## Lozano killed, El Paso doctor testifies

By ED TODD R-T Staff Writer

ODESSA - The death of 27-year-old Larry Lozano in an Ector County jail cell Jan. 22 was "the action of a human being killing another human being," El Paso County Medical Examiner Dr. Frederick Bornstein testified here Tuesday afternoon.

Bornstein was one of 14 witnesses called to testify before a three-man, three-woman jury in an inquest hearing presided over by Peace

Justice Virgil Lumpee.

The hearing, attended by approximately 260 people, including some uniformed Brown Beret "soldiers," was held in a crowded third floor district courtroom adjacent to the jail cell where Lozano

"All I know," Bornstein told District Attorney John Green, "is that this human being (Lozano) was killed by another human being.

'Whether this (death) was under legal or illegal circumstances is not for me to judge," Bornstein told Green, who was conducting the hearing. "The legality is out of my field." He said he had "no opinion" whether Lozano's death was accidental or intentional. "I feel that's up to a jury or a legal authority.'

## Shevchenko held, or in hiding?

UNITED NATIONS (AP) - The Soviet government accuses the CIA of holding Arkady N. Shevchenko under duress and is demanding he be handed over to it.

But the Soviet U.N. official's American lawyer says he is in voluntary seclusion near New York and will stay in hiding until he can see Secretary-General Kurt Waldheim, who is expected back from Europe this weekend.

The State Department had no comment on the Russian charge, made Tuesday in a statement by the Soviet U.N. mission. A U.S. spokesman had said earlier that "the United States in no way attempted to influence" the decision by the Russian undersecretary-general for political and Security Council affairs

not to return to the Soviet Union. The Soviet mission's statement

"Circumstances surrounding the disappearance of A. N. Shevchenko leave no doubt that he has been the victim of a premeditated provocation and that the U.S. intelligence services have been directly involved in this detestable frameup.

"It is also clear that at present he is in the hands of those services under duress and is unable to act on his own.

"In connection with this outrageous provocation, the Soviet Union has registered a strong protest with the government of the United States and demanded that Soviet citizen A. N. Shevchenko be returned to the U.S.S.R. The Soviet mission to the United Nations has been in touch on this matter with the U.N. secretary-

The State Department confirmed that the Soviet Embassy in Washington had lodged a formal protest and said Soviet Ambassador Anatoly F. Dobrynin discussed the matter with Secretary of State Cyrus R. Vance on Tuesday.

Shevchenko, the top Soviet employee of the United Nations, left his \$76,000-a-year post a week ago because of "differences with his government," a U.N. spokesman announced Monday.

Bornstein said Lozano died from "mechanical force" applied to the neck - specifically, the larynx.

This, he admitted, varies from his intial findings in which he reported Lozano died from "extensive blunt trauma" from beating, hitting and kicking.

He said his autopsy, requested by Lozano's mother to determine "whether her son had committed suicide or not," disclosed 92 visible wounds on Lozano's body. Bornstein said the mother paid him \$500 in cash for performing the autopsy.

Ector County Sheriff Elton Faught has contended that Lozano caused his own death by ramming his head against the glass window of a padded isolation cell.

Others, including the Brown Beret element of the Mexican-American community, contend that Lozano was beaten and kicked to death by sheriff's deputies after Lozano became belligerent and violent.

The last person to testify in the afternoon session was a blonde tavern worker, identified as Mary Diane Chandler Thomas, who was jailed on a hot-check charge at the time of Lozano's death.

She said she, peering through a cracked shutter of her cell, saw "five or six" deputies walk into Lozano's cell on the night of Jan. 22. She said Lozano had been screaming and pounding inside the cell.

We'll teach that Mexican son of a bitch to holler," Ms. Thomas said one deputy said, as the men were entering

She said she heard the deputies say that they had "to be careful because he (Lozano) had broken glass" in his

"All the deputies went into the cell at once, and there was a lot of scuffling, kicking and hitting sounds," said Ms. Thomas. (In a deposition taken earlier by Green, the woman, who appeared to be in her mid-20s, simply had identified herself as Diane

She said "the man (Lozano) was resisting very much.

"There were some more sounds of hitting and kicking and scuffling and handcuffs (clicking) . . .," she said. Earlier in the hearing, a sheriff's deputy had characterized the 8-foot, 200-pound Lozano as having "super-

The cell door was opened, and Lozano was pulled limp into the the narrow corridor, the woman said. Ms. Thomas said a "green" Army-type blanket was about his head.

This lonely dirt road off New Mexico State High-

way 128, 25 miles southeast of Carlsbad, leads to

the Department of Energy's proposed site for a

nuclear Waste Isolation Pilot Plant. The Energy

Department is holding public hearings in New

Mexico this week about the 60-acre site, where the

hum an strength."

"We assumed he (Lozano) was passed out or worse," she said. (Two other women were in her cell.)

The blanket was pulled aside, Ms. Thomas said, and she could view the

His face was "completely and totally bloody," she said. She said she could hear Lozano groan. And one of the five or six men knelt on Lozano, who was prone and whose hands were handcuffed behind him, she said. She said Lozano's head was "pushed" to the floor, and the man applied "a mashing-type force . . . rocking-type motion with a lot of pressure" on Lozano's back. Groans were uttered by many in the courtroom then. Later, Ms. Thomas, who was the last witness to testify Tuesday, said she actually did not see anyone hit, kick or beat Lozano.

"I did not see any beating . . .," she said. "I didn't see it . . . It sounded like that's what took place. Sounds are sometimes deceptive, and my opinion is not what counts," she said. "It's the truth..."

Lozano was booked into the Ector County jail on the night of Jan. 10 after he allegedly assaulted two deputies investigating a traffic mishap, testimony indicated.

Under examination by Green, Dr. Bornstein, whose English is accentuated by a strong German accent, said that in late January he had been contacted by Ruben Sandoval, a San Antonio lawyer retained by the Lozano family.

"Mr. Sandoval said there was some kind of genocide movement against the Mexican-Americans" in West Texas, Bornstein said.

Green, seemingly having some difficulty understanding the doctor, asked Bornstein to repeat his statement.

He did, two or three times. Green asked Bornstein what he meant by "genocide."

"That's what happened to the Jews in Germany." Bornstein explained. Green brought into evidence a Feb. 12, 1978, news article by Richard Orr

of the San Angelo Standard-Times. The article quoted Bornstein as saying that Lozano's death "resulted from extensive blunt trauma from beating, hitting, kicking and small wounds made with sharp instruments." The story quoted Born-stein as saying that the injuries "are incompatible with suicide.

Bornstein denied telling that to any reporter, although those or similar

Santa Fe on Friday.

Although O'Leary called the WIPP

a "pilot proposal," the current plan
calls for the construction of a \$370
million underground facility that
would store both low and

intermediate-level radioactive wastes as well as high-level radiation defense

waste and spent fuel rods from nuclear reactors.

O'Leary told the somber audience, which included reporters from some of the nation's largest daily newspapers and a television film crew from Cologne, Germany, that if "for any reason" tests showed that the storage of the highly radioactive fuel rods in the deep salt chambers

fuel rods in the deep salt chambers was not satisfactory, they could be (Continued on Page 2A)

Midland school teachers' salaries are so low that many teachers who are heads of households would qualify for reduced price school lunches, teacher representatives told school

board members Tuesday. In a prepared presentation, spokesmen for the Midland Educator's Association and the Midland Classroom Teacher's Association joint salary committee, asked for salary increases which would raise the salary of a teacher

with a bachelor's degree and no jexperience from \$9,752 to \$12,252. This would increase purchasing power of teachers in Midland to the

level they enjoyed in 1968, the

presentation indicated. The proposed salary schedule is 7 percent above the salary committee's request last year.

Spokesman Roy Dennis told board. members that many good teachers leave classroom jobs for administrative jobs or leave the profession entirely because of salary

"A young man cannot afford to teach if his wife is of child-bearing age," Dennis said.

The committee presented figures to the board which indicate that the percentage of the school system budget which goes for instruction payroll has decreased from 68.48 percent in 1972 to 63.47 percent in 1977.

Since 1971, spokesman Tom Mar-sden said, Midland's teacher salaries have dropped from seventh-highest in the state to 65th.

Dennis said some teachers may react to continued low salaries by

joining the "fledgling union" in

He criticized the logic of comparing Midland to other school districts' salaries: "If your neighbor beats his wife twice a week, would you feel it's not so bad if you beat your wife once a

The committee presented in-formation which indicated several area towns pay their teachers more than Midland does. Those districts include Andrews, Crane, Seminole, McCamey and Greenwood.

An overflow crowd of teachers packed the school board meeting room to hear the presentation.

Board president Johnny Warren said the school board will formulate its budget for next year by the middle

"We have not appropriated any expenses for programs, knowing we had a serious problem (in teachers' salaries) to address ourselves to," Warren said. "I can assure you that you'll be in there right at the top this

The board set a special meeting to consider a proposal for merit pay raises for teachers for 4 p.m. Tuesday in the school administration building.

## Tax time's that time to grin and bear it

What have you done for your country lately? That's a tired question that demands and deserves a tired an-

swer: paid taxes. bureaucratic decree . April 17 is the deadline for filing your income tax return. That's a quasi-pleasant switch from the 15th, which is the traditional day of reckoning.

Taxes, taxes, taxes: It's a form of tribute to the good ol' U.S. of A. And as if it weren't enough to support the government in daily taxations year 'round and via what's

witheld from the paychecks, most probably will end up paying a few more dollars come seasonal tax time. Goodly numbers already have. Many got the refund, which certainly should not be viewed as a gift. If you spend or even "save" it, you can count on taxes biting into it.

For the tribute you pay your government — to pay its expenses and to subsidize its deficits — you can give your due thanks to the generous 61st U.S. Congress. In 1913, the constitutional amendment providing for the taxation on income went into

Yes, your country needs, nay, demands, your support.

Pay tribute. Who said you had to

Outside of coughing up the cents

Ed Todd

and dollars, you might reason that the next best thing you can do for your country is to spread a little goodwill

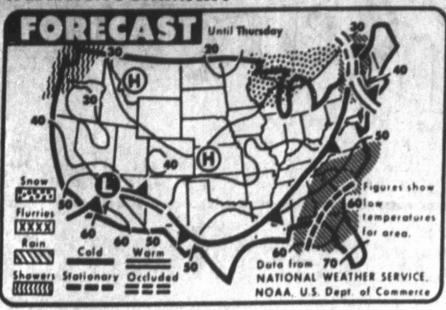

among fellow countrymen.

And how, and if, that's done probably will depend on your upbringing, mood at the moment, long-term aspirations and immediate

What's best for you may be exactly what's best for family, company, community and country. That's what you call a generalization. It's also something social critic Ayn Rand calls the virtue of selfishness.

or America. Better yet, "think

By way of IRS, the reason the filing deadline is the 17th and not the 15th is this: the latter falls on a Saturday. What's a day or two, anyway?

SUNNY SKIES and cool weather are forecast today for most of the nation. Rain is expected from the eastern Gulf to the Carolinas. Showers are forecast for the Northwest and snow is expected for the upper Great Lakes. Seasonable temperatures are expected for the Gulf and most Atlantic coast states. (AP Laserphoto Map)

#### Extended forecasts

Friday through Sunday

West Texas
It will be partly cloudy Friday through Sunday with a chance of showers mainly in the Fanhandle about Saturday. It should ture cooler Sunday. Highs will be in the 70s in the sorth to the 80s in the south, reaching the 90s in Rig Bend on Sunday. Lows will be mostly in the 40s in the sorth and mountains, the 50s in the south.

## Proposed nuclear project at Carlsbad said critical

(Continued from Page 1A)

"easily retrieved" for a period of up to 20 to 25 years.

"What we are talking about is an engineering error. Something we did not foresee happening. Right now we think it is technically and technologically feasible to leave them (the spent fuel rods) in there indefinitely," O'Leary said.

The current proposal for this "pilet project" calls for the facility to "demonstrate the permanent disposal of as many as 1,000 spent fuel assemblies discharged from commercial nuclear power plants.

Not disclosed during the official ablic information hearing was the fact that these 1,000 assemblies will weigh 500 tons.

And what happens to the containers encasing the fuel rods after 25 years?

"We can guarantee their integrity. or come as close as scientifically possible to guaranteeing their in-tegrity, for 25 years. After that the salt will leach through them and they will be part of the mine," explained DOE Office of Energy Research Director Dr. John Deutch, when pressed for details after the first public hearing session Tuesday af-ternoon. The plan calls for storing the nuclear wastes at a level 2,600 feet eneath the surface.

"If for some reason after the 25-year period we need to mine the reactor assemblies out of the salt we can. The costs will go up sharply, but we can get them out," interjected O'Leary.

"No. they can't." said Dr. Charles Hyder, a member of the Albuquerque-based Southwest Research and Information Center, who is outspokenly

against the WIPP proposal.
"After the sait eats away the containers, the rods will be lost to the earth. It will be difficult to even find them, much less pull them out," said Hyder in an interview after the second public hearing session Mon-

"You know usually in science you test a theory by doing everything you can to prove it wrong. In this case, the government is only conducting tests to prove this plan will work. They aren't looking for the holes," said Hyder, who said he has a doctorate in astro-geology from Colorado State

"If this is really a pilot project, why spend nearly \$400 million and use such lethal materials?" asked Leonel Ceniceros of Southern New Mexico Legal Services during the first public hearing session

O'Leary said that if the proposal is approved by Energy Secretary James R. Schlesinger, the DOE will ask the Nuclear Regulatory Commission to grant a license for the storage facility in the spring of 1979. He said it would take two or two and one-half years for the NRC to approve the licensing. following formal public hearings. If the site is approved in early 1981. O'Leary pledged the DOE would not build the facility without the consent

of the people of New Mexico.
Attending the public hearing session was Paul Gosselink, from the Texas Attorney General's office. Gosselink asked O'Leary if a public

hearing would be scheduled in Texas. since portions of West Texas virtually O'Leary said that "some thought would have to be given to that" and recommended that the Texas Gover-

nor write Schlesinger, asking for the Gosselink said that Texas could file motions as intervenors when the Energy Department takes its licensing case to the Nuclear Regulatory

Commission for approval. The proposal was endorsed by Carlsbad Mayor Walter Gerrells, other civic leaders and numerous

About an equal number expressed opposition to the project.

Donald Creighton of Carlsbad said that the fear of a nuclear mishap at the facility would turn the city into a virtual ghost town.

## Parents push for discipline code

By LINDA HILL

Charging that "the school environment is deteriorating" and students are subject to "threats and intimidation." a group of Midland parents Tuesday called on the school board to develop a new discipline code.

T. Verne Dwyer, spokesman for Parents for Better Discipline, called on the school board to form a committee of parents, administrators and teachers to develop a discipline code which would spell out punishment for various rule infractions.

Several school board members said the school system has a discipline code, but Dwyer said he does not believe that "fair and equal" discipline exists now in the schools. Trustee James Ramsoure ques-

'Many times we cannot regiment our students. They are not in the army ... About two-thirds of the problem

tioned the value of too many specifics

stems from what happens in the classroom ... Perhaps the other third comes from the home." Ramsoure said

Schools Superintendent Dr. James H. Mailey said corporal punishment "will always be a problem" because the difference between punishment and assualt is "in the minds of a

Garland Chapman, assistant superintendent of schools for ad-ministration, said it is difficult to write rules. "I don't know that you can write a cookbook recipe." he ad-

"Evidently what we've been doing hasn't been as effective as it needs to be ... If it takes a cookbook recipe formula, then we have to go to it,' Trustee Ann Page said.

The board agreed to consider at its next regular meeting proposals for a possible committee to examine the present code and suggest changes.

Also at Tuesday's school board

meeting, 142nd District Court Judge Perry D. Pickett administered the oath of office to newly elected Trustee Marshall McCrea and to Warren, who was re-elected April 1.

The board held two executive sessions during the meeting on property acquisition and personnel

Nine changes in assignment of principals were approved by the board. Mailey said the changes were the first "in some while" and were designed to spur the principals "to greater ef-

Sinilar changes are planned for next year, he said.

James R. Cox will move from San Jacinto Junior High School to Goddard Junior High School, and Clifford L. Bailey will move from Goddard to Alamo Junior High School. Jack Stone is to move from Alamo to San Jacinto.

Among elementary schools, Wilburn Buttery is moving from Fannin Elementary School to Crockett Elementary School, and Bob Watkins is moving from Crockett to Fannin. Houston Elementary School Principal Joe Cummins is to move to Emerson Elementary School, and Emerson Principal Wayne Harris is to move to Houston. Milam Elementary School Principal Jack Francis and West Elementary School Principal JoAnn Riggs also are to exchange schools.

All of the changes will be effective next fall.

In other action, the board accepted a bid for fertilizer from M. L. Lewis Distributors for \$12,262. The fertilizer contract was put out for bid jointly with the city of Midland and Midland County.

A contract for \$10,525 in bathroom towels and tissue was awarded to Pollack Paper of Midland.

The board also accepted bids on a variety of caferteria cleaning sup-

## Lozano killed, physician testifies

(Continued from Page 1A)

in the discipline code.

comments were in his autopsy report. Green questioned Bornstein extensively about that, as well has his convervations with Sandoval, whom Bornstein said misled him.

"I think if I start trying to put in all the input from all sides I am going to get totalled confused," Bornstein

Bornstein charged Green with "misleading me" in his line of questioning. At that time, applause and cheers broke out in the crowded courtroom. Green turned to the spectators - both seated and those standing packed against the courtroom's walls.

Green told the spectators to "keep your mouths shut" unless they think they could "do any better" in examining the witness.

Many in the crowd retorted with "Ahhhs" in unison.

In further testimony, Bornstein said his autopsy was conducted after Lozano had been embalmed, and "embalming destroys evidence." (The initial autopsy was conducted by Dr. Kris Challipalli of Odessa. That probe indicated Lozano died of a cerebral hemorrhage from at least one sharp blow to the back of the head.)

Bornstein said Lozano suffered "some damage inside the abdomen and inside the brain" sometime prior 'He (Lozano) did not die im-

mediately, because there wouldn't have been bleeding" in the larynx. which was swollen, he said "This man died by mechanical

force applied by somebody or somebodies," Bornstein said. Bornstein conceded that his latest

finding was in contrast with his intial report that Lozano died "from extensive blunt trauma. "Injury to the neck is the fatal injury," said Bornstein, who said he has

conducted 13,000 autopsies in his 44 years as a physician. Between 2,000 and 3,000 of those examinations were in his role as a county medical examiner, he said.

The first of an expected 40-odd witnesses to be interrogated by Green was Ector County Deputy Sheriff Lee Roy Murphy.

Murphy said he and fellow deputy Eugene Kloss were dispatched to 10th Street and Avenue L shortly after 10 p.m. on Jan. 10. He said a pickup truck, driven by a man later indentified as Larry Lozano, had left the road, entered a ditch and then hit a barbed-wire fence bordering a pasture.

Murphy said he asked Lozano for his driver's license.

"Not until I see yours first," he said Lozano replied.

Murphy said he again requested the license

"Again he repeated, 'Not until I see yours first," Murphy said. The deputy he and Kloss placed the man under arrest for not displaying his driver's license.

Murphy said he and Kloss walked Lozano to their patrol car to search and handcuff the man. Right then was where I got hit,

after searching (Lozano) and getting ready to put on the handcuffs,

Murphy said. Then, the "scuffle" started, Murphy said. "I never did strike him, as I recall," he said.

bed-wire fence, said Murphy, and he and Kloss wrestled with him there. Murphy said Kloss hit Lozano on the

Lozano "stumbled" over the bar-

forehead with a flashlight. The scuffle continued. Moments later, a man identified as

Robert Lovingood drove up, and helped the two deputies hold Lozano down and handcuff him, Murphy said. "I've been in brawls before." Murphy said. "but none like that." Kloss' testimony paralleled Mur-

"The man (Lozano) had superhuman strength," Kloss said. "There was no way two men could handle

Lovingood, an oilfield roughneck, testified that after he arrived at the scuffle, he asked Murphy if "he needed some help. Lovingood said Lozano kicked him

"After he kicked the hell out of me. I helped them (the deputies)," he said. Lovingood described Lozano as a man of "above-average strength."

Sheriff's deputies Dee Johns and Darry Davis, radioed to the scene by Kloss, testified that they carried Lozano to jail for booking in a car outfitted with a wire barrier between the front and back seas.

"He (Lozano) was very polite and cooperative all the way to the jail," Johns responded to questioning by Green. Johns said he asked Lozano why he got in the scuffle with the officers. He said Lozano said he "just didn't like to be handcuffed.'

Once up in jail and while being booked, Lozano was freed of the handcuffs, Johns said. Lozano removed his belt.

"He (Lozano) slapped his belt down and said, 'I'm not going to hang my. . . self" and "hopped onto"

Johns, the deputy said. Green put into evidence color photographs of the injured deputies, who said they were assaulted by Lozano. Later, Green presented color photographs of Lozano. Some were taken just after his arrest and after his death about 12 days later.

"The first thing I knew," Johns recalled of the attack, "we were tied up in a knot on the floor." He said five deputies were needed to "restrain"

In his testimony, Davis said he hit Lozano "several times" after Lozano had "lunged" at his partner.

Lozano and the deputies were treated for their injuries at Medical Center Hospital in Odessa Ector County jail inmate Ted Able testified that Lozano was disturbing

yelling but that Lozano was not mistreated by the deputies. The inmate said he was booked into jail on Jan. 15, five days after Lozano

fellow prisoners with his kicking and

had been jailed. "He (Lozano) looked like he had been in a pretty good fight. His eyes were swollen ... He had stitches on his head," Able said. "Otherwise, he

looked all right." The inmate said Lozano initially was placed in a tank cell with other

"He (Lozano) was falling off his (top) bunk, pretending he was crying, laughing ... kicking the wall.' "He would fall out of his bunk and

play like he was dead," Able said. The inmate said he "never did see" violence in the jail. He said inmates are treated im-

partially. "You're on an equal basis," he said. "You're in jail, you're in jail. No

special treatment. But after Lozano was placed in the padded cell for distrubing other prisoners. Able said, he did hear the sounds of someone beating on the door."

Able called an "habitual liar" a fellow inmate, named "Buddy," who reportedly told newspaperman Orr that he had seen deputies kick and beat Lozano. "(Buddy) ... was, in my opinion, a

sensationalist," Able told Green. Green, who called Orr "a writer, a so-called writer," said "that's (erroneous information) what happens when a sensationalist meets a sensa-

tionalist journalist.' Green called Buddy a "half con

"He's not a half con man." Able said. "He's all con man." Among others called to the witness

stand Tuesday afternoon were Department of Public Safety Trooper Richard Andrews; Dr. Robert Rountree, a physician who had examined Lozano at the jail; John Fenner, record keeper at the Permian Basin Community Centers for Mental Health and Mental Retardation, and Angeline Gourley, who's in charge of records at Medical Center Hospital.

In addition, Green read portions of despositions made by Robert Dominey Jr., a 20-year-old Odessa man who said he witnessed the scuffle between Lozano and deputies Murphy and Kloss, and former county jail inmate Rocke Flannigan who indicated that "Jackie (Perkins), the jailer, was nice to him (Lozano)."

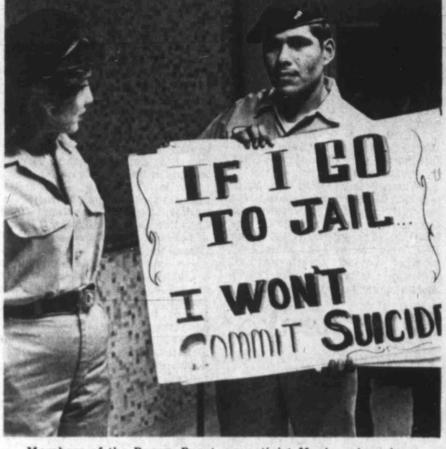

Testimony was to resume at 9 a.m.

To appear before the hearing inquest jury include Dr. Kris Challapalli, who performed the first autopsy on Lozano; Dr. Johseph Jachimezyk, Houston pathologist who examined findings of the two Lozano autopsies; Orr, who may be asked to divulge names of his news sources; ailers and peace officers, including Ector County sheriff's deputies.

Following Bornstein's testimony. the jurors walked into the jail to view Lozano's "death cell."

There, on the cell floor, was the shattered one-inch thick glass Lozano may have broken with a 10-inch brass ring once about the flush excrement hole in the cell.

The ring was still missing, a witness

#### Pecos council upholds firing

PECOS - An investigating committee Tuesday upheld the dismissal of a Pecos policeman by the former chief, and a new police chief here has been named.

Former Police Chief Charles Smith dismissed officer Bill Davenport in December 1977. Davenport said he felt he had been fired unjustly and was granted a hearing before the Pecos City Council. In the meantime, Davenport was placed on inactive status and Smith resigned his position to run for a place on the Pecos City Council. He was unsuccessful in the

Tuesday, the investigating committee announced that Smith had not abused his authority in dismissing Davenport. The committee also recommended that Davenport not be

During a special meeting of the City Council Monday night, Council members announced that Don Allen Carlisle had been hired as new police chief for the Pecos City Police Department. He was hired at a salary ef \$1,300 per month.

Editors Tuesday, Carter stopped just short of flatly saying he would veto. tuition credit legislation.

"My present intention would be to veto any bill that was costly and which was unconstitutional." he said. 'All of the proposals I have seen in the Congress so far are both costly and unconstitutional, especially as they apply to elementary and

secondary schools. Carter said he doesn't favor tuition tax credits "under any circumstances, even at a very slight level," adding that the credits would increase in time and that they are detrimental to education, channeling aid to families less in need of it.

#### Firemen tackle 3 motel fires

IA

17

23

Fires in three motel rooms early Tuesday kept firemen busy. At about 2 a.m., the Kingsway Motel in the 3800 block of West Wall Avenue reported a room on fire.

Fire Marshal James Roberts said Tuesday that when firemen arrived at the Kingsway Motel, they found two rooms on fire. In all three fires, the beds were

burning. Roberts said the room at the

Sheraton had been rented prior to the fire. Cause of the fire was a cigarette left on the bed, he said. "The cigarette smoldered for several hours before flaming up."

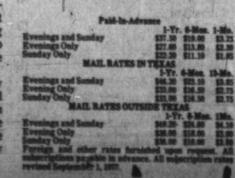

Roberts said. The room suffered heavy smoke damage, he said. The two fires at the Kingsway Motel were confined to the beds. Roberts said. One of the rooms had been

rented; the other had not. "We don't know whether the fires were set on purpose or accidentally. They were confined just to the beds. although there was some smoke

"There is nothing to indicate that the fire at the Sheraton is connected to the fires at Kingsway. But the two fires at Kingsway probably are connected," Roberts said.

## Uranium boom brings Canadian town smell of cash, crime, fear

By DAVID GERSOVITZ

ELLIOT LAKE, Ont. (AP) - A boom town in the 50s, a bust in the 60s, Elliot Lake is once again basking in uranium prosperity. Some citizens worry it won't last. Others worry it'll last too long.

"There's a smell of money in the air," one citizen says happily. But there's also uneasiness, among miners especially, about greater hazards that expanded mining may bring - increased radiation, for one

The three hotels in town are usually booked full, as are all the rental car services. Most of the visitors are consultants, contractors, engineers and skilled tradesmen associated with the boom brought on by expanded uranium mining

Elliot Lake - with its modern homes, wide, clean streets, hospital, theater, community center and recreation facilities - is an oasis of prosperity in a troubled part of Ontario. Just 100 miles to the east, at Sudbury, 4,000 nickel miners are being laid off and other resourcebased industries in the rolling hills north of Lake Huron have fallen on hard times.

But uranium prosperity has its complications.

Radioactive waste from the mines has increased five-fold, and environmentalists warn that things could get worse. Miners worry about radon gas — a radioactive, cancercausing element — and silica dust in the mines. Housing is short, rents are soaring, crime is going up and traffic's getting worse.

And finally, people worry that the money will dry up again.

Elliot Lake was founded in the 1950s, when the United States discovered it needed \$1 billion of Canadian uranium to expand its nuclear arsenal. But affluence lasted barely five years. In 1960, the market for uranium began to sour and the population dropped to 6.000 from

In 1973, the Arab oil embargo led to an increasing demand for uranium oxide. In five years, the price of uranium has gone from \$6 to \$40 a pound, and Rio Algom Ltd. and Denison Mines Ltd., who own the

into the next century

About 300 men worked the mines at Denison in 1975. Now there are nearly 1,000. By the time expansion is complete, the figure may be 3,000. Rio Algom will double its 1,200-man work force by 1980 and Preston Mines Ltd., a Rio Algom subsidiary, will create 1,000 jobs by reviving its Stanleigh operation, dormant since the 1960s. Another 1,000 men work on the ex-

pansion and housing.
All of which makes Elliot Lake a magnet. The population is 12,000 and government projections say it may reach 30,000 by the 1980s.

"People are coming in every week to set up dental clinics, jeans shops, pizza parlors, taverns, restaurants,' says Don McKay, manager of a local real estate office.

The mining firms recruit across Canada for experienced miners. attracting them with subsidized housing. The mines own houses and apartments and are building hundreds more to rent to employees at bargain prices.

But newcomers who don't work for the mines must fight for the few vacant apartments with rents that start at \$200 for a basement flat. Single-family houses, which went begging during the black years, now go for three or four times their original value.

Some families live in trailers. hoping the housing supply will catch up with demand, and there are people who say they know of 10 men sharing a basement.

While the companies have built about 700 subsidized units in a new subdivision, the province won't let people move in until each unit passes a special test for radon gas, minute quantities of which were found seeping into basements. The companies are installing special ventilation to reduce the hazard.

With the boom, too, thefts and burglaries have soared. But the town's 13-man police force can't grow fast enough to keep up with the crime rate because Chief Nick Cooke has trouble finding housing for new of-

'This town is full of transients.

ment. "They get out of stir, they hear there is some work at Elliot Lake. so they come here and rip off some of the

contractors and rip off some houses." But the biggest problems, most agree, are side effects of the uranium. Homer Seguin, staff representative of the United Steelworkers of America. thinks residents will be paying a price for prosperity long after the ore runs

Seguin contends that 20 years of mining uranium have already caused serious damage to the environment. He also accuses the companies of ignoring safety and environmental standards to cut costs and boost production. And he says environmental considerations are taking a back seat to mining company needs in government plans.

Company spokesmen say they are doing everything possible to reduce radioactivity and protect the environment and that pollution has been reduced to a minimum. But Seguin wants all pollution eliminated

'For example, there's radium in my drinking water at home." he says. "Now they say it's within provincial standards, and I guess it is, but it's pollution, it's cumulative.

But Mike Quinn, who heads a group sent by Canada's Atomic Energy Control Board to assess the hazards, puts it this way: "You have to consider what is practical. We know we can't get the radon level down to zero... every part of this region has radon, some in lower amounts some in higher amounts. So the question is, where is the trade-off point? As far as I'm concerned, we haven't reached the point with the people of Elliot Lake where we are trading off their

One Elliot Lake resident who knows the problems first hand is Gus Frobel. who worked in the mines 20 years ago and lost a lung to cancer.

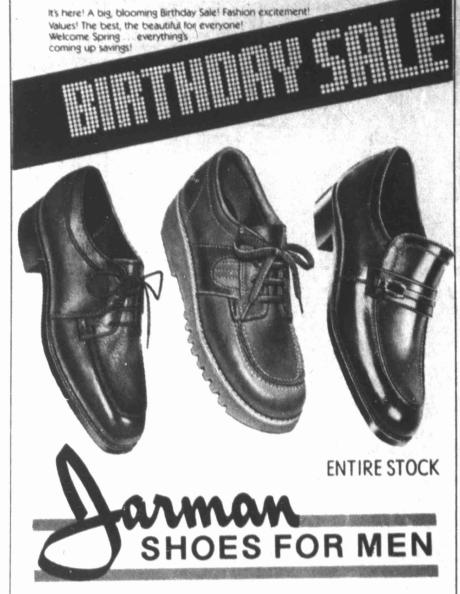

"I was a hidden victim," says Frobel, 53. "When a policeman dies it makes headlines, but when a uranium miner dies nobody cares.

A 1976 report by an Ontario royal commission into mining health and safety found 8.9 percent of Elliot Lake miners surveyed had silicosis or symptoms of it.

The commission estimated the number of lung-cancer cases from 1955 to 1974 at 36, more than twice the average for the country. James Ham, the report's author, said his estimate

was conservative. Is it all worth it? Mayor Roger Taylor worries a little - "It's in the back of my mind" - that the boom could disintegrate as it did before. But overall, he says, the mining is a plus.

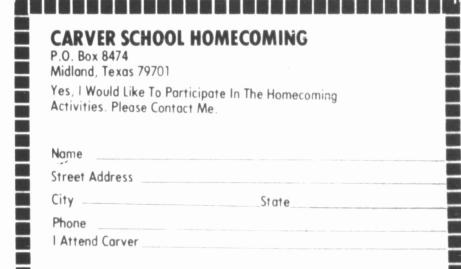

"The whole of the country is in a terrible state," he says. "If you say we're not going to get the ore out as long as there is any pollution, you might as well say that Canada as a nation is finished.

## A new approach

again is pushing national health insurance, but this time the Massachusetts lawmaker is saying something new.

Instead of arguing for a national health insurance plan by which the government would foot everyone's medical bills, at'a cost of more than \$100 billion anually, he now proposes a plan in which private insurers would play a significant financial role. Sen. Kennedy, however, has not specified how significant that role would be, which gives cause for concern. But it is important that he concedes that private insurers have a vital part to play. This most certainly is something different for the Massachusetts Democrat.

His new position suggests closer agreement between the Democratic leadership on Capitol Hill and the White House, which could produce a rational national health insurance law with a greater chance of passage than the more extreme Kennedy proposals of the past.

President Carter himself has correctly opposed the idea of complete government financing of health care for all Americans. Opposition to total government financing certainly is well-based. It would require higher taxes. increased federal borrowing, or both; inflation would be aggravated.

Moreover, because the government would be paying the bill, it inevitably would exercise

> The argument for national health insurance rests on the need to bring quality medical care within pocketbook reach of most

Such a plan should limit the government to a modest role - a very modest role - to paying, for example, only the insurance premiums of the most impoverished Americans.

It should provide Americans with a choice among insurance plans - including the choice of not subscribing to any plan. It should provide incentives for the health-care industry to spend less money. At the same time, it should not apply controls on the industry which would diminish the quality of medical care now available

In early May, Mr. Carter is expected to announce the principles underlying his own health insurance plan, which, we trust, will be similar to those enumerated here

Thanks to Sen. Kennedy's cellent opportunity to enact a landmark health program which could be one of the more enduring monuments to his administration.

General Accounting Office to rule on the legality of the proposed order. which would vest Schlesinger with broad new powers to accelerate plant construction.

Nuclear showdown in the making

WASHINGTON MERRY-GO-ROUND

In a letter to the GAO, the congressman said the order "appears to authorize the Secretary to exercise functions on his own initiative that are properly those of an independent regulatory agency, namely the Nuclear Regulatory Commission.

Dingell has also written a separate. confidential letter to Schlesinger. suggesting that he is trying to usurp authority "This draft-order is a clear example of the Department of Energy overreaching or bootstrapping." Dingell wrote.

As evidence of the power grab, the congressman noted that the proposed order would give Schlesinger "primary responsibility for setting target dates for such review in connection with the siting licensing. construction or operation of all other energy facilities."

Under the plan. Schlesinger would have the power to approve or veto any type of energy plant requiring a federal permit. Dingell pointedly suggested that the energy secretary junk the draft order as a "bad idea."

PAPERWORK WORKER:

Washington officials often use their government jobs as training grounds for lucrative private practices. The latest example is Warren Buhler, a young man who headed the Federal Commission on Paperwork.

#### remain the same. **NICK THIMMESCH** Carter's errant agony over neutron bomb decision

WASHINGTON - President Carter's agonized decision to delay production of the neutron bomb that device advertised to make nuclear war a bit more civilized dramatizes how personal conviction can conflict with the realities of world

Can Jimmy Carter, the Georgia

Baptist who became President, rely on his own morality to make a decision affecting the strategic East-West balance, when the other side, the Soviet Union, always makes such decisions amorally? The answer, unfortunately, is no. In struggling with his conscience.

the President suspended his earlier announced decision to produce and deploy the innovative, defensive, weapon, and thus caused damage in several critical areas. The first is Western Europe where

ban-the-bomb has been a fervent cry for decades, and where government leaders must use every last political skill to work for European security and stay in office at the same time.

It's no fun for West German Chancellor Helmut Schmidt to follow Carter's urging and build gradual support for the bomb when his party's left-wing opposes it, only to have Carter change positions and make Schmidt look foolish. Today, any European leader risks enormous political damage by suggesting that the Americans might be correct in asking for deployment of the neutron bomb in the European NATO arsenal.

The Soviets get the best of it in the West when it comes to issues like this one. Moscow can, through the European Communist parties, inspire huge propaganda demonstrations against the "evil" bomb by students and other activists. These same demonstrators would never think of marching against the Soviet Union for its huge

Nick Thim mesch

programs of building conventional military superiority over the West.

The Soviet leaders can chuckle over their advantage in being able to ex-Western "conscience" while they develop their own weapons to a fare-thee-well. For this reason, Carter's decisions make him only weaker in the Kremlin's estimate.

Only recently, on his African trip, Carter was expressing great tolerance for the revolutionary guerrilla forces supplied and advised by the Soviets and Cubans while fretting about the Soviet-Cuban presence in Africa. What a softy, the Soviets must be saying.

Carter's flip-flop on the neutron bomb must also dismay the senior officials in his government who had helped develop the policy for production and deployment of the weapon.

It certainly exasperates those Congressional leaders who successfully fought for Carter last summer in getting Congress to pass, by a healthy margin, an authorization bill for developing and producing the neutron bomb.

Finally, Carter's decision to be indecisive hurts him politically (Republican leaders jumped all over him), and ultimately with voters because it gives credence to the accusation that Carter is a waffler, There's no question that Mr. Carter,

round to backing its production and deployment in order to reduce the Soviet threat. It can still be argued that Western leaders might use the neutron bomb sooner than they would the big stuff, and thereby increase the risk of nuclear war.

Anyway, Carter first decided for the neutron bomb, and now he decides to held off. He says that he hopes the Soviets will show similar restraint,

like any thoughtful person, is aghast supposedly next week when Secretary with the potential horrors of nuclear of State Cyrus Vance goes to Moscow for SALT talks. There is reason to conclude that Mr. Carter is being naive.

> The President might be further shaken if Congress, in effect, ram med the neutron bomb down his throat by voting more money for its development and production this session. The votes are there to do this.

> Sen. Henry M. Jackson (D-Wash.) believes Carter is an incredible bungler on the neutron issue. Sen. Sam Nunn (D-Ga.), representing Jimmy Carter's Georgia, is kinder in his characterization, but is dead-set against the President's decision. Sens. Howard Baker (R-Tenn.), Pat Moynihan (D-N.Y.), and Dewey Bartlett (R-Okla.) will combine in an effort to get the President to go back to his original decision.

> Let's hope that President Carter is only nominally vulnerable to the affliction all Presidents suffer from. namely, being substantially influenced by the last person he talks with on an issue. Let's hope that it wasn't Andy Young who worked over Carter's conscience on this one.

## Retirement home important step

By CONNIE GRZELKA

NEW YORK (AP) - Choosing a retirement home is one of the most important decisions a couple can make, says an expert in the field.

A happy retirement isn't something that just happens. If you want to make a go of it, you've got to plan. And if you don't have a plan by the time you're 45, it may be too late, according to Peter A Dickinson, a former special investigator for the U.S. Senate Committee on Aging.

A couple should first know what they want to do and how much it will cost, he explains. In most instances, they will find that they can't afford the same things they had before retirement.

Dickinson, 51, of Larchmont, N.Y., is the editor of "The Retirement Letter." He recently published "Sunbelt Retirement," a state-by-state guide to retiring in the Southern and Western parts of the United States.

He calls the sunbelt area "the new frontier - for people, places, politics and retirement. Whether you're looking for lower cost-of-living, opportunities, climate or better housing, you can find it more readily down there.'

Regardless of the area, Dickinson offers some tips for couples who are looking ahead to retirement.

On housing, he recommends this approach: Try to pinpoint the area you'd like to settle in;

\$24.99 5-ft. stepladder ..

\$28.99 6-ft. stepladder.

state capital; write to the chamber of commerce; subscribe to the local paper; vacation there; rent a home in your preferred community before buying

To size up a community, he suggests investigating these areas: Climate and environment; health facilities; housing costs and availability; cost of living; leisure time activities; special services for senior citizens.

Dickinson emphasizes the importance of renting a home in a new community first: "Don't buy before you try. Swap your own house, rent it out, but don't sell and move right off.

"A house," he continues, "is as personal as your dreams and as practical as your pocketbook. It should satisfy both before you commit yourself.'

If you decide to move to another area, Dickinson recommends selling some of your furniture to help cut down moving costs. "If the furniture is ordinary, have a tag sale. If there are any suspected

> plumbing- heating air conditioning

694-8871

write to the state departments of aging located in the heirlooms, have the items appraised." he advises. Dickinson also provides a checklist of economic considerations. "For a comfortable rtirement, you need an income of about \$10,000, depending on the area, and a nest egg of about the same amount. Most of your major obligations should be paid off, such as mortgages. Plus, you need some study in advance, so you'll know what to expect."

Although he concedes that emotional adjustments will have to be made. Dickinson asserts "I've found that you won't miss the folks at home as much as you

think you will."

popular" and he predicted that it will spread to other long-distance routes "in the nerest future." Passenger comfort has always been more of a consideration on Aeroflot's international flights. There are fewer seats and the food is of a higher quality. But international flights make up only a small fraction of Aeroflot's business. Of the 100 million passengers carried in 1976, only 2 million were on international flights. Once renowned for its uncertain schedules.

Aeroflot apparently is improving on this score, too. It there are statistics on such things, Aeroflot is not about to release them, but Westerners with considerable Aeroflot experience say that long delays seem less frequent now than they did three or four years ago. This reporter has arrived no more than 30 minutes behind scheduled on any of 15 scheduled flights within the Soviet Union. WHILE IMPROVING, Aeroflot still has a long

way to go if it aspires to Western levels of service. Frequently passengers are still treated as an inconvenience. A recent flight from Tyumen to Surgut in western Siberia seemed to reflect the general attitude. The stewardess would not allow the passengers to get off the airplane in Surgut until after the pilot and copilot had shut down the aircraft, donned their coats, paraded down the aisle past their When a special effort is made to please foreign

obedient charges and exited ahead of them. pasengers, the result can be surprising. Not long ago a large number of Americans were on board a flight from Moscow to Volgograd and the stewardess, trying to accomodate the guests by making flight announcements in English as well as Russian, made a slight error as the plane descended for the landing in Volgograd.

"Dear passengers," she said in halting English, "your aircraft is going down."

Aeroflot's fleet of planes is enormous and relatively modern. Officials will not reveal exact figures, but there are enough aircraft to handle up to 4,000 scheduled flights daily. And that does not count local air service connecting small administative centers with about 3,500 towns, villages and collective farms.

Aeroflot has introduced new, more modern airplanes on 140 routes in the last two years, according to Hrabrov. Last year it finally put its oftdelayed supersonic transport - the TU-144 - into once-weekly service between Moscow and Alma Ata, capital of Soviet Kazakhstan. Hrabrov said that more TU-144 flights will be added, possibly this sum-

ALSO LAST FALL, Aeroflot began test flights of its first wide-bodied jet - the IL-86 Aerobus, which is capable of carrying 350 passengers. It is expected to lighten the load in our major airports, reduce the intensiveness of air traffic in their areas and lower noise levels" once it begins regular service by next year, Hrabrov said. While Aeroflot's fleet of planes appears outwardly

to stack up relatively favorably with those of Western airlines, both the decor and the accessories on the inside tend to be dingy and unkempt.

The floor of one of the toilets on board Aeroflot flight 659 from Moscow to Tashkent was so dirty one day recently that the soles of a passenger's shoes stuck to it. There were no paper towels and no toilet paper - only one well used community towel.

Aeroflot's seats are flimsier and less comfortable than those on Western commercial airliners. The seat cushions usually have large, permanent indentations from having accommodated more oversize

bottoms than they were built to handle. Flimsy seats are one way Aeroflot manages to squeeze in far more passengers than its Western counterparts. An experienced European airline of-ficial based in Moscow estimated that Aeroflot installs up to 25 percent more seats on some of its planes than are found on equivalent Western air-

One reason for Aeroflot's relative inattention to creature comforts may be that its administrators have a lot more than passengers to worry about. Unlike Western commercial airlines, Aeroflot does everything from building airports to disinfecting crops. "Today the development of the economy is impossible without Aerofiot." Hrabroy said.

## Mayor says he'll empty 'trash'

HOUSTON (AP) - Mayor Jim Mc-Conn says there is "trash" in the Houston Police Department "and we've got to get rid of it.'

'We are going to clean the department out from our own end as far as we can by demanding resignations and by firing people," McConn said Tuesday at a press briefing in wake of the FBI arrest of Assistant Police Chief Carrol M. Lynn.

Lynn, a former police chief and the highest ranking Houston police official ever to be accused in federal court, was free on a \$50,000 bond on charges of obstruction of justice in an alleged extortion plot.

Lynn, 45, was charged Monday with asking for \$45,000 to stop prosecution of John Vincent Holden, a one-time Houston oilman, charged with viola-

Police reports said a man knocked

on Arnold's front door about 7 a.m. and got Arnold to open the door by saying he had a package to deliver. The man produced a pistol, reports showed, and forced Arnold into the house, saying he was going to kill him.

A house guest drew a gun, investigators said, and the intruder fled after firing a shot. No one was hit. Arnold refused to discuss the incident Tuesday night and referred all

questions to the U.S. attorney's of-

Meanwhile, U. S. Attorney C. A. "Tony" Canales said Tuesday Lynn knew in January the federal government was investigating his alleged solicitation of a bribe.

He said Lynn was called before a grand jury in late January to testify about his alleged involvement in the

Canales said he reasoned that since the jury did not indict Lynn, the former police chief "must have thought the heat was off."

In his strongly worded comments about a "clean-up" of the police department, McConn said, "We are trying our damnest to make this a good police department."

He predicted more action on police 1960s have involved civilian review board officers but he said he knew of no Just a few hours before patrolmen or low-ranking from minority and liberal specific internal investigations going officers and charges of sections of the com-

"We still have outstanding officers," he said. "And there is a handful, quite candidly, that are not outstanding. They will either toe the Harry Caldwell told a service law in the early the idea. Several years line or the attempt will be made to get 1950s and the abolition of ago the department set them out of the department.

"I don's like to use the word 'purge but I think it is time we realized that our police department has some problems— we've got to get rid of the trash in there, and there is some trash, obviously."

McConn said his remarks were not directed on Lynn because the courts must make the determination whether he is guilty or innocent.

In an affidavit filed by the FBI before U.S. Magistrate H. Lingo Platter, Lynn was accused of telling Holden and his attorney, Gerald Birnberg, that he could arrange to have the charges dismissed with a payment to Leonel Castillo, a former Houston city controller and now the U. S. Commissioner of Immigration and Naturalization.

The FBI affidavit quoted Lynn as saying tht Castillo could pressure Canales to stop the investigation. An FBI spokesman said there is no

evidence that Castillo or Canales were involved in the alleged scheme. From his Washington office. that when reform oc-Castillo branded the claims as

curred it came from "bizarre...preposterous." within the police He said he registered "mostly surgoing to police the police department, among prise and dismay" upon hearing of Lynn's accusations. "It's even more bizarre in the fact

(Holden) and haven't had any contact with Carroll Lynn since 1974,'

Castillo said. Castillo said he had heard of the "super-scam" from a female employee in Birnberg's office.

"I immediately called Tony (Canales) and told him what I had heard and he said he would get right on it," Castillo said. "The whole story is riddled with inconsistencies. It's total fabrication.'

Confronted with Lynn's accusation that Canales "owed Castillo a political favor in regard to Canales' appointment to the U.S. attorney's post," Castillo said, "Sen. Lloyd Bentsen made that decision and only Lloyd Bentsen.

'And I can think of 50 more people who have more influence with the senator than I do," he said. "It's safe to say that Tony has more influence with Senator Bentsen than I do.'

A Bentsen aide said the senator, after seeing newspaper reports out of Houston, stated: "It's a lie."

Castillo also laughingly denied Lynn's affidavit which mentioned "hit men" on the payrolls of both Castillo and Canales.

'We have a few people who are chunky, but no one who is armed or carries any weapon," he said.

Police Chief Harry Caldwell has suspended Lynn and two of his assistants, Sgts. C. A. Hightower and D. D. Baker, until the investigation is completed.

In another strange twist to the case, Birnberg was shot in the hand as he entered his home the night of April 3. Police said four shots were fired at the attorney.

M. Donovan, a Houston police homicide detective, said investigation of the shooting has been turned over to federal authorities. He said police involvement in the case ended because Birnberg refused to answer certain questions without first talking to federal officers.

Meanwhile, Caldwell, in a videotaped message to all police patrol officers, Tuesday urged them to "hang in there and keep your heads up. You have nothing to be ashamed of."

David Sheetz, president of the Houston Police Officers Association who appeared with Caldwell, said the recording was made because police morale is low. He said officers had not had time to

recover from the shock of recent news involving police and U. S. Justice Department investigations of cases involving police officers.

"I'm convinced we have reached the top of the mountain." Caldwell said in the recording. "What I want you to do is continue to hold your heads up high and be proud. We are hacking our way out of this jungle. I know it's hard and difficult. It's going to be a rough period of time.

By LINDA HILL

Midland County commissioners Monday agreed to inquire about the possibility of the city giving the county the Circle Drive Fire Station once it no longer is needed as a fire station.

The City Council has committed the fire station, scheduled to be closed when a new central station is built, as a senior citizens center.

The commissioners discussed the feasibility of applying for federal Community Development funds to renovate the station to make it a senior citizens center.

But to receive the funding, the county would have to own the building. said Jerry Tschauner of the Permian Basin Regional Planning Commission.

The discussion came during a public hearing on community needs which might be suitable to include in a Community Development funding

application. Also discussed was the possibility of applying for funds to pave streets not included in the city limits but located in low-income areas.

Tschauner said the county may apply for up to \$500,000 in Community Development funds for this year, but must compete with other counties and small cities in West Texas for an undetermined amount of money.

Despite Commissioner Jack Leonard's urging that a decision be made Monday, the Commissioners Court postponed the decision on what to apply for until its next meeting April 24.

Leonard said plans should be made to apply for a senior citizens center, even if the city does not wish to cooperate in setting up a center at the Circle Drive location.

No one other than Tschauner appeared before the commissioners about the application.

sons did attend the meeting to support a request from the Midland County Library Board for the commissioners to appoint an architect to begin plans on library expansion. The expansion would be built at the site of the present American Legion Hall, recently purchased by the county to allow room for expanding the library building.

The commissioners authorized the county auditor to begin negotiations with

## Candidate's wife has political background

By PATSY GORDON

She began her involvement in Republican politics in 1952 when she began ringing doorbells on behalf of the campaign of Dwight Eisenhower for president.

Rita Clements was in Midland Tuesday morning, not ringing doorbells, but quite likely winning votes for her husband, Bill Clements, hopeful for nomination as the Republican candidate for governor of Texas. Clements also was in the Tall

The friendly, attractive and sharp woman, daughter of West Texas ranching parents, Mr. and Mrs. Mason Crocker of Brady, was a Spanish major at The University of Texas-Austin when she decided to enter politics.

After that, it was up all the way as

far as her political career was con-cerned. She became precinct chairman in Dallas and door-to-door canvas chairman for the Republican party in 1960. She served as door-todoor chairman for U.S. Sen. John Tower's campaign in 1961 and the Barry Goldwater campaign beckoned her to Washington in 1964 to be doorto-door chairman for Goldwater's bid for the presidency.

Mrs. Clements went on to become Republican National Committeewoman from Texas after serving on the Republican National Finance Committee. She then was organization chairman of the Republican Party from 1966-68.

She had to resign as com-mitteewoman when her husband became Deputy Secretary of Defense because she could have no political

Mrs. Clements probably would save a little wear and tear on the feet today because phone banks are the latest techniques in primary election vote getting as opposed to door-to-door canvassing.

Mrs. Clements, who also has a background in volunteer work, feels the campaign is "going just great. I feel like we're building up momentum along the way." Her husband, who has never

engaged in politics as a candidate before, "is certainly a businessman," according to Mrs. Clements. "As a first time politician and a product of the free enterprise system, he can bring management we need to the governor's office. He has been referred to as a breath of fresh air," she

At the age of 28, Clements established his own business.

added, "we get the true feeling that Texans are ready for a change. My husband can provide this change."

Concerning volunteer work, Mrs. Clements feels there is a "terrific need for coordination at both the local and state levels and there needs to be more encouragement of volunteer services."

The candidate's wife, who used to ride in rodeos in Brady and go on dates to San Angelo, is a member of the Junior League of Dallas.

Another area she feels strongly about is education. "Education seems to be the No. 1 issue people over Texas are concerned about. The quality of education needs to be improved."

She cited the case where Jesuit High School students and teachers in Dallas were both given the same test and the students scored higher than

the teachers. "There is something wrong on the teacher accreditation level," she said.

Mrs. Clements also pointed out that there is a "real need for special education improvement.'

As for the controversial issue of the Equal Rights Amendment, she is a proponent of "equal job opportunities and equal credit availability." But as for some of the other issues such as "homosexuality", she is opposed to

When asked if she felt the current boycotting of cities and businesses would be detrimental to the movement, she replied, "The boycotting is not showing positive results. In Atlanta, women are being put out of work," a direct con-tradiction to what the ERA is supposed to accomplish.

Mrs. Clements had a kind word to say about Nixon, though. "He was a good president as related to foreign policy. It's unfortunate he let himself get bogged down, mainly due to some of the people he chose to serve with him. A leader must have the ability to choose top notch people."
As far as the Midland campaign and

its prospects are concerned, she is "optimistic of support. There was a good Republican turnout in the Midland primary."
Mrs. Clements has four children by

a previous marriage and Clements has two. She has twin daughters, Bonnie and Barbara Bass, attending Stanford University, while her two sons, Dan and Jim Bass are students at Yale University. Clements' children live in Dallas and are married.

## Lifestyle of Americans cuts chances of living

By HARRY NELSON The Los Angeles Times

LOS ANGELES - An American man of 40 has less chance of living to be 50 than his counterparts in almost all of the industrialized countries of Europe, according to health

The reason, a University of California. Los Angeles public health authority said Sunday, is because of the "antilife habits and modes of living" followed by most Americans.

Destructive forms of behavior have made America...lag far behind - near the bottom - in health among nations in the Western world," even though the United States spends more of its national resource for health care than any other country, said Dr. Lester Breslow, dean of the UCLA School of Public Health.

Breslow singled out cigarette smoking, excessive consumption of alcohol, lack of exercise, high-fat diet and uncontrolled high blood pressure es major risk factors responsible for the relatively poor showing by Americans.

Despite a drop in mortality rates in recent years, disregard of risk factors by a large percentage of Americans still keeps our death rates high relative to other countries, he noted.

He was keynote speaker at the fourth National Conference on High Blood Pressure Control taking place at the Los Angeles Hilton

Citing several states that are con-sidering increasing taxes on cigarettes as a disincentive to use, Breslow said "it is time government collected more on cigarettes to equalize the tax

He said that although the govern-ment collected \$5.8 billion on tobacco sales last year, the direct health care cost attributable to cigarette smoking amounted to \$8.2 billion, plus the lost taxes on the \$19 billion in lost earnings

associated with smoking.
"It is evident that the non-cigarette smoking majority in this country is subsidizing cigarette smoking through taxes to a very large ex Cigarette smokers don't pay their way in taxes," he said.

Breslow praised the National High Blood Pressure Control Program for helping to detect millions of previous-

ly undiagnosed cases.

It has been estimated that the educational program conducted since 1973 has saved approximately 300,000 lives that would have been lost to heart disease and stroke.

He noted that the national death rate has reached new lows over the

#### National Music Week, will be held at 10 a.m. president of The Musicians Club and Mrs. past three years. Scholarship gives women second chance at life

Everyone needs a second chance at some time in life. and women, today more than ever, need a second chance at changing their life and their career.

Mrs. John Hammett, standing center, is

What can a woman do if her husband suddenly dies and she realizes she has no skills to get a job? Or, a woman whose husband divorces her after 20 years of marriage and all she did during those years was rear children? She

needs some way to learn a skill to support herself.

Kelly Services, Inc., and the National Federation of
Business and Professional Women have combined efforts. to help displaced homemakers.

Kelly Services has given a \$25,000 scholarship to the National B&PW Foundation. The money will be awarded to women throughout the country on the basis of need to obtain a marketable skill or to brush-up on those they have, but have not used in many years.

The two groups put together a Second Career Seminar Tuesday in the First National Bank of Midland to introduce area women to the scholarship program and to give them tips on how to enter the business world. Leading the panel were representatives of the two

The musicale, entitled "Vignettes in Music," a

benefit for the instrument fund of Midland

College of the Fine Arts Department at

Midland College and an observance of

groups, LaVon Neveau of Kelly Services and Dottie Akers of the National B&PW. Before the seminar, the two women explained their involvement in the scholarship program and their views on getting women into the working field.

Mrs. Neveau of Hayward, Calif., is almost "bubbly" 350 offices to be promoted to the position of administrative manager.

A displaced homemaker, Mrs. Neveau explained, " is a woman, who through no fault of her own, finds she has to become the head of a household."

A grandmother four times, she did not start working until the age of 45. It was the desire to have some extra money for a vacation which sent her to Kelley Services the first time and told them she wanted to work, but didn't know how to do anything.

will appeal to music lovers. (Staff Photo)

A job as hostess in a bank helped her get her foot in the door. Five months later she was named supervisor in the Hayward, Calif., branch of Kelley Services, and four months after that she was resident branch manager. In four years she became the first woman in the company's 350 offices to be promoted to the position of administrative manager.

"When I told my son, who was 12, they wanted me for a fulltime job, he told me to go ahead with it," she recalled. "It almost hurt me at first to realize they didn't need me at home all the time."

Her husband also encouraged her to do what she

Mrs. Akers of Las Cruces, N.M., said her Navy husband also was supportive of what she wanted to do. "He said if I didn't accomplish something, then I had no right to complain about my situation if I had not tried it."

Mrs. Neveau became actively involved with the displaced homemakers program after she became a member of the Alameda County Commission for the Status of Women. She helped them set up legislation in the state for establishing the first Displaced Homemakers Center in the U.S. Legislation is pending on the national level to set up centers around the country.

The one in Oakland has been successful, she said. The women at the center must be between the ages of 35 and 64. People learn such skills as home care, health care, paramedic training and paralegal training, she said.

The center also has a good assertiveness training program for the women. "They learn they do have some self-worth," Mrs. Neveau said, remembering cases where women have never written a check or don't know how to balance a checkbook.

Kelly Services established an intern program with the center. Of 10 interns, four completed the program, but the others were working by the time it ended, "and we feel it was successful," Mrs. Neveau says.

feel it was successful," Mrs. Neveau says.

One success story is the woman whose husband made her terrified to ride a bus or any form of transportation by herself. When she had completed the intern program, she was riding buses by herself and going to a job.

Working gives confidence, both women said. "If someone had told me 20 years ago that I would have gotten up five years ago in a large convention hall in Chicago and argued with a prominent woman of B&PW I would have said they were crazy." Mrs. Akers said. But, she did do just that and without a lack of self-confidence.

Mrs. Akers now is retired from working at White Sands Missile Range at Las Cruces and with the Civil Service Commission in El Paso. She served as president of the New Mexico B&PW, then as chairman of the National B&PW Foundation.

B&P W Foundation.

The Foundation was established in 1966 to help women get ahead by providing scholarships or loans to members who wanted to further their education.

"What we are trying to do is to announce the scholarship and make it known there is a chance for a second career." LaVon Neveau

"Times are changing and thinking is changing. The fact is that you can get out and hold your own in the business world."

**Dottie Akers** 

The Kelly Services Second Career Scholarships, administered by the Foundation, are available to women at least 25 years of age who have spent five or more years in fulltime homemaking and are seeking employment in business due to the death of their husband or divorce.

Most grants will be in the area of \$200 to \$500, but they

can range up to \$1,000. The money is not for women who already have a bachelor's degree and want to do graduate work, Mrs. Akers said. They are designed for women who have had no training at all, or those who have been out of the working field for many years and need to brush-up on their skills.

"For example, there is the school teacher who needs more training before going back into teaching, or an LPN who has let her license expire and needs to take a few courses to get it again," the New Mexico woman said.

Women wanting to apply for the scholarship may write to Scholarships Department, BPW Foundation, 2012 Massachusetts Avenue, N.W., Washington, D.C. 20036.

The first deadline is May 1 and selection will be made in June. The second one is October 1 for selection in can range up to \$1,000. The money is not for women wh

in June. The second one is October 1 for selection in November.

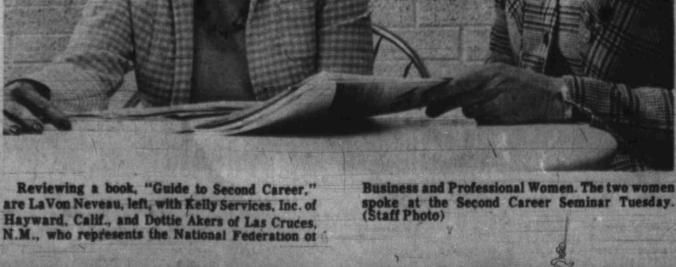

"What we (Mrs. Neveau and Mrs. Akers) are trying to do is to announce the scholarship and make it known there is a chance for a second career," Mrs. Neveau said.

Serving on the panel with the two women were Judge Barbara Culver. Stella Pearson of Mobil Oil Co., Betty Mallonee of the University of Texas at the Permian Basin, Marion Kimberley with Midland College, Dorothy Foster of the Texas Employment Commission, Gwendolyn McKay of Midland Memorial Hospital and Joanne

Langston, a city Realtor.

"Women are becoming more aware they have to take care of themselves," Mrs. Neveau said.

Mrs. Akers commented, "Times are changing and thinking is changing, The fact is that you (all women) can get out and hold your own in the business world."

## Writer finds friends faced similar problems

By ANN H. CLAUSS Special to The Los Angeles Times

Twenty-five years ago I first encountered them as teen-agers when the three of us were thrown together as freshmen roommates at college. By some coincidence that caused much confusion, we all shared Ann as a first name, and perhaps that helped to solidify our friendship. The other week I lunched with both of them in Los Angeles - I hadn't seen either Ann in 10 years - and came to realize what enormous changes the passage of time had wrought in our lives.

My two friends were bridesmaids at my wedding three days after our college graduation. On their marriages, we vowed to keep in close touch, but our husbands' jobs soon separated us.

While one husband launched a career in electronics in California, another went to the Massachusetts Institute of Technology for graduate study in aeronautical engineering. and a third became a Navy man traveling across several continents before returning to California for a master's degree in fine arts and, eventually, a teaching career.

For a while we three Anns pursued our individual interests. One of us taught elementary school, another went on to graduate school, and I worked as a secretary. After a few years, each wife gave up her brief career when motherhood came.

Whenever possible during our early 20s, we gathered at one another's home to share our dreams. Our babies were all healthy and certifiably adorable. Our husbands were getting established. We felt secure.

The promise of success seemed assured, and the future beckoned

As the years wore on and we found new friends, our lives grew further apart, and our contacts dwindled to brief notes on Christmas cards. In time, even those stopped - at least for me, as I went through my own private battle with the bottle, a divorce and a self-imposed withdrawal from family and friends.

The road back was a struggle but. on finally recovering a few years ago, wrote confessional letters to each Ann. I dreaded describing my failure. mostly because I dreaded their replies. While I felt buoyed by my recovery, I wasn't quite ready to read their gushing accounts of prosperous husbands, beautiful children, happy homes.

So the letters they actually wrote took me aback, filled as they were with their own tales of personal disasters. One husband had battled the Big C. Another husband's alcoholism had caused its inevitable strains on family unity. And one child had become schizophrenic.

After our initial exchange of letters and subsequent phone calls, we decided to get together for lunch. While we talked that noon, I was struck by the enthusiasm and sense of purpose that each woman found, despite adversity, in her own personal life. For different reasons, we'd all gone back to work - and had found a sense of fulfillment in our jobs. Currently, one of my friends is employed as director of a junior high school reading program, the other is a junior high school principal, and I

work as an administrative assistant for an insurance company.

Though keenly interested in our careers, we agreed that our families are still No. 1 among our priorities. As we ate, we shared pictures of our 10 children and two grandchildren amid laughter and tears. We talked about the times when each of us had felt lonely, resigned and desperate. We talked about these things even as we observed one another's good humor, acceptance of events, capacity for love and almost defiant resilience. Then we searched for the "whys" of yesterday, trying to give meaning to today and hope for tomorrow.

Throughout our college years we'd shared our feelings of doubt and our yearnings for the future. Perhaps it wasn't our remembered good times but our shattered dreams and personal struggles that, after a decade, made us feel close again. Whatever the reason, we've survived - that. after all, is the important, the only, thing - and, with a sense of dignity, all three Anns continue to look ahead with high expectations.

### Pasta's origin unknown

By TOM HOGE

AP Newsfeatures Writer

Europeans have enjoyed pasta, that keystone of Italy's cuisine, dating as far back as the Renaissance, according to history books. But no one seems to know for sure just when this delightful food made its debut into Western society or where it came

Most accounts place the origins of pasta in the Far East, and thereby hang a number of tales.

One story says an Italian sailor was taught noodle-making by a Chinese girlfriend and later imparted the art to his countrymen. Another says Marco Polo brought noodles back from the court of the Great Khan. along with gunpowder and coal.

The earliest known documented mention of pasta comes from the eighth century lexicographer Hesychius, who referred to it as

"makaria" or blessed thing. Hesychius suggested that this food should be eaten with a sauce, a bit of advice that has been faithfully followed over the years.

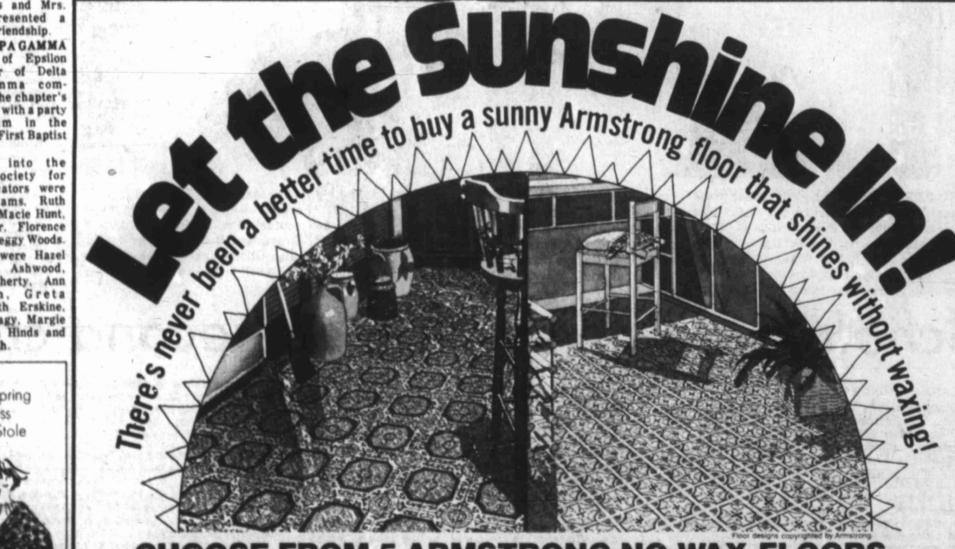

#### Deadline today for club picnic

The Midland Lawyers Wives Club will have a family picnic at 6 p.m. Thursday in Hogan Park.

The picnic will be for lawyers, their wives and children. If weather does not permit the picnic to be held in the park, it will be in the City Parks and Recreation Building, 300 Baldwin St.

Reservations should be made by today with Dorothea Smith, 682-5650, or Jan Meroney, 683-7680,

The picnic will include fried chicken and the trimmings, drinks and dessert. Games are planned to include children

### Motion rejected

AUSTIN, Texas (AP) - Examiner Tom Hill of the railroad commission has rejected a motion by a company lawyer to obtain copies of a 1971 merger proposal by Coastal States Gas Corp. and Lone Star Gas Co.

Bob Burleson, a lawyer for Charter International Oil Co., said Tuesday the proposal was "extremely important" in determining whether a proposed settlement of \$1.6 billion in customer claims against CoastalLo-Vaca is in the public interest.

"It's a dead item," insisted Bernard Schrader, vice president and chief negotiator for Coastal.

He said Coastal and Lone Star had agreed in July 1971 to study whether combining the companies would be 'feasible and mutually beneficial."

This is important, he said, because Lone Star was one of the Lo-Vaca customers that was "supposed to be driving a bargain" in the more recent negotiations to come up with a settlement plan.

Lone Star has approved the proposed settlement.

The proposal was dropped in May 1972, Burleson said, after the anti-trust division of the U.S. Department of Justice declined to state that it would not oppose the merger.

The settlement would wipe out all claims against CoastaLo-Vaca and would create a new company, Valero Corp., to replace Lo-Vaca as a gas supplier. It would also transfer lignite properties from Coastal to Valero and commit Coastal to a \$180 million gassearch program.

Schrader said under cross-examination by Jose Fernandek Jr., lawyer for Pearsall, that he doubted that another settlement could be worked out if the current proposal is rejected.
"I have said before I seriously

doubted if this plan fails we'll ever be able to get this many people together again for a try at another plan," Schrader said.

Robert King, a lawyer for Big Three Industries, Inc., said the settlement "seems to treat some people unequally."

Hill is to recommend to the railroad commission whether the proposed settlement would be more in the public interest than a Dec. 12 commission order. The commission's December order forces Coastal-LoVaca to refund the more than \$1.6 billion in gas charges and to live up to its older and cheaper contract prices.

## Offset try scheduled

REEVES WELL

Wayman W. Buchanan of San Antonio No. 1-11 Young is a new well in the Worsham, Southwest (Delaware) area of Reeves County.

The well, 10 miles west of Coyanosa, finaled for a daily pumping potential of 40 barrels of 34.1-gravity oil, plus 50 barrels of water, through perforations from 5,130 to 5,132 feet after 500 gallons of acid and 2,000 gallons of fracture solution.

Gas-oil ratio is 1,320-1. Total depth is 5,300 feet and 41/2-inch casing is set at that point. The

plugged back depth is 5,242 feet. The well is 660 feet from north and 1,000 feet from west lines of section 11, block 50, T-7, T&P survey and one location southeast of the depleted Delaware oil discovery.

The Petroleum Corp. of Delaware No. 3-84 Canon-Allison has been completed as a flowing well from the Ellenburger in the Block A-2 field.

On 24-hour potential test it made 528 barrels of oil, gravity not reported, and 36 barrels of water. Gas-oil ratio

The oiler was finaled through perforatioms from 10,617 to 10,625 feet after a 1,000-gallon acid treatment.

Total depth is 10,700 feet and 51/2inch pipe was set on bottom. Hole is pld back to 10,639 feet.

Wellsite is 660 feet from north and east lines of section 84, block A-2, TCRR survey and 1/2 mile southeast of other Ellenburger production. It is 17 miles west of Sheffield.

LACAFF WELL

BTA Oil Producers of Midland No. 7-C 7422 JV-S Mustang is a new oiler in the Lacaff (Wolfcamp) field of Martin

A re-entry project, it was finaled on the pump for 13 barrels of oil per day, plus three barrels of water. The gravity is 39.9 and the gas-oil ratio is too small to measure.

Completion was through per-forations from 9,737 to 9,854 feet. The zone was acidized with 750 gallons and fractured with 16,590 gallons.

Total depth is 13,218 feet and seveninch casing is set at 12,217 feet. Plugged bdck depth is 12,119 feet. Location is 2,173 feet from south and

990 feet from east lines of section 2, block 7, University Lands survey and 20 miles northeast of Lenorah.

It originally was drilled and completed as a well in the Block 7 (Ellenburger) field.

## Well, tests announced

David Fasken of Midland No. 5-214 ARCO-Fee has been completed in the Hanford (San Andres) field of Gaines

Operator reported a daily flowing potential of 122 barrels of oil, no water, through a 24/64-inch choke and San Andres perforations from 5,471 to 5,498 feet. The pay was acidized with

Gravity of the oil is 34.2 degrees and the gas-oil ratio is 328-1.

Wellsite is 660 feet from south and 2,739 feet from west lines of section 214, block G, WTRR survey and seven miles north of Seminole. It is one location east of other production.

**GAINES TESTS** 

Amerada-Hess Corp. announced locations for a pair of Devonian projects in Gaines County, one in the Seminole pool area and the other in the Amrow field.

No. 2-B Seminole Deep Unit will be drilled to 12,000 feet 1/2 mile south of the Seminole (Devonian) field discovery and three miles northwest of Seminole.

Location is 2,310 feet from south and 520 feet from west lines of section 229, block G, WTRR survey, abstract

Amerada Hess Corp. No. 1R-A Terrell will be drilled as a 12,580-foot peration in the Amrow (Devonian) eld, 13 miles southeast of Seminole.

The project is 3,700 feet from south and 1,740 feet from east lines of league 308, Terrell County School Land survey. There are several nearby Devonian wells.

CROCKET WILDCAT

Cummings Oil Co. of Houston No. 1 West is an 8,300-foot wildcat in Crocket County, 13 miles north of

Location is 5,747 feet from north and 467 feet from east lines of Rumnels County School Land survey No. 1. It is 3% miles northeast of the Holt (Ellenburger) field.

SHALLOW TRY

James L. Lamb Jr. of Midland No. 1-10 Todd will be drilled as a 1,400-foot wildcat in Crockett County, 17 miles

The test is 1,116 feet from north and 997 feet from west lines of section 10, block YZ, EL&RR survey. The location is % mile southwest of Lamb No. 1-13 Todd, undesignated Seven Rivers discovery.

**MENARD WILDCAT** 

Investers Energy Corp. of Dallas T&P survey.
will dig No. 1 U. E. Rogers as a 5,000- It would become the foot wildeat in Menard County, 16 fifth Devonian well in the miles west of Menard. The operation is 467 feet from north

nd west lines of section 15, block 2, W&NG survey.

It is slated to test the 1,900-foot zone, the 3,700-foot zone and the Strawn in the Tuckmar field area.

## **Projects** reported

Exxon Corp., operating from Midland, will drill a 10,800-foot lower Canyon project in the Huat multipay field of Gaines County, 10 miles east of Seminole.

It is No. 9 Exxon-Atlantic H&J, 1,880 feet from north and 2480 feet from west lines of section 123, block H, D&WRR survey, abstract 169. It is a twin to upper Canyon production.

MIDLAND TEST

Ashland Exploration, Inc., of Houston will re-enter and deepen to 8,950 feet for tests of the Dean an old Spraberry well in Midland County.

The project, No. 2-17 Walter Braden is 22 miles southwest of Garden City and 1,980 feet from north and 1,980 feet from east lines of section 17, block 37, T-5-S. T&P survey.

If completed, it will be assigned to the Calvin (Dean)

#### Detrital well finals

Shell Oil Co. No. 3-8 Price has been completed as the fourth Detrital gas well in the Crossett, South multipay field of Pecos County, 24 miles northwest of Iraan.

Operator reported a calcualted absolute open flow potential of 1,800,000 cubic feet of gas per day, through perforations from 5,044 to 5,056 feet after 1,400 gallons of acid and 15,000 gallons of fracture solution.

The well, a former Wichita-Albany gas and McKee oil producer, is 2,620 feet south of the northeast corner of section 8, block 12, H&GN survey. then 660 feet et to location.

## Re-entries complete

Texaco Inc. has completed a pair of re-entry projects from the Mississippian in the Lowe multipay field of Andrews County.

No. 252-A-1 J. E. Mabee was finaled for a daily flow of 23 barrels of 48.1gravity oil, through a 7/64-inch choke and perforations from 11,345 to 11,407 feet after 6,000 gallons of acid. Gas-oil ratio is 43-1.

It is a former Silurian and Ellenburger producer 22 miles southeast of

The wellsite is 1,100 feet from north and 854 feet from east lines of section 38, block 40, T-2-N, T&P survey.

Texaco No. 263-A-1, another former Silurian and Ellenburger well in the Lowe field finaled for a 24-hour flowing potential of 29 barrels of 48.1gravity oil and two barrels of water, through a 9/64-inch choke and perforations from 11,393 to 11,446 feet. Location is 2,145 feet from south and

1,669 feet from west lines of section 33, block 40, T-2-N, T&P survey.

## than home owners to bar the price Extender

potentials

A Production Co. hass announced potential test for its No. 1-DQ State. one mile northeast of the discovery well and lone producer in the Many Gates multipay field of Chaves

The extender is 16 miles southeast of Elkins and 660 feet from north and 1,980 feet from west lines of section 32-

Operator reported a 24-hour potential test of 1,093,000 cubic feet of gas per day, through a 4-inch choke and perforations from 9,342 to 9,350 The pay was acidized with 1,500

gallons. Total depth is 9,540 feet and plugged back depth is 9,486 feet. The field has two Abo producers.

## Basin work reported

Tonto is to be dug ¼ mile multipay field of Terrell east of a well in the Tonto. County. South field of Lea County.

Scheduled to 3,100 feet to test for production in regular field pay, it is 1,650 feet from south and 990 feet from east lines of section 30-19s-33e and 16 miles southwest of Buckeye.

CHAVES TEST

Plains Radio Broadcasting Co. of Amarillo announced plans to dig a test inside production in the Chisum, East field of Chaves Coumty, N. M.

Slated as No. 4-16 L. E. Ranch, it is 990 feet from north and east lines of section 16-11s-28e and 17 miles northeast of

WINKLER TEST

Sun Oil Cc. will re-enter Silurian well in the Wheeler multipay field of Winkler County, plug back and attempt com-pletion in the Devonian.

The project is No. 1-A. F. Wheeler, seven miles southwest of Notrees and 1,9ip feet from south and 660 feet from the west lines of section 16, block 46, T-1-S,

fifth Devonian well in the TERRELL TRY

others Unit is to be dug as a 15,500-foot operation to

Wallep Production Co. test the Ellenburger in Crockett County, 11 miles of Midland No. 7 Wallen- the Brown-Bassett northwest of Ozona.

> It is 1 miles west of Ellenburger production and 3,077 feet from north and 1,631 feet from west lines of section 244, block 161, GC&SF survey. It is 28 miles northeast of Dryden.

CANYON WELL

Anderson Petroleum, Moody Minerals has been Area production. finaled to extend Canyon sand gas production 1% miles southwest in the Crockett County, 30 miles southwest of Ozona. The well finaled for a

cubic feet of gas per day. through perforations from 7,177 to 7,190 feet. The zone had been acidized with 1,500 gallons and fractured with 54,300 gallons.

Wellsite is 660 feet from north amd 905 feet from west lines of section from south and 660 feet 21, block MM, T&STL from west lines of section

**PURE BEAN** 

Jones Drilling & roduction Co. of Menard No. 1-89 Pearson is to be drilled as a location south stepout to the nine-well Pure Bean, South field of

RING CO.

It is 1,650 feet from

north and 330 feet from west lines of section 89. block OP, GC&SF survey. It is to drill to 1,500 feet.

NEW OILER

Tamarack Petroleum Co., Inc., of Midland No. 1-44 Tom has been completed from the Spraberry in Glasscock County, 1¼ miles west of Inc., of Ozona No. 1-21-D other Spraberry Trend

Operator reported a AGE TO THE STATE OF THE STATE O daily pumping potential of 13 barrels of 32-gravity Ozona multipay field of oil and 125 barrels of water, through perforations from 6,875 to 8,170 feet after 8,000 calculated, absolute open gallons of acid and 215,000 flow potential of 1,435,000 gallons of fracture

Gas-oil ratio is 1,846-1. The well is bottomed at 9,800 feet in the Wolfcamp. Four and one-halfinch casing is set at 8,550 feet and hole is plugged bdck to 8,454 feet...

Location is 1,980 feet 44, block 35, T-1-S, T&P

## Carter calls conferees to White House session

The Washington Post

WASHINGTON - President Carter finally got involved in the long-stalled natural gas pricing controversy Tuesday in an effort to save his energy bill from death by stalemate in a House-Senate conference.

As even the most optimistic Congressional conferees began saying they had about given up hope of settling House-Senate differences on whether and how to remove price controls from newly discovered natural gas. Carter summoned 14 senior conferees to the White House. They met with him for an hour and with Energy Secretary James R.

Schlesinger for another hour. Schlesinger proposed compromise solutions which the conferees discussed with him and then took away for overnight study. They will meet again at the White House with Schlesinger at 7:30 a.m. Wednesday for 3 1-2 more hours of bargaining.

Henry M. Jackson, D-Wash., chairman of the Senate conferees, said: "The president entered the talks at a moment when the whole thing could have gone down the tube." He said he felt Carter's intervention had

improved chances for a solution. Thomas L. Ashley, D-Ohio, a senior House conferee, agreed that White House intervention had improved the outlook. "It's hard to walk out of the Oval Office," he said, referring to threats that some of the conferees were about to walk out of conference meetings in the Capitol.

President Carter called senior energy conferees to the White House yesterday in an effort to save the natural gas pricing bill from dying in

a House-Senate stalemate. Since discussions stated last November, conferees have agreed tentatively to deregulate new gas by 1985. They have bogged down on details involving huge sums of money. such as the definition of new gas that would qualify for the higher price. and incremental pricing, which would require big industrial users rather

barrels load water in 24 hours, testing continues.

EDDY COUNTY

Barnes Oil Co. No. 1-F Little Squaw: drilling 380 feet in salt.

Texas Oil & Gas Co. No. 1-G Indian Hills-State: took a drillstem test from 5.720 to 6.821 feet. 30 minute pre-flow opened with fair blow, increasing to 30 pounds on 4-inch choke, gas to surface in 28 minutes at rate of 70,000 cubic feet per day, recovered 787 feet of highly gas cut drilling mud with trace of condensate, now drilling 7.337 feet in lime.

Ashley, who also has been op-timistic, said, "The tenuous Senate majority will disappear if they per-ceive the House as insisting on issue after issue."

Carter says his energy bill is essential to reduce oil imports, now running at a rate of \$45 billion a year.

Carter's main weapon to reduce consumption and imports is a stalled tax program headed by a tax on domestic crude oil. Congressional approval of that tax, which the House accepted but the Senate rejected, appears dim. In any case, consideration has been postponed by energy conferees until a resolution of

In his anti-inflation speech Tuesday, Carter said that if Congress does not act to reduce oil imports he will have to take administrative action. Most of his economic advisers have recommended that the president impose import fees on the foreign oil. This would have the effect of increasing the price of all oil in the United States after high-priced and low-priced oil are blended.
