of the band neared him, Darrell knew that it was Hank Logan. With a glad cry he seized the child. He made Darrell tell how he had come across the little one. He grasped the hand of the rescuer in a fervent grip. "And who are you?" he asked. "I am Floyd Darrell," came the quiet reply. "I have come to see you about Ogden Blair," and Darrell told why. Lower and lower went the head of the listener. The daring, defiant face softened.

Hank Logan lifted his gun. Across its stock were four nicks. "The count's done!" he said, and gave the deadly chronicle of doom for the Blairs a fling into the nearest gully. "You've won. Tell Ogden Blair I'll do the moving, and the feud is squared. Me and my men will be over in Kentucky before another week—all because you risked your life for my little girl."

Hank Logan lifted his gun. Across its stock were four nicks. "The count's done!" he said, and gave the deadly chronicle of doom for the Blairs a fling into the nearest gully. "You've won. Tell Ogden Blair I'll do the moving, and the feud is squared. Me and my men will be over in Kentucky before another week—all because you risked your life for my little girl."

Have you ever asked yourself the question? I have come to the conclusion that in many things they are, and more particularly about food and table appointments. Perhaps this is because women are habituated to the seamy side of cookery, to the sight of uncooked articles. Men only see the results of all these processes, some of them disagreeable, whereas even the most fastidious mistress sometimes, however reluctantly, comes upon the basement operators in the midst of a far from aesthetic task.

The gilded youth of today is a most terribly fastidious person. His chief cult is himself, and anything that jars upon his sensitive nerves and his "culture" seems a heinous offense.

I was made to think about these things the other day when a man speaking about a girl whose acquaintance he had lately made agreed that she was very pretty, very attractive, etc., "but," he added, "I don't like looking at her. Her hair is never tidy; pieces of it stream down at the back, and there is something about the back of her waist that is disorderly." I give you his own masculine expressions. Neatness appeals immensely to men. Soiled gloves, crushed handkerchiefs, untidy footgear, have done more to disillusion the masculine creature than the culprits who permit themselves these disorders can ever imagine.—Exchange.

Oil for Battleships. The last American battleship that will burn coal has been built. The big one now building have no coal bunkers and no arrangement for burning coal. They are oil burners.

"What is the advantage?" I asked a United States naval officer. "There are many advantages in oil," he replied. "First, we can steam further with a given number of tons of oil than with the same number of tons of coal. We can also store the oil more advantageously, for it will fill corners in a ship where coal could not be placed.

"A very big advantage, however, is in the reduced number of men required to handle the boilers. One man with oil can take the place of four men shoveling coal. Usually the oil is sprayed into the furnace, but there are several methods of applying the oil."

This officer said that the United States will have very valuable oiling stations in Alaska. Arrangements are already making to establish oiling stations in place of coaling stations in various parts of the world.—Philadelphia Public Ledger

On the twig of a straggling veteran

MAKING A SHEEP TROUGH

BUILD LOW TO PREVENT TURNING OVER.

By C. E. Brashear, College of Agriculture, University of Missouri.

The ease of handling has much to do with the utility of a sheep trough. Sheep are particularly about where they eat, as well as what they eat. A trough that can be readily moved from place to place and one that can be easily cleaned is also one of the easiest and cheapest to build.

The following is the plan of a trough that is durable and convenient: Take a 1x12-inch board, 12 feet

long. Let this be the bottom of the trough. Nail strips four inches wide on this so as to form the sides of the trough. The ends of these pieces should be square and even with the bottom.

Cut four 2x4s, 16 inches long, for the legs of the trough. In one end of each cut a notch as shown in the diagram. Nail these on, one at each corner, by driving nails through the sides and bottom into the legs. Have the outer sides of the legs just even with the ends of the bottom and sides.

Nail four-inch strips from one leg to another so as to form the ends of the trough. Nail these to the legs, sides and bottom. Nail four-inch strips on the opposite sides of the legs so that they run along underneath the bottom of the trough. Drive nails through the bottom into these strips. This completes the trough.

Soft pine makes nice light troughs, and they will last well if kept painted. For unpainted troughs hard pine or elm should be used. In any case, elm or oak should be used for the legs.

This trough is used by practical feeders and breeders. In building sheep troughs it should be kept in mind that the lower they are the harder they are to turn over.

By C. E. Brashear of the College of Agriculture, University of Missouri. (Copyright, 1912, by W. G. Chapman.)

Writer Claims That Man is More Fastidious Than Woman—Have Proofs Come Under Your Observation?

Have you ever asked yourself the question? I have come to the conclusion that in many things they are, and more particularly about food and table appointments.

Perhaps this is because women are habituated to the seamy side of cookery, to the sight of uncooked articles. Men only see the results of all these processes, some of them disagreeable, whereas even the most fastidious mistress sometimes, however reluctantly, comes upon the basement operators in the midst of a far from aesthetic task.

The gilded youth of today is a most terribly fastidious person. His chief cult is himself, and anything that jars upon his sensitive nerves and his "culture" seems a heinous offense.

I was made to think about these things the other day when a man speaking about a girl whose acquaintance he had lately made agreed that she was very pretty, very attractive, etc., "but," he added, "I don't like looking at her. Her hair is never tidy; pieces of it stream down at the back, and there is something about the back of her waist that is disorderly." I give you his own masculine expressions. Neatness appeals immensely to men. Soiled gloves, crushed handkerchiefs, untidy footgear, have done more to disillusion the masculine creature than the culprits who permit themselves these disorders can ever imagine.—Exchange.

Oil for Battleships. The last American battleship that will burn coal has been built. The big one now building have no coal bunkers and no arrangement for burning coal. They are oil burners.

"What is the advantage?" I asked a United States naval officer. "There are many advantages in oil," he replied. "First, we can steam further with a given number of tons of oil than with the same number of tons of coal. We can also store the oil more advantageously, for it will fill corners in a ship where coal could not be placed.

"A very big advantage, however, is in the reduced number of men required to handle the boilers. One man with oil can take the place of four men shoveling coal. Usually the oil is sprayed into the furnace, but there are several methods of applying the oil."

This officer said that the United States will have very valuable oiling stations in Alaska. Arrangements are already making to establish oiling stations in place of coaling stations in various parts of the world.—Philadelphia Public Ledger

### FLYERS CAUSE FEAR

Aviators From Continent Fly in Darkness Over England.

British Government is Providing "Sky Guns" to Repel These Aerial Trespassers Who Appear During Night.

London.—A popular pastime now days with continental aviators would seem to be flying trips by night over England. Daring air pilots in Germany or France leave their moorings at dusk, speed over the channel, and then circle over British cities and forts, flashing their lights to mystify and alarm the people below them. With the first indications of dawn the adventure comes to an end. The prowling birdman heads for home, houses his machine before the sun is well up, and leaves the officials of England to report his incursion to the war office in London.

Reports of these night visits became so general, and were at the same time so disconcerting, that the government finally took official action and passed a bill prohibiting the passage of aircraft over certain specified areas. Aircraft violating this regulation will be fired on and otherwise warned away. The bill was introduced into the house of commons by Colonel Seeley, secretary of war, and it passed through all its stages at one sitting, without discussion. It went to the lords the day before recess and passed that house just as hurriedly.

How the measure is to be enforced has aroused considerable interested speculation. The bill authorizes the proper officers, after giving a prescribed warning, to fire at any aircraft infringing this law, and to use any and every means to prevent infractions.

The government is providing "sky guns" to repel these aerial trespassers, and it will also have the services of the naval aeroplanes and hydroplanes and the flying fleet of the army, which consists of about a dozen aeroplanes and three small airships. Experts have very grave doubts whether these precautions will be sufficient to prevent the midnight visits. What gave rise to the action of the government were reliable reports, in some cases from army officers, that aircraft had been seen over Dover, Sheerness, Portsmouth and Liverpool, and on at least two occasions as far west as Cardiff, always at night. The first visits were paid in October and they have continued up to the present time.

At first there was an inclination to make light of them, or to ascribe the moving lights and the noise of the propeller to some airship privately owned in England. But investigation showed that this could not be, and now the government places the blame on privately owned foreign airships. Some people, however, discard this assumption, and declare that at least one of the aerial visitors came from Borkum, the German fortress nearest the English coast. From Borkum it would be a very simple matter for a modern airship to pass over the North sea and even right across England, as in the case of the ship that flew over Cardiff, and be back at her base before morning.

### CREMATION IS HELD "PAGAN"

Sharp Controversy Precipitated by Health Officials' Advocacy of Incineration as Best Method.

Washington.—Dr. W. C. Woodward, health officer of the District of Columbia, has precipitated a sharp controversy on the question of cremation, which is stirring church circles. Clergymen have taken up the matter and are denouncing as "pagan" such disposition of the dead. The controversy has reached the newspaper stage, and arguments for and against cremation are finding their way into print.

"I believe it is the only sanitary way of disposing of the dead," said Dr. Woodward, "and surely it is the only poetic way. I hope to see cremation extended."

Monsignore William P. Russell, pastor of St. Patrick's Catholic church, declared that cremation "was against the teachings of Christianity." He declared that it was contrary to the tenets of Catholicism and that such disposition of the bodies of the departed was a reversal to the days of pagan Rome.

Several Protestant pastors voiced the same view.

### URGES WORK FOR WOMAN

Claims Her Place in Some Definite Vocation or Profession Will Not Make Her Less Attractive.

Kansas City, Mo.—"Girls and young women should have occupations," said Rabbi Henry H. Mayer of B'Nai Jehudah temple, in a lecture on "The Independence of Women."

"The cessation of women's being an equal sharer of the burden with man has made her a drone and a parasite," he said. "Women's field of labor has shrunk so that her status is only one degree better than that of the woman in the oriental harem."

"Women's entry into a definite vocation or profession and her rivalry in business will not make her less attractive to man. Men like to talk to independent women who know something of what is going on in the world."

### DIFFER AS TO HEIR'S BRIDE

Alexandra and Mary Disagree Over Wife for Prince of Wales—Ban on German Princesses.

London.—The engagement of the kaiser's only daughter, Princess Victoria Louise, to the son of the duke of Cumberland came as a great relief to Queen Mary, who has always dreaded that a marriage should be arranged for political reasons between the princess and the prince of Wales. Typically English as the queen is, she would prefer her oldest son to marry an English girl if there were one of equal rank to be found within this country, but as this is not the case, she knows, of course, that the prince of Wales will eventually have to marry some foreign princess.

She has become quite resigned to this idea, but she still draws the line on German princesses, and hopes that the future king of England will eventually marry one of the czar's young daughters. On this point, however, she meets with strong opposition from Queen Alexandra, who maintains that it would be fatal to the best interests of coming royal generations to allow a union of two young people who are not only as closely related as are the prince of Wales and a daughter of the czar, but whose fathers are exact doubles of one another physically as well as mentally, and both very far from being robust. Queen

Queen Mary.

Alexandra also fears that her young Russian granddaughters may have inherited a strain of the melancholy of their beautiful and lovely mother.

As the young prince of Wales is of a very shy and rather effeminate disposition, Queen Alexandra maintains that the proper wife for him must be a strong, vivacious and spirited princess, and her favorite candidate is the oldest daughter of the king and queen of Italy, in whose veins flows the vigorous and healthy blood of the Montenegro princes, who, although now of royal rank, are only a few generations removed from strong peasant ancestors.

Queen Mary's principal objection to the Italian princess favored by Queen Alexandra is that England's future queen ought to be a Protestant by birth.

### ITS AGE IS TWO CENTURIES

Elliot School, Boston, Mass., Celebrates 200th Birthday—Has Occupied Four Buildings on Site.

Boston.—The Elliot Grammar school of Boston held exercises in celebration of the rounding out of the second century of its existence. The school was founded in 1712, when the sturdy fathers of colonial Boston voted to establish a school at the north end of the town to accommodate the growing population in that section. One year later the little edifice was completed and its doors thrown open. The school is the oldest elementary school in the city and the second oldest free school of any kind.

The original building lasted through the period of the revolution and was not torn down until 1792. The second building lasted until 1837 and the third persisted until 1860, when the present edifice was erected. All have occupied the same site, which is within a stone's throw of Christ's church, where Paul Revere's lanterns were hung.

Many famous men received their elementary education at the old Elliot school, among them Edward Everett, the famous statesman and orator, and Rev. Samuel S. Smith, author of "America." The last quarter of a century has seen great changes in the section of the city where the school is located, and today 90 per cent of the pupils are the children of Italian and Jewish immigrants.

Journalists May Be "Certified." Harrisburg, Pa.—Pennsylvania newspapers are to have "certified journalists," if a joint resolution of Senator C. A. Snyder can be passed. The resolution provides that all "journalists" would be required to pass an examination before receiving a certificate to "practice."

Basket Ball Called Immodest. Dennison, O.—The Uhrichville high school faculty has forbidden girl pupils to play basket ball, declaring it immodest.

Skin Covered With Fine Scales. Cincinnati.—A woman whose skin is covered with scales similar to those of a fish was shown before the Academy of Medicine.

### GARIBALDI IS IN U. S.

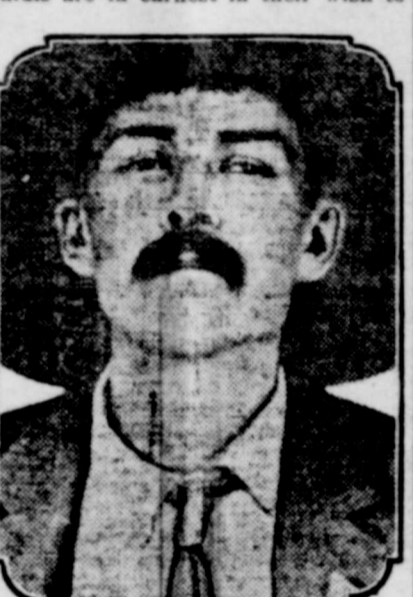

Six Republics Quietly Wondering What He Intends to Do Next.

True Soldier of Fortune—Has Risked Life in Half Dozen Wars and Escaped—Fought With Bulgaria—Gen. Orozco's Exploits.

New York.—Some folks say there is no such thing as luck. Tom Carter stepped off a two-inch curb the other day—and died. Gen. Joseph Garibaldi risked his neck in six wars and was never scratched. What's the answer?

Garibaldi is in town just now. Coincidentally, the rumor comes from the south that the revolutionary pot is on the fire in six South American republics. That may have something to do with Garibaldi's presence here and it may not. In any event, Garibaldi is one of the free lances of fortune one reads about and rarely sees. He has just returned from the war in Bulgaria, where he had an independent command. Before that he was Madero's chief of staff in Mexico—having fought his way to that position by metaphorically tweaking the nose of Bandit Orozco, the most dangerous foe to established order—any established order—that Mexico holds. Before that he sat in a black cell in Porto Cabella for seven months, at Gen. Castro's order, while he filed at his manacles with the bit of tin that had once been the top of a can of beans. And before that—

But that's the story that must be taken up item by item. Garibaldi is the grandson of the great Garibaldi, the liberator. Fighting runs in the Garibaldi blood. No doubt the Garibaldis are in earnest in their wish to

General Orozco.

free the world from the bonds of tyranny. There is little question that none of the Garibaldis likes any of the ruling families, and that all the ruling families would be grateful if some one would push the Garibaldi off a dock into particularly deep water. But mostly this Garibaldi fights because he likes fighting. Incidentally he has been rich from time to time. Money never lasted long. Also, when the map of the world seems sure of surreptitious alteration Garibaldi is one of those whose whereabouts are pegged by various secret police. The map is gradually changing color these days. Garibaldi offered to land 20,000 Italians in Tripoli at their own expense, armed and equipped and guaranteed fighting men. The Italian government refused the offer. The government needed men mightily badly, but it didn't care for any Garibaldis. He took 500 Greeks from New York to the war in the east at their own cost. Now he's back in New York. What pot's on the fire?

He's only a youngster in years—a scant thirty-three. But he has been at war for the past seventeen years.

Between times he has filled in with diplomatic and political missions. He has an eye for revolution like a hawk in the sky. Just after the ill-fated Madero raised his banner of revolt against Porfirio Diaz, Garibaldi appeared with eight comrades on the border and offered his services to Orozco, the bandit leader.

"I'll have none of you," growled Orozco. "You're too clean."

That's an insult to a soldier on the desert. But the eight started a revolution of their own—against Diaz, against Madero, against Orozco. Soon they were strong enough to make terms. Garibaldi took Juarez, and Madero made him his chief of staff.

"Back Felix Diaz and Huerta against a wall," Garibaldi advised. "Kill them now—to prevent the deaths of hundreds later on." But Madero would not. He might have saved himself and his administration if he had taken the soldier's advice instead of listening to the dictates of his own gentle heart. Then Garibaldi went on to Tripoli and Bulgaria and where not—and now he's back in town.

Six republics wonder why.

Loeb Gives a Tea Party. New York.—Collector Loeb gave a tea party recently when he dumped 20,000 packages of tea into New York bay, which was excluded for not being up to the standard. All the fish were invited.

Pheasants Become Plagues. So numerous have pheasants become in the state of Washington in three years of closed season that they are becoming troublesome. Electric suburban cars have on numerous occasions been compelled to slacken their speed to permit the birds to get off the rack.

### The Crocodile Wrench

The Crocodile is also a handy household tool.

FREE

Enclose \$2.00 for six months' subscription to Stock Yards Daily Journal and wrench will be sent you free of charge.

### SAVING LEADS TO WEALTH

Henry E. Huntington, Ship Builder, Asserts Young Men Should Invest to Compel Thrift.

Los Angeles.—Henry E. Huntington, of New York and Los Angeles, who at the age of sixty-three is retiring from business as rapidly as possible, but whose fortune of forty or fifty million dollars will keep right on working for him, said that the habit of saving paves the road to wealth.

Mr. Huntington believes that this is an age of great opportunity for young men and this is his recipe for success:

"Save a little every week. When you get an increase of wages or salary continue to live within the former limits and save the increase.

"If you find it difficult to save go in debt for a home or undertake some other obligation in the way of investment that will compel you to save."

Henry E. Huntington.

Mr. Huntington declares he has already practically retired from business.

"I shall give little personal attention to my investments here, nor to those in the east, which are practically as large as my interests here," said he. "For illustration, I scarcely bother my head even now about the ship building plant at Newport News. Altogether I have about 6,000 employees in my eastern enterprises, but when I am in New York I do not spend more than an hour a day in my office."

Mr. Huntington's famous paintings, rare objects of art and almost priceless volumes have all been bought by himself and in New York, either as offered for sale there or brought over under options subject to his approval when he saw them. He has never depended on agents, and he will not in Europe if the buying fever seizes him.

Pheasants Become Plagues. So numerous have pheasants become in the state of Washington in three years of closed season that they are becoming troublesome. Electric suburban cars have on numerous occasions been compelled to slacken their speed to permit the birds to get off the rack.
