WEDNESDAY, MARCH 29, 1978 **48 PAGES, 5 SECTIONS** 

## Mother sobs heart, mind 'torn' by Israeli bombs

#### **By ALY MAHMOUD**

BEIRUT, Lebanon (AP) - Five of her eight children are missing. She says the other three have been deaf mutes since Israeli bombers screamed down on their village in south Lebanon.

'My heart is torn, my mind is torn, I hardly feel I'm alive," sobbed Suad Sorour, a 32-year-old Lebanese Moslem, as she sat by her tent in the refugee camp on the southern edge of Beirut.

Tears streamed down her face as she patted the three bodies huddled

#### against her

"They are innocent children as you can see. They can never harm any Israeli or Palestinian. Why should my children suffer?'

Mrs. Sorour's home in Tair Harfa, about a mile north of the Israeli-Lebanese border, was one of the first hit when Israeli forces punched into south Lebanon on March 15 to rid the area of Palestinian guerrillas. Her single-story stone house lay near several guerrilla bases and her family fled for safety.

"They were like vultures diving to

snatch dead flesh. The Israeli planes ravaged our house and the neighborhood," the woman said

"We ran out, my husband carrying two children and me one. The children were trembling, their teeth chatter-

Her other five children panicked. "They ran out of the house when the Israeli planes were bombing our village I haven't seen them since '

Her husband, Mohammed Sorour, went in search of the five, hoping they sought shelter somewhere in the nearby hills. When he couldn't find them, the family crept through muddy plantations until they reached a hamlet about five miles north of Tair Haifa.

"We spent a day and a night in an orange grove. The whole world around us was burning. It was hell," said Mrs. Sorour. They trudged about 10 miles farther

northward and found a deserted house where they slept intermittent-

"But the vultures came again Deafening explosions terrified us.

"The children were fast asleep despite everything. We did not know at

that time that they had become deaf and speechless.

Her husband feared the Israelis were about to blow up the house, so they fled to an olive grove. White smoke filled the air and craters lined the hillside roads.

The family spent the night in a ditch

Hungry and tired, the family continued on its journey the next day with mother and father carrying

children on their shoulders. A few miles north of Tyre, a truck picked them up and brought them to Beirut.

They were taken to one of the tent centers the Lebanese government set up around the capital for Lebanese refugees. Palestinian refugees from the south are housed in the Palestinian refugee camps the United Nations has operated for nearly 30 years.

Mohammed Sorour visited several refugee camps looking for his missing children. They were not there.

## Poerner says coal looms big in state's future

#### **By LINDA HILL**

In the future. Texans more and more will be spelling energy C-O-A-L. That's the belief of Texas Railroad Commissioner John Poerner. Poerner, who was appointed to the commission in January, is running for an unexpired two-year term. He was in Midland Tuesday on a campaign swing through West Texas.

In the history of energy production in Texas, coal has accounted for only 0.4 percent of total production, Poerner said. But, he added, coal comprises 40 percent of the state's energy reserve

Poerner said the Railroad Commission, which regulates energy production in Texas, has ordered industry to begin converting from natural gas for boiler heat directed these companies to reduce their dependence on natural gas to 25 percent by 1985," he said. The candidate said the state attorney general, on instructions from the commission, has filed suit against the federal government to block enforcement of the federal surface mining bill Among the onerous requirements of that bill, he said, is one that would require coal companies to remove soil on "prime farm land" in layers and replace it in the same layers. "When you do that, the economics is shot," he said.

lieve we're being fair.

Of the sometimes conflicting interests of energy producers and consumers, Poerner said he thinks the present Railroad Commission strikes "a pretty happy balance between the two

In the past, he said, the commission was more closely aligned to producers, but that was in the days of "cheap energy," when consumers were not as interested in the workings of the commission

Next year, he said, the commission will have a "full-time job for five months" advising the Texas Legislature on the effects of various proposed laws affecting energy and transportation. His six years in the Legislature will help him do that, he said. i his own special est, as a land surveyor by profession, is in getting better maps for Texas. Currently available maps are "absolutely deplorable," and do not make use of existing technology.

THE "IN PLACE" TO GO this week in Midland seems to be the County Tax Assessor-Collector's Office as hundreds of drivers try to

beat the Friday deadline for vehicle registration. The tax office, located in the basement of the courthouse, is open from 8 a.m. to 5 p.m. Tax officials estimate 10,000 to 12,000 persons waited until this week to get their tags. (Staff Photo by Brian Hendershot)

## Officers re-elected by foundation

President C. Winston Barclay and other officers of the Industrial Foundation of Midland. Inc. were reelected at the foundation's annual meeting held this morning in the Reddy Room of Texas Electric Ser vice Co

The other officers are Howard D "Rocky" Ford. E.E. Runyan and Tony A Martin vice presidents. Wilbur A Yeager Jr treasurer 

Alsup. Doug Henson and Fred Tyler. assistant secretaries, and Martin Allday, immediate past president

Elected as members of the executive committee are Allday. Martin, T.L. Cauthen, Barclay, Joe rloesel Henson Ford RL Pendleton, Collyns, Spencer Blocker, Jim Allison Jr. Runyan, W.J. Mewhorter. Yeager Ray Moudy, Tyler and Boley Embrey

Following reports by Barclay and

Henson on expansion of Midland Industrial Park and the proposed development of additional property. the foundation was authorized to exercise purchase options on certain tracts of acreage and to proceed with development of other property already owned by the foundation in the immediate vicinity subject to financing arrangements through Midland banks and savings and loan

associations. The cost figure is in

excess of \$500,000

Henson pointed out that only 65 acres of developed land in the Industrial Park remain unsold A review of the foundation's operations and land sales during the

last year was heard The accountants report for 1977 was reviewed by Frank Kubica of the firm of Billingsley. Johnson, Kubica. Stewart & Co The report was accepted and approved The foundation was said to be in excellent financial position

A report concerning activities of the Midland Area Sales Team (MAST) of the Midland Chamber of Commerce. was reviewed for the foundation group

"It's all theory," Poerner said of federal energy policy. "They've never been in the field."

Poerner pledged to fight any federal gas bill which includes control of intrastate oil and gas. "We are not going to allow or permit the rape of Texas' natural resources," he said. Poerner is one of five Democrats running for the unexpired term in the

May 6 primary. He said the Railroad Commission

can help influence national energy policy by making sure that the data it accumulates is credible to federal energy planners. "They must believe we're telling the truth." He believes the commission now has "a good reputation" for accuracy

Another responsibility of the commission is to make the people "be-

## Hansen appointment blasted

The campaign treasurer for William B.Ahders, Republican candidate for county judge, today blasted Midland County commissioners for appointing Democratic candidate Blake Hansen to be interim county judge.

Robert Paxton, in a prepared statement, called Tuesday's hearing at which Hansen was appointed a 'mockery," and charged that the decision had been made in advance.

Abders, currently municipal judge for the city of Midland, was not at the hearing because he is in Montana to attend his father-in-law's funeral.

"The public testimony presented to the commissioners was overwhelmingly in favor of appointing a neu-

## by defeat of injunction

Mailey 'pleased, relieved

Midland Schools Superintendent Dr. James Mailey said Tuesday he was "highly pleased" and "quite relieved" thrac the three-judge panel in Dallas Tu esday turned down the U.S. Justice Department's request for an injunct ion to stop school trustee elections

School attorney Charles Tighe said terday the panel's decision at the 21/2nour hearing was "what we had hoped for" and called the justices' decision "very reasonable.

The Justice Department could appeal to Supreme Court Justice Lewis Powell Jr., the justice for this area, to overturn the panel's decision and

appeal Tuesday's decision.

delay the election

According to Mailey, the judges agreed not to grant the injunction since the school district was "so deep into the election process." Tighe said the panel felt it "wouldn't be equitable" to stop the elections at this late date

Tighe said today he knows of no

efforts by the Justice Department to

The Justice Department sought to delay the Midland elections because it felt the school's election system was in violation of the 1965 federal Voting **Rights Act** 

Tighe said the school district now

must file briefs with the three-judge panel in Dallas within 25 days concerning whether the Voting Rights Act applies to school districts which made changes in their election systems prior to Texas becoming subject to the act.

Texas came under the Voting Rights Act in 1975. The Midland school district changed to the place

system of elections in 1973. Tighe said it will be up to the judges to decide whether a constitutional question is involved. He said he rather doubts another hearing will

## Chartered boat capsizes;

## divers find no survivors

PORT ARTHUR, Texas (AP) - Achartered boat capsized after a nearcollision with a tanker in the Intracoastal Waterway near Sabine early today, and Coast Guard searchers were unable to locate survivors by mid-morning.

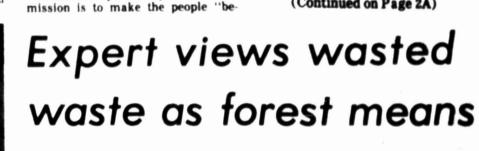

**Divers from the Port Arthur Fire** Department were called to the scene. It was not known how many people were aboard the charter boat.

The boat capsized following a nearcollision with the tanker "Zapata Ranger" about 4 a.m., according to a spokesman at the Coast Guard search and rescue headquarters in New Orleans.

A Coast Guard boat and a helicopter from Houston located only debris, including life rings bearing the name "Miss Brazosport" out of Galveston. A spokesman at the Sabine Coast Guard Station said the boat was believed to have gone down in 17 feet of water near Buoy 32 after being flipped by the tanker's wake.

Dr. Geoffrey Stanford, a waste management expert, talks about his proposals for the "greening" of the Midland-Odessa area with sludge, composted refuse and 'green water.' (Staff Photo)

Can't you just see the headlines?

Midland, Odessa United!

(At Last)

**Forest Joins Cities** 

#### **Officials Toast** 'Green Water'

And the gist of the stories is this: "Refuse, sludge, garbage are common to the Permian Basin cities." That may or may not come to pass.

The two competing cities are markedly different. They're more like Cain and Abel than they are the Bobbsey twins.

Just look to the skylines and then glance to the industrial rows.

Gaze upon the rich, the new-rich. the not-doing-so-badly mid-crust, the solid, the credit-riddled, the fair-tomiddling masses and, finally, the barely-making-it groups

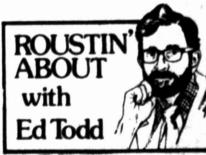

Check out the work force - the blue-collar versus the white-collar:

-- Clout versus Finesse. - Poker versus Bridge.

- Rodeoing versus Polo
- **Boldness versus Caution.**

The two cities are as different as Fort Worth is from Dallas. Yet, something is as common to them as air and sofl.

Yes. It's that unpleasant but everpresent "stuff" called refuse, gar-

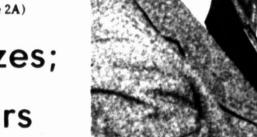

bage, sludge -- sewage, if you please. And an Englishman, Dr. Geoffrey Stanford, has a plan that, in one re-spect, would unite the two cities. His proposal is connected to his forte: waste management.

His plan calls for dumping and pro-cessing the waste between the two cities somewhere just north of Midland Regional Air Terminal. He recommends the spreading of composted sludge and refuse here and there, planting seed and seedling, and then "take your green (settled sewage) water and build a forest where you want to."

Given enough time and composted waste, Stanford could transform the between-cities idle land into a plush garden. And utilized property, waste could yield "more food, more fuel," Stanford said.

He was in Midland on Tuesday to laud the uses of waste, rather than (Continued on Page 2A)

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

## Five seek hospital directorships

EDITOR'S NOTE: Saturday, Midland voters go to the polls to elect, for the first time, Midland County Hospital District directors. The board of directors is the governing body of the district and contracts with the Midland Memorial Hospital Board of Governors to run the hospital. The governors, in turn, appoint the hospital trustees, who are responsible for the hospital's operation. Directors are elected at-large, with each voter selecting two from among the five candidates. The following are the responses from the candidates to questions from The Reporter-Telegram.

### M. N. Burleson

**POSITION SOUGHT:** Hospital **District Board of Directors** AGE: 42 ADDRESS: 708 W. Cuthbert OCCUPATION: Physician

#### Q. What are your qualifications for the office you seek?

HI LO PRC OUR A. I am a physician I have spent over 25 years working in hospitals I 1 rdy practice in Midland Memorial Hospital and am quite aware of its needs and methods of operation

#### Q. What do you hope to accomplish while in office?

A. I will provide input from a medical point of view and help coordinate the various health resources in

### **Ray Bristol**

**POSITION SOUGHT:** Hospital District Board of Directors AGE: 50 ADDRESS: 1608 W Michigan **OCCUPATION**: Minister

#### Q. What are you qualifications for the office you seek?

A. A. Home owner/tax-paying citizen B 25 years ministry to church and hospital C 24 years chaplain United Army Reserves (13) years hospital chaplain :) supervisory chaplain of the 94th General Hospital USAR D One weekend a month for four years head of the chaplains department at Parkland Memorial Hospital E Eighteen months post graduate studies in clinical pastoral education at the Texas Medical Center and Baptist Memorial Hospital in Houston

#### Q. What do you hope to accomplish while in office? 6-

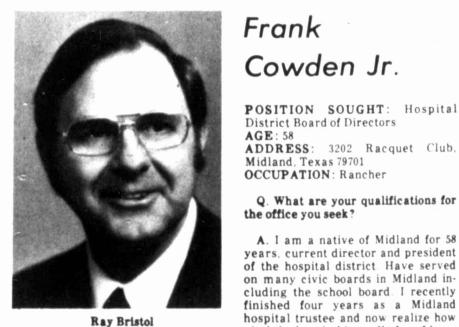

A. I hope to use my training and experience in and around hospitals to strengthen the health-care services for all the people in Midland County T hope to give representation to a broader segment of our county population

Midland so that we can give the max imum benefits of our local facilities to the citizens of Midland. I also want to work to keep the tax rate as low as possible by developing maximum effi-

ciency from our facilities. Q. What is the single most important issue facing the body to which you seek election?

A. Development of the best system of medical care for all our citizens that the community can afford.

A. A Quality patient health-care services. B. Adequate and necessary facilities and equipment. C. Responsi-

## Nada Baulch

**POSITION SOUGHT:** Hospital District Board of Directors AGE: 54 ADDRESS: 3109 Humble, Midland Texas.

**OCCUPATION**: Housewife

Q. What are your qualifications for the office you seek?

A. Active member of the Hospital Auxiliary and a past president of same. Tutor at Casa de Ninos. Member of Santa Rita Club of the Museum of the Permian Basin. Active member of N. A and Tennessee St. Church of Christ. Member of Parks and Recreation Commission for the city of Midland

As president of the Auxiliary. I met each month with the Board of Trustees of the hospital so am familiar with hospital procedure.

#### Q. What do you hope to accomplish while in office?

A. Help get Midland Memorial Hospital off to a good start as a taxpayers' hospital. Try to see that full value is received for each dollar spent. Help the citizens of Midland County see Midland Memorial as their hospital in more than just name. and be willing to serve, if called upon, on committees related to the hospital.

#### Q. What is the single most important issue facing the body to which you seek election?

A. Making the first two years as a hospital district a model of harmonious change from a private hospital to a tax-supported institution. This is an opportunity that will never come again to set a pattern for all segments of the community to become involved in a productive way. in the way the hospital is run.

Taxes should be kept to a minimum. We should not waste money and should be very concerned of our expenditures.

Q. What is the single most imporant issue facing the body to which

A. We need to work toward as near

excellence in patient care as possible.

Attracting good doctors to our city is

important in accomplishing this. An

## Study of terminal parking authorized

After hearing that passenger boardings at the Midland Regional Air Terminal have already exceeded predictions for 1980, the Midland City Council on Tuesday voted to authorize a long-term study of parking there

Col. Wilson Banks, city director of aviation, said Air Terminal had been projected to have 320,000 plane boardings and departures annually by 1980, but last year had already ex-

## Rain chance still slim

Partly cloudy skies are expected to clear today and tonight while warm temperatures are predicted to continue, says the National Weather Service at the Midland Regional Air Terminal.

But there is a 20 percent chance of rain today and tonight.

The high temperature Thursday is expected to be in the 80s, while the low temperature tonight is expected to be in the mid-50s, the weatherman said. The high temperature Tuesday was 81 degrees, while the overnight low was 58 degrees.

### Council candidate responds to queries

In Tuesday's edition of The Reporter-Telegram, there was an error in Tom Sloan's responses to questions to city council candidates. Sloan's statement that he wished "to cooperate in every way with our school and college trustees, administration and faculties and our new hospital district" inadvertantly became "with out school and college...!"

ceeded that figure by 20,00 The plan for the parking incorporated in the \$5 million terminal improvement project took into consideration a 7 to 8 percent annual growth rate. Banks said, adding that because of the addition of discount air fares and a major airline service, the growth rate of air travelers in Midland has been between 40 and 50 percent

"I would feel better if we could open the terminal improvement project with 300 more spaces than we are planning now." Banks said

Approximately 715 parking spaces are planned in the present terminal improvement project expected to be completed in March 1979.

After the council authorized the study by Parkhill, Smith & Cooper Inc. of Lubbock. Mayor Ernest Angelo Jr. said, "I think it is good to have a plan that can be implemented when the time comes.

Bennett Reeves of Parkhill, Smith & Cooper. Inc. told the council that the recent dramatic growth of airline passengers is not unique to Midland and also has been felt in Lubbock and Amarillo

The council also approved a plan to construct a second baggage carrousel at the air terminal as an addition to the current building project.

Banks said that this addition would allow two airplanes to unload baggage at the same time. The addition would not interrupt the

flow of work in the present project. said Harry Hill, representing Hudgins, Thompson, Ball and Associates Inc. of Oklahoma City. architects and engineers for the terminal building project.

"Nothing is more maddening than to wait longer for your luggage than it took for your flight," said Banks. explaining the need for the second carrouse

## Expert views wasted waste as forest means

unite them

#### (Continued from Page 1A)

how to dispose of it. His audience was made up of farmers, ranchers, stockmen, waste-specialty people and conservationists from Paint Rock to the unlike twins, Midland and Odessa. Noticeably lacking were the opinionmakers, the politicans, bankers, wheelers dealers, and others high in the power structure.

The occasion was a meeting of the West Texas Association of Soil and Water Districts About 90 attended. The setting was the Midland County Exhibit Building

And the white-haired and plain-spoken though his English wasn't the clearest to the West Texans-doctor proposed solutions to the waste problems

He pointed to a map of the Midland-Odessa "metroplex," which took in neighboring towns and communities

He visualized his plan: the greening of Midland and Odessa and their environs. "All of this becomes very desireable agricultural land or valuable country club land .... for picnicking, horse riding," Stanford said.

If implemented, the plan would requires years before fruition. "And we can feed our grandchil-

dren for the next hundred years, because we planned today," he said. He was not dazzled by comments and questions. However, he seemed to amuse himself and his listeners with irrelevant nonsense, such as: "Throw up a kite and see if lightning strikes

For awhile, he took leave of the Midland-Odessa scene and wound up in Saudi Arabia and Venezuela There, new riches generated by petroleum findings have generated the mark of affluence: refuse, garbage and waste problems never before experienced in those countries. And those people are at a loss on what to do.

"For 20,000 years they haven't wasted anything," he said. Perhaps he would include waste itself.

Ideally, he said, the United States, which gave the Arabs and the South Americans the/technology to bring in oil wells, should teach them how to use (not get rid of) their garbage and sludge. But this country hasn't found satisfactory answers to that .... vet

Promptly, Stanford returned to the Permian Basin to talk about the wise A. I wish to continue to help in the

organization of the Hospital District and help in the change over from Midland Memorial Foundation operating under the hospital district. Of course, I want to see our construction program finished properly.

in Midland County and want to serve

Q. What do you hope to accomplish

#### Q. What do you hope to accomplish while in office?

A. I hope to work toward a successful conclusion of our renovation program at Midland Memorial, and ensure that Midland has the finest medical services we can provode

## Owners of surface, mineral rights clash

ODESSA -- Odessa City Councilmen Tuesday were caught in the middle of a controversy between owners of surface rights on drilling reservations and owners of mineral rights.

Four public hearings were set on requests to rezone the drilling reservations for single-family residential construction.

Tyron D. Lewis, requesting part of the rezoning, told the council that the land reserved for drilling sites is desperately needed for housing construction and that little, if any, drilling activity had taken place on drilling reservations in the city in recent years.

However, a number of representatives for firms holding mineral rights opposed the rezoning. Louis Rochester told council members that surface rights on drilling reservations often were sold with the stipulation that drilling sites be provided and that without that stipulation, those holding the mineral rights would not

### sell the surface rights, which would hinder the city's development.

The Midland City Council on Tuesday voted to return to the Planning and Zoning Commission a proposal that would allow apartments, offices and retail stores on a 40-acre tract of land on the northwest corner of Midland Drive and Wadley Road. John Younger, owner of the land,

asked the council to approve the plan which would change the zoning from the existing single family district to local retail district, office district, two-family district and multiple family district zoning.

Younger was told by council members that unless his plan is significantly revised it would probably be voted down.

DEATHS

### **Burnice Keese**

**ODESSA** - Services for Burnice Edward "Skinny" Keese, 60, of Gardendale, father of Jimmie M. Anderson of Crane, were to be at 2 p.m. today in Hubbard-Kelly Funeral Home here with burial in Sunset Memorial Gardens.

Keese died Monday in a Big Spring hospital following a six-week illness. He was born Sept. 23, 1917, in Fisher

County. He had lived in Odessa 30 years, moving to Gardendale six years ago. He was a retired mail carrier for the U.S. Postal Service. He married Ona Smith Aug. 9, 1946, in Pecos.

Keese was a World War II veteran and belonged to the Veterans of Foreign Wars. He was a member of the National Association of Letter Carriers. He was a Baptist.

Other survivors include his wife; a daughter, Mitzi C. Dobbs of Gardendale; three brothers, Lee H. Keese of Irving, Bulan B. Keese of Fort Worth and Edgar H. Keese of Odessa, eight grandchildren and four great-grandchildren.

### Mrs. Willingham

Services were Tuesday in St. Ann's Catholic Church for Gladys Willingham, 75, of 712 W. Michigan Ave. The Rev. Ed Vrazel of St. Ann's officiated. Burial was in Fairview Cemetery, directed by Newnie W. Ellis Funeral Home.

Mrs. Willingham died Monday in a Midland hospital.

Survivors include a son, a daughter, a sister and six grandchildren.

Pallbearers were W. C. Smith, Jack Leonard, Jack McClurg, Charles West, Jack Wallin and Boots Cain.

### Eleno Nunez

LAMESA -- Services for Eleno Nunez, 100, of Lamesa will be held at 11 a.m. Thursday in Eastside Baptist Church here with the Rev. Ricardo Gardon, pastor, officiating.

Burial will be in Lamesa Cemetery directed by Branon Funeral Home. The retired farmer moved to Lame-

sa 45 years ago from Ballinger and was born in Durango, Mexico. He and Julia Palacio, 102, were married in Mexico 86 years ago.

Survivors include his wife; a son, James Nunez of Los Angeles, Calif.; three daughters, Mrs. Santos Harris of Wichita Falls, Lucia Salazar and Mrs. Santos Salazar, both of Lamesa, 19 grandchildren and 23 greatgrandchildren.

## Bertha Hull

BIG SPRING -- Bertha Hull, 75, died Tuesday in a Big Spring hospital following a lengthy illness.

#### I. Cunningham PADUCAH -- Services for Isa Cunningham, 82, of Paducah will be at 2 p.m. Thursday in the First Baptist Church here with the Rev. Herman Lancaster, pastor, officiating. Burial will be in Buck Creek Cemetery here

directed by Norris Funeral Home. Mrs. Cunningham was the sister of Floyd Armstrong and Truman Arm-

strong, both of Midland. She died Tuesday in a Paducah hospital after a short illness.

A native of Fannin County, Mrs. Cunningham had lived in Cottle County since 1909. She was a member of the First Baptist Church here.

Other survivors include a son, two daughters, two stepsons, three stepdaughters, three brothers, three sisters, seven grandchildren, eight great-grandchildren and a great-, great-grandchild.

## UMW chief has stroke

WASHINGTON (AP) - United Mine Workers President Arnold Miller has been hospitalized after suffer- new YMCA ing a mild stroke, the union announced today.

UMW Vice President Sam Church Jr. said in a statement that Miller went on sick leave for a rest ordered by his physician after signing the contract that ended the 16-week nationwide coal strike Saturday night. The stroke occurred two days after Miller began his sick leave, but Church's statement did not say whether it occurred Tuesday or today.

Union officials declined to comment on Miller's condition, say where he was hospitalized or give other details.

Explosion

### causes mass evacuation

LEWISVILLE, Ark. (AP) - Most of the 2,500 residents of Lewisville were evacuated early Wednesday morning after an explosion rocked this southwest Arkansas town.

Authorities said the explosion occurred about 12:10 a.m. when a Cottonbelt Railroad train derailed. Authorities said the car which exploded, and as many as four other cars, were loaded with highly flammable liquid vinyl chloride.

By 5 a.m. only law enforcement officers, firefighters and a

## Fire station site 'economical'

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

#### By JIM STEINBERG

Approval on Saturday of a referen-dum allowing Midland's new central fire station to be constructed on Crier Park will save the city an initial cost of more than \$300,000 and annual costs amounting to \$175,000, Mayor Ernest Angelo Jr. said today at a called press conference.

"The question is not 'will there be a new central fire station?' but 'where will the new central fire station be located?"' Angelo said.

The mayor pointed out that a professional study indicated a new fire station was needed and that location of the station on Wall Avenue and Texas Street between E and K streets would permit the closing of the Circle Drive Station.

Personnel from the Circle Drive Station will provide staffing for a new station to be built at the corner of Haynes Street and Midkiff Road, saving the city \$175,000 in salary expenses, Angelo added.

Work on

### begins

Groundbreaking ceremonies for the new Alamo YMCA building will be held at 10 a.m. Friday at the site of the new facility in the 900 block of Midland Drive, directly opposite the Alamo Pool.

Construction is scheduled to begin almost immediately, said Durwood Owen, general director of the Midland YMCAs.

"If use of Crier Park is not permitted, the Council will have no alternative other than to purchase the vacant property in the 1700 block of Wall and Texas at an estimated cost of over \$300,000. The council would be irresponsible to do otherwise since no other site with any practical avail-ability would permit the closing of the Circle Drive Station and thereby the saving of \$175,000 per year," Angelo

"If Crier Park site is approved, little or no local tax funds are expected to be necessary for construction since Revenue Sharing funds have been committed to both new stations. If the Crier Park site is voted down, the purchase price of additional land would have to come from local tax revenues," Angelo said.

Angelo said defeat of the Crier Park referendum would not necessarily mean a tax increase, but that the need to purchase other land might "generally" lead the city in that di-

Angelo said he was concerned about the "disruption" of the neighborhood around the park if the station is located there, but he said he believes the station would be an asset to the neighborhood, as plans call for one third of the park to be landscaped and beautified. It is this landscaped section that would be closest to the residential neighborhood, he added.

Angelo added that the City Council is committed to remodel the Circle Drive Fire Station for use as a Senior

Dr. Ray Bristol

Angelo noted that the City Council was unanimous in urging approval of the \$500,000 Hogan Park Golf Course expansion bond. He said that the possibility for the need of even a very small increase in taxes to retire the bonds is "minute."

In addition to business expertise, unique and specialized skills (Pastoral, Medical and Social Services) are needed on the Hospital District Board.

crew at the Lafayette County Hospital remained in Lewisville. "It's like a ghost town here now, said Lafayette County Hospital Ad-

ministrator Frank Schweitzer. Arkansas State Police Capt. Milton 'Scrubs'' Mosier said officials were concerned because the burning railroad car was near facilities of the J. & P. Petroleum Co. where tanks of liquid petroleum were stored. He said fire officials could do little but hope that the flames would not reach the tanks

"They tell us not to put any water on it (the vinyl chloride)," he said. "We're just waiting for daylight, now.

The Lafayette County Hospital's 28 patients, including two newborn infants and three seriously ill patients, were transferred by ambulance to Magnolia Hospital, about 25 miles away, apparently without incident. Most of the other citizens of Lewisville went to stay with relatives and friends out of town, or were moved to Stamps High School to wait until the danger was over. There were no known fatalities.

Three crewmen aboard the train

were admitted to Lafayette County Hospital for treatment, but were later transferred to Magnolia with the other patients. Schweitzer identified the crewmen as Clarence Halford, 61, Jerry McAfee, 47, and Michael D. Pate, 32, all of Pine Bluff. The crewmen were reported in good condition, a hospital spokesman said. Ambulance units from Hope. Magnolia, Texarkana and Prescott transported the Lafayette County Hospital patients to Magnolia.

Magnolia Hospital Administrator W.D. Hedden said there were no difficulties with the transfer, and the move was completed about 2:30 a.m.

Odessa woman charged with knifing death

**ODESSA** -- A 28-year-old Odessa woman charged with murder in the Sunday knifing death of a 29-year-old Odessa man was in city jail here this morning in lieu of \$20,000 bond.

Belinda Lopez Constancio is charged with the murder of Roberto Rojo Munoz about midnight Sunday outside the El Casino Lounge here. Two other men hurt in the inci-

dent, Librado Quinonez, 21, and Salvador Adarco, 19, were in satisfactory condition in Medical Center Hospital this morning.

Mrs. Constancio told police she and Munoz argued when he asked her to dance and she refused. The stabbings occurred shortly afterwards.

Police were called to the bar when the bar manager reported a fight in progress. Police said there was no fight underway when they reached the bar, but a search of the area resulted in the discovery of Munoz' body in a pool of blood and the two other men nearby bleeding from stab wounds.

Munoz had been stabbed repeatedly in the chest and neck, detectives

The murder charge against Mrs. Constancio was filed Monday before Peace Justice Harold Sligar.

Man in hospital after accident

An 18-year-old Odessa man was in undetermined condition at Midland Memorial Hospital this morning with two broken legs and a broken jaw after his truck and semi-trailer ran off an overpass on Interstate Highway 20 this morning, a Department of

Public Safety spokesman said. Gary Scott Weeden was westbound of I-20 about 6:40 a.m. when his vehicle ran off the road and the overpass at FM 715, the spokesman said.

## Let's vote the bonds!

City of Midland voters Saturday will have the opportunity of making the Tall City an even better and more enjoyable community in which to reside and do business.

This can and, hopefully, will be done by the voters in Saturday's city election by placing their stamp of approval on the proposed issuing of \$500,000 in bonds to finance a much needed and long over due expansion project at the Hogan Park Municipal Golf Course.

The facility, Midland's only public golf course, is a definite community asset, just as it has been since it was built in 1959. It is the city's only public recreation facility which pays its own way insofar as operating costs are concerned. Last year, for instance, the course had a net income profit in excess of \$12,000. which went into the city's general fund.

The course is open to everyone. but the problem now is that the facility no longer is able to meet the ever-increasing public demand, due to the city's tremendous population, growth the last several years. The saturation point has been reached, making expansion essential if the demand is to be satisfied.

Rex Worrell, golf pro at the Hogan Park Course, in commenting on the overcrowded conditions, explained that the expansion project as proposed will mean that an additional 120 recreation facilities for their employes.

PUBLISHER

Hogan golf course also is used extensively for tournaments staged by church, industrial and civic groups. Seventy-nine tourneys were held there last vear.

Midland has two country clubs which have fine private golf courses, but both clubs have full memberships and lengthy waiting lists.

This matter of adding another nine holes to the existing 18-hole golf course at Hogan is not a spurof-the-moment proposition. The city council was asked to submit a bond issue proposal in Saturday's balloting only after a complete. lengthy investigation of the overall problem. The results of the study made it quite evident that there is a definite and pressing need for the expansion program.

The present 18-hole facility is recognized as a good course to play. It will be even better, with approval of the bond issue. because better maintenance can and will be provided with less crowded conditions, and it will be enjoyed by many, many more citizen golfers who presently do not have the opportunity of getting on the course.

All this is why approval of the bond issue will tend to make of Midland an even better community. This explains the overall importance of the proposition.

It has been said, and rightly so, that "golf is not just white collar Amin ... is a great statesman." From refugees and diplomats who once served in Equatorial Guinea, our reporter Murray Waas compiled a

850

Distributed by L.A. Times Syndicat

vast file of Macie's heinous crimes. His barbaric cruelty should shock the world Two years ago, for example. Macie celebrated Christmas with his militia in a Fernand soccer stadium. As a recording of Those Were the Days, My Friend' blared over the stadium's loudspeakers. Macie's troops shot and hanged 150 of the regime's opponents. The year before, a similar gristy mass execution was publicly performed on Christmas Eve. One anguished refugee told us his mother and another close relative were among the victims. Dissent in Equatorial Guinea means certain death. A foreign minister, Dr. Atansio Ndongo, died when Macie ordered him thrown from the third-floor window of the presidential palace. On another occasion. Macie invited the head of the general assembly, Pastor Torao, to his office. The dictator reached into his desk drawer, whipped out a gun and shot Torao dead without warning. Those Guineans who have decided to remain in their homeland suffer a miserable existence. Macie has imposed forced labor on all males over the age of 15. He has ordered mass arrests of workers and assigned them to his own cocoa. coffee and timber plantations.

which requires that he be praised in the Catholic Mass. He has proclaimed a "Hymn of the Republic," which reads: "God has created Equatorial Guinea through the will of Papa Macie. Without him Equatorial Guinea would not exist. Forward with Macie. Nothing without Macie.

Everything with Macie." ntry's constituti

## **HEMISPHERE REPORT:** For Petroleos Mexicanos, life begins at age '40'

#### By WILLIAM GIANDONI **Copley News Service**

MPAIGN

NANCING

Mexico's economic life may be beginning at 40.

The Aztec republic observed the 40th anniversary of the expropriation of most U.S. and British oil companies then working in the country, March 18, 1938, with the highest of hopes.

Already Mexico is producing much more fuel in one of its newly discovered oil fields in the southeastern states of Chiapas and Tabasco than is being taken out of those highly touted fields in the North Sea.

Already Mexico can claim to be the ninth most important petroleumproducing nation in the world. Already the government oil company, Petroleos Mexicanos, can boast that it is among the most active, if not the biggest. drilling company in the world

And enthusiastic Mexican oilmen say this is just the start.

It is a far cry from that day in 1938 when then President, Lazaro Cardenas ordered the takeover of most of the foreign oil companies working in Mexico.

His bold gesture marked the first time in modern history that a proud but relatively small country had so defied the great powers, particularly one of them, the United States, its closest neighbor.

As an army general who had commanded troops in the oilproducing regions of Mexico's gulf

coast. Cardenas was well aware of the high-handed tactics of the oil companies and of their defiance of the Mexican government. Eventually, as president, he decided to put an end to it all. And he did.

Mexico suffered initially but, because the onset of World War II diverted British and U.S. attention to Europe. Mexico was spared the threat of armed intervention from abroad long enough for passions to cool. By the end of the war, both the United States and Britain had calmed down to the point where they were willing to negotiate a financial settlement of the expropriation debt. That debt has long since been paid off.

However, the expropriation did shake investor confidence in Mexico and, particularly, the foreign oil companies steered clear of Mexico. preferring rather to develop the petroleum potential of Venezuela and the Arab countries

Mexico, which had been the world's No.1 oil producer in the 1920s, saw its output fall drastically to where it became a net importer.

But Mexico never gave up In the early 1970s, the nation's fortunes changed and Petroleos Mexicanos, or Pemex, as it is better known, began bringing in new fields in the southeastern states of Chiapas and Tabasco. Those general areas had been explored as much as a quarter of a century earlier, but at a time when, for example, drilling to a depth of 10,000 feet was the exception rather than the rule. Now Pemex can go twice as deep.

The results have been nothing less than spectacular.

Whereas a few years ago the average Pemex well produced 120 barrels a day, now the average is 5,500 bpd.

Three of the newly discovered fields the Antonio J. Bermudez, the Sitio Grande and Cactus - each are equal to or bigger than the Poza Rica field. Poza Rica was Mexico's most important during the period of foreign operation of Mexican oil. The Bermudez field, named after the modern Mexican patriot who was director-general of Pemex from 1946 to 1958, and who put it back on a business footing, already produces more than the North Sea. Mexico has a number of high potential wells, capable of making 18,000 barrels of oil a day, and indications are that some may go to 20.000-25.000. Pemex engineers proudly proclaim that the fields that they are developing off the southern coast of the Gulf of Mexico, in the Gulf of Campeche, offer far more attractive propsects than those in the North Sea. For one thing. North Sea wells are located around 135 miles out to sea. Mexico's are from 12 to 50 miles off the coast. North Sea drillers work in waters 500-600 feet deep; Pemex, in only 200 foot waters. Finally, the weather in the North Sea is such that oil men can be sure of only 45 good days a year; in Mexico, they have to worry about only 45 bad days a year. As one Mexican oil man, Adolfo Lastra Andrade. Pemex' assistant production manager, put it recently. "In 1938, all our oil fields were old. Today, all our fields are new." That's why life is beginning at 40, for Mexico's oil industry at least.

golfers can get on the course each day. During peak periods, that many or more golfers do not have access to the course because of limited facilities.

Midland Chamber of Commerce directors also have endorsed the proposed expansion project and the bond issue to finance it. President Harrell Feldt said the. project is necessary in order "to keep up with the growth and development of the community."

Feldt also stressed the importance in this day and age of providing recreational facilities to serve the present residents and to attract new business and industry to the city. Having public golfing facilities also is of great importance in bringing conventions and trade association groups to Midland.

One of the first questions asked by business and industrial prospects has to do with the availability of adequate public

it's everybody

The Reporter-Telegram again proclaims its endorsement of the Hogan Park Municipal Golf Course expansion program and urges its approval by the voters Saturday. Forward Midland!

The Country Parson by Frank Clark

## **BIBLE VERSE**

Bless them which persecute you: bless and curse not. - Romans 12:14.

A blood-curdling example is Francisco Macie, the President-for-Life of Equatorial Guinea. This tiny. west African kingdom consists of an island, Fernando Po, and a small province on the mainland. It was once known for its tropical beauty, its coffee and its top-quality cocoa.

Now it has become best known in the African community for the atrocities committed by Macie against its people. During the nine years of his terroristic reign. Macie has slain an estimated 50,000 persons. Another 150,000 have fled the country. Cold statistics simply fail to reflect the horror that Macie is perpetrating

in Equatorial Guinea. The United States broke relations with him in 1976. Other non-communist nations have done the same, but Macie still enjoys the support of the Soviet Union, China and Cuba.

Macie is "stark raving mad, a . fascist who keeps himself in power by using leftist rhetoric." one State Department official told us. Commented Herbert Spiro, the last American ambassador to Equatorial Guinea: "Compared to Macie. Idi

With megalomaniacal fervor, Macie has ordered a new law passed.

been amended to bestow on Macie a few titles: President for Life; Supreme General of the Armed Forces: Great Teacher of Popular Education, Science and Traditional Culture: President of the National Power of Workers; and Great Strength and only Miracle of Equatorial Guinea.

The communist world, ever on the lookout for new friends in Africa, has eagerly sought Macie's favor. The Soviet Union, China, North Korea and East Germany have donated aid. Secret U.S. intelligence reports reveal that the tyrannical leader traveled to China and North Korea. last November in search of more assistance.

The Soviets have provided Macie with a prop jet and assigned two Russian pilots to fly him around. More ominously, there are some 300 to 500 Cubans in Equatorial Guinea. which Havana blithely describes as 'educational and health advisers." CIA reports, however, declare that Cubans "have been involved in the training of the national militia.

All of the help the mad despot receives, however, does not come from behind the Iron Curtain. Various United Nations agencies have provided him with \$3.5 million in aid over the past five years. Plans call for another \$5 million of UN assistance in the coming five years.

The World Bank recently sent two technical experts to Equatorial Guinea to weigh the prospect of a loan to Macie's government. They reported favorably to their Washington superiors that "Macie was capable of managing any aid in a responsible manner and there were no visible human rights violations. although (we were) not there long enough to make a definitive judgment."

Footnote: A World Bank spokesman told us the organization's charter does not allow them to consider human rights violations as a factor in extending aid to a country.

WASHINGTON WHIRL - Women employees at the Energy Department are fuming at their pipe-smoking boss James Schlesinger - not for the tobacco he puffs but for discrimination in his promotion policies. Of 650 supervisory jobs at the newest Cabinet-level agency, only 11 have been filled by women. Several class action suits have already been filed against the agency.

#### THE BIBLE CAN YOU QUOTE IT?

#### By LAVINA ROSS FOWLER

1. The art of glass making was never invented, but stumbled on by Phoenicians after they had made a fire on the banks of the Benes River. Here was high grade sand which melted into glass. Phoenicians and Israelites, both Semitic were likely more closely allied after Jezebel married the Israelite king. Name him. 1 Kings 16:31 (King James) 3 Kings 16:31 (Douay)

2. Who said, "Thy rod and thy staff they comfort me."? Psalm 23

3. What two men went up into the temple to pray?" Lake 18:10

4. Who betrayed Jesus? Matthew 26:47-50

5. What great Jewish feast was in progress the last time Jesus went to Jerusalem? Luke 22:1 Four correct . . . excellent. Three

correct...good.

## **INSIDE REPORT:** Carter in rapid reverse on fleet rebuilding project

#### By ROWLAND EVANS And ROBERT NOVAK

WASHINGTON - No sooner had President Carter delivered his stirring preparedness speech at Wake Forest University March 18 than he went into full-speed reverse on a course that has slashed over twothirds of his previous commitment to rebuild the U.S. fleet.

That decision was revealed by the President at 1:30 p.m. March 23 in the Oval Office to a surprised, unhappy W. Graham Claytor, Secretary of the Navy. But since dissent is tolerated in his administration, the fight is not finished. Claytor made clear to Mr. Carter he cannot publicly endorse this naval defeat. Efforts for faster shipbuilding will be pushed in Congress, with Claytor's backing.

Thus, questions during the 1976 campaign about where Jimmy Carter really stands on defense policy are still unanswered. How does the President's overdue challenge to Moscow square with the drastic cutback facing the Navy? Certainly, that cutback taints the spirit of Wake Forest, and must so be perceived in the Kremlin. "This proves that we can afford words but not hardware." a Pentagon official told us. Similarly, efense-oriented critics in Congress advise: watch what the President does, not what he says.

During the 1976 campaign. Mr. Carter, the Naval Academy's first gift to the presidency, pledged naval expansion (while also promising defense cuts). In his first year, he approved a tentative, five-year program to build 160 ships, 40 more

than President Gerald R. Ford planned.

Pentagon and National Security Council advisers immediately began chipping away. Leading the crusade for a Navy designed for convoy duty but not control of the seas was Russell Murray, assistant secretary of Defense (one of Robert S. Mc-Namara's now aging whiz kids). By year's end, shipbuilding was reduced sharply and the doctrine of 'maritime supremacy'' was downgraded.

But Claytor, a Washington lawyer and railway executive (who was a World War II lieutenant commander), proved a vigorous advocate. He pushed hard for naval expansion and was making progress with Secretary of Defense Harold Brown. Testifying before the Senate Armed Services Committee a few weeks ago, Brown cheered proponents of naval power by declaring: "Since as a nation we depend upon maritime lines of communications more than the Soviets do, we need to have more capability than the Soviets.'

This was in harmony with the tough talk at Wake Forest March 17. But later that day aboard the nuclear. carrier Eisenhower, the President conferred with Brown about a decision on shipbuilding. The final intense arguments followed the next week in Washington.

Unknown to Claytor, the President selected the lowest possible option. The 160 new ships over five years were cut to 70, of which only 46 were combatant vessels (including six Trident missile submarines; for strategic rather than sea-control purposes). This points to a 375-ship Navy, gradually whittled down from the 800 goal as the 1970s began.

Oblivious to this decision. Claytor was called at 8 a.m. March 23 and asked to join Brown and the Presidentat the White House that afternoon. In the morning, in top secret testimony to the Senate Armed Services Committee. he defended the existing policy as he then knew it. Clayton testified he could live with reduced naval spending for the coming fiscal year, but added that additional shipbuilding in the years ahead is imperative. Both he and Adm. James Holloway, chief of naval operations, spoke favorably of an extra nuclear carrier.

Leaving Capitol Hill, Claytor went to the White House for the President's unpleasant surprise. Mr. Carter urged everybody to support the presidential decision. Claytor replied he could not publicly endorse the stripped-down shipbuilding program. The President responded with his smile, familiar but enigmatic.

Claytor will not wage an openmouthed campaign courting his own dismissal. But responding to questions from Congress, he will give the Navy's view and give it strongly. That will assure extra naval spending ordered by Congress, possibly reaching \$2.4 billion (including \$2 billion for that extra nuclear carrier). Brown, perhaps the most knowledgeable and certainly the least revealing Secretary of Defense, is expected to keep playing the sphinx.

The real enigma is not Brown, however, but the President. The decision to emasculate shipbuilding was clearly his, not the secretary's. Why did he do it? Defense-oriented members of Congress, including powerful Democrats, say this strongly suggests - some say proves - that the Wake Forest speech merely appeased hawkish political sentiment and that the President really distrusts military power. The true source of the Navy's defeat

may be not so much presidential perfidy as confusion. In the spirit with which he twice reversed himself philosophically on natural gas deregulation and defied history by calling Marshal Tito a champion of human rights, the President throws down the gauntlet to Moscow while savaging his most politically visible arm. It could be that Mr. Carter simply fails to see how his actions undermine the credibility of his

#### the small society

words.

## Industry leader still brewed in venerable building

#### By WILLIAM H. JONES The Washington Post

ST. LOUIS - Anheuser-Busch's huge brewery here is a reminder that private enterprise once lavished huge sums on man's working environment. The Brew House correctly has been designated a National Historic Land-

mark. Built in 1891-1892, the brick fortress with clock tower is a Victorian delight Intricate ironwork, painted white, surrounds openings on each floor and

is used as stair bannisters, while columns have goldleaf decorations. Natural lighting from huge windows saves energy. And a multistoried chandelier, with the metal carved as hops, hangs through the center of the structure.

Although crowds of tourists gape at these unusual industrial workplace decorations as they are conducted on regular tours, the most unusual fact about the Brew House is that it is not a relic at all, like an old steam railroad locomotive. Busch employees work here around the clock, manufacturing beer and keeping the/place so spotless that a dropped toothpick would appear out of place.

No. Anheuser-Busch operates more than a museum, and more than teams of Clydesdale draft horses. While cer-

grandfather, Adolphus Busch, "set out to brew a beer that would be universally popular, transcending regional tastes, preferred over the hundreds of local regional beers brewed in America in the 1870s.'

If only Adolphus Busch could see how well his young firm succeeded in producing a truly national brand, and in leading to a dramatic decline in regional beer manufacturing, particularly after World War II.

Today, "there are only about 50 American brewers compared with 400 or so two decades earlier. Moreover, the top five companies in the business today account for about 70 percent of sales compared with 60 percent in 1970 (and the top five firms are not the same). By the early 1980s, the top companies' share probably will exceed 80 percent.

Anheuser-Busch dominates the business now as it did at the start of the 1970s, with 23 percent of all sales last year (vs. 18 percent in 1970). What has changed in the business is the arrival of Miller Brewing in the No. 2 spot, with 15 percent of sales last year. The subsidiary of Philip Morris was only seventh in the industry seven years earlier. The other industry giants are Jos. Schlitz, Pabst and Coors

million barrels last year compared with 150 million in 1976. Estimated

But, according to such industry analysts as Emanuel Goldman of Sanford C. Bernstein & Co., the only companies that really count in terms of sales growth are the biggest - Busch and Miller. The prospects are that. although beer consumption continues

remaining in the business won't share the growth on a level consistent with, current market penetration.

Dennis P. Long, 41, vice president and general manager of the Busch brewery division, agrees with this assessment.

In an interview, Long said his company increased its market share in the first two months of 1978 to a level never before achieved (it was 23.4 percent in 1975 before a three-month strike in 1976 sent annual volume plummeting to just over 19 percent that year).

Long also said competition in the American beer business now amounts to a "two-horse race" between his firm and Miller. "I Lon't see all of the big five sharing in the 10 percent total market share growth by the early 1980s," he added.

"There is considerable room for growth ... we have only 23 percent of the market, far less than other companies in other industries," said Long, expressing his view that there

Hospital meeting set

 The business of formally taking over management and assets of Midland Memorial Hospital is expected

between the district and Midland Memorial Foundation, several actions regarding district bank accounts, arrangements for assuming indebtedness, transferring contracts from foundation to district and transferring employees from foundation to

is no need for federal government action in response to the increased dominance of sales by a few companies. "It's been done by consumers. There has been no collusion. It will continue.

Recovering in a strong way from the 1976 strike. Busch last year listed record profits of \$91.9 million (\$2.04 a share), a gain of 66 percent over the previous ear. Sales rose 27 percent to a record \$2.2 billion and beer sales volume was 36.6 million barrels, an industry record.

Although reluctant to make specific forecasts. Long said beer volume this year should be close to hte 40-billionbarrel range. Expansions at beer factories across the country, including a doubling of capacity at the modern Anheuser-Busch brewery at Williamsburg, should bring the firm's annual output capacity to 51 million barrels by 1981.

To achieve a sales volume of that magnitude. Busch is expanding its product lines and markets for existing drinks. Long said the company's program includes:

-Introduction in the District of Columbia and 30 states on April 3 of the company's Michelob Light Beer. This beer has been marketed on an experimental basis since the first of the year in five states - Ohio, Florida, Georgia, South Carolina and Michigan - and "exceeded all sales expectations."

-Initial sales, also on April 3, of Busch Bavarian beer in the New England states. Currently available at popular prices in the Midwest, Southeast and California. Busch will be priced in line with Budweiser in New England. If the marketing there is successful, it will be expanded to other markets.

-Test marketing later this year of an entirely new drink, which "could be in competition with certain soft drinks." Long would not describe the product further but said the advertisng agency of Needham, Harper & Steers has been hired to begin

**BRIGHTEN UP YOUR HOME FOR** 

marketing. Three Busch directors quit the board of St. Louis-based Seven-Up Co., when the new product first was revealed, because of a potential conflict. Seven-Up said it did not think the drink would be in the lemonlime family, and market analysts expect Busch to offer a low-alcohol fruittype drink similar to shandy, sold in Australia and Europe.

-Possible introduction of a "stronger, dark" beer at ultrapremium prices, an entirely new market sector, and possible sales for an imported beer.

The light beer is obviously a key to the Busch strategy, because No. 2 Miller now dominates that sector with two-thirds of the sales for its Lite. Michelob Light will have about 134 calories, or 20 percent less than Michelob, but more than the 96 calories in most light beer.

Long said the popular attraction of light beer reflects a general trend toward lighter whiskies, wines and liquors.

## Author says Swiss live 'on mountain of stolen money'

#### By MICHAEL GETLER The Washington Post

ZURICH — The stability and complacency of Switzerland are showing strains.

The facades of the banks along this city's elegant Bahnhofstrasse look as imposing as ever and the countryside seems just as beautiful and prosperous. Yet, concern is beginning to surface over how Switzerland uses its wealth; over its attitude toward the developing world, racism and foreign workers; and over an increasing polarization in domestic politics.

The most effective critic so far is Jean Ziegler, 42, a leftist author and member of parliament who has rocked the ruling circles with a scathing attack on what he calls "the double standard of Swiss normality ...and Swiss imperialism."

"There is a collective neurosis here," he said in an interview in Bern. "Everybody knows we live on a mountain of stolen money." a reference to hundreds of billions of dollars from all over the world kept in secret Swiss bank accounts with few questions asked about where it comes from.

"It is a schizophrenic existence. We wear the mask of the (Swiss-run) Red Cross and kill people at the same time," he charges.

The killing in Ziegler's view, results from "stealing from the people of the world and living off their misery. People are dying from hunger and all Swiss banks have offices in those countries. They collect money from an oligarchy in Colombia, for example, who, instead of investing it in the uncertain future of their own country put it in a numbered Swiss account.

"The black money — or money from fraud — plus the flight capital from the ruling classes who fear for their privileges in the Third World or France or Italy, comes into Switzerland where the bankers get it free or at very low interest and they don't want to know where it came from. That is the major problem today." he says.

Ziegler says the bank oligarchy here has such power "that no government or parliament can do anything about it." although there is very little evidence that many Swiss want to do anything about it either.

Ziegler's views are extreme. Switzerland's legendary devotion to privacy and neutrality have sometimes played positive roles, such as keeping much European wealth out of Nazi hands. If there were no Switzerland, some other country would undoubtedly try to step in and fill the same need.

Still, Ziegler has hit a long-dormant nerve here. His controversial book. "Switzerland Above Suspicion." is an extraordinary best-seller.

While many Swiss intellectuals believe Ziegler has exaggerated his

case, few seem to believe he is wrong about the major thrust of his criticism.

Indeed, what may be most important about Ziegler is that Switzerland has not had such a powerful, radical critic before from within its own normally unbroken ranks of solidarity.

"There is a gap between our morality and our interests," says Claude Tomacinta, producer of a popular and probing Swiss television documentary.

"The question of whether you can get the banks under better control is important because it concerns not only how our wealth is used but our image. But it is complicated because the people are very committed to free enterprise and against intervention of the state in any field. A large amount of Swiss people feel their own prosperity is tied up with the prosperity of the banks. Kid

OZ.

"Twenty years ago, we didn't raise such questions. We believed that our system and conception of society were perfect."

"Today," he says, "more and more people think we must adapt our policy to a moral concept, that we are too egotistical and must become more cooperative, that we always speak about democracy and solidarity but in fact we do not do it. But the people who say such things now are only an active minority."

# Kidnap victim

sues food firm

## for \$185 million

#### THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

#### The Washington Post

WASHINGTON — An American businessman kidnapped and held for eight months by Colombian terrorists while he was head of a Beatrice Foods Co. subsidiary there has filed suit in federal court in New York asking for \$185 million in damages from Beatrice claiming the firm did nothing to free him for eight months.

Gustavo Curtis, 54, headed up Industries Gran Colombia S.A. in Bogota when he was kidnapped on Sept. 28, 1976 according to his complaint. He claims that after the kidnapping Beatrice told his wife Vera who was a television talk show host there not to take any action to rescue him because the company would handle the matter.

The complaint also states that Curtis was warned by the American embassy in Colombia in July 1976 that his photograph had been found in the possession of known terrorists and that he was a potential kidnap victim. After notifying the Chicago-based conglomerate, Curtis claims that his employers said they would take measures to protect him and that he should take no action on his own.

He said that he would have left his job at that time but he couldn't without the firm's permission. He claims that Beatrice did nothing at that time to protect him against the eventual kidnap.

As a result of what Curtis calls "deceit, fraud and misrepresentation" on the part of Beatrice, he was then kidnapped.

Curtis and his wife, who also is a plaintiff in the case, further claim that Beatrice took no action because the firm believed the kidn apping to be a hoax, perpetrated by Curtis. According to the complaint, the firm began to take action toward his release only after subjecting his wife to a lie detector test some six months after the kidnapping. During the incident, Curtis claims

he was "confined in/cage-like quarters" by his captors.

One of Curtis' attorneys, Leonard Diamond, said that Curtis was constantly watched by teams of three men in masks in a "hollowed-out cave 60 feet under ground."

"He never heard a human voice for eight months," Diamond said. Although the original ransom

demand was \$5 million. the company hired two British terrorist experts to negotiate that figure down to \$450,000 at the time of his release on May 18, 1977.

Diamond said that the British negotiators and the Beatrice lawyer

in Bogota, were jailed for a time for arranging the ransom payment, because there is a military decree in that country against paying ransom to terrorists.

Curtis' wife Vera was considered a local television star in Colombia, Diamond said. An Israeli, she hosted an advice-to-the-lovelorn talk show.

The Curtises now live in New York. Diamond says Curtis "is looking for a job." but technically remains on Beatrice's payroll. His address was withheld from the filing. "The company still wants him to go back to Colombia," Diamond claims. "They say lightning never strikes twice in the same place."

Beatrice attorney Geoffry Kalmus said his company has "no comment on the matter at this time. You can be sure the company will deny the allegations in the complaint at the proper time." he added.

## Polls, surveys not all damaging to Jimmy Carter

#### By WALTER R. MEARS **AP Special Correspondent**

PAGESA

WASHINGTON (AP) - When the pollsters ventured out to take their first soundings on the 1976 presidential campaign, Jimmy Carter's name didn't even make the list of prospects. That should be fair warning that nothing counts until the competition begins.

Still, off-season surveys can point up political problems, and a new Associated Press-NBC News poll indicates that President Carter has had his share -- perhaps more.

One of them shows up when people are asked, in effect, what they would do if they had the 1976 election to do over again. The answer: they would still elect Carter over Republican Gerald R. Ford, and by about the same 3-percentagepoint margin.

In a poll of 1.604 adults conducted March 21 and 22, Carter was favored by 46 percent. Ford by 43 percent. The rest said they wouldn't vote or didn't know.

That's a lot closer than the hypothetical matchup has been since Carter defeated Ford and entered the White House. Last November, for

example, a sirnilar poll /showed Carter with an 18-percentage point margin over Ford. In January, Carter's margin was 12 points.

The narrowed gap between the Democratic president and the defeated Republican is an apparent reflection of dissatisfaction with Carter's performance in office. The APNBC News poll showed that 33 percent of the people rate Carter's performance excellent or good, while 64 percent says the job he is doing is only fair or poor.

An AP-N'BC News sampling of opinion about a presidential primary

match between Carter and California Gov. Jerry Brown gives the president a commanding margin among Democrats. The numbers: Carter 58 percent, Brown 23 percent, with the rest withholding judgment and a few saying they'd prefer other candidates.

The margin of error is 5 percent either way, but in any event, Carter is comfortably ahead.

When people who identify themselves as independents are asked the same question, 42 percent prefer Carter, 31 percent favor Brown. Overall, counting Democrats, inpercent favor Carter, 28 percent favor Brown.

A sampling of Republican sentiment, in a poll which has a 7 percent margin of error, shows Ronald Reagan atop the list of prospects for the 1980 nomination. Ford is close behind.

The AP-NBC News poll presented Republicans with a list of names, and asked which they would support in a presidential primary election.

The ranking: Reagan 43 percent: Ford 35 percent: Senate Republican

dependents and Republicans. 46 Leader Howard H. Baker Jr. 7 percent: former Texas. Gov. John B. Connally 5 percent; former Ambassador George Bush 2 percent; Sen. Robert J. Dole of Kansas, the 1976 vice presidential nominee. 2 percent; others or not sure 6 percent.

AP

han

prin

When Democrats and independents are asked to rate the same list of prospects, Baker's stock jumps sharply. Among all voters, he is favored by 18 percent, still third, but a lot closer to Reagan. who is supported by 27 percent, and Ford, who gets 28 percent backing.

Gov. John B. former Am-2 percent; Sen. ansas, the 1976 inee. 2 percent: cent.

## hand at compiling primer on Manpower

#### THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

Wildoor and home buys on SALE THE SHOPPER'S

AUSTIN, Texas (AP) - A primer on Manpower - a word associated with indictments and political accusations - seems overdue. So here

When a reporter writes of "Manpower." he or she usually means job programs funded by the federal Comprehensive Employment Training Act (CETA).

CETA is supposed to reduce unemployment and poverty by numerous means, including job training, public works jobs and even programs for alcoholic workers.

It often provides cash directly to job trainees. On-the-job training, with the federal government paying half the wage, is part of CETA. So are job counseling and "linkages" with union apprenticeship programs.

Congress allots CETA money each year to the states. A state's allotment grows if its unemployment or poverty levels increase significantly! Similarly, the U.S. Department of

Labor allocates CETA money within a state partly according to percentages of unemployed and poverty-level people and partly on the basis of the previous year's grant.

Texas' current CETA allotment is \$325 million - half of it for public works projects and public service jobs. Comprehensive Manpower services, which have generated most of the headlines, account for \$80 million

Simple enough so far. But confusion and jargon take

charge when you talk about how CETA money is spread around Texas.

First come the prime sponsors Manpower people call them primes. Primes may be cities or counties with 100,000 or more people. They may also be coalitions, such as the Coastal Bend Manpower Consortium that includes Corpus Christi and 12 county governments.

Primes get their money directly from the U.S. Department of Labor. The 135 counties without local prime sponsors are called the "balance of state" - BOS in Manpower jargon.

Gov. Dolph Briscoe is the sponsor of the BOS, and his office approves each CETA grant in those predominantly. rural counties. BOS spending totals about \$55 million this year.

Briscoe · relies heavily on

evaluations of grant proposals by the Texas Department of Community Affairs in parceling out BOS money.

TDCA also 'administers the BOS grants and flows the money to local Manpower contractors!

Manpower people complained when Briscoe creamed off 20 percent of all BOS funds for the Governor's Office of Migrant Affairs. One reason was a federal requirement that BOS money be divided according to a county's share of Texas' poor and unemployed.

One TDCA employee said drily, There aren't many migrants in Grayson County" - certainly less than 20 percent of those eligible for CETA assistance.

## THE LONELY LADY OF SAN CLEMENTE: Part IV **Reluctant Pat becomes** all-smiles campaigner

EDITOR'S NOTE: The following is adapted from the book, "The Lonely Lady of San Clemente: The Story of Pat Nixon," (@) 1978 by Lester David. Reprinted by permission of Thomas Y. Crowell Co. The full-length book will be published by Crowell in late summer.

#### By LESTER DAVID

When Richard Nixon was nominated for the vice presidency in July of 1952 in Chicago, his wife Pat was with him as usual. She had left their daughters, then 5 and 3, in the care of a sitter. At the Stockyards Inn. where the Nixons were staying, Pat had argued with her husband, pleaded with him not to accept if he would be named as Eisenhower's running mate. Murry Chotiner, the public relations expert, who called Nixon's room at 4 in the morning, saw plainly that there was a tenseness between them

"If the vice presidential thing is offered to me," Nixon asked Chotiner. do you think I should take it?" When Chotiner replied that he should indeed accept. Nixon wanted to know why.

Chotiner was in a spot. He had known Pat's attitude toward continuing in the game, that she wanted, at this point desperately, to be left alone to raise her family in peace. But Chotiner was as ambitious for Nixon as Nixon was for himself. If Nixon did not accept. Chotiner said, he would probably remain California's junior senator. For you it's a question of going up or out; there are no other alternatives."

Nixon said he'd think it over. Several hours later a phone call came and Nixon, having barely slept, was summoned to the Blackstone Hotel. where Ike's chieftians were winnowing out candidates for the No. 2 position. Pat bade him goodbye, sure she had won and that he would refuse an offered bid

She went down to the restaurant for sandwich and began watching an old movie that had just been on television. She picked up the sandwich and took a bite. Suddenly the movie was interrupted by a news bulletin. Eisenhower had chosen Nixon. "That bite of sandwich popped right out of my mouth," she says. Quickly she rushed from the restaurant into a cab and to the convention hall.

She had lost, but the game now had to be continued. She must be at his side, smiling and gracious and cool. That evening Nixon was nominated and Pat was on the platform with him.

When she disclosed that she was still pressing the vice presidential trousers because only she could do it really well, and that she did all the packing herself, many women grimaced because that was a bit much. Yet the very ingeniousness of the confession was endearing.

Men. too, were impressed by her for their own reasons. She was helpful but never came on strong: she was in no way domineering.

She was also one of the first of the political wives to become away of the immense power of television. As early as the famous "Checkers" speech of 1952 she discovered that the camera's lens could reveal to million the personalities of the politician AND his wife, everything the voter wanted to know about their characters. temperments, idiosyncracies.

While Nixon made that incredible cornball defense against charges that California supporters raised an \$18,000 slush fund for his personal use. she stared unwaveringly at him. worry about his future and utter devotion to him unmistakably on her face. Those who watched were touched, and outnumbered by far those who watched and scoffed.

Nixon had known what he was doing; he told the Radio and Television Executives Society only three years later that he had "staged" the entire speech. He did not say, and neither has ever said, that Pat had been briefed on how to act. Briefed or not, her performance was superb, and she apparently learned a great deal from it. Thereafter her performances on the

campaign trail were excellent. I am using the word "performance" here as in acting; it must be remembered that both Pat and Dick had early training in the histrionic arts. They performed together with remarkable effectiveness for more than a quarter of a century. It was a great act, and it worked. Pat would know by heart every word of her husband's speeches, could recite them from start to finish if she were awakened from a deep sleep. Yet she always, gave the impression in public of hearing them for the first time, her face lighting up at precisely the correct moments when he made his points. She was a marvelous prop.

Pat Nixon, who had faced dozens of hecklers in her first campaign and saw thousands more at first hand as the years progressed, learned there was nothing to gained politically by replying in kind; that turning the other cheek won sympathy and votes; that pleasing all was better than alienating some.

So she developed to a high art the

knack of giving non-answers to questions. She gave full replies in cliches

that hurt nobody and revealed

facade she erected. Late in 1958 she

and the vice president paid a four-day

nothing.

tight, difficult to talk to, very nervous and not at all the happy, outgoing personality I had remembered from high school days.

'I was sent to cover their arrival in the Philippines, where they had been sent by Eisenhower to visit the newly elected Ramon Magsaysay. President Magsaysay took the Nixons on a sightseeing trip by presidential yacht to Corregidor Island

"On the sail out. I mentioned to Bill Henry, then Nixon's press secretary, that I had known Mrs. Nixon back in high school days and I'd like to say hello. He said fine, and took me up to where she was seated with Mrs. Magsaysay. I greeted the two ladies and tried to talk with Pat and was astonished at the reception I got.

"Look, the natural thing for anyone to do would be to open up, smile, ask about what I've done. if I'd married, had any children, seen the other kids, all those things you'd expect a former teacher to ask a student. But she became stiff and wooden and acted as though she didn't want to talk to me or hear of ther other students and teachers.

"I sensed this in a couple of minutes, then quickly thanked her and left.

A few times the crust she had laid over her emotions would crack and she would reveal, fleetingly, the feelings inside.

Once a reporter asked her a question routinely asked of all political wives: Would she want one of her daughters to marry a politician? She answered: "I'd feel sorry for her if she ever married anyone in politics."

In 1970, during a tour of training school for delinquent boys, she told the youths: "I want you to be something great. One of you can even be president." Then Pat Nixon turned away and, in an aside audible only to a few people standing closest to her. added: "I wouldn't want to wish it on

Pat helps launch Nixon's 1952 vice-presidential tour in Pomona, Calif. The two girls are Linda and Diana Day, daughters of Roy O. Day, GOP

chairman for Nixon's home district. George Murphy, the actor, stands behind the girls.

## Nixons attract little attention

house not only the presidential papers

but the vast collection of dolls she and

There is little spontaneous talk would be in California and would about the Nixons in San Clemente. The people in the restaurants, the motels and modern boutiques in the town center go about their business as though the former president and first lady were not a presence any more.

Nixon bought for their daughters during their foreign visits. There is no library, no plans for one, and the San Clemente public library

now has only a few folders filled with Once, in 1969, Pat Nixon began plannewspaper clippings about him. Few ning the things that would go into a readers ask to see them. Even the city's newspaper. The Daily Sun-Post, has almost given up on them because they have shut themselves away so completely. Only a few articles appear from time to time.

Occasionally visitors will stroll down the beach and stare at the estate. They can see only the embankment and a gazebo where Secret Servicemen are stationed. The agents sit there and look disinterestedly at the visitors.

198'1

answering another call.

Back in Washington, she learned later, news photographers who had been waiting in front of her home rang the bell, rushed past the frightened sitter and woke up the little girls. The photographers ordered them to pose for pictures. The flashbulbs and the sudden awakening terrified the children, who burst into tears.

Despite her dislike of politicking. Pat Nixon was a magnificent campaigner. By the necromancy of a remarkable will, she became on the surface a mirror-image of Richard Nixon, with his goals her goals, his wishes her wishes. She did this so well that countless articles appeared over the years commenting on how much Pat Nixon resembled her husband.

She was an enormous asset to him because he had arrived on the scene while feminism was only a volcano underground: Betty Friedan was still writing articles on "Teen-age Girls in Trouble" for Coronet Magazine and 'The Coming Ice Age'' for Harper's.

Pat exemplified to many American women, especially Middle American women, where the Nixons pulled strongest, the type of wife and mother they still believed was the best kind to be: all the chores done, perfectly, of course, yet still looking fresh, poised and squeaky clean. Much more important, she communicated a signal women caught with little trouble, that Pat Nixon really ruled the roost but was doing it quietly and raising no fuss about it. For America, women knew, was a matriarchy. And they suspected. quite correctly, that without Pat the Nixons would soon become unstuck.

## Pat convinced husband was cheated in '60 vote

Pat Nixon was certain in her heart that her husband had been cheated of the 1960 election. On Inauguration Day she pointedly snubbed Jackie. John Kennedy, in his speech accep-

ting the Democratic nomination, had made an unusual, sharp personal attack on Nixon that surprised politicians and angered Pat.

"We know that our opponents will invoke the name of Abraham Lincoln on behalf of their candidate." Kennedy had said. "despite the fact that his political career has often seemed to show charity for none and malice for all." And he added: "Mr. Nixon may feel it is his turn now, after the New Deal and the Fair Deal-but before he deals, someone is going to cut the cards."

During the campaign Kennedy continued to flick at Nixon with rapier thrusts of wit: he also made remarks about him in private that quickly came back to the Nixons.

The snub came inside the White House that cold Friday morning, Jan. 20, 1961, the day after one of the worst snewstorms in Washington's history. The Nixons had arrived about 10:30 and were ushered into the Red Room,

where some two dozen dignitaries were gathering before moving out to the inaugural stand on the steps of the Capitol's East Portico. Mamie Eisenhower was there: Lyndon and Lady Bird Johnson soon arrived.

Kennedy and the next first lady drove up and were greeted by Eisenhower, who had been standing inside the doors at the North Portico. Ike escorted them into the Red Room. where coffee and little cakes were being passed around.

Jackie, in a beige cloth coat with a narrow sable collar and beige felt pillbox hat. found a seat on a sofa next to Pat Nixon. Pat acknowledged Jackie's presence, then turned away and spoke to another woman on the couch and until it was time to leave.

John Eisenhower, Ike's son and aide, saw Jackie sitting alone and came over to chat. He told her she would love the house and how helpful the servants would be, but got the feeling she wasn't listening.

After the ceremony the Nixons slip-ped away to Wesley Heights as new snow began to fall.

## Nations must cooperate

#### By FRANK CORMIER ssociated Press Writer

CARACAS, Venezuela (AP) -President Carter urged poor coun-tries today to join rich industrial nations in a five-step drive to fight inflation, create jobs and raise living standards because rich nations "cannot by themselves bring about world economic recovery.

"We need to share a responsibility for solving problems - not to divide the blame for ignoring them," Carter declared in a major address to Venezuela's national congress on the second day of his week-long tour of Latin America and Africa.

"Only by acting together can we expand trade and investment in order to create more jobs, to curb inflation, and raise the standard of living of our peoples," the president said. "The industrial nations share the same problems and cannot by themselves bring about world economic recov-

world trade. -- Moderate disruptive price movements in basic commodities. Conserve and develop energy.

- And strengthen the technological

base in the poorer countries. In addition, Carter said he was proposing "a U.S. foundation for technological collaboration."

Beyond pledging that "we in the United States will do our part," Carter did not elaborate. But he noted that he has asked Congress to in-crease economic assistance funds by 28 percent and that his administration is prepared to increase American contributions to the International Monetary Fund.

Carter spoke from a lofty, ornate dais to a packed chamber of legislators who gave him a standing ovation when he arrived. And for the third time in two days, he complimented them by speaking in Spanish, giving his introductory remarks in that lan-guage. But he switched to English for the remainder of his address.

After his speech, Carter set aside time for more talks with Venezuelan President Carlos Andres Perez. They met for two hours Tuesday, but left

touchy questions for today, including the price of oil. Venezuela is the third largest supplier of oil to the United States

Following today's talks, Carter, his wife Rosalynn, 10-year-old daughter Amy and top U.S. officials including national security adviser Zbigniew Brzezinski and Secretary of State Cyrus R. Vance, were bound for the

## **Convictions** upheld by court of appeals

#### AUSTIN BUREAU

AUSTIN-Convictions in two Ector County cases were upheld Wednesday by the Texas Court of Criminal Appeals.

The appeals court affirmed the 99year prison sentence assessed Christopher Dwayne Cline for aggravated robbery of an Odessa Convenience store clerk at knifepoint.

After robbing the clerk of some \$100, the court's opinion says, Cline took the clerk in a stolen pickup truck to a pasture north of the city where he forced her to disrobe and "submit to sexual intercourse and to attempt unnatural sex act."

Cline appealed on grounds that the

## Airport foes bomb hotel

NARITA, Japan (AP) - Helmeted militants threw about 20 firebombs into Japan Air Lines' new Narita airport hotel early today, smashing windows and damaging lobby furniture in the continuing fight against Tokyo's new international airport.

Police said 10 men drove a small truck up to the hotel, hurled the bombs and fled. A private guard was slightly injured.

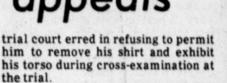

The opening of the billion-dollar airport 41 miles north of Tokyo has been delayed again because the control tower was wrecked during a mob attack Sunday and the foes of the installation have promised more violence.

The opening, postponed from Thursday, is now six years behind schedule. The Cabinet is to meet Friday to set a new date, with one in May predicted.

The airport is opposed by a coalition of local farmers who were forced to sell their land for the airport, environmentalists and young radicals used to thie

Brazilian capital of Brasilia. About 300 demonstrating university students condemned Carter and his

human rights policy Tuesday in Bra-silia. They declared the policy inval-id, saying the United States supports leaders like Agosto Pinochet of Chile and Anastasio Somoza of Nicarague, both accused of denying human rights.

His defense counsel had argued that Cline was the victim of mistaken identity, and that the clerk had not testified regarding scars or tattoos on Cline's torso.

The clerk testified that she remembered Cline's face because "I thought it was the last face I was going to see" and remembered his knife. but that it was dark and she did not remember any tattoos.

In its opinion, the appeals court noted that 11 months had esapsed between the time of the offense and the trial, and that "any visible marks borne by the appellant (Cline) could have been placed on his body during the interim." desplite testimony from other witnesses to the contrary.

The court concluded no harm had been done by the refusal to allow Cline to exhibit his torso.

## Prescription said forged

A 17-year-old Midland youth was arrested Tuesday for attempting to pass a forged prescription for a pain killer and an antibiotic at Walgreen's,

215 Andrews Highway, police said. An off-duty police officer, working as a plain-clothes officer, was notified of the forged prescription by pharma-cists Terry Wall and Paul Tunell. According to the pharmacists, the youth had used the same prescription Sunday, but the pharmacist was unable to fill the desired quantity, police said.

The youth returned with the prescription Tuesday, in an attempt to obtain more of the drug, at which time the prescription was found to be forged, Tunell told police. The doctor tion was telephoned, and he denied writing the prescription, police said. Commissioners

name constable

Garcia was declared ineligible for the post by County Attorney Mike Atkins because Garcia failed to complete law enforcement officer training by March 15 at the Permian Basin Law Enforcement Academy.

He was scheduled to complete the course in February but was released from the academy for missing three days of classes when he was arrested by Midland police and charged with making a false report to police.

Garcia is charged with making a false report to Midland police after they found him lying in a water puddle the morning of Feb. 18 at Midland Regional Air Terminal.

Garcia reportedly claimed he had been beaten in an attempt to silence him on the Jan. 22 death of Ector County Jail inmate Larry Lozano.

Lozano, 27, died in a hallway just outside a padded cell in the county jail. Ector County Sheriff Elton Faught claimed that Lozano committed suicide by beating his head against the plexiglass window in his cell. An El Paso medical examiner hired by Lozano's family, however, said Lozano's death ap-peared to be homicide. A Houston medical examiner is studying autopsy reports from an Ector County medical examiner and the El Paso medical examiner to determine cause of death.

Garcia served as Precinct 4Bconstable since September 1977, when he was appointed to fill the post vacated by Ray Trujillo.

### Absentee voting turnout 'normal'

At the close of absentee voting in Midland's joint elections Tuesday afternoon, 706 persons had cast their ballots, according to Don Furgeson, Midland public schools business manager and election clerk. Furgeson said turnout was "about normal," with the heaviest voting Tuesday when 300 persons showed up to vote for city, public schools, Midland College and Midland County Hospital District officials.

The election for those four government bodies is Saturday.

## **Educational group** sets quarterly meet

The Texas Association of Educational Technolo-gists, Region 18, will hold its quarterly meeting at 7:30 p.m. Monday in the newly-opened Lyndon Baines Johnson Educational Forum at Midland Col-

development. About 35 representatives from public and private schools, colleges and universities located in a 17-county area of West Texas belong to Region 18 of the association.

## Parties designated to discuss reservoir plans

PAGE 12A

AUSTIN-Plans by Colorado River Municipal Water District for con-struction of Stacy Reservoir on the Colorado River took a small step forward Tuesday, with the Texas Water Commission designating parties in its hearing on CRMWD's permit request.

But a date for full hearing on the application will not be set until after the designated parties confer this week and report back to the TWC on 'discovery'' matters at 10 a.m. April

After determining how to deal with those matters of evidence not agreed to by the parties, the TWC expects to set a hearing date-which CRMWD has urged be April 25.

However, the Lower Colorado River Authority, which is opposing the application and other parties indicated

they would prefer a June hearing. In addition to the CRMWD and LCRA, the City of Austin, Garwood Irrigation Co., Lakeside Irrigation Co., Pierce Ranch, Department of Water **Resources Public Interest Advocate** Jack Cox and the Lake Travis Improvement Association were designated as parties.

Inclusion of the last group drew a protest from Austin attorney Frank Booth, representing CRMWD, who contended LTIA had not shown any 'justicable interest" and held no water rights on the Colorado.

However, the three-member commission agreed to hear from LTIA president Dan Warner, who reported residents around Lake Travis are "deeply concerned" over plans for construction of the upstream reservoir

Low-water levels on the nonconstant level lake could have an

"adverse impact" on landowners and tourist-related industries Warner contended

LTIA, organized in 1947, represents some 4,000 residents, he reports.

TWC Chairman Joe Carter commented he'd prefer to hear from the representative of one group than 4,000 irate landowners." and the TWC agreed to LTIA's participation. despite what Carter called its "somewhat tenuous" claim.

Tuesday's hearing was limited to preliminary matters, but some participants provided a preview of what can be expected at the full hearing.

LCRA attorney Fred Werkenthin. Austin, argued against the suggested April 25 hearing date, saying the project has been "on the boards for many, many years," and could have "substantial consequences to the Highland Lakes system.'

Booth, however, contended CRMWD is "prepared to go to trial now," and that to delay would simply postpone the project which has been studied since 1960 by various agen-cies, including the U.S. Bureau of Reclamation, Army Corps of Engineers and Texas Water Develop-

Werkenthin replied that the studies indicated the water will not be needed until after 1980-and said LCRA studies indicate the date should be 1990

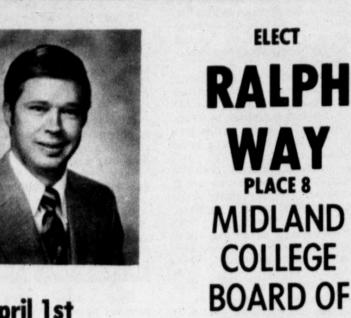

Among the matters to be discussed by the various attorneys on handling 'discovery'' are engineering studies to be presented at the full hearing.

Albert de la Rosa, representing the City of Austin, reported Austin plans to hire consultants to prepare an engineering study.

Under CRMWD's proposal, the reservoir would be located some 24 miles southeast of Ballinger, impounding water in parts of Coleman. Concho and Runnels counties.

Capacity of the reservoir would be 554,339 acre-feet at a normal maximum operating elevation of 1,551.5 feet above mean sea level, with 19,149 surface acres at that elevation.

#### WHAT'S IT LIKE TO HAVE **A CHIMNEY FIRE?**

It's no fun. If it doesn't burn the house down, it will probably wreck your chimney and scare you half to death. Here's how it happens.

Begin with one dirty chimney -- let's say a fireplace not cleaned for a couple of years. The soot lining the chimney flue is saturated with flammable stuff called creosote. (More detail on creosote is available in any dictionary.) It dosen't take much to ignite creasate - a newspaper fire sending flames up to the damper is enough.

Once kindled, creosote burns with joyous abandon. In a matter of seconds the fire spreads up through the flue creating a draft that only helps things along. At this point your average chimney fire begins to roar and howl, sending the occupants of the house running for cove Denson and Orlando

qualification as the first and that his election fresh, new look" in the equal opportunity to come when the federal and most important of would bring "a fresh, new GOP, he said that 250 every individual," he government employs more people than private and well-wishers to the He deplored what he industry, "but I want to

## Let's Keep Our Promises!

Tom Sloan believes that our city government- just like people in all our relationships-ought to keep its promises. When we vote a bond issue to fix the streets, then let's fix the streets! When we promise our people protection for lives and property, then let's do what we have to do to provide that protection! When we build a new airport, let's be as courteous and helpful to people using that airport as it is humanly possible to be. When we promise representation by all our people on our city boards and commissions, let's not appoint only those who come from one exclusive clique or group, but instead make those agencies truly representative.

INTEGRITY IN GOVERNMENT AT ALL LEVELS IS ABSOLUTELY ESSENTIAL. HOLDING OFFICE FOR TOO LONG LEADS TO INDIFFERENCE OR RIGIDITY IN THOUGHT AND ACTION. TOM SLOAN BELIEVES IN KEEPING PROMISES. YOU CAN COUNT ON HIM TO DO THAT- AND TO SEE TO IT THAT CITY HALL DOES, ALSO!

confinement will have little effect on the Houston police depart-ment, where I think the real problem lies."

The sentences were handed down against Terry W. Denson, 27 Stephen Orlando, 22, and Joseph Janish, 22.

The case arose in May 1977 when Joe Campos Torres, a 23-year-old Mexican-American laborer, former member of the Army Ranger unit. and selfstyled karate expert, was arrested during a disturbance at a Houston tavern.

Three days later, the body of Torres, clad in Army fatigues and heavy combat boots, was found jammed against some of the debris that always drifts down the muddy waters of Buffalo Bayou. a sluggish stream that flows through a section of downtown Houston.

Medical examiners said Torres drowned.

Bob Bennett, defense attorney for former policeman Denson, told The Associated Press. "He just doesn't want to be interviewed now. He has been under a hell of a strain for the past 10 months.

"I guess the sentence by the judge today was like a patient where the doctor told him he didn't have cancer, but did need a major operation.

"I will tell you that Terry Denson has in-sisted throughout he had nothing to do with the death of Joe Campos Torres. I believed him. And two juries have believed him. This was a case where some guys

If you run, you'll be treated to a real fire works show. As the creosote fire builds and intensifies the heat melts the mortar between the brick. The red-hot mortar actually drips into the flue, only to be caught up in the tremendous up-draft, and these little fire balls shoot out the chimney and onto the roof. If you're lucky, the chimney will fall apart destroying one end of the building -- if you're not, this miniature volcano can bring the whole house down.

However, if you stand your ground a chimney fire can be controlled. CALL THE FIRE DEPARTMENT, throw rock solt on the floor of the fireplace, cover the opening with a wet blanket and hope for the best. But it should by pointed out that having your chimney cleaned is a lot easier on the nerves than the rock salt and wet blanket method.

## NEEDLEPLAY Stitch a present for yourself or friend

#### By ERICA WILSON

It's the little things that make the difference-a quick smile, sunshine on a rainy day; the little gift you suddenly think of giving (or the one that surprises you from a friend).

The winter has been so long that I've had plenty of time to get ready for spring, so I've just finished a mini-purse. (I think they call them disco bags-but they're wonderfully useful in the evening whether you dance at a disco, dine in an elegant restaurant or just pop over to your neighbor's for TV and pizza!)

The first experimental one I made was a gift for myself, but making it was so much fun that I'm going to make several as presents. They're wonderful standbys for just the right occasion-everyone always needs an extra purse.

You start with a simple square (about 5 inches by 5 inches) of your favorite needlework. It could be pulled work-white on white interlocked canvas. It could be patchwork-little squares of color or miniature cathedral windows. It could be ribbons or a colored linen wild flower appliqued on white cotton with tiny buttonhole stitches. Or maybe even that needlepoint geometric that started out as a pillow and never got completed.

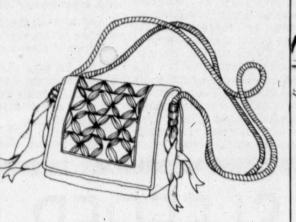

piece of muslin and mount the whole thing in a frame (stretcher strips or a large enough round frame).

Now buy some 10-to-the-inch plastic canvas-that great stuff available by the yard (called Fashion Ease)-or some interlocked canvas (also great because it can be cut to size without fraying). The canvas should be large enough to fold in three to make an envelope clutch bag, with front flap deep enough to take the square of embroidery, plus extra canvas all around the "frame." (If your square was 5 inches by 5 inches, your canvas should be 23 inches by 7 inches.

On one end of your canvas (which will become the front flap), measure out and draw with a permanent marker a square the exact size of your embroidery. (Don't cut anything yet!) Then work the whole canvas with whatever color and stitch takes your fancy. Be sure you work the front flap with enough stitches to slightly overlap and frame your centerpiece, leaving no unsightly canvas showing around the edges.

Now cut the square opening out of your canvas, close against your stitching, since the canvas needs no turnbacks. At this point, you should have a worked strip of canvas with a "window" cut out of one end of

Finish this front flap and window all around the edges with the binding or joining stitch. Then lay it down on top of the embroidered centerpiece on the Oh, don't forget a pad and pend muslin. Since the whole thing is stretched in a frame. of your friends who will want one

## **DISCO BAG**

it will be easy to stitch firmly through all the layers to attach them together with back stitches just inside the edging stitch.

Now comes the finishing touch that really makes Whichever it is, baste it in the center of a square you a "pro." (The secret is making it so easy for yourself that you can't fail.) Dash out to the department or notions store and buy 1) some Stitch Witchery-that fusible Pellon web that is adhesive when you iron it; 2) some crinoline or buckram for stiffening, and 3) some lining in silky fabric in a good coordinating color. Cut the lining with turnbacks and baste them back all around so the lining exactly fits your long strips of canvas.

Cut two pieces of Stitch Witchery and one of crinoline the EXACT size of the canvas. On the ironing board, lay the embroidery face down, one layer of Stitch Witchery and one layer of crinoline on top. Iron (hot) until the three are firmly stuck. Now add the other layer of Stitch Witchery and the lining and iron these together. Simple!

Now all you have to do is sew up the envelope part of the canvas with a gusset set in either side using the edging stitch. What are gussets? So sorry, thought you knew! They are oblong or wedge-shaped pieces of the same canvas put in on either side of the bag. which allows you to open it wider and get more into it. For a bag this size, each gusset should measure 5 34 inches by 34 inches. They should be worked in the same way as the bag, with a lining lightly hemmed to the back before you stitch them in place.

Now add string silky cords in macrame or a gold chain as a shoulder strap, and voila-disco bag at the ready! Add keys, lipstick, wallet and you're off! Oh, don't forget a pad and pencil to list the names

## starting plants from seeds

Know-how important when

#### By TOM STEVENSON Washington Post

Starting garden plants from seeds indoors can be rewarding if you have the know-how and can provide a suitable environment. Otherwise, it may be disappointing.

If the seedlings are not healthy and sturdy when planted outdoors, they cannot develop and produce as they should. For example, a tomato plant that should produce 30 to 40 pounds of fruit would provide no more than 5 to 10 pounds if it gets a bad start.

A lot of gardeners have the idea that seedlings in poor condition can be completely restored to normalcy with a lot of tender loving care. It will not happen.

Of course, you can try to grow them from seed and if it doesn't work out, you can still buy plants later. At least you will have gained some experience.

Start the seeds in one of the new prepared mixes such as Terra-Lite growing media. They are loose and practically foolproof; sufficient oxygen will reach the roots yet moisture is retained for long

## Lowly hot dog ranks as sausage

#### By TOM HOGE **AP** Newsfeatures Writer

Most of us think of hot dogs as being as American as a gingham dress but hardly a gourmet offering. Wrong on both counts.

The succulent frankfurter is actually a German sausage, hailing from Frankfurt, whose citizens feel that their hometown is the only locality entitled to claim the term frankfurter.

The Germans seem to be more aware of the versatility of this pungent sausage than we are and feature it in a dazzling variety of recipes from kebabs to casseroles.

Sausages have a long and colorful history, dating back at least to the 8th century B.C. when Homer mentioned them in his Odyssey. The ancient Romans were extremely fond of a sausage made from fresh pork and white pine nuts chopped fine with cumin seed, bay leaves and black pepper. It was so popular that it became the gustatory centerpiece of the an-cient Lupercalian and Floralian festivals.

Sausage-making became a culinary art in the Middle Ages and, like the frankfurter, a number of favorites were named after the cities of their origin. They included bologna from the Italian city of that name and Genoa salami from another Italian city.

As the years went by, many countries developed national specialties in the sausage field, which exist to this day.

The British became noted for black pudding, a sausage made from oatmeal, suet and hog's blood. The French developed a white pudding of chicken, egg yolks, spices and bread crumbs. And in America it was the country sausage made from pork, potato flour, water and sage or other seasonings.

But Germany led the field with fresh pork varieties like bratwurst and partly cooked ones like the frankfurter, berliner and mettwurst.

The frankfurter, as we know it, is made from beef. pork, veal or a combination of these meats. They are blended with seasonings and curing nitrates. This filling is then stuffed into casings, smoked, cooked in steam and quickly chilled.

periods of time by micro-absorbent action, so that both air and water are continually available to the tiny seedling roots.

Sowing seeds is an art. Don't cover fine seeds such as petunia, snapdragon, lettuce and carrots. Sow them thinly, omitting covering if seeds are fine. Coarse seeds can be covered with a loose material such as milled sphagnum moss or one of the readymixes on the market.

After the seedlings are up they need good light. Put them near a bright window where they can get sunlight for at least six hours or under fluorescent lights for 10 to 12 hours a day. Keep the temperatures between 70 and 75 degrees during the day and 60 to 65 degrees at night. Water the seedlings lightly each day. When the seedlings develop their second set of leaves they are ready for transplanting to individual pots.

Some seedlings, like cabbage, lettuce, broccoli, larkspur and delphynium, if properly hardened (adjusted gradually to outdoor temperatures) will stand frost and can be planted in the garden three or four weeks before danger of frost is over.

Other plants, such as tomato, pepper, marigold, petunia and impatiens, are tender and should not be planted outdoors until all danger of frost is past. Read the instructions on the seed packets to determine proper timing, allowing for germination as well as growth afterwards.

If the garden is made weed-free it can be maintained best by not disturbing the soil any more than necessary. Digging can lead to germination of a new crop of weed seeds that otherwise would remain dormant.

A large amount of small-seed species require both moisture and a small amount of red light in order to start the germination process. This is particularly true of weeds that emerge from disturbed soil.

The red wavelengths necessary for germination can penetrate about one inch of sandy soil, thus activating seeds that were brought nearer the surface by digging.

Grand Rapids lettuce seed, for example, kept moist but completely in darkness, will have germination of only 5 to 30 percent. However, when the inhibited seeds are given a few minutes of either filtered red light, or room illumination containing red light, and then replaced in darkness, essentially complete germination occurs.

## Patti Paxton to recite vows

SHREVEPORT, La. - Mr. and Mrs. Jack Paxton of Shreveport announce the engagement and approaching marriage of their daughter, Patti, to Geoffrey W. Garrett, son of Mrs. David Garrett of Seguin, Tex.

The bride-elect is the granddaughter of Mr. and Mrs. Chester Paxton of Midland, Texas,

The couple is to be married at 4 p.m. July 22 in the Cross United Church in Seguin. It was arroneously stated in a previous story in The Reporter-Telegram that the couple was already married.

Miss Paxton was graduated with honors from The University of Texas-Austin with a degree in interior design, and is an instructor in engineering graphics at the university.

Garrett also was graduated with honors from UT-Austin and attends medical school at the UT Health Science Center in San Antonio, Texas.

## **Baby** wears Book deals with adult male hostility aging atting

### By DAVID BEHRENS Newsday

NEW YORK - Ariel David is too young to know the woes of the world. He is, after all, only 9 weeks old and his sleep went uninterrupted one recent afternoon while his mother, psychologist Phyllis Chesler, talked about men and "About Men," her new book

It is just as well that young Ariel David slept on. secure in his crib, because his mother's book is likely to disturb many older males. Our world, as Chesler sees it, is no more promising a place for little boys than it is for little girls.

"About Men" is a journey through the male human's history from his earliest mythic days. And in Chesler's view, it is a trip haunted by hostilities, delusions and lovelessness. It is also filled with problems Chesier feels are worth solving - if men and women are going to live and love together.

"About Men" has already been hailed as an "important book" by feminist writers such as Gloria Steinem and Erica Jong, who called it brilliant and daring. John Leonard, the New York Times critic. found it often "disorderly." but also "brave" and 'sad." And many readers will find it complicated, haunting and often outrageous.

One of her principal theories concerns the hostility she sees in adult men toward other males, especially their own sons. The theory is based on Chesler's personal intuitive interpretation of myths, history. literature, art and modern psychology, as well as interviews she conducted with men during the past three years.

The theory is bound to upset many readers, especially parents, who are apt to feel wrongly accused. But Chesler contends that most men harbor these dark feelings even though they may be buried in the subconscious

The modern father may not be aware of his impact on his son, Chesler suggests. But the hostility and rage can be real, nevertheless, even if it is not acknowledged. She believes adult men are so possessive toward the women in their lives that even their sons (perhaps especially them) pose an un-conscious threat as a rival for the mother's love and attention

Writing to his father. Austrian novelist Franz Kafka recalled how he was weighed down by his father's more physical presence. Chesler cites this passage from Kafka's letter:

'What was always incomprehensible to me was your total lack of feelings for the suffering and shame you could inflict with your words and judgments. It was as though you had no notion of your power." As a child, Kafka concluded, he had remained alive only through "an undeserved gift." his father's mercy.

(This sort of paternal rage is not'a completely new concept, a New York psychotherapist said, pointing out that the anger of fathers toward sons is "something I've seen every day for 25 years." Fathers are often unconsciously furious, he said, because their children have advantages they themselves never had. And when the child acts up or behaves like a child rather than an adult, the father is often doubly furious).

But should it be so? Has something gone wrong with the human design? Chesler was asked. Is disaster inevitable?

"I don't know," she said. "Sometimes I think that we are an experiment that has not succeeded." Still. she was hardly depressed.

Published by Simon & Shuster, Chesler's new work

#### Men have not yet figured out how to escape their own hostility, their own mothers, their own inability to truly love women.

#### dedicated, were married.

Sitting in her apartment; surrounded by the comforting messiness of a book-littered study, she mixed academic caution with her own personal optimism. Born in Brooklyn, educated at Bard College, she earned a doctorate from the New School in the 1960s and is currently a New York City University psychology professor.

Her books, (the second is "Women, Money and Power") have been widely praised, and the has been in demand on the lecture circuit. As a feminist, she has played a prominent role inn the women's movement as a public model of the successful woman. And as a psychologist, she has not been insensitive to the problems of the modern male.

Yes, she nods, men have not yet figured out how to escape their own hostility, their own mothers, their own inability to truly love women. These were some of the lessons of her 37 years, she said, learned from books and from the men in her life as well as from her many interviews with men.

'About Men'' was born five years ago, when Chesler discovered that after completing "Women" and Madness," most of her leftover notes were about males. Then, she said, she began to search for books on men. "I didn't write the book to tell you about my sex life or to cry. 'Poor me, poor me.' But most of the books in the field were impersonal, neither alive nor scientific.

So she wrote her book to describe what has been really happening to men, she says.

It is a portrait she hopes most women will recognize, but it was aimed at men, that lonely breed, to help, not to condemn. "Men are in a lot of pain," Chesler said, "and they won't be able to get out of the rat race of the male condition without investigating their relationship with other men, not until they stop looking toward women for those things we can't satisfy.

Suggesting her own solution. Chesler asks readers to re-examine their most prized notions about reality about brotherhood and love, religion and art. mythology and Freud, war and family structure, biology and sex - the great sweep of cultural history. And in a style she calls "mythic-poetic." she will jar many readers with her principal concepts. For example:

-That hostility of fathers toward sons is an 'original sin," older than the Greek legend of Saturn devouring all of his sons except Zeus. Modern sons, she observes, will deny they have been wounded by angry fathers, refusing to admit that there is such a thing as the terror of male violence.

-That the crucifixion of Jesus was (or is) a classic expression of hostility of a father toward a son. "We are meant to forget the bloodiness of the original deed," Chesler writes?

-That Freud was wrong in viewing hostility of sons toward fathers as the most dominant force in male relationships. "Freud, the son, could ho more remember the terror of father violence than could Freud, the father, admit to such deeds."

-That war may be an expression of this hostility fathers sending sons to their death.

-That men covet the power of motherhood. The Bible is filled with "womb-envy." as she calls it, noting: "It was God, the Father, who gave birth to

wounded sons" who muse to themselves: "My mother would never sleep with that ordinary bully. my father." But the price men pay is to fear older. stronger women who resemble their mothers or, as Chesler puts it, to fail at intimacy with "real women.

All these are generalizations. Chesler acknowledged. There are "good guy" exceptions, of course. Still, she argues, her concepts are the general rule, and in some cases, they are bound to upset both conservaties and radicals. For instance. she speculates that in a special sense, men live in a separate male-homosexual culture, where "only other men matter, only Daddy or the God-Father."

So it is "tragic," she says, that warm relationships between men are both important and so taboo. Yet. as a feminist, she says, she is also ambivalent about male homosexuals who make up "one more group

that is not involved in nourishing women ... that for baptism won't help me with child care, that wos't make love to me, that won't be my friend.'

And in some ways, she admits, she envies men's TOLEDO, Ohio (AP)friendship with other men, the power which allows When one-month-old men "to take risks and losses ... with others of their Nicole Lou, the daughter own sex." But it has dangerous roots, she claims, a of Mr. and Mrs. James form of fraternal rage "turned outward." Alexander, was baptized

Women cannot truly understand this brotherhood in the Lutheran Church of the excitement on the football field, the hand-and- Our Savior recently, the backside-slapping. These gestures are symbols of a baby wore a 70-year-old truce, she says, "reminders that fratricide is to be baptismal gown. avoided." But the gestures are still mysterious to women who have their own problem dealing warmly with other women. Chesler says.

And with all the hostility in the air. Chesler sees victims everywhere: weaker men, women and children. In other words, almost all of us.

"It's the sons who very often vent their grief over great-grandmother of having been emotionally abandoned by their fathers Nicole. The dress also and they bring this into the beds of women. Well, was worn by Nicole's we can't satisfy that longing for male approval and mother and her godmale protection."

Myths today, she says, are perhaps different. tisms.

## Change lifestyle; lose pounds

### By SHIRLEY BRIGHT BOODY Copley News Service

The incidence of obesity currently affecting millions is on the increase, and consequently the physical ailments resulting from obesity are taking a greater toll among the populace.

The specific problems mentioned most frequently were heart attacks, strokes, diabetes, circulatory problems, arthritis and hypoglycemia-all of which are either brought on by obesity or aggravated by it.

The current scientific consensus for the treatment of overweight continues to be in the control of a diet that, of course, is low in calories but not too low to cause discouragement in following it.

The diet must consist of a balance between protein. carbohydrates and fat. The three food categories must include items that provide all of the needed vitamins, minerals and trace minerals.

Dr. Leonard S. Levitz from the University of Pennsylvania presented a paper on Behavioral Modification in the treatment of obesity.

His thesis involves rearranging one's environment to change habitual eating patterns. For example, he cited the case of a woman patient whose behaviour pattern had been monitored and a food diary kept.

This woman was found to have concentrated all of her interests in the kitchen. Her favorite chair was there along with her radio, television and reading material. Consequently she spent the majority of her time there-close to food.

By rearranging her environment and getting her out of the kitchen, she became more aware of her

Free

former concentration on food.

Behavioral consequence studies, relating to positive or negative results following specific behaviour patterns, are also being conducted. The idea is to change habitual exposure and response patterns

In these studies it was found that some obese patients did a lot of eating standing up, at the sink or kitchen counters, and that this pattern tended to cause them to eat more and at a faster rate.

The therapy involved seating the subjects and having them rest their fork on their plates and pause at frequent intervals.

These studies showed that, if possible, having someone present while eating not only improved nutrition but reduced consumption. Many people eating alone neglect a varied, nutritious diet and seem to concentrate on a few items.

Many people suffer from a "completion" compulsion. They feel they must eat in "unit quantities." or they must finish everything they have prepared.

What all this says is that one's eating habits go beyond just the actual food eaten. It involves the environment in which it is eaten and the conditions surrounding consumption. It also means that all elements contributing to obesity can be controlled. but only by the person affected.

Perhaps you can examine your own behavioral pattern to determine if it is causing your weight pat-

# WITH KITCHENAID, YOUR BEAUTIFUL NEW KITCHEN WILL WORK EVEN BETTER THAN IT LOOKS.

Not just a new dishwasher. The new dishwasher you can load as you like.

The new KitchenAid dishwasher has major improvements that make it even better than the old KitchenAid. The one that people who own dishwashers say is the best.

The first big improvement is Load-As-You-Like Washing, a completely revamped washing system that combines easy loading with better cleaning.

There are wash arms above and below both racks for better cleaning. Fold-down prongs and adjustable racks for easy loading. Soak 'n Scrub" pot cleaning action that really does get pots clean. A Soft Waste disposer that eliminates pre-rinsing. And improved energy efficiency, which means the new KitchenAid uses less hot water and less electricity than previous models.

Other features like the welded steel frame, rock hard porcelain finish, and the 1/2 HP ball bearing motor promise lasting beauty and reliable performance.

When you remodel your kitchen, don't just buy a new dishwasher. Buy the new dishwasher, KitchenAid.

## 'Basic training' urged for kids

#### By CONNIE GRZELKA **AP** Newsfeatures Writer

NEW YORK (AP) - If basic training works for the Army, the Navy, the Marines and the Air Force, why not apply a similar concept to the rearing of children. suggests author Lois Gould.

Contemplating the future of the still visionary "liberated family," Ms. Gould explains that such a system would rest on this simple base: "That mommy doesn't have full responsibility for the rearing of the children.

Ms. Gould, whose collection of essays on contemporary living, "Not Responsible for Personal has just been published, urges that Articles," children be trained to be self-sufficient as early as possible.

"The simple fact is that most kids can do more than most parents think they can. But unless they have to, they won't." she said in an interview here.

The "basic training" checklist she provides is geared to attack the long-held belief that the mother is the sole keeper of the flock:

'As soon as the child is old enough, he should be responsible for his own maintenance. When he runs out of socks, he can turn on the washing machine. He can clean his own room, prepare his own breakfast, fix his own lunch for school. He can help out with shopping for groceries - it helps the family and offers a consumer skill and a survival art the child should learn early," she says.

Ms. Gould, 40, a former newspaper reporter and author of seven books including the best-selling "Such Good Friends," is married to a Manhattan psychiatrist and is the mother of two teen-age sons.

Although Ms. Gould's latest book takes a humorous, reassuring look at such topics as the Equal Rights Amendment, the impact of television heroines, party-giving, pornography and etiquette for liberated persons, her personal view of the state of the feminist movement is a dark one.

"Many gains have been made, but we can't trust

## Cut property

### insurance cost

COLLEGE STATION — Cut property insurance costs—practice ten easy "how-to's", suggests Linda McCormack, a family resource management specialist.

Mrs. McCormack is with the Texas Agricultural Extension Service, The Texas A&M University System.

She offers these suggestions for cutting property insurance costs:

(1) Take advantage of higher deductables-the higher the deductable, the lower the premium.

(2) Shop around-shop among the different in-

surance companies. (3) Do not over-insure home or possessions.

(4) Purchase a three or five year policy, if possi-

ble.

(5) Take advantage of various package policies offered by insurance companies.

(6) Keep coverage up-to-date-under-insuring may be costly.

(7) Maintain community protection-participate in fire protection services.

(8) Professional organization policies-such as teacher unions or for retired military-may be cheaper

(9) Take precautions to reduce home fire hazards. (10) Vow to up-date policies every two to three them and sit back and relax," she says. "Each one of these could be withdrawn, simply because women are still not making the decisions in these cases.

"I think we get ecstatic too easily," she adds, urging caution in celebrating the strides of feminism. "We must never assume that anything is permanently won.

One example she cites is the "very active and efficient" day care program sponsored by the government during World War II and abolished after the war:

"Rosie the Riveter, the national heroine, died of unnatural causes along with the day care program. Thirty years later we still don't have a day care program.

There are still huge gaps between groups of women, but there needn't be because they have more links and bonds than they have differences. Ms. Gould believes.

'Many women distrust feminism and channel their loyalties to the men in their lives and the children they rear, as a result of cultural conditioning," she says.

Yet, public awareness of the women's movement has brought some changes. Ms. Gould points out from more roles for women in the movies to large numbers of women entering graduate school. Television commercials and programs are coming along, in her opinion, but "women are still not being sold the idea that they are strong, independent and autonomous.

One of the remaining problems that is a "tremendous area of neglect" is the issue of rearing little boys, she adds, noting that "it's easier to expand horizons for little girls than it is to take away the privileges that automatically come with being a little boy.

Feminists have not yet addressed themselves to this task, which is necessary to turn the system around but won't be easy to accomplish.

#### HOROSCOPE By CARROLL RIGHTER

(Thurs., March 30) GENERAL TENDENCIES: The early morning is your best time so you would be wise to try to accomplish as much as possible at this time. A new plan of action could bring much success in the days

ahead ARIES (Mar. 21 to Apr. 19) Daytime is fine for meeting in teresting personalities and studying new outlets. Don't ask for favors of anyone at this particular time.

TAURUS (Apr. 20 to May 20) Be sure not to invest too heavily in anything today. Your mate may not be in a good mood, but the planets are not favorable. Be patient. GEMINI (May 21 to June 21) Show increased loyalty to associates

early in the day and get fine response. Avoid one who wants to make hings difficult for you. MOON CHILDREN (June 22 to July 21) If you handle routine

tasks early in the day you'll have time for more important duties later. Take needed health treatments.

LEO (July 22 to Aug. 21) Handle important duties early since the aspects are more difficult later in the day. Take no chances with our reputation at this time VIRGO (Aug. 22 to Sept. 22) Take no risks of any kind, whether at

home or at work. Use that smile more and avoid possible nisunderstanding with others.

LIBRA (Sept. 23 to Oct. 22) Morning is best time for cor respondence and calling on the phone. Be sure not to overspend for scoreation in the evening. SCOR P10 (Oct. 23 to Nov. 21) Handle monetary affairs early since

later your thinking may be muddled. Avoid one who is detrimental hest interests

SAGITTARIUS (Nov. 22 to Dec. 21) Not a good day to attend group affairs, but if unavoidable, be careful and use caution. Express hap ness with loved one.

CAPRICORN (Dec. 22 to Jan/ 20) You may think you have sc much to do you want to throw in the sponge , but apply yourself and

the tasks are soon behind you. AQUARIUS (Jan. 21 to Feb. 19) Seek the cooperation of associates and then get busy and accomplish much. Avoid the social as much as you can now. PISCES (Feb. 20 to Mar. 20) Be sure not to distrub anyone who has

power over your monetary matters. Don't take any chances with the

## Hors d'oeuvres can be elegant

## By JEANNETTE BRANIN Copley News Service Ede was an Iowa farm girl, one of 10 children. She

PAGE 4B

learned "good, plain cooking." She thinks she was a grown woman before she ever heard the words "hors d'oeuvres.'

Margon was a Nebraska big-city girl, whose mother prepared foods which by today's standards would be called "gourmet." Margons's interest in cooking was superficial. She liked to make specialties, but she doesn't recall ever making an hors d'oeuvre.

Yet today Ede and Morgan are accomplished cooks and hostesses, and authors of "The Elegant Hors d'Oeuvre." a collection of recipes for dips. spreads, pick foods, finger foods and pastries for every occasion, from a fancy cocktail reception to an after-the-game feast for teenagers.

Many of the recipes in the new book begin with a chatty comment. Sometimes the authors point out that a particular hors d'oeuvre is low-calorie, or quick, or can be frozen, or can be adapted by substitutions.

#### HOT AND SPICY SHRIMP DIP

2 lbs. cream cheese, cut into cubes 1/2 lb. shrimp, cooked and chopped (canned may be used)

14 cup onion, chopped

1 medium tomato, peeled, seeded and chopped

3 cloves garlic, chopped

3 banana peppers, chopped

3 Torrido peppers, chopped (these come in a jar; use more if you like it hotter)

Gently fold ingredients together in a pan over hot water. Put into a chafing dish and serve warm with tortilla chips. Clams, crab, or lobster may be used in place of the shrimp. Makes 5 to 6 cups.

"This is one of our MOST favorites." write the authors. "You'll be asked again and again for the secret.

#### IMPERIAL CRAB DIP

1 pkg. (8 ozs.) cream cheese, OR 1 cup mayonnaise

1/4 cup onion, chopped fine

- 1 to 3 tsps. horseradish 1 tsp. milk or dry vermouth or 1 tbsp. lemon juice
- 1 can (61/2 ozs.) crabmeat, drained

1 pkg. slivered almonds

Mix all ingredients except almonds and pour into a greased baking dish (one you canserve in). Top with almonds. Bake at 275 degrees for 25 to 30 minutes. Serve at once with Wheat Thins or any other crackers you like. Keep warm on an electric warming tray or candle warmer. To prepare as a spread. use only 1/2 cup mayonnaise or 4 ounces of cream cheese. You can vary this recipe by adding green pepper, green onion, or a pinch of fine herbs.

These are time-consuming, but fun to make." say the authors of the next recipe. "You can make and freeze them well ahead of time. The raves they receive are worth the effort.

MAGNIFICENT MUSHROOM SURPRISES **Dough Ingredients** 3 pkgs. (3 ozs. each) cream cheese, softened 1/2 cup soft butter 11/2 cups flour **Filling Ingredients** 1/2 lb. fresh mushrooms minced 3 tbsps, butter 1 large onion. minced

14 tsp. thyme 2 tbsps. flour

14 cup sour cream

**Copley News Service** 

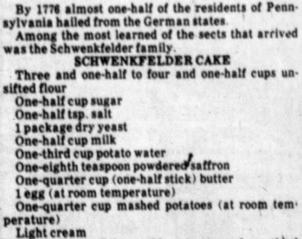

1 tsp. salt

Beat the dough ingredients together in a large bowl. Wrap in floured cloth or waxed paper and refrigerate for several hours.

In a skillet, saute the minced mushrooms in butter. add the onion, and cook until tender. Stir in salt,. thyme and flour. Stir in sour cream and remove from heat. Cool.

Roll out the dough (you may need to flour the pastry board). Cut dough into 2-inch circles. Place a rounded teaspoon of cooled mushroom mixture on each circle. Brush edges of circle with beaten egg white, and fold circle in half. Press the edges together with the tines of a fork; pierce top with fork. If you wish to freeze them, now is the time. To cook, place on an ungreased cookie-sheet, brush tops with beaten egg. Bake at 450 degrees for 12 minutes or until light brown. Serve hot. If they have been frozen. thaw for 20 minutes and bake as above. Serves 15 to

## German cake ancient recipe

In a large bowl thoroughly mix one and one-third cups flour, sugar, salt and undissolved yeast. Combine milk, potato water, powdered saffron and butter in a saucepan. Heat over low heat until liquids are very warm. Butter does not need to melt. Gradually add to dry ingredients and beat two minutes at medium speed of electric mixer, scraping bowl occasionally.

Add egg, potatoes and one-half cup flour, or enough flour to make a thick batter. Beat at high speed for two minutes, scraping bowl occasionally. Stir in enough additional flour to make a soft dough. Turn

enough additional flour to make a soft dough. Turn onto lightly floured board; knead until smooth and elastic, about eight to 10 minutes. Place in greased bowl, turning to grease top. Cover: let rise in warm place, free from draft, until doubled in bulk, about one hour. Punch dough down; turn onto lightly floured board. Roll dough into a rectangle, 10x13 inches. Place on a greased baking sheet. Cover: let rise in warm place, free from draft; until doubled in bulk, about 45 minutes about 45 minutes.

Meanwhile, prepare crumb topping. Brush cake with light cream. Sprinkle with top-ping. Back at 350 degrees about 25 minutes or until done. Remove from baking sheet and cool on wire rack. Makes one large cake or approximately 16 servings.

Crumb Topping: Combine one-half cup unsifted flour. one-half cup firmly packed light brown sugar and one-half teaspoon ground cinnamon. Cut in three

## Attitudes about spouse abusers need changing

PAGE 5B

EDITOR'S NOTE - Those who work with victims of domestic violence say society's tolerance of spouse abuse is one of the toughest problems they

### By MARTY HAIR Associated Press Writer

YPSILANTI, Mich. (AP) - A housewife, wearing a designer dress that cloaks her badly bruised arms and torso, visits her family doctor. He shakes his head in disbelief: "Your husband's too nice a guy to beat you.'

The wife of a factory worker, on advice from a social agency, calls the local prosecutor's office. She asks what legal action will stop her husband from beating her. "Call back Monday," she is told. Another woman sees a counselor about the

beatings she is subjected to when her husband comes home drunk. "What do you to do provoke him?" the psychologist asks.

Spouse abuse seems to be culturally accepted, says Dr. Elissa Benedek, a psychiatrist who works with both abusers and their victims.

Who's at fault? Nearly everyone who deals with cases of spouse abuse, says Dr. Benedek, a clinical associate professor of psychiatry at the University of Michigan and training director at the Center for Forensic Psychiatry in Ypsilanti.

We have to tell these women not to feel guilty. that it's not something they are causing." she says.

The prevailing attitude among physicians, mental health workers, police, courts and husbands and wives themselves, she feels, is that domestic violence is bad, but it's nobody else's business.

"Nobody needs it. That's probably the biggest thing that has to be refuted, that if a woman is abused, she wants it, she needs it, she's provoked it, she enjoys it.

Women are in very difficult positions. Many have no resources, nowhere to go. Who can you go to and say your husband's beating you?"

Some battered women testify in court that having no one to listen, nowhere to go, made them so desperate that they resorted to violence against their husbands.

One of them, Francine Hughes, has moved to Jackson, Mich., following her acquittal by reason of insanity of a first-degree murder charge in the death of her ex-husband.

The 30-year-old woman told the Ingham County Circuit Court jury last fall that her ex-husband choked her, threatened her with a knife, teased their children to tears and allowed a family pet to freeze.

After years of this, Mrs. Hughes said she splashed gasoline around the bed where James Hughes slept and lit it.

This year, in another case, Jennifer Patri of Waupaca, Wis., who contended she was the classic example of a battered wife, was convicted of manslaughter in the death of her husband and sentenced to 10 years in jail.

"This is absolutely the last option," Dr. Benedek says. "They looked, they tried everything and there just was no other choice - or they didn't see that there was another choice."There is no "typical" spouse abuser, although the person is usually male and often he uses alcohol and was abused himself as a child, she says.

ouse because the legal sanctions agains it are not all that stringent. You can get away with it. 'Mental health people are as guilty as anybody of saying. 'What did you do to cause it?' and in fact there may be some direct relation to something a woman did. But certainly not with all women. And even if there is, that's not the way to handle it." The problem is getting experts to realize "it takes two. To say not what did she do, but why is he doing that to her?' To facilitate this, she advocates special training, such as Detroit police officers are now receiving, in dealing with spouse abuse. One of Dr. Benedek's patients was living with a man who was a drug dealer. "She said she tried to leave him a couple of times. The night before she murdered him, he came home drunk. He beat her and raped her. And then he wanted to go out and look for a car! She said, 'No. I won't do that.' And he left and she sat by the window and waited and shot him with a gun. She said she had tried to leave him and he had followed her each time.' Another woman, middleclass, has a job and several children. Her arms show bruises where her husband beats her. She told Dr. Benedek that she is staying with her husband for her children's sake, and will leave when her oldest child is grown. "That's not a legitimate thing to do," the doctor said. "Kids know. And you're setting up the pattern of violence again. It's important to weigh the options, but, in fact, you're not doing your children any good. There are no family secrets.' Dr. Benedek tells patients they should get police officers' names and badge numbers when they arrive at the scene of a domestic dispute and should ask the officers to file a report. If the woman has to be hospitalized, she should get the name of the treating physician and request that pictures be taken showing her injuries. Beyond that, she may go to a lawyer or Legal Aid clinic to find out how to file criminal charges against her husband. Ideas for abuse shelters and funding for abuse programs will be contained in recommendations from the President's Commission on Mental Health subpanel on women and minorities, of which Dr. Benedek is a member. "It's hard to know whether to be pessimistic about the treatment of spouse abusers because they haven't been able to catch enough of them. There are some people who are violent not only to their spouse but also to casual strangers. For these people, I'm not optimistic. But for others, who are more able to change their behavior, the situation may get better with treatment."

## **Teacher** told to avoid college

MILWAUKEE (AP)—About 10 years ago when she was on welfare here, Mrs. Johnnie Deans recalls, her caseworker told her she was too old for college and

caseworker told her she was too old for college and not college material. She should learn, instead, to becme a power machine operator, the caseworker said. Today, Mrs. Deans, 39, who has a master's degree in educational psychology from the University of Wisconsin, Milwaukee, is working toward her doc-

toral degree. A mother of seven and a grandmother, Mrs. Deans teaches at Milwaukee Area Techinical College's Adult Basic Training Center. Her annual income is more than \$25,000.

Mrs. Deans remembers telling the caseworker, "if you can make it through college, I can't see any reason why I can't."

Guided tours no laughing matter

#### By HUGH A. MULLIGAN **AP Special Correspondent**

SHOTOVER RIVER, New Zealand (AP) - As soon as they find a safe and permanent dumping ground for atomic wastes, oceanographers and marine biologists might address themselves to locating a lasting repository for tourist guide jokes.

Over the long haul, say a nine-day coach tour, the effect of these hoary witticisms can be quite enervating if not downright lethal

In its own way, it may have been moderately droll when, as our bus negotiated the hairpin turns of Skipper's Canyon, the driver leaned into his microphone and advised: "If

you're scared, folks, just close your eyes, the way I do on these curves."

The "suicide leap" that seems to be a fixture of every mountain range in the world is usually associated with some tender love story involving a chief's daughter and her lowcaste swain, when in truth it probably marks the jumping off place of many tourists who couldn't stomach another mile of the guide's jokes.

"We call that Cyanide Valley, folks," said our New Zealand bus driver as the coach climbed a treacherous precipice over a cloudhung gorge. "One drop is enough." The first time I heard that one, we were making our way up Mount Washington in New Hampshire. It has since been reprised for me on Pike's

#### Peak, in the Kyber Pass and in both the Swiss and Italian Alps on the post bus down from St. Moritz.

On a chartered coach passing through New York's Chinatown, the guide pointed to the clotheslines draped between the tenement houses and, after surreptitiously consulting his timeyellowed script, announced, 'There they are, folks, the flags of all nations." I have heard the same remark in Naples, Taiwan, Dublin, Jakarta and in many other climes where laundry is publicly flown and flaunted.

Is there a tourist operator alive who never to his passengers hath said, when indicating the toilet facilities at a rest stop, "There are our summer houses ... some are for men, and some are for women." Or, when confronted with a cow on the highway, has refrained from saying. "I told you there was a lot of bull about this trip.

If such there be, it only means his microphone has gone dead or his impromptu remarks have blown out the window. Once in my travels I did encounter a tour guide with an original approach to his subject. It was in Bangkok and our man, in refreshingly creative English learned from visiting GIs, was proudly pointing out the glories of that fabled city's 300 wats or temples:

"This reclining Buddha," he informed us, "is 160 feet long. It is the largest reclining Buddha in the world. and the second largest in Thailand."

I'm still trying to figure out what the Guinness Book of World Records would do with that one, except to list him as the only truly humorous sightseeing guide in the world. And the second funniest in Thailand

Vernon Luckie

## Rare art on display

OMAHA, Neb. (AP) - "I saw the painting and it was love at first sight," Duane Hillmer of Omaha says of Emanuel Leutze's "Washington Crossing the Delaware."

"I love the painting so, naturally, I love to talk about it." he said. "My affection for the painting is identified with my affection for the country."

Hillmer, owner of an Omaha printing firm, was prepared to pay \$600,000 for the 128-year-old painting when it was sold at an auction on Oct. 25, 1973. But the bidding stopped at \$260,000

"I couldn't believe it," Hillmer said.

The painting, showing George Washington and a ragged army crossing the Delaware River on Christmas night 1776, had been displayed in the White House but was put up for auction by its owner, J. William Middendorf, who was Ambassador to the Netherlands at the time.

Hillmer's painting is a smaller, but otherwise identical copy of a painting now hanging in the Metropolitan Museum of Art in New York City.

The central feature of the painting is Washington, standing in the front of the boat, his eyes fixed on the shore where he was to surprise a force of British and Hessian soldiers and turn the war around in favor of the Americans.

"The event was described in Washington's words as almost time to give up," Hillmer said. "Fortunes were low that Christmas night. When you study the people's faces the artist did a wonderful job of capturing the anxiety and hopes and spirit of the moment

'Historians dispute who was the greatest American. Many were. But I'm a fellow who likes a guy that makes his own footprints, an innovator, pioneer, not afraid to be

## 'Lucky' Midkiff area resident knows value of Cancer Crusade

Vernon Luckie thinks he is just that. Lucky.

He wasn't so sure, however, 14 years ago when doctors told him he had cancer of the colon.

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

though it was the end of the world," he said. The prospect of having an ileostomy-surgical removal of the colon and routing the contents of the bowel through an opening in the patients side-seemed more than he could bear.

But that was 14 years ago. Today BOOST Luckie, who live at the El Paso Natural Gas Co. camp near Midkiff. carries on a nearly normal life, working and enjoying his leisure time like any 49-year-old man.

After his surgery, doctors followed up with iodine radium treatment which "made a lot of my hair fall They told him if the cancer out." "didn't come back in three to five years" he might consider himself out of danger. Luckie says he feels handicapped

only "to a certain extent" by the surgery, and is quick to point out he's had no recurrence of the disease. He's a well man.

During the time right after his ileostomy, however, he went into a post-operative depression and his physician even sent him to a psychiatrist. Eventually, "they sent me down to the CP (cerebral palsy) ward, and I came out of there with a different attitude." He had decided the youngsters there had a harder time of it than he did.

Another aid to Luckie's total rehabilitation was an "ostomy club" formed in San Angelo, which he joined. Comparing notes with other "ostomy" patients was a big help, he Star said.

He was surprised at how active Political some of the other patients, particularly the younger ones, were after rally set

surgery, enjoying such sports as swimming and boating. He also was surprised that they "talked about it like it was an everyday thing.'

In addition to offering an opportunity for camaraderie among patients. the ostomy club also seeks to assist individuals facing the same type of surgery. Still another function of the organization is to provide members with information on new appliances.

Luckie and other ostomy patients First National Bank. are able to obtain some of those appliances and other supplies from the American Cancer Society. The supplies, Luckie says, "aren't real expensive, but it does help.

rally The ACS, which this week is conducting its annual crusade for funds. Exxon mine also makes available some expensive equipment to those individuals who need it whether they have had to expand "ostomy" surgery or are suffering

Debby Marquez, a staff member in the Midland ACS office, said in the past three years the society has supplied hospital beds to 44 cancer victims, as well as 25 commode chairs, 43 mattresses and covers, 42 sheepskins, 40 side rails, 11 walkers and 39 wheel chairs

Luckie said the ACS also makes available some supplies that can't be

the appeals hearing.

obtained anywhere else, such as a special spray necessary for ostomy patients. It also has made /inroads with insurance companies in coverage of ostomy appliances.

as an individual immensely," he said. "They are doing a wonderful job, not only for ostomy patients, but other cancer victims as well.'

**DR. NEIL SOLOMON** Studies show selenium in foods is sufficient

mineral that could really help protect us from cancer is selenium. Is this actually true?-Naomi G.

Dear Naomi: There are indeed studies indicating that selenium may have an anti-cancer effect. and these deserve further investigation. However, the amount of selenium in the American diet is quite sufficient, according to National Research Council experts, and there isn't any justification at present for any of us to go out and start taking supplements. Organ and muscle meats are good sources of selenium, and so are mushrooms, asparagus and garlic.

The experts warned that too much selenium can cause a condition called selenosis. It has been noticed that people who live in areas where there is a lot of selenium in the soil tend to have brittle nails. lose their hair, feel fatigued and irritated and have a garlic odor on their breath.

Dear Dr. Solomon: I've heard how serious a problem blood clots can be if you are on the Pill. But then I've never known a soul who had them. Does it happen often?-Miriam B.

Dear Miriam: It is a relatively rare occurance but. of course, whenever it does happen, it is always potentially serious. The reason for this is that the clot may break loose and then lodge in some vital organ such as the lung-even if it does not form there in the first place. According to American Medical Assn. figures, about one woman in 2,000 on the Pill has a blood-clotting disorder serious enough to require hospitalization,

The death rate from blood clotting in healthy women under 35 not taking the Pill is one in 500,000. Among women of the same group who are taking the Pill, it is one in 66,000. So you see the risk is propor-tionately much greater, even though in absolute terms it is still fairly slight.

In any event, if a woman has ever had blood clots in the legs, the lungs or the brain, she should not use

Dear Dr. Solomon: I have heard that the one the Pill. And any woman on the Pill who experiences one or more of the following symptoms should call her doctor immediately: -Severe leg or chest pains -Coughing up blood.

-Trouble breathing.

-Sudden severe headaches

-Vomiting.

-Dizziness or fainting.

-Disturbances of vision or speech. -Weakness or numbness of an arm or leg.

## **Rhodes** executive editor in Corpus

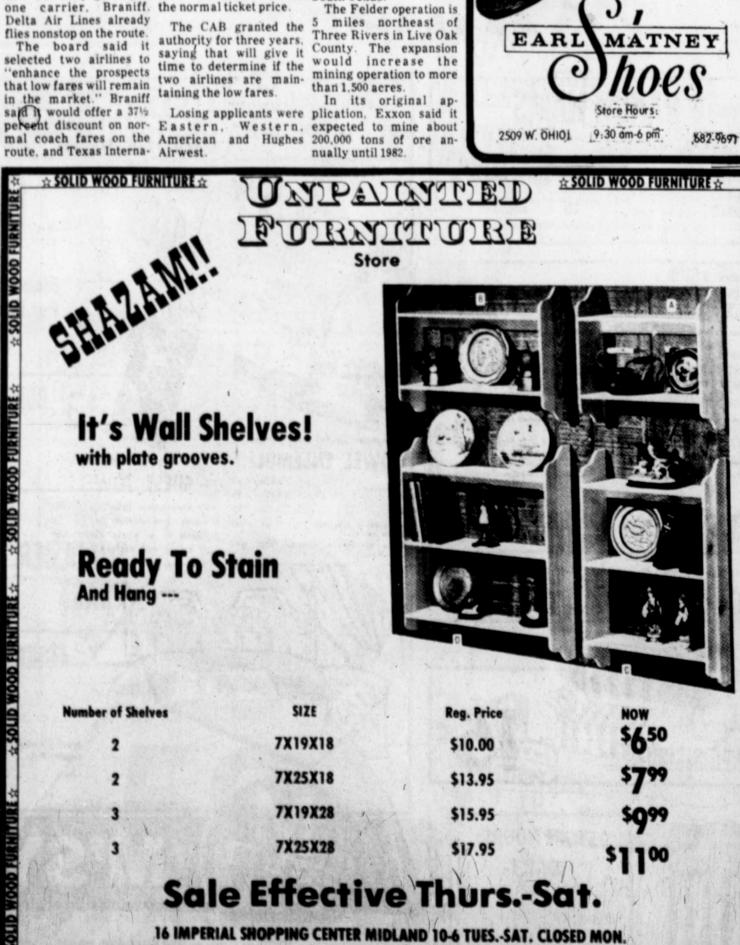

CORPUS CHRISTI, Texas (AP) - Robert E. Rhodes, a veteran political writer and newspaperman, has been named executive editor of the Corpus Christi Caller and Times.

Rhodes' appointment, is effective Feb. 28. He will fill the vacancy created more than a year ago by the resignation of Gregory E. Favre.

Rhodes, 50, has been executive editor since 1970 at the New Brunswick, N.J., Home News. A newspaperman for 29 years, he began his newspaper career in 1949 as a general assignment reporter for the Utica, N.Y., Daily Press.

He later worked for the Columbus, Ohio, Citizen and Newsday, before becoming managing editor in 1965 of the Janesville, Wis., Gazette, a position he held until becoming executive editor at New Brunswick. Rhodes was active for years in political coverage, covering the presidential campaigns of 1956, 1960 and 1964 and the Republican and Democratic national conventions of 1960, 1964, 1968 and 1972.

He was elected last October to a three-year term on the board of directors of the Associated Press Managing Editors Association .-

WASHINGTON - Robby is getting a reputation as the perfect government employee - never comes to work late, never stops to talk over the water cooler, never even eats lunch. Robby gets the job done fast, then does more. "Beep, beep, beep," said Robby, somewhere along the 1 1-2 miles of corridor on the sixth floor of the Commerce Department.

"Do I hear it?" asked a woman visiting an office. You sure do," said the Commerce official. "Let's go see it." They stepped into the corridor and looked both ways.

"I hear it but I don't see it," the woman said.

"Has it come or gone?" the man wondered. "Let's go this way."

The beeps grew louder, and around the corner Robby - more formally, an "unmanned, self-propelled vehicle" or Mailmobile-was winking and blinking down the corridor, the cousin of R2-D2 brought to Washington to facilitate the movement of paper. Robby had come to the right place.

A 700-round device out of "Star Wars," Robby stands 4-feet-3, is 2 feet wide and 5 long, and moves at 100 feet a minute, slower than most people walk. "We can catch up to it." said Thomas Zetty, chief, communications and transportation, office of adminstrative services and procurement, Commerce Department. He's becoming better known as the man who brought the robot to the federal

a National Postal Forum at a local hotel. Robby now delivers the mail at Commerce.

Just then it stopped and chimed. "-Sounds like the Avon lady calling." said the woman, Marian Cairoli, who said her job was to "introduce the machine." Commerce has a stable of five, which deliver mail on the third through the seventh floors.

The General Accounting Office, the U.S. Geological Survey, the Department of Energy and the National Science Foundation also own Mailmobiles. 250 of which have been manufactured by Lear-Stegler Inc. of Michigan, a major government aerospace contractor. One had been running down the corridors of the Pentagon, an "unmanned," selfpropelled vehicle's dream." It never got lost, but ran afoul of Pentagon security measures.

"The machine as now designed is not capable of handling classified material, and half the mail at the Pentagon was classified," said Lear Siegler's Douglas Mortenson, who thought up the Mailmobile. "So a mail messenger had to follow it around," guarding the open mail slots on either side.

These apertures add to the robot's odd appearance, which often causes double takes from passer-by. (A junior account executive with a New York company reportedly rode on like a horse when it first arrived.) "There's not as much reaction as

government, after he discovered it at you'd think." said Zetty, after a man glanced at it and moved on in the corridor. "We're in the age of automation

After a 20-second pause, Robby some other users have nicknamed their machine Norman the Mailer, Remus (Reliable Expeditor of Mail U.S.), Archie Bumper - beeped and started up. Following an invisible chemical line applied to the floor. Robby, with two flashing blue lights in front, moved around a corner and stopped in response to a perpendicular invisible line in front of a Commerce Department nursing unit. It chimed.

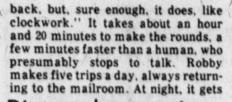

A nurse opened the door, took off mail and deposited mail. It then moved on to the Office of International Marketing, where another woman emerged. A few more feet and a man answered the chime at the Industry and Trade Administration.

"The first time I turned it loose," said Zetty, "I felt it wouldn't come

#### Diamond squeezing may aid research

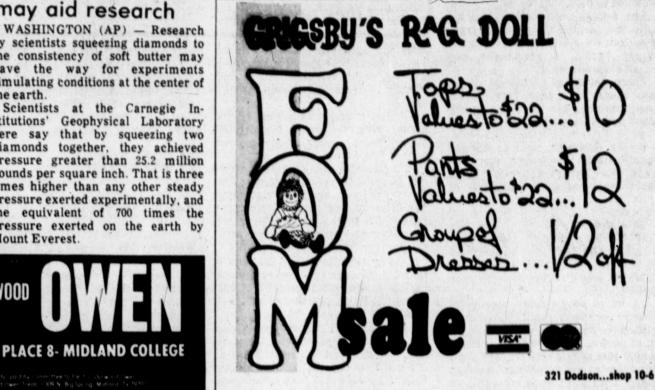

WASHINGTON (AP) - Research by scientists squeezing diamonds to the consistency of soft butter may pave the way for experiments simulating conditions at the center of the earth.

Scientists at the Carnegie Institutions' Geophysical Laboratory here say that by squeezing two diamonds together, they achieved pressure greater than 25.2 million pounds per square inch. That is three times higher than any other steady pressure exerted experimentally, and the equivalent of 700 times the pressure exerted on the earth by Mount Everest.

its batteries recharged.

Zetty, who says an experiment is under way to equip one of the robots with classical music, likes the durability of Robby, who once was bashed by some movers carrying a desk through an office dor. "It was only 'down' an hour," said Zetty.

One stop Robby doesn't make it at Commerce Secretary Juanita Kreps' office. "Her section is sectioned off by doors." says Zetty, "It wouldn't be cost effective to have someone open the door for it."

## **Teacher tests** his teaching

STOCKTON, Calif. (AP) - Dewey Chambers told his new colleagues at Tully Knoles School here last fall to "stop that Dr. Chambers stuff" and offer him no special treatment.

Thus began an unusual leave for the University of the Pacific professor as an elementary school teacher.

Chambers, 48, applied for the one-semester faculty development leave to learn if the training he provides as an elementary education professor at the private university here is relevant to elementary teachers today.

'I wanted to do something that would benefit me." Chambers said. "It was a whole refresher course in my field.

Chambers, author of seven books on language and learning, visits the school each year with his college students, telling stories to the youngsters so his students can see their reaction.

'Then toward the end of the year he brings his students over and they tell our students stories," says Principal Maynard Strong.

Chambers, who last taught elementary school 15 years ago, handled just about every subject in every grade from kindergarten through six during his semester at Tully Knoles.

We conquered Peru in the sixth grade and they

0

loved that," he recalled. "And we got the Pilgrims safely to Plymouth Rock in the fifth grade. That's very exciting stuff if done correctly." Chambers gave regular teachers the option of

staying in the classroom to watch or using the free period for class preparation.

"The majority of them were so intrigued by his methods, they stayed in the classroom," Strong said.

What Chambers found after three months was that UOP is providing relevant education to budding teachers. But he does plan some revision and changes in emphasis for his students. "I think I have to talk to mystudent teachers about greater organization of the classroom and the

overuse of mass media," he said.

He says the "do your own thing" philosophy is creeping into the classroom and results in an atmosphere of disorganization

"Children need to know what to do," he said. "Learning doesn't happen in chaos, it happens in a well-organized cosmos.

Chambers says he found overuse of mass media or "educational hardware."

Chambers also found that gifted children are being ignored.

"If a child is poor or has a learning problem, there are lots of programs available. But if he's smart, that's too bad," he said.

But, contrary to popular belief, Chambers said he found heavy emphasis on the basics, "almost to the exclusion of other ideas," because of teachers' concern with good test scores by their pupils.

'That's what has given rise to all the hardware that's come in," he said.

All that is needed for education to take place is a good teacher and a group of children, he said. "After all, Socrates taught under a tree."

## There's horse racing in Texas...and betting, too

SAN ANTONIO, Texas (AP) - The matronly woman unsnapped her purse and pulled out a roll of cash. She studied her racing program, jotted down a few notes and glanced at the man standing shead of her at trackside.

"I'll give you 4-to-1 on that one, honey." said the man. his eyes shielded by dark sunglasses.

The woman peeled off several \$20 bills and handed them to the man, who quickly rolled them around a larger bundle of greenbacks and jotted down her bet.

There were other customers, as the man hurried to take care of his business alongside the horse racing track just outside a small South Texas

city. Money, lots of it, was exchanged openly during the intermission between that Sunday's quarter horse races. Back and forth. Some rolls of cash shrank, others grew fat with winnings.

"It's pretty wide open. You can make any kind of bet," said one man with a handful of bills as he discussed illegal gambling that horse race. followers admit occurs at every race in the state.

"A lot of people think because in Texas we don't have parimutuel betting we don't have horse racing. A lot of people who know there is horse racing just skip it because they don't think there's any gambling." the man said. "They don't know what they're missing."

For the record, there is horse racing in Texas. Lots of it. And there's gambling, too, although it is illegal and unofficial and nobody really knows how much is wagered.

By one estimate, there are more than 300 race tracks spread across Texas, including everything from manicured tracks with shaded grandstands to roughly outlined ovals barely visible in pastures.

The tracks can be found in Lubbock. Austin, Del Rio, Goliad, Junction, Boerne, Columbus, San Antonio, Laredo - practically anywhere there are horses to race.

The American Quarter Horse Association, headquartered in

"A lot of people think because in Texas we don't have parimutuel betting we don't have horse racing. A lot of people who know there is horse racing just skip it because they don't think there's any gambling. They don't know what they're missing."

Amarillo, sanctions races at a dozen Texas tracks with purses that totaled \$3.2 million in 1977, according to Don Essary, director of racing for the AQHA

## Hard-hitting Warbirds down Bulldogs, 12-6

ABILENE - The Abilene Eagles rapped out 15 hits Tuesday to down the Midland High Bulldogs, 12-6, despite home runs by Ricky Goode and Steve Cole at Blacky Blackburn Field.

The Bulldogs took a 1-0 lead in the top of the first inning on Goode's solo blast, but the Warbirds came back with two runs in the bottom of the inning off starter Tracy Gann.

Midland erupted for four runs in the

worked to register his third mound win of the season against five losses.

Midland is now 7-9 on the year and stands 1-2 in 5-4A play.

THE BULLDOGS face the San Angelo Bobcats in San Angelo at 2 p.m. in its next outing.

Gann, James Allen, Rick Foster and Mark Mead, had the other hits for Midland as the Pack wound up with seven hits for the afternoon Byron Roberts, Hester, Austin, Wilson, Greg Ogden and Willie Stokes, all had two hits each for the balanced Abilene attack.

## Timely hits propel **Rebs over Cougars**

#### By BOB DILLON

Timely base hits were the difference Tuesday. Third baseman Terry Willis and first baseman Doug Schmidt delivered the two hits that brought the Robert E. Lee Rebels to a 6-5 come-

from-behind baseball victory over the Abilene Cooper Cougars at the Lee diamond. Trailing 5-2 in the bottom of the

third inning. Willis slammed a double down the third base line with the bases full, to knock in three runs and tie the score, 5-5.

Schmidt then came through in the bottom of the sixth inning with a single past second, scoring Steve Pitts with the winning run.

The victory keeps Lee very much in the running for the first half championship in District 5-4A while the loss knocks the Cougs out of a first place tie with Odessa Permian. Permian edged past Big Spring, 3-2, to stay on top with a 3-0 league reading.

**CRAIG VAN HORN started slowly** on the mound for Coach Ernie Johnson's Rebels, but finished very strongly in retiring the last 12 Cougars he faced to chalk up his third mound victory of the season against no losses.

Cooper scored three unearned runs off the senior righthander in the third inning, thanks to three Rebel errors.

The victory gives Lee a 12-5 season record and a 2-1 league mark, the same as Cooper to share third second place with the Cougars and Eagles who whipped Midland, 12-6, in Abilene.

Lee took a 2-0 lead off starter and loser Roy Haile in the bottom of the first inning.

Pat Moore led off things with a walk and leftfielder Richard Josefy then hit a high drive into left that bounced off the screen for a triple. Cooper outfielder Mike Hopkins, running at full speed, slammed into the fence in an attempt to snag the drive and suffered a broken tooth on the play.

CLAY CALHOUN then ripped a liner through the box, scoring Josefy for a 2-0 lead.

Cooper came right back in the top of the second inning to tie the game, 2-2

when Mike Anderson led off with a

sacrifice fly.

The Cougars took advantage of three Lee miscues in the third inning for a 5-2 lead. Greg Watts and Gary Mearse legged out infield hits to start things and Ken Dozier was safe on an error by Willis at third

Cooper's only RBI came when Jacques singled sharply past short and it appeared that the Key City team had things under control in the wind-swept contest.

LEE'S RALLY to tie the score, 5-5 in the third, started after two were out. Van Horn reached first safely on a throwing error by Jacques at second. Don Rasure worked Haile for a walk and Todd Clements was safe on an infield hit.

Up stepped Willis who jumped on a two-two pitch with his key two-bagger down the line in left to score pinchrunner Jeff Hatfield, Clements and Rasure.

In the sixth, Steve Pitts walked. went to second on a sacrifice by Moore, raced to third on a passed ball by catcher Ken Dozier and scored on Schmidt's single.

Van Horn made one fielding gem in the sixth inning when he fielded a slow roller by Anderson and made the play at the bag unassisted.

Willis made a Major League play to start off the top of the seventh inning when he back-handed pinch-hitter

Gary Myers' shot at third base and fired to first where Schmidt also

made a great play to nip Myers. VAN HORN had pin-point control, walking none while striking out nine Cougars.

The Rebels face Lubbock Monterey's Plainsmen at 4 p.m. today at the Lee diamond. The Lubbock crew owns two of the five losses by the Rebs and Johnson would like to chalk up a victory in this one, calling upon either Willis or lefthander Gary Gibson to pitch

Lee returns to 5-4A play on Satur-day by entertaining the Big Spring Steers at 2 p.m.

## Mojo has 5-4A lead

Odessa Permian scored two runs in the sixth an another in the seventh inning Tuesday to down the Big Spring Steers, 3-2, to take over undisputed first place in the District 5-

A baseball race. San Angelo Central's Bobcats and the Odessa Bronchos battled to an 8-8 tie which was called due to darkness. The game will be continued at a later date if the game is needed to determine the first half champion.

Charlie Sizemore was the winning pitcher for Mojo as the Steers were dropping to 0-3 in the race.

Tony Mann hit his second homer of the league season for the Steers, but doubles by Steve Northcutt and Roger Lightfoot, were the key blows for Permian in the late innings.

Permian travels to Abilene Thursday to take on Cooper which dropped out of a tie with Permian in losing to Midland Lee, 6-5.

In the other 5-4A game, Abilene pounded Midland, 12-6 to move into a three-way tie for second with Lee and Cooper who all own 2-1 loop marks now.

Richard Josefy (6), Robert E. Lee outfielder, scores on base hit by Clay Calhoun in first inning against Abilene Cooper Tuesday. Josefy had tripled in teammate Pat Moore earlier. (Staff Photo By Brian Hendershot).

## **Greensboro** Open has lesser names in field

of eight Greensboro titles in the 1938 inaugural, had to withdraw because of a sore foot.

Lon Hinkle, who has yet to win, is the only member of this year's top 10 money-winners in the Greensboro field. Only five of the top 20 - Hinkle, Wadkins, Lou Graham, Howard Twitty and Andy North - are on hand.

The sponsors may have wished for more, but some of the players are completely happy.

"That's too bad. I'm sorry for the sponsors." comeback kid John Mahaffey said. "But for a player, it's beautiful. There's that many less to beat. The win counts and the \$48,000 spends."

In addition to the big first prize, the winner also gets a spot in the Masters. That's a particular lure for Mahaffey and Australian Graham Marsh, who tops a strong foreign field.

Board may chose coach

The Midland Independent School Board met in session early this afternoon with the possibility of naming a new head football coach at Midland High school.

Officials met at 1:30 p.m. with Athletic Director Sam Cox ex-pected to make his recommendations at that time.

Jerry Hopkins, head coach of the Bulldogs for the past two seasons, resigned his post last month to take the job as head coach at Sonora.

## Indy entry list growing

INDIANAPOLIS (AP) - Gary Irvin is listed as a rookie driver, but he's quite familiar with the 21/2-mile Indianapolis Motor Speedway track. especially a long stretch coming out of the fourth turn.

Last May 16. during practice for what he hoped would be his first Indy 500, Irvin lost control of his Eagle-Offenhauser coming out of the northwest corner. The car did a half-spin, slid 530 feet across the track and hit the inside wall.

The car then slid along the wall and into the pit area for 400 feet before smacking the pit wall and bouncing another 60 feet. The race car suffered extensive damage and was not repaired for the race.

Irvin was a little luckier, escaping with only a sore neck.

He will be back this year, driving one of two 1973 Eagle-Offenhausers entered Tuesday by Vatis Enterprises of New York.

Irvin of West Lafayette, Ind., started racing midget cars as a student at Ball State University in 1968. He moved up to the U.S. Auto Club sprint and dirt car divisions in 1976 and drove in his first USAC championship race last spring.

He came to Indianapolis last May after running 10th and 14th in the Texas and Trenton 200-milers. He passed his Indy rookie driver's test but did not qualify for the race after crashing.

Two other entries were received by the Speedway on Tuesday for veteran Wally Dallenbach, who will be trying for his 12th straight start in the May 28 race.

Dallehbach, who finished fourth at

Indy in 1976 and 1977, will drive either a 1977 McLaren or a 1977 Lightning for the Bignotti-Patrick Racing Team. Both cars are powered by tur-bocharged V8 Cosworth engines in-stead of the four-cylinder Offenhausers-used last year.

Dallenbach, one of the few drivers who earned a starting position in every USAC championship race last year, finished in sixth place in the national point standings.

A fifth entry on Tuesday, a 1970 turbocharged V8 Ford-powered Eagle, was submitted by the Jim Robbins Co. of Troy, Mich., with no driver listed.

The five entries boosted the official list to 43, and a field of about 80 is expected by the April 15 deadline. The fastest 33 cars in two weekends of time trials will start the 62nd running of the 500.

The annual spring tire testing program, originally scheduled for this week, has been postponed to next Monday. Former winners Johnny Rutherford and Gordon Johncock are among the drivers expected to take part in the five-day testing program.

ALLEN HAS played with five

teams, and his 351 home runs

were the third highest total

among active players. He also

won the American League's

player dropped Tuesday as teams continued reducing their rosters in order to get down to the opening-day limit of 25.

Veteran pitcher Larry Dierker and outfielder Mike Anderson were waived by the St. Louis Cardinals. Infielder Dale Berra was sent to the minor leagues by the Pittsburgh Pirates, who acquired reliever Will McEnaney from the Mon-treal Expos for rookie pitcher Tim Jones. Second baseman Denny Doyle was given his unconditional release by the Boston Red Sox.

OUTFIELDER ED ARM-BRISTER was cut by the Cincinnati Reds, who purchased pit-cher Dave Tomlin from the Texas Rangers. Catcher Dave

Roberts and infielder Tucker Ashford were dropped by the San Diego Padres. Pitcher Gil Patterson was returned to the minor leagues by the New York Yankees. The Detroit Tigers released pitcher Bob Sykes, catcher Bruce Kimm and infielder Chuck Scrivener, and the Minnesota Twins obtained catcher Jose Morales from Montreal.

## AAU grant could help U.S. sports

NEW YORK (AP) - Fulltime national coaches, subsidized athletes and paid leaves of absence to compete in international sports competitions.

It sounds like a model for sports programs in Russia or East Germany, but actually it could be the wave of the future for amateur athletics in the United States.

A first step was taken in that direction Tuesday with the announcement of a grant to finance a national wrestling coach and staff.

Sun Co. of Radnor, Pa., will present an initial check for \$75,000 to the AAU this weekend at the World Cup Wrestling tournament at Toledo. Ohio. A total of \$225,000 has been pledged by the firm to pay the coach and his staff for three years.

The staff will be selected by the national AAU wrestling committee. hopefully by this summer.

'I see this development as a breakthrough in our handling of Olympic sports in the United States." said Joseph Scalzo, immediate past president of the AAU and its national industrial chairman. "I'm convinced that wrestling will improve almost overnight" from having a coach.

If the wrestling coach program proves successful. Scalzo said. sponsorship will be sought from other companies for national coaches in THE MIDLAND REPORTER-TELEGRAM, WED. MARCH 28, 1978

## Dodgers, Reds anxious for battle in NL West

#### By The Associated Press

The Cincinnati Reds went shopping for pitching help during the off-season and acquired a hard-throwing hurler from the Oakland A's whose last name has four letters and begins with

However, thanks to Baseball Commissioner Bowie Kuhn, it's Doug Bair rather than Vida Blue. And while the Reds were hoping to land a starting pitcher. Bair will work out of the bullpen

BAIR HAD a 4-6 record and 3.46 earned run average with Oakland after coming up from the minors. But the Los Angeles Dodgers, who ran away with the National League West by 10 games over the Reds a year ago after a blazing 22-4 start, also came up with bullpen help, signing free agent Terry Forster, 6-4 with Pittsburgh in 1977 but American League Fireman of the Year with the Chicago White Sox in '74.

After that incredible 22-4 opening. the Dodgers were 101/2 games in front of the pack and rookie Manager Tom Lasorda could almost begin charting his playoff pitching rotation. In fact. Lasorda, one of the world's great optimists, may be planning ahead again right now.

'We did it before and we can do it again," he says. "That is our motto for the 1978 season. I feel the teams in the NL West are going to have to catch us.

We had a great year. We fell two games short of winning it all (they lost the World Series in six games to the New York Yankees). We expect the club to be even better in 1978 because they're all capable of improving.

"We have an outstanding offense and outstanding defense. We have the best pitching in baseball. We felt our No. 1 need was to fill the void in the bullpen from the left side. We feel we are solid at every position with the addition of Forster.

Back to power the offense are a quartet of 30-home run hitters, the first time in baseball history one team boasted four such sluggers. They are first baseman Steve Garvey (33), right fielder Reggie Smith (32) and third baseman Ron Cey and left fielder Dusty Baker (30 apiece). Cey also set a major league record by driving in 29 runs last April.

THE REST of the attack is potent. too - catcher Steve Yeager (with veterans Johnny Oates and Jerry Grote behind him), second baseman Davey Lopes, shortstop Bill Russell and center fielder Rick Monday. Monday, plagued by back spasms for much of the season, hit only 15 home runs after belting 32 in 1976 with the Chicago Cubs. The pitching staff includes starters Don Sutton, Tommy John, Burt Hooton, Rick Rhoden and Doug Rau, with Forster, Charlie Hough and Mike Garman in the bullpen 'If Monday wasn't hurt, we would probably have had five players with 30 or more home runs," Lasorda says. "Many people don't realize it but Monday was hitting .290 and was one of our top hitters and key runproducers before he dove for that ball in Houston on May 31."

around the infield and National League MVP George Foster, Cesar Geronimo and Ken Griffey in the outfield. Foster batted .320 with 52 home runs and 149 RBI.

Despite a severe slump by center fielder Cesar Cedeno for much of the season, the Houston Astros finished third thanks to a young, strong-armed pitching staff led by J.R. Richard. Joaquin Andujar, Joe Niekro, Mark Lemongello and Floyd Bannister. with Ken Forsch, Gene Pentz and Joe Sambito in the bullpen.

BUT THE infield is far from stable - first base with Bob Watson is the only set position - and a left fielder must emerge to go with Cedeno and Jose Cruz in the outfield. Enos Cabell will play somewhere in the infield but a lot depends on a comeback by .186hitting shortstop Roger Metzger.

Joe Ferguson and Ed Herrmann provide capable, if unspectacular, catching.

Vida Blue finally turned up in the NL West, but not in Cincinnati. He moved from Oakland across the bay to the San Francisco Giants. Kuhn okayed that deal but Blue apparently didn't, bolting the club after one workout in an apparent attempt to have his contract renegotiated.

With Blue, plus John Montefusco, Ed Halicki. Bob Knepper, and Jim Barr, the Giants have strong pitching. backed up by relievers Gary Lavelle and Randy Moffitt. And don't forget Lynn McGlothen.

But the catching (Marc Hill and Mike Sadek) is only average and slugging first baseman Willie McCovey is 40 years old. In a porous infield, Bill Madlock moves from third to second. Johnnie LeMaster takes over at short and Darrell Evans and Mike Ivie. neither a Gold Glove threat, will compete at third. The outfield of Jack Clark, Larry Herndon, Randy Elliott and Terry Whitfield - maybe Evans, too - hasn't scared anyone yet.

THE SAN DIEGO Padres, unable to compete on the field, got the biggest spring headlines by firing Manager Alvin Dark and promoting pitching coach Roger Craig.

Hamburger king Ray Kroc, who owns the ballclub, shelled out \$2.7 million for free-agent outfielder Oscar Gamble after adding relief ace Rollie Fingers and catcher Gene Tenace a year ago.

On paper the Padres are improved. though. Gamble joins Dave Winfield and George Hendrick in a solid outfield. Third baseman Derrel Thomas, late of the Giants, lends some exce to an otherwise young in of Gene Richards at first, Bill Almon at short and rookie Ossie Smith at short. At least that was Dark's plan. Craig may move Almon back to short. where he did well as a rookie a year

Z 0

DWI

A

The pitching staff includes old folks Gaylord Perry (39) and Mickey Lolich (37), youngsters Bob Shirley (23), Bob Owchinko (23) and Dave Freisleben (22). The best of the lot, if he's over his arm miseries, is Randy Jones, the 1976 Cy Young winner.

THE ATLANTA BRAVES are rebuilding from the bottom - where they finished - but starting at the top with a new skipper in Bobby Cox. The Braves have some punch in right fielder Jeff Burroughs, left fielder Gary Matthews and catcher Biff Pocoroba.

Prediction: 1, Cincinnati. 2, Los Angeles. 3, San Diego. 4, Houston. 5, San Francisco. 6. Atlanta.

## Winners Circle Golf opens on Thursday

RANCHO MIRAGE, Calif. (AP) -Six of the world's best women golfers. including Kathy Whitworth, Judy Rankin and Mickey Wright, will be trying to set a precedent in the \$305,000 Dinah Shore Winners Circle that begins Thursday.

No golfer has ever been a repeat winner in this tournament, annually the richest on the Ladies Professional Golf Association tour.

Whitworth, the all-time top money winner on the ladies' circuit, is the defending champion in the event, to be held again at the 6,302-yard, par-72 Mission Hills Country Club.

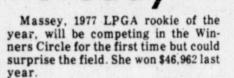

Rankin, having some trouble with in SWC her game in 1978 after topping the earnings list for the past two years, won the event in 1976. Wright was champion in 1973.

The other winners of the rich tournament will also be in the 1978 edition. Jane Blalock, who likes the Mission Hills layout and has won three events on it, was the 1972 champion. JoAnn Prentice won in 1974, and Sandra Palmer collected the firstprize money in 1975.

Those previous champions will, however, have their work cut out for them in the 1978 Winners Circle.

A host of other players, including Nancy Lopez, Sally Little, Debbie Austin, Debbie Massey and Jan Stephenson, all have an excellent chance to keep any of the previous champions from posting a second victory in the event.

Lopez, who joined the LPGA tour Jeff Huddleston picked just last July, currently is one of the up the victory by scatmost consistent golfers on the tour. A tering seven hits through

**Reds'** Tom Seaver

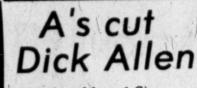

... ace righthander

Austin broke a long winless spell last year and went on to win five tournaments and \$86,000. Little, a South African, won the Crosby event and her game appears in top shape.

Arkansas gains top

FAYETTEVILLE. Ark. (AP) - Tim Lollar drilled four hits Tuesday to lead Arkansas to a 7-2 victory over Texas Christian and into sole possession of first place in the Southwest Conference baseball race.

Lollar smacked a firstinning run-scoring single to put the Hogs on top and brought in another run with a single in the sixth. Jeff Hemm blasted a tworun homer in the fourth. and the Hogs were never threatened.

(Continued from 1-C) do that."

IN OTHER off-the-field developments, fireballing pitcher Vida Blue, traded recently by Oakland to San Francisco, said he might rejoin the Giants today and didn't anticipate any more problems with the team's front office. Blue has been asking the reluctant Giants to increase his \$180,000 per year. salary

And Giants' co-owner Bob Lurie said he had not given up hope that the Oakland franchise still could be moved to Denver before the start of the season. Commissioner Bowie Kuhn has said that Finley killed the proposed deal by "playing his hand too tough."

On the field, in Tuesday's exhibitions:

Two-run homers by Dan Driessen and Dave Concepcion and a solo shot by George Foster powered Cincinnati to a 5-2 victory over the Los Angeles Dodgers. The Seattle Mariners whipped the California Angels 8-0 behind the two-hit pitching of Dick Pole, Enrique Romo and John Montague.

Roger Erickson and Dave Johnson collaborated on a sixhitter and Craig Kusick drove in the only run as the Minnesota Twins blanked the Montreal Expos 1-0.

other Olympic sports, such as track, gymnastics, swimming, boxing and weightlifting.

Another project of a special AAU task force is to convince corporations to grant paid leaves of absence to employees who are selected to represent the United States in international competitions, including the Olympics. The Sun Co. was the first to subscribe to the program.

In addition, three states - Ohio, Pennsylvania and Minnesota - allow paid leaves for state employees, and a bill is pending in Congress to pay federal government employees their regular salaries while training and competing.

Scalzo said Communist countries are doing the same things to build successful international teams.

"Everyone calls the Russians professional athletes," he said. They're not. They are engineers and teachers who still get paid their salaries while they compete.

"I predict most sports (in the United States) will move in this direction. They have to, to keep up with the rest of the world. To me, it's almost axiomatic that this must be done.

Scalzo said the key is to "first, get the best athletes, then give them a chance to train and compete without losing money. Why try out for Olympic teams if you are going to lose your job and your family is going to starve?"

He said such a program "is necessary for many Olympic sports. but it is imperative for wrestling."

He said international wrestling rules and rules for high school and collegiate wrestling are "so vastly different that specialized coaching is needed.

He said only about a dozen of the thousands of wrestling coaches in the United States, are qualified to teach international rules and technique.

THE DODGERS also set a major league attendance mark by drawing 2,955,087 customers at home.

Meanwhile, the Reds not only saw their string of two consecutive world championships come to an end. they didn't even win their division, an oversight which Manager Sparky Anderson plans to correct.

The major reason for optimism is that Tom Seaver, acquired from the New York Mets last June, will be around all season. Seaver was 14-3 in a Cincinnati uniform - 21-6 overall and Anderson sees no reason he can't win 25 games ... for openers. The rest of the staff, however,

doesn't exactly leave opposing hitters quaking in their spikes. Behind Seaver are Bill Bonham, late of the Cubs: 35-year-old Fred Norman; and Paul Moskau and Tom Hume, both with less than a full season in the majors. The relief corps consists of Pedro Borbon, Dale Murray, Doug Capilla and Bair.

Elsewhere, the Reds have perhaps the best eight-man lineup in the game. The incomparable Johnny Bench is behind the plate with Dan Driessen, Joe Morgan, Dave Concepcion and Pete Rose - 34 hits shy of 3,000 -

Spinks fails in first attempt to block WBC

LAS VEGAS, Nev. (AP) — Leon Spinks has failed in his first attempt to prevent the World Boxing Council from conferring the heavyweight title on Ken Norton, who was to be awarded the WBC's championship belt at a ceremony in Los Angeles

today. Spinks' attorney. Edward Bell of Detroit, filed suit in federal court here Tuesday, saying the 24-year-old boxer won the title "cleanly and fairly" and should not be stripped of the crown. District Judge Roger Foley denied Bell's request for a restraining order

preventing the WBC ceremony today, but set April 17 for a hearing to con-

sider the request for an injunction. Spinks, who won the title here in a 15-round decision over Muhammad Ali on Feb. 15, lost it March 18 when the WBC's executive committee voted to strip him and make Norton - who had been the WBC's No. 2-ranked

contender - the champion

The suit named WBC President Jose Sulaiman and the council's executive committee. It sought a restraining order and permanent injunction "to prevent the WBC from transferring the heavyweight belt or any other thing that is symbolic of the heavyweight championship to any person until such time as we have a hearing on the merits." said Bell.

The council had said Spinks' first title defense must be against Norton, but Spinks said he would fight Ali first.

Bell said the WBC action was "unprecedented in boxing history" and violated several articles of the WBC's constitution. "Never before has a heavyweight

champion had his title removed 30 days after he won it." the attorney said. "In our view, the title can only be won or lost in the ring.

21-year-old from Roswell, N.M., Lopez has won two events this year and finished second in the recent Kathryn Crosby tournament. She leads the 1978 earnings list with \$46,000.

seven and one-third innings. Tim Alexander finished the triumph after Biff LeFevre drilled a two-run homer for TCU in the eighth.

Hubie Brown, the hard-driving coach of the Atlanta Hawks, can't be blamed for wishing that his team's remaining six games were scheduled in the Omni.

"It's a pity we don't have them all here, Brown said after the Hawks edged the Los Angeles Lakers 105-104 Tuesday night for their ninth straight homecourt victory and 12th in the last 13 games.

The important triumph gave the Hawks a 36-40 record, tying them with idle New Orleans for the sixth best record in the Eastern Conference of the National Basketball Association. The two division winners in each conference, plus the four teams with the next best records, qualify for the playoffs.

Only Philadelphia (52-21), the Atlantic Division champion, plus San Antonio (46-28) and Washington (40-34), the 1-2 teams in the Central Division, appear safely into the playoffs in the East. New York (38-37), Cleveland (37-38), Atlanta and New Orleans, hampered by the loss for the remainder of the season of high-scoring Pete Maravich, are battling for the remaining three spots.

NEW YORK and Cleveland enhanced their playoff chances Tuesday night with victories, the Knicks defeating the Denver Nuggets 106-103 and the Cavaliers beating the Seattle SuperSonics 112-100. Cleveland and New York have seven games remaining, while Atlant's and New Orleans have six games left.

In other NBA games Tuesday night, the Golden State Warriors kept alive their playoff hopes in the Western Conference with a 108-94 victory over San Antonio, the Detroit Pistons downed the Buffalo Braves 123-118, the Kansas City Kings routed the Chicago Bulls 128- 105, and the injury plagued Portland Trail Blazers Pacific Division champions, bowed to the Boston Celtics 104-92.

IN ADDITION to Portland (55- 20), Midwest Division leader Denver (43-31), plus Phoenix (45-30) seem to have playoff spots clinched in the West. Still contesting the other three berths are Seattle (42-33), Los Angeles (41-34), Milwaukee (40- 35) and Golden State (38-37). Each has seven games to play.

John Drew. Atlanta's high scorer with 30 points, hit a driving layup with 21 seconds left, lifting the Hawks over

other a desperation heave from deep in the corner by Lou Hudson at the final buzzer.

"It was a great win for us." said Brown, whose team has four of its six remaining games at the Omni. "We caused ourselves serious damage with four missed foul shots and two turnovers down the stretch. It got a little nervous there, didn't it?"

**Rookie Norm Nixon led the Lakers** with 28 points.

Knicks 106, Nuggets 103

New York, playing without injured starters Bob McAdoo and Spencer Haywood, got 31 points, including six in the final 11/2 minutes, from Lonnie Shelton and 25 from Earl Monroe. Dan Issel scored 25 for Denver and David Thompson had 23 before suffering an injured left elbow in the closing minutes in a collision with New York's Toby Knight.

Cleveland got balanced scoring -Elmore Smith collected 19 points, Cazzie Russell had 17 and Jim Chones tallied 16 points and grabbed 16 rebounds - leading the Cavaliers to their third straight victory. Dennis Johnson topped the Sonics with 21 points.

#### Warriors 108, Spurs 94

Twenty points by Sonny Parker, 18 each by Robert Parish and Rick Barry, and a defense that limited league scoring leader George Gervin of San Antonio to eight points helped Golden State beat the Spurs.

#### Pistons 123, Braves 118

Eric Money scored 14 of his 31 points in the fourth quarter and Chris Ford had 11 of his 24 in the final period as Detroit rallied to beat Buffalo. Randy Smith topped the Braves with 29 points and Swen Nater netted 27.

The Pistons (35-39) still have a longshot chance at the playoffs, but Coach Bob Kauffman said, "It'd take a miracle.

#### Kings 128 Bulls 105

Kansas City completed a four-game season's sweep over the faltering Bulls, beating Chicago with the help of Otis Birdsong's 22 points, Scott Wedman's 21 - 19 in the second half - and Ron Boone's 20. Artis Gilmore led Chicago with 29 points and reserve John Mengelt scored 25. Celtics 104, Trail Blazers 92

Dave Cowens' 28 points and Dave Bing's 26 helped Boston hand the slumping Trail Blazers their fourth straight defeat and eighth in the last 10 games. Portland, playing without injured Bill Walton, Lloyd Neal, Bob Gross and Larry Steele, was led by Tom Owens with 21 points.

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

## **Blakeley** will stay at NTSU

DENTON, Texas (AP)-Bill Blakeley has decided to stay at North Texas State and keep fighting to bring big-time basketball to the independent school which is bidding for a membership to the Southwest Conference.

Blakeley turned down an attractive head basketball coaching offer Tuesday at Wyoming to replace Don DeVoe, now the head coach at Tennessee.

"The real hang-up I have is Dallas...I love the area," said Blakeley

"I have to admit that it was very flattering to be given consideration at Wyoming," said Blakeley. "I've always had a love affair with this university and I know that I'll remain happy coaching here.'

Wyoming offered Blakeley a \$41,500 yearly salary on a three-year contract, a car, and a big recruiting budget. Blakeley was making \$32,000 a year at North Texas but he was expected to get a raise.

Blakeley's team club was 22-6 this year and he has a 65-16 overall record at North Texas state.

"The past few days have been hectic, but I'm very happy with my decision to remain at North Texas." said Blakeley. "I have an outstanding staff in Jim Moffitt and Jimmy Gales. We have been extremely pleased with the progress of recruiting and it will get our undivided attention. With seven seniors on this team, we can certainly offer to recruits the opportunity for immediate playing time."

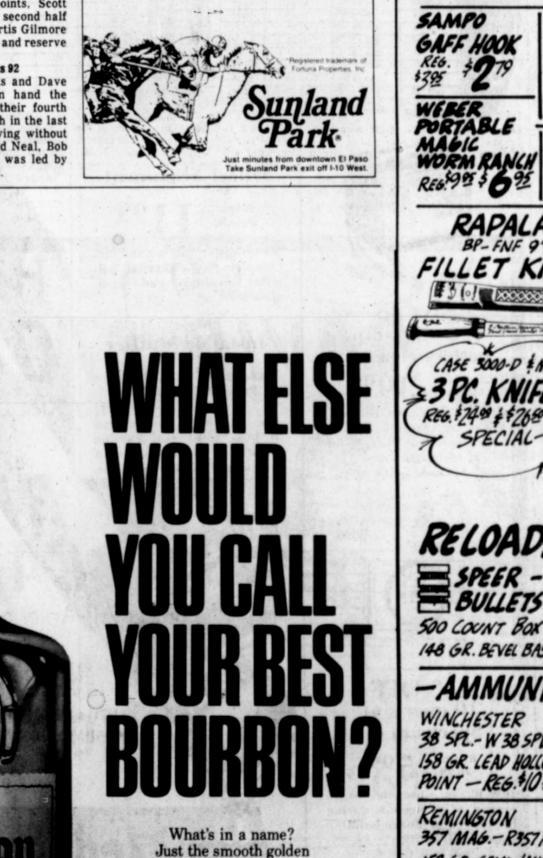

Blakeley has faced problems of recognition for the Mean Green despite 20-victory seasons the last three years. Each year they have been ignored by the NCAA and National Invitational Tourament officials.

Also, NTSU has trouble with its scheduling. Few Southwest Conference schools will schedule NTSU. although Baylor and Houston handily defeated the Mean Green this last year.

### \$139,650 (est) WEST TEXAS FUTURITY **HIGHLIGHTS WEEKEND**

## Glanville is named to squad

SOUTH BEND, Ind (AP) - Goalie Ernie Glanville and forward Doug Berry, who led Denver to the Western Collegiate Hockey Association championship, head the 1977-78 coaches' All-American team announced Tuesday.

Also on the Division I team are Wisconsin forwards Mike Eaves and Mark Johnson, who tied for the WCHA scoring championship, and defensemen Curt Giles of Minnesota-Duluth and Ken Morrow of Bowling Green.

On the Division II team are three-time All-American goalie Bob Janecyk of Chicago State, two-time All-American forward Steve Hansen of Gustavus Adolphus, forward Mike Cody of Gustavus Adolphus: forward Dave Reichel, St. Cloud; and defen-semen Mike Cadwell, River Falls, and Dave Saatzer, Mankato State.

### Turbeville is chosen assistant

ROCK HILL, S.C. (AP) - Horace W. Turbeville, Newberry College baseball coach for 11 years, has been named assistant athletic director and baseball coach at Winthrop College.

The announcement was made Tuesday by Athletic Director Neild Gordon, who moved from Newberry a year to become AD and men's basketball coach.He said Turbeville, 43, will take the job July 1. Turbeville will head

summer sports camps, will work with the school's athletic booster club and will coach baseball when it becomes a part of Winthrop's in-tercollegiate program.

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

## Blue will return to San Francisco

PHUENIX, Ariz. (AP) - Vida Blue has promised to be back in the San Francisco Giants' training camp today, but how much pitching he will do in the team's remaining eight exhibition games is problematical.

At Mansfield, La. where he spent the first three days of the week at his mother's home. Blue worked out with a high school team Monday and by himself Tuesday. He has spent only one day in the Giants'

Roberto Clemente season.

Award. derprivileged children. It Rod Carew.

camp since they acquired him from the Oakland A's March 15.

"I was all full of enthusiasm when I went over there for that one day." Blue said Tuesday. Something they did really turned me off," he added, without specifying the "something."

Blue said he had "spoken briefly on the new con-tract agreement" and didn't "anticipate any more problems with the Giants front office." But, again, he provided no details of his negotiations for an increase of the \$180,000 salary in the contract he signed with Charlie Finley

# on sale now at

At one point Tuesday Blue told a newsman,"I'm looking forward to going back and getting myself in the swing of things." At another point, he said, "I'm getting to the point that baseball is becoming like a job to me. I'm losing some of the enthusiasm that I Ri

he says.

McMINNVILLE! Ore. (AP) - When the State who needs the United Nations?" Department wanted a hunting rifle suitable for presentation by President Nixon to Soviet Communist Party Secretary Leonid Brezhnev, the diplomats called on Walter Kolouch.

When the 350-year-old Husqvarna arms works of Sweden wanted a commemorative piece decorated n a manner fit for presentation to King Carl Gustav XVI, Walter Kolouch was summoned again.

Kolouch, a robust Austrian with a booming laugh, couldn't care less about the political lines his weapons crossed in those deals.

'As long as people enjoy my work and appreciate

"I am an Austrian citizen. my wife is German, we met in Sweden and my children are Americans. So hammer.

America boasts No. 1 gun artist

Kolouch caters to the very few sportsmen who not only appreciate finely crafted firearms, but can afford to pay for them.

Kolouch does it all. He fits barrels, carves stocks from magnificent hunks of imported French walnut. carves intricate patterns in hand-made ivory revolver grips and he makes telescope mounts from pieces of steel.

His engraving is beautiful. Solid platinum quail on the side of a shotgun erupt in front of a gold pointing dog, for example. On a rifle, a heavy-maned golden lion charges.

'Ever see engraving done?" he asks, picking up an old scope mount. an engraving tool and a small

Tick, tick, tick goes the hammer as he engraves a perfectly symetrical floral design in the metal. No pattern. Just freehand.

"See?" he says, hunching his broad shoulders and eyebrows in a classic that's-all-there-is-to-it shrug.

> when he visits El Paso White replied that until seven years ago he and his late wife owned a home in El Paso. He said he sold that house and sublet a portion of his son's apartment.

'My family has never had any other resident but El Paso and the Valley since the 1840s,' he said. White quoted the state election law as saying that the fact he is a registered El Paso County voter qualifies him for the race.

On the other hand, Giere has taken pot shots at Williams for the former mayor's stand against accepting political contributions.

'I see nothing demeaning at all about accepting contributions,'

### Queen's gardener retires

LONDON (AP) - Fred Nutbeam, head gardener to Queen Elizabeth at Buckingham Palace for more than 24 years, is hanging up his royal gardening tools for the last time.

Nutbeam, who has always kept a polished and gleaming spade handy in the trunk of his car, reached retirement age Friday.

In his years at the palace. Nutbeam saw the queen every day when she was in residence. He has described her in interviews as a keen and expert gardener as well as "a marvellous person

Cappadonna, Allen K. Trobaugh, W. Hoyle McCright, Charles Fraser and Marshall S. McCrea Jr. Four longtime directors of The

First National Bank of Midland also announced their retirement from the board at the annual stockholders meeting. Frank Cowden, Barron Kidd, A.N. Hendrickson, and Foy Proctor have collectively served 127 years as directors at the bank.

Cowden, who had the longest tenure, became a director in 1934. Hendrickson, who served two separate times as a director, was elected to the board in 1944 and served until 1953. He was then re-elected in 1955, and has been a director since that time. Kidd was elected a director in 1952 and Proctor was named in 1953.

### Doctors still finding new thyroid cases

WASHINGTON (AP) - Doctors continue to discover thyroid abnormalities among Marshall Island natives who were exposed to fallout from a U.S. hydrogen bomb test on March 1, 1954.

While the test at Bikini atoll was more than 100 miles from the natives' atolls, Interior Department officials say seven new thyroid cases have been confirmed in the last 18 months.The unexpectedly heavy fallout was carried by winds to the natives' atolls of Rongelap and Utirik.

We know through our own experience that girls are very capable of handling a newspaper delivery route. More and more, girls almost everywhere are taking on carrier responsibilities and performing with competence. They are learning valuable principles, earning their own money and acquiring insights that will be helpful throughout their lives.

### The Midland Reporter-Celegram **Circulation Department**

would like to explain the opportunities a carrier career offers, the responsibility it involves and the earnings you can make...more than most jobs pay for the time required.

Want to know more? Send the application in. You'll hear from us promptly!

## **Public flaws** understanding of economics-By JOHN CUNNIFF

NEW YORK (AP) - Our understanding of today's economy is just as flawed as were our economic conceptions during the Great Depression of the 1930s, according to two professors with international reputations.

As a result, they say, we have entered an economic era of confusion and rapid fluctuations, attended by 'optimism or even elation that is shortly replaced by pessimism or even dejection."

We don't understand the forces moving contemporary economies, say George Katona and Burkhard Strumpel, long known for their economic analyses at the University of Michigan.

Just as John Maynard Keynes identified failure of demand as a cause of the Great Depression, "we are in urgent need of a post-Keynesian paradigm in order to understand the contemporary economy." they say

Lacking that - lacking strategies for dealing with specific problems — they say, the certainty of the post-World War II era has already given way in this decade to disorientation.

Katona and Strumpel aren't the first to declare a new economic era, but their insight is perhaps unique. Instead of studying numbers and equations, they studied psychological attitudes, or consumer behavior.

As they view it, early in this decade the economy that had delivered so many consumer goods and provided people with better jobs and greater security gradually became a source of concern rather than satisfaction.

Because of inflation, millions failed to improve their living standards. Unemployment prevailed while jobs went begging. Private and public services failed

We didn't understand why. The simple concepts of the 1960s didn't provide answers, for example, as to why prices continued to rise in the midst of plenty. The belief in inevitable economic improvement faded.

Laymen received little help from the experts. Economists of the 1960s assured us they had learned to tame the economic cycle. We learned they had not - that they couldn't even foretell the recession of 1973.

Katona, a pioneer in consumer behavior studies and a founder of the Institute for Social Research, and Strumpel, now a professor at the Free University of Berlin, say we badly need new economic insights.

"There must be something wrong with the law of supply and demand when prices keep going up both in good times and bad times, both when demand is high and when it is low," they write in "A New Economic Era.'

Nothing original in the title, published by Elsevier Inc., but plenty in the contents. Our failure to understand, they suggest, might be a consequence of our proclivity for analyzing numbers rather than people.

The difficulties, that is, might be qualitative rather than quantitative. "It may be less the quantity of the product than its composition that has become the problem in the 1970s," they write.

$\begin{array}{c} 1014 + 16 \\ 114 + 16 \\ 514 + 16 \\ 3546 + 16 \\ 2354 + 16 \\ 2354 + 16 \\ 125 + 16 \\ 2354 + 16 \\ 13916 + 16 \\ 1056 \\ 1076 \\ 1$	Wachov 60 8 1 16% 16% 16% 16% Wallim 1.40 6 80 28% 28% 28% 28% 4% 4% WrnCom 1 6 71 33% 33% 33% 4% 4% WarnTL 1.10 12 189 27% 27 27% 4% WarnTL 1.10 12 189 27% 27 27% 4% WarnTL 1.40 8 135 8% 8% 8% WnAirL .40 8 135 8% 8% 8% WnAirL 1.40 8 135 8% 8% 16% 16% WestgEl 97 5 228 16% 16% 16% 16% WestgEl 197 5 228 16% 16% 16% 16% 16% WestgEl 121 7 7 30% 30% 30% 4% 1% Which 1 7 46 7% 7% 7% 7% 4% 1% WhiteMi 7 46 7% 7% 7% 7% 4% 1% WhiteMi 7 36 17% 17% 17% 4% 1% WhiteMi 7 36 17% 18% 34% 4% 34% 4% 1% Williams 1 7 38 17% 18% 18% 18% 18%	May         2.57%         2.54         2.56%         2.58%         2.56%         2.58%         2.56%         2.58%         2.56%         2.58%         2.57%         2.56%         2.58%         2.57%         2.58%         2.57%         2.58%         2.57%         2.58%         2.57%         2.58%         2.57%         2.58%         2.56%         2.58%         2.56%         2.58%         2.56%         2.58%         2.56%         2.58%         2.56%         2.

## Official won't identify county to receive prison

AUSTIN-Bob Heath with the Attorney General's Office refused to comment today on whether Hidalgo County could be considered for a prison, authorized by the state Legislature to be located in West Texas.

"Since we apparently will be writing a formal opinion on this subject, I'd better not comment," Heath said. He also said that the formal request for the opinion had not been received this morning.

Legal questions surrounding a possible state pris-on in West Texas were raised Tuesday by Gov. Dolph, Briscoe during a meeting by the approval board for

state prison land purchases. The Attorney General's Office will be asked to offer an opinion on whether Hildago County can be considered as part of West Texas. Another legal question revolved around funds to be used for the purchase of land for the prison. The Legislature authorized purchase of the land with a combination of tax funds and money from the sale of the prison system's Blue Ridge Farm. Briscoe indicated that the Hidalgo County purchase involved only tax mone

Until the opinion is offered, the approval board has delayed action indefinitely on purchasing 6,740 acres in Hidalgo County for \$8 million.

Briscoe also noted Tuesday that appraisers from the General Land Office and Texas A&M placed the market value of the land at \$6.8 million, considerably

under the negotiated \$8 million purchase price. Windham, however, defended the proposed pur-chase of Hidalgo County land from Big Five Farms.

"What we need is a growing season and water. This land is the only one that had these two items, which are necessary for us," he said. "We looked at several places in West Texas, and the places we looked at didn't have either a growing season or water."

The purchase also is being challenged in state district court in Austin by Citizens United for Reha-bilitation of Errants, alleging that the board of corrections violated the open meet-ings law when it voted on the land acquisition behind closed doors without including the subject in its meeting notice.

The Legislature, during 1977, approved an appro-priation of "not more than \$8 million" for a prison to be constructed "somewhere west of the Colorado River."

## Adventurous man, 72, ends grueling race

### By GAYLORD SHAW The Los Angeles Times

NOME, ALASKA - By almost any measure. Norman Vaughn already had enjoyed a full life of adventure. In 1929, he explored the Antarctic

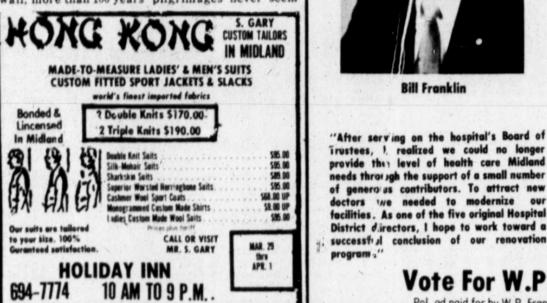

forbidding mountains and virgin forests, across frozen tundra and icecovered rivers.

"The front-runners didn't have time to look around ... I did, and what a beautiful place this is that God has given us," he said. "I enjoyed the scenery more, and the people more. but the excitement of the race never left me. Vaughn was running a lonesome last when he pulled into Unalakleet, a village 270 miles from Nome. There he encountered Andrew Foxie. a 25year-old Eskimo who had decided to drop out of the race because his own village was nearby and he didn't have the air fare home from Nome. "He's a very fine young man, and 1 arranged for his air fare home so he could finish the race." Vaughn said. We joined up and came on ... We had a great trip together." Vaughn said when they heard that the first and second place mushers had finished the race only a second apart, "we decided that if the frontrunners could end up with a onesecond separation, then the rearrunners could have a close finish. too." So as Vaughn and Foxie neared Nome, they began a sprint for the finish line. Vaughn beat his younger friend by three seconds. Afterwards, the white-haired Vaughn said the trek was "quite easy by comparison to what I thought it was going to be." And he laughed about an unexpected detour:

Bill Franklin has served Midland over the past 20 years, contributing his leadership to the YMCA, United Way, Chamber of Commerce, and many charitable organizations. His four years on the Hospital Board have prepared him for the work that lies ahead. As a professional banker, Bill brings financial knowledge that will be valuable in charting the course of medical care in Midland

with Adm. Richard Byrd. In 1937, he represented the United States in the winter Olympics, the only time the games have featured sled dog racing. In World War II, he hauled wounded soldiers by dog sled through the snows of France and Belgium. In 1977, he equipped a dog sled with wheels and rolled down Pennsylvania Avenue in Jimmy Carter's inaugural parade.

But one of life's goals had eluded Vaughn: completing the world's longest dog sled race, a 1,000-mile trek from Anchorage to Nome through the heart of Alaska's trackless wilderness. Twice he entered the Iditarod Trial race, as the grueling contest is known, and twice he failed to finish. Once he was forced to quit by frostbite, the other time when his sled broke beyond repair.

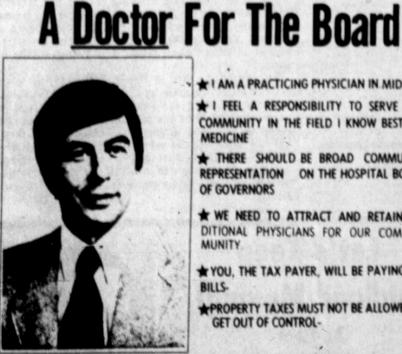

This year, at age 72, Vaughn entered again, and this time he made it to Nome. He was on the trail 22 days, 3 hours, 29 minutes and 41 seconds, more than a week longer than the winners, and only three seconds ahead of the last place team, but residents of this Bering Sea coast community greeted him late Sunday as if he had finished first.

Hundreds lined Front Street to cheer, the town's siren wailed a welcome and a special banquet was arranged for the retired Air Force colonel

"My goodness, you'd have thought I won." Vaughn said of the reception. "Actually, I enjoyed it more than

anyone else," he said of the journey through blizzards and sub-zero cold,

"I was coming down over the shoulder of McKinley Pass. It was night, and the dogs were going at a fast lope down the hill, down and down and down. The moon was out full blast, and I was looking around at this beautiful sight, when a white jack rabbit ran across the trail in front of the dogs.

WASHINGTON - The Gospel according to Sid Roth didn't go over too well at the Federal Communication Commission last week. Roth, who is an evangelist heading ip an organization that preaches that Jews can still believe in Christ, was the guest speaker before a regular meeting of the FCC Devotional Group during Friday's unch hour.

Although the meeting was billed as "Good Friday observance." several angry FCC employees have claimed that it was, in fact, a proselytizing effort by Roth, who passed out literature and envelopes soliciting offerings.

The controversy has raised again the question of separation of church and state. It has forced the FCC to cancel future meetings of the devotional group until it receives a ruling on what kind of meetings can be held on government property.

Meanwhile, the general counsel of the General Services Administration. which has jurisdiction over federal. office space, said any meeting of a sectarian group in federal offices is clearly forbidden by law. According to GSA's Jack Mulligan.

section of the Federal Property Management Regulations forbids the kind of meeting Roth apparently ran.

Subpart 101-20.701 of those regulations includes the following passage: "Meeting places may not be used for ... meetings or activities having a partisan political, sectarian, or similar nature or purpose.'

After the Roth meeting was described to him, Mulligan said, "It appears that it is a violation of the rule," but added it was up to the FCC to police the space occupied by it.

Mulligan went further, saying prayer meetings in general would appear to be banned under that regulation.

'I saw the notice of one at the State Department last Friday, but it was too late to stop it." he said.

A similar bible study group met at the Justice Department, also on

Friday. But because no group had signed for the room, officials at the Justice Department were unaware of the sponsor

The problem at the FCC began about two weeks ago, when notices of Roth's impending visit were posted. On March 17, FCC staffer Alvin Reiner wrote a memo to the executive director of the agency, Don Lichtwardt, protesting the scheduled appearance.

In that memo, obtained by The Washington Post, Reiner said he did not generally object to "the use of government facilities by various groups for the purpose of conducting religious services or prayer meetings." but called the planned Roth talk "a thinly veiled attempt to proselytize under the guise of a Good Friday observance.

"There is an issue of an even more serious nature," the Reiner memo said. "I question the legality of using government facilities and property for the purpose of religious proselytizing and to obtain free advertising for books and radio programs.'

When contacted by The Post, Reiner confirmed he had sent the memo, but would say little more. He noted that he had attended the eventual meeting, and said, "It was a frightening experience for me." He is Jewish.

Despite Reiner's appeal, and a subsequent meeting between some FCC staffers and members of the general counsel's office there, the meeting was allowed. One concession was made, however, when the scheduled meeting place was transferred from the main commission meeting room to a training room in the FCC annex.

Monday, FCC attorney Steve Fadem - who had heard a tape recording of the meeting - wrote a letter complaining to Chairman Charles D. Ferris.

"I strongly believe that the use of government facilities by a religious speaker to proselytize and impugn the beliefs of another faith clearly runs counter to constitutional safeguards whereby a wall of separation was

erected by the Founding Fathers to stand between church and state." said the letter,

Fadem says the issue was further aggravated "because notice was given to appropriate commission officers of the expected nature of Mr. Roth's talk, yet nothing was apparently done to protect the rights of those to whom Roth's biases were aimed.'

Fadem described Roth as "a leader of an evangelical group which actively seeks to convert members of the Jewish faith to Christianity."

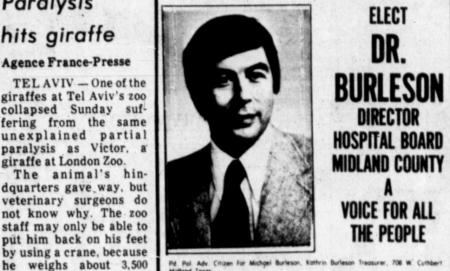

FCC Executive Director Lichtwardt was away for a week and unavailable for comment. His assistant, Alan McKie, called the incident "regrettable," and said "it

## Weekly newspapers on law to be printed

#### The Washington Post

NEW YORK - A giant publishing house and a powerful New York legal newspaper are planning to move into a growing and untapped market this tabloids covering news of the nation's 450,000 lawyers There presently are no newspapers covering law - the country's fastest growing profession and one that is in the midst of great internal turmoil and change - on a national basis. Local law journals are more concerned with printing court calendars and profitable legal advertisements than in covering the more controversial new trends in professional practice. These two new weeklies aim to fill that void. At the same time, they are a further indication of the growing impact of U.S. laws and regulations on the practice of law throughout the country - from the big-city firms that once shunned a Washington practice, but now are being forced to open offices here, to small town attorneys who find their clients need expertise in the latest federal environmental, work safety or equal employment opportunity rules. 'Government regulations used to only affect the General Motors of the country, but now they affect mediumsized firms in Kalamazoo," observed Lewis A. Engman, former chairman of the Federal Trade Commission who now runs the three-attorney Washington office of a Grand Rapids. Mich., law firm. Moreover, there is a growing feeling among lawyers across the country that the day of an attorney setting up practice on his own is fast ending. Instead, many lawyers feel, firms will become larger and larger. Some predict a day when there will be big national law firms with offices in cities all over the country similar to the major accounting firms or the

H&R Block firms for income tax. "In 15 years," one lawyer said at last month's American Bar

Association meeting, "the practice of law will be unrecognizable. firm, Ha

Brace Jovanovich, currently is hiring editors for a weekly tabloid catering to Washington's booming legal community - which now consists of about 25,000 government and private attorneys and is growing each year as well as lawyers across the country trying to keep abreast of legal affairs in Washington. The paper will be

headquartered in Washington. At the same time, the daily New York Law Journal is planning a national newspaper - the only one in the country that will cover trends in law practice all over the country.

The paper will be headquartered in New York, and although it will have news bureaus in Houston, Chicago and Los Angeles - all national legal centers - a bulk of its reporting will come from its Washington staff.

As their chief editor, they have hired David Beckwith, who covered legal affairs for Time magazine.

Plans for the two newspapers sound remarkably alike, as well they might since Stephen A. Glasser, who with his wife, Lynn, will publish the Washington law weekly, worked until recently as executive editor of the New York Law Journal.

The New York Law Journal's weekly will be edited by Josh Fita lawyer and former zhugh. Associated Press business and financial reporter who presently is on the staff of the parent law journal.

Both papers will be tabloids and both describe themselves as taking a Wall Street Journal approach to the reporting of legal news and will

## Screen

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 28, 1978

## prints shown

The distinctive screen prints with embossings by Midland graphic artist Marian Ford are on view at Theatre Centre during the run of Midland Community Theatre's current attraction, Sleuth.'

The celebrated mystery puzzler by Anthony Shaffer will have final performances at 8:30 p.m. Friday and Saturday. "Sleuth" is the second attraction of MCT's 1978 membership year and season tickets for the year will go offsale with the close of the current show.

Mrs. Ford, a former president of Midland Arts Association, has won prizes and cash awards in many juried shows in this region, including those staged by Museum of the Southwest, the Odessa Art Association, the Llano Estacado Art Association at Hobbs, N. M., and Midland Arts Association. She has had numerous solo shows of her work, including those at Midland Woman's Club, Odessa College and the Globe Theater in Odessa. She also has Association, in a show Women Artists in Dallas and in the Texas Fine By KENNETH TURAN Arts Association's circuit show. She has works in

## Officer arrests hitchhiker,

Homestead authentic colonial style in white finish with dainty painted hardware, or pine or maple finish with brass-

piece

## but state throws out case

#### By PHILIP HAGER The Los Angeles Times

WASHINGTON - State Patrolman Herbert J. Hoffman first noticed the hitchhiker headed west at the ramp of an interstate highway near Rolla, Mo. An hour or so later, the officer saw the man three miles away, headed south on a small local highway. The man was unshaven, unkempt and without luggage, apparently not a local resident. Hoffman, his suspicions aroused, detained the man, requested his identification and asked him to sit in the patrol car while the officer made a radio check to see if the man was wanted.

Moments later, the answer came back. The hitchhiker, Thomas Carl Jones, was wanted in Pennsylvania for the theft of a revolver and, more important, for questioning in the bludgeon murder of his aunt, a crime for which Jones later was charged by Penn'sylvania authorities.

Ordinarily, Hoffman would have been credited with some alert police work. But the courts in Penn-sylvania ruled Hoffman's detention of Jones was illegal and that the evidence obtained through the detention - a .38-cal. revolver Hoffman found on Jones and statements Jones made to Hoffman could not be used against the suspect.

The Supreme Court, in an order issued Monday, refused to disturb the Pennsylvania rulings (Pennsylvania vs. Jones, 77-958).

The justices thus passed up what appeared to be a golden opportunity to clarify further a landmark ruling the court made in 1968. Then, in a so-called 'stop-and-frisk'' case, the justices upheld the authority of police to detain and search persons whose conduct suggested "criminal activity may be afoot.'

In the case the court declined to review Monday, a Pennsylvania trial court and the state's supreme court both ruled that when the Missouri officer first stopped Jones, he lacked "probable cause" to suspect Jones of criminal activity - and that evidence resulting from the hitchhiker's detention thus was inadmissible.

## Autobahn creates super race track

BONN, West Germany (AP) - A powerful lobby of spe edy drivers and prestigious car makers combines to make the West German autobahn anybody's race track, with the prize going to the most belligerent.

"The superhighway Nazi dictator Adolf Hitler fo stered, to rush his Wehrmacht from one World War II attack to another, is the biggest modern road n stwork in the world without a speed limit.

Small cars are forced to keep to the right as nowerful sedans and sports cars barrel along in the eft lane at 125 miles an hour or faster, furiously flashing headlights at anyone who dares get in their way.

About 1,000 persons are killed each year on the 4,100 miles of heavily traveled West German autobahns, nearly three times the U.S. rate. On the 36,200 miles of U.S. interstates there were 3,100 deaths in 1976.

The sharp drop in death rates on interstates in the United States after introduction of the 55 mph limit made little impression in West Germany.

The Bonn government proposed a token limit of 81 mph in 1974, then backed down and commissioned a 25-month study to determine whether an autobahn speed limit would save lives and gasoline.

The study, completed last fall, had predictable findings: the death rate dropped 18 percent where the 81 mph limit was tested, and mileage improved dramatically for the cars that had to slow down

The government now says it may decide soon whether to renew the speed-limit proposal.

Governmet officials themselves are conspicuous speedsters. Chauffeur-driven convoys of politicians race between campaign stops at 136 mph with only a car length between vehicles.

Speed lobbyists argue that regardless of how high the autobahn death sate is, the superhighways without speed limits are still far safer than two-lane highways with a 62 mph maximum.

"We found arguments for and against introduction of a speed limit," Professor Karl-Heinz Lenz, who headed a panel of six scientists making the study. told The Associated Press.

## Projects More bad than good in pricing compromise

TULSA, Okla .- There is more bad than good in the gas-pricing compromise worked out by U.S. Senate conferees, the Oil & Gas Journal says in its March 27 editorial.

The proposal has split the gas industry, but supporters overlook the potentially serious effects the compromise could have on producers, producing states, and the nation, the Journal says.

Some segments of the gas industry, which has unanimously opposed wellhead price controls for almost a decade, are supporting the gas compromise because it provides a seven-year phaseout of price regulations.

But it also extends price controls into the intrastate market, the last surviving free market in the entire gas business.

Consideration must be given to the proposal's other drawbacks, the **Journal** says

For example, the measure's definition of new gas, which receives favorable price treatment, is restrictive. It includes only production from wells drilled at least 21/2 miles from existing holes, wells drilled 1,000 feet deeper than nearby wells and wells drilled into new reservoirs onshore.

But new wells that don't fit the compromise's definition still face soaring costs for drilling and production, the Journal points out.

And price increases wouldn't occur rapidly enough. At the end of the price-control phaseout, gas prices still would be lower than competingfuel prices. So a gas-price jump would be likely, putting pressure on Congress to extend controls.

"The Senate, which voted for decontrol twice in the last three years, ought to reject the work of its conferees as a betrayal of the mandate given to them," the Journal editorial says, "The compromise must be improved on several counts before it deserves support of the industry or Congress.

Two gas-industry associations, the American Gas Association (AGA) and the Interstate Natrual Gas Association (INGAA), support the com-promise, although INGAA attaches some conditions.

AGA is attracted by immediate deregulation of gas from wells deeper

the prospect of regulation forever. And, AGA worries that price controls under the Federal Energy Regulatory Commission, the alternative if no energy bill is passed, might be more stringent than those proposed in the conferee's plan.

But in light of its negative aspects, the Journal says, the compromise's version of decontrol isn't worth sacrificing the now-free intrastate market. And it won't enable the gas industry to make its maximum contribution to the national energy supply.

ENERGY

OIL & GAS

ATLANTIC CITY, N.J. (AP) -Crewmen aboard Exxon's Glomar Pacific began drilling the first oil well off the East Coast today, launching the exploration of an undersea tract that could yield huge reserves of oil and natural gas.

"We've waited for this moment for a long time," said Crandall Jones, Exxon's manager of offshore explorations.

The 452-foot Glomar Pacific is anchored in 398 feet of water at a point 101 miles east of this resort city. Exxon officials plan to take 90 days, at a cost of \$110,000 a day, to drill the

at the site of an old ore pad. In its original permit application, Exxon indicated it expected to mine 200,000 tons of ore annually until 1982

## Charged with fraud

SHREVEPORT, La. (AP) - Donald G. Gardner - once questioned in the Jim Leslie slaying — has been charged with an oil stock swindle scheme

Federal marshals arrested the former professional wrestler Tuesday on charges of fraud in the sale of oil and gas securities stemming from a fourcount indictment returned Friday by a federal grand jury in Alexandria. The indictment was secret.

Gardner was arrested last year in connection with the shotgun slaying of Shreveport advertising executive Leslie in Baton Rouge and in connection with the Concordia Parish killing of Russell Griffin. None of those charges still stand, and he was never brought to trial on any of them.

The federal indictment alleges that Gardner - who formed Encore Enterprises - sold more shares of oil leases than he owned; misrepresented himself, his staff and company as being experienced and successful in the oil business; lied about the expected returns from the wells drilled on leases owned by Encore, and issued false and misleading progress reports on drilling operations. The indictment says that between

January and June, 1976, Gardner's company sold \$584,260 worth of shares in five wells being drilled on the Maxwell lease. It also says that between April and September of that year, he diverted \$171,000 of that money to bank accounts of other, unrelated companies and still more of the investors' funds to his personal use. Federal authorities say Gardner

also bilked a drilling contractor of part of the money due the contractor, thereby preventing completion of the five wells in which Encore had sold shares.

In each of the four counts, Gardner is accused of using the United States mails to carry checks obtained ough fraud.

#### GLASSCOCK WELLS

Estoril Producing Corp. of Midland No. 1 Edwards and No. 1 Neil are new strikes in the West Texas area.

The operators No. 1 Neil was completed in Gaines County through perforations from 2,970 to 2,990 feet opposite the San Andres for 18 barrels of oil per day and five barrels of water on the pump. Gravity of the oil is 36.2 degrees,

and the gas-oil ratio is too small to nental Oil Co. has been measure named as the first company

# Bombay hotel has a history

#### The Los Angeles Times

BOMBAY, India - It was an hour before daylight as the taxi sped through the streets to the airport. ending a brief visit in what many claim to be India's most sophisticated city

Two healthy looking rats scurried beneath the glow of street lights to seek refuge from the coming dawn. Parking lights on the 10-year-old Indian-made Fiat served as warning to the sparse oncoming traffic.

People of the street were beginning to stir, too. Two homeless men squatted on the sidewalk by a small wood fire built for warmth during the cool night and to discourage intruding scavengers. In the faint glow of dawn other human forms could be seen wrapped in blankets on the sidewalk.

On the afternoon before, the guide had stood in Kamala Nehru Park overlooking Bombay's crescent harbor and Chowpatty Beach.

'At night we call it the Queen's necklace, because the lights glow like jewels," she said.

If the harbor lights are a necklace. then surely a pendant on the necklace is the 75-year-old Taj Mahal Hotel overlooking the harbor and the bold Gateway of India that commemorates the visit of King George and Queen. Mary in 1911.

Even Moghul emperor Shah Jahan, builder of the "real" Taj Mahal in Agra, would likely be glad to check in for a fortnight at Bombay's "Taj."

Sheiks in white flowing caftans cluster in one part of the busy lobby and a cacophony of French. German. English and some unidentifiable languages create an ambience fit for an international spy story.

The charm of the hotel is in the "Old Taj," as both visitors and locals refer to the U-shaped stone hostelry that nestles in the shadow of the skyscraping Inter-Continental wing poignantly pegged the "New Taj."

Rooms are large, with parlor arrangements even in the lesser rooms. And for those who spurn the cool comfort of air conditioning. there's always the wide-blade overhead fan to stir the humid Bombay air.

Hallways are reminiscent of the Moghul era, with mezzanines on some levels overlooking simulated pools on the floors below

In its time the Taj has had an impressive guest list, although records are more skimpy than in many of the world's grand hotels. A recent article commemorating the three-quarters of a century anniversary documents visits of John Barrymore, Duke Ellington. Somerset Maugham, Aly Khan and others.

to rent a car with driver and guide as it is to rent a drive-yourself car in the United States. (India rents cars only with driver.)

To gain a good insight of Indian people, visit Mani Bhawan, a house occupied periodically by Mahatma Gandhi between 1917 and 1934. On the ground level is a library of books about Gandhi, some of his own writings and part of his book collection.

The second floor shows some of his few personal belongings, a sparse material collection. But of greater interest is a room filled with dioramas depicting Gandhi's life from the time of birth-in 1869 until he was assassinated by a fanatic on Jan. 30, 1948.

Within walking distance of the Taj is the Prince of Wales Museum with good archaeological and natural history collections; among the works of art are intricate miniature paintings depicting scenes of the 18th century and earlier.

If there's a full day to spare, Juhu Beach in the suburbs is a good outing. Try lunch at the Sun and Sand Hotel there, overlooking the Arabian Sea.

Elephanta Island, about an hour by launch from the Gateway of India provides a full morning or afternoon of cave temples carved about 1,300 years ago and depicting stories in the life of the Hundus' Lord Siva. The **Government Tourist Office can direct** you to a launch with an Englishspeaking guide.

Bombay may be a shopper's mecca when stores of interest are sorted out. But not to be missed is Crawford Market, where everything, including fish and produce, is under one roof. It's virtually impossible to park there. so you might specify a time for your driver to pick you up after shopping.

There are fewer beggars in the hotel areas of Bombay than in some other metropolitan areas, although they're plentiful enough. Guides here, as well as in other Indian cities, explain that the government has provided housing and employment for many of the beggars, but they've found it more profitable to beg than to work in handicrafts.

"Adults are frequently arrested for begging, so often they send their children out to beg." one guide explained.

If that's the beggar's choice, it's a good one, because the brown-eyed little urchins are tough for Westerners to resist.

No do it all from the lance to the root	MOBILE HOME MOVING		

More recently a sheik reserved the Rajput Suite, one of four suites ranging in price from about \$185 to \$215 a night. That was for his personal use. He brought his harem along and reserved the entire 7th floor of the New Taj for the ladies.

Small suites in the Old Taj start at about \$62; a single room in either the old or new goes for about \$43, and a double for \$53 U.S.

For those venturing from the hotel's tradition of luxury, there's much to see in Bombay. A city sight-seeing tour hits the high points, but a few areas deserve more time. Taxis are relatively easy to come

by and fares low. It's about as cheap

## to begin

SAN ANGELO - Work is scheduled to begin this week on 10.5 miles of highway in Glasscock and Reagan counties, D. R. Watson, district engineer for the State Department of Highways and Public Transportation, said Tuesday.

The new highway, RM 3093, will connect RM 2401 west of St. Lawrence to RM 1357 in Reagan County and follows an existing county road.

Watson said traffic will be routed through the work area, but barricades, warning signs and flagmen will help direct traffic.

Our need is as immediate as your desire to join a rapidly expanding organization with above average growth potential. If you qualify, this could be your last movel Your opportunity to MOVE UP with Northwest Pipeline Corporation. In order to develop our energy transmission to its fullest potential, we have immediate need to expand our engineering force.

\*

### **MIDLAND INTERVIEWS** Saturday & Sunday, April 1 & 2 PHONE (915) 683-6131 FOR INTERVIEW APPOINTMENT

\*

WE HAVE IMMEDIATE OPENINGS FOR THE FOLLOWING:

#### **Gathering Systems Engineers**

We need Engineers with a BS in Petroleum, Mechanical, Chemical or Civil Engineering with experience in the natural gas industry. Strong background in design, construction and operation of field gathering systems is essential. Knowledge of DOT, ASME, & ANSI codes a must. Additional experience in the tollowing areas is desirable; sour gas, well connections and dehydration equipment. The successful candidates will manage projects that will connect new gas systems to the Northwest Pipeline system.

#### **Process Engineer**

BS in Chemical Engineering with a minimum of eight years experience required. LPG plant process experience is essential. Experience with acid gas extraction and turbo expanding plants desirable. Position will involve process studies, consultant interface and ultimate preparation of documents to implement projects to completion.

#### **Electrical Engineer**

BSEE and a minimum of two years experience required, preferably in the gas, oil or petrochemical industry. Compressor station experience desirable. Successful candidate will prepare supporting documents to implement various projects to construction status in the electrical/instrumentation field.

#### **Pipeline Design Engineer**

Appropriate Engineering degree and two to five years experience required. Will be responsible for the design and cost estimating of gas transmissions and related facilities. Knowledge of DOT, ASME, & ANSI codes a must. Measurement and cathodic protection experience desirable. Successful candidate will execute construction contracts to implement projects to completion.

#### **Planning & Scheduling Engineer**

Engineering degree or equivalent experience in construction scheduling, project coordination and project management required. Will be responsible for scheduling all projects from inception to completion and assist in the development of project management programs and procedures that will aid in the implementation and execution of capital projects.

### **Reservoir Engineers**

Immediate need for entry and senior level Engineers. A petroleum or Geological degree preferred with heavy reservoir engineering experience an added plus. Responsibilities to include estimating reserves for potential gas supplies, economic evaluations of drilling and property ventures, monitoring drilling activities and discoveries, and negotiating reserves for new well connections. Experience in reservoir and economic evaluations, gas reserves, and log analysis desirable.

## くも **Computer Professionals** It's easier to interview at TI in Lubbock this Thursday, Friday or Saturday

THE MIDLAND REPORTER-TELEGRAM, WED., MARCH 29, 1978

**Help Wanted** 

Help Wanted 15

Help Wanted 15

Help Wanted

We're open Thursday and Friday this week until 8 PM. And on Saturday from 8 AM-3 PM.

In the Information Systems and Services organization at TI. you will be associated with one of the most extensive computer networks in the world. You'll be on the leading edge of computer technology, working on IBM 370/168's with MVS/JES-3.

#### **Programmers/Systems Analysts/ Project Leaders**

You will be working in a constantly expanding program. developing systems in support of TI's Management & Technology Center for Consumer Products, Involves user interface, detail design, and implementation of data base systems to support production and planning and control, materials management, shop floor control, cost accounting, financial planning, general accounting, order entry/billing, and shipping.

Each of the available positions requires a minimum of a 4-year degree, preferably in Computer Science, Math, Business or an Engineering discipline. Applicants must be U.S. citizens or permanent residents.

Apply at the TI North Building Lobby, N. University & Loop 289 this week. Thursday and Friday, 9 AM-8 PM, or Saturday, 8 AM-3 PM.

If unable to apply at this time, send your resume in confidence to: Dennis Conner, P.O. Box 10508, M.S. 5806, Lubbock, TX 79408. Or call collect (806) 747-3737, ext. 3200.
