Record increase in beef prices fires inflation

increase in beef prices forced consumer prices up 0.9 percent in April, the largest rise in more than a year. the Labor Department said today.

The latest increase meant the annual rate of inflation for the past three months was 10 percent, the depart-

Beef prices jumped 6.6 percent in April, accounting for more than onethird of the 2.4 percent in grocery

The 0.9 percent increase in the Consumer Price Index was the largest since February 1977, when prices rose by the same amount. The increase in beef prices surpassed the record 6.5 percent rise in May 1975.

Food prices have climbed steadily since the start of the year, but the latest report showed they were accelerating even faster.

Prices for all foods and beverages were up 1.8 percent in April after rising about 1.2 percent in each of the three previous months.

Prices for fresh vegetables, which declined in March, rose 9.7 percent in April, led by an increase for lettuce.

Foes' funds each over \$100,000

By LANA CUNNINGHAM

Campaigning for the Republican nomination for the 19th Congressional District has become a six-digit runoff to be held Saturday.

In the latest figures released to the Federal Election Commission for the period from April 22 through May 19, George Bush of Midland and Jim Reese of Odessa have received more than \$100,000 each for their campaign since each announced his candidacy.

The two men failed to capture a majority of the votes in the May 6 primary with Joe Hickox of Shallowater as the third person running for the GOP nomination. Winner of the runoff will face Kent Hance of Lubbock who was the Democrats' choice. The candidates are vying for the Congressional seat being vacated by retiring George Mahon of Lub-

Bush has received the most with \$111,558.91, since the primary race began. Reese is close behind with \$110,331.32. The difference comes in expenditures with Reese spending the

(Continued on Page 2A)

Since then, lettuce prices have started coming down, however.

Prices of pork, poultry, dairy products, sugar, candy and vegetable oils all increased more in April than in March or February. Prices turned downward for eggs, fresh fruit and

Another big contributor to inflation during April was rising housing expenses, which were up 0.9 percent. costs of home financing, taxes and insurance advanced 1.7 percent, while home maintenance and repair

services rose 1.4 percent. Home-purchase prices increased 0.5 percent and rent was up 0.7 per-

Charges for natural gas and electricity each rose 1.5 percent in April, the third straight month of big in-

Also showing sharp rises were furniture and bedding, up 1.1 percent; clothing, 1 percent; medical care, 0.7 percent; and dental fees, 0.6 per-

The price of new and used cars went up 0.3 percent, and gasoline prives edged up slightly, the Labor Depart-

All figures are adjusted for normal seasonal variations in prices.

The 0.9 percent increase in consumer prices followed gains of 0.8 percent in January, 0.6 percent in February and 0.8 in March. However, the prices last month were only 6.6 percent higher than in April 1977 because of a steadying inflation picture at the end

The Consumer Price Index for urban consumers in April was 191.5. meaning it cost \$191.50 to buy what \$100 would buy in the base period of

The gloomy April report followed an Agriculture Department estimate day that cons imer food prices will rise 8 percent to 10 percent this year, up from an earlier forecast of 6

percent to 8 percent. Despite the deepening inflation rate, Patrick Caddell, President Carter's personal pollster, says the cost of living figures should not emerge this year as a major political

"The country does not seem to be possessed with great concerns over any sets of particular issues that we tend to think dominate public attention, including inflation," said Caddell, head of the Cambridge Research Associates polling organization.

Caddell's views were based upon a canvass of institutional investors here earlier this month.

The new forecast might mean the biggest food price increase since the inflationary spiral of 1973-1974, when grocery costs rose an average of 14.5 percent a year.

GETTING THEIR TWO CENTS' worth of postage stamps Tuesday are these Midlanders, who mostly are buying two-cent stamps to complement the now-obsolete 13cent stamps. The first-class postage rate Monday jumped by two cents to 15 cents. Mid-

landers purchased about 115,000 two-cent stamps Tuesday at the main post office in downtown Midland. Postal clerks selling the stamps are, from the front left, Johnny Carter, Orval Boling (almost hidden) and Sid Chesser. Postal officials said Tuesday that

letters mailed with the old 13-cent stamp on Monday would be delivered without postage due, but that "from here on out" recipients will find a postage due requirement on 13-cent letters. (Staff Photo by Mike Kardos)

Hickox: no press conference role

By LINDA HILL

Unsuccessful congressional candidate Joe Hickox said today he had no. involvement in a press conference called on behalf of Jim Reese Mon-

Hickox, of Shallowater, was eliminated from the race for the Republican nomination to the 19th Congressional District seat in the May 6 primary. Reese of Odessa and George Bush of Midland are facing each other in Saturday's runoff for that spot on the general election ballot.

Reese said Tuesday "some of Joe Hickox's supporters" set up a Monday press conference in which two Oklahomans endorsed Reese and criticized the Trilateral Commission, a group of international leaders whose goal reportedly is closer relations among North America, Western Europe and Japan. Reese said he had no role in setting up the conference, although he did receive advance no-

At the press conference, J.C. Lewis, an Oklahoma Panhandle farmer, and Clarence Warner, a former GOP state chairman from that state, criticized Bush's father, George H.W. Bush, for and questioned the younger Bush's ability to function independently if

Hickox, contacted in Shallowater. said today he had no role in setting up the Monday event. And he was critical of efforts to "hang" the Trilateral Commission on Bush.

"I do know some of my people are uptight, about the Trilateral Commission," Hickox said. He said he does not think "guilt by association" with the candidate's father is fair. Some of my former people do," however he added

Bush today said in Lubbock he believes that Reese did not actually set up the Monday press conference. "I'll take a man for his word. There had to be some collaboration," Bush said.

"They (the Oklahomans) come in and criticize my father and my family and critize me and insinuate that Dad's allegiance to the U.S. ...is shaky. Then Reese tries to stand back and say he has nothing to do with it. What Reese is trying to do is disassociate himself from this underground Trilateral Commission stuff," Bush

He said his basic reaction to the

endorsements of Reese on Monday by the Oklahomans is, "Who are these guys? Nobody in the state ever heard of them.'

Hickox said he is staying out of the runoff race entirely, neither making a public statement nor telling former supporters how he plans to vote. He said today he is taking this stand.

in spite of a request from Reese for an endorsement. Bush, he said, has "not

directly" requested an endorsement. "I didn't think it would be fair in the interests of the Republican Party to get involved ... Let 'em win it on their own," Hickox said.

"I think it would be presumptuous

of me in the first place to think I have that much clout," he said. He said some of the Reese sup-

porters "aren't speaking to me now" because of his refusal to make an 'That's all right. We're still going

to work together in November, Hickox said. He said there is a rift in the Republican Party in Lubbock County that must be healed. "Reese has to bear the cross on that (rift)," Hickox said, because it was "his people" who caused it.

In his Tuesday press conference in

with your nickels and dimes dollars at It's nothing new. It's called advertising. It can be sky-writing, billboards, TV and radio "commercials" (why not call 'em what the are,

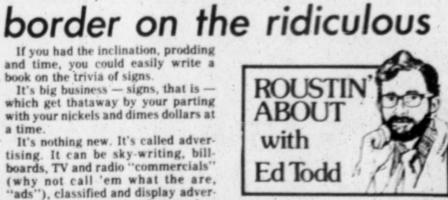

'ads"), classified and display advertisements on the printed page, lealets, handbills, labels, and ad infinitum (almost). Most are contrived to reap profits; some are meant to create images, and still others are designed to build up

esprit de corps. There are many nifty slogans among the latter. One, in lapel form put out by the American Association of Medical Technologists, goes like

Med Techs never die They just go out of control. It's a play on an over-used theme,

but it's got spunk.

There are many come-on lines designed to tease and tantalize the sensual and the out-of-bounds curious. Take this one at a follies burlesque theater: "Live girls totally nude on stage." Can you imagine the girls not being alive? And just how nude is totally nude? Can a mannequin be nude or just bare? And a beast? And, by the way, beasts for the most part are not bestial at all. They're God's

"lowly" creatures following instincts and, more often than not, good sense. Man, fortunately and unfortunately, is not so blessed. He has the gift of choice with or without reason. * * *

Jargons flood the fields and the disciplines. And here's one, mostly used in dire emergencies: STAT. It means get along quickly and without error. It's about the same as the more common ASAP: as soon as possible.

* * * And how about this one, which often appears as red on white: "KEEP OUT! This Means You." You're always wondering just who "you" might be. But more often than not, the sign is superfluous. It's pretty evident when you're not wanted.

It's similar to "keep off the grass" and "hard hats only" posters; most know when not to trample and when to wear the crown. A reminder doesn't hurt, and it can wardSoff a law

Disease fighting efforts save 41,000 lives

WASHINGTON (AP) - Government programs to thwart infectious diseases are probably preventing nine million infections and 41,000 deaths a year, according to a federal

Dr. John V. Bennett, director of the bacterial diseases division of the Center for Disease Control, said Tuesday that federal, state and local health programs save as much, if not more, money as they cost for preventing

Dr. Richard Dixon, another CDC scientist, also told a National Institutes of Health symposium that infections remain a national health problem even in this era of antibiotics and widely available health care.

Dixon said new figures he compiled indicate more than five million infections are treated in hospitals each year at a cost exceeding \$3.7 billion.

Authorities said there was no way to estimate untreated or self-treated infections, which obviously number in the tens of millions.

Bennett estimated from figures he compiled that 310,000 people die from infections and their complications each year in this country. This would be worse without prevention programs, he said.

For example, Bennett said, CDC estimates that 95 per cent of the country's potential botulism cases are prevented through regulations governing food processing. Prevention costs \$21 million a year, but saves \$19,950,000 in hospital and treatment costs, he estimated.

Bennett said it costs about \$3,000 to treat each of the 350 botulism poisoning cases that do occur each year.

Dixon said that there is surprisingly little reliable data on the consequences of infection upon hospital care. To get a general idea of the impact of infectious disease, he said he combined data from several sources to get his estimates.

"Even if these projections are incorrect - and they agree very closely with other data available - we cannot deny the impact of infectious diseases on hospitalized patients," he

The study esoimated that patients contract 3,026,000 infections before entering a hospital for treatment.

The majority of these so-called community-acquired infections, 2. 821,300, have a bacterial origin. Virus related infections account for 175,700 cases, while fungus is responsible for 17,600 cases and parasites for 11,300.

The study said another 2,028,000 infections are acquired during hospitalization. These so-called nosocomial infections were neither present nor incubating at the time of patient admission

Divided by cause, 1,825,800 come from bacteria; 196,100 from fungi; 5,800 from viruses and less than 500 from parasites.

Doctor say the high rate of nosocomial infections is explained in part by already sick patients being more susceptible to infection, and because surgery and other treatment can open new avenues for infection.

Sadat puts deadline on peace

CAIRO, Egypt (AP) - President Anwar Sadat has given his peace drive with Israel two months to pick up steam or collapse.

I think in these two months we shall reach a result - either the peace process gains momentum again, or it proves to be a failure," he told a news conference Tuesday.

The Egyptian leader set the deadline some six months after he traveled to Jerusalem and spelled out his terms for peace before Israel's par-

Negotiations broke off in January over Israel's rejection of Egypt's demands for return of all occupied Arab land and an independent Palestinian

An Israeli Foreign Ministry spokesman in Jerusalem said of Sadat's comment: "Obviously we reject ultimatums." Other Israeli officials reserved comment until they saw the text of his remarks. Elsewhere in the Middle East,

Yasser Arafat's Palestine Liberation Organization said it would call off its military moratorium in south Leba non if Israel shells guerrilla positions The PLO warning followed two suc-

cessive nights of heavy artillery shelling of guerrilla villages and towns which the PLO said killed 12 persons and wounded 24, most of them civilians.

"We have no information on any such shelling," said an Israeli army spokesman in Tel Aviv. A U.N. official in Beirut said most of the shelling came from Lebanese Christian positions in the Marjayoun area, and guerrilla positions north of the Litani River returned the fire.

'Next time we shall retaliate," a PLO statement said. "We can't allow Israel and its rightist Lebanese allies to escalate their hostilities in south Lebanon without military retalia-

Meanwhile, the former commander of North Yemen's paratrooper corps claimed Saudi Arabia has "quietly annexed" his nation's northern border areas

Maj. Abdulla Abdul Aalem also accused Saudi Arabia and Iran of 'meddling heavily" in the domestic affairs of North Yemen, which controls the southern entrance to the Red

Aalem led an abortive mutiny early this month against President Ahmed Hassan al Ghashmi and then fled to South Yemen. His statement was distributed to leftist newspapers in Beirut by the Popular Democratic Front for the Liberation of Palestine, which has close relations with South

Cloning probed by House

WASHINGTON (AP) - Top medical researchers are ready to tell a House health subcommittee that experimentation in cell reproduction is important in fighting cancer and learning more about aging.

The testimony today will delve into cloning, which came to world attention recently when David Rorvik, a free-lance science and medical reporter, wrote, "In His Image." The author claims a healthy male baby was cloned from the cell of a man.

Cloning means making identical copies of a single molecule, cell or

In animals, the procedure requires that a cell nucleus containing a full set of chromosomes be implanted in an egg cell - the nucleus of which has been destroyed.

The embryo would then be implanted in the uterus of a woman to be carried for the full nine months.

Many leading medical experts have expressed doubts that enough technical knowledge is now available to successfully clone a human baby.

Rorvik declines to identify the alleged father or clone.

Slim chance of rain forecast

The weatherman said there is a 20 percent, or slight, chance of rain this afternoon and evening through Thursday. The low tonight is expected to hit the middle for and then size to to hit the middle 60s and then rise to near 90 again on Thursday.

The forecast for today and this evening is partly cloudy with southerly winds blowing tonight from 10 to 15 mph, according to the weatherman.

The National Weather Service at Midland Regional Airport said Tuesday's temperature reached to a high of 89 degrees with the low this morning hitting 62 degrees.

The weather in area towns was reported to be clear and cool this

Reagan High awards diplomas to 49

BIG LAKE .- Forty-nine Reagan County High School seniors received their diplomas during recent graduation ceremonies here.

Layne Rackley, son of Mr. and Mrs. Buford Rackley, was selected as the class of 1978's valedictorian, while Jill Schneemann, daughter of Mrs. Max Schneemann II, (was named salutato-

Both candidates exceed \$100,000 mark in funds

(Continued from Page 1A)

most at \$110,317.58. Bush has spent \$86,137.98 on his campaign, according to the FEC reports submitted by the candidates.

The amount of money received by the candidates appears to be the only similarity in the campaign in the financial departments.

At the beginning of this reporting period, which was April 22, Bush had more cash on hand with \$19,557.01 listed; Reese had \$368.27. Both candidates have loaned their campaigns money, but Reese loaned more to his campaign by giving \$12,000 and Bush contributed \$3,417.59. Reese obtained a second loan from a bank during this reporting period and this time it was \$20,000 from First National Bank in Odessa on a 90-day note. His first loan of \$15,000 came on March 13 from State National Bank, also a 96-day note. This brings Reese's indebtedness to a total of \$47,000 for Hhis cam paign, compared to Bush's single loan During the April-May reporting pe-

riod, Bush received \$35,906.71 in contributions and Reese received \$60. 974.01, including \$47,000 in loans. Bush spent \$30,042.79 during this period and had \$25,420.93 cash on hand at the end of the period. Reese spent \$61,328.54 and had \$13.74 on hand.

Additionally, the Reese campaign still owes \$79,000 from his unsuccessful race against Mahon two years

Bush's report listed a contribution of 50 shares of Adobe stock valued at \$825 and his campaign office is liqui-

dating it. Contributing \$1,000 to the Bush campaign were

George H.W. Bush of Houston, investor; Mrs. H.W. Methodist conclave under way

(Continued from Page 1A)

goes to the pastorate of Lubbock's

Agape UMC Ihsan Ardhuerumly, who has been minister for the Leuders-Avoca Circuit for the last two years, has been appointed pastor of Colorado City's St. Luke's UMC and the Dorn UMC, Douglas Stenberg, who has been a student at Asbury Seminary, is new pastor of the Union-Ira Circuit, succeeding Wayland Dowdem who goes to the Rule-Sagerton Circuit in the

Seymour district. The annual conference began its second day with breakfast meetings this morning, followed by worship services at 8 and 11 a.m. Special luncheons were to be held at noon and a business session was to occupy delegates this afternoon. Several dinners are scheduled this evening, to be followed by an evening worship service at which Dr. Emerson Colaw, conference preacher, will speak on 'Rain In Time of Drought." The service will begin at 7: 15 and will be open to the public. It will be followed at 7:45 p.m. by a service of recognition and consecration of diaconal minis-

Thursday, the final day of the conclave, will begin with a youth-ledworship service at 8: 30 a.m., followed by a business session at 9 and another worship service at 11 a.m. Dr. Colaw's sermon for the 11 a.m. event is to be "Whom Do You Seek?" Luncheons will be held Thursday noon, with a final business session scheduled for 2 p.m. The final conference worship service at 7 p.m. will include a ceremony of ordination of deacons and elders, followed by a reception for the ordinands and their spouses. The meeting will officially adjourn following this event.

Between 750 and 800 clergy and lay delegates from throughout the 67county area comprising the Northwest Texas Methodist Conference are in attendance at the annual meeting.

Government closes down university

BOGOTA, Colombia (AP) - The government shut down the national university until June 12 following student rioting in which one student was killed and two others and 10 police-

men were injured. The students rioted Tuesday to protest the jailing of several classmates in earlier violence. The university, was shut for five days last week after a week of rioting.

Violent protests over rising prices have been staged daily for the last three weeks in major Colombian cities. The main target is a recent hike in bus fares from 12 to 15 cents. Inflation last year hit a record 29 percent and labor unions have demanded wage hikes up to 50 percent The average monthly wage is \$100.

Officials claim terrorists are fomenting the unrest prevent or disrupt the presidential election Sunday. Critics of the government say it is a protest by the public against unpopular economic programs.

Tension between Russia, U.S. building steadily

tensions are escalating to new heights as the Carter administration tries to cope with rising Soviet pressures in Africa, an internal crackdown on dissidents and a Red military buildup in

Eastern Europe The tougher U.S. tone has parts of this capital approaching the anticommunist ferver that marked the Cold War of the late 1940s and the

The administration's aim is to get Russia to reverse itself while satisfying this country's voters - heading toward the fall congressional elections - that the government is alert to the continuing Soviet tests of U.S. resolve.

The rhetoric is mostly that of Zbigniew Brzezinski, the national security adviser who has successfully counseled President Carter to publicize the criticism and to put more "bite" in its statements.

Once thought to favor easing the Cold War, Brzezinski has evolved into a leading skeptic of Soviet intentions. He was recently quoted as explaining. "Anybody who maintains that one has to be constant in one's views in every respect for decades is a jerk.'

Why the administration is publicizing its concerns now is not entirely

For instance, there is concern, particularly at the State Department, that the partially completed treaty with the Russians to limit strategic nuclear weapons might be forfeited in the turmoil.

A number of key issues remain unresolved in the deliberations, which were resuming today in New York between Secretary of State Cyrus R. Vance and Soviet Foreign Minister Andrei A. Gromyko

Vance acknowledged that the two sides made little progress in weekend talks here despite Carter's personal intercession. Hopes for an early accord or a summit meeting between

Carter and Soviet President Leonid I. Brezhnev this summer are receding.

While the Russians are interested in completing the treaty and aware of the "negative spillover" from the African adventurism, a senior U.S. official said, Moscow is willing to take that risk

A second concern was raised by

Analysis

another official in general agreement with the administration.

Once you get the anti-communist monster out of the bag in this country, it is difficult it get it back in," he told the Associated Press.

"If you stir the anti-communist psyche to a sufficient degree that it begins to be really worried about any deals with the Soviets, then even dealing with them on a cultural basis becomes very difficult.' So why is the U.S. taking its new,

hard line toward Moscow? Among the reasons, according to knowledgeable administration offi-

cials, are these: -The frustration that Soviet and Cuban penetration in Africa is deep-

ening despite private Kremlin assurances, in March that the Russians would appeal to Havana to cut back. Since Soviet Ambassador Anatoly

F. Dobrynin talked with Vance, the

Cuban force has ballooned from about 24,000 to between 38,000 and 40,000

-The domestic political pressures that require Carter to demonstrate his determination in dealing with the Russians even as he is trying to conclude the weapons treaty and an accord banning all U.S., Soviet and

British nuclear tests. -Pressures from moderate Arab and African countries seeking reassurances, as one U.S. official put it, "that the president is ready to do something about the rolling Red tide" in their regions.

-The hope that, the Russians will get the message, if it is repeated often enough in public and in private, that their actions are not consistent with what Brzezinski calls "the code of

detente. "My hope," he said last weekend, is that through patient negotiations with us, but also through demonstrated resolve on our part, we can induce the Soviet leaders to conclude that the benefits of accommodation are greater than the shortsighted attempt

to exploit global difficulties. In this vein, the administration has decided to explore with its West European allies in Paris next week possible ways of propping up friendly African countries, perhaps by using NATO as a conduit for arms and other

ERY

SEPULVEDA, Calif. (AP) - On a platform in a roped-off suburban street on a swelteringly man with slicked-back hair and sagging jowls grips a microphone with one hand, waves the other hand in the air and bellows, "It's either them or us, and we're for

This is the face of California's property tax re-

The speaker is Howard Jarvis, a 75-year-old former newspaper publisher, now head of a landlords' association and sponsor of a \$7 billion property tax cut proposal, Proposition 13 on the June 6 state ballot.

Pollsters in California predict adoption of Jarvis' proposal, which would cut property taxes by an average of 57 percent. Gov. Edmund Brown Jr. opposes the plan but is drafting plans to cut back government services.

In the cheering crowd is a middle-aged woman whose husband is a city surveyor. Her home has just been deassessed from \$32,000 to \$63,000. She plans to express her anger by yeting for Prop-

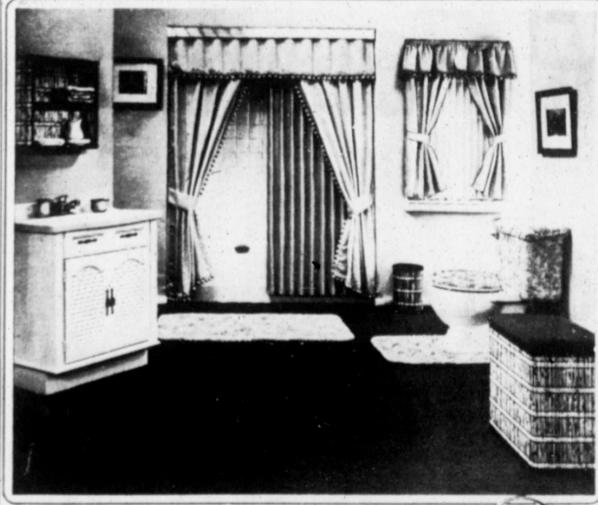

osition 13.
"They're scaring the people by saying they'll cut back on the fire de partment and police. said the woman, who refused to give her name. "I don't believe it. Everybody has to do without something. Now government will have to do without something.

Her husband said his department will be cut 30 percent if 13 passes, but he's voting for it anyway. "So I'll cut my throat, he said. "I'll get another job, go somewhere

People like these are the backbone of Jarvis' movement. They live in suburbs, where property assessments, fueled by inflation and a tight housing market, have exploded. In Jarvis they have a leader who tells them their anger is not only justified, it is hero-

But opponents say Proposition 13 would not hurt politicians, but the more than 400,000 public and private employees who would lose their jobs, plus millions more who depend on local government services like schools, police and fire departments, libraries and parks - all funded partly by property

A weathered metal cross in Oak Cemetery on Cover Hill marks the grave of Fred Schaffer, one of 2,209 victims of the Johnstown flood of 1899. The small Pennsylvania town has been hit with three tragic floods since 1899. (AP Laserphoto)

Johnstown remembers three floods of past

JOHNSTOWN, Pa. (AP) - The discovery of a child's body in the debris from last year's disastrous flood stirred dark memories for Johnstown residents, especially the elderly ones preparing to commemorate an even more tragic flood that has haunted

them for 89 years The lastest flood victim - 8-yearold Cynthia Louise Gibson - was identified Tuesday, on the eve of the 89th anniversary of the day when 2,209 people lost their lives under a wall of water that made this town's name synonymous with watery di-

The Gibson girl's body was found Monday by several men searching for salvageable flood debris. Eight others are still missing from last year's

Daise Heslop, a 95-year-old survivor of the 1889 flood; called the deluge last July the most frightening of three floods she lived through. "I never saw such lightning and

rain in my life. We thought it was the end of the world," she said. Mrs. Heslop recalled that as a year-old in that first disaster, "My

father called us to the window and he said, 'Look over there.' All the water was coming from the dam. She said she stood on a piece of furniture and watched her grand-

mother float out a third-floor window of the family's home and perish. Her father also died, Tonight, Mrs. Heslop will be among

some 20 survivors expected to gather at a banquet to share memories of the swirling waters released when the South Fork Dam burst.

Mrs. Heslop survived other floods, including the 1936 St. Patrick's Day disaster that killed 17 people

Central American coast shaken Tuesday by two seaquakes struck seconds apart

MANAGUA, Nicaragua (AP) -Two strong undersea earthquakes seconds apart shook most of Central America Tuesday night. They caused some panic, broken walls and window panes and power blackouts in Nicaragua and Costa Rica but no casualties or serious damage was reported, offi-

The quakes struck at 9:05 p.m. EDT and 10 seconds later and registered 5 and 5.5 on the Richter scale. The epicenter was about 6 miles under the Pacific off the coast of the Nicaraguan port of Corinto, 106 miles northwest of Managua, the Nicaraguan Seismographic Institute said.

Parts of Managua were blacked out. Communications were cut indefinitely with Corinto, and telex and telephone links between Managua and other cities were interrupted. 1976.

The Nicaraguan Red Cross said many people in Managua were treated for norvousness and hysteria. There was panic also in San Jose, the Costa Rican capital.

The quakes were felt to a lesser degree in Honduras and El Salvador. Only slight tremors were felt in Guatemala, where at last 23,000 persons were killed in quakes in February

An earthquake measuring 6.2 on the Richter scale leveled Managua in December 1972, killing more than 5,000 Edit

The Richter scale is a measure of ground motion as recorded on seismographs. A quake registering 5 can cause considerable damage, 6 severe damage and one registering 7 is a "major" quake capable of wide-

John Hill hires former treasurer candidate as a state campaign budget consultant

AUSTIN, Texas (AP) - John Hill, showing no trace of doubt he will be elected governor in November, has hired defeated treasurer candidate Harry

Ledbetter to write him a state budget 'The only way I can be effective in January is to begin preparations in June," Hill told a news conference Tuesday. He still has Republican Bill Clements

to contend with in November. Ledbetter was Comptroller Bob Bullock's chief clerk when Bullock first was elected. Bullock, a political foe of Hill, makes revenue estimates that could help or hinder a governor's budgetary

Hill laughingly admitted Ledbetter's friendship with Bullock "might be a fringe benefit.

Every governor has a budget director, and Ledbetter appears to be first in line for the job if Hill is elected. But Hill was non-committal, saying he couldn't promise jobs at this stage.

On other matters, Hill said: -Billy Goldberg, a Houston lawyer and major Hill fundraiser, is among the two names recommended

to him most frequently for chairman of the State Democratic Executive Committee. He declined to name the other.

The state party's September convention - not the gubernatorial nominee — should select replacements for Democratic National Committee members Jess Hay, Alicia Chacon and Joe Bernal, who are

- He expects to have a staff report within a month on the death of Larry Lozano, who died of injuries: received in the Ector County jail at Odessa. A coroner's inquest exonerated jail officials, but Mexican Americans have continued to protest the death:

Hill said his appointment of Ledbetter, a former analyst for the Legislative Budget Board, was partial fulfillment of a campaign promise of sound money management.

"After all, budget management is the key tool to controlling costs." he said.

Hill said he is open to increasing budgets of state agencies that are under-funded, such as the Department of Public Safety claims to be.

But, he added, "The theme of hold the line is going to be an important theme throughout my administra-

Legislators generally have ignored governors' budget recommendations, and Hill was asked what

made him any different. "I would hope that by the hard work we are going we will build credibility with the to put in . Legislature... I am going to do every thing I can to bring about the enactment of the kind of budget

recommendations I make," Hill said. Ledbetter holds bachelor's and master's degrees in economics from Texas A&M, where he quarterbacked the 1965 and 1966 Aggie football team. He worked for the budget board from 1969 to 1973. worked two years for Lt. Gov. Bill Hobby and

became Bullock's chief clerk in 1975. He rejoined Hobby's staff in 1976, then quit last August to run for treasurer. Warren G. Harding defeated him in the May 6 Democratic prima-

Amy shows early signs of money-making abilities

Editor's Note: This is the fourth part in a series excerpted from the book, "Cousin Beedie and Cousin Hot," by Jimmy Carter's cousin, Hugh Carter. "Beedie" (Hugh) and "Hot" (Jimmy) grew up together in Plains, played, hunted, fished together as little boys, and later were in politics together.

Hugh Carter has a reputation as a humorist and raconteur in Georgia, where he serves as a state senator. Here he tells about Amy, the "first daughter" - her lemonade business, her interests, and her life in the White

tic prima-

Everyone knows that when her Daddy was running for the presideney. Amy earned pin money with a lemonade stand. Few people, however, know the whole inside story of her business enterprise.

In the first place, it wasn't just Amy who was in the lemonade business. She had two equal partners, her next-door neighbors, the brothers Gnann - John, 9, and Sidney, 7. They had a good idea and they started out nicely

They charged a modest five cents a glass for their pink lemonade, serving cups of it from a cardboard box. Then Amy supervised the building of a better stand of wood, propped on some old bricks. The kids painted their names in a row along the bottom, "John Amy Sidney," in the order of age, and above it, painted their new price. "LEMONDADE 10 cents.

The stand was positioned right between Amy's house and her partners' because that was where the action was with tourists driving and walking by and reporters keeping a constant watch whenever Carter was there. The kids' business boomed.

They did very well but kept getting more and more greedy and raising the price, and the price of lemonade went up to 15 cents, and then a quarter. It was Sam Donaldson, the famous ABC White House correspondent who gave Amy the idea of diversifying and adding sandwiches,

because he was hungry

Amy and her sidekicks rushed into the candidates house and emerged with mostly peanut butter sandwiches, and a few of pimiento cheese. To their surprise, the peanut butter sat there while the pimiento cheese sold quickly at 50 cents apiece.

When there was a little grumbling eventually at the lack of variety, Amy came up with tuna-fish sandwiches and charged \$1 apiece. Then the kids got greedier and upped the price of the peanut butter and cheese sandwiches to \$1 and tuna to \$1.50

I think about this time Jimmy and Rosalynn got a little concerned. They wanted Amy to have fun and learn a little about business, but they didn't want her to gouge the public

Meanwhile, Amy had discovered a new source of wealth. The reporters wanted to borrow her Frisbee to kill time and exercise while waiting for Jimmy to emerge from the house, on the occasions he was home, between campaign trips.

Amy, getting the hang of the business, said, "You can use it if you pay for every quarter of an hour.

They established a price for 15 minutes, and Amy, not trusting anybody's time sense or watch, got the timer from her mother's kitchen to make sure nobody cheated.

Sometime before the end of July 1976, everybody in charge of Amy. including the Secret Service, thought it was time for Amy to close shop. I don't know what her total earnings were, but I do know that many days she made as much as 25 dol-

The situation had gotten just a little out of hand. Her parents feared the outlandish high prices Amy was getting from eager reporters who were spoiling her and keeping her from learning the true value of a dollar.

Though she no longer has contact with the press, in the White House she does see her old lemonade-stand partners. In fact, her Christmas present was a gift from them — a huge pet hermit crab.

It's really to Jimmy and Rosalynn's credit that Amy is not more spoiled

mmananananan mananan m

ANTIQUES

than she is. They did a lot of things to help her adjust in those first months at the White House

For one thing, Jimmy and Rosalynn took her along when they went to inspect the new \$59 million Children's Hospital National Medical Center, which had been in the process of building for many years.

To help Amy get over any remaining shyness, the new president playfully showed Amy the facilities in the therapy room for recuperating children, and then picked her up and tossed her on a water bed, where she giggled and bounced around.

That was three months after Jimmy took office. Eleven months after, Jimmy was still being the average, normal father. He took several hours off to attend a violin recital at St. Patrick's Episcopal Church, where Amy, for the first time, showed what she could do on the violin.

Afterward, Jimmy and Rosalynn joined the other proud parents for cookies and punch and conversation about their offspring.

Jimmy even attended a pre-Thanksgiving dinner served by Amy's fourth-grade class at Stevens Elementary School in Washington. and I don't believe he got any indigestion. Then there was the day he found himself attending a special assembly at her school.

Dressed in yellow ballerina costume, so I am told, but wearing stocking feet instead of ballet slippers, Amy danced the role of a shopkeeper in the child's ballet named "Doll on a Music Box.

The Carter family was tickled at Amy's pride at being a ballet performer. So pleased was she that she kept waving at her daddy from the stage now and then to make sure he was watching, even once when she

was actually dancing. Amy has a mind of her own, and it is a liberal mind. What is more, she knows how to handle her Grandmother Lillian. This is one story that made the rounds of the family about the time Miz Lillian was taking care of Amy while Rosalynn and Jimmy were involved in the presidential campaign.

Amy asked, "Grandmother, can I have Elizabeth come over on Saturday to play with me?

Miz Lillian asked, "Is she black?" Amy immediately responded in a scolding tone, "Grandmamma, you're not supposed to ask that.

Amy was a chip off the Carter block and I could see, in my mind's eye, Jimmy playing freely with his little black friends when he was her age. Lillian was probably just being cu-

rious. She had encouraged Jimmy to play with black children, but Amy was taking no chances.

Amy's claim to fame right now according to her own words, is that she can hang upside down from a tree. Everybody thinks that Amy is just a bookworm, who takes a book to the table with her, even when there's company at the table. But that's only one part of Amy

The other part is the tomboy Amy. She's happiest on a bike or trampoline, or playing kickball or football or bowling, and she feels about animals the way her Daddy did when we were kids. She wears her cat Ying-Yang draped over her shoulder the way her Daddy used to wear his squirrel on his

What is the White House going to do to Amy? I don't know. It is making her just a little bit bratty in that she passes judgment and doesn't hesitate to say that this and that are "dumb" or show her contempt for various

But maybe she'll be saved from it by the calming influence of Rosa-

I'm not going to say that Amy is mean. Quite the contrary. She is very kindhearted and when she loves so meone, she almost overwhelms that person. I'm thinking of the black women who was her babysitter back at the Governor's Mansion - the woman who was serving a snetence for murder

I know Mary Fitzpatrick. I remember her well because she also, on occasion, looked after my grandchildren. Amy felt the goodness of this woman in spite of the one bad deed she had committed, and bestowed her love on Mary like a blessing:

The Carter family rehabilitated Mary, but I give Amy most of the credit. It was very touching that when Amy came to the White House, one thing she had to leave behind was Mary, who had been a trusty at the prison, permitted to work in the Governor's Mansion.

A girl with less depth would have forgotten Mary, since everyone wanted to be her new friend. But no, Amy prayed for Mary and wrote letters to her. Jimmy and Rosalynn were so touched that they used their influence to get Mary under their care and su-

pervision. And now Mary is at the White House and Amy looks after her as much as Mary looks after Amy. When Amy studied a book to prepare her for becoming a member of the First Baptist Church in Washington, she shepherded Mary through the same ex-

And when Mary Fitzpatrick was baptized in the same church, Amy was the first person to hug her and congratulate her.

I remember when Amy was the only member of the family who did not want to come to the White House to live. Her daddy had a long talk with her and she had a whole list of reasons - Mary Fitzpatrick wouldn't be there, and neither would her friends, and where would she ride her bike?

Jimmy had answers for all that -Mary could come visit. Amy would have a whole classroom of new friends and she could ride her bicycle on the big White House grounds and at Camp David.

But still Amy wasn't happy. How could she go and leave her tree house? And would there be room for her huge dollhouse? Daddy Jimmy promised to design another tree house exactly like the one she already had. And as for the dollhouse, he personally carried it on moving-in day. He was a pretty good daddy.

Hugh "Beedie" Carter in front of his Plains antique store, the most photographed antique store in the world Garbage truck driver finally wins MA degree

CHICAGO (AP) - After battling alcoholism for years, John A. Smith finally has a master's degree in urban studies, but he doesn't quite know what to do with it.

He's been studying the city inside out for years - as a garbage truck driver at the incinerator yard.

That's why it came as a surprise to some neighbors and acquaintances when Smith, 51, marched to "Pomp and Circumstance" at Loyola Univer-sity commencement ceremonies Saturday.

He says he's not sure how he will be able to use his degree.

"I don't know if there's any chance of starting anything this late in the game," he said. "I would like to do something that requires more head work, but I'm not sure what."

Smith said he grew up in a tough Irish neighborhood as a "street kid" and began drinking heavily even before finishing high school.

As an adult, he went through two marriages and divorces and almost lost his city job on more than one occasion because of his drinking.

'There had been a few minor inci-

dents with the truck and I was lucky

to get off because, in those days, I

didn't always remember how they'd

happen," he said.

Smith first went to college after World War II when he took advantage of the GI Bill and attended Loyola and John Carroll University in Cleveland, But by 1951, he said, he had had enough of school and took a job with the city hauling trash.

He said he was a heavy drinker until 1965, when he decided to dry out for good at a hospital "and with therapy and the aid of many friends.

"I don't really know why, except it was either that or die or wind up in the nuthouse," Smith said.

He started night school at Loyola in 1967 and finished his bachelor's requirements for a history degree in February 1973.

"I still had no plans, but it was good for my self-respect," he said. "Originally, I'd had no idea of going for the degree. Then I heard about this urban studies program. I'd always liked economics, sociology, math and political science, so in 1974 I enrolled."

He received seven A's and five B's in his graduate program.

Despite his/academic status, Smith said he likes his job because it gives him time to think and it is worth-

Woman becomes expert on wines

NEW YORK (AP) - When Mary Mulligan got her first job seven years ago with the Italian Trade Commission, she was hired because she was an All-American girl who could understand American customs and

She didn't know much about wines. Today, she has become so knowlegeable that she is director of Italian wine promotion in the United States.

"The Italians figured, and I think sensibly, that if they were going to promote their wines here, they had to have someone with a typically American point of view," says Ms. Mulli-

Since starting work with the commission, she has become fluent in Italian, has taken many trips to the wine regions of Italy and has tasted a lot of Italian wine, "the best way to

"I was never a wine snob and am not today," she says. "I believe that you get a basic knowledge of wines simply by drinking what you like and that you can drink anything with any. kind of food if you like it. That's the American way

She frequently attends meetings of the "greats" among Italy's wine producers, "the top names, the men with the greatest reputations and knowledge," and she is usually the only.

"It's like being with a group of famous scientists or movie stars,' says Ms. Mulligan. "I feel honored to be among the wine luminaries - and to be accepted by them.

She now feels qualified, she adds, to tell her fellow Americans how to get better acquainted with wine, how to serve it, and how to give a wine tasting for fun or organizational prof-

"A wine tasting offers a chance for hosts and guests to discover what wines they like and which they don't," she says. "It's a great ice-breaker because people automatically compare taste experiences and start conversations," says Ms. Mulligan, who

-If a wine tasting is to be serious, keep your party group small and furnish a different glass for each wine served. Clear crystal stemware — the larger size the better is proper — for sniffing bouquet. Colorless glass is needed so you can see the true color of a wine. Change glassware, or rinse, for each change of wine

-For a light-hearted sizable party rather than a learning experience, with the wine tasting held either inside or outdoors, it would be easier to use small disposable plastic glasses. It is best not to serve both red and white wines at the same tasting because they don't mix well. Whites are lighter and reds are heavier in fla-

-Serious or fun, your guests will get more out of the tasting if you select a variety of wines from the same wine-growing region or from a wide geographic area. Ask your retailer for advice on price and selec-

-How much wine? One bottle (25 oz.) for each six to eight guests will allow everyone to try a small taste, and then, if it's a favorite, to go back for more. Tastings should be limited to reasonable sips - not gulps! Serve reds at cool room temperatures; whites and rose should be offered

-Keep plenty of napkins on hand for spills. Tactfully conceal ashtrays. (You're not supposed to be able to capture the wine tastes if you are

-Mild cheeses and mild-flavored crackers go well with the subtleties of wine flavors and are helpful between samplings. Never use pungent cheeses; they overpower.

-To taste, use sight and smell as well as the mouth. Don't be timid. Hold up the glass because clarity and brilliance are assets. White wines. darken with age, while reds lighten.

Now, take not a tiny sip but a decent mouthful and swirl the wine around so that it reaches the tastebuds at the back of the tongue. Is, it bitter, smooth, thin, full-bodied? And above all, do you like it? After swallowing, notice whether the flavor lingers pleasantly in the back of your

French chef has hamburger yen

By TOM HOGE AP NEWSFEATURES WRITER

Guess whom I met in a New York hamburger joint: That champion of la nouvelle cuisine, famed French gourmet chef Paul Bocuse

Bocuse and two other top French chefs, Roger Verge and Gaston Lenotre, were about to take off on an inaugural New York to London run of Trans World Airlines. Accompanying the trio on the flight were 4,000 pounds of fine foods that they would prepare for the passengers, plus 76 cases of vintage wines. It must have been a memorable trip.

But why would epicures like Bocuse and his colleagues set up an interview in a fast food shop whose menu is about as remote from gourmet fare as one can get? It seems Bocuse likes American hamburgers. In fact, the master is looking kindly these days on much American food.

"It has improved a great deal in the last decade," he said between bites of ground beef and roll. "American food products are better than they used to be. I have been especially impressed on how the quality of your fresh vegetables has improved.

How about French cooking? What is this "nouvelle" cuisine one hears so much about?

"It's a combination of methods aimed at more healthful dishes," said Bocuse. "For instance, we do not thicken gravies or sauces with flour but cook them until they thicken naturally, then perhaps near the end add butter or some creme fraiche or heavy cream:

Devotees of the new method use meat stock sparingly for gravies, preferring to use natural meat juices, with a little butter or cream added near the finish.

Under la nouvelle cuisine, vegetables are cooked much more briefly than before, a trick the Chinese learned several centuries ago. They not only turn out crisper but are healthier

How did this new method evolve? 'Many, like Bocuse, Lenotre and myself, have our own restaurants now We compare notes with each other from time to time and we also find time to travel and find out what they are doing in other lands.

Here is a Bocuse formula for Sauce Smitane which is much simpler than most French sauces. Good with sauteed sole or other white meat fish:

1 large onion, chopped fine 3 tablespoons unsalted butter

1 cup dry white wine 2 cups creme fraiche or heavy

1 teaspoon lemon juice

Boil onion 1 minute, drain, rinse, drain again and saute 20 minutes in skillet with 1 tablespoon butter. Stir frequently and do not let brown. Add wine and boil till wine evaporates. Add creme fraiche and salt. Bring to boil, reduce rapidly by one third. Strain sauce through double layer of cheesecloth. Bring back to boil, remove from flame, adding 2 tablespoons butter cut into tiny pieces. Stir sauce and flavor with enough lemon juice to give a slightly tart taste.

Use shortest cycle

Use the shortest dishwasher cycle to clean dishes, advises Linda Mc-Cormack, family resource management specialist with the Texas Agricultural Extension Service. The Texas A&M University

"Thank you, Pat Walker, for giving me a new life!"

703/4 lbs. and 843/4 inches later, Barbara Alarcon says:

"I used to think some people were fat, others skinny and that you couldn't change what you were. Pat Walker's has proved me so wrong and am I glad. People used to tell me I had large bones, but as it turned out, underneath the fat was a small frame. Thank you, Pat Walker for giving me a new life. Other people think more highly of me now, and as for me, I have a selfconfidence I've never had."

Many teenage girls victims of 'skinny' disease

By SHERYL FITZGERALD Newsday

The time is puberty, and girls sometimes grossly overweight, more often just dissatisfied with their image of themselves or simply unable to recognize that the changing contours of their bodies are signs of maturation - begin dieting.

They think that thinness will solve the problems of shyness and confusion over changing needs and expectations and make them happier and healthier people, according to Dr. Michael Nussbaum, chief of adolescent medical services at Long Island Jewish-Hillside Medical Center. So they diet, diet, diet until what may have been a basically healthy notion becomes an all-consuming fear of gaining one pound, one ounce, fear of getting; fat.

At this point, he continued, they are no longer healthy children. They are victims of anorexia nervosa - the "skinry" disease - a condition British experts estimate strikes one out of every 100 teen age girls. Statistics in the United States are not available, but experts are inclined to accept the British figures as indicative of the problem here

Anorexia is a psychosomatic disorder v/hich drives the victim to refuse

The English physician, Sir William Gull, first described the disorder in medical literature in 1868 as one that strikes the daughters, and on rare occasions the sons, of upper-class families where hunger is not a problem. The phenomenon is most often observed in young women 12 to 21 years old, though there are a small percentage of anorexics among older women and teen aged boys. The disorder is often accompanied by discontinued menstrual flow, slow heart rate, low metabolism and constipation.

But symptoms vary. "There are many different types of anorexics," said Nussbaum. "While the occurence of severe weightloss may be the same and certain basic generalizations can be made, each case is different and must be examined and handled individually for treatment to be success-

Dr. Hilde Bruch, professor of psychiatry at Baylor College of Medicine in Houston and an authority on anorexia, divides it into two general types, primary and atypical.

The primary syndrome is the most uniform. In this type, she said, the underlying impulse is a struggle for control, for competence and a sense of

Primary anorexica can be identified by the presence of a distorted body image that makes the anorexic unable to "see" herself as abnormaloly thin; an inability, or failure, to recognize signs of nutritional need and the consequence restriction of food intake and fad dieting. These will be accompanied with denials of the desire to eat and with periodic episodes of gorging followed by self-induced vomiting, enemas or laxative

Still other symptoms include increased participation in sports and a drive for achievement that persists in . spite of severe emaciation. Anorexics feel that they can only function in response to the demands of other.

In the atypical syndrome, she said, a distorted view of the very act of eating may be the primary cause, with the loss of weight a secondary

In "Anorexica Nervosa," edited by Robert A. Vigersky, Dr. Bruch writes, "Characteristically, patients with anorexia nervosa have been well cared for as children, were well-fed, well-dressed, and were exposed to the best educational and cultural opprtunities. The parents may be de-

scribed as over-protective, over-concerned and over-ambitious. They over value their children and expect obedience) and superior performance in

Others who have studied the disease say that an additional motivation is thedesire to neuter the body, to render it less female, thereby avoiding the realities of human sexuality and the growth into womanhood. They don't want the contours and curves of the normal womanly figure. Somehow, those who treat anorexia say, they associate the ingestion of food with becoming pregnant. Whatever the underlying causes, it is important to refer the patient to a physician, clinic or hospital center that is experienced in treating anorexia, says Bruch.

ANSWER TO PREVIOUS PUZZLE

Treasury bonds Texans split on two ballots

WASHINGTON - Here's how area House members were recorded on major roll call votes May 18 through May 24. There were no votes in the Senate because of a filibuster.

ROLL CALL REPORT

ALASKAN LANDS. Rejected, 141 for and 251 against, an amendment to reduce by five million acres the Alaskan wilderness to be preserved in its natural state by the federal government. The amendment was proposed to HR 39, later passed and sent to the Senate. The bill puts about 102 million acres in preserves such as the National Park System, National Wildlife Refuge, Wild and Scenic River System and the National Wilderness Preservation System. Committee and floor consideration of the bill has provoked a classic environment vs. development confrontation.

Rep. Don Young, R-Alaska, the sponsor, said: "I am sorry to say that statehood did not terminate our status as a colony...the pending legislation is the grossest example of the type of situation forced on the citizens of Alaska by this Congress and this government for years."

Rep. Morris Udall, D-Ariz., an opponent, said that in granting statehood the federal government allotted 105 million acres to Alaska. "But we are not going to give large areas in the middle of a new national park (to Alaska). This consists of 14 areas and five million acres."

Members voting "Yea" favored reducing the protected federal areas by five million acres.

Reps. Samuel Hall, D-1, James Collins, R-3, Bill Archer, R-7, Jake Pickle, D-10, W.R. Poage, D-11, Jack Hightower, D-13, Kika de la Garza, D-15, Omar Burleson, D-17, George Mahon, D-19, Abraham Kazen, D-23, and Dale Milford, D-24, voted "yea."

Reps. Charles Wilson, D-2, Jim Mattox, D-5, Bob Eckhardt, D-8, Jack Brooks, D-9, Richard White, D-16, Barbara Jordan, D-18, Henry Gonzalez D-20, Roert Krueger, D-21, and Bob Gammage, D-22, voted

Reps. Ray Roberts, D-4, Olin Teague, D-6, James Wright, D-12, and John Young, D-14, did not vote.

GIs IN KOREA. Rejected, 142 for and 247 against, an amendment to thwart the Administration plan to gradually withdraw all 32,000 U.S. ground troops in South Korea. The amendment permitted a withdrawal of only 6,000 troops. It was proposed to HR 10929, the fiscal 1979 defense procurement bill later passed and sent to the Senate (see vote above).

Rep. Samuel S. Stratton, D-N.Y., the sponsor, said that "if we were to remove all our infantry forces from Korea...the temptation would be very great for (the North Koreans) to attack."

Rep. Stephen Solarz, D-N.Y., an opponent, said that after the 32,000 troops are gone "we will still have a military presence in South Korea because (Carter) is not planning to withdraw our air presence or our naval presence within South Korean

and surrounding waters." Members voting "nay" favored the troop withdrawal plan.

Hall, Wilson, Pickle, Poage, de la Garza, White, Burleson, Gonzalez and Gammage voted "yea." Collins, Roberts, Mattox, Eckhardt, Brooks, Wright, Hightower, Jordan, Mahon and Milford voted

Teague, Archer, Young, Krueger and Kazen did

Dr. Vernezobre adds more medical study

KANSAS CITY, Mo. - Dr. E.F. Vernezobre of Midland has completed continuing education requirements to retain active membership in the American Academy of Family Physicians, the national association of family doctors, according to a

release from the academy. Members must complete a minimum of 150 hours of accredited continuing medical study every three years. They are eligible for re-election at the end of the third year after election to membership. The Academy is the only national medical group that

requires members to keep up with medical progress through continuing education, according to the

MC summer session registration high

More than 550 students have preregistered for the first summer session at Midland College, according to Registrar Dee Windsor.

Preregistration ends Thursday. Interested persons should visit the Office of Student Services, Administration Building, from 7 a.m. to noon and from 12:30 to 5:30 p.m.

Official registration will be held from 2 to 4 p.m. and from 6 to 9 p.m. Monday in the Physical Education Building. Classes are scheduled to begin June 6 and continue through July 11.

The 6 Month "MONEY MARKET SAVINGS CERTIFICATE"

Effective June 1 Citizens Savings will pay 1/4% more than the 6 month Treasury Bill rate on \$10,000 minimum for 6 months.

The Treasury Bill rate is subject to fluctuation. Please call our office for the current rate we are paying on "Money Market Savings Deposits."

*A substantial interest penalty is required for early withdrawal.

WEDNESDAY, MAY 31, 1978

ACCEPTING a special college scholarship from Continental Oil Co. representatives is, second from right, M. Scott Carrasco, son of Mr. and Mrs. Manuel G. Carrasco. On hand for the presentation are, from left, Tony Gordon, director of recruiting: Stafford Frank, an engineer for the Midland Production Division, and his father. A 1978 Midland High School graduate, Carrasco plans to attend

Texas Tech University and major in petroleum engineering. The Conoco scholarship program is designed to attract outstanding minority students to the technical professions in the petroleum field. In addition to financial aid, the scholarship includes a summer job with the company. (Staff

project, and consideration of its ex-

pansion to the full field is to take place

The Bell Creek field, discovered in

June 1967, now consists of six water-

flood units. The Gary-DOE project is

in Bell Creek Unit "A", which was

estimated to have 122 million barrels

Ultimate primary recovery was es-

timated to be about 22 million barrels,

or 17 percent. Waterflooding, which

was begun in August 1970, is expected

to produce another 36 million, leaving

behind about 53 percent of the original

Gary has estimated the tertiary

target oil in the pilot area at from

between mid-1979 and mid-1981.

of oil originally in place.

214,000 to 268,000 barrels.

oil in plance.

next logical assignment has to be the

Agriculture Department, for a total

And whatever a government office does, it invariably "leaks" - trickling out supposedly confidential information and proposals to a favored few

who know where to tap the holes. John F. O'Leary, deputy secretary of energy and a respected veteran of the federal agencies, says a lot of the exchange is legitimate - even neces-

sary - but it can get out of hand. Thus, the American Petroleum Institute said the activities boasted by 'regulatory analyst" John Iannone in a memo to his boss were entirely legal, and part of a legitimate effort to understand and advise its indus-

try's federal regulators. But the memo spotlighted a chronic dilemma of those regulators: close contact with the regulated industry is useful and sometimes vital to them, and yet too close a relationship threatens to corrupt the process of honest

regulation. Iannone claimed, "I received draft of Subpart K (a proposed natural gas liquids regulation) two weeks before DOE (Department of Energy) offi-

He said he "worked closely with DOE on gasoline price monitoring and got them to agree to a number of important changes, before the system was released for public comment."

He said he got internal department studies which then "were carefully distributed to members of Congress and were used to discredit DOE's arguments" on behalf of President Carter's National Energy Plan.

Bardin said in an interview last week he had not confirmed Iannone's claims but was concerned about "I don't think these draft docu-

ments should be leaking all over the place the way they seem to do," said O'Leary, who is Bardin's immedi-

ate supervisor was more resigned about leaks but was still worried. "What upsets me about the Iannone

memo is the implication of a special relationship, that he has the inside track, that there is some person over whom he has influence," O'Leary said in an interview. O'Leary said that danger can not be removed by eliminating informal contacts between public and private

all their meetings, or trying to stop all the leaks of documents. The government, O'Leary said, simply does not have the special experts it must sometimes consult in order to write regulations that will work; it has no choice but to talk with

officials, or keeping a public record of

private experts and it can't always wait for a public hearing. "Many times it's not in a meeting, but a phone call," said O'Leary. He said whatever somebody tries to hide, there is a very high probability

that somebody else will leak it, to his

opponents or the news media. Professionally I feel it may be excessive," O'Oleary added, "but if I had to choose between no leaks at all or the amount we have now, I'd take the leaky world."

Edwards gains wildcat; big gas well potentials

Continental Oil Co. No. 1 Ruby Bishop is to be drilled as a 12,100-foot wildcat in Edwards County, six miles northeast of Carta Valley.

The explorer is 17 miles south of the Wardlaw field and 18,700 feet southeast of a 2,730 foot dry hole

The drillsite is 1,258 feet from north and 2,770 feet from east lines of section 47, block JGA, TCRR survey, abstract 1313.

Jeff Ellis of Colorado City an-

nounced location for a 7,000-foot project in the one-well Gill (6900 Pennsylvanian Reef) field of Scurry County, two miles northwet of Ira.

The project is one location south of production and 160 feet from north and 1,495 feet from west lines of section 139, block 97, H&TC survey.

Cities Service Oil Co. No. 4610 Dora Roberts Ranch has been completed in the War-San pool of Midland County, 12 miles southwest of Midland.

Operator reported a calculated, absolute open flow potential of 9.4 million cubic feet of gas per day, through perforations from 11.762 to 11.850 feet after 10,000 gallons of acid and 70,000 gallons of fracture solution.

and nine and five-eights-inch casing is cemented at 12,540 feet. The plugged back depth is 12,422 feet. The well is 660 feet from north and

The hole is bottomed at 12,540 feet

west lines of section 46, block 41, T-3-S, T&P survey.

STERLING GASSER

The Sterling Co. No. 1-20 Stewart has been completed as a 1/2-mile extender to the Credo, East (Upper Cisco) field of Sterling County, seven miles northwest of Sterling City.

The well finaled for a calculated, absolute open flow potential of 920,000 cubic feet of gas per day. Completion was through perforations from 7,508 to 7,729 feet. The pay was acidized with 500 gallons and fractured with 42,000 gallons.

Wellsite is 1,000 feet from north and 660 feet from east lines of section 20, block 23, H&TC survey.

Total depth is 7,800 feet and 4.5-inch casing is set at 7,800 feet. The plugged back depth is 7,741 feet.

SODA LAKE WELL

Gulf Oil Corp. No. 2 T. B. Pruett and others has been completed as the second well in the Soda Lake (Fusselman) field of Ward County, 10 miles northeast of Barstow.

Operator reported a calculated, absolute open flow potential of 51,500,000 cubic feet of gas per day, through perforations from 19,034 to 19,108 feet. The pay section was acidized with 27,000 gallons.

Total depth is 19,200 feet and 5-inch liner is set at 19,199 feet. Hole is plugged back to 19,108 feet.

The well, which did not produce any liquid with the gas, is 1/2 mile southwest of the No. 1 Pruett, discovery well of the Fusselman pay.

Wellsite is 1,320 feet from northeast and 1,650 feet from southeast lines of section 24, block 1, W&NW survey.

WINKLER TEST

Gifford, Mitchell and Wisenbaker announced location for a southwest offset to production in the Chevenne (Capitan) field of Winkler County, eight miles northwest of Kermit.

Slated for a 3,300-foot bottom, it is 912 feet southwest of production and 2,630 feet from south and 670 feet from east lines of secton 7, block 74, psl

EDDY OILEK

Orla Petco, Inc., Midland, announced potential test for its No. 1-D Kelly in the Herradura Bend (Delaware) area of Eddy County, N. M.

Operator reported a daily pumping potential of 75 barrels of oil and 12

King, Lynn get wildcats

Wildcat locations have been staked in King and Lynn counties.

Texas Pacific Oil Co., Inc. and Medders Oil Co., operating out of Midland, staked No. 1 J. C. Moorhouse, as a 6,100-foot wildcat, two miles southwest of Strawn sand production in the Ross Ranch field of King County.

Drillsite is 660 feet from northwest and 1,980 feet from northeast lines of section 117, block 13, H&TC survey, abstract 154, 17 miles southeast of

SECOND WILDCAT An application has been filed with

the Texas Railroad Commission to drill No. 1-A Golden, a 12,000-foot wildcat, by Kewanee Oil Co.

It is one location east of production in the Welch field in Lynn County.

Located three miles north of Welch it spots 467 feet from north and west lines of section 11, block C-41, PSL

barrels of water, gravity and gas-oil ratio not reported, through perforations from 2,448 to 2,454 feet.

The pay was fractured with 3,000 gallons. Total depth is 2,507 feet, and plugged back depth is 2,470 feet.

Location is 680 feet from north and 660 feet from west lines of section 5-23s-28e and three miles north of Loving.

NEW LEA WELL

North American Royalties No. 1 Long his been completed in the King. West (Pennsylvanian field of Lea County, N. M., for a flowing potential of 211.5 barrels of ail in 22 hours, through a 16/64-inch choke and perforations from 11,586 to 11,306 feet. The

pay was acidized with 2,000 gallons. Wellsite is 990 feet from north and 2.200 feet from west lines of section 8-14s-37e and 10 miles southeast of

EDDY PROJECT

N. M., No. 4-N-EP Stonewall-State Communitized is to be dridlled inside production in the Burton Flat (Morrow gas) field of Eddy County, N. M.,

eight miles north of Carlsbad. The project will be dug 1,980 feet from north and 660 feet from east lines of section 30-20s-28e. The contract depth is 11,500 feet.

AMOCO TESTERS

Amoco Production Co. announced locations for three projects in the Shugart (Siluro-Devonian) pool of Eddy County.

Each of the projects will be drilled to 13,300 feet. They are 12 miles southwest of Maljamar.

No. 10 Greenwood Unit-Federal is 1,980 feet from south and 660 feet from west lines of section 27-18s-31E.

No. 11 Greenwood Unit-Federal is 1,980 feet from south and 660 feet from

west lines of section 34-18s-31e. No. 12 Greenwood Unit-Federal is 1,650 feet from north and 1,980 feet

Yates Petroleum Corp. of Artesia, from west lines of section 35-18s-31e.
