AUSTIN, Texas (AP) - Both houses of the Legislature have voted unanimously to cut taxes on Texans' gas and electric bills and the money they inherit from relatives.

The House and Senate adjourned until Monday after approving the first tax relief bills of the three-day-old special session on Wednesday.

Final action on the measures might be weeks away. Each house's bill now goes to the other chamber, and there must be agreement on common language before a measure is finally passed.

Senators rapidly passed, 29-0, separate bills repealing the 4 percent state sales tax on household gas and electric bills and upping the tax-exempt portion of inheritances from \$25,000

But the House took 61/2 hours to pass, 136-0, a single bill granting some \$50 million more in tax relief than the

It applies the inheritance tax break to estates of persons who died after Dec. 1, 1977. The Senate inheritance tax bill applies to estates of those dying on or after Sept. 1, 1978.

The House also voted to add an inflation clause to the tax-exempt part of estates, increasing the \$200,000 by 10 percent every two years through

Commercial establishments operated as proprietorships, partnerships or "family corporations" no more than 10 stockholders would get the utility tax break along with resi-

dences under the House bill. The House adopted that amend-

ment on a close voice vote after tabling, 72-69, an amendment by Rep. John Wilson, D-La Grange, to exempt all commercial utility customers.

"If you think Safeway, Sears and Nieman-Marcus are going to give this money to consumers in the form of lower prices, you still believe in fairy tales.... This is \$240 million that is going to come out of the tax break for homeowners," said Rep. Tom Schieffer, D-Fort Worth, an opponent

of Wilson's amendment. House members also voted to cancel city sales taxes on utility bills Sept. 1, 1979, unless city councils stick their political necks out and vote to

keep them before then. The House bill would cut Texans' total state tax payments by about \$535 million between now and Sept. 1, 1981, while the Senate bills would chop

Next step is for committees in each chamber to look at the other house's work.

"We'll probably wait on the Senate to act on the one (House) bill rather than hold hearings on the two Senate bills," said Rep. Joe Wyatt, D-Bloomington, chairman of the House Ways and Means Committee.

But Speaker Bill Clayton said there would be no "tug of war at all. Both the House and the Senate have a concern that the bill be in proper form and not move too fast."

He said the utility and inheritance tax measures should be held for a while until it can be seen what other proposals are passed and how much they will drain from the treasury.

Carter joining leaders in Bonn for seven-nation economic talks

By FRANK CORMIER

WASHINGTON (AP) - President Carter headed for West Germany and a seven-nation economic summit today, trying to deflect foreign complaints about U.S. oil imports by pointing to the healthy trade surpluses of other nations.

'We don't expect to solve all the problems of the world, but we expect to leave the summit with renewed commitment ... to having a better future for our people," Carter said at a ceremony on the White House south lawn before boarding his helicopter for Andrews Air Force Base in suburban Maryland.

"This is a sober time. It's one of reassessment, not one of discourage-

ment," the president said. Carter was accompanied by his wife, Rosalynn, and daughter, Amy,

10, who is making her second foreign trip with her parents.

Wednesday, the White House made public transcripts of interviews with foreign broadcasters in which the president said:

"The nations like Japan and Germany who sell a lot of manufactured goods to us like to talk about our oil imports, but they don't deplore the fact that we also buy large quantities of manufactured goods from Japan

Japan and Germany both have trade surpluses, and the Japanese trade surplus with the United States will approach a record \$10 billion this year if present trends continue.

Carter contended that most of the U.S. trade deficit, a record \$26 billion last year, "now comes from the purchase of manufactured goods, not

In Bonn, the West German capital, Carter will be discussing trade, energy and other economic problems with the leaders of Germany, France, Britain, Italy, Canada and Japan.

Those talks, on Sunday and Monday, will follow a state visit to Germany by Carter, who is traveling with his wife, Rosalynn, and daughter,

The German visit, which will include a stop in West Berlin, coincides with new tensions between the United States and the Soviet Union - a topic president holds a "town meeting" with Berliners on Saturday.

The pre-trip interviews marked the first time Carter had argued that imports of manufactured goods and not imports of oil have worsened this nation's trade deficit and eroded the dollar. Moreover, he said, oil imports actually have decreased.

In the interviews, Carter criticized both Japan and Germany for exporting large quantities of goods to the United States without accepting U.S.

"The underlying economic problem is the very high adverse trade balance," he said.

Administration officials had said earlier that Carter expected criticism at the summit for not having won enactment by Congress of his legislation to reduce U.S. imports of oil

In talking to the broadcasters, however, Carter praised Congress for its handling of his energy legislation, saying, "I think the Congress has made great progress already....I have been pleased with what the Con-

Lithuanian dissident convicted

By SETH MYDANS

MOSCOW (AP) - A Soviet court today slapped a 15-year term of prison and exile on a Lithuanian dissident as the trials of activists Alexander Ginzburg and Anatoly Shcharansky drew toward a close.

Grand jury to convene

In the Lithuanian capital of Vilnius,

A special federal grand jury which convenes Monday in Midland may

put to rest several lingering questions

about the death January 22 of Larry

Ortega Lozano in the Ector County

The main question is: Were Lo-

zano's civil rights violated during his

12 days in custody of Ector lawmen?

A secondary question may be: Did

unnecessary police actions in any

way contribute to his death on the

Answers to these two questions

could raise other questions about

hearing. Page 3A.

the four-day trial Viktoras Pyatkus ended with his conviction on anti-Soviet activity charges. He was sentenced to 10 years in prison and labor camp and five years of Siberian exile, friends of the defendant reported.

The 49-year-old Pyatkus, like Shcharansky and Ginzburg, was a member of the now-decimated "Hel-

sinki" human rights group formed in May 1976 to report alleged Soviet violations of the human rights provisions of the 35-nation Helsinki ac-

All three trials began Monday. In the trial of Shcharansky, who is charged with espionage, a court official told reporters the presentation of evidence was complete and the prosecution and defense had been told oo prepare their closing statements.

"Speaking very quietly and slowly" for an hour and 40 minutes and looking ill, Ginzburg said he wrote documents about alleged abuses of human rights in the Soviet Union, his 70year-old mother, Ludmila, said outside the courtroom in Kaluga, 100 miles south of Moscow.

"I do not consider myself guilty, and I declined to ask for a lessening of the sentence," Ginzburg reportedly

Ginzburg is charged with anti-Soviet agitation and propaganda and could be sentenced to 10 years imprisonment plus five years in Siberian exile because a conviction would be his second on the charge. But the prosecutor on Wednesday asked for a sentence of eight years imprisonment

and three years exile.

This touched off speculation that the prosecutor in the Moscow trial of Shcharansky, who is charged with treasonable espionage, would not ask for the death penalty.

Mrs. Ginzburg made clear that her son was certain he would be convicted. "He said he was taking his last opportunity to send his regards and express his solidarity with Anatoly

Shcharansky," she reported.
Ten witnesses testified Wednesday that Shcharansky, who became a leader in the human rights movement after he was denied permission to emigrate to Israel, "used every means, including the outright falsification of concrete events, to gain the reputation of a 'human rights champion," a spokesman for the court

reported. He also was accused of receiving money from abroad "for his intelligence information and for the needs of his so-called 'civic' activities," the spokesman said.

Shcharansky's brother Leonid reported the atmosphere in the courtoom was "very crude."

"They constantly interrupted Tolya," he said, "and when he asked witnesses questions which the court didn't like they prevented him from

In support of the espionage charge,

the prosecution introduced a signed statement by Robert C. Toth, former Moscow corresondent for the Los Angeles Times. But in Washington, Toth said there was nothing in his statement "that could be used in an espio-

nage case.' The newsman said the statement he signed was a record of his interrogation in June 1977 by the police about his relations with Shcharansky. He said he was asked such questions as when and where he met Shcharansky, how the dissident helped him and how often they met.

Shcharansky is accused of passing information about the location, personnel and security classifications of military-industrial enterprises. Toth, who has denied he ever had any connection with intelligence or espionage agencies, wrote a story in 1976 with Shcharansky's help suggesting that the location of such plants could be surmised by determining the workplaces of Jews like Shcharansky who were denied exit visas on the ground that their work made them privy to classified information.

At Ginsburg's trial in Kaluga, 100 miles south of Moscow, the last of 25 witnesses was heard Wednesday, the prosecutor made his summation, and the defendant announced he would make his own defense statement, court officials aid.

Ginsburg's wife, who was barred from the courtroom because of outbursts the day before, said a court doctor reported her 41-year-old husband was suffering from high blood pressure. A witness from the courtroom later said the defendant received an injection during the course of the trial which caused him to react slowly to the proceedings.

Ginzburg is accused of distributing anti-Soviet literature, including books by exiled author Alexander Solzhenitsyn, and of making illegal use of money sent by Solzhenitsyn for a fund to aid the families of political prison-

Meanwhile, President Carter kept up his criticism of the trials.

He sent a letter to Soviet President Leonid I. Brezhnev asserting that the trials violated the 1975 Helsinki accords on human rights which Brezhnev signed. Secretary of State Cyrus R. Vance delivered the message to Soviet Foreign Minster Andrei A. Gromyko in Geneva after a day of arms control talks.

13-year-old resident of that Ohio city, found the new fountain at Yeatman Cove park on the riverfront an appropriate place. A tangle of hands and feet, and a great big grin, are visible through a curtain of water. (AP Laserphoto)

Visiting wine-man may inspire do-it-yourselfers

Though it may be novel today, certainly there's nothing new about the do-it-yourself way of making things through labor, chemistry, skill, thought or just plain chance and

It's just that commercialization has taken hold, has standarized things and has, voila, made living more convenient, more or less complicated, and definitely more costly while saving something as elusive as time it-

Well, coming to town for a day is a fellow who may inspire you to sing a happy tune, such as "that little ole" wine-maker, me," while you're readying your concoction to be bottled

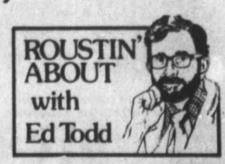

The visiting wine-man, Dr. Roy Mitchell, will be giving instructions Saturday on home wine-making.

"There are a lot of folks here in Midland that are interested in home wine-making," said Midland County Agriculture Agent Charlie Green.

He is helping out Mitchell, a Texas Texas University chemist and wine-maker, and Midland's John Crosby, who's got an experimental 12-acre vineyard east of town, with the program. It begins at 9 a.m. Saturday in the Community Room of Commercial

Mitchell will be talking about the equipment, procedures and raw ma-terials, be they grapes, dandelions, raisins and other truit used in fermenting wine, rather than fermenting the juice of the fruit to make wine. Emphasis will be on the production of dry table wine from fresh grapes.

At 11 a.m., Mitchell will be doling out wine, but not by the goblet, in a tasting session. And then, between 2 and 4 p.m., Crosby will be

hosting folks at his Michael Brandon Vineyard, six miles east of Midland and just off the Greenwood High-

Crosby, Green and Green's son, viticulturist (vineyard manager) Rick Green, will be giving information on the operation. Tests will be made of grape varieties to see which are ready for harvesting, mashing and turning into wine. And Mitchell will be taking grape clusters back to his laboratory, his winery, for making wine.

Charlie Green, who's interested in this grape-tending because of the potential agricultural significance of vineyards in West Texas, noted the relative importance of the Saturday morning wine-making session: The juice of the grape, instead of turning into wine, can be transformed into vinegar or something else undrinkable "if you don't watch yourself."

And if you don't look after yourself, too, you can get yourself in a fix, if not pickled, if you should start your your wine-making without first let-ting the Texas Alcoholic Beverage Commission in on it. Just pick up form, No. 2-81.2, from the ABC, formerly the Liquor Control Board, mention your intent and send the ABC a dollar. Thataway, you'll be legal for making up to 200 gallons of wine for home use. And don't forget to pay taxes on your concoction, assuming doesn't turn sour.

in Midland on Monday aes as of Wednesday afternoon. More subpoenaes may be forthcoming, but

for now the cast includes: - A state attorney general who has won the Democratic nomination for the upcoming governor's race.

- A 10-year tenure district attorney who has accused the attorney general of using the Lozano case for political purposes while predicting that the federal grand jury will not return any indictments.

- A sheriff who initially claimed Lozano committed suicide and who retained Lozano as a prisoner despite the sheriff's later statement to the effect that the man clearly had needed mental treatment.

- An Odessa bail bondsman whose business has been closed down following his involvement in the Lozano case as a "liaison" between news media and key witnesses.

- A justice of the peace who certifiled police charges against Lozano; who later pronounced him dead outside his jail cell, and who eventually presided over a coroner's inquest into Lozano's death.

 An ex-constable who claimed he was beaten up for "knowing too much about the Lozano case," but who subsequently was charged by Midland lawmen with giving false information regarding the incident.

- A county medical examiner who ruled in the initial autopsy that death was due to a cerebral hemorrhage caused by a sharp blow to the back of

An Odessa attorney who once met with members of the sheriff's department to "get the story (of Lozano's death) straight."

Several sheriff's deputies who at one juncture in the case were accused by jail inmates of violating Lozano's civil rights from the time he

WIPP site not yet certain, DOE

AMARILLO, Texas (AP) - "We have not made up our minds," a Department of Energy panel member said of claims the agency has already decided to build a nuclear waste disposal site near Carlsbad, N.M.

"If we were so determined to run full-steam ahead with this site, we wouldn't be arguing so strongly for it to be licensed. I ask you to believe me. We have not made up our minds," said Roger LeGassie, associate director for program analysis in the DOE's office of energy technology

Nearly 100 persons attended a fourhour hearing with sentiments running four-to-one against the proposal. A similar hearing was held in Midland Tuesday and another is scheduled for today in El Paso.

Opponents expressed fears the plan would lead to radioactive contamination both at the storage site and along the transportation route through

from 2,000 to 2,600 feet underground in salt formations about 25 miles southeast of Carlsbad. The panel never publicly disclosed

The Waste Isolation Pilot Project

would store high-level nuclear waste

the estimated cost of the plant, but one DOE official said it is expected to carry a price tag of between \$350 million and \$400 million. Nearly \$30 million has already been spent on preliminary studies.

The waste will reportedly pass through Amarillo as it is delivered by truck and rail from a nuclear power plant in South Carolina.

Many expressed-surprise that the agency would not elect for the more direct route from Dallas-Fort Worth into Midland-Odessa.

Dr. Charles Hyder, a physicist with the Albuquerque-based Southwest Research and Information Center and long-time foe of the project, said any

resident along the transportation route faces the danger of radiation because of accident prompted leaks.

'We can sit here and debate the merits of the storage site all day, but there's no debating the transportation area," he said. "There are always accidents."

Interpreting statistics from a National Railroad Safety Board, Hyder said he has concluded that the rail route from Carlsbad will see about 65.8 radiation accidents and 30 percent will involve leakages.

LeGrassie questioned the validity of Hyder's figures even though he admitted the DOE has several unanswered questions about transportation

He said a report will be issued within 30 days to either refute or support Hyder's report.

"If his (Hyder's) figures are correct you can be sure those shipments

sie said. "I"m going back and order an analysis of his presentation and we will either come back and say we

don't know or that it's wrong. Hyder repeatedly charged the DOE with attempting to "ram" the project

down the throats of the public, saying

the site has already been selected.

"I've been playing with the DOE for five years on the Carlsbad project and they have unswerving dedication to putting this thing in there. None of you are safe. I'm not safe and I feel dreadful about this project," Hyder

Robert Thord, DOE assistant secretary for energy technology, said the public has the final say on the fate of the project.

"The whole project depends on licensing by the regulatory commission and the granting of a license is a public process," he said.

President Carter levels new Soviet criticism

By BARRY SCHWEID

GENEVA, Switzerland (AP) -President Carter sent new criticism of the Soviet dissident trials to President Leonid I. Brezhnev, but Secretary of State Cyrus R. Vance gave the protest message to Foreign Minister Andrei A. Gromyko in private in an effort to keep the controversy from affecting their nuclear arms negotia-

In the message delivered Wednesday night, Carter accused the Soviets of violating the 1975 Helsinki human rights agreement by disregarding proper legal procedure.

State Department spokesman Hodding Carter said the administration

still did not plan to retaliate for the trials of dissidents Anatoly Shcharansky and Alexander Ginzburg by suspending the negotiations for a treaty limiting strategic nuclear arms. But he added: "We are reviewing other aspects of our relationship.

The administration is known to be considering blocking shipment of American oil drilling equipment to the Soviet Union. But some U.S. officials doubt that this kind of economic pressure would cause the Kremlin to ease its treatment of its domestic

Gromyko was irritated when reporters asked if the controversy was impeding the arms talks.

and Gromyko called a recess, apparently to consult with Moscow. after asking Vance a few preliminaryquestions.

Carter said the United States proposed restrictions on missile modifications the Soviets could make through the five-year life of the proposed treaty. But the United States would reserve the right to develop the MX mobile missile system and to build thousands of new missile silos to make the U.S. stock of Minuteman missiles less vulnerable to attack by moving them periodically from silo to

Gromyko also submitted proposals to Vance, but they were not dis-

poses and 25,000 acre-feet per year for

the power plant. The remaning water

surplus would insure that the project

contained one year's supply of water.

River districts fight over proposed reservoir

AUSTIN BUREAU

AUSTIN - Assertions as to why the Colorado River Municipal Water District is attempting to construct the Stacy Reservoir in West Texas were disputed Wednesday between users of water in the upper and lower Colorado River Basin.

The CRMWD is attempting to receive authorization for the 554,000 acre-foot project in a hearing before the Texas Water Commission in Austin, but that action is being protested by a group of Colorado River Water users led by the Lower Colorado River Authority.

Both sides are disputing the amount priated water available in the river. In addition, the CRMWD claims that the water in the proposed project would be used primarily for municipal purposes and, therefore would have priority over the irrigation water the LCRA sells.

LCRA attorney Fred Werkinthin spend most of Wednesday crosexamining CRMWD Gen. Manager Owen Ivey in an attempt to prove the primary purpose of the project is to provide cooling water for a power plant to be built at the site.

Ivey said the arrangements the district has made with Texas Utilities Services Inc. are merely to help finance the reservoir, and that without TUSI them district would finance the project with revenue

bonds. Ivey admitted the district had been negotiating with West Texas Utilities. Inc., and that the power company had rejected the district's offer before CRMWD finalized arrangements with TUSI. Ivey said that TUSI is aware of the WTU negotiations and knew that the TUSI contract was contingent on negotiations with WTU. Ivey said the district would make arrangments

with only one power company. In attempting to dispute the claim that most of the water in the project would be used for minicipal purposes, including for Midland and Odessa, Werkinthin pointed out that the CRMWD's contract to provide water for several cities contain clauses requiring the district to obtain wateruse projections from the communities when contemplating and expansion of supply. Ivey admitted the district had not received any formal projections

fro the cities. The commission also heard brief testimony from Wichita Falls State Senator Ray Farabee, who said the project is needed and pointed out that the site had been part of every major water plan devised for bringing water to West Texas. Farabee also alluded to the Wagstaff Act, a law which set out priorities for municipal uses of

West Texas faces organized crime, cloak and dagger threat,' agent

By GUY SULLIVAN

West Texas faces a very real threat from white-collar organized crime and foreign counter-intelligence operations, Leon Dobbs, special agent in charge of the El Paso office of the FBI, said in Midland Wednesay.

Dobbs spoke to members of the Downtown Lions Club at the Midland

Hilton. He said one of the biggest problems facing West Texas is in the area of fraud and fraudulent manipulations.

kept his agents busy. "We're swamped with allegations of police brutality, which we have to investi-

tions could be used in investigating organized crime and counter-intelli-gence operations, which he said represent an equally serious threat to

area now and then. They hide out from the law a few weeks and move on easily because of the transient nature of the population. Some men work a few weeks in the oilfields and then move on," Dobbs said.

Speaking on FBI efforts against organized crime, he said that during the last two years the agency has put special emphasis in such areas as political corruption, bribery and obstruction of justice. Dobbs says these are "things that affect your commu-

He defined such sophisticated lawbreaking as any organized group which is defrauding or manipulating public officials in order to make money for businesses.

Also, he said, "Congress has found that many businesses are acquired with illegtimate funds."

used-car business owner using his merchandise to transport heroin from one place to aother or a collection agency owner who collects on legal debts by use of extortion and threats of physical violence or kidnapping.

The longtime G-man says organized crime is everywhere, including a town of 800 people in Missouri he once investigated.

"I don't think that white collar crime receives enough publicity, nor do I feel that such crimes receive enough punishment," Dobbs told the Lions. But sufficient punishment would be dealt out if the full support of the public were behind law enforcement authorities, he said.

He defined organized crime as a act of non-violence committed by using a person who abuses his position. As examples, he cited the use of a banker to embezzle funds for himself or another person. "The chances are such crimes will not be discovered very soon on every occasion," said

Because of the age of the computer, Dobbs asserted, it has become extremely difficult for employers to find dishonest employees. "Computers can be programmed to conceal information like inventories. Such equipment can also be used to destroy information," he pointed out.

He remarked that most thieves using such equipment are department heads or officers of a corporation so that the resulting thefts run into the hundreds of thousands of dollars. For that reason, Dobbs said, the FBI has become involved in bank fraud embezzlement and corruption cases.

Yet, while the FBI has placed ren-

ewed emphasis on organized crime, Dobbs said, "The biggest problem in today's world is a shortage of man-Dobbs noted such examples as a power." He included the FBI in that

Special emphasis has been placed in stopping embezzlem int, misappropriation of public funds and the reoccurrence of false statements, said

White collar crimes, he said, are prevalent in this area. They include schemes to defraud for property or money in excess of \$5,000, interstate transportation violations and fraud by wire through the use of telephones or wire services.

Other examples he listed included fraud against the government through misuse of veterans benefits, loans, pensions and false claims. In addition, he cited kickbacks between contractors and sub-contractors on federally funded projects as another potential area of violations.

Public works projects, economic development money, unemployment training act funds and other laws provide potential areas of misuse. which are cases for prosecution under federal law, he said.

To add to such possible dangers, Dobbs reminded his audience, foreign counter-intelligence identification is a major job of the FBI. "We must determine if the information such visitors seek would negatively affect the United States."

Dobbs said many times intelligence agents from foreign nations are here only to see America. However, the estimated 10 percent who do not come here for such purposes are the ones he said he worries about.

He encouraged members of the service club andothers to avoid inadvertently givingGout information to visitors which can be used against the nation overseas.

Midland police catch, kill bull snake

Two Midland women thought they had found a rattlesnake in their backyard at 1912 N. Jackson St. Wednesday afternoon.

However, Sgt. Jack Burney and Officer Steve Otto of the Midland Police

Margaret Lewis first discovered the reptile at the back doorstep of their home. "When I found it there, I was scared," she recalled. "I wanted Earline to go get a gun."

Earline Lewis was in the kitchen

when the snake was found. "I was scared, too," she said. "We thought it

in Bearden patrol car death

A Midland County grand jury Wednesday delayed a ruling in the death of Joe Lindley Bearden, 18, who died from injuries received when he was struck by a Midland Police Department patrol car June 29.

Bearden was lying in the street in the 3300 block of North A Street, police said, when a car driven by Officer Terry Garner struck him about 2:15 a.m. That portion of A Street is un-

Peace Justice Robert Pine has ruled cause of death to be acciden-

Police said Garner was responding to a report that a man was lying in the street beside a pickup. Bearden was lying 200 feet from the pickup when he was struck, police said.

District Attorney Vern Martin said the grand jury "passed" the investigation to another session.

Also Wednesday, the grand jury returned a murder indictment against Johnnie Mae-Ellis, 32, charged in the Sunday shooting death of Orena M. White in the Texas Street

really was a rattlesnake."

Both said it was the first time they had ever seen a snake in their

Police took care of the problem in an acceptable fashion, according to both ladies. They said the snake was eventually caught and killed.

DEATHS

Orena M. White

LOCKHART - Services for Orena Marie White, 51, of 1413 E. Chesnut St. will be at 2:30 p.m. today in the Morning Chapel Baptist Church here with burial to follow in St. Luke Ceme-

She died Sunday in Midland. Mrs. White was born Dec. 18, 1926, in Sulfur Springs and moved to Midland in 1950. She had been a cook at several cafes in the city.

Survivors include a son, Jimmy E. Yancy of Midland; a daughter, Marva Ann White of Long Beach, Calif.; her mother, Mary Bonner of Sulfur Springs; two brothers, Robert Bonner of Sulfur Springs and R.L. Poage of Dallas; three sisters, Mattie R. Crowe of Los Angeles, Calif., and Maurine Bagley and Christine Robertson, both of Dallas, two grandchildren and several nieces and

Charlice Barnes

ODESSA - Services for Charlice Hamilton Barnes, 49, were to be at 4 p.m. today in Hubbard-Kelly Funeral Home here, with burial to follow in Odessa Cemetery.

Mrs. Barnes died Tuesday in an Odessa hospital following an illness. She was born Nov. 6, 1928, in Comanche. She was married to Weaver L. Barnes June 24, 1946, in Odessa. Mrs. Barnes came to Odessa in 1946 from Comanche, and was a member of the Salvation Army Church.

Survivors include her husband; her father, Ralph Flowers of Odessa; four sisters, Peggy Blake of Midland, Eva Nell Shields of Santa Anna, Willie Nockska of California, and Franceine McKamie of Dallas, and three brothers, Dearl Flowers of Odessa, Dalton Flowers of Ganinston, Ala., and Warren Dale Flowers of Odessa.

Cleon L. Payton

SEMINOLE - Graveside services for Cleon Lee Payton, 52, of Seminole, brother of Kenneth Payton of Lamesa, were to be at 11 a.m. today in Seminole Cemetery directed by Singleton Funeral Home. Officiating minister was to be Raymond Darwin of the Westside Church of Christ.

Payton died Tuesday in a Hobbs. N.M., home where he was visiting. Payton was a farmer and a Bap-

Other survivors include his wife, three sons and a sister.

Erick Lopez

Erick Richard Lopez, infant son of Mr. and Mrs. Henry Robert Lopez of 308 Willowwood St., died Tuesday in a Midland hospital.

Graveside services were to be at 11 a.m. today, directed by Newnie W. Ellis Funeral Home at Resthaven Memorial Park. Father Adolph Taylor of St. Ann's Catholic Church was to

Other survivors include a sister, Amber Marie Lopez of Midland; his grandparents, Mr. and Mrs. Trinidad Lopez and Mr. and Mrs. Ervin Podzemmey, all of Amarillo; his greatgrandparents Mr. and Mrs. Otto Podzemmey of Amarillo, and several aunts and uncles.

James Wilson

LOCKHART - James Wilson, 67, of Lockhart, father of Mrs. Lamar (Ginger) Chuter of Midland, died Tues-

Services were to be at 3 p.m. today in the McCurdy Funeral Home in

Other survivors include his wife, a son, a stepson, a daughter, a brother, a sister, and seven grandsons.

Mail-dependent firms prepare to be weaned

By The Associated Press

The possibility that Postal Service workers will strike when their contract runs out a week from today is causing concern among companies that rely on the mails to reach the

for eight weeks here has ended abruptly with the two major defendants entering guilty pleas to charges of theft of federal Manpower funds. Tom Upchurch of Amarillo. The pleas were entered in state

district court here Wednesday during the initial day of testimony in the trial of Don Gray, the first of nine defendants still under indictment for abuse of federal funds.

CORPUS CHRISTI, Texas (AP) -

A trial that was expected to drag out

Gray is the business manager of the Plumber's and Pipefitter's Local 823 in the Rio Grande Valley. His brother Clarence, director of the South Texas Building Trades Educational Services, Inc., also pleaded guilty to similar charges.

The pleas were the result of a complicated plea bargain worked out between State District Judge Harry Lewis of Brownsville, prosecutor Joe K. Hendley, and the Grays' attorney

Trial ends; brothers plead guilty

SIENSAITONAIT

The Grays pleaded guilty to a two-count indictment charging them with theft of \$1,525 from the Texas Education Agency and the Harlingen Independent School District.

Don Gray also was to be tried on other indictments.

Monday, the brothers will go to Galveston to enter a guilty plea to federal charges arising from the same alleged thefts. As part of the plea bargain, the state will assess sentences identical to those handed down by the federal court and will allow them to run concurrently. The state sentencing is set for Sept. 8.

All further proceedings involving the Grays will take place in Brownsville, from where the trial was moved on a venue change.

Nineteen persons originally were charged with misusing federal Manpower funds. Indictments were dropped against nine of them earlier

Don Gray's charges arose from a federal program conducted by his union in Harlingen in conjunction with an anti-poverty agency.

Hendley said the plea bargain was prompted by an article in the Corpus

Odd court philosophy

Justice John Paul Stevens has 20-20 vision when it comes to seeing the necessary relationship between the press and the government in a free society. Some of his fellow justices on the United States Supreme Court should have their eyes checked.

It was Justice Stevens who wrote a compelling dissent last June when a 5-3 majority on the court decided that police can invade news offices in search of evidence with no warning and armed only with a warrant, not a supboena specifying what they

He correctly saw that the press is no different from the public at large in this respect — that this decision means countless lawabiding citizens will be subject to unannounced searches if police think they have documents in their possession which are pertinent to a criminal case.

Now, Justice Stevens has shown the same clarity of vision in a dissent from the court's 4-3 decision touching on the same issue of whether the rights of the press are distinct from the rights of the public at large. The majority ruled that journalists have no constitutional right to demand access to a prison, or by implication, to any government institution.

The myopic majority is overlooking the very reason why the authors of the Bill of Rights specified in the First Amendment that Congress shall make no laws abridging freedom of the press. As Justice Stevens recognizes. those who gather and disseminate the news are surrogates of the people under our form of government in which the people are sovereign.

"Without some protection for the acquisition of information about the operations of public institutions such as prisons by the public at large," writes Justice Stevens, "the process of selfgovernment contemplated by the framers (of the Constitution) would be stripped of its sub-

The Supreme Court hardly can claim balance or consistency in these recent efforts to define relationships between government and the press. In May it was saying that law enforcement officers can invade the privacy of newspaper offices and paw through files looking for evidence. More recently it said that law enforcement officers - prison wardens at any rate - can claim rights of privacy to bar the door to reporters who want an inside look at their institutions.

This is a strange and disturbing tilt in judicial philosophy - a lowering of the barriers which protect private government from the inquisitive eyes of the public.

It speaks out very definitely against the right of the people to

It certainly has all the qualities of harassment of the press on the part of the high court.

The consolation is that the nine members of the Supreme Court are not of a single mind on these issues. Indeed, only seven participated in the decision upholding the right of the sheriff of Alameda County, Calif., to deny television reporters access to his county jail, and there were shades of disagreement among the seven on some aspects of the case.

Justice Harry Blackmun was ill when the case was argued, and Justice Thurgood Marshall disqualified himself because one of the attorneys was a former colleague.

If they see the issue with the same sharp discernment as Justice Stevens, the court very well could reverse itself in a future case in which they participate.

Let's hope so anyway, for the good of the nation and its citizens.

2. How did Isaiah gain the courage to say, "Here am I; send me."? Isa.

3. What did Moses fear? Ex. 4 4. Which apostles did Paul consider the pillars of the Christian church?

5. What is the result, according to Proverbs, for imbibing in mixed drinks? Pro. 23: 30-35 Four correct...excellent. Three corSTOP GAGGING - I'M JUST USING A LITTLE CONTROL'

ART BUCHWALD

Action shows all look alike, and here's why

WASHINGTON — If you're wondering why all the action shows on television look alike, I think I might have an explanation. It was revealed by a television star, who told me that if I used his name he might never work

"So what's the secret?" I asked. "There are only two writers in Hollywood scripting every television action drama.

"What are their names?"

"Al and Harry." "Why only two?"

"Because no television producer wants to take a chance on new writers. Al and Harry are proven commodities. They started with Peter Gunn, and they've been signed up for every program that's been on TV since. Whenever someone wants a new show, Al and Harry get the call. That's why all the shows look alike." "I don't understand. Why would Al and Harry write the same show over

and over again?"
"Look, if you watch most action dramas, it's 10 percent dialogue and the rest of the time the characters speed around in automobiles. The most creative work Al and Harry have to do is figure out where their people are going to chase each other.

"It's true that most shows take place in automobiles," I admitted. But at the same time, it must be

Art Buchwald

hard to think of new ways each week to send a car over a cliff.

"I'm not saying that they don't have talent," the television star said. "I remember the first time Al, or maybe it was Harry, came up with the idea of having a helicopter chase a car. That was a real breakthrough in television writing. It was so successful that they now use it in every other show they do.'

"They must be terribly busy." "What have they got to be busy about? They have a card file of all the plots they ever used. When they do a new show, they go to the file and rewrite the same plot. Then they play tennis all afternoon.

'But it seems to me that at the end of the acton dramas, I always see different writer credits on the

"They're all pseudonyms for Al and Harry. The studios provide the names because Al and Harry don't have the imagination to think up their own.

"But why Al and Harry? Why not Sam and Max?" "Al and Harry own the copyright on the psychopathic killer. They invented him during one of the early episodes of Dragnet. Without a psychopathic killer you can't have an action drama.'

"Why is the psychopathic killer so

important to these shows?" "Because you don't need any character development. Almost every show starts out in a police station. The phone rings and the sergeant says, 'There's a nut on the roof of city hall, and he's threatening to blow up the city water supply, or kill 20 hostages, or slash the Mona Lisa.' Then the rest of the show writes itself. You bring in another type of killer and you have every ethnic group in the country on your back. But the psychopaths in this country can't seem to get organized, so the networks don't mind making them the heavies week after week after week."

Mark Russell says

I, too, think those dirty words should be banned from radio - because they are obscenely and offensively unoriginal.

We need new and fresh dirt. So join the "Coalition for Refreshing Filth." Remember - it's not truly dirty if it's

The fact that the Supreme Court justices didn't scream out in horror upon hearing the words shows either that the words have lost their bite or else the justices have teen-agers.

The court's obscenity flap was over the playing of a recording by George Carlin, a comedian who offstage probably says things like "Gee-willikers". and "Golly-Ned."

The Country Parson by Frank Clark

shouldn't discourage you — unless they keep being the same ones you had last year."

BIBLE VERSE

"But many that are first shall be last; and the last first." - Mark 10:31.

by Brickman

WASHINGTON MERRY-GO-ROUND

Sergeant bundled off to clinic

By JACK ANDERSON

WASHINGTON - Staff Sergeant Ewing Hayden, Jr., a 17-year Air Force veteran, had the temerity recently to file charges against a superior officer. As a consequence, he was bundled off, Soviet style, to an Air Force mental hospital.

He was subsequently given a clean bill of health by examining psychiatrists and escaped the stigma of being locked up and labeled as crazy. The man he accused, Captain Mark J. Bower, also was exonerated of Hayden's charges of conduct unbecoming an officer. But it was alleged that the investigative report had been altered on orders from

The high command at Barksdale Air Force Base in Louisiana has covered up the incident with a. security blanket of denials and nocomments. But our reporter Stephen d'Oliveira has interviewed more than a score of enlisted men at the base who confirm that Hayden was almost railroaded into a psychiatric ward by his superiors.

The sergeant accused Bower, the commander of Field Training Detachment 312, of making false statements and failing to obey Air Force regulations. The complaint went to Col. Richard Peshkin, the base's vice commander and inspector general.

A subordinate, Maj. Harold A. Rumzek, conducted a two-week inquiry. Fifteen of 18 persons he interviewed confirmed Hayden's charges, our sources told us. Indeed,

they furnished further detrimental information against Bower, charging him with petty theft, drinking on duty and calling the Air Force Secretary "a meddling fool and an idiot."

Rumzek submitted his report to Maj. Gen. Charles Donnelly, Jr., the top dog with the authority over 312. But it was tossed back and apparently rewritten. Our reporter asked Rumzek whether the recommendation to exonerate Bower was reached on his own. But both Rumzek and Bower refused to talk.

A spokesman for the general insisted there was no tampering with Rumzek's report. "Bower has not done anything wrong," the spokesman asserted. "There's nothing illegal going on down here at

to Sergeant Hayden. He was summoned, according to his account, into Colonel Peshkins's office and was asked to drop the charges against his superior. The stubborn Hayden refused.

Not long afterward, he received an official letter from the colonel stating: "In order to clarify your present state of mind and hopefully to reassure us as to your unimpaired capability, request you to report to the USAF Hospital Mental Health Clinic here at Barksdale for

was again asked by a doctor to drop the charges. When he refused, papers were signed ordering him to the psychiatric facility at Lackland Air

buggies," is the way one Luxem-

bourger put it. The death rate among-

Luxembourgers is nearly double that

percent and rising.

ture generations.

Force Base in Texas. Hayden's wife told us the doctor at Barksdale advised her that his orders came from another office. Responded Dr. Kamal K. Raisani tersely: "I have no comment on that."

Raisani, according to our sources, warned Hayden he would probably be issued a mentally unfit discharge. Fortunately, the doctors at Lackland disagreed. They released him after two weeks of examination, with the clean bill of health.

Significantly, Dr. Raisani's case history on Hayden, including a diagnosis he was paranoid, parrots almost verbatim a memo from Colonel Peshkin. Nonetheless, Peshkin. denied ever having discussed Hayden except in general terms while the inquiry was in progress.

Why would the Barksdale brass go to such lengths to suppress a sergeant's criticism of his captain? Up and coming officers view Barksdale as a stepping stone to promotion, we were told. Virtually every officer at the base has brigadier general stars in his eyes. Wing commanders usually serve there 12 to 18 months before moving up the

"The wing commanders exert every effort to make sure they come out looking good," one insider explained. "They are a group of officers who are covering up for each other's mistakes."

GAS PAINS - While Congress doodles drowsily over President Carter's energy bill, the natural gas industry has slipped a lulu into the legislation that would send the cost of living upward.

An amendment involving special sales of intrastate gas has been offered by Rep. Bob Eckhardt, D-Tex., but the language was actually written by a lobbyist for the Houston Natural Gas Corporation.

Now the lobbyist, Lynn Coleman. has been named general counsel to the Energy Department by President Carter. Thus it is now Coleman's duty to protect the public from the mischief of such lobbyists as he used

The language he furnished to Congressman Eckhardt is highly technical. But a confidential congressional memorandum. prepared for Rep. Toby Moffett, D-Conn., says the impact would "be detrimental to the consumers' interests as well as being inflationary."

Eckhardt was informed that his amendment would permit companies to raise their rates. He promised to modify the amendment. Footnote: Eckhardt's aide who

handled the amendment was on vacation when we called for comment. We were told no one else in the office could make a statement.

NICK THIMMESCH

Tiny Luxembourg, lucky for years, now faces crisis

LUXEMBOURG - This little duchy has been lucky for many years. Its sizeable steel industry (once, seventh largest in the world) provided a standard of living unsurpassed in Eu-rope, and yet Luxembourg was never afflicted with big doses of crime, pollution, noise and congestion. Well fed and complacent, Luxembourgers assumed all was well with the world.

But now the severe drop in the world steel market makes Luxembourg's leaders wonder if the good life will continue. There is much official

"People are prosperous now, but there is a crisis," explains Colette Flesch, mayoress of Luxembourg There is a delayed impact of this crisis on the people."

Conservative in lifestyle, Luxembourgers live in modest homes, do not

flaunt their prosperity, salt away, their money and ask only that their marvelous little country remain pretty much as it is.

But Luxembourg cannot remain the way it is because it is too dependent

on its steel industry, which, like others in Europe and North America, is undergoing a tremendous squeeze to make a profit in the world market. The steel industry here has had to

consolidate and cut back.

So Luxembourg is in the same fix that many one-industry towns in America find themselves in when that one industry slows down or leaves.
Since Luxembourg's economy is 80
percent international trade, and since two-thirds of its exports are in steel, that means big trouble. The forecast is that the already reduced work force in Luxembourg's steel industry will be cut from the 24,000 employed now to 15,000 or less by the mid-eight-

Until a few years ago, Luxembourg had to import labor for its expanding

Nick Thimmesch

steel industry and for the new factories attracted to the grand duchy. But now Luxembourg has unemploy ment for the first time since the thirties. The situation would be even worse if it weren't for the government's stop-gap anticrisis program.

This project made it possible for 3,000 laid-off steelworkers to be assigned to repairing roads and parks making themselves useful around the country — without losing their high wages and generous benefits.

New laws were also passed requir-

ing many workers to retire early. some as young as 57. There was squawking, but "sweeteners" seem to have prevented any showdown with the labor unions.

But "anti-crisis" can't go on foreyer. Steady, stolid Luxembourg is being forced to take a painful look at itself. Few among those millions of Americans who flew Icelandic Airlines to Luxembourg since World War II ever thought — as Luxembourgers must now — what the benefits and perils are in being a micro-state.

One advantage is that Luxembourg. despite its size, is listened to respectfully in the European family. So Luxembourgh has a fairly large complex of Common Market (EEC) institutions and the jobs and revenue that go

Luxembourg is also a major banking center, with 94 banks located here, largely because of the duchy's liberal banking laws. Banks employ 6,000 people. As a NATO member, Luxembourg expects to soon welcome a sizeable U.S. Army storage depot more new jobs.

It has dawned on Luxembourgers that their economy needs even more diversity. So Prime Minister Gaston Thorn feels no loss of dignity in traveling the world to sell the duchy's wonders to companies looking for new plant sites. By his own assessment, the effort has been slow going, but he explains: "It takes a bit of education to explain what Luxembourg is, but once people are acquainted, we do

Because Luxembourg is small, it is easy for its managers to watch and control. Thus there is smaller waste, high worker productivity (equal to West Germany's) and little bureaucratic interference. In fact, Luxembourg brags that company managers and businessmen can get through to its government officials with one phone call. It might take two to land Prime Minister Thorn.

Luxembourg claims it hasn't had a real strike in 30 years, that its unions work in "tri-partite" harmony with government and business, and that the prevalence of good souls here fluent in French, German, and English cuts the language barrier like

nowhere else in Europe.

But Luxembourg is a country where the cost of doing business is high. Luxembourgers like their social programs and comforts. The remarkable fact that Catholic Luxembourg had Europe's lowest birth rate attests to this. Consequently, Luxembourg, now with a population of 356,000 people, is losing Luxembourgers. *

evaluation." At the clinic, Hayden related, he

Meanwhile, here's what happened

Reservoir program to relocate small South Texas town

CALLIHAM, Texas (AP) - Back in 1971 the future looked pleasant, though not glistening with progress, for the self-sufficient folks in this South Texas community.

The wants were simple "We put down our mobile home. We planted our trees and everything. I figured by the time I was old we'd have shade," said H.E. Sewell. "Now they tell us we'll have to go."

The 20 families that still live here and the community itself will soon be gone. Calliham, once a bustling small town, will be merely the setting for memories in the mind's eye of those who grew up here in the brush coun-

The community will be replaced by nothing. Federal officials have calculated the area will be needed for the Choke Canyon Reservoir to gush into in case of flooding.

Last weekend about 500 former resi-

dents came home for one last look at the swimming hole, the old Rice Drug Store and the other things that make

up their recollections. There was bitterness mixed with the nostalgia.

"If they'd told us the truth right at the beginning...but they've been lying to us here lately," said Henrty Shenkir, a McMullen County commissioner. "You know, when the federal government people start lying to you,

Calliham residents don't appreciate the way the federal officials went about planning the community's

"We read about it in the paper after it was over," Bobby Shannon, who now lives in Tilden, said about a 1973 congressional subcommitte hearing in Three Rivers

Herman Smith, like Sewell, put up a new home here several years back.

"At the time, they were figuring on building the dam further down, you know. Nobody thought this would happen," he lamented.

The federal government will buy the locals out and will set up New Calliham, a mile to the south. Some of the residents here say the

government has lied about the need for the land 'If we'd stuck together and decided to stay, we'd have stayed, because

this place isn't going to go under water. That's a lie," charged Shen-The commission and others doubt the estimates that say Calliham would be five feet under if the reser-

"They changed the engineering to get us off. That's another lie," Shen-

Calliham was once a busy place. Gaslights lit the two-block business district in the brighter days. There was a plank sidewalk, and the town boasted three hotels and four beer joints. The local high school enroliment was 300.

But the boom years of oil and gas exploration ended and World War II marked the beginning of a slow de-

Nevertheless, the residents remained proud and enterprising. They never incorporated, but the community managed to provide services and

Volunteer labor built the water system. Community spirit built and financed the fire department.

And when dwindling enrollment rendered the high school obsolete, the gym was refurbished into a functional acility for the community.

But the hard work and community spirit will go largely unrecognized by the federal government.

Consumer debt new questions

NEW YORK (AP) - Will the great American buy-on-credit boom continue, and what will a contin-

Those are questions economists at Morgan Guaranty Trust Co. are posing as consumer installment credit keeps on surging.

According to the Federal Reserve, consumer debt

loans for cars, appliances and other items, and

charges on credit-card accounts — rose to \$227.6 billion in May. That's 18 percent ahead of last year's level and a whopping 2,745 percent above the total consumer credit outstanding at the end of 1948. Why the increase? According to George Cruikshank, an economist at the New York bank, Americans after World War II "plunged into debt to satisfy pent-up demands for consumer goods." By the 1950's, buying leveled off, but the first half of the

spurred by increasing acceptance of the use of credit for a variety of purposes."

Cruikshank, in a new report, attributes the credit boom to a change in attitudes "as the older genera-tion, sorely tested by the Great Depression and somewhat cautious about debt, gave way to a gen-

eration more disposed to its use."
Young adults are both heavy users of credit and are the fastest-growing segment of the population, Cruikshank notes. In addition, the sharp increase in the number of working wives has enabled families to

new-car loans. Automakers are reporting robust sales this summer, and many of the cars are bought on credit. While a two-year car loan was the norm 25 years ago, auto loans now last for up to four years. This means consumers can spread out purchases of increasingly expensive cars over longer periods, but

Quite a few economists - including the pollsters at the University of Michigan's Survey Reserarch Center — believe the current retail sales growth is being fueled in part by consumers buying now to beat the almost inevitable price increases later.

This means added debts, and Cruikshank notes "a

nagging question is being heard. Are consumers over their heads?"

The Morgan Guaranty economist says, "over the years American consumers have demonstrated a remarkable ability to control their appetite for onthe-cuff purchases. When families have found their paychecks pinched by payments for past purchases they have eased up on acquiring added installment

Cruikshank believes we may have reached that point. Traditional measures of installment debt indicate "unless things fly in the face of everything consumers have done in the past, the time is approaching a. when consumers will moderate spendng and debt additions."

Based on past indicators, the downturn should be moderate rather than severe, Cruikshank says. One possible reason for this is the historical relationship of consumers' liquid assets - cash and bank accounts - to total liabilities, which has changed little since 1961 despite numerous economic ups and downs. This indicates that savings and debts have increased side by side at about the same rate over nearly two decades.

7-12 8-7 7-28 8-25 7-31 8-15 In addition, Cruikshank believes a downturn in spending won't come from a sudden, explosive increase in prices brought on by shortages of goods. Manufacturers have kept their inventories low in order to avoid the dangerous possibility of high stockpiles and low sales if there is an economic downturn. But industry is running with a lot of room to spare for expansion. At the current rate of 83.5 percent of capacity, "we don't see any shortages in the near-term," Cruikshank said. In addition, he said, excessive demands "could easily be made up by foreigners, whose capacity utilization rates are

Rome visit by Loren now makes headlines

ROME (AP) - Now, a visit to Rome by actress Sophia Loren makes It never was that way

- until 16 months ago when, on her last trip here, she was detained at Leonardo Da Vinci Airport for nine hours as police interrogated her on a currency export matter. She and her husband, Carlo Ponti, have since been charged with illegally transferring \$12 million in Italian lire out of the country. Trial is

Her visit Monday went a lot smoother, the Italian news agency ANSA reported. Now a French citizen, Miss Loren, 43, arrived by train from Paris, visited a film studio to try on costumes for her upcoming Lina Wertmuller film and then quickly returned to the French capital.

Miss Loren, who won the Academy Award as best actress in the 1961 film "Two Women," will appear with Marcello Mastroianni in Miss Wertmuller's new

In the opinion of Bond Counsel, interest on the Bonds is exempt from present Federal income taxation under existing statutes, regulations, rulings and court decisions.

Statement, Securities,

oration

By FRANK CORMIER

WASHINGTON (AP) — First lady Rosalynn Carter, looking forward to a four-day visit to Germany that begins tonight, laughingly recalls the "Case of the Blue Pantsuit" that helped make an earlier visit memorable.

Mrs. Carter and the president will be returning to a country they toured a few years back when he was governor of Georgia.

Reminiscing about the earlier trip, Mrs. Carter reported that the pantsuit incident came about because she and her husband were scheduled to go their separate ways in different cities

As she told the story to a handful of reporters last week, Carter gallantly suggested that because they were to rendezvous in the same city at the end of the day, he'd carry her luggage along with his own.

Result: Mrs. Carter packed the

night before, leaving out of her suitcase only the clothes she planned to wear the next day.

"I laid out a blue pantsuit," she

The governor took off with the luggage about 5 a.m. and his wife lazed around until 7 a.m.

When the time came to dress for her day's activities, Mrs. Carter discovered that instead of having a pantsuit to wear, she had the suit jacket and a pair of her husband's blue trousers.

The story had a happy ending. Mrs. Carter related that she spent the day wearing a buttoned-up raincoat.

Mrs. Carter said she particularly looks forward to doing some sightseeing next weekend with daughter Amy, who is making the trip, while the president is busy at an economic summit in Bonn.

On Sunday, mother and daughter will take a Rhine River cruise, stopping along the way at Linz, sister city to Marietta, Ga.

On Monday, before flying home, they'll spend a full day on a motor tour of the Moselle River Valley.

Mrs. Carter talked about the German trip a week ago when she and her mother got into a van that carried reporters who were following the president on an 11-hour, three-state tour of Civil War battlefields.

Before rejoining her husband in his sedan, she spent about an hour in relaxed conversation with the small press contingent.

Carter himself used the same van a couple of times so he could enjoy a better vantage point during battlefield tours. But when the president got into the high-slung vehicle, all the reporters except one "pooler," assigned to report to his colleagues, were shunted to other vans in the motorcade

All the vans in the caravan were driven by experienced Army drivers permanently assigned to pilot White House vehicles.

But experienced or not, when either the president or first lady got into a van, the regular driver was sent elsewhere as a passenger while a Secret Service agent took over the wheel.

A-postscript to the battlefield tour: within hours, many of the reporters and photographers making the trip erupted with itchy chigger bites.

An inquiry to the president's personal physician, William Lukash, revealed that Lukash had been afflicted, too, But Lukash had assumed until comparing notes with another victim - that he had been bitten by mosquitoes.

The Navy doctor (he's an admiral) said he got no complaints of bites from Carter or his wife.

ple's Organization, Sam

Nujoma, accepted it on

UNITED NATIONS (AP) — The black guer-rillas fighting in South-West Africa have accepted the Western independence plan for the territory, clearing a major obstacle to the birth of the new nation of Namibia by the end of this

South Africa accepted the plan seven weeks ago, and it now goes to the U.N. Security Coun-

The breakthrough could lead to settlement of the dispute that the United Nations and

years over the future of an immense, sparsely populated territory that makes money off diamond mining, fishing and karakul sheep rais-

The plan calls for an election conducted by South Africa and monitored by the U.N. to choose a multiracial constitutional assembly. It would prepare for independence by Dec. 31.

Namibia is the black nationalists' name for the territory and the name recognized by the

South Africa took over

ritory after World War I and cordial" talks in Luanda, Angola, with representatives of the five Western nations.

"Certain points in the proposal of the five powers were clarified and the two delegations accordingly agreed to proceed to the United Nations Security Council," a communique is-

sued in Luanda said. The proposal being submitted to the council calls for Secretary-General Kurt Waldheim to name a special U.N. representative to work with the South African administrator-general of the territory, Judge Marthinus Steyn, in arranging the elections. Martti Ahtisaari of Finland, the U.N. commissioner for Namibia, is in line for the

Nationalists in prison would be freed and those in exile let back into the territory to compete with local politicians.

The special representative would be helped by a U.N. Transition Assistance Group which might consist of as many as 1,000 civilians and 5,000

It was not known yet how the Luanda meeting resolved SWAPO's objections to two points in the Western proposals: the?disposition of South African troops in South-West Africa and the future of the Walvis Bay

The proposals called for the estimated 15,000 to 20,000 South African troops to be reduced to 1,500 and confined to one or two bases in the northern part of the country. SWAPO, waging a guerrilla war along the northern border, demanded that they be confined to a single base in the far

the former German ter-Grand jury to convene in Midland on Monday

(Continued from page 1A)

(Lozano) was jailed until the night he

-Several jail inmates, some of whom have claimed to be eye wit-nesses to mistreatments by officals of

- State Mental Health-Mental Retardation workers and Odessa doctors who may or may not have been made aware of Lozano's behavior and mental condition during his incar-

There have been several conflicting stories about what actually happened to the former Pecos man. The job of the federal grand jury, according to Dan Maeso of the U.S. Attorney's office, is to "sift through all the evi-

"The point of the whole investigation is to make a determination as to whether or not Larry Lozano's rights were violated by any law enforce-ment people in Ector County. And if there are proven to be any civil rights violations that caused the death, that makes it a felony offense under federal law," he said.

Maeso, who formerly was a civil rights investigator for the state attorney general's office, headed Attorney General John Hill's probe of the Lozano case. And it was Hill who, after defeating Gov. Dolph Briscoe in the Democratic primary for governor, called upon U.S. Attorney General Griffin Bell to order a special federal grand jury into the Lozano case. More than a few political observers have speculated that Hill may stand a chance of winning much of the Mexi-can-American vote in Texas, partially by virtue of his vigorous pursuit of

Hill has said he called for the grand jury probe because he believes a coroner's inquest in Ector County did not hear all the evidence. Hill also has criticized Ector County District Attorney John Green for not conducting a more vigorous investigation of the

Much of the evidence Hill himself must turn over to the grand jury will consist of material compiled by Maeso, who now is assisting the U.S. Attorney's office.

That material may include evidence of possible obstruction of justice charges involving Ector County officials, according to several informed sources.

Green, who already has predicted there will be no indictments, has charged more than once that Hill is using the Lozano case for political reasons. The Ector County prosecutor also maintained months before the coroner's inquest that there were no civil rights violations involved in the case. And, more recently, he has said he may prosecute witnesses who par-ticipated in the cornor's inquest hearing for perjury if the federal grand jury determines otherwise.

me see it as significant that Sheriff Elton Faught, who was not subpoenaed by Green for the coroner's inquest hearing in April, has been subpoenaed for the federal grand jury

The sheriff has denied that any of his men violated the inmate's rights. He initially told reporters that Lozano died as a result of his having banged his head against the plexi-glass win-dow in the door of a padded jail cell.

The inquest in April ruled the death as "accidental," holding that the 27-year-old newcomer to Odessa suffocated as a result of attempts by lawmen to restrain Lozano, who at one point was described as acting "like a wild man."

Immediately after Lozano's death, Faught claimed his prisoner had benged in a mental institution from the very first day of his arrest. However, Lozano remained in confinement with other inmates for 11 days. An interesting question during the probe may be: If Lozano was mentaly ill as the sheriff has alleged, houldn't he have been committed within 24 hours to an institution degned for treatment of the mentally

ill, as prescribed by state law?
Faught has said that commitment papers for Lozano were never signed. although he noted at the same time that some discussion had taken place with area Mental Health-Mental Retardation officials. Yet members of Lozano's family have asserted that the sheriff's department was less than cooperative in having Lozano committed or in having Lozano bondd out of the jail for committal

John Stringer of the A-1 Bonding Company telephoned an Odessa newsman about possible civil rights violations just hours before Lozano's death and took an interest in the case thereafter as a "liaison" between out-of-town newspaper reporters and sources who claimed to have wit-nessed civil rights violations against

"I know if I had bonded him out, he probably wouldn't be dead right now," Stringer has said. He also has said that the sheriff's department led him to believe that commitment papers had been signed for Lozano's transfer to Big Spring State Hospital, thus discouraging him from approaching the man about bonding.

Stringer later cooperated with investigators of the attorney general's office in identifying potential wit-nesses. Several weeks after the coroner's inquest for which he was subpoenaed but did not testify, he and his wife were indicted by a grand jury for "defrauding Ector County" by claiming another person's property to back

Stringer has maintained he was discriminated against, allegedly for his role in the Lozano case. He claimed recently that other bonding compan-ies in Odessa have routinely followed the same practice for which he was

Thomas Barker, a bondsman for gives views also has been issued a subpoena. Barker is a brother-in-law of Stringer and a former chief investigator for the Ector County District Attorney's office. He also was the baliff at the coroner's inquest.

Ector County Peace Justice Virgil Lumpee, who set bonds totaling \$26,-000 on Lozano the morning after the inmate had been booked by sheriff's deputies following a nighttime scuffle, pronounced the man dead outside an Ector County Jail cell 11 days later. In April, Lumpee presided over a coroner's inquest.

William Barnes, Faught's attorney, has been subpoenaed, possibly to give an account of a meeting he held with members of the sheriff's department on Jan. 29, a week after Lozano's death. The purpose of the meeting reportedly was to "get the story straight," according to a person who attended the session.

Former Ector Constable Leonard Garcia has been subpoenaed, although he has yet to divulge what he knows, if anything, about the Lozano case. Garcia told Midland lawmen that he was beaten prior to the inquest hearing because of what he knew about the case. However, he later was arrested by Midland authorities who said Garcia had provided false information. Garcia ultimately pleaded guilty to that charge and has been replaced in his capacity of con-

Dr. Kris Challipalli of Odessa, another witness subpoenaed in the case, performed the first autopsy on the body. Her initial report that Lozano died of a cerebral hemorrhage caused by a sharp blow to the back of the head has been at the center of a continuing controversy despite later testimony by three authorities, including Challipalli, that in their opinion Lozano was accidentally suffocated while being held down by depu-

The nine law enforcement officers who were present at the jail on the night Lozano died and who also reportedly helped to bring the inmate under control have been subpoen-

These officers include jailer Jackie Perkins; deputies Philip Martin, Mike Harrison, Ricky Kennedy and Randy Tenney; reserve deputies Phi-lip Neuendorff and Wayne Holloman; Texas Highway Patrolman Roger Weaver; and Gary Mitchell of the Texas Parks and Recreation Depart-

It was Perkins who reportedly asked Green to install electronic eavesdropping devices in his home to tape a conversation he had with Maeso and Stringer. That incident led to Green's charge that the attorney general's office had tampered with a witness prior to the coroner's in-

quest.
Other Ector County lawmen receiving subpoenaes include jailers Gabriel Rodriquez Perez and David Clayton Collier; deputies Harold Farnum, Barry Davis, Ricky John Kennedy, Bebby Dean Eaton, Dee Johns

Lowered European air fares pose Israeli tourism threat

Special to The Washing-

JERUSALEM - Israel tourism officials are more concerned over the new transatiantic fare structure, which strengthens European competition, than about possible effects of recent terrorist attacks in which tourists were among the victims.

In fact, the number of tourists arriving in Israel is still growing remarkably. Seventeen percent more arrived during the first five months of 1978, compared with the corresponding period last year, despite the fact that the average expansion of tourism the world over is not expected to exceed 9 percent. However, Yoram Blizovsky, director of tourism administration at the Ministry of Industry, Commerce and Tourism. admits to a certain uneasiness over prospects

Blizovsky still main tains that his original Miers (Canyon)-Way forecast of 1.2 million & Mills No. 7 Hicks, 2,440 tourists for 1978, an icfeet from north and 467 nrease of 15 percent over feet from west lines of the previous year, will be section 37, block 14, fulfilled. However he is TW&NG surveyt, ab- also aware of the somestract 694, 26 miles what disturbing picture southeast of Sonora, 4,- of hotel bookings for the coming months when the main bulk of Israel's annual tourism is expected. Robert Richman, manager of the Tel Aviv Sheraton, says advance bookings for the next few months show a definite decline over the same period last year. Tourism is

for the coming months.

Israel's major source of foreign exchange. The attack by Palestinian terrorists on Israelis traveling on the Coastal Road in March, the bomb in a tourist bus in Nablus that killed two German tourists in April, as well as the labor trouble that grounded Israel's national airline for 18 days in April, could endanger the flow of tourists, Blizovsky says. But the biggest immediate threat is cheap transatlantic

flights, he emphasizes. 'Our main worry is that more Americans will decide this year to go to Europe during the months of July and August when normally a quarter of all our tourists arrive," Blizovsky said in an interview. "We are therefore concentrating our efforts on obtaining a new air fare structure between North America

He was referring to three main moves. One is El Al's request to the CAB, supported by the Israeli government, to add landing rights to Chicago, Los Angeles and Miami. New York is currently its only gate-

The second is the appeal to the CAB by TWA and other airlines to be granted APEX rates for flights to a number of distinations, including Tel Aviv. The third hope has to do with an internal Israeli argument. Two years ago, the tourism dministration was able to convince the government to allow charter flights from the West Coast of the United States. It now hopes to

broadened to include the East Coast, and other

The danger of a slowdown of tourism from North America, source of clients for local four and five-star hotels, has tourism officials and hotel owners worried. Already one can notice a shift in the Israeli tourism map: the number of American tourists is declining and the number of European visitors is

constantly rising. At the same time; one could notice last year another shift in the pattern of tourism to Israel. The proportion of Jewish visitors is declining. Before the Six-Day War in June 1967, about 45 percent of all travelers to Israel were Jews. After the war, when the Old City of Jerusalem, Jerico and other historical places in the West Bank were opened to Jewish visitors, this ratio was reversed. However, under the current trend, Jewish tourists again are be-

coming the minority. These two changes in the pattern of tourism have the same effect: less business for the top hotels, mainly those along Tel Avis's beach

While there is an abundance of rooms in Tel Aviv, where several additional luxury hotels were opened in the past year, there is a shortage of rooms in Jerusalem. The 5,500 rooms in the capital, including those in three and four-star hotels, as well as in hotels in East Jerusalem, cannot handle the growing interest in visiting the Holy City. American tour operators complain that, since they cannot obtain two or three-day bookings for their 10-day package

forget the package because they cannot sell it without Jerusalem.

Five hundred addition-

al hotel rooms are now under construction in Jerusalem and 3,000 more rooms are being planned. Despite generous government subsidies to investors in the form of cheap loans, investors are complaining about red tape in getting their plans approved and the long period needed for construction. Although costs are not estimated to exceed \$28,000 per room in five-star hotels, investors maintain that at this level the feasibility of new hotels

is highly questionable. The shortage of hotel rooms in Jerusalem is an indication that, despite all efforts made in the past 11 years to develop other areas, Jerusalem, with its holy places and scenic beauty (enhanced in recent years as a rseult of efforts by indefatigable mayor Teddy Kollek), is still Israel's big hit.

In the past three years, however, Israel's Red Sea port of Eilat, once just a "promising tourist attraction, had become Israel's second tourist hit.

The gamble on building a string of hotels along the shores of the year-round warm-weather Gulf of Eilat that would attract mainly winter tourism has paid off. Fourteen weekly charter flights that land directly at Eilat in the winter months, as well as other flights that bring the visitors to Eilat via Israel's main gateway, Ben Gurion Airport near Tel Aviv, keep Eilat's facilities fully occupied for at least five months a

Tourists who come to tours of Israel, they are Eilat to swim and sun-

have this permission sometimes obliged to bathe have found it a convenient headquarters for week-long hikes into the southern Sinai mountains with their breathtaking rugged beauty, or for scuba diving and fishing escapades at Sharm-el-Sheikh, near the southern tip of the Sinai Peninsula, Other

spots on the Sinai coast

have become unofffical

beaches without any pub-Travel agencies and tour operators in recent vears have increased their efforts to bring Christian pilgrims to Israel, not just for Christmas and Easter. Last year, there was a significant increase in the influx of groups from America's Bible Belt.

These Protestant Fundamentalists, walking in the narrow alleys of the Old City of Jerusalem, meet Roman Catholic groups from France and Germany, as well as black-garbed peasants from Greece and Cyprus coming especially for the **Greek Orthodox festivals** such as Easter. For the Christian pilgrim Galilee

is the main attraction after Jerusalem. Israel has made an effort to open up the northern part of the country to tourism. Though the Plaza Hotel in Tiberias - managed by the Canadian Pacific chain, which also runs the Jerusalem Plaza - has barely been discovered by visitors since it opened last year, we-found it to be one of

the most beautifully de-

signed and best managed hotels in Israel. Yet the investors indicate they have a serious problem: "How can you bring tourists to a fivestar hotel located in a three-star town?" one of them asked. But Tiberias, like the rest of Galilee, is rapidly overcoming its "three-star"

Nothing quite like misguided courage

By ALFRED SHEINWOLD

South dealer

There's nothing like having the courage to take a finesse with your last card in a suit. Your opponents will admire this courage and pat you on the back while your partner looks for the aspirin.

Neither side vulnerable

NORTH V762 0753 A J 1098 EAST WEST ◆ Q 10 2 ◆ J 9 8 4 ♥195 Q 1083 OK 1096 #Q72 **4**653 SOUTH

Val Verde, Dawson, Kent gain explorers

A pair of wildcat operations have been staked in Val Verde County by Hunt Petroleum Corp. of Dallas, and single wildcats have been announced in King and Dawson counties.

Hunt will drill No. 1-2 Roland and No. 2-2 Roland as 3,800-foot expslorers in Val Verde County.

No. 1-2 Roland is 760 feet from north and 1,980 feet from west lines of section 2, block Q-7, TCRR survey, abstract 2689.

The site is five miles northeast of Pandale and one mile southeast of the one-well Will O (Wolfcamp gas) pool. Ground elevation is 1,980 feet.

Hunt No. 2-2 Roland is 905 feet from north and 1,050 feet from east lines of section 2, block Q-7, TCRR survey, abstract 2689 and five miles northeast of Pandale.

It is one mile south of the Will O (Wolfcamp gas) pool.

KING EXPLORER

A 6,000-foot wildcat has been scheduled in King County by Taubert, Steed, Gunn & Medders of Fort

The project, No.N1-OO S. B. Burnet Estate is 660feet from southwest and 1,980 feet from northwest lines of section 113, block 13, H&TC survey and 17 miles southeast of Guthrie.

The location is 1.5 miles northwest of the Tannehill reopener of the Buzzard Peak multipay field and three miles northeast of the Big N area. It also is three miles east of the Big S (Strawn) pool.

Fairbanks selected by firm

FAIRBANKS, Alaska-Northwest Alaskan Pipeline Co. has announced that Fairbans will be its headquarters in Alaska during construction and operation of the Alaska Highway Pipeline Project, reports John G. McMillian, chairman and chief executive officer.

McMillian said, "selection of the Fairbanks location was made after a comprehensive study by the company's task force of Alaska's principal cities, Anchorage and Fairbanks. It was the task force view that the imporatance of proximity to pipeline operations transcends other cri-

Fairbanks also was chosen, McMillian said, because of the availability of selected facilities at Fort Wainwright for government agencies, execution contractors, personnel processing and other temporar; functions

He added that locating pipeline of-fices in Fairbanks will facilitate a close working relationship between Northwest Alaskan and the office of the State Pipeline Coordinator, as well as certain federal agencies. which also will be located in Fairbanks.

Among the task force members are representatives from Northwest Alaskan; Fluor Engineers and Constructors, Inc., project management contractor for the gas line; a member of the Alaskan business community, and a representative of McKinsey and Co., Inc., an internationally-known management consulting firm.

The task force recommended further study to determine if any of the auxiliary project support activities should be located in Anchorage, McMillian said.

The location, 1/2 mile west of the Lamesa Farms (Siluro-Devonian) pool, is 1,980 feet from north and 660 feet frodm east lines of section 127, block M, EL&RR survey.

UPTON PROJECT

John L. Cox of Midland No. 1-B Langford is to be drilled one mile west of Spraberry Trend Area production in Upton County, 16 miles northeast of

The project is 1,320 feet from south and east lines of section 13, block Y, GC&SF survey. It is slated for an 8,700-foot bottom.

FISHER TEST

HLH Petroleum Corp. lof Dallas spotted a Strawn test in the four-well Raven Creek (Strawn) area of Fisher Clounty, seven miles northwest of Noodle.

Scheduled for a 5,600-foot bottom, it is 467 feet from south and east lines of section 1, block 19, T&P survey It will be operated as No. 1 Lila M. Touchstone.

CROCKETT OUTPOST

Mitchell Energy Corp. of Houston No. 1-32 Hunt is to be drilled as a one and five-eighths mile southwest outpost to the Aldwell Ranch (Canyon gas) field of Sutton County.

The 10,600-foot test is located in Crockett County, 20 miles southwest of Sonora.

The drillsite is 541 feet north of the southwest corner of section 24, block G, GWT&P survey, then 527 feet west to location in sectidon 32, O. A. Carruthers survey.

Company organized

DENVER, Colo .- Premier Resources, Ltd., a Denver-based oil and gas exploration company, has an-nounced the formation of Woodbine Petroleu, Inc., a 70 percen-owned sub-sidiary which will explore for oil and gas in the Gulf Coast areas-including Louisiana and Texas.

The remaining 30 percent of Wood-bine is owned by four officers of the new company who formerly held management positions with W. R. Crace and Co.

Kenneth I. Danneberg, president of Premier, said the initial operations of Woodbine will be financed by Premier and the new company will be involved primarily in the acquisition and brokerage of oil and gas dridling prospect, oil and gas expsloration and consulting services.

The offices of the new companyare in Dallas.

°LE. L. Boice has been elected president of Woodbine Petroleum. He formerly was vice president of exploration for W. R. Grace and previously held positions with Shell Oil Co. and American Petrofina Exploration Co.

The other officers include Frank W. Yantis, former land manager for W. R. Grace, with previous land management positions with Hunt Oil Co. and Reserve Oil, Inc.; R. R. Williams, former chief geologist forW. R. Grace, and C. H. Elliott, former chief geophysicist for W. R. Grace.

Hill urges exemption

AUSTIN, Texas (AP) - Attorney General John Hill urged the Texas congressional delegation Wednesday to support exemption of so-called marginal wells from federal price

The issue is expected to be voted on this week, and Hill asked the delegation to ignore the Carter administration's opposition to such exemptions.

"Texas needs the marginal well oil exemption," Hill said in a telegram. We produce 11 million barrels of marginal well oil each month in Texas, and exemption from federal price controls would mean \$25 million to \$40 million a year in additional state oil tax revenues.

Canada's crude supply demand outlook bright

TULSA-A demand slowdown, a lower level of exports and expected increases in supplies from unconven-tional petroleum sources brighten Canada's crude supply-demand out-look through the 1980s.

Oil-industry analysts expect production from conventional crude sources to decline, the Oil & Gas Journal reports. But tar-sand and heavy-oil production can take up some of the slack if extraction and upgrading facilities are brought on stream quickly enough.

In reports toCanada's National Denergy Board (NEB), oil companies and trade associations said the nation may be able to meet the govern-ment's self-reliance goals during the

The government wants to reduce imports to 800,000 barrels a day or one-third of total domestic consumption, whichever is less. Canada was a net exporter of crude oil until a few years ago, when the government or-dered a phaseout of oil exports to the U.S., the Journalpoints out.

Organizations reporting to the NEB cited these factors in their projections of slowed demand:

-Estimates of Canada's gross national product in 1990 are about nine percent lower than they were two

-Higher prices for oil and gas have prompted more conservation, improving energy-use efficiency six to seven percent over a continuation of pre-1973 trends. That is expected to rise to about 17 percent by 1985 and to 25 percent or more by 1995.

-Gas is expected to capture dmore

of the energy market from oil "The oil demand and producibility projects show that a strong development program may put Canada in a position to achieve the federal governmentd's self-reliance target," said Imperial Oil Ltd., Canada's big-

gest oil firm. "With oil demand in the late 1980s of about 1.9 million barrels a day and oil production averaging 1.4 million barrels a day, the net import require-ment would be 500,000 barrels a day, which is within the one-third target.

Joe McCollum

Retirement announced

Joe McCollum, senior staff assistant in Continental Oil Co.'s Midland Division, has retired after 32 years with the company. His retirement date was June 30.

He was educated in Mertzon public schools, Schreiner Institute and The University of Texas at Austin. McCollum joined Conoco in Monument, N. M., and later worked assign-

ments in Eunice, Denver City and Odessa. He has been a Midland resident since 1976. He was honored with a recent retirement party attended by co-work-

Midlander appointed

J. Russell Yost of Midland has been appointed regional representative for West Texas for Energy Consumers and Producers Association.

The association is a non-profit organization devoted to filing lawsuits challenging what it considers to be oppressive and unworkable federal rules and regulations. The headquarters for the organization are in Seminole, Okla.

Yost has lived and worked in Midland the last 20years and until 1970 owned Williamson Well Service, Inc. Since that the he has worked as a consultant to independent operators on workovers and completions.

Yost has been a resident of Midland since 1957. His vast experience in the oil industry includes working at Spindletop and High Island fields as well as the Gulf Coast and Oklahoma and Louisiana. In 1948 he was part owner of Zephyr Drilling Corp. which operated in the Permian Basin area.

The association has approximateldy 500 members in 15 states, most of whom are independent oil and gas producers.

Exxon sets long outpost

Exxon Corp. No. 501 Haley Unit is to be re-entered as a two and seveneighths miles northeast outoost to the two-well Evetts (Pennsuylvanian) field of Winkler County, 12 miles northwest of Kermit. Location is 1,867 feet from south

and west lines of section 5, block 27, psl survey. It is bottomed at 18,530 feet. Opera-

tor will plug back to 14,684 feet. It originally was completed as a Silurian and Ellenburger gas well in the Evetts pool.

CRANE STEPOUT

Texas Oil & Gas Corp. No. 1 Reed Butler is to be re-entered and tested in the San Andres in the TE Bar multipay area of Crane County.

Bottomed at 6,180 feet, it will be tested above 2,700 feet. It is 2/3 mile northeast of the closest San Andres

Location is 1,980 feet from northwest and 660 feet from southwest lines of section 10, block 4, H&TC survey.

MITCHELL WELL HMH Opderators of Midland No.

5-A Wilma McKenney has been completed in the Westbrook, East (Clear Fork) pool of Mitchell County, three miles northwest of Westbrook. On 24-hour potential test it pumped

48 barrels of 30-gravity oil and 75 barrels of water. Gas-oil ratio was too small to measure. The pay section was acidized with

2,000 gallons and fractured with 80,000 gallons. Total depth is 3,200 feet and 4.5-inch pipe was landed at 3,177 feet. The

plugged back depth is 3,113 feet. The well is 1,000 feet east of other Clear Fork production and 2,173 feet

from south and 1,660 feet from west lines of section 29, block 27, T&P

KENT TESTS

Harken Oil & Gas, Inc., of Abilene staked a pair of projects in the Spires, West area of Kent County, four miles northeast of Polar. No. 1 Sims is 5/8 mile west of

production and 933 feet from north and east lines of section 15, block 5, H&GN survey. No. 1 Wallace is one and one-eighth miles north of production and 933 feet

from south and east lines of section 8, block 5, H&GN survey. Each of the projects will be drilled on a 7,200-foot contract.

GAINES TRY Texas Oil & Gas Corp. No. 2-B Nelson will be drilled 1/2 mile west of production in the GMK, South field

of Gaines County. The 3,600-foot test is 660 feet from north and 1,980 feet from west lines of section 47, block G, WTRR survey and nine miles northeast of Seminole.

effort for crude oil tax dent," said Rep. Al Ullman, D-Ore.,

By TOM RAUM

WASHINGTON (AP) - President Carter's departure for the economic summit in West Germany is being accompanied by a last-ditch effort to revive his troubled proposal for a crude oil tax.

Congressional leaders hope to present Carter with some sign of progress on his energy program despite his apparent intention of downplaying energy issues at the summit. House-Senate conferees on the oil

tax were to meet today for the first time in seven months to discuss the measure in a session deliberately timed to coincide with Carter's departure for Germany.

'We're trying to help the presi-

Congress battle looms on systems

By TERENCE HUNT

WASHINGTON (AP) - A battle is shaping up in Congress over how far and how fast the Pentagon should go in installing solar energy systems in military housing, offices and other buildings.

The Senate wants the Defense Department to rapidly accelerate solar energy experiments in new construction projects, but the House is questioning the cost and reliability of such programs.

The issue of solar power was part of a \$3.9 billion military construction bill approved by the Senate on Wednes-

Aside from the solar power section, the bill also deletes authority for the entire \$375 million package of combat-related construction projects proposed by the administration for Europe. Sen. Gary Hart, D-Colo., floor manager of the bill, said United States should not unilaterally fund projects that will be used by alliance members.

He said the Armed Services Committee, which rewrote the administration's request, "takes issue not so much with the requirement for these facilities, but with the question of who should pay for these facilities."

The issues of solar power systems and NATO construction will be considered when negotiators meet to work out differences between the House and Senate versions of the bill, The House approved a \$4.1 billion military construction authorization bill that included most of the NATO projects sought by the administra-

The Senate bill would require that the best-available solar systems be incorporated in all new family housing units and in 25 percent of all other facilities placed under design after the legislation is enacted.

The Armed Services Committee report on the bill envisions that at least \$750 million in new projects would include solar energy systems.

Hart said that "the Defense Department is the ideal federal test-bed for demonstration efforts and for large-scale buys of new devices such as solar panels - to achieve market penetration, to bring down unit prices and to foster public acceptance.'

He said, however, there has been "strong, bureaucratic resistance within the Defense Department" to make a strong commitment to new energy technology. There also is resistance in the

Its construction bill contained no quota for solar power systems, so the issue will be debated by House and

Senate conferees. The House Armed Services Committee report accompanying its version of the bill blamed escalating costs for the cancellation of one major solar experiment. Under the test project, solar heaters were to have been installed in 50 family housing units at 15 bases.

head of the House negotiators, although he said he doubted that any decisive action would come out of today's session.

Carter makes last ditch

The real attempt at a compromise on the tax is being negotiated behind the scenes.

Some House leaders have joined

ENERGY OIL & GAS

with Energy Secretary James R. Schlesinger in offering a new package of administrative steps and legislative moves to greatly increase - and in some cases deregulate - the price of domestic oil now under federal price controls.

These items are being held out in hopes of picking up oil industry support for the tax which, in turn, might rally needed support for it in the Senate, according to Rep. Thomas Ashley, D-Ohio, a key House energy negotiator.

Ashley said this approach is beginning to give gas and oil producers "greater appreciation" for the tax - although they are not yet jumping on the bandwagon.

The House has already approved the tax but the Senate, where the oil industry wields more power, has voted to reject it.

Carter views the tax, which would add seven cents a gallon to the price of gasoline and other petroleum products, as one of the best ways to encourage conservation and reduce U.S. reliance on imported oil.

The attempt by the administration and House leaders to revive the tax has two separate thrusts, both geared to pick up industry and Senate support for the tax: -Promises by Schlesinger, made in

a series of meetings with congressional and industry officials, to take immediate steps to increase prices of domestic oil - now under federal price controls - in exchange for industry support for the tax.

-An offer of House leadership backing for legislation to remove existing price controls from any well producing less than 35 barrels of oil a day - also, in exchange for industry support for the tax.

This measure would be enormously important to independent drilling companies. Currently, only wells producing less than 10 barrels per day known as "strippers" — are exempt from price controls.
