Flynt believes his JFK probe behind shooting

By RUDY MAXA The Washington Post

LAWRENCEVILLE, Ga. - "If you could see what my stomach looks like, it's make you sick," said Larry Flynt, his voice barely a rasp as he lay in a hospital bed here Tuesday night.

By his side was his wife, Althea, who had kept vigil at the hospital since the day before. when her husband was severely wounded on a Lawrenceville sidewalk, hit twice in the ab-

domen by bullets said to be from a .44 magnum weapon.

'The doctor said he had a 2 percent chance to live," said Althea Flynt, who has been joined by others making a pilgrimage to her husband: Ruth Carter Stapleton, Dick Gregory, Mark Lane and dozens of reporters. Larry Claxton Flynt, founder

of the magazine Hustler, recent convert to born-again Christendom and friend of President Carter's sister, had also become a vegetarian - and, later, a

fruitarian.

He would fast, sometimes in the Bahamas with Gregory. And in the days before he was shot, as his trial for obscenity was drawing to a close at the courthouse here, he was fasting again.

On Monday, the day of the shooting, he had lunched only on grapefruit juice at a cafeteria two blocks from the courthouse. And the day before, in keeping with his routine, he had had two enemas. His doctors said those enemas probably helped save his

life. When the bullets tore up his intestines, his digestive tract was relatively empty, thus decreas-ing the chance of infection.

Flynt's condition later improved, allowing him to be transfer-red Wednesday night to Emory University Hospital in Atlanta and placed under the care of a gastrointestinal specialist.

Flynt is convinced the attempt on his life was the work of an assassination team with ties to the government. The motive: to silence his inquiry into the JFK

killing. Even on his sickbed, still on the critical list, with paralysis of his legs still a possibility, Flynt took the opportunity to crusade: "If this will focus enough atten-

tion on the concept of obscenity. maybe we can truly have a free press in this country ... One single thing that has hurt the most - the American people wouldn't believe me when I said I was willing to die for the concepts on which our country was founded. If the apathetic American people can be woken up, we can solve a lot of social problems and make this a less violent world."

His wife asked him to save the sermons. Flynt asked the doctor if he could sip some water; the corners of his mouth were cracked and dry. No, said his doctor, but perhaps he could have a Life Saver to freshen his mouth.

"Has that got sugar in it?" Flynt asked.

"Well, yes. but that will do you (Continued on Page 2A)

Administration seeks injunction

against miners

WASHINGTON (AP) - The Carter administration, trying to end the 94day coal strike, is asking a federal judge to order 160,000 miners back to work and negotiators back to the bargaining table to search for a new contract settlement.

Justice Department lawyers planned to seek an immediate in-junction in U.S. District Court today under the strike-stopping provisions of the Taft-Hartley Act.

And, the government is prepared to seek contempt citations and fines against union locals and leaders and coal companies that defy the court order, said one official, adding, "There's not much point in getting the order if you're not ready to enforce officials said Wednesday that there has been an increase in coal deliveries from non-union mines to hard-pressed electric utilities in the East and Midwest, bolstering critically low stockpiles and, the administration hopes, postponing for several weeks the extensive layoffs and power cutbacks that have been predicted.

However, Energy Secretary James R. Schlesinger warned that the coal strike would put at least 3.5 million people out of work by the end of April if the walkout does not end within 10 days. Coal-related layoffs affected fewer than 23,000 people by late February, he said.

Labor Secretary Ray Marshall said the administration remains hopeful

Before directing the attorney general to go to court, President Carter awaited receipt of a report by a fact-finding panel he appointed.

The board took testimony from union and industry representatives on Wednesday, then worked late into the night to complete its report on where the bitter dispute stands and the chances of a settlement.

The report, which contains no recommendations for ending the dispute, was not expected to affect White House strategy, but its delivery to the president is required by law before Carter can make his next move.

Meanwhile, Energy Department

and reserves of \$200,000.

Austin Bureau

that a national settlement can be reached, but he acknowledged that local agreements might be easier to achieve in light of the miners' 2-1 rejection last weekend of a national accord.

The government planned to request a temporary restraining order directing miners to go back to their jobs and coal companies to resume "good faith" bargaining with the United Mine Workers union, said the administration official, who asked not to be named.

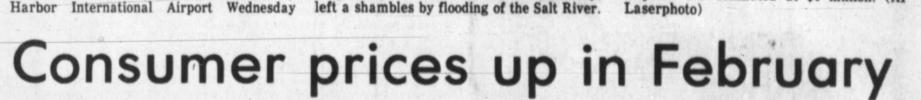

The temporary order presumably would remain in force until the judge could hear arguments on a request for an 80-day injunction. Under Taft-Hartley, the government must prove that continuation of a walkout would "imperil the national health or safety."

It remained uncertain, however, when - and if - miners would return to work under the order and when negotiations would resume.

Administration officials have said miners could be back on the job by next week, but UMW leaders and members have predicted mass defiance of a back-to-work order. The miners would work under the

terms of the union's 1974 contract, but to encourage their return, the administration has asked the coal operators to give the miners a \$1 an hour raise agreed to under the rejected contract settlement.

The coal companies said they would grant the raise retroactively, but only if a final settlement is reached during the 80-day "cooling off" period.

IT'S BUSINESS AS USUAL at Phoenix Sky despite condition of east end of main runway, Repairs are estimated at \$4 million. (AP

left a shambles by flooding of the Salt River.

WASHINGTON (AP) - The prices manufacturers receive for their products rose by the largest amount in three years last month as food prices showed unusually large gains, the Labor Department said today.

Harbor International Airport Wednesday

Consumer foods rose 2.9 percent in February, leading the increase of 1.1 percent for all finished goods.

These prices, charged at the last stage of production, usually show up at the consumer level within a few months.

Consumer prices have already begun to rise rapidly, going up 0.8 percent in January, about double the increases of last year.

The 1.1 percent increase in finished goods prices for January was the largest since a 1.9 percent increase in November 1974. It followed rises of 0.6 percent in November, 0.5 percent in December and 0.6 percent in January.

Unlike the January report, most of the increases were among foods, some of them in short supply because of the severe winter weather.

Wholesale prices turned up sharply for pork, eggs and dairy products in February after declining in the previous month. Beef and veal prices rose much more than in January. However, prices declined for roasted coffee. Prices rose less than in January for fresh and dried fruits and vegetables and processed poultry.

The 2.9 percent price increase for consumer foods followed rises of 1.1 percent in January and 0.5 percent in December.

If food is removed, wholesale prices were up 0.4 percent, about the same level as the last half of 1977.

Prices declined for jewelry, gasoline and home heating oil.

Prices rose less in February than in January for automobiles, household furniture and mobile homes. However, prices rose more rapidly for beverages, soap and synthetic detergents, footwear and tobacco

The Labor Department's Finished Goods Price Index is intended to replace the Wholesale Price Index, to make the monthly report coincide more with consumer prices.

The old Wholesale Price Index rose 1 percent in February, the largest

increase since a 1 percent rise last April.

Price increases continued at the early stages of production, par-ticularly among food products.

Raw farm materials rose 4.7 percent, contributing to a 3.2 percent rise in all crude goods.

March: Good month for the flying of kites

March: It's the month of the roaring winds, blossoming flowers, kite flying and just about anything your imagination might want to make out of it.

It's the month of the emperor's fatal plunge, er, stab. Remember from sophomore English in high school the sophomore English in high school the soothsayer's warning to Julius Caesar: "... Beware the Ides of March''? By Shakespeare's account, the 15th of March was the Roman emperor's last day to rule. That's a morbid, if not somewhat "exciting," side of March. Coming up, too, is the annual recounting of the crucifixion of Christ on Calvary and of the resurrection

on Calvary and of the resurrection, and of the hope that offers the believers in the Christian world.

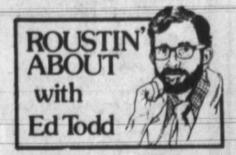

But one of the high-flying light sides of March is the YMCA's kite-flying derby at 2 p.m. March 18, a Saturday, at Alamo Junior High School.

It'll be a contest of homemade kites flown by the YMCA's Indian Prin-cesses and Indian Guides. These young warriors and maidens will be out to out-do one another. There'll also be tug-of-war events,

to pull the skyward-cast eyes back down to earth.

Who needs the YMCA to fly a kite? You can fly solo in open space at just about any time the wind blows. But if you want to see a hodgepodge of flapping, flying, long-tailed and, possibly, crashing kites, drop by "the Alama" Alamo.

tlesnake Roundup, which is coming

tlesnakes has been hiked 75 cents a pound to \$2.75 per pound.

The hunt's promoters justify the snake purge like this: It thins out the livestock-biting critters in a year of

the rattlers' population explosion. As usual, the roundup will be over rolling ranchlands. Sort of ramrod-ding the weekend show will be snake handler Bill Ransberger, who has been bitten or nicked 31 times by the snakes.

"Twenty years ago, I was so deathly scared of snakes you wouldn't believe it," the brave one said. "I'm still scared of them."

And a certain day in March unofficially became postman Bob Grimes' special day. This mail carrier of 26 years was honored in a reception Wednesday at the Citizen Savings branch office at Oak Ridge Square.

The reception was to demonstrate "our appreciation to a man who has earned the respect and gratitude of a great many people for a job well done," according to Betty Seay, who helped make the day for the tall postman.

Grimes is a man who not only likes people but who thoroughly enjoys his

Why vandalism? Psychologist lays blame on teen-age boredom

By LINDA HILL

What can a city do to stop its youths from vandalizing property?

Very little, according to Odessa psychologist Dr. Joel Greenspoon. Greenspoon, a professor at The

University of Texas of the Permian Basin, believes the answer to the problem of vandalism Lies in the home, not in a city's official actions.

The two primary reasons young people turn to vandalism, he said are boredom and poor relationships with parents. Building more recreational facilities simply won't touch these problems, he said.

And the problems which lead to vandalism cut across the whole range of income levels. A young person can be bored because he has no money for entertainment, or because he has too much money and no responsibilities. he said.

"When you have money, and you can entertain yourself any way you want to, that can be dull," Greenspoon observed.

The youth from a low-income family may be more materially oriented than the affluent youth, perhaps smashing a window to steal instead of just for the excitement of it. he said.

But the more affluent young person may not always show up on the local police blotter, Greenspoon said, because he is more likely to be turned over to his parents without arrest

than a poorer young person. "I don't know if that's true in Midland. I suspect it is. It happens everywhere," he said.

Greenspoon cautioned against making too many generalizations about the causes of vandalism among young people. "Anything we say is not going to be applicable to all of them." he said

Much of the problem of vandalism comes as a result of people simply not knowing how "to deal with af-fluence," he said.

Parents who may have grown up in poverty find themselves wealthy and vow "their children are going to have all the things they didn't have.,

Is that attitude bad? "It depends," Greenspoon said. "Most of the time they (the children) get things for nothing." and that is "one of the most destructive things" a parent can do." he said.

These kids don't have anything to do," he said. In past generations, "there was plenty to do," such as chores around the house.

The bored young person "will do all sorts of things to generate some kind of excitement," he said.

whenever possible. "Even a rat" avoids unpleasant situations. When asked what they want to do to end their boredom, young people

Fifth in a series

often can't say, Greenspoon said. And parents many times don't know what they expect from the children, he said

"If the parents don't know what they want the child to do, how in the devil is the child supposed to learn what to do? Very often they don't.' What happens to the teenage

vandal? Some go on to more serious crines, Greenspoon said. But, "more important than that possibility, they're going to grow up to be frightfully unhappy adults," who find it difficult to handle problems.

Greenspoon said the problem of vandalism cannot be isolated - it's related to problems of young people dropping out of school, a high teenage suicide rate and others.

Solving all of these problems is possible, Greenspoon said, if they are detected early enough.

Parents should reward good behavior, he said. But that reward doesn't have to involve money or

Parents tend to think children should do things without reward because they "ought to. . . . Maybe they ought to, but 'ought-to's' don't

always work'" he said. The psychologist said if he were designing a program to cope with teenage vandals, he would some sort of reward. Again, that reward wouldn't have to be monetary, he said.

"I think many of these kids have to learn there are things they can In many cases, some of them do. . don't know what to do to be constructive'" he said.

U.S. delegate denounces draft of Soviets' neutron bomb treaty

GENEVA, Switzerland (AP) - The Soviet Union presented the Geneva disarmament conference with a draft treaty today to ban neutron bombs. The United States immediately

denounced the draft as a "one-sided propoganda exercise" trying to divert attention from serious arms control efforts.

Introducing the draft, cosponsored by seven Communist allies, Soviet delegate Viktor I. Likhachev warned that development of the neutron bomb by the United States would deal a 'great blow'' to detente and would "unavoidably trigger retaliatory measures" by the Soviet Union.

"Those who advocate the production and deployment of the neutron weapon should clearly realize that if that weapon is adopted ... our country will be confronted with the need of answering the challenge inorder to ensure its security and the security of its allies. Consequently, the level of military confrontation wll not decrease but will rise," he said. In what amounted to one of the

Guard ends hijack try

HONG KONG (AP) - A crewman waving an ax and a pair of scissors tried to hijack a Taiwanese airliner to mainland China today but a security guard aboard the plane shot and killed him, police said The pilot and co-pilot were injured by the crewman, identified as the flight engineer, before he was shot, police said. The plane, a Boeing 737 carrying 101 persons from Taiwan to Hong Kong, anded at Hong Kong and the 'situation is under control," a government spokesman said. Both injured crewmen were hospitalized in satisfactory condition. Officials said radar at Hong Kong airport tracking the incoming flight spotted the plane veering slightly off its regular course toward the China mainland when it was about 10 miles from Hong Kong.

sharpest retorts in recent sessions of the 35-nation Geneva conference, U.S. chief delegate Adrian S. Fisher virtually accused the Soviet Union of

hypocrisy. "We have heard the Soviet representative and some other representatives speak of the inhumanity and barbarity of the 'neutron bomb," Fisher said.

'But I fear that we would wait in vain to hear them speak of the inhumanity and barbarity in the Soviet arsenal, some of which are as much as 20,000 times-I repeat 20,000 times more powerful.

The neutron bomb is a small warhead that would be placed on Lance missiles and artillery shells. It produces twice the deadly radiation of a conventional nuclear bomb but less than a tenth as much explosive power, heat and fallout. This means the bomb can kill people while causing little damage to buildings.

The warhead is designed to replace the approximately 7,000 nuclear warheads now deployed in Europe.

Third trip wins honor

for museum-going couple

The third time was the charm Wednesday for Mr. and Mrs. Clarke K. Ledwell of Dayton, Ohio, as they were the 100,000th visitor to the Permian Basin Petroleum Museum, Library and Hall of Fame.

Although Mrs. Ledwell was the first through the museum door about 4:10 p.m., museum Executive Director Homer T. Fort told the couple to decide who would be number 100,000. Mrs. Ledwell gave the honor to her husband.

Mr. and Mrs. Ledwell, visiting the Alan Robertson family of Midland, said their hosts brought them to the museum Sunday, but it was too near closing time to tour the museum.

The Ledwells said they returned Tuesday and spent about three hours

In honor of Ledwell, a sign was erected Wednesday proclaiming that for one day the museum was renamed the Clarke K. Ledwell Museum. Fort also presented Ledwell with a drill-bit key chain and Mrs. Ledwell with a drill-bit charm.

"The sign renaming the museum will be left up until 5 p.m. today," Fort said.

"We've been counting all day. I didn't think they would make it (the museum closes at 5 p.m.). Then they walked in and everybody had grins on their faces and they said, 'That's odd.' "We had a group of seventh-graders

from Alamo Junior High, and that brought this on sooner that we expected.

"It took 267 people today to reach

And, to aggravate the situation. "many parents are anxious to run in and take their kids off the hook. They (young people) don't have to accept the consequences of their actions" he

said. Those parents who give to their children without making demands upon them often are well-intentioned, Greenspoon said. But what many are doing is "essentially trying to bribe the child."

Another problem common to many young vandals is that they have no communication with their parents 'except when their parents are on their blocks about something. . . Then they (the parents) wonder why the young person doesn't turn to

them." just don't have fun together," he said of these families. And when being at home is unpleasant, the young person will leave

The plane was carrying 92 passengers and a crew of nine. It was parked at one end of the airport and newsmen were barred from entering the area.

going through the museum. Their third trip Wednesday was to buy a gift for Alan Robertson at the museum's gift shop.

"The director opened the door for both of us and introduced himself. The women in the gift shop were all standing around smiling and looking like they were amazed that anyone would come in at that time of day," Ledwell said.

Mrs. Ledwell added, "He (Fort) stopped us and said 'I have something to say to you.' I thought he was going to say it was closed.'

the 100,000th visitor." Fort said. Mrs. Ledwell, who is a fifth-grade teacher in Ohio, said, "I've taken a lot of children through museums, but never one like this.

Ledwell said, "I told him (Fort) that since the name was Ledwell, everyone who toured the museum while it's named after me would have to be led well.

The Ledwells said the last time they won anything was in 1941.

"We won a \$25 war bond in the furniture store where we bought our daughter's crib," Mrs. Ledwell said.

Winter-weary promised relief of spring weather

If the predicted spring weather continues in Midland, employers may find themselves locking office doors to keep winter-weary employees inside.

Fair weather is expected to continue through Friday, with a high Friday in the upper 70s. Tonight's low should dip to the low 40s.

Today's high was expected to reach the low 70s, considerably above Wednesday's high of 59 degrees. This morning's low was 31 degrees which might seem cold, unless compared with the 11 degrees below 0 temperature in Lansing, Mich. (The Lansing low was 12 degrees below the previous record.)

Winds tonight should be from the southwest at 5 to 10 mph, according to the National Weather Service at Midland Regional Air Terminal. Weather in area towns this morning. was clear and cool.

March of Dimes decision to 'bow out' questioned

By MICHAEL PUTZEL

WASHINGTON (AP) - Jane and Richard Paritzky watched with fascination as their firstborn son began the learning process. He could smile, then learned to turn over.

Two years later he was dead, a victim of Tay-Sachs disease, an always fatal neurological disorder.

Now a diagnostic procedure known as amniocentesis, the insertion of a needle into the womb to extract amniotic fluid surrounding the fetus, can detect Tay-Sachs.

Research into Tay-Sachs and other genetic diseases has been supported by the National Foundation-March of Dimes. But on Wednesday, the March of Dimes announced it is phasing out support. The organization said it was time

for the government or other agencies to take responsibility for genetic services. It denied its decision was influenced by opposition from an antiabortion group called the National Right to Life Committee which objects to screening programs.

As currently used, amniocentesis constitutes "a search and destroy operation," says Judie Brown. spokeswoman for the anti-abortion group which believes defective children have the same right to live as others.

Jane Paritzky disagrees.

She remembers how when other babies learned to sit, stand and walk. Ian made no progress. In fact, he

seemed to forget what he learned. By the time the Pacitzkys took him to the doctor for his nine-month checkup, he could no longer roll over. "He's going to die," Paritzky

For two years, the young couple

watched their son deteriorate. He had seizures, controlled with drugs. He developed pneumonia and was hospitalized twice.

pregnant again, amniocentesis was in use. To her dismay, she learned she was carrying another Tay-Sachs baby and had an abortion.

Probe behind shooting--Flynt scene of the wounded publisher

(Continued from Page 1A) some good," answered the doc-

"We're vegetarians, we don't

eat sugar," said Althea. Flynt nodded in agreement as the doctor, smiling tolerantly, pointed to the glucose bag above the bed that dripped sugar into Flynt's bloodstream.

Two weeks ago, Los Angeles sunlight streamed through the rear window of Larry Flynt's limousine. The Hustler founder was headed for a Culver City photo studio where women posed for explicit nudes that made Flynt infamous and wealthy.

"You know," Flynt, 35, said that day in a world-weary Ken-tucky drawl, "I don't know why I don't forget this other stuff and live in Acapulco with the profits from Hustler."

For all the West Coast sunshine, the limousines, the private ets, the bungalow at the Beverly Hills Hotel, for all the publicity of new friendships with born-again household names, Flynt was beset with problems.

He was besieged by media requests for interviews about his religious experience several months ago. In an urge to find some respectability and a larger meaning to life than Hustler perhaps represents, Flynt recently began a dash to build a media empire consisting of a dozen urban tabloids fashioned after the Village Voice, a chain of city and state magazines model-ed after Texas Monthly, and a

weekly news magazine. He acquired tabloids in Plains, Atlanta and Los Angeles. His first foray into straight magazine

publishing was a month away, when Ohio magazine would debut. The new properties were causing flow problems and before he left California, Flynt ordered a 20 percent staff cut in all his divisions except Hustler.

On this afternoon, as the long black car traveled through Culver City's faded business district. Flynt spied a corner sporting goods store. He smiled as he pointed it out to his wife: why, he asked, don't we just buy that store and settle down, sell tennis shoes from behind the counter.

In addition to his business problems (all was not grim: Hustler's sales continued strongly), Flynt was becoming consumed by assassination conspiracy theories. With veteran assassination buffs Lane and comedian Gregory as his mentors, Flynt embarked on a campaign to solve the murder of John F. Kennedy. He offered a \$1-million reward for information leading to the solving of what he thinks was a conspiracy involving the FBI and CIA to kill the president. He published a million copies of a tabloid on the subject. He bankrolled a seven-person investigative team, with Lane at its head, to follow leads around the country. And then there were the legal

battles. He expected a Cincinnati conviction for publishing obsceni-ty to be overturned on appeal, but he faced trials in Atlanta and a rural Georgia town of 7,000 named Lawrenceville.

Flynt began worrying about his personal safety as his legal fights and religious conversion put him

on the nation's front pages. To his friends, he acknowledged the possibility of assassination. In addition to a traveling retinue of aides who double as bodyguards, Flynt last month bought a giant schnauzer, a black animal whose friendly, bearded face belies an enormous jaw. His name is Magnum. Flynt calls him, "the Rev. Magnum Black."

But during a trip home last weekend, Flynt told his wife he didn't fear for is safety in Lawrenceville because it seemed so tranquil and pleasant. A spent shell was reported

found near the door of an abandoned building across the street from where Flynt fell wounded, though police spokesman decline to verify the description of the weapon involved. A clerk at the Sherwin Williams paint store next door says that until five or six years ago, the building held a chiropractor's office. It's windows are shattered, doors hang from the hinges. The rear exit leads conveniently through an overgrown back yard to a parklot. In short, the stone building could have been an assassin's lair.

"An identical modus operandi applied in the murder of Dr. Martin Luther King," says Lane, who has spent 14 years studying political assassinations.

Since the man who has been financing his latest efforts was shot Monday. Lane has begun conducting his own investigation into the shooting. Only 12 seconds to fire, exit the abandoned building and flee from the hidden parking lot, notes Lane. As police and citizens converge on the

escapes easily in the opposite direction, Lane postulates. Wednesday, two days after the shooting, Lane held a press conference in a motel room. While newspapers have suggested Flynt's volatile combination of porn and religion could well have motivated an attack on his life,

and his lawyer, the gunman

Lane wanted to raise the assumption he shares with the Flynts: that the government wants to silence this monied rabble rouser who suggests Lee Harvey Oswald did not act alone.

Lane did not specifically accuse the FBI or CIA with complicity, but claimed there has been "a deliberate effort to interfere with and destroy the investigation" he has been conducting under Flynt's auspices for a month.

When reporters from the magazines, newspapers and TV stations present expressed skepticism, Lane replied that, "The news media has always been wrong," referring to the mainstream coverage of political assassinations. The Flynt shooting had the earmarks of a sophisticated operation, he argued: "It doesn't look like amateur night in Lawrenceville, Ga."

The small town is shocked by the violence in its midst. Sheriff's deputies guard every hallway in the hospital where wire service reporters spend the night in the

DEATHS

L. T. Barrow

HOUSTON - Services for Leonidas Theodore Barrow, 82, former chairman of the board of Humble Oil & Refining Co., now Exxon, were held Tuesday afternoon in Houston.

Barrow, who died Saturday in his Houston home, served as Humble chairman from 1948 to 1955.

He was serving as chairman when the Humble Building was erected in Midland.

He had served on the advisory council for the Geology Foundation at The University of Texas and was a member of the American Association of Petroleum Geologists.

He was an occasional visitor to Midland throughout his career with Humble.

Survivors include his wife, Laura Barrow; a son Thomas Barrow, who is a vice president for Exxon; two sisters, Mamie Dell Barrow of Austin and Anne Lappe of Kingsland, and two brothers, John Barrow and David Barrow, both of Austin

George Kidd

Services for George Kidd, 72, of 1505 Humble Ave. were Wednesday in Newnie W. Ellis Funeral Home with the Rev. J. B. Stewart, associate minister of the First United Methodist Church, officiating. Burial was in Resthaven Memorial Park.

Kidd, a Midland oil operator who had lived here since 1935, died Monday night in a Midland hospital following an illness of a few days. He was born Oct. 23, 1905, in Brownwood and spent his early life

there. He attended Howard Payne University and the University of Oklahoma. After leaving his college studies,

Kidd joined his father in the banking business at Brownwood. Later, he worked in the oil fields in East Texas. In the 1930s, he lived in Oklahoma City,

Pallbearers were Tom Sloan, Bob Wallace, Tec C. Witte, Robert D. Perry, John Mealey and Boyd

Honorary pallbearers were Don C.

Freeman, J. P. Butler, Ben Tamney, Fred Fuhrman, J. D. Gist and Ed

Mrs. Holloway

STANTON - Ruthie Mae Holloway,

75. of Stanton, a 50-year resident of Martin County, died Wednesday af-

ternoon in a Stanton hospital

In 1935, Kidd moved to Midland and was engaged in the oil business with his brother until World War II broke out. He reserved in the armed forces, returning to Midland following the war and continued in the oil business. Survivors include his wife, Lila Kidd; a brother, Barron Kidd of

Dallas, and two nephews.

church and of the printers' union here. He served in the U.S. Navy. during World War II. Survivors other than his sister in

Midland include his wife, a son, a daughter, a sister, three grandchildren and four greatgrandchildren.

Nellie B. Olsen

OZONA - Nellie Brock Olsen, 81. died Wednesday in a Sonora hospital. Graveside services were to be at 3:30 p.m. today in Cedar Hills Cemetery directed by Larry D. Sheppard Funeral Home.

Mrs. Olsen was born April 6; 1896. Survivors include a daughter, Mrs. Claude Russell of Ozona; a sister, Mrs. Walter Young of Lubbock; a half brother, Jake Young of Ozona, three grandchildren and three greatgrandchildren.

A. McLaughlin

Services for Annie P. McLaughlin, 67 of 1910 W. Washington Ave., were Wednesday in Newnie W. Ellis Funeral Home chapel.

Officiating was the Rev. Bob Porterfield, pastor of West Kentucky Street Baptist Church, and the Rev. Ross Payne, pastor of Cottonflat Baptist Burial was in Fairview Church. Cemetery.

Mrs. McLaughlin died early Tuesday in a Midland hospital. She was born Feb. 21, 1911, in

Hamilton County, lived for a few years in Eunice, N.M., and moved to Midland.

She was married to S. G. McLaughlin in 1930. He died in 1937.

Mrs. McLaughlin held memberships in the West Kentucky Street Baptist Church, the Order of the Eastern Star, Rebekah Lodge and in auxiliaries of the American Legion and the Veterans of Foreign Wars.

Survivors include a sister, Lilly Eiland of Socorro, N.M., and a number of nieces and nephews, including Wesley Paddock of Midland.

Pallbearers were Francis Floyd, Doyle Thomas, Jesse Reed, A. J. Almand, Bobby Parkis and L. A. Franklin.

Al M. Dunahoe

ANDREWS - Al M. Dunahoe, 46, of Cisco and formerly of Andrews, died Wednesday in a Dallas hospital from burns he received when his clothing caught fire Wednesday in Cisco. Services are pending with Singleton

Funeral Home in Andrews. Dunahoe moved to Cisco from Andrews 12 years ago. He was a veteran of the Korean War.

Survivors include two sons, Milton Lee Dunahoe of Eagle River Alaska

Tenants in harmony with MHA

"Love in Bloom" seems to be the theme song in the relations between the tenants at Hillcrest Manor and and the commissioners of the Midland Housing Authority

The MHA held its monthly meeting at Hillcrest Manor Wednesday afternoon. At the conclusion of regular business, Chairman Harry Clark invited comments, pro and con, from the tenant audience in the Community Room.

Manor residents vied with one another in telling the MHA how much they enjoyed their homes and the lifestyle at 700 W. Scharbauer Drive.

Some said they needed better weather-stripping around doors, but they said it with the confidence of those who know they have only to ask to receive.

Families evacuated after derailment

JUSTIN, Texas (AP) - Several families were evacuated from their homes and a road was closed near this North Texas town early today after 15 cars of a 67-car Santa Fe freight train derailed, causing an irritating chemical styrene monomer to leak, a spokesman for the Deaton County sheriff's office said.

Kaisner of the sheriff's office said the leaking chemical was identified as styrene monomer. He said there is little danger of an explosion.

WOODY'S H.IN

NET WT 13 02

Clark assured them that quick action would be forthcoming.

On a home rehabilitation program being carried out here with private contributions obtained through the Midland Commission for Local Community Development, MHA Commissioner Ruth Wenck reported that three homes have been repaired and work is in progress on eight more, at a cost of \$24,519.98.

Bids will be in on two more houses shortly, she said.

M. Fullinwider of the commission said that \$65,465 was pledged or in hand for work on 23 homes. The overall target is to repair 50 owner-occupied homes, he said.

He said 43 percent of gifts have come from churches, especially the Baptist church. Individuals giving through their churches have produced 32 percent, and the other 25 percent has come from civic groups

rotation of churches.

While expressing general approval, the com-missioners said this was a decision for the resident council to work out, and Jansen agreed to take the leadership role in pursuing it.

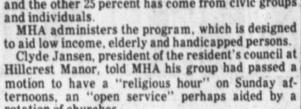

In other business, MHA voted to provide Blue Cross health insurance for Vina Robbins, manager of the center, and to establish a monthly service contract with Montgomery Elevator Co.

Ground was broken for Hillcrest Manor in the summer of 1976. The first tenants moved in in September, 1977. There were now about 115 tenants, with a waiting list of 81.

E. Whittaker

LUBBOCK - E. C. Whittaker, 70, a retired printer for The Lubbock Avalanche-Journal and brother of Jennye Mae Whittaker of Midland, died late Tuesday night in a hospital here.

Services are pending at Rix Funeral Home here. Whittaker retired five years ago

and Randall Allen Dunahoe of Cisco; daughter, Wynette Dunahoe of Cisco; a stepdaughter, Terresa Hamilton of Cisco; his parents, Mr. and Mrs. Milton Dunahoe of Andrews; two stepsisters, Mrs. Ray Burrow and Mrs. John Crowley, both of Midland, and two stepbrothers, James A. Weatherred of Midland and Robert F. Weatherred Jr. of Shreveport, La.

Roy L. Hale

FLOYDADA - Roy L. Hale, 66, of Harmony Community near Floydada, father of Barry Hale of Midland, died Wednesday in a Lubbock hospital following a lengthy illness.

Services will be at 2 p.m. Friday in the First Baptist Church with burial in Carr Chapel directed by Moore-Rose Funeral Home.

Hale moved to Floyd County in 1919. He married Ruth Snell Dec. 27, 1936, in Petersburg. He was on the board of Producers Elevator, Farmers Co-op Gin, Lighthouse Electric, Old People's Hospital and Plains Co-op Oil Mill of Lubbock.

Other survivors include his wife. three sons, three brothers, a half brother, three sisters, a stepsister and seven grandchildren.

Serving liquor to jurors on sheriff removal petition

AMARILLO, Texas (AP) -Allegations about the serving of liquor to jurors in the Cullen Davis capital murder trial will be included in a removal hearing for suspended Potter County Sheriff T.L. Baker.

State District Court Judge George Miller Wednesday denied a detense motion to strike the allegations from an amended removal petition.

"We all know intoxicating liquor was provided to the jury in the Cullen Davis trial," said defense lawyer Robert Wallis of Houston. "But the statute refers to providing liquor during deliberations."

Baker has been under suspension by Miller since Jan. 12, and his removal trial has been scheduled for March 30

Miller also denied a defense motion to dismiss the removal suit because a signed affidavit by the person who brought the suit was missing in an amended petition.

Larry Kelley, an oyster bar operator, submitted a sworn affidavit Dec. 13 with the original petition against Baker.

However, Feb. 21 Miller ordered Potter County District Attorney Tom Curtis to be "more specific" in his allegations and thus Curtis submitted an amended petition, which included the allegations involving the Davis trial.

The amended petition was submitted Feb. 27 without another sworn affidavit by Kelley. Curtis maintained Wednesday

another affidavit wasn't needed but the judge ordered him to get one. Curtis said he would talk to Kelley.

Odessa man

found beaten

ODESSA - An Odessa man was in guarded condition in the intensive care unit of Medical Center Hospital this morning after being found by police Wednesday night in the parking lot of a lounge.

Odessa Police Capt. Jack Fillyaw said Richard E. Kelly was found on the parking lot shortly after 10 p.m. Police first thought he had been stabbed, Fillyaw said, because of the amount of blood on the ground. But they determined that instead he had been beaten around/the head. Fillyaw said no/ arrest has been

made, and police do not know the reason for the beating.

Orthodox Jewish group would cede area to Jordan

By DIAL TORGERSON The Los Angeles Times

JERUSALEM — The local leader of a small but highly vocal religious group — so extremist that it opposes Zionism as heretical — wants to give his Jerusalem neighborhood to Jordan.

Rabbi Moshe Hirsch speaks for Neturel Karta, which he says speaks for the several thousand residents of Mea Shearim, the most Orthodox of

Jerusalem's religious districts. He says that he and two aides are making arrangements to try to see King Hussein next month in Amiaan.

"A former minister in the king's cabinet, who lives in East Jerusalem, is requesting an audience for us," Rabbi Hirsch said. "All three of us have American passports, and we are asking the U.S. Consulate in Jerusalem to make arrangements for us to cross the bridge into Jordan for

our meeting with the king." Mea Shearim, one of the first Jewish communities settled outside the ancient walled city of the Old City of Jerusalem, has been in Israeli territory since the founding of the state in 1948. It is on the 1948-67 frontier, next to what was Jordanian territory before Israel took it in the Six Day War of 1967.

"If there are Zionist settlements in Jordanian territory," Rabbi Hirsch

said, "why can't there be a Jordanian settlement in Zionist-held territory?"

The word "Zionist" is almost an epithet to Rabbi Hirsch, whose Brooklyn-based group adheres to the letter of Jewish law on every aspect of life - including, he says, the biblical injunction "to take no concerted or forcible action to regain the Holy Land on our own" until the Messiah comes.

"Zionism," he is fond of saying. "is not the Messiah."

Rabbi Hirsch, the secretary of Neturei Karta, originally wanted to see Hussein to ask permission for his adherents to pray at the Wailing Wall in the Old City, Because it was in territory taken from Jordan in 1967. The head of Neturei Karta, Rabbi Joel Teitelbaum of Brooklyn, forbade members of the sect to pray there.

Thus, Neturei Karta's restriction on going to the wall was based on its unwillingness to cross into a part of the Holy Land it viewed as having

been taken by force. But with the permission of Hussein, whom the sect still regards as the Old City's rightful ruler, the followers of Neturei Karta will be allowed by their spiritual leader to visit the wall. It is held to be a foundation of the first temple and one of Judaism's holiest sites.

THE MIDLAND REPORTER-TELEGRAM, THURS., MARCH 9, 1978

The Los Angeles Times

ENSENADA, Mexico — Soldiers and marines were at work with buildozers and shovels a block from major tourist hotels earlier this week as Ensenada Mayor Luis Gonzales Ruiz toured the city with Roberto de la Madrid, governor of Baja California.

"It is the worst disaster the city has suffered in my lifetime," the mayor said.

Gonzalez Ruiz is 35. He has lived his whole life in the Ensenada area, and the city's records seemed to bear out his assessment. In the 1890s, the records said, it rained as heavily as it did last Saturday. But the records said nothing of the hurricane-force winds; and at that time two of the hardest-hit neighborhoods did not even exist.

The two neighborhoods are Colonia Munguia and Colonia Industrial — Mo both built northeast of the city, along the usually dry arroyo of El Aguacito, which feeds into the Valle Verde River.

For some reason as yet undetermined, that little creek seemed to get most of the runoff from Saturday's storm, and in Colonia Munguia alone 200 of the 500 homes were destroyed by the resulting flood.

When the mayor and the governor

made their tour, parts of the suburb looked like a surrealist concept of desolation: a flat mud plain, dotted at intervals by the upper limbs of dead trees and the roofs of large trucks.

"It will take time to rebuild," de la Madrid said, "even if it does not rain again. But no matter how long it takes — there will be no more homes built in this arroyo. What has happened now must not happen again."

In downtown Ensenada, the picture seemed a little better.

Much of the mud washed downstream from the two devastated Colonias wound up on Floresta Avenue, the main business and shopping street that runs from east to west in the center of the city.

Though portions of a nine-block stretch of Floresta were still buried under as much as three feet of mud, and automobiles left there were still stacked at insane angles as the digging-out went forward, city officials estimated that some business establishments might be able to reopen their doors within two weeks. Marines and soldiers continued to patrol the city; looting incidents, at one time threatening to become a serious problem were renorted back

Marines and soldiers continued to patrol the city; looting incidents, at one time threatening to become a serious problem, were reported back to minor levels. Food and water were being distributed, and army and civilian doctors innoculated residents against the various diseases

the same, and many grocery stores have extended credit beyond the normal bounds. "The banks really surprise me. I owe the First Na-

tional money, and they never even sent me a late notice. They've treated me real good," said Marvin Penant, a coal miner. Penant said a finance company holding his house mortgage "told me to pay whatever interest I could, and if I can't, then pay later."

Some of the miners said they have received large loans during the strike, backed with a promise to turn over income tax refunds.

But they have said the strike is beginning to wear on their families, particularly the children.

"It's hard on the kids. Anytime you want to go someplace, you have to think of the gas in the car. When the kids say, 'I want a cookie,' you've got to be ready to tell them you don't have any," said Hines, a 27-year-old veteran with two small children.

Compounding these deprivations will be the loss of food stamps beginning next month.

Joseph Shepherd, deputy director of the federal food stamp program, said if the courts issue a Taft-Hartley injunction and the strikers still refuse to work, their strike becomes an illegal one and they will lose food stamps. Government officials said food coupons in West

Virginia rose from 258,289 recipients and \$6.1 million before the strike to 350,000 recipients and \$9.8 million last month.

The striking miners are not eligible for state unemployment compensation, although depending on their circumstances some are eligible for welfare. However, according to union officials, only a relatively small number of miners here have applied for welfare payments.

"I've seen too many proud miners who would never go on welfare. They'd find another way," one UMW official said.

The miners received a lift Tuesday when they got word at the UMW District 31 headquarters in Fairmont that the United Auto Workers union had donated \$2 million to the union for relief of striking members nationwide.

Later in the day, Louis Loretta, an Osage miner, walked into the settlement house with a check for \$781 that he received from a nephew in Detroit, who is a member of the UAW.

"Myself and a few others stood in front of the plant and collected this,' the nephew wrote. Kelly read the letter, and said, "As long as there are people like that around, the miners aren't going to suffer too bad."

Cattle testing tree-bark feed

McGREGOR, Minn. (AP) — A study on six northern Minnesota farms indicates that ground-up tree bark can be fed to cattle. Lohn Cox one of the

John Cox, one of the directors of the project, believes tree bark could be economical, especially in periods of drought when hay prices are high.

The Minnesota project used bark from aspen trees, obtained at a paper mill. The mixture fed to

Cox said weight gains by bark-fed cattle were excellent. The cattle got low-grade hay along with the bark mixture.

Wisconsin researchers first proposed the use of ground-up wood in cattle ed 20 years ago.

Planners give health agency 'favorable review'

By MARLEEN RAY

Board of Directors of the Permian **Basin Regional Planning Commission** Wednesday gave a favorable review and comment to the Permian Basin Health System Agency's application for full designation.

The agency is seeking full designation from the Department of Health, Education and Welfare. Harley Reeves, director of the Permian Basin agency, said this is the second time the agency has sought full designation.

Last year, he said the agency was unsuccessful in attaining that status, as it failed to meet all of the federal requirements.

"We (the agency) have had our ups and downs . . . with the feds," Reeves said. "They changed the rules right in the middle of the game.

If the agency succeeds this year, he said, he anticipates it will become the first health systems agency to receive full designation in Texas. He said the U.S. Congress is hoping agencies like the Permian Basin one will help plan for the health needs of the public.

"We (the agency) still have a long way to go," Reeves said.

The agency needed a favorable review from the planning board in order to submit the application to HEW, he said. The application will be sent to HEW March 20, he said. The agency expects to hear from the

department by June 20.

In addition, the directors gave a favorable review and comment to the agency's five-year plan and its annual implementation plan.

The annual plan outlines the oneyear objectives of the agency. It covers areas of concern from cancer to drug abuse.

The directors also gave a favorable review and comment to the following grant and contract applications:

- A continuing grant application from the Permian Basin Community Center for Mental Health and Mental Retardation for drying out and intermediate care, totaling \$82,835.

Spring Area Alcoholism Treatment and Rehabilitation Center, amounting to \$75,580.

- A continuing contract application from the Permian Basin Community **Center for Mental Health and Mental** Retardation to fund an Outpatient Drug Free program, totaling \$83,250.

- A grant application from the Texas Department of Health for Texas Venereal Control Federal Assistance Application, amounting to \$2,464,660, only part of which will be used by the local agency.

- A grant application from the Per-mian Basin Planned Parenthood, - A continuing grant application Inc., for a Family Planning Services from the city of Big Spring for the Big Grant, totaling \$695,932. - A grant application from the Permian Basin Emergency Medical Services System for funding for its fourth year. The grant will be used for additional training of emergency medical technicians and communications and transportation costs.

The board gave a favorable review and comment to the city of Odessa's Community Development Block Grant application, requesting \$1,437,000 in federal aid. The city of Stanton Housing Authority's application for \$360,300 to construct 15 units of assisted housing also was given a favorable review and comment.

The directors approved the ap-

pointment of six persons to the Regional Alcohol and Drug Abuse Advisory Council. They are Reta Jimenez, Human Relations Council. of Midland County; Bonnie Taylor, housewife, of Andrews County; E. M. Mason, interested citizen, of Pecos County: Dan Saunders, sheriff, of Martin County; Elizabeth Mills, beautician of Winkler County, and Carlton Reed, interested citizen, of Ward County. In the final items on the agenda, the directors gave a favorable review and comment to an application from the Permian Basin's Comprehensive Employment Training Act Manpower program. The application asks for creation of a prime sponsor consortium for the program.

Higher farm prices, complaints deregulation favored

Deregulation of oil and gas is the only way to make conversion to coal and other alternate energy sources economically feasible. Republican gubernatorial candidate Ray Hut-chison said Wednesday afternoon.

Hutchison spoke at a press conference during a campaign swing through Midland.

While oil and gas "probably would be somewhat higher" under the free market system, it would not necessarily rise as high as it will under government regulation, he said. When prices are fixed, "the price will automatically rise to that point," he said.

And, he said, rising oil and gas prices would not fuel inflation because "when the cost of goods

The candidate said he supports the concept of higher prices for farmers but does not endorse disruptive techniques.

He said farmers at a recent demonstration in McAllen were "abused by John Hill" and "ignored by (Gov. Dolph) Briscoe. I don't know which was worse.

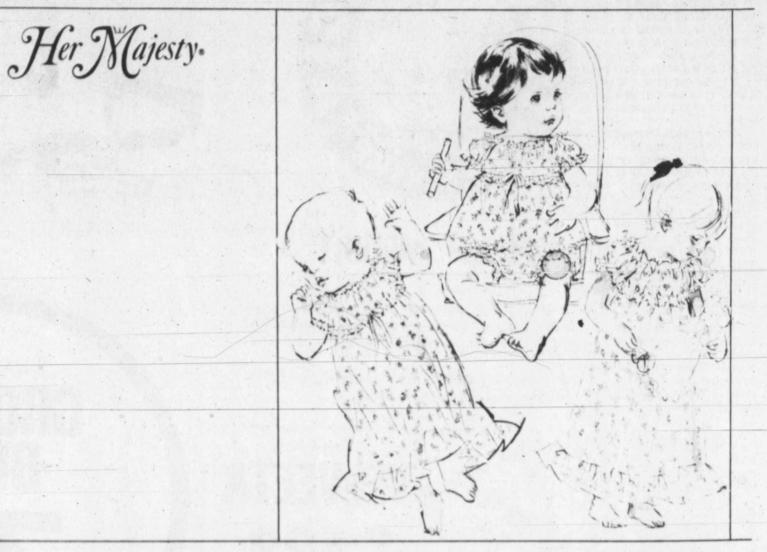

Hutchison said the primary problem faced by American farmers could be solved if the United States would tell world governments they must open up their countries to American imports.

On the topic of education, Hutchison said a tax increase is not needed to improve education, but, rather, a more fair distribution of available money. "There is no crisis in funding. There is a crisis in distribution," he said.

ANDREWS - Two complaints have been filed in federal district court in Midland in connection with an incident Tuesday morning in Andrews.

A Wichita, Kan., woman was stopped for a routine traffic violation when police officers became suspicious and investigated the campercarrying pickup truck, official sources said.

The woman was found to be carrying 12 allegedly illegal aliens and was taken into custody of the U.S. Border Patrol.

equals the price of production, that's not inflation."

Conversion to alternate energy sources is necessary but cannot be mandated by Congress, Hutchison said. But, "if the price rises on one, the alternate fuel is going to be more attractive," he said.

At the press conference, Hutchison announced he has appointed Bill Heck to be Midland County chairman of his campaign committee. Vivian Straughan has been appointed cochairman.

Lions Pancake Jamboree

not limited to pancakes

Top quality musical entertainment featuring many popular entertainers of the city and section will be served right along with delicious pancakes throughout the day Saturday at the Midland Downtown Lions Club's 22nd annual Pancake Jamboree

The big event, which always takes on the colorful atmosphere of a county fair, is scheduled from 7 a.m. to 8 p.m. in the Dellwood Plaza Mall. The public is invited to dine on pancakes and sausage at least once on Saturday

The entertainers and their order of appearance are listed, as follows: 8:00 - 8:30 a.m. — Jimmy Furman,

Organ Melodies. 8:30 - 9:00 a.m. - "Dude" Martin

and His Music. 9:00 - 9:30 a.m. - Doug Brown and

Glenda Pruitt, Vocals.

Braniff seeks OK

DALLAS (AP) - Braniff International may be bypassing London for a while but in the meantime they are trying to get the okay to fly nonstop from Dallas-Fort Worth to Paris, Frankfurt, Amsterdam and Madrid.

These cities would be in addition to

Braniff has received permission from the CAB to fly to London, but regularly scheduled service has been delayed over a fare dispute with Great Britain.

Because of the British delay, Braniff asked the CAB to act immediately as the board is empowered to do under its emergency exemption dures

Braniff said the new services were "desperately and immediately needed in order to satisfy the demand for travel between the Southwestern United States and Europe and to employ Braniff's idle resources."

The CAB recently stated it would be "receptive" to an exemption request by Braniff to serve other points in Europe as a result of the fare dispute which delayed the March 1 im-plementation of direct nonstop flights rom D-FW to Londo

The CAB said also it would help Braniff get approval from other, Suropean governments.

9:30 - 10:00 a.m. - Don McDaniel, Piano & Organ. 10:00 - 10:30 a.m. - To be an-

nounced. 10:30 - 11:00 a.m. - Faith Temple Youth Deliverance Choir.

11:00 - 11:30 a.m. - "Dude" Martin and His Music

Kennedy takes issue with data safe-keeping

By MORTON MINTZ The Washington Post

WASHINGTON - When Jimmy Carter was campaigning for the presidency, he expressed doubts about proposals to legislate a breakup of the major oil companies to end their control of the business from the well to the gas pump. At the same time, he looked favorably upon proposals to require them to divest ownership of coal and other competing fuels.

Last April, however, in his "moral equivalent of war," speech and his National Energy Plan, the president said that a thorough financial accounting system, "closely monitored," would determine whether there was a need for either form of divestitute.

With an administrative order, Carter said, energy companies would be compelled to disclose oil costs and profits segmentally, that is, "for production, refining, distribution and marketing - separately for domestic and foreign operations." Similar strict accounting would be required for competing fuels.

Some assumed the disclosure would be public, although the president did not say it would be. It turned out that the companies would report confidentially to the new Department of Energy.

Others assumed that DOE, headed by James R. Schlesinger Jr., would share the energy data with other federal agencies, particularly the Internal Revenue Service, and the Justice Department and the Federal Trade Commission, which share responsibility for enforcement of the antitrust laws.

In an official notice in the Federal Register in January, however, DOE suggested that if "confidential energy data" were to be used for

HOUSTON (AP)-Seadock Inc., the

consortium that had hoped to build a

crude oil terminal off the Texas coast,

announced today it is closing its of-

private project," said Hugh L. Scott,

president of Seadock since late 1974.

"There was just no way to do it as a

fices March 31.

reality," Scott said.

"investigatory and prosecutorial purposes ... the primary purpose of the DOE information system would be seriously jeopardized.

Accepting the invitation in the notice to comment on whether DOE should share the data, chairman Ed-ward M. Kennedy, D-Mass., of the Senate Antitrust and Monopoly Subcommittee told Schlesinger, in a letter released Friday:

'In short, tax and competition considerations are inescapably part of any rational energy policy. That the Department of Energy would ever entertain denying the expert agencies relevant data bodes ill for the future of energy policy." A DOE press officer, telling a

reporter the issue was "important, referred him to a top aide to Schlesinger. The aide did not reply to the reporter's queries.

DES's proposition that antitrust and tax questions are at "the periphery of energy policy" is "un-true as a matter of law because Congress has declared that a primary duty of ... DOE is to promote and strengthen competition," Kennedy said in the letter, dated Feb. 17. It is also, he said, "factually untrue" and an "appalling delusion.

He cited IRS rulings that save the major oil firms billions of dollars by treating royalties paid for producing oil as foreign "income" taxes, the aborted criminal antitrust prosecution of the seven largest firms in the 1950s, and the close relationship between those firms and the cartel of oilexporting countries.

Kennedy said, the National Energy Plan's "key proposal" is a tax, and its proposal for dealing with competitive questions is "the establishment of a data system - supposedly for the 'primary' purpose of making competition policy.

Crosby test set

Ashland Exploration, Inc., of Houston No. 3 Durwood E. Woodward is to be drilled as an 8,200-foot project in Crosby County.

The project, one location west of production in the White River (Canyon) field, also was filed with the Railroad Commission of Texas as a wildcat.

The project is a replacement for No. 4 Durward E. Woodward, scheduled 6,950-foot Canyon project for which the permit had expired.

Location is 1,650 feet from south and west lines of section 11, block RM, J. H. Airheart survey. It is along the Crosby-Dickens county line.

The site is 5.5 miles east of Kalgary.

Two wells potential from dean

New wells have been potentialed in Midland and Martin counties.

Enserch Exploration, Inc., No. 1-D Ida Mae Oldham, a re-entry project, has been completed in the Spraberry Trend Area (Dean-Wolfcamp) field of Midland County.

The well, 10 miles east of Midland, finaled for a 24-hour pumping potential of 46 barrels of 39-gravity oil, plus three barrels of water, through perforations from 8,750 to 9,219 feet after 7,000 gallons of acid

Location is 660 feet from north and west lines of section 38, block 37, T-1-

It is a former Devonian producer.

Price control removal plan may be acceptable

By RICHARD L. LYONS The Washington Post

THE MIDLAND REPORTER-TELEGRAM, THURS., MARCH 9, 1978

WASHINGTON - The Senate plan for gradual removal of price controls on new natural gas was presented Wednesday to senior House conferees who reacted like members who prefer regulation but fervently want to get the long-delayed energy bill enacted. Rep. Thomas Ashley, D-Ohio, the

> ENERGY OIL & GAS

House Democratic leadership's man on the energy conference to settle House-Senate differences, said the Senate proposal closely resembled a plan drafted just before the Christmas recess and approved by most House Democratic conferees but rejected by the Senate group. He predicted that the new proposal, approved by a bare majority of nine middle-of-the-road senators of the 17member Senate conferees, would be accepted in its basic form by House conferees

Natural gas is not the only prickly issue the conferees have left to resolve, however. They must also deal with the tax parts of President Carter's energy plan, and the Senate is resisting the big crude oil tax which the president has proposed. House members also are wincing at having to vote for this tax in an election year, so the president's energy legislation still has problems.

Rep. John Dingell, D-Mich., the House's leading specialist on the 24year natural gas pricing controversy, commended the Senate group for its

General Crude Oil Co., operating

hard work, but said he had problems with the cost of the Senate proposal, which is estimated to be considerably higher than the House bill, and by the absence of any permanent protection against too-high prices such as the floating cap of the December plan. Dingell said the Senate proposition 'needs refining.'

Rep. Harley Staggers, D-W.Va. chairman of the House conferees, said the 25 House conferees would need time to study the complex Senate proposal. He would not estimate when the conference would meet again in public session. It has not met since the week before Christmas. All present at the 11-2-hour meeting

seemed to share Ashley's feeling, that the long deadlocked gas issue was on the way to a solution. There was an 'upbeat" atmosphere, he said. Sen. Dale Bumpers, D-Ark., said there was "an air of cooperation, almost of enthusiasm" at the meeting "about reaching agreement in the near future.

Meanwhile, the Senate compromise was being shot at from left and right as giving the oil-gas industry too much or too little.

Three liberal Senate Democratic conferees - Howard Metzenbaum, Ohio, James Abourezk, S.D., and John Durkin, N.H. - denounced the compromise as "capitulation to the

natural gas industry." They said it would cost the American people \$23 billion more than the House bill by 1985 and more than double the price of new gas. So would the administration's proposal, but it would have continued price controls at higher levels indefinitely.

PAGE 3D

Two Senate Republican conferees - Clifford Hansen, Wyo., and Dewey Bartlett, Okla., also criticized the compromise, but for opposite reasons. Their complaints were that it would continue price controls for seven years, extend them to the intrastate market and provide no guarantee that the ceiling price would be sufficiently high to encourage more production of gas.

The compromise, fashioned by four senators who supported President Carter's plan for continued regulation and five who supported deregulation of new gas, would deregulate newly discovered gas after seven years, although Congress or the President could re-impose controls for two more years if prices rose too high.

The ceiling price of new gas would rise from the present figure of \$1.48 per thousand cubic feet (MCF) to about \$1.85 per MCF now, about the same as Carter's proposal for a \$1.75 price last April with increases for inflation, plus 3.5 percent since. It could rise by that amount or slightly more each year.

REEVES WELL

Chevron USA, Inc., No. 3-17-39 TXL is a new oiler in the Chapman Deep (Atoka) field of Reeves County, four miles southwest of Orla.

The well finaled for a calculated, absolute open flow potential of 16 million cubic feet of dry gas per day, through perforations fron 12,984 to 13,078 feet. The pay section was acidized with 25,000 gallons.

Total depth is 13,963 feet and fiveinch casing is at 13,955 feet. Plugged back depth is 13,090 feet.

The well is one location east of other Atoka production and 732 feet from north and 2,173 feet from east lines of section 39, block 57, T-2, T&P survey.

CHAPMAN WELLS

BTA Oil Producers of Midland No. 5 7617 JV-P Orla has been completed as a one-location southwest extension to Cherry Canyon production in the Chapman multipay area of Reeves County, two miles west of Orla.

It completed for a daily pumping potential of 11 barrels of oil and 167 barrels of water, through perforations from 3,985 to 4,224 feet after a 15,000gallon acid treatment.

Gravity of the oil is 37 degrees and gas-oil ratio is 18.909-1. Five and one-half-inch casing is set

at total depth of 4,319 feet. The plugged back depth is 4,233 feet.

Wellsite is 467 feet from south and 2,273 feet from west lines of section 22, block 57, T-2-S, T&P survey.
