President meets with Brazilian rights leaders

President Carter concluded his visit to Latin America today by meeting with Brazilian champions of human rights who are critics of the military government. One reported that Carter said human rights have improved in Brazil.

The meeting was not expected to please Carter's official hosts.

The critics, including two Roman Catholic cardinals, spent 45 minutes exchanging views with the president. Carter departed afterward for Nigeria, where he will become the first American president to make a state visit to black Africa.

Julio Mesquita Neto, a publisher and member of the group who met with the president, said Carter was told that the Brazilian press has played a major role in the defense of human rights.

'The president agreed and told us that the increase in freedom of the press existing now in the country represents an improvement in the human rights situation," Mesquita ld reporters after the meeting en-

He said Carter asked many questions about human rights in Brazil, press freedom, the nation's economy and the opinions of group members about political affairs in Africa. Carter will be the first American president to visit black

He will confer with Gen. Olusegun Obasanjo, chief of state in oil-rich Nigeria, seven jet hours across the south Atlantic from Brazil. Obasanjo is likely to ask Carter to get tougher against white-minority governments on the subcontinent.

Nigeria is the third developing nation on Carter's seven-day tour of South America and Africa. He has spent two days each in Brazil and Venezuela. The president, wife Rosalynn and 10-year-old daughter Amy will visit Liberia before returning to Washington late Monday.

Although not all of the six Brazilians meeting with Carter are outspoken critics of the Brazilian regime, most have opposed at least some government policies and are associated the human rights cause Carter espouses.

White House press secretary Jody Powell said that before Carter's final meeting with Brazilian President Ernesto Geisel on Thursday, the American president's human rights crusade and his opposition to Brazil's purchase of nuclear technology capable of producing weapons-grade uranium had "poisoned the atmosphere" between Brazil and the United States.

Midland firemen mop up at 50 W. Dakota St. after a trailer fire which seriously burned a 4-

month-old Midland child Thursday afternoon. (Staff Photo by Brian Hendershot)

Baby badly burned in trailer fire

A 4-month-old Midland child was listed in very serious condition today in the Brooke Army Hospital Burn Unit in San Antonio following a trailer fire in Midland Thursday afternoon.

The infant, Juan D. Porras Jr. of 1010 W. Dakota St., received second degree burns over 30 percent of his body when the trailer he was being kept in at 901 W. Dakota St. burst into flames shortly after 12:30 p.m. Thursday, Fire Department officials

The baby was lying on a bed inside the trailer when the fire began. Fire investigators say they believe a pilot light in the kitchen may have ignited leaking propane gas.

The infant's babysitter, Lourdes Belloc, who was not in the trailer when the fire began, heard the baby screaming and entered the trailer to save him, fire officials said. She pulled him off the bed and received first degree burns on her arms.

The fire destroyed the trailer, fire

Galaviz grand jury

BIG SPRING - A Howard County grand jury returned no indictment Thursday against the former Big Spring police officer who shot a Mexican-American teenager last

Former Sgt. Leroy Spires shot Juan Galaviz, 18, after a high speed chase following what police said was the attempted abduction of the wife of the Midland College athletic director.

Spires resigned from the police department March 15, saying that he was harassed and threatened about the incident.

A spokesman for the District Attorney's Office said that although no indictments were filed in the incident, it was not a no-bill as such, because no formal charges had been filed.

The grand jury did write a letter to the Big Spring City Council relating to the Police Department's investigation of the Galaviz shooting.

The contents of the letter were not disclosed, but it was signed by all

members of the panel, jurors said. District Attorney Rick Hamby, who had possession of the letter Thursday. refused to disclose its contents saying that it was as secret as the grand jury

proceedings themselves. He indicated, however, that the letter contained only suggestions and

was "not a big deal. The panel, which included four

Mexican-Americans and had a black foreman, heard from 40 witnesses, including Spires.

A U.S. Justice Department spokesman announced Wednesday that the Galaviz shooting is among several alleged instances of police brutality that are being investigated by the Justice Department.

The Dec. 8 incident began as law enforcement officers searched for a man who reportedly tried to abduct Mrs. Delnor Poss, the wife of the Midland College athletic director, after a basketball game between Howard College and Midland College.

brings no indictment

The shooting sparked angry outcries from leaders of the Mexican-American community who branded it

Murder indictment dismissed At the request of the District Atthe motion to dismiss was filed after

torney's Office, 142nd District Court Judge Perry D. Pickett Thursday afternoon dismissed the capital murder indictment against Richard Earl Snider. Snider had been charged in the 1975

death of W. R. Pringle, who was found dead in his pawnshop. There was evidence of a struggle, and his face was pounded almost beyond recognition, police said then. Snider was indicted in the case in

August of 1977. District Attorney Vern Martin said

Pickett approved a defense motion to suppress "what amounted to some key evidence.

"It involved some guns and pictures that were seized in connection with a warrant out of Odessa on a burglary charge. It was the Odessa Police Department's case, and they discovered years later that some of it was related to this case," Martin said thsi moring.

Snider's attorney, Jimmie Oglesby, said this morning Odessa police in 1975 had a warrant to look for tools,

but seized a lot of other things. "They just never gave it back. It lay over there in the evidence cabinet for two or three years," Oglesby said.

The defense successfully argued that the items which would have been used in evidence in the murder trial were outside the scope of the original warrant, and thus could not be admitted as evidence.

Martin said he is not through with the investigation into Pringle's death. He said other evidence relating to the death has been uncovered since

Snider was indicted. And, he said, there is evidence that more than one person may have been involved in the

Of the on-going investigation, Oglesby said, "I don't believe this man-(Snider) did this crime, and if I'm right, then someday maybe they will find the killer and prosecute.'

Snider currently is serving an eightyear prison sentence for conviction on other charges. Martin said Saider will be returned to the Texas Department of Corrections to complete his sentence.

'We had a classy show here." said the 42-year-old exotic dancer, who first graced the stage of the once splendid Trocadero Burlesque Theater when she was 18.

But the splendor is gone, and the 106-year-old Troc is in a state of ruin. A local restauranteur who bought the Troc for \$78,000 last July plans \$40,000 in restoration work before

reopening it as a theater for Chinese-language films. "Television and porno movies killed us. What you can see on TV now is what these people used to come here to see," said Ms. Marshall, awash in a sea of sequins and turquoise feathers.
"In the old days we had couples

come here. It was a classy audience. It was more fun, and you were treated like a lady. Guys would send roses back to the dressing rooms and not ex-pect something in return," she said.

Many of those couples were

back Thursday night. "When I was a youngster, I used to have a lot of fun down here. I just came tonight to say goodbye," said Nick Otto, 65, a retired businessman who brought his wife, Anne, 62.

'Oh, the tassle twirlers," Mrs. Otto said with a slight blush when asked what she remembered most about the old Troc. When she asked her husband the same question, he joked: "I'm not

The Ottos said they could remember going to the Troc in 1938 as part of a night on the town. They would get dressed up. go to dinner and then to the Troc.

Businessman Marvin Savage, 42, said he came to the farewell "to relive my childhood. I used to cut school to come down here." He said that 18 years ago he and

his wife, Sandy, went to the Troc on Friday nights.

On stage was Maxie Furman, a burlesque comic and former Troc manager for 15 years. "The old days were wonder-ful," said Furman, "This was the

poor man's musical comedy....
"I'd say the Troc was a victim
of TV and the dirty movies. Striptease just became too tame." he said,

DEATHS

Elaine Freeze

MONAHANS - Services for Elaine Freeze, 60, mother of Charles Meredith of Andrews and Laymond Meredith of Hobbs, N.M., were held Thursday in Wilson-Miller Funeral Home. Burial was in Monahans

Mrs. Freeze died Tuesday in a Monahans hospital following a lengthy illness.

She was born March 27, 1918, in Kentucky. She moved to Monahans 12 years ago from Grandfalls, where she had lived nine years. She married Thomas Freeze March 2, 1945, in Leitchfield, Ky. She was a member of the Church of Christ.

Other survivors include her husband, three daughters, two sons, a brother, a sister, 23 grandchildren and three great-grandchildren.

Hazel Stewart

BIG SPRING - Services for Mrs. R. C. (Hazel) Stewart of Tarzan were to be at 4 p.m. today in Nalley-Pickle Funeral Home here with the Rev. Charles Carter of Midland officiating and the Rev. Bill Shockley of Tarzan

assisting.
Burial was to be in Trinity Memorial Park here.

Mrs. Stewart died Wednesday in a Lubbock hospital following a lengthy

She was born in Greenville, S. C. She married Roy C. Stewart March 2, 1946, in Georgia. She lived in Tarzan for 32 years.

Survivors include her husband; a son, Heyward Buchanan of Jacksonville, Fla.; a daughter, Mrs. N. E. (Mary Elizabeth) Holloway of Stanton; a brother, Clinton Smith of Fountain Inn, S. C., seven grandchildren and two greatgrandchildren.

Ramon Alvear

BIG SPRING -Ramon Alvear Jr., 34, died Thursday morning in a Big Spring hospital after a long illness.

Services were to be at 2 p.m. today at Northside United Methodist Church. Burial will be in Salem Cemetery in Salem, directed by River-Welch Funeral Home.

He was born Feb. 10, 1944, in Kennedy and came to Howard County two years ago.

Survivors include his parents, Mr. and Mrs. Ramon Alvear of Salem; two sisters, Antonia Guillen of Ackerly and Sylvia Osborne of Lamesa; two brothers, Luis Alvear of Kennedy and Rudy Alvear of Kennedy; his grandmother, Alvina Gonzales of Mathis.

Naomi M. Webb

Naomi M. Webb, 73, of 2100 Wadley to board Ave. died Wednesday afternoon in a Midland hospital.

Services were to be at 4 p.m. today Midland postmaster and in Newnie W. Ellis Funeral Home, sectional center with the Rev. Ted Brian, associate manager, recently was minister of the First Baptist Church. appointed to serve a twoofficiating. Burial was to be in Resthaven Memorial Park. Southern Regional

Mrs. Webb was born Sept. 19, 1904. in Marietta, Ohio. Her family moved to Tulsa, Okla., when she was a child, and then to Gorman when she was a teen-ager. She moved in 1930 to Pampa, where she married Marion L.

In 1932, they moved to Amarillo. They lived there until 1948, when Mr. Webb co-founded the Webb-Davis Fruit Co. in Midland, where he died in 1968. Mrs. Webb remained active in the business until last year when she retired, because of an illness. She was a member of First Baptist Church.

Survivors include a daughter, Mrs. Joe (Virginia) Dorsey of Midland; two grandsons, Webb Dorsey of Midland and Allen Dorsey of Midland, and several nieces and nephews.

Jewel Anderson

LUBBOCK - Jewel B. Anderson, 79, of Lubbock, mother of Evalyn Wallace of Midland, died Thursday afternoon in a hospital here after a brief illness.

Services are pending at Resthaven-Singleton-Wilson Funeral Home. The Collin County native moved to Lubbock from Dalhart in 1957. She was a member of the 25th Street

Baptist Church. Other survivors include a daughter. three sons, a sister, 28 grandchildren and 19 great-grandchildren.

Robert Williams

MULESHOE - Services for Robert Donald Williams, 42, of Lubbock, father of Calvin Williams of Big Spring, will be at 2:30 p.m. Saturday in Singleton-Ellis Funeral Home here with burial in Earth Cemetery in

Williams died Wednesday in a Lubbock hospital after a short illness. He moved to Lubbock from Muleshoe nine years ago. He was a native of Alanreed. Williams was an operational manager for Yellow Freight Systems in Lubbock. He was a member of the First Baptist Church in Earth. He belonged to the Lubbock Masonic Lodge No. 841 and the Scottish Rite.

Other survivors include his wife, a son, a daughter, his mother, two sisters, five brothers and three grandchildren.

Scientific freedom, advancement become China's goals

The Los Angeles Times

HONG KONG — To lift its backward research institutes into the front ranks of world science. China has promised its scientists greater freedom from political controls, extra funding and more time in their laboratories.

The policy changes, which-China has been hinting at since the death of Mao Tse-Tung 18 months ago, were announced by Vice Premier Teng Hsiao-ping at a nationwide conference of \$000 scientists in Policies.

ference of 6,000 scientists in Peking.

Teng, a longtime nemesis of Mao and the No. 3 man in the currrent hierarchy, said the reforms are

necessary if Chinese science is "to catch up with and surpass advanced world levels" by the end of the cen-

Western scientists who have recently traveled in China are skeptical about Peking's ability to close the technological gap that fast, but they say Chinese scientists appear convinced they will have full political and economic support from the leadership.

"Expectations within the Chinese scientific community are running very high," said Roy Hofheinz Jr., a Harvard Sinologist who has accompanied two delegations of

American scientists to Peking.

The 74-year-old Teng, renowned throughout Chins for his blunt, outspoken manner, lived up to his reputation with a speech that warned Communist Party officials to stop meddling in research work and leave science to the scientists. His remarks were made March 18, on the opening day of the science conference, but Hsinhua, the official Chinese news agency, has just released the full text.

The directors of China's scientific institutes must be given a "free hand" to set their priorities and follow scientific leads without party in-

terference. Teng directed. Party cadres should play only a secondary role in scientific development, in

supply and support areas, he said.

Teng, a vice premier who has disavowed ambitions for the premiersh ip now held by Communist Party Chairman Hua Kuo-feng, volunteered to act as "director to the logistics alepartment" and help scientists secure hard-to-obtain laboratory equipment. "I am willling to be ... at your service," he added.

In a startling departure from Maoist policy, Teng also ordered party cadries to excuse working scientists from many of the political

study sessions that the late chairman prescribed for all Chinese adults. At such sessions, which sometimes last a full morning, cadres usually lecture on Mao's works and lead discussions off Marxist-Leninist thought.

But, Teng said, "scientists and technicians should concentrate their energy on scientific and technical work... We cannot demand that scientists and technicians... study a lot of political and theoretical books, participate in numerous social activities and attend many meetings unrelated to their work."

unrelated to their work."

No more than one-sixth of a scientist's working day should be

spent outside the laboratory. Teng directed, and if possible, political study ought to be reduced even below that.

Teng's show of support sharply contrasted with the treatment dealt scientists during the political upheavals of the past decade. Often convenient targets for campaigns directed from Peking, scientists and other intellectuals who devoted too much time to their work found themselves attacked for being "white and expert," that is, lacking the proper "Red" spirit expected of revolutionaries.

We Proudly Support Tom Sloan!

Tomorrow, we shall go to the polls to cast our votes for Tom M. Sloan for City Council, Place 5. Tom has lived in Midland 42 of his 45 years and he and Mary Ann have been good, hard-working, contributing citizens. Their children were born and are growing up here, and Tom Sloan has been very active in youth work as a Scoutmaster and in many other capacities. He has served on various boards of civic organizations, and given unselfishly of his time and talent.

Tom Sloan's training, experience and ability will be of great value in planning and managing our city's business. He--like all of us--has a stake in Midland's future, and will devote the time, energy and ability necessary to help build a better Midland.

Join us tomorrow, Let's elect'Tom Sloan to our City Council!

This Big Bend Country and the

"That's my hook-up." he said.

This chap lays no claim to "formal training of any sort" on nature's wilds. His schooling has been in the fields, in reading, in doing and in getting together with folks of like interests.

Most "anything in nature" fascinates this man. "I'm probably more widely acquainted with different forms of nature . . . just because of my interests," he said.

Clearly, the Chihuahuan Desert covers, and covers well, his interests. The desert takes in much of Mexico, a sizeable chunk of West Texas and parts of New Mexico and Arizona.

Since the mid-1970s, Alpine has been the headquarters of CDRI research into the Chihuahuan Desert.

And an aim of the institute's founders has been to have a desertlike site for recording research findings in the largely-unexplored and unexploited desert. And on the same site, the founders visualized a "visitor complex," where curious people could view a mini-Chihuahuan Desert and hike over nature trails.

At long last, the institute does have a site, noted Flanders. It's a 240-acre tract on rugged and rocky ranchland five miles south of Fort Davis and just

Hal Flanders

a mile or so off Texas Highway 118 that links Fort Davis to Alpine.

The institute has an option on an additional 300 acres bordering the site on the old Weston ranch. . . Nothing is impossible to .

this gang" of wildlife and nature buffs and scientists who founded the institute earlier in the decade, said Flanders. The institute was launched on a

"shoe string," and today that's how it's operating. The "idea men" behind the institute were two Sul Ross State University biology professors, Dr. A. Michael "Mike" Powell, a botanist, and Dr. James "Jim" Scudday, a zoologist.

"I agree with Mike Powell," Flanders said of the concept of CDRI's new land site. "We want what grows naturally and properly on the site we're in."

"We're on one of the islands on the desert floor . . . in an ocean of a

desert," Flanders said. CDRI's primary purpose is to promote research of the Chihuahuan Desert. Secondly, and possibly bolstering the institute's cause, are plans for an educational outdoor museum.

Some have likened CDRI's visitor complex to the beginning of something similar to the Arizona-Sonora Desert Museum near Tucson.

'We're all more interested in the research, which feeds material to the educational" aspects of CDRI.

'We (CDRI) started at opposite ends of the spectrum," Flanders said. "They (Arizona-Sonora) started with a zoo. We started with research.'

CDRI doesn't intend to imitate the Arizona outdoor zoo, Flanders said.

"There's no intent to go out there

and outdo them in their own game. "We want to be what we can be best," Flanders said. And that is research.

However, CDRI research must have public support . . money . . . to keep its primary purpose going. And that "visitor complex" may

help win support. "In the parlance of the PR man," said Flanders, the CDRI complex is 'to give that 'gee-whiz' " effect.

That may promote CDRI, the research and the wilds. These are Flanders' interests.

Archer believes Texas will be better He said he voted against the tax off with existing legislation than increase, so would support rescission of the increase. But, he said, the question then is how to pay for Social Security. Takin g money out of the general fund is "the worst way because there is no money in the

The present Senate position, for the first time, incorporates provisions in the House bill to give the president the right "to allocate our natural gas to the Northeast.' The new Senate proposal also sets

up a complicated tier-system of pricing which will create an "administrative nightmare." For every well drilled in Texas. Archer said. there would be a ruling on whether it is new gas or old. "Old" wells would be regulated "forever." he added.

But, the congressman said, the House rejected the Senate proposal. and indications are that the Senate may not move any further toward government control. A number of senators accepted the latest proposition as a "bottom-line position," he said.

Archer said the administration's energy chief James Schlesinger told senators the House would accept the compromise, "but he didn't bother to contact the House members.'

If regulation of intrastate gas is included in an energy bill, Archer said, he is sure there will be a lawsuit which will go to the U.S. Supreme Court. "My own opinion is that it is not constitutional, but it would not be the first time my opinion was in divergence with the Supreme Court's the Soutl 1. legal opinion."

The crude oil equalization tax portion of the energy bill is not under discussion now, and Archer predicted that it will be dropped if natural gas deregulation is not covered in the bill.

That would leave utility rate reform, coal conversion and conservation elements in the energy bill. Archer said most of the differences between the Senate and House on those aspects of the energy package have been worked out.

Therefore, Archer said, he thinks Congress may pass those portions of the package, label the bill "energy" and send it to the president.

Cardinal speaks out on rights

SAO PAULO, Brazil - It is a Saturday, but as is the custom of Paulo Evaristo Arns, the cardinal archbishop of Sao Paulo is spending the morning in his office attending parishioners who have asked for au-

Students, workers, professors, housewives wait patiently. A door opens, and from the cardinal's chambers emerge a young woman and her child—the wife and daughter of a politically outspoken Brazilian military officer who disappeared one day in 1974 and has not been heard from since.

"The situation here is actually getting better." the cardinal tells his next visitor. "Three or four years ago my waiting room was always filled with relatives and friends of people who had been arrested for political reasons or who had simply disapeared without a trace." They came to the cardinal then, as others come to

him now, for one fundamental reason. In his eight years as head of the largest Roman Catholic archdiocese in the world, Dom Paulo, as the 57-year-old Franciscan is known popularly, has earned a reputation as Brazil's most untiring and effective defender of human rights

He has consistently spoken out against the torture of prisoners and is credited by many with being instrumental in forcing the replacement of an army commander here who condoned such practices. He has preached against the injustices and inequities wrought by Brazil's "economic miracle," supported lay human rights groups, and called for a return to democratic institutions.

IN RECOGNITION of these efforts. Arns as awarded an honorary doctor of human rights degree at Notre Dame University last year. Also honored in the same ceremony was Jimmy Carter. The two met then. Arns, in response to a White House invitation,

will see Carter again in Rio de Janeiro on Friday. "Carter's invitation to Arns is a symbolic gesture of great importance to Brazilians," says an opponent of the government here. "Many of us have been wondering whether Carter still cares about human rights, and there is no better way for him to show human rights still matter than to meet with the man the Brazilian people recognize as our leader in this

The fourth of 13 children of a sawmill owner from the south Brazilian state of Santa Catarina, Arns has won this public esteem by playing an activist's role. Though he possesses a doctorate from the Sorbonne, his public image is that of a man of the people who has stressed the church's mission among the poor and the powerless.

Brazil's authoritarian military government however, views the cardinal as an unwelcome thorn in its side. Earlier this month, government censors prohibited the showing of a popular television show after two episodes had been taped in which Arns read a message explaining one of the church's current projects, a campaign demanding "work and justice

Such attempts to silence Arns are nothing new. In 1973, the government suspended the license of the diocese's radio station, and even now the diocesan newspaper, O Sao Paulo, a weekly with a circulation of under 20,000, is one of only three publications in Brazil still subject to prior censorship.

"ARTICLES that are forbidden here sometimes are published elsewhere later without any problems," says the cardinal, holding up a copy of the paper to show the gaping white space where his 'Meeting With the Pastor" column was to have appeared. "It is arbitrary and senseless. Even passages from the Bible have on occasion been cen-

sored. Relations betweeen Brazil's most powerful church spokesman and the nation's military rulers have not always been so strained, though. In 1964, Arns, then a professor of theology at a seminary north of Rio, made a secial trip by jeep to minister to the army forces initiating the coup that ended civilian rule

He felt then that military rule was preferable to what he has called the "anarchy" of Joao Goulart's leftist rule. But his support soon turned to opposition.

"The main problem of the revolution today is the same as it was in the beginning," says Arns. "They believe that all power belongs to the state, that what the government giveth, the government taketh away. President Ernesto Geisel's "great defect is that he

wants to resolve everything paternalistically," Arns said. "The Brazilian people continue to be marginalized, excluded from the process of determining their own future.' THESE BITTER post-1964 experiences have left

Arns skeptical of all politicians and their promises including Jimmy Carter. "I liked Jimmy Carter's personality," he recently told a Brazilian interviewer when asked about the brief encounter. 'though in many respects I don't approve of his policies." "I have the impression that Mr. Carter's human rights policy set back rather than aided our own

struggle here. Juxtaposing it with opposition to Brazil's nuclear program was not advantageous to us, because Brazil's pride was offended, and the two subjects became linked in the public mind." Arns makes clear that he, like several other impor-

tant critics of the government, supports Geisel's stand on the nuclear reactor question, "No Brazilian will accept restrictions in the nuclear field," he says. "Twenty other nations are using nuclear energy, so why not Brazil? There's no other way out."

President Carter's espousal of human rights has also had a positive side, he hastens to add. "It used to be that anyone who talked about human rights here was called a subversive. When President Carter picked up the banner, human rights could no longer be called Communist, and the movement gained new credibility among the Brazilian people."

IN THE MEANTIME, the cardinal is meeting with leaders of the "Sao Paulo Commission for Justice and Peace," a lay group organized with church support, to find out what they would like him to tell the president and is initiating a campaign to pressure the government to improve the lot of the working class. "The high cost of living is the hot topic for us right now," he says.

To help draw attention to the subject, the diocese is underwriting a "cost of living movement" and helping circulate a petition, which it hopes a million peo-ple will sign, that calls for more equitable distribu-tion of income and an end to economic exploitation. "Somebody has to do something," says the car-

dinal in what may be the clearest statement of his-

credo. "There is a limit to what people can take."

Samantha Sang and sang until she reached 'overnight' success

By MARY CAMPBELL AP Newsfeatures Writer

Samantha Sang is her name and, if you're an American record listener, she is an overnight star.

Her first single record released in America, "Emotion," went to No. 1 on the best-selling charts of March 11 and her LP, "Emotion," also on

ENTERTAINMENT

Private Stock Records, sold enough to become a gold record in about 10 days in early March.

Of course nobody is really an overnight star. Miss Sang explains that she is 24 and has been a professional singer since she was 15. She is Australian, one-eighth Chinese. talks easily and eagerly and says that people say she has a chameleon quality. She may sing pop or heavy rock at one time and what she calls 'songs mums like" or "the Las Vegas syndrome" at another time. "Different horses for different courses." she likes to say.

And she may dress and make up for sophistication at one time and at another time appear girlish. At present her hair is cut short and straight "and getting blonder every

She's always asked if Samantha Sang is a stage name, and replies that Sang is her real name and Samantha isn't. Her name is Cheryl Sang. When she was 17 and Robert Stigwood was her manager, he thought the name she was using then. Cheryl Grey, was mundane. He liked Sang and asked whether there was a first name she particularly fancied. There was -Samantha.

One of Miss Sang's eight grandparents, her father's grandfather, Oriental appearance, if she wants it

Her parents are singers, now semiretired, in the Mel Torme and Eydie Gorme style, she says. They use stage names, Reg Grey and Joan Clarke.

She recalls her first public singing. at 8. "I went with my mother to her radio show. I was messing around at the rehearsal. The producer switched on the sound box and heard I was singing. He told me I was going to sing that afternoon on my mother's show. So I got up with a 30-piece band in the afternoon and sang 'When the Red. Red Robin Comes Bob, Bob, Bobbin' Along.

She sang a lot in Australia, won a lot of prizes. By 16, she says, "I had done everything in Australia it was possible to do. Everybody said I had to make it overseas. I went to London and was doing clubs. One night a friend from Sydney went to Barry Gibb's place for dinner and took a record of mine that had been a very big hit in Australia."

Gibb, one of the Bee Gees, didn't want to listen: records of girl singers were constantly being pushed at him. But he did listen, liked it, phoned her at 2 a.m. to tell her so. He produced her record of "Love of a Woman." which he wrote. It was a big hit in England and the rest of Europe but she says she was too young to get legal permission to work as a singer in America.

Miss Sang kept very busy, off to music festivals in Yugoslavia and Tokyo, performing in Europe and in Australia, making records for Polydor.

It was in Australia four years ago that Bill May, an American who had a daily TV show for children, saw a couple of clips from her TV special there, "Samantha Sang and Rocked the World." He saw her on top of a big motorbike, with low-cut gown and wig, with 10 dancers around, doing "I Woman." and with short hair, demure in plaid, singing "The Sounds of Christmas."

thought he'd be a good manager and he, the very next day, told her he'd

'Cheap shots, prat falls taboo in Knight's new comedy series

Copley News Service

HOLLYWOOD - TED KNIGHT, the egomaniacal Ted Baxter of The Mary Tyler Moore Show, says his new half-hour comedy for CBS-TV, to debut soon, will be pure comedy but not of the broadest kind

"I won't tolerate cheap shots or prat falls," says Knight who, in person, is a far cry from the foolish, foppish, funny newsman he played as part of the MTM company.

We're doing comedy, only because comedy is commercial. Look at your current hit shows - 'Laverne and Shirley,' 'Happy Bays.'

"We are going to try to appeal to the element that watches those shows while, at the same time, elevating its - I won't say 'taste' - I'll say 'appreciation."

Like a pilot which aired a while back, Knight's new series will find him heading an escort service.

But the series will differ from the pilot in that he'll offer other services as well so that he can get involved in more diverse situations. All hilarious, Knight hopes.

The escort service will be located in New York (though the series will be shot in Los Angeles), because that's where such services are still being operated on the up and up. Or that's Knight's opinion.

Investigating the field in Los Angeles, he said he encountered mostly "people who sound a bit shady and are reluctant to reveal what their services involve or else they furnish bodyguards and motorcycle escorts.

"However, in New York you still find the traditional escort service catering to women who don't want to go to the theater alone and that sort of thing.

"Roger Dennis, the character I'm playing, will be mixed up with celebrities, politicians and occasionally with the police. GRANT TINKER, Mary Tyler

Moore's producer husband, produced The Betty White Show and produces The Ed Asner Show, but he's not associated with Knight's new effort: though Knight says he was one of the first members of the MTM troupe to be offered a series by Tinker. 'They wanted me to continue as

Ted Baxter," Knight explains, "and I didn't want to do that. I might have gone on as Ted Baxter for another year or two on Mary,s show, but I didn't want to continue the character in a new series.' Reviewing his run with The Mary

Tyler Moore Show, Knight has only one complaint. "It spoiled me," he says. "Lworked

with such top talent. "We were such a happy family."

"Maude." if she's going to be anywhere next year, will be in Washington, D.C., with ADRIENNE BARBEAU no longer a part of her household, but with BARBARA RHOADES, previously of "Busting Loose," added to the cast.

BUD GRANT, CBS vice president, programs, entertainment division, says the network isn't yet quite sure just what it's going to do with beauteous Barbara, "But," he adds,

"you sometimes have to create a character for an actress."

Grant also emphasizes that the network isn't quite sure just what it is going to do with "Maude" - keep the series or cancel it. But, if the show is renewed, the District of Columbia will be its locale.

Final "Maude" note:

After pointing out that RUE Mc-CLANAHAN, Maude's neighbor, is moving clear out of the neighborhood - all the way over to ABC, Grant adds that CONRAD BAIN, Rue's husband on the CBS series, "probably won't be back" either.

Though SUSAN NEWMAN, Joanne Woodward's stepdaughter, is forging ahead with her own movie career, Joanne isn't giving her any advice in that connection.

"Susan doesn't need my advice." Woodward says. "She's three feet taller than I am.

The question that has been on the minds of a few million women is, What's WARREN BEATTY really Well, one Hollywood model who

claims to know him well is willing to answer that question. "He's the only man who's just as exciting anywhere in the house as in the bedroom. He likes to talk about books and politics." She added, "I don't think he even

likes women all that much ... She sounds like a reject who's turned bitter.

Don't believe all of that talk about a love affair between PHYLLIS DILLER and ROD McKUEN.

Phyllis telephoned me to tell me there was no truth to the romance that has been reported in the press. She said that they knew each other when they both worked in radio - Phyllis

They have been friends for a long time and there is nothing more to it than friendship.

There's love in the air and somewhere there's a fellow with blue eyes who's the one Angel KATE JACKSON really loves.

"He's only the second man I've ever loved," she says. The first was ED-DIE ALBERT JR But who this lucky blue-eyes is, or

even if he's in show business, she refuses to state - "for fear that would As for her recent Scott Highlands

fling ... Oh, well, he was never the man in her life, Kate asserts.

Love has turned to screams between TV talk show host PHIL DONAHUE and his steady girlfriend, actress MARLO THOMAS. Recently, in a restaurant, their

arguing became so heated that Phil walked out in mid-meal. Another argument ended with Marlo leaving him and her speeding off in their car. It's gotten so bad that friends don't

like to invite them to parties for fear their fighting will embarrass fellow

better known for his parties than his pictures, but he's a busy, busy feller.

Just got home from a trip around the world and these are some of the knickknacks he bought for souvenirs along the way: an island in the Fiji group, a tennis racket decorated with diamonds, and a one-of-a-kind \$200,000 custom Rolls-Royce.

But Carr makes up for all this spending by economizing where it counts: He always carries his own box of soap flakes and never lets hotels do his laundry

Sorry to report that PARKER STEVENSON, star of the "Hardy Boys" series, has let his success go to his head.

Parker recently threatened to walk off the show when ABC refused to double his \$5,000-a-week salary plus provide him with around-the-clock limo service. If that wasn't enough, he demanded that they build him a new dressing room.

ABC came across with his demands and Parker went back to work.

JOHN WAYNE recently learned that in politics you have no friends. When the Duke came out in support

of the President's Panama Canal treaty, he lost a lot of his former friends, including RONALD REAGAN, who told him that he will never speak to him again. Somehow I don't see big John losing

any sleep over it.

Books seem to be bothering two ladies - BARBRA STREISAND and ELIZABETH TAYLOR. Babs is upset because OMAR

SHARIF, in his new book, "The Eternal Male," spoke so frankly about their love affair that she has told friends that she doesn't want to be invited to parties if he's there.

Liz, on the other hand, has offered EDDIE FISHER \$100,000 to get a sneak preview of his book. She is worried that Eddie might write something that could hurt her husband JOHN WARNER in his bid for the U.S. Senate.

JACKIE ONASSIS is extremely upset. Her son, 18-year-old JOHN KENNEDY JR., wants to be an actor.

Allen won't be there, gang

By PETER J. BOYER

December.

HOLLYWOOD (AP)-Woody Allen stands to gain the most at next Monday's Academy Awards show, with five Oscar nominations for his party autobiographical film "Annie Hall."

But he says he want nothing to do with the affair and will not be there to collect if he wins.

However, unlike reluctant honorees of the past such as actors George C. Scott and Marlon Brando, who made their absences political statements, Allen is staying home because Hollywood's extravagant awards feast makes him nervous. 'Woody's trying desperately not to make an issue

of not coming," said "Annie Hall" producer Charles Joffe in an interview Wednesday. "He's not doing a George C. Scott or a Marlon Brando. It's just too difficult for him to hear a whole audience applaud.

ing laurels. But I'm just as disappointed as the Academy that he's not going to be there." Joffe said.

director and best screenwriter.

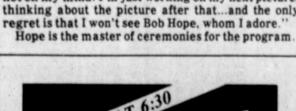

In an interview with CBS entertainment critic David Sheehan about the awards program, Allen said, "I just have a kind of negative feeling about that kind of thing.

Allen cited an Ernest Hemingway saying in which the author said if artists believe good things said about them, they have to believe the bad, as well. 'And I never believe it when they say I'm lousy, so

it's hypocritical for me to believe anybody when they say I'm great," Allen said. But Allen said he would not turn down any Oscars he might win.

"I'm just not going to be there," he said. "It's just not on my mind. I'm just working on my next picture. thinking about the picture after that...and the only

Texas American Oil Corp. announced location for a 6,150-foot project in the Sand Dunes (Cherry Canyon) field of Eddy County.

It will be drilled as No. 2-J-23 Federal one location north of production in the north side of the field and 1,980 feet from south and 1,650 feet from east lines of section 23-23s-31e and 21 miles east of Loving.

YATES WELL

Harvey E. Yates Co., Inc., of Roswell, N. M., No. 1 Gates-Federal Deep has been finaled as a Strawn gas discovery two miles southwest of the Vandagriff (Strawn gas) field in Eddy

The strike finaled for a calculated. absolute open flow potential of 946,000 cubic feet of gas per day, through perforations from 9,128 to 9,181 feet. A re-entry project, it is 660 feet from

north and east lines of section 6-17s-28e. It was deepened from 7,804 to 10,250 feet. Four and one-half-inch casing was set at 10,201 feet.

The operation was originally drilled by Tenneco Oil Co. as No. 1 Hondo-Federal.

STEPOUT FINALS Harvey E. Yates No. 3 Travis Dee

Texas belt resemble Ruhr Valley

COLLEGE STATION-Industrialization along Texas' lignite belt will rival the Ruhr Valley of Germany within the next 25 years, predicts Texas A&M University's new vice president for engineering and non-re-

newable resources. While new to the position of vice president, Fred Benson is no newcomer to Texas A&M nor is he a neophyte in projecting the future for industry in Texas.

His overall service to Texas A&M dates back to 1937 when he joined the Civil Engineering Department and began a career in which emphasis has been placed on cooperation with industry-helping it meet its current and future needs.

One of the ways Texas A&M helps industry meet its needs is through the education and overall preparation of future engineers, and that has been Benson's forte. Prior to being named vice president, he had served as Texas A&M's dean of Engineering since 1957, a period in which the university's engineering program has become the largest in the nation in enrollment and among the leaders in

Benson is convinced that the energy needs of a major segment of industry will attract it to the rich strip of lignite which is 30 to 40 miles wide and runs from San Antonio to Texarkana.

"dBy the end of this century, so much of American industry will have moved to Texas that parts of the state will be like Germany's Ruhr Valley or the midland area of England around Birmingham" he said.
The bulk of the Texas lignite—some

100 billion tons—is at depths of 200 to 500 feet, too deep to be mined economically at the present time, but about 10 billion tons is at depths in which strip mining is economical, Benson said.

"Most of the crumbly, soft coal occurs in fairly thin layers of less than 10 feet," he noted. "A five- or six-foot seam is considered very

Texas is particularly fortunate in that the major lignite deposits occur in areas which are neither especially good for farming nor covered by large rock formation which would have to beremoved, Benson added.

Also, the state is fortunate in that it does not have serious problems with acidic mine water as is the case in

strip minning in the North and East. The Texas A&M divisions which he heads include the Texas Engineering Experiment Station and the Center for Energy and Mineral Resources, both of which have major programs devoted to effective utilization of lignite, among various energy-related

projects.

One TEES project deals with underground gasification of lignite, eliminating the need for strip mining, while CEMR studies focus on other phases of lignite use, including environmental considerations in strip

Unit has been completed from the Morrow one mile northwest of a well in the Empire, South (Morrow) field of Eddy County.

On potential, the well finaled for a calculated, absolute open flow of 33,280,000 cubic feet of gas per day. through preforations from 10,973 to

Hole is bottomed at 11,270 feet and 51/2-inch casing is cemented on bot

Location is 660 feet from north and 1,980 feet from east lines of section 13-18s-28e and 16 miles southeast of Artesia.

SECOND WELL

One and one-fourth miles northeast of No. 3 Travis Deep Unit, Yates completed No. 1 Travis-Bassett-Birnie from the Morrow.

Operator reported a calculated, absolute open flow potential of 3,196,000 cubic feet of gas per day. through perforations from 10,901 to

Total depth is 11,400 feet and 51/2inch casing is set at 11,193 feet. Wellsite is 1,980 feet from south and east lines of section 7-18s-29e.

WOLFCAMP WELL

Western Oil Producers, Inc., of Roswell reported potential test for its No. 3 Union, %-mile west extension to the Maljamar, Northeast (Wolfcamp)

field of Lea County, N. M.

The extender finaled for a daily flowing potential of 330 barrels of 39.2gravity oil, through a 1/2-inch choke and perforations from 10,671 to 10,800

Bottomed at 13,700 feet, the well has 51/2-inch casing cemented at 10,950 feet, the plugged back depth.

Location is 1,980 feet from north and east lines of section 32-16s-33e and four miles northeast of Maljamar. The pool has three other Wolfcamp

Read & Stevens, Inc., of Roswell No. 1 Wainoco-State is to be dug in the Quail (Queen) area of Lea County, 14 miles northeast of Halfway.

Slated for a 5,500-foot bottom, it is 660 feet from north and 1,980 feet from east lines of section 11-19s-34e.

Mesa Petroleum Co. No. 2 Diamond Mound-Federal will be drilled as a 9.000-foot test 1/2 mile southeast of an undesignated Morrow discovery in Eddy County, N. M.

Drillsite is 1,980 feet from south and east lines of section 1-16s-27e and 17 miles northwest of Loco Hills.

WILDCAT RE-ENTRY

Flint oil & Gas, Inc., of Hobbs, N. M., No. 1 Dickenson is to be reentered and tested above 5,100 feet in Lea County, N. M., seven miles southeast of Crossroads.

The wildcat is 21/2 miles northwest of the Dickenson (San Andres oil) field and 1,980 feet from north and 660 feet from east lines of section 29-10s-

It originally was drilled by Mid-Continent Petroleum Corp. and abandoned at 12,950 feet in 1953.

Program plan starts

By DON KENDALL

WASHINGTON (AP) - The Agriculture Department has prepared instructions for state and county field offices so that they can begin enrolling farmers in new payment programs for feed grains

Officials said that local offices of the Agricultural Stabilization and Conservation Service are expected to begin signing up farmers on Monday.

The payments were part of a new farm package announced Wednesday by the Carter administration and are designed to attract more producers into the government's acreage setaside programs for feed grains and cotton this year.

DRY HOLES

CHAVES — Stevens Oil Co. No. 1-F O'Brien, in the Twin Lakes (San Andres) field. 1.650 feet from south and 330 feet from east lines of section 25-85-25e, seven miles south of Elkins, abandoned location.

COKE — Campana Petroleum Co. No. 1 Leonard, wildcat, 1.980 feet from south and 680 feet from east lines of section 310, block 2, H&TC survey, eight miles southwest of Robert Lee, td 6,340 feet.

DICKENS — Tejas Oil Operators No. 1 W. W. McArthur, wildcat, 2,087 feet from south and 2,035 feet from west lines of section 227, block 1, H&GN survey, 's mile southeast of Spur, td 7,711 feet.

FISHER — R. L. Adkins No. 1 Marchant, wildcat, 467 feet from south and 797 feet from east lines of section 2, block Y. T&P survey, four miles south of Longworth, td 5,040 feet.

5.040 feet.
Fisher-Webb. Inc. No. 1 Toland. wildcat. 2.172 feet from south and east lines of section 281, block 3, HATC survey, three miles east of the Capitola (Strawn) field and seven miles west of Longworth, td 8.280 feet.
KING.—Taubert, Steed. Guns & Medders No. 24-NA S.
B. Burnett Estate, in the Anne Tandy area, 195 feet from north and 2.182 feet from east lines of W. Pruitt survey, abstract A-283, seventeen miles southeast of Guthrie, td 5.940 feet.

abstract A-283, seventeen miles southeast of Guthrie, to 5,940 feet.

LAMB - Jed J. Miller No. 1 Hinson & Son, Inc., wildcat, 1,800 feet from north and east lines of section 54, block 2.

W. E. Halsell subdivision, 12 miles northeast of Littlefield, td 3,990 feet.

TERRY - J. C. Williamson No, 1 Watts, wildcat, 2,173 feet from north and 833 feet from west lines of section 42, block DD, J. H. Gibson curvey, two miles southeast of Reliman, td 3,458 feet.

TERRELL - Gulf Oil Corp. No. 1-C Ruth Wilson, wildcat, 1,980 feet from south and 4,620 feet from east lines of section 4, block A-4, T. Baumgarner survey, 5k miles southeast of Sheffield, td 11,235 feet.

NNG Oil Co. No. 1-8 Scott, wildcat, 690 feet from north and 4,260 feet from east lines of section 5, block 161.

WARD - American Quasar No. 1 Jennie Crockett, wildcat, 1,980 feet from northwest and southwest of section 29, block 1, W&NW survey, 10 miles north of Barstow, abandoned old well workover.

Sutton gas flows

H. B. Rhoads of Midland is installing tanks at his No. 1 Maxine Reiley, prospective Ellenburger producer in Sutton County, 24 miles northeast of Sonora.

Hole was drilled to 4,360 feet where 51/2-inch casing is set. The pipe was perforated from 4,276 to 4,282 feet and the section was washed with 250 gallons of acid. It then was swabbed two hours, recovering drilling fluid with shows of oil and making gas at the rate of 50,000 to 200,000 cubic feet per day.

The section then was treated with 2,500 gallons of acid. The project then flowed an unreported time, making a spray of oil and gas at the rate of from 350,000 to 400,000 cubic feet

No. 1 Reiley is one location southwest of the Ellenburger discovery and lone producer from that pay in the Valliant

The site is 660 feet from north and 1,980 feet from east lines of section 22, block 5, TW&NG

Projects scheduled

A wildcat and two field projects have been spotted in Irion County, and a fourth test has been staked in

Fisher-Webb, Inc., of Abilene No. 1 Tankersley will be drilled as a 7,750foot wildcat in Irion County, seven miles south of Mertzon.

Location is 775 feet from north and 6,366 feet from west lines of section 1. O. B. Robertson survey, abstract 1261. Ground elevation is 2,389 feet.

The site is 3/8 mile northeast of the one-well Crash (Canyon) field and one mile south of a 7,340-foot dry hole.

FIELD TESTS

Atlantic Richfield Co. announced location for a pair of tests in the Spraberry Trend Area of Sterling County, 11 miles north of Barnhart. No. 2-70 J. R. Sclott is 1,980 feet from south and 660 feet from west lines of section 70, block 14, H&TC

No. 4-70 J. R. Scott is 1,980 feet from south and east lines of section 70, block 14, H&TC survey. The projects will be drlled to 6,400 feet.

STERLING TRY

HNG Oil Co. of Midland No. 2-16 McEntire is to be drilled as a 7,800foot test 4,798 feet northeasst of the Credo, East (upper Cisco) field of Sterling County. It is 660feet from north and east lines of section 16, block 23, H&TC survey and 12 miles northwest of Sterling.

Uranium supply questioned

BRUSSELS - The European Common Market is worried about whether it can continue counting on the United States as its main source of enriched uranium.

The European Economic Community (EEC) has only until April 10 to accept a U.S. demand for renegotiation of a 1959 nuclear agreement between Euratom and the United States. If the EEC does not comply. Washington threatens to cut off supplies of nuclear fuel, particularly to West Germany and

figures had been released vaild for comparative in September, when the purposes. The agency

huge reserves of coal Last week the U.S. Department of

Newsday

No major industrial nation in the Western world is in a better energy position than Britain. It has 300 years of coal reserves, is fully self-sufficient in natural gas and will soon become one of the world's major exporters of oil with plenty left over for its own needs.

Cars in Britain average more than 30 miles per gallon of gasoline and the government is already prodding manufacturers to do better. And Britons have been paying as much as three times what Americans pay for gasoline

The United States, in comparison, must import 8.6 millon barrels of oil every day with disastrous effects on the foreign value of its currency and with little hope of real self-sufficiency anytime soon.

The 'U.S. government, however, requres that new cars this year average only 18.5 mpg and by the 1980s that performance is scheduled to improve to only 27.5 mpg by which time the British may be averaging 40. Meanwhile, gasoline in the United States is cheaper, far cheaper, than anywhere else in the industrial world.

If that doesn't make sense, it shouldn't. It would seem that either the British are nuts or we are. Because too often they simply do not want to understand the energy question, Americans might assume from the comparison that they are getting the better deal. Who wants to be against cheap gas

and roomy, powerful cars?

Nor, in the absence of public understanding, does Congess seem willing to take the lead. The British have had an Energy Department since 1974. We got one last year and it still doesn't have a building to call its own nor, so long as Congress dawdless, a real energy program to administer.

"The approach of the United Kingdom government may be of particular interest because of our extremely fortunate energy position," says Tony Benn, Britain's secretary of state for energy.

Yes, it is particularly interesting that a nation so recently famous for muddling through and making a mess of things in the process is in this case showing a foresight which Congress

Even if fully enacted. President Carter's energy program will not be as stringent as the one already in place in Britain. Vast public programs for insulating homes, chools and public buildings are lready under way. There have been, lenn notes, "steep increases in nergy prices since they had been, led down artificially in the public sector for a period up to 1974 in the interest of containing inflation."

And even as oil production from the North Sea approached one million barrels a day for the first time last month, the government announced new plans for diverting a huge share

eral, drilling 6,055 lime, shale. Texas Oil & Gas No. 1-J Liggett, drilling should be the state of the containing inflation. Dorchester No. 1-J Liggett, drilling should be the public Guif No. 2-GF Eddy, total depth (No. 2-GF Eddy, total depth waiting on cement. Guif No. 1-D Shearn, drillstem test 11,228-11,258, open 90 minutes, recovered 180 feet of gas-cut drilling fluid, now drilling 11,200. schools and public buildings are energy prices since they had been, held down-artificially in the public sector for a period up to 1974 in the interest of containing inflation."

North Sea approached one million barrels a day for the first time last month, the government announced new plans for diverting a huge share of oil revenues into programs for conservation of energy and development of other sources of

Such energy frugality even in the dr face of such energy plenty only makes sense. Oil prices are going nowhere but up for the rest of this century. To waste such a valuable resource. however plentiful, on home consumption would be stupid. The same can be said for the United States' oil resrves which, while they no longer make it self-sufficient, constitute a considerable national treasure now going up a lot of stacks an out of a lot of exhausts.

The other reason why British policy makes sense is that, huge as they are, theoil reserves under the North Sea will begin running out only a little while after our own do, sometime in

Great Britain boasts

Energy released new estimates that bring no comfort and make the delay in establishing an energy program seem even more idiotic. It now predicts that the world oil shortage. which the most skeptical experts concede is inevitable, will strike as early as 1981, just three years from now. The department said this would happen even if "the most vigorous and successful" energy programs are adopted by the entire rest of the

Even President Carter's energy program, which Congress is finding so hard to swallow, look insufficient when you look at the claims which its most enthusiastic supporters make

At the present rate of consumption. U.S. oil imports, now running at 8.6 million barrels a day by 1985 even with every known oil well in the 50 states pumping at a fast rate. Carter claims taht his program will reduc these imports to six or seven million gallons a day by 1985, not an awful lot less than wht they are now.
