"Old Man Of Doorn" Won't Return To Land

Relapse Brings Death To Ex-Kaiser

By The Associated Press BERLIN, June 4—(AP)—Former Kaiser Wilhelm II of Germany died today at his exile estate of Doorn in the quiet backwash of a new German conquest almost 22 years after he fled from the crumbling failure of his own European war plan.

honors is to be accorded Imperial Germany's last Emperor. The German high command has taken full charge of the military phase of the funeral, a token, perhaps, that reconciliation between the Kaiser and the former Emperor had been complete.

Second in the family line, Prince Louis Ferdinand, also was away from Doorn. It was reported here that the former Emperor talked for several hours yesterday afternoon with his Major Domo, but showed signs of a relapse later, approaching a crisis at 8 p. m., and shortly thereafter lost consciousness.

Marched with the gray-green legions. Two of the grandsons since have fallen in battle. Another grandson was interned by the British. Rumor on rumor had cropped up since 1933 that the Kaiser was actively "behind-the-scenes" of rejuvenated Germany and that he would one day triumphantly return to Berlin to claim his "divine right" as Emperor. All such reports were quickly spiked.

## About Censorship

Newspapers in the United States are not censored. They must not be, even should the emergency become more critical.

We have the word of Lowell Mellett, head of the Office of Government Reports, that no censorship is contemplated. We have the word of George Creel, who managed such matters during the World War, that it doesn't work anyway, even when "voluntary." Both men ought to know what they are talking about.

There can be only two reasons for censorship of newspapers. One is to manipulate people at home. The other is to keep information of military value away from possible enemies abroad. The first we don't want. The second is the sphere in which to operate.

Free, democratic peoples can be told the truth. If it is bad, so much the more reason for telling them. They will hold firm, even when it's bad. Britain proves that.

Good sense indicates that information of military value shall not be passed on to enemies or potential enemies. That's the place for censorship. When a piece of information of value to a potential enemy becomes known, what happens? It is immediately passed on to the country interested.

Now military information is a perishable product, like fish. If not received in time, it's no good. Modern conditions being what they are, it can be assumed that no military secret can be kept forever. If it is delayed long enough, however, that is enough for practical purposes.

Thus it may be seen that censorship is apt to do the one thing it should not do: namely, becloud local opinion; while failing to do the thing it ought to do: namely, preventing the enemy or potential enemy from getting the information in time to do it any good.

Voluntary censorship keeps little news from going abroad, especially since the cables abroad are uncensored. Shortwave radio and the cables! Those are the points to choke off information going abroad, not censorship of American newspapers. True, such restriction is not airtight. The news will sift abroad sooner or later, but probably too late to be of value.

That is the sort of restriction which Creel recommended, with his World War experience with voluntary censorship back of him. That is the sort of censorship, together with proper reticence at the source, which will do what needs to be done.

For free Americans, full information; for enemies or potential enemies, nothing. That is the general framework on which any arrangements for news coverage in an emergency should be worked out.

## Death Takes No Vacation

Pretty soon most Americans will be launching out on their vacations (except those like the 38,000 in the vital Curtiss-Wright airplane plants, who have patriotically given up theirs in order to produce 60 more planes and 280 more engines during that time).

The least those of us can do who go on the annual vacation is not to kill anybody while we're away. Yet some of us will.

Vacation season is always a carnival for death on the highways, and the United States enters this one with 1500 more dead already on the roads this year than last. In the first four months of this year, 10,780 persons have been killed in traffic. We are headed for a new high record unless we can restrain our passion for speed, our road recklessness.

Drive slowly—conserve your car, your tires—and your life.

## More And Better Food

A man may be well fed and at the same time ill nourished.

The National Nutrition Conference for Defense has gone to bat with the proposition that it is not enough to see that people have enough food; that a great country like this one can also undertake to see that they have the right food.

A great deal of study has gone into foods in recent years. We know, or think we know, more about them than our grandfathers did. Those who have had the advantage of studying such things have had this new knowledge at their disposal.

Now this new national conference seeks to put this knowledge at the disposal of the nation as a defense measure. It finds that 40 per cent of the people do not eat proper foods, are, in fact, ill-nourished, though they may have plenty to eat.

To remedy such conditions as that is another way of creating "all-out" defense.

## Highlights From the Week's Oil News

Completions last week totaled 644, an increase of 46 over those of the preceding week and representing the most active week of the year to date. Oil wells were up 60, dry holes up 7 and gas wells down 18 from the preceding week. Contrasting two consecutive weeks' completions shows little in the way of trends as weekly variations are often considerable even in uniformly active areas. A check against reports of the year's low, the week ended March 15, gives a much clearer idea of trends. During that week there were 420 completions, of which 286 were oil wells, 46 were gas wells and 88 were dry holes. The total completions are, thus, up about 50 per cent, with gas wells running at the same level, oil wells up about 55 per cent and dry holes up 60 per cent. The increase last named is due in large part to the completion of wildcats started during the spring upturn in activity.

East of the Mississippi River, activity has increased in all areas from 174 completions to 258. Indiana and Michigan show little change but Kentucky's gas play and the drilling up of many pools in White County and the Benton pool in Franklin County, Illinois, play an important part in the increase. This trend appears likely to continue upward with the Devonian at Loudon entering the picture.

In the northern Mid-Continent, Kansas shows a great increase with a less significant change in Oklahoma, Louisiana, Arkansas and Mississippi are all more active although the increase has been less than average. The Gulf Coast shows little change and West Texas has also maintained nearly constant activity but North Central Texas, East Texas and the Panhandle show an increase of 60 wells above the year's lot of 52 for the three districts. In the Rocky Mountain area and in California completions have also doubled.

The present drilling picture, therefore, shows considerable increases in most of the eastern area, Kansas, North and East Texas, the Rocky Mountain states and California. Of these, the impression gained by comparing these two weekly reports appears to be erroneous for California alone. Regardless of the present comparative figures, these major areas appear destined for levels greater than those attained last year.

MISSISSIPPI: The 40-acre spacing rule in force at Tinsley continues to break down as the fourteenth permit is issued to drill on smaller spacing.

INDIANA: Whisenant & Trenchard have three pays to test in their Posey County discovery, the Aux Vases, Renault and Cypress. Oil has been found in the Palestine in the Rockport gas field in Spencer County.

KANSAS: Development and market demand are ahead of pipe-line capacity and prospecting crews continue active.

ILLINOIS: Six Devonian tests are starting in Loudon and Benoit production has been found in Effingham County to the east. In White County, a new Watersburg pool has been opened near the Haven pool, and East Calvin and North New Harmony have been connected by the Aux Vases production.

Table with columns: State, Oil, Gas, Dry, Total, 1941 tot. comp. to date, 1940 tot. comp. to date. Rows include N.Y., Pa., and W. Va., Ohio, Indiana, Kentucky, Illinois, Michigan, Kansas, Oklahoma, Nebraska, Missouri, Iowa, Texas (North Central, West, East, Texas Panhandle, Texas Gulf Coast, Southwest), Louisiana, Louisiana Gulf Coast, Louisiana, Arkansas, Mississippi and Southeast, Montana, Wyoming, Colorado, Utah, New Mexico, California, Total United States, Total previous week, Week ended June 1, 1940.

## Legislature Strives For Safer And Better Traffic In New Laws

AUSTIN, June 4—(AP)—Smooth, fast and safe flow of traffic over Texas highways and city streets was the goal of the 47th Legislature in passing a driver's license law, a measure requiring accident reporting, new speed regulations and legislation revising the drunk driving statutes.

All drivers will have to obtain new licenses. Dates for re-registration were staggered to prevent an unmanageable rush at the department of public safety. Here are the renewal dates:

Numbers 1 to 450,000 expire December 31, 1941 and are renewable beginning October 1, 1941; numbers 450,001 to 800,000 expire March 31, 1942 and may be renewed beginning January 1, 1942; numbers 800,001 to 1,350,000 expire June 30, 1942 and are renewable April 1, 1942; numbers above 1,350,000 expire December 1, 1942 and are renewable July 1, 1942.

Automobile operators will have to pay a fee for the first time; the legislature, after much haggling, agreed to a 50-cent charge for the two-year permit.

Chauffeur's licenses will cost \$3 and commercial operator's licenses \$1.00.

er. Clay County has its second new pool in 2 weeks.

LOUISIANA GULF COAST: The emphasis was on shallow sands last week as West Lake Veret got the second producer in the shallow sand, Bay Marchand salt dome was testing and Richie was extended. West Bay was also extended and the second well at West Port Allen was nearing the pay.

WEST TEXAS: The second well in the Santa Hills extension pool is near completion. The well is running higher than the extension discovery and may indicate a minor structure on the large regional Ellenburger high. A wildcat south of Slaughter in Cochran County has opened up a new field which may eventually prove to be a major extension to Slaughter.

WEST VIRGINIA: Two oil shows in the gas field may not prove to be of major importance in themselves, but they may point the way to development of some importance. One of these tests was in the Oriskany in the new Ravenswood district and the other in the Big lime above the Oriskany pay in the Kanawha district.

TEXAS GULF COAST: The second well, extending the Lake Creek field 4,000 ft. and the placing of the Vienna pool on production keep the Wilcox play moving along. Miocene production has been found northwest of Dyersdale.

ARKANSAS: McKemie was extended 1 mile northwest and a showing 5 miles east of Dorcheat in Cotton Valley may open a major extension to that field.

SOUTHWEST TEXAS: Whether or not the Wilcox will produce oil or remain a gas-distillate pay in this area may be decided by a test in Live Oak County.

NEBRASKA: The Viola lime appears to be out of the picture as far as possible producer at Falls City. The highest well in the field found that formation dry and made a good well in the Hunton.

OKLAHOMA: Simpson production has been found in the Apache area west of Cement and the Noble pool in Cleveland County was revived by a good flow from the Wilcox sand.

COLORADO-WYOMING: A new shallow sand has been found in the Hiawatha gas field. Rock River is extended to the northwest and Maverick Springs has its first Embury producer after a 15-year shut-down.

NORTH TEXAS: Another Ellenburger pool has been opened up on the Mustang arch, 5 miles north of the Voth pool. The pay is 1,450 ft. lower than at Voth. A possible 2-mile extension of K.M.A. has been found.

EAST TEXAS: The new Sears pool near Henderson does not appear to be of great importance. It is of interest, however, in that Woodbine sand has been found below the level of the Texas field and slightly to the east, indicating the possibility of down-faulted blocks containing Woodbine production.

### "Round Up" Gay Event Of Civic Theatre Week

Mrs. N. A. Lancaster Is Hostess To Large Group At Her Home

Midland Civic Theatre Week got into full swing Tuesday evening with the first social event of its seven-days celebration. The "round-up" for which Mrs. N. A. Lancaster was hostess at her home on Indiana Street, was one of the group's gayest affairs, with square-dancing, singing and a bingo game as the evening's chief diversions.

The bingo game was conducted in a mock professional manner, with U. A. Hyde as croupier, Stella Maye Lanham acting as banker and Walter Wilkinson as the successful "banker" who lured the guests to the gaming table.

J. A. Duffeyes called the square dances, and Roy De Wolfe played the accompaniments to the old-time figures, alternately on piano and accordion, in a lively country-dance style.

Huge silver trays of sandwiches and punch were passed informally among the guests and dancers at the refreshment hour. About fifty persons were present, including as special guests patron members of the organization and Mr. and Mrs. J. N. Allison and Mr. and Mrs. Leo McLaughlin.

Civic Theatre will close its round of activities with an old-fashioned box supper and dance at Log Cabin Saturday evening at 7:30. Aprons, overalls, slacks and other informal attire will be in order.

### FEMININE FANCIES

By Kathleen Eiland

Nice costume for a girl with midnight-black hair: Thin black sweater topping a whitest skirt splashed with a large design in black and colors.

Regrets: That we can't eat as much fried chicken as we want to (we think we got cheated when Nature didn't give us the appetite capacity of a 200-pounder, anyway); that cold weather always gets too cold and hot weather always gets too hot in Texas; that we weren't born one of those lucky girls who can look and apparently feel cool and crisp when the thermometer starts flirting with the 100 mark; that shoes are so hard to keep polished; that fingernails always break at the wrong time.

One of those small but clever innovations which we see in our window shopping is the transparent cylinder with cord handle filled with multi-useful cotton dabs for the toilet table but designed, after the cotton is used, to be employed as a knitting bag.

What with the picnic sites beginning to have their usual rush of summer business, the question of picnic supplies becomes one of delightful choice between delightful and colorful items. Year by year, the throw-away forks and spoons, become more substantial, colors of the plates and cups more glowing, and the designs of the napkins and paper table spreads more artistic. There are even cardboard coasters for those tall cold glasses (which have such a habit of untidily dampening whatever they stand on).

More power to picnics say we, and more ingenuity to the men who design the apparatus for them. Picnics are about the most typically American outings that we know.

**Announces Wheat Loan And Penalty In County**

Most bridge players say there is no such thing as bluff in bridge as there is in poker, but I've noticed a big husky fellow doesn't get doubled often. And some players may try to take advantage of small opponents.

For example, here is a hand that helped Mrs. Hugh Fullerton win the Ohio State Women's Pairs. I think her opponents were trying to take advantage of her demure personality but she "pinned their ears back" before the hand was over.

The play opened by North's taking both king and queen of spades. Now Mrs. Fullerton made a brilliant play by leading a third spade into West's tenace, in order to take out dummy's last spade.

West led the singleton heart and won in dummy with the king. A diamond return was won by the jack. Mrs. Fullerton holding off in an effort to kill the suit. Declarer continued with ace and king of diamonds, then cashed the ten of spades and led a fourth diamond.

But Mrs. Fullerton escaped the end-play in clubs, for which declarer was playing, by taking the ace of hearts and leading the six. Thus the defense had to win another heart or a club at the end for the setting trick.

## Kelly Officials Test New Type Ambulance

SAN ANTONIO, June 4—(AP)—Kelly Field officials are testing a radio-controlled ambulance to enable an airplane to direct the ambulance to the scene of a crash, officials announced today.

Working on the plan are Lieut. Col. Reid B. Harding, senior flight surgeon at the field, and Major J. H. Bundy, director of flying at the field. The ambulance will have a two-way radio installed and will be tuned in on the same wave length as an airplane to be used to search for crashed ships.

## Forty Families Leave Lowland Flooded Homes

WICHITA FALLS, June 4—(AP)—The rain-swollen waters of the Wichita River and Holliday Creek seeped into houses in lowland areas and caused the evacuation of 40 families last night.

Cloudbursts along Beaver Creek in the Electrica district caused the river to rise. A two-foot flow over the spillway of Lake Wichita swelled Holliday Creek. The overflowing river forced the creek to back up and burst its banks.

## Flashes Of Life

By The Associated Press  
WEST CHESTER, Pa.—Attending a public auction out of curiosity, a tailor thought it was time to act when there were no bids on a 3-story building. He started the ball rolling with \$10,000 and that turned out to be the only bid.

"It was just a joke," he explained afterward. "I thought the building would fetch several times \$10,000 and I only wanted to get the bidding started. I don't want the building and I don't have the money to pay for it."

A trust company agreed to another sale but the tailor will be liable for the difference if the property brings less than \$10,000.

CHICAGO.—Judge Harry M. Fisher, acting on the petition of Giachiano Guzzardo, handed down a legal parity—a writ of replevin to recover the body of a dead person.

Guzzardo said that his 99-year-old mother died at a relative's home on the South Side but the body was taken to a North Side undertaker. He asked that it be removed to south Side mortuary as a "convenience" to friends and relatives.

## Officer Terms Review Of Army Troops Pitiful

TOPEKA, June 4—(AP)—After viewing a parade of 1,500 mechanized troops Topekans heard Brig. Gen. R. C. Rodgers, Fort Riley commandant, call it "one of the most pitiful things I ever have seen."

General Rodgers addressed a business men's banquet after the parade yesterday and said "those trucks which paraded up your main street were as helpless as a fleet of vegetable trucks. Each of them should have had three machine guns, an anti-aircraft gun, side arms and rifles. But there wasn't a gun in the lot."

"The reason is that we simply haven't got them."

### Most Feared Slugger Breaks Down At Side Of Ex-Yank's Coffin

By Gayle Talbot  
NEW YORK, June 4—(AP)—The last sad sentences were recited over Lou Gehrig early today in a little vine-covered church around the corner from his home in the Bronx.

The wasted body of the great Yankee first baseman who died Monday night after a brave two-year fight against an unsolved disease rested in a handsome mahogany coffin banked by thousands of blooms as the Rev. Gerald Barry spoke the burial office of the Episcopal Church.

There was no music and the ritual was at a minimum, conforming with the request of Mrs. Gehrig. Only those with invitations were admitted to the final rites. The public had expressed its sorrow last night in a line of men, women and children that wound past Lou's coffin before the altar for two hours.

Babe stood for a minute looking at his former teammate, whose handsome face showed only slight evidence of the disease that had paralyzed and wasted the rest of his body. Tears welled into Ruth's eyes and ran down his fat cheeks. He stumbled over into a corner and buried his face in his arms.

An attendant opened a door and took the Babe into an adjoining room until he had regained his composure. Then he brushed unsmiling through a hundred fans who had trooped with him to the door of the church and who met him as he came out another door. Even in death, someone remarked, Gehrig shared the spotlight with his famous teammate.

## Wise Guys Install Nelson Favorite To Win National Open In Fort Worth But Other Texans Won't Be Ignored

### By Bill Boni

PORT WORTH, June 4—(AP)—Byron Nelson, the likeable P. G. A. champion, is riding a rising tide of popular favor that appears ready to make him No. 1 choice for the U. S. Open Golf Championship about the time the first round gets started tomorrow morning.

Everywhere you go, whether you ask player, sideline expert or pure spectator, the name that almost invariably comes to their lips first is that of the long, lean Toledo pro who came up like a rocket from the caddy pen at Fort Worth's Glen Garden Club.

The way Nelson was playing in practice at the Colonial Club yesterday, when he and Lawson Little finished all-square with the "Old Masters," Gene Sarazen and Tommy Armour, he'll give anybody a good run for his money.

Hogan Lacks Assurance  
Ben Hogan, who started out as co-favorite with Byron in the betting books, has been in the money 47 straight times since he missed out in the Open at Philadelphia in 1939, and even if off his feed should make it 48 straight here.

But he seems to lack mental assurance. The confidence which, when he's right, amounts almost to a swagger isn't there this time. There is, however, another Texan not to be overlooked. That's Ralph Guldahl, who learned the game in Dallas. Big Ralph had an even unhappier time than Hogan on the winter tour (Ben, after all, was top money winner).

Since then he's trimmed off about 15 pounds, and he's been at the Colonial as long as any of the top-notchers, working hard and often in quiet.

Exports Beat Missions Twice  
For a wonder, rain didn't seriously interfere with yesterday's Texas League schedule, but club owners, players and fans are going around with their fingers crossed.

Official statistics showed that through Monday night excessive moisture had caused postponement of 53 games during 51 playing days, or more than one-fourth of the schedule.

Taking advantage of a hiatus between storms, the Beaumont Exporters took both ends of a double-header from the Missions at San Antonio, 3-2 and 6-0.
