Station cost hikes spark Council meeting

By LANA CUNNINGHAM

mily fall

Architects had their day before the Midland City Council Tuesday, but their requests were granted only after some dissatisfaction got roundly ex-pressed by council members.

At the center of the disgruntlement is the apparent rise in building costs since plans for the central fire station, substation and Exhibit Center were

initiated several months ago. Plans and specifications for the new central fire station were approved and the architects, Bob Zentner, Al Chakos and Tim Norton with Chakos, Zentner and Marcum of San Angelo, were authorized to advertise for

But estimated cost of the station, to be located in Crier Park, has risen from a \$700,000 figure given in Jan-aury to \$935,000, the architects ad-

vised the council. "That's a 35 percent increase so far his year," Council Member G. Thane Akins remarked. "We don't expect prices to go down, but we don't expect them to go up 65 to 70 percent a

Sloan suggested, "We could save \$1 nillion if we leave the fire station where it is." But Mayor Ernest Angelo Jr. sharply disagreed, saying "We can't quit now.

Zentner said he hoped the bids would come in under the \$900,000 figure since five builders already have shown interest in getting the job. The council had a problem with the substation in that few bids were received and all were higher than expected, they said.

Zentner explained the substation is considered a small job and few builders were interested.

Revisions on the substation were approved and construction will start as soon as the builder, Ramcon, Inc., can obtain a performance and payment bond. Zenter said the company had been given 45 days from the time the city council authorized it to obtain the bond, and as of Tuesday only 14 days remained.

"They can't convince their bor companies they (Ramcon) had a good price," Zentner said. "The bonding

companies are running scared."
The architect added the builder is applying with C&L Bonding in Chicago for the bond and the firm is hoping for approval. The application lists Ramcon, Inc. and Louis Rochester,

an Odessa developer. Changes in the substation will cut costs about \$6,000, bringing the total cost to about \$227,000. Plastic lami-nated panels on the foldup bunks were changed to gypsum and paint and a

Policies implemented by Sher-

iff Dallas Smith to "clean up"

By MARK FOLGER

Legislature approves new tax amendment, adjourns

By LEE JONES

AUSTIN, Texas (AP) - Lame duck Gov. Dolph Briscoe's special legislative session on tax relief adjourned Tuesday night after voting almost \$1 billion worth of tax cuts.

Briscoe pronounced its output "meaningful" — the code word that told lawmakers they could go home without worrying about a repeat ses-

"I called the Legislature into special session to provide meaningful relief to the people of the state. The members of the Legislature have labored dutifully, and I congratulate them on their product," Briscoe

Results of the nasty-tempered 30day session weren't the dramatic, immediate tax cuts Californians got from Proposition 13, which inspired Briscoe to call the session.

But they earmark the state treasury surplus of almost \$1 billion for return to the taxpayers over the next three years, while leaving \$2 billion in growth revenue for new state spend-

The session climaxed Tuesday with submission of a constitutional amendments package that backers said would cut property taxes for homeowners, farmers and ranchers.

Some also said it held promise for future property tax "reform" and slower growth in state government

House members approved the package (HJR1), 107-33, hours after senators adopted it, 28-2. Some representatives who spoke angrily against the measure rushed to vote for it when Speaker Bill Clayton's vote

clearly put it over the top.

The voters will make the final decision at homeowner who is disabled or 65 and older. If an older person qualified for the extra exemption, his or her property taxes also would be fro-

Tax all farm and ranch land on its income-producing capacity, not its potential selling price.

- Abolish the seldom observed constitutional rule that intangible property, such as bank accounts and securities, be taxed. The Legislature, however, could impose property taxes on intangibles if it saw fit.

- Authorize the Legislature to exempt personal automobiles from property taxes.

- Exempt household goods and personal effects, except those held or used to make money, from taxation.

- Restrict state spending increases to the same percentage as the Texas economy's growth rate. The Legislature would decide how to measure this

- Mandate "truth in taxing" for all political subdivisions. Notice and hearings would be required before tax revenues could rise, even those resulting from revluation of property.

- Prohibit statewide real estate appraisals and require enforcement of uniform appraisal standards to originate in the county where the tax is imposed."

Rep. Wayne Peveto, D-Orange, had wanted constitutional language mandating property tax "reform" countywide appraisals and statewide appraisal standards in place of the present crazy quilt taxing system.

But he disagreed with opponents such as Rep. Luther Jones, D-El

Paso, who said the measure gutted property tax "reform" for the fu-

"The opponents of tax reform are having a good laugh now because we have erected insurmountable barriers to that reform in the future,' said Jones, who rushed to switch from "no" to "aye" when it became clear the measure would carry.

"The provisions we have in here take the demagoguery out of this issue and pave the way for property tax reform in the next session," Peveto said.

He referred to the fears of rural landowners and real estate men that unified property appraisals, overseen by an Austin bureaucracy, would mean higher taxes.

Assuming a 1 percent tax rate and a 50 percent assessment ratio, the \$5,-000 homestead exemption would save a homeowner \$25 a year on property taxes. If the Legislature later approved a \$10,000 added exemption for the elderly and disabled, they would save another \$50 per year.

No examples or estimates were available to show how much a farmer or rancher might save from the "agricultural use" exemption, which the Legislature still must imple-

A Senate-passed bill laying out out the mechanics of taxing rural land on productivity died in the House with adjournment.

With the House cracking the whip, the Legislature passed and sent Briscoe a bill Tuesday setting up a \$450 million "School District Reimabursement Fund." The money will compensate districts in the 1979-80 and 1980-81 school years for revenue they would lose to property tax relief if the constitutional amendments

Senators objected to the reim-bursement bill, but House conferees told them, "No bill, no constitutional

The other tax relief measure (HB1) passed by the session repealed the 4 percent state sales tax on residential gas and electric bills and raised family inheritance tax exemptions from \$25,000 per person to \$200,000 per es-

The sales tax cut — which would chop \$4 from a \$104 electric bill takes effect with billings after Oct.

Inheritance tax reductions apply to the estates of persons who die after Sept. Cost of the inheritance tax and sales tax cuts was estimated at \$491.4 million through Aug. 31, 1981.

Few legislators showed much enthusiasm for the session, and some House members blamed Speaker Bill Clayton for talking Briscoe into it during an outbreak of Proposition 13

Clayton, whose friends criticize him for being reluctant to use his power, was accused of using coercive tactics to assure the session's success.

In the final hours Tuesday night, Clayton had to weather an unusual "appeal from the ruling of the chair" when he overruled a point of order that would have killed the property

tax relief package. Rep. John Bryant, D-Dallas, a consistent critic of Clayton, pulled down his appeal after asserting, "The time has come that we do our business on

Clements calls for White Sands WIPP location

By LINDA HILL **R-T Staff Writer**

ODESSA - Bill Clements, Republican candidate for governor, predicted Tuesday the nuclear Waste Isolation Pilot Project will be located on the White Sands federal reservation in New Mexico, rather than at Carlsbad, N.M., as the Department of Energy previously had indicated.

Over the past several months, DOE has held public hearings in both

publican presidents, predicted the selection on the basis of information he said he received from unnamed

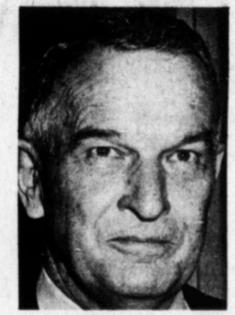

"I don't want to share my sources because I don't want to betray a confidence. But remember, I was on the National Security Council and deputy secretary of defense four years. I do have some sources," Clements said.

Because he thinks the White Sands site is logical, he said, he would oppose locating the project in Carls-bad.

He said he thinks the White Sands area and the Carlsbad area would be about equal in geological stability, but the White Sands location would not involve storing the highly charged nuclear waste in underground salt domes.

Attending the reception for Clements was Odessa District Attorney John Green, who said he is supporting Clements. "I'm a supporter of the Democratic Party, but I would support this man against John Hill any time," Green said.

The reason, Green said, is what he called Hill's advocacy of state control of local affairs. The Larry Lozano case is an "example of the state

government taking over local affairs," Green said.

Lozano was an Ector County Jail inmate who died under controversial circumstances in that jail Jan. 22. A federal grand jury, now recessed,

West Texas—Scattered showers and thunderstorms most sections through Thursday. Heavy rain possible in the southwestern mountains today. Highs mid 80s north and mountains to mid 90s Big Bend. Lows low 60s north, mid 50s mountains to near 70 Big Bend.

North Texas—Clear to partly cloudy and warm through Thursday. Widely scattered thundershowers northwest. Highs 90s. Low 66 to 74.

Port Arthur to Port O'Connor—Light east to northeast wind through Thursday. Seas less than 2 feet. Wind and seas higher in or near isolated mostly afternoon thunder-

Port O'Connor to Brownsville—East to northeast wind 10 to 15 knots through Thursday. Seas 3 to 5 feet. Wind and seas higher in or near isolated afternoon thundershow-

South Texas—Partly cloudy and hot with isolated mostly afternoon and evening thundershowers through Thursday. Highs 90s. Lows 70s.

Road sought to woo company into Midland

In an apparent bid to encourage the location of Pittsburgh Plate Glass in Industrial Park, Fred Tyler and Winston Barclay, members of the Industrial Foundation, Tuesday during a special meeting asked County Commissioners and the State Highway Department to pave 2.2 miles of road along Industrial Park.

The road runs along a section of property on which Pittsburgh Plate Glass has purchased an option. Company officials will arrive in Midland Aug. 28 and 29 to make a final decision on whether to purchase the property and locate in Industrial Park.

Henry Pearson, district engineer with the Texas Highway Department, and the commissioners agreed to attempt a joint project to pave the section of "collector road" in ques-

Pearson told commissioners he would check with Highway Department administration officials to determine if a joint county-state project was possible. He said he expected to have an answer by Friday.

The road in question would run west from the Midland Loop, FM 1369, 2.2 miles. Eventually, Pearson said, the road would possibly extend to the airport road, FM 1788, and possibly, sometime in the future, all the way to

The road would serve as a "collector road" to collect and take traffic to the highway railroad crossings.

"The road would collect traffic as the area develops between Interstate Highway 20 and U.S. 80," Pearson

Tyler said the Industrial Foundation was trying to get the Highway Department or the County to help

pave the dirt road. "We need it for that second phase of Industrial Park. We're going to be latting that property very soon, and then we'll start development of 34 acres. We need that road paved for 1.5 to 2 miles," Tyler said.

work against housing industry spending practices have combined

have a detrimental effect upon the housing industry, George Bush of Midland Tuesday told members of the Midland Board of Realtors. Bush is the Republican candidate

for the 19th Congressional District seat being vacated by Rep. George Mahon of Lubbock for the first time since it was created 44 years ago. Bush faces Democrat Kent Hance of Lubbock.

Hance, a state senator, had been scheduled to appear with Bush, but he had to attend the final day of the special session of the State Legislature in Austin. "Inflation has had a tremendous

effect upon the real estate market,' Bush told the Realtors meeting in the Midland Country Club. He said 80 percent of real estate buys are made with money from savings, but inflation is cutting into the consumer's savings, giving him less money with which to purchase real estate.

While the general income has doubled in the past several years, Bush taxes have tripled during the same time.

The source of inflation, Bush said, is "fiscal irresponsibility. There are lousy business practices in Washing-

Two proposals before Congress now - the Kemp-Roth Bill and the Steiger Amendment — received Bush's approval for their attempts to lower inflation and to help people more than than 55 years of age. The Steiger Amendment is designed to aid those over 55 who are retiring and want to invest money.

Inflation, goverment spending

The Kemp-Roth Bill proposes a 331/3 percent across-the-board tax rate reduction.

"Critics of the bill scream it will cause more inflation," Bush said. "The proposed tax relief outlined in the bill would offset the Social Security increase of \$66 billion over the next several years.'

Bush said the government should "help people realize their American dream. People should be given a chance to realize their own ambitions. This is not a regressive idea. If the economic pie continues to shrink, many will be left out of it. But if it grows, people can have a share.' Bush also touched on topics of inter-

est to the Realtors, including: - National health insurance: "I don't think it is economical and is a disincentive for the medical profess-

ion to be efficient.

Land use bill: "I would have voted against the 1976 bill. Federal land use planning is not good."

Sheriff's bonding policies

save taxpayers thousands

with any additional expenses, said Smith. However, he may

still be subject to forfeiture

bondsmen in and around the jail

power. It has overstepped its boundaries.

- Social Security: "I think it will be bust in 10 years unless there are some changes. The ideal solution would be for Social Security to be made sound and people given the chance to invest the money the way they feel."

- National gas compromise: "It proposes something like 20 different pricing categories of gas and this is wrong. The market place should decide what is a reasonable price for gas. Deep gas can be found, but people are not doing it because there is no pricing incentive right now.

- Energy crisis: "There is definitely an energy crisis because we are importing a large amount of oil from Saudia Arabia.

- Devaluation of the American dollar: This can be eliminated two ways. "One is by solving the energy problem and by pushing exports of agriculture products. The Administration has been neglecting the agricultural products and have been letting the State Department interfere with its human rights policy.'

After admitting that he and Hance have few idealogical differences, Bush explained why he should be

elected to the 19th seat over Hance. "Hance is a good man," the Midland oil man said. "But, if you believe there needs to be a reform in Washington (D.C.), if you believe you need someone who can go to Washington and say 'no' and who won't feel the pressure of party politics, if you want something changed, I believe I can do

He added that if there is a continuance of a Democratic majority of 2 to 1 over the Republicans after the November election, President Jimmy Carter will take it as "an endorsement of his policies."

Special session 'meaningful'

(Continued from Page 1A)

time or start enforcing our rules, whether or not is the last night of the session.

"I think we've just seen a soretailed loser standing here at the microphone," said Rep. Jim Nugent, D-Kerrville, who rose to defend Clay-

Briscoe was euphoric at his news conference following approval of the property tax relief proposal and scoffed at criticism that the session's results would mean little to the average taxpayer.

"There is the homestead exemption, a reduction of a person's taxes on his homestead, spending limitations and elimination of taxes on utility bills," Briscoe said.

The governor had asked the session to exempt \$10,000 of a homestead's assessed value from school taxes, plus another \$10,000 for elderly homeowners. He got \$5,000 off market value - a much smaller chunk of relief - and a "maybe" on higher exemptions for old people.

He also failed to get a Californiastyle initiative and referendum proposal, a required two-thirds majority of the Legislature to pass tax bills.

But he got productivity valuation of agricultural land, repeal of the utility sales tax and higher inheritance tax exemptions.

Often accused of inactivity during legislative sessions, Briscoe got out and hustled votes as this one came to

was called in Midland to hear testimony about that death after Hill recommended such an investigation to U.S. Attorney General Griffin Bell.

"Everybody better worry about John Hill if he becomes governor," Green added.

"I'm delighted to hear John (Green) say these things," Clements

Clements reiterated his opposition to Hill's proposal to authorize statewide grand juries in certain cases. Of the special legislative session which concluded Tuesday in Austin,

Clements said he was still optimistic a compromise could be reached on tax reduction, and he hoped the Legislature would pass necessary measures to get a constitutional amendment on the November ballot authorizing initiative and binding referendum, He accused the legislators of "pro-

crastination" and said he would favor a second special session if actions in these areas did not materialize during the session. (Legislators did take steps in that direction later Tues-

He called on Hill to meet him for a public debate and charged that Hill's failure to accept past invitations to meet show "he's got something to hide. I don't know what, but I'm looking."

Council finds construction costs have risen 35 percent this year

(Continued from Page 1A) cheaper wall covering will be used.

The council considered changing the driveway from concrete to a heavyduty asphalt, but went with the concrete.

Fred Baker, director of public works, said concrete will last better over a long period of time. Because an asphalt drive would

cost less, the council decided to allow builders to submit bids for the central fire station quoting prices for both asphalt and concrete drives. Architects for the Exhibit Center to

be located downtown also came under fire from the city council before the panel approved revising the contract upward from \$1 million to \$1.25 million and approving partial payment.

The architects recommended in a memo the price be moved upward to account for building costs. The council had little discussion on this, but disagreed on paying the architects.

Joe Neussle, city attorney, explained the contract called for the architects to be paid a percentage of the final cost.

Council Member Tom Sloan objected to that, saying the arhitects should be paid the percentage based on the \$1 million estimate. Council Member Gordon Marcum II backed the idea saying, "Every month they procrasti-nate the higher the building costs go

Before suggesting not to pay the architects, Sloan said, "If they keep holding off, I feel we should fire them and hire someone else to do the However, Mayor Angelo comment-

ed, "I don't think we really have a choice (about payment terms) be-cause it's in the terms of the con-

"That's a shame," Sloan said wryly. "I was really looking forward to voting against it (paying them)."

Landfill charges which were insti-

tuted by the council in July were reviewed by Baker after Don Murphey with Texas Plastic Industries voiced his objections to the charges. The firm dumps trash at the landfill each day and must pay an estimated \$170 to \$180 a month, he said.

Baker said the charges were set in line with other area cities. Odessa dbes not charge yet, but they may start soon, he said. Since Midland started charging, Odessa personnel have noticed a tremendous increase in the number of people using the

landfill, he said. A request by the Permian Basin Duplicate Bridge Club to purchase city land to construct a building was denied. Angelo said the council voted at the last council meeting not to sell land in the area specified by the club because it is in line with Midland

Air Park and the airstrips. The club will consult with the Planning and Zoning Department to locate another tract of land suitable for the building, supporters indicated.

In other action, the council authorized a golf course agreement with Rex Worrell at Hogan Park Golf Course, accepted a bid to construct a basketball court in Fasken Park, authorized the public works director to approve use of materials other than concrete for sidewalks and approved a contract and authorized funds' for Ed Reed to conduct a study on Midland's water well fields.

Temperatures still below normal Another August day without bona

fide summer weather passed Tuesday and the weather outlook, at least through Thursday, reads like the same story.

It's been about a week since the temperature has been in the 90s. Cool and cloudy weather has been the trend so far this month. The weatherman said there is a 20 percent chance of afternoon and evening showers and thunderstorms through Thursday.

Tuesday's temperature hit a high of. 89 degrees. The record high for August 8 is 104 degrees set in 1952. The overnight low of 66 degrees was just shy of the record low of 62 for August 9 set in 1976.

Confessed 'flitter' finally wins title of 'King of Canoes'

HEALDSBURG, Calif. (AP) -Once Bob Trowbridge was up the creek without a paddle. Now, he's the King of Canoes, overseeing the nation's largest fleet of the slender craft on one of the most popular canoeing rivers in the world.

Trowbridge, who admits to "flitting" in his youth instead of looking for a good job, arrived in this small town about 50 miles north of San Francisco after World War II and took over a bar and dance pavilion on the Russian River.

They say this is the most popular canoe river in the world," he said, waving at the peaceful stream. "This little bitty river."

Trowbridge should know. When he started, he had half a dozen motheaten canvas canoes. Now the sleek aluminum craft - about 1,200 in all, each

LIMIT ONE COUPON PER CUSTOMER AS A SALE

emblazoned with his stenciled name - can be seen on nearly every beach along 60 miles of the river. He also has canoes on the Sacramento, American and Colorado rivers.

There are some 800 canoe operations like the one Trowbridge owns in the United States. The largest of the others has about 500 canoes.

"Canoeing is kind of like the last frontier, the same spirit," he said. "On the river you can get away from

Trowbridge retired recently and turned the canoes over to his son, Bill. But he still is active in the enterprise because, he said, "I just like to

At first, Trowbridge recalled, peo-

ple just rented the canoes to paddle around in front of his bar. The longer trips of a week or more - around which the business now revolves began almost as an accident.

"There was this banker from San Francisco who started having me take him up to Alexander Valley so he could come down," Trowbridge said.
"The whole business started from there, built up to hundreds of people. Amazing, just amazing the growth that came from word of mouth.

"Started with just one," he said, "then circles of circles of friends. Something everyone could do. Not just the elite. People could afford something like this. This year we'll

have 100,000 people on the river." Trowbridge said that he has added 100 canoes a year to his armada just to keep up with the demand. But it's not the canoes that caused him the most trouble — it was the paddles.

Originally he used wooden paddles - a purist. But in 1975, hardwood was scarce and his paddle supplier just quit sending them.

"I was brainwashed on wood," he said. "Nothing could be better than wood."

But he took a second look at a plastic paddle that a salesman had left and found it was virtually unbreakable. He's been using them

"The outdoorsman has to have his wood," Trowbridge said. "But I've got to be practical."

DEATHS

Clifton R. Cast

Clifton R. Cast, 70, 3102 Roosevelt St., died Monday in a Midland hospital after a lengthy illness.

Services were to be at 2 p.m. today in the First Baptist Church in Rush Springs, Okla., directed by Calloway and Smith Funeral Home in Rush Springs. Burial was to be in Rush Springs Cemetery. Local arrangements were handled by Newnie W. Ellis Funeral Home.

He was born June 27, 1908, in Grady County, Okla., and spent his early life there. He served in the U.S. Army during World War II. After his discharge, Cast returned to Rush Springs where he entered the construction business. He moved to Midland in 1947. He retired from the Midland Independent School District in 1970. Cast was in the construction business at the time of his death. He was a member of the First Baptist Church in Rush Springs.

Survivors include his wife, Juanita; three sons, T.R. Cast and Bob Cast, both of Midland, and Pete Cast of Rush Springs; a brother, Clyde Cast of Rush Springs; a sister, Oleta Reeves of Oklahoma City, Okla., five grandchildren and three great-grandchildren.

Jarrell J. Jones

BIG SPRING — Services for Jarrell J. Jones, 59, of Kiowa Lake and formerly of Big Spring were to be at 2 p.m. today in Nalley-Pickle Funeral Home. Burial was to be in Trinity Memorial Park.

He died Sunday at Lake Kiowa. Jones was born March 30, 1919, in Valley Springs, and had lived at Lake Kiowa for seven years. He was a member of the Baptist Church and the Staked Plains Masonic Lodge No.

598 AF&AM. Survivors include his wife, Paula; a daughter, Paula Jan Huestis of Abilene; two brothers, Jimmy Jones of Big Spring and Harold Lee Jones of Redondo Beach, Calif.; a sister, Kathryn Jones of San Jose, Calif.; a grandson and a number of nieces and

Sandra Fielder

OZONA - Services for Sandra Fame Fielder, 17, of Ozona will be at 2 p.m. Saturday in Mount Zion Baptist Church here. Burial will be in Ozona directed by Larry D. Sheppard Funeral Home of Ozona.

She died Sunday in Pecos. She was born Sept. 23, 1960, in Washho, Nev.

Survivors include her mother, Edna Fielder of Ozona; three sisters, Cherrie E. Fielder of Ozona, Annie Will Jacobs of Weatherford and Shirley Ann Richardson of Colorado Springs, Colo., and four brothers, Willie B. Fielder Jr. of Beaumont, Alonzo Fielder of Weatherford, Donald Fielder of Edgewood, Md., and Johnny Mac Fielder of Fort Carson, Colo.

Henry Dubree

BIG SPRING - Henry Dubree, 70, of Big Spring died Tuesday at his home after a sudden illness.

Services will be at 10 a.m. Thursday in Nalley-Pickle Funeral Home with graveside rites to be at 3 p.m. in the Masonic Cemetery at Abilene.

He was born Sept. 5, 1907, in Sealey. He was married to Louise Newberry June 2, 1938, in Albany. He had lived in Big Spring since 1953. Dubree had worked at the Veterans Administration Hospital for 23 years as an engineer. He retired in June 1975.

He was a member of Wesley United Methodist Church. He was a veteran of World War II and served in the U.S. Army in New Guinea in the Phillip-

Survivors include his wife, Louise: three sisters, Minnie Durham of Brownfield, Lona Blackwell of Fort Worth and Lillie Dubree of Lubbock; a brother, Walter Dubree of Tahoka, and several nieces and neph-

Emmett W. Nail

BIG SPRING - Emmett W. Nail, 86, of Big Spring died Tuesday in a Big Spring hospital.

Services will be at 3 p.m. Thursday in Newhaven Baptist Church in Choc-taw, Miss. Burial will be in Newhaven Cemetery directed by Oliver Funeral Home. Local arrangements were handled by Nalley-Pickle Funeral

He was born Aug. 28, 1891, in Choctaw, and moved to Big Spring 10 years

He is survived by a son, Emmett Nail Jr. of Big Spring; a sister, Burvie Hanson of Europa, Miss., six grandchildren and 10 great-grand-

Nancy Bedwell

BIG SPRING - Services for Mrs. Edward (Nancy) Bedwell, 35, were to be at 3:30 p.m. today in Nalley-Pickle Funeral Home. Burial was to be in Trinity Memorial Park.

Mrs. Bedwell died Monday at her home here after a lengthy illness. She was born Dec. 2, 1942, in Lame-

sa. She married Edward Bedwell on May 15, 1959.

She is survived by her husband; a son, Mark Edward Bedwell of Big Spring; two daughters, Patsy Bedwell and Tammy Bedwell; four brothers, W.R. Nix of Fort Worth and Gene Nix, Richard Nix and Roger Nix, all of Big Spring; and three sisters, Linda Bewaters of New York and Faye Thorp and Bonnie Allred, both of Big Spring.

Rev. V.T. Herron

The Rev. Vonnie Thomas Herron, pastor of St. Luke A.M.E. Church of Midland died Tuesday in a Lubbock hospital after suffering an apparent heart attack.

He was scheduled to preach at the Northwest Conference of the Texas Area of the African Methodist Episcopal Church in Lubbock Tuesday

Services for Herron are pending at Jackson Funeral Home.

Trustees approve discipline guidelines, salary increase

The board of trustees of the Midand Independent School District Tuesday approved guidelines on elementary discipline, a performancebased salary increase and received advice from a local group on ways of shaping the school district's drug education program. Trustees conferred with members

of the elementary school discipline committee for about an hour before approving a 19-page report detailing new policies pertaining to:

-Privacy rights of parents and students regarding records. -Responsibilities of administra-

live and support personnel. -Building and campus regulations ncluding student conduct on the bus. —Discipline and punishment proce-

Violations against persons and

property.
—Violations against public decency

and good morals. -Violations against school admin-

strative procedure. -Student dress code

Trustees adopted a salary supplement schedule based on performance, raising the salary of teachers in four levels by \$1,000. The merit increase considers various experience and education backgrounds of the teach-

-Student grievance procedures.

Chuck Redger of Team Challenge told the trustees of ways his group could assist the school district in drug education. Redger said the drug problem among teenagers in Midland is getting more serious because of peer pressure.

The Texas Education Agency is requiring school districts to submit an annual plan describing compliance with the crime prevention and drug education program. The plan includes certification that the local education agency has adopted a policy requiring school officials to develop and implement a program.

Trustees also set a meeting for 11 a.m. Aug. 22 for the purpose of considering a tax rate increase.

President's savior asks court to restore several newspapers

SAN FRANCISCO (AP) - An ex-Marine who thwarted the attempted assassination of then-President Gerald Ford in 1975 has asked the California Supreme Court to restore everal newspapers as defendants in \$15 million invasion of privacy

Oliver Sipple, who deflected the hand of Sara Jane Moore as she fired a shot at Ford, alleged the out-of-state papers invaded his privacy by revealng he was a homosexual.

He asked Tuesday for reversal of a

Unknown person hurt in accident

BIG SPRING - An unidentified person was reportedly injured in a traffic accident 15 miles east of here early this morning along Interstate 20, according to Howard County Sher-

iff's deputies. The injured person was to be taken Malone Hogan Hospital here, said officers. However, neither the Department of Public Safety nor the hospital had further details.

ruling by San Francisco Superior Court Judge John Benson that stopped Sipple from serving summonses on the papers.

The papers claimed a special privi-

lege under the First Amendment. The state Court of Appeal on June 27 held that "no such special privilege for the press exists in California.

The court added, however, that under-usual rules, there were "insufficient contacts" for California courts to have any jurisdiction over the outof-state papers. It also said none of the papers had significant circulations in California.

In seeking a Supreme Court hearing, Sipple argued California courts can exercise jurisdiction over an outof-state newspaper that "intentionally ... harms a California citizen even though the out-of-state defendant derives a very small percentage of its revenue from California sales."

The former Marine deflected Mrs. Moore's shot outside a San Francisco hotel Sept. 22, 1975. She is now in prison in Alderson, W.Va.

After the shooting, articles were published that said Sipple was a homosexual, which he never denied.

Wichita firefighters walk off job today

WICHITA, Kan. (AP) - More than 300 of Wichita's 480 firefighters walked off the job early today, leaving the city of nearly 300,000 persons "inadequately protected," Fire Chief Floyd Hobbs said.

The firefighters' walkout followed a breakdown in contract talks between city officials and the International Association of Firefighters, and came only hours after 26 police officers were ordered suspended after calling in sick in a contract dispute.

Hobbs said only four of Wichita's 16 fire stations were manned. He said an emergency plan was in effect which would provide aid from the Sedgwick County Fire Department, the McConnell Air Force Base Fire Department and the city airport fire crew. He called the emergency provisions far short of adequate.

The talks between the city and the firefighters centered on the firefighters' rejection last Friday of the city's latest contract offer, and an apparent work slowdown since. Firefighters have been answering only emergency calls, and have refused to make building, home or hydrant inspections.

Hobbs said Tuesday that firefighters continuing the work slowdown could face suspension.

Police Chief Richard LaMunyon ordered 26 of his officers suspended late Tuesday when they called in sick for the 11 p.m. shift.

Members of the Fraternal Order of Police ended three days of voting on the city's latest contract offer Tuesday, but there was no word on the result of the

Supervisors and other officers worked overtime to fill in for the policemen who called in sick, Police Col. Bobby Stout said.

Man arrested in slaying of Harker Heights officer

TEMPLE, Texas (AP) - A man wanted in the slaying of a Harker Heights police officer was in the Bell County Jail today following his arrest at a Houston bus station.

Thomas Andrew Barefoot, named Monday in an arrest warrant charging capital murder, was apprehended as he got off a bus early today. Houston police and Texas Rangers acted after receiving a tip

by a Temple Ranger. Barefoot, 37, of New Iberia, La., was armed with a .25 caliber pistol when arrested. Harker Heights police officer Carl Levin was shot once in the head with a .25 caliber weapon after he

had stopped a man to question him about a fire early Bell County authorities issued the warrant for Barefoot, who used the alias Darren Collier, after receiving information from another area law en-

Helicpoter vital lifeline for offshore industry

The Los Angeles Times

MORGAN CITY, La. — One day a few weeks ago, a big twin-engine yellow and black helicopter took off from its base here on a mission of mercy over the Gulf of Mexico.

The whirlybird from Petroleum Helicopters Inc. (PHI), the air taxi company that serves offshore oil companies, skimmed over the sheet

No contest plea entered

HOUSTON (AP) - A \$5,000 fine has been assessed a former high official of Continental Oil Co. after he entered a plea of no contest to a charge of selling refined petroleum products at prices higher than those permitted by federal price controls.

The criminal information charge against Willard H. Burnap, 61, was filed just minutes before he appeared Tuesday before U.S. District Court Judge Finis Cowan.

The short court proceedings, however, were preceded by plea bargain-ing negotiations in which the former Continental vice chairman agreed to submit to a polygraph examination, be interviewed by the FBI, and testify before a grand jury or in a subsequent trial if called as a witness.

The eight-line charge alleges Burnap, then executive vice president for refining and marketing at Continental's Western Hemisphere headquarters in Houston, caused refined products to be sold in August 1973 to M&A Petroleum Co. at a price in excess of ceilings permitted by the Cost of Living Council.

Cowan asked for a statement of facts and James Ezer, an assistant U.S. attorney, answered by saying Burnap knew of a scheme in which Continental sold the products at the ceffing price and then took an additional payment for them.

Burnap, 61, joined Continental in 1962 but was removed as vice chairman in 1976 during an internal investigation of unauthorized political con-

In late July, Howard W. Blauvelt, said Continental was aware federal authorities were investigating certain matters associated with petroleum product regulations of the Federal Energy Administration that later became pert of the Department of Defense.

"Conoco voluntarily disclosed these matters to the federal government more than a year and a quarter ago," Blauvelt said at the company's Stamford, Conn., headquarters.

"Although it is not possible to determine the dollar amounts involved. the investigation we have conducted indicates they are under \$2 million." A spokesman said Tuesday the company was aware of the court ac-

tions involving Burnap. "Conoco is presently discussing related matters with the U.S. attorney's office and it would not therefore be appropriate to comment further at

this time," the spekesman said. The statement of plea bargaining was signed by Burnap, Ezer, and Burnap's lawyer, William E. McDan-

The document said Burnap had agreed to cooperate fully, including 'discussing his participation and the participation of others as it relates to the specific transactions between Continental Oil Co., M&A Petroleum Co., and Foremost Petroleum Co., for refined products which were negotiated and executed during his employment at Continental."

of blue-green water like a giant drag-

The pilot put his craft down carefully on a postage-stamp-sized landing pad on an oil platform to pick up a worker who had lost several fingers handling heavy pipe — then he buzzed off from the Morgan City Hospital.

But after a half hour out, the pilot heard fom the dispatcher in Morgan City. Return to the platform, he was ordered, to pick up the fingers. The fingers? The doctors, he was told, wanted to sew them back on.

Throughout the world, the helicopter has become the vital lifeline of the offshore oil industry, linking the big

It now ferries everything from fingers to rig crews to and from the oil platforms. The further out the rigs are searching for energy, the bigger and more sophisticated the helicopters that serve them.

Companies such as PHI, Evergreen, Air Logistics, Helicopters Unlimited and such firms abroad as Norwegian Helicopters, are all becoming bigger and richer because they are matching stride for stride

the boom of the oil industry.
"The offshore industry would simply not be at its present state of maturity without the helicopter," said F.E. Ellis, Conoco vice president for production in North America. "We could not operate as far offshore without it. It increases our efficiency as far as use of manpower and equip-

Ellis pointed out the examples of getting a special crew out to a rig to make an electric log test, to tell geologists the permeability of the rock substance in the bore hole, or bringing the regular crews out to the rig or back to land. In the boats that formerly were used, such a trip might take eight to 10 hours. Today, helicopters can do it in a couple hours or

Oil rig crews that work seven days on and seven off, now are able to escape the ennui of the rig, more easily and avoid long trips in the

The helicopter pilots have become the glamor boys of the offshore industry, darting from rig to rig, town to town along the coastlines across the world. The pilots often find themselves flying in some of the world's most forbidding places, ranging from frozen wastelands to tropical marshlands, over jungles, mountains and deserts to deep coastal waters, often making hazardous landings and takeoffs on the tiny rig platforms.

But among the pilots there is con-stant grumbling about what they regard as low salaries. Beginning pay is only about \$11,000 a year, less than the lowly roughneck on an offshore rig makes. A few years ago, copter pilots averaged as little as \$8,000 to \$9,000 a year. Today, average salaries run around \$16,000 to \$18,000, not much more than the roughnecks and roustabouts make on the rigs, or the experienced secretaries and receptionists make in the big oil company headquarters in Houston.

For some years now, the companies have been able to take advantage of a glut of qualified experienced helicopter pilots trained by the military services during the Vietnam war. But that large pool of pilots is drying up.

There is a shortage, not only of pilots and qualified mechanics but also of helicopters. Today copters cost from a low of \$250,000 for the widely used Bell Jet Ranger to \$3 million for the big Sikorsky work horse craft. But it often takes a year or longer to obtain delivery of a helicopter these days, and many of the companies are frustrated because business is available but not the craft to get the job

Exxon geophysicist new president of SEG

TULSA, Okla.-T. Norman Crook, manager of the Stratigraphic Exploration Division for Exxon Co., U.S.A. in Houston, has been elected president of the Society of Explora-

tion Geophysicists. The international organization has more than 11,000 members in more than 100 countries.

The announcement of Crook's election was made by current SEG president E. John Northwood following the tabulation of mail ballots. Northwood is with Chevron, U.S.A. in San Fran-

Crook will assume the presidency at the close of the organization's 48th Annual International Meeting in San Francisco Oct. 29-Nov.2. Four other geophyscists, three of them from Texas, also will take their posts on the 1978-79 SEC executive committee at that time.

Crook, who formerly lived in San Angelo, joined Exxon in 1949 after receiving a B.S. degree in Electrical Engineering from Texas A&M University. He also holds a B.S. degree in Geólogy from the University of Hous-

He has published a number of technical papers in company and industrial journals and holds six U.S. patents covering devices and techniques used in exploration geophysics.

Crook is the son of Mr. and Mrs. Otis Crook of San Angelo. He attended San Angelo public schools. A brother, E. A. Crook, is a resident

Joining Crook on the executive

committee are J. Lamar Worzel, with the University of Texas Marine Science Institute in Galveston, vice president; Kenneth L. Larner, Western Geophysical Co., Houston, first vice president; Ben F. Giles, Atlantic Richfield Co., Dallas, second vice president, and Eugene L. Current, Cities Service Co., Tulsa, secretarytreasurer.

Crook's predecessor, Northwood, will remain on the SEG executive committee as past president, and S. Norman Domenico, with Amoco Production Co. in Tulsa, will comlete his two-year post as editory of Geophysics, the society's bimonthly technical

Yates MER increased

AUSTIN—The Railroad Commission of Texas has approved the application of Marathon Oil Co. to increase the most efficient rate (MER) of production of the Yates field to 125,000 barrels daily from 100,000 barrels per

Effective date of the order is the first day of the month following initiation of inert gas injection at the approximate rate of 10 million cubic feet per day.

Marathon had sought the increase in the allowed rate of output from the prolific oil field in Pecos and Crockett counties on behalf of itself and other operators representing 90 percent of Yates production.

Chairman Mack Wallace and **Commissioners Jon Newton and** John H. Poerner signed the order approving the Marathon request. Approval had been recommended by Oil and Gas Division hearing examiners.

Marathon's application was opposed by a number of the heirs of Ira Yates on whose West Texas ranch the enormous petroleum province was discovered in 1926.

Some of the heirs urged a reduction in the Yates MER to 75,000 barrels daily, while another wanted the MER held at the present 100,000 barrels per

day.
The Yates field has produced more than 675 million barrels of oil in 52 years.

Price hike fear sinks dollar value

NEW YORK (AP) - The dollar broke through a psychological barrier to hit a record low against the West German mark Tuesday and sank against other currencies on world foreign exchange markets amid fears of an imminent rise in oil prices.

Dealers said the dollar's drop was fueled by reports, denied by efficials involved, that the Organization of Petroleum Exporting Countries would meet next month and raise prices by 5

Such a move would deal a further blow to the U.S. balance of trade, which already is showing a huge deficit. Worries about the trade deficit and inflation are to blame for the dollar's continuing decline in foreign exchange trading.

The dollar had maintained a degree of strength against the mark in recent days while dipping to all-time lows against other major currencies.

But it broke through the psychological 200-mark barrier and touched a record low of 1.9890 West German marks at noon in Frankfurt before recovering late in the day to finish at 1.9935 marks, still down from Monday's 2.0105. Frankfurt dealers described the recovery as a technical reaction and said the dollar could continue to fall.

The dollar closed at 1.9858 marks in New York, down from 2.0040 Mon-

It was the first time the dollar finished the day below 2 marks, although it had dipped to a previous low of 1.9920 marks during trading last March 1.

The price of gold, which tends to rise as the dollar falls, soared, ending the day in London at a record closing high - \$206.45 an ounce. But it failed to reach the all-time high of \$207.50 hit during London trading Aug. 1. In Zurich, gold closed at \$206,125 an ounce, up \$1.75 from Monday's close

of \$204.375. In Zurich, the dollar finished the day at 1.69395 Swiss francs. The dollar closed Monday at 1.7090 Swiss francs after dipping to a record low of

In Paris, the dollar recovered somewhat to end the day at 4.3630 French francs. But it was still down from Monday's 4.37.

Late rates for the dollar in other major European financial centers: Milan - 836.80 lire, down from Monday's 839.60; Amsterdam - 2.1595 guilders, down from 2.1805. In London, the pound closed at \$1.93255, compared to \$1.92925 late Monday.

In Tokyo, the dollar closed at 187.375 Japanese yen, down from Monday's close of 189.075. The dollar first plunged below the 200-yen barrier July 24 and then hit eight successive record closing lows, bottoming out at 184.30 yen last Wednesday.

Congress threatened with special session

By RICHARD L. LYONS The Washington Post

WASHINGTON - House Speaker Thomas P. O'Neill Tuesday held out the threat of a special post-election session if Congress goes home without

passing an energy package. It was the first time O'Neill had acknowledged the possibility that Congress can't wrap up the energy bill and other essential measures before adjourning early in October to permit members to campaign for re-

President Carter, who sent Congress an energy package 15 months ago as his top domstic legislative priority, and O'Neill, who put his prestige as new speaker on the line in his first big effort to push the bill through the House, face the possibility that major parts of it not only can't be enacted by October, but could be rejected by Congress entirely.

House-Senate conferees have agreed on three relatively non-controversial sections to try to save oil and reduce reliance on imports. But Carter's proposed tax on domestic crude oil, which he called the centerpiece of his program, is generally considered dead.

The Natural gas pricing compromise, which conferees thought they had agreed to, is so fragile it may fall apart at any moment.

O'Neill told a news conference that at the weekly White House meeting of Carter with congressional leaders there was talk of the "dire need" of an energy bill. O'Neill said concern was expressed by Senate Majority Leader Robert C. Byrd, D-W.Va., that Congress might adjourn without passing an energy package.

Asked if he considered the three

parts agreed to by conferees - coal conversion, utility rate changes to save energy and a catch-all conservation program — an adequate energy bill, O'Neill said he considered them only "a quarter of the package."

He said he has not written off chances of passing the natural gas agreement, which would remove federal price controls from newly discovered gas by 1985. "After 14 months of high hopes I'm not going to quit overnight. We'll let you know when it's dead," O'Neill said.

There's been no talk by leaders of a special session after the congressional elections, O'Neill said, but he was asked, should there be no energy package, "Would you come back for

He answered, "I would say we would."

The crude-oil tax, which the House passed but the Senate rejected, and which some former supporters have turned on as a regressive sales tax, appears beyond saving.

O'Neill and others involved are now concentrating on trying to save the natural-gas compromise, which Sen. Henry M. Jackson, D-Wash., insists will save 1 million barrels of oil a day by producing more gas.

Jackson calls the natural-gas dispute the most difficult bill he has been involved with in 38 years in Congress. Conferees haggled for six months before reaching an agreement in principle between the House-Carter position

MGF finals Canyon well

MGF Oil Corp. of Midland No. 1 Bean has been completed 1/2 mile east and north of wells in the Ozona (Canyon sand) field of Crockett Countyd, 11 miles southwest of Ozona in Crockett County. Operator reported a calculated, absolute open flow potential of 6.8 million cubic feet of gas per day, plus an unreported amount of 71.9-gravity condensate. Completion was through perfora-

tion from 6,375 to 6,938 feet after 3,000 gallons of acid and 120,000 gallons of fracture solution. Total depth is 7,100 feet and 4.5-inch

pipe isset at 7,057 feet. Wellsite is 1,292 feet from north and 1,317 feet from west lines of sectidon

Two gassers take finals

31, block M, GC&SF survey.

Exxon Corp. has announced completion of a pair of wells in the Three Bar (Yates) area of Andrews County, 18 miles southwest of Andrews.

No 87-2 J. E. Parker finaled for a calculated, absolute open flow potential of 205,000 cubic feet ofgas per day, from open hole at 2,844 feet, where 5.5-inch pipe is set, and total depth of 1,920 feet. The pay was fractured with 18,000 gallons.

Location is 975 feet from south and 950 feet from west lines of section 1. block A-54, psl survey.

Exxon No. 88-9 J. E. Parker was completed for a calculated, absolute open flow of 230,000 cubic feet of gas per day, from open hole at 2,865 feet. where 5.5-inch casing was set, and total depth of 2,866 feet. The pay was fractured with 18,000 gallons.

Location is 1,700 feet from north and east lines of section 2, block A-54, psl survey.

of continued regulation and the Senate vote to deregulate after two

Now, three months later, the agreement has been reduced to writing, and some members don't think parts of it accurately reflect their agree-

The next job is to get a majority of the conferees from each body to sign the conference report. Without that, there is no bill to send back to House and Senate for final approval.

Jackson expressed confidence that a majority of Senate conferees would sign the compromise, but he was not as optimistic that a majority of the Senate would vote for it.

Approval by the House conferees may be more difficult. They approved the compromise in May by a single vote, 13 to 12. One of the 13, Rep. Henry S. Reuss, D-Wis., now sounds as though he will refuse to sign.

He calls the written document 'more anti-consumer and pro-inflation" than the agreement in principle he voted for three months ago.

In May one of Reuss' main concerns was to give Carter something, almost anything, that he could take to the economic summit in Bonn as a symbol that the United States was coping with its energy problem.

Now the summit is over. Reuss said he hasn't finally made up his mind.

Deep gas confirmer reports potential test

Getty Oil Co. No. 1-42-21 University has been completed as a confirmation well in the one-well Little Joe (Ellenburger) field of Winkler County, 7.5 miles southwest of Wink

Operator reported a calculated, absolute open flow potential of 17 million cubic feet of gas per day, through perforations from 19,873 to 20,630 feet after 9,000 gallons of acid.

discovery, is bottomed at 20,720 feet,

with 5.5-inch casing cemented at 20,-

The well, a southwest offset to the

720 feet. Plugged back depth is 20,676

Location is 1,320 feet from north and east lines of section 42, block 21, University Lands survey. Operator had tested the Fusselman

zone through perforations from 17,624 to 17,648 feet.

The No. 1-41-21 University, the Ellenburger discovery, was complet-ed for a calculated, absolute open flow potential of 9,300,000 cubic feet of gas per day, through perforations from 19,758 to 20,157 feet.

Extender completes

Texas Oil & Gas Corp. of Midland No. 2 Witherbotham has been completed to extend Canyon D gas production in the Dove Creek multipay field two and one-quarter miles northwest in Irion County.

Operator reported a calculated, absolute open flow potential of 5,320,000 perforations from 5,695 to 5,674 feet, 6,294-6,308 feet and 6,432-6,447 feet. The pay had been acidized witn 4,250 gallons and fractured with 40,000 gal-

Collecting tied to unsettled economic times

By JOHN CUNNIFF

NEW YORK (AP) - For several years it has been popular to collect, the stock analyst observed. Stamps, coins, antiques, comic books, art objects. Why some are collecting beer cans and matchbooks,

It is easy to understand the psychology of it, he said. Off duty and speaking more freely than he might be inclined to if working from his downtown office, he proceeded to discourse:

"In unsettled economic times people like to pos-sess something tangible and durable, like gold or diamonds or art, something that is relatively rare and that has acceptibility and can hold its value.

"They've already bid the price of gold beyond \$200, although it might be just as accurate to say that it isn't so much that the price of gold has risen as it is

that the buying power of the dollar has declined.
"But it isn't unusual for art dealers to advertise a rare print for a certain price, sell it immediately, and then have other customers ask him a month later to submit a higher bid to the new owners.

"That same motivation is to some extent behind the strong housing market. What's more basic than having a roof over you? And to believe that in an economic collapse Uncle Sam will see that you keep

"So people are collecting houses. Two-thirds of all Americans live in homes they own themselves, and a lot of them have gone out and bought second homes. Why not? They're appreciating at 12 percent a year.

He was not finished by any means but, unlike most stock brokers seeking to make a point or a sale, he did not seem to be coming to a conclusion. So he was

asked: "What does all this lead up to?"
"To a question," he responded. His audience, a few old friends, leaned forward in anticipation, never having heard him ask a question of any sort, least of

all economic. "What I don't understand," he confessed, "is why people are running up the prices of all these things and they won't collect stocks. What's more basic,

more tangible, than buying a piece of a factory?
"Why the Dow Jones industrial average isn't even as high as it was way back in 1965," he said. "And we've had a lot of infation since then. If you discount for inflation, it's really only half as high.

One member of his audience interrupted. "But when you buy a share you get a piece of paper, not a smokestack," he snapped. "People want to possess objects, not something that substitutes for them." The new speaker would not be interrupted. "Don't

you understand," he continued, "people are suspicious of paper ... Paper can be manipulated, chea-pened." He paused. "You have to take paper on faith," he said. "So it's a lack of trust," the broker replied,

embarrassed that he had backed into the very thesis he was putting forward: That people invest in what they trust. "A lack of trust," he repeated.

"Not necessarily you," the broker was assured. 'And certainly not the workers and operators of the

"Who, then?" the broker asked. "What is it?"
"Lack of faith in the economic leadership of the country, of the world," replied his antagonist 'They're the ones who can cheapen paper and make

people distrustful of investing.' Relieved, and possibly informed, the broker remained silent only briefly before becoming again his aggressive, positive self.

Tax hikes growing issue in many states

By The Associated Press

runner.

Only Missouri voters faced a proposition directly affecting their pocketbooks, but candidates have made the question of rising taxes an issue in at least two other states holding primaries today. Despite a proposal to raise gasoline taxes by 3

cents a gallon — to 10 cents — Secretary of State James Kirkpatrick predicted the lightest Missouri voter turnout in eight years. Light turnouts also were forecast for Idaho, Georgia and Michigan. Supporters of the Missouri gasoline tax boost have

campaigned on television that the increase is needed to update and repair a deteriorating state road and bridge system. Opponents counter that the plan is just a "tax grab" by the bankers and road contractors for more highway construction money.

In the only major statewide race, Warren Hearnes, governor from 1965-72, sought the Democratic nomi-

of the state's 10 congressmen also had primary Idaho polls indicate C.L. "Butch" Otter, backer of a proposal to limit property taxes to 1 percent of market value, has been gaining on GOP state chairman Vernon Ravenscroft, who has been the front-

nation for state auditor against three opponents. Six

Speaker Allan Larsen and Ravenscroft in the sixman field to determine a challenger to Democratic incumbent Gov. John Evans. The Idaho property tax limit - the same as that

In a poll released Monday, Otter trailed House

approved earlier this year by California voters in Proposition 13 — will be decided in November. In Georgia, Gov. George Busbee, Lt. Gov. Zell Miller and Sen. Sam Nunn, all Democrats, were

favored to win their primary races. Eight of the state's 10 Democratic congressmen also faced little or no opposition. Busbee has faced a spirited challenge from state Sen. Roscoe Dean, who argued that the governor has

failed to keep taxes and utility bills down. Busbee's ads, seen more frequently in the past week, pointed out that there were no new state taxes during his four-year term and promised he "will not tolerate" tax increase for expanding state govern-

ment in a second term. Also challenging Busbee is self-proclaimed white supremacist J.B. Stoner. Wealthy businessman Smith Foster was given a fair chance to force a runoff with Rep. Larry McDonald in the 7th District of northwest Georgia.

Nine candidates scrambled for the seat vacated by retiring Rep. John Flynt in west Georgia's 6th The four Democratic gubernatorial aspirants in Michigan have criticized Republican Gov. William Milliken on grounds that his administration reacted poorly to contamination of cattle by the fire retardant PBB four years ago. They also claim industries

have moved out of the state. U.S. Sen. Robert Griffin, a Republican, was challenged from within his own party by prosecutor L. Brooks Patterson.

Carl Levin, a former Detroit city councilman, was regarded as the leader among the six Democratic candidates for the U.S. Senate nomination.

Rep. Charles Diggs was expected to win against three Democratic opponents in the 13th Congressional District in Detroit despite Diggs' indictment on fraud charges. Diggs allegedly took kickbacks from his staffers after inflating their salaries.

> Wednesday bridge: Don't overdo things .. 36 pt.

By ALFRED SHEINWOLD

South dealer

It's all right to have your heart in the right place, but don't overdo it. You may suffer West's fate in today's

NORTH

North-South vulnerable

109653 V7653 ♥KQ9842 ○ None ♣ K 98

♥ None Q 1098764 West

All Pass Opening lead — ♥ K

South took the ace of hearts, discarding a club, and returned dummy's jack of hearts, discarding another club. West won with the queen of hearts and returned a heart for lack of

anything better to do. Declarer discarded the queen of clubs on dummy's ten of hearts, cash- ****** ed the ace of clubs and led a trump to the jack in order to ruff a club. CASHES LAST CLUB

When both opponents followed, suit, South was home. He led a trump to dummy's king to ruff another club and then returned to dummy with the ace of diamonds to cash the last club. This enables him to discard the queen of spades.

West's trouble was that he had both the king and queen of hearts. Put the king or queen in the "wrong" place (in the East hand), and South would be unable to develop a second heart trick. Declarer would start with only seven diamonds and the three side aces and would wind up losing two

According to the old proverb, a strong heart carries your feet; but if it's too strong it may ruin your hand.

DAILY QUESTION Partner opens with one heart, and the next player passes. You hold: S-109653; H-7653; D-53; C-J10. What do

ANSWER: Pass. You would love to bid in the hope of discouraging the enemy, but the risk of deceiving your partner is too great. If partner opened with one spade, you might chance a raise to two spades.

'Gentle Giant' Martin picks up where he left off

Harvey Martin picked right up from where he finished last year in the Super Bowl, this time against San Francisco in Texas Stadium Saturday night.

The 6-foot-5, 250-pound veteran had three quarterback sacks during the 41-24 victory by the Dallas Cowboys over the 49ers. Martin, a six-year veteran from East Texas State University and Pro Bowl selection last year, is looking towards an even greater season in 1978 and there's no reason why he can't have another banner year, barring any unforseen injuries.

Bill Kilmer, Wasington quarterback paid Martin the highest compliment last season when the Cowboys were marching to the Super Bowl championship: "Let me tell you something, Harvey Martin is the premier defensive end in the league. Nobody's close...Hardeman, Youngblood, Eller...he's played better than any of them. I notice him more than anyone on the Cowboys because he is such a

stickout. He makes the big plays and gets the rest of the team

Martin, who some call the gentle giant, loves playing for his favorite team --- the Dallas Cowboys. The gentle is for the Harvey Martin who visits children in hospitals on a routine basis. He's also the big guy who does a daily radio show on a 50,000-watt Dallas station and does it so well that CBS's Phyllis George did an interview with Harvey and he, in turn, did one for his show with her. Of course, this year Phyllis is not handing sports with the CBS network

team. (What a shame!).
THE GENTLE also stands for the footballer who deplores the nickname, "Too Mean," an obvious takeoff on Ed Jones' "Too Tall" moniker. Or the guy who works for the American **Diabetes Association and United**

"We can be better than last. year, if that's possible. I know that we have to do a lot of

improving, but we will, because we are a closely-knit outfit and play together well, " said Martin following the win over San Francisco Saturday.

Martin and the entire team were thrilled with the standing ovation given to them prior to the 49er game when the Cowboys were introduced to the crowd of more than 63,000 faithful fans.

'We have the best fans in the world right here in Dallas, stated Martin who played his high school football at Dallas'

South Oak Cliff. "Ever since high school I have been a part of ing tradition. We were city ons then and in college,

it gets into your blood.
"I was lucky to be drafted by a team that wins. The Cowboys have always been my team. I watched them while I was growing up here and it's important for me to come back to Dallas to play professionally."
MARTIN WAS NAMED to the

NFC Pro Bowl in 1976 for the first time after sacking opposing quarterbacks 15 times and racking up 91 tutal tackles and assists. He's led the Cuwboys in traps every year he has been with them so his start Saturday is not surprising. He was pleased to be picked again last year, but being the team player he is, was doubly pleased for his

Last year he had 55 tackles and 30 assisted tackles to go with 23 traps, six forced traps,

two fumble recoveries and numerous batted down passing at-

The giant is for the guy whom Eagles' offensive tackle Stanley Walters referred to following a 24-14 Dallas win (a game in which Martin set a club record for traps, or sacks if you prefer, in a season as he notched numbers 21, 22 and 23) when Walters

He's quiet, doesn't say much and he's a good player. He is good because he does nothing best', just everything so well you don't know what to ex-

Martin, one of the Cowboys defensive captains last season along with linebacker D.D. Lewis, usually has something to say off the field and is popular with the sports scribes in the dressing room after a game. He delivers his comments softy, but without doubt, like: "I want to achieve more sacks than anyone else has in a single season in NFL history." He knows exactly

what he wants.
AND PLAYING LIKE it's his last game, gentle Harvey Martin becomes a giant. Just ask New York's veteran tackle Gordon Gravelle, who had to contend with an outraged Martin once last year when Harvey was flagged for unsportsmanlike conduct, a penalty he felt was unfairly levied.

It so infuriated Martin that even Gravelle's grabbing of Harvey's face mask on the next play could not keep him from dumping quarterback Jerry Golsteyn for a big loss. Gravelle was called for holding and adding insult to injury, Golsteyn had to leave the game.

Martin played a big part in a number of the 11 team records that were set last year. "Records are made to be broken and we have the potential to set many more this season, " said Martin, softly but with plenty of

authority.

Rams' Young criticizes teammates

Pokes eye Denver rematch

By The Associated Press

With the National Football League's first mandatory roster cut still a week away and coaches trying to put together a winning team, Los Angeles' Charles Young has given head man George Allen something else to contemplate.

The former All-Pro tight end criticized some of the Rams, saying that they have lost every big game they have been in.

"I can't believe some of the guys on this team," Young was quoted as saying in the Los Angeles Herald-Examiner. "There are just too many Hollywood stars around.

'What has this team ever done? It's lost every big game it's been in. It's been fortunate to be in an easy division with teams like San Francisco, Atlanta and New Orleans.

"The Rams wouldn't have won five straight division titles had they been in the same division with Washington, St. Louis and Dallas.'

Young, who was beaten out by Terry Nelson for the starting job last year, referred to three of the NFC's Eastern Division teams that he played against during his four sea-

sons with the Philadelphia Eagles. Young is beginning his second season

with the Rams. But the 6-foot-4, 238-pound Young went on to say that what the team needs is discipline, "the kind George Allen is trying to instill. The Rams will never win a big game without it.

"I know a lot of players are going to read this and get upset with me," said Young. "But I don't care. I'm just speaking the truth.'

The Cardinals also announced that Leon McLaughlin, offensive line coach with the New England, joined the team as a special consultant to Coach Bud Wilkinson.

Additional money needed for Games

LAKE PLACID, N.Y. (AP) - Planners of the 1980 Winter Olympics estimate an additional \$18 to \$20 million will be needed for construction at the Lake Placid Games site.

The request for more funding came Tuesday in a joint statement from the executive committee of the Lake Placid Olympic Organizing Committee and the Economic Development Agency of the U.S. Department of

The cost of the Olympics were originally estimated at \$70 million in state

and federal money.

According to the statement, the additional funds are needed to ensure the full use of the sports facilities after the games for training and recreational use.

Attorney William H. Kissel said, There may be provisions under existing legislation that will allow EDA to increase funding. We are also exploring the possibility of additional

In a telephone interview later, Arch Parsons, director of public affairs for the EDA, said no money was available from EDA and that legislation would have to be introduced by U.S. Sens. Jacob Javits, R-N.Y. and Daniel Patrick Moynihan, D-N.Y., and U.S. Rep. Robert C. McEwen, R-

"We have begun to work with Moynihan and Javits and Congressman McEwen to see if these estimates are solid and if this will be a sufficient amount to complete the facilities,"

Parsons said. U.S. Rep. Fred Reoney, D-Pa., chairman of the House Subcommittee on Transportation and Commerce, said he thought inflation was responsible for the need for more funds. Asked whether he would support a request, he said "I don't know. I'd have to scrutinize it."

Parsons explained that \$49 million had been authorized by Congress in the Winter Olympics Act. But in order to avoid delay, EDA recommended and Congress approved the re-programming of \$30 million in EDA funds towards the Olympic. The extra \$19 million was given to the Justice Department to build the athletes village, which will become a federal prison for youthful offenders after the Olympics are over.

In the statement, Ramon Lopez, the project general manager for the Gilbane Building Company, said the overall needs include \$6 million for temporary and miscellaneous construction; \$3.2 million for construction at the athletes village; \$1.5 million for project management including insurance for workers, buildings, and sites; \$1.7 for rehabilitation of the Olympic Arena, and \$1 million for projected contingencies.

Lopez said, "This is all caused by an increase in the original anticipated scope of the projects. For example, we were originally going to do minimal work in the Arena, but that has been expanded to a complete upgrade. At the fieldhouse, we have to pay for things like decorative banners. The hockey schedule originally included eight teams, and it was expanded to 12, which would account for the need for more space at the athletes village. These are all items which could not have been accurately projected when we made our original request for funds."

Catfish Hunter named player of the week

NEW YORK (AP) - Pitcher Catfish Hunter of the New York Yankees has been named the American League's Player of the Week for the period of July 31 to August 6, AL President Lee MacPahil announced Tuesday.

Hunter, the five-time 20-game winner who has been plagued by arm and shoulder problems, pitched 17 innings last week without allowing a run, including his first complete game shutout since July 21, 1977. The two victories raised his season's record to 5-4 and he lowered his earned run average from 6.51 to 4.47.

Hunter beat out Boston pitcher Dennis Eckersley for the weekly award. Eckersley pitched two complete game victories last week, striking out 16 batters as he beat Chicago and Milwaukee.

Others who were in the running were Minnesota shortstop Roy Smalley, Seattle outfielder Leon Roberts and Detroit outfielder Steve Kemp.

'The Bird' grounded for season

DETROIT (AP) - Mark "The Bird" Fidrych may never pitch again, but the Detroit Tigers still say they are optimistic he will recover from shoulder ailments that have plagued him for the past two seasons.

On Tuesday, the Tigers announced what had been feared for months -Fidrych is sidelined for the remainder of the season.

The Bird has never regained the form that made him a 19-game winner and gave him American League Rookie of the Year honors in 1976.

His antics - which include crawling around the pitcher' mound to pat down the dirt - made him the darling of baseball fans and one of the biggest drawing cards the Tigers have ever

"As diagnosed, he still has tendinitis and it is unwise for him to pitch at this time," said Dr. Edwin Guise, an orthopedic specialist who examined Fidrych at Henry Ford Hospital Mon-

Tigers General Manager Jim Campbell said he is optimistic about

"I'm not a prophet of doom," said Campbell. "I look to the positive side in everything. And I feel Mark is going to come back ... He has made real good improvement. But he's not 100 percent. He might be 90 percent,

or 80 percent, I don't know. But I do know as long as he's not 100 percent we won't let him pitch here.'

The Tigers had sent the 23-year-old ace pitcher to doctors in Detroit, New York and California in hopes of straightening out the painful tendinitis in his right shoulder that flared April 17 after he had appeared in only three games with a 2-0 record.

Campbell said Fidrych would be placed on the 60-day emergency disabled list, which will extend beyond the regular baseball season. He also said Fidrych will not play winter ball, a decision that puts off his return to the mound until spring training next February - at the earliest.

Plans for a comeback by the vaunted Bird went awry over the weekend when Fidrych threw only eight pitches for the Tigers' farm club on Lakeland, Fla., and complained of

stiffness again. Fidrych was sent there July 21 to try to work his arm back into condi-

The Tigers had been hopeful Fidrych would be ready to pitch tonight against the Texas Rangers. It would have been his first game with the Tigers since the tendinitis kicked up) in the spring. Tiger fans had bought up more than 30,000 tickets for the game against Texas.

Guise said improvement was noted, "especially since the manipulative procedures he received in New York June 28," a reference to Fidrych's treatment by the New York Yankee team physician. "Chances are good that with pro-longed rest and rehabilitation, Mark will be able to pitch next spring,"

Kicking game shortcomings apparent in Dallas opener

THOUSAND OAKS, Calif. (AP) -Remember Efren Herrera? He's that field goal specialist Gil Brandt and other Dallas Cowboy brass praised so highly a couple of weeks back while

discussing new contracts. But two weeks is apparently a long time in the National Football League. Moods change — especially when the season debut against San Francisco Saturday exposed the shortcomings

of the Cowboy kicking game. When Herrera failed to report to training camp here 18 days ago, Brandt's tone was almost grandfatherly - a bit chastizing, but still lovable. A happy reunion was not out of

Monday, Brandt described the trading market for Herrera's talents as "not very lucrative. "Maybe that's not the right way to

put it," the Cowboy vice president added. "Tid say he's not a hot commodity. That may be a better way of

Brandt knows what Herrera will bring on the trading black, but Coach Tom Landry is the trigger man in the organization. And Brandt says

Landry has not given Herrera his marching orders—yet.

"My view on the Herrera situation is that I don't think he'll be back," said Brandt. "I think he'll be back," said Brandt. "I think it's a shame, too. He's been good for the Cowboys and the Cowboys have been good for "I think the thing has gone too

Herrera seems similarly con-vinced, assessing his chances of set-tling favorably with the team at somewhere below 30 percent.
