## 'Right-wing' oppression not a laughing matter

There seems to be a bit of the facetious even in the most earnest of

And there's some genuine sincerity in the most jocular of appeals. Take the leftists. They're not necessarily opposed to the rightists, but they want their rights, too.

They want their just fare - their "Bill of Lefts." Here, the oppressed are those lefthanded folks who consciously or sub-

consciously feel that the world is slanted against them. Once you think about it, it's quite obvious. Right-handed people, who

are so far into the majority that it's not funny, have the buying power. They want conveniences, and industry serves them best. Look at your shirt; it's designed for the rightists to button. If it's a blouse,

then the buttons are, for some strange reason, on the other side. Where the market demands it, there are shops which cater to left-

handed people. But have you ever heard of a lefty complaining that a typewriter's key-board favors the high-handed?

It seems that it would be worth your while, if trivia is your pastime game, to observe exactly what things better suit the rightists and, with or without intent, discriminate against the left-

And there is this slam against the leftists: a lesser meaning of the adjective "left-handed." Take a lefthanded compliment; it's not becoming at all. It's tainted with awkward and insincere connotations. That doesn't seem fair. But maybe

#### WEATHER

those unflattering meanings arise from the right-handed trying to be ambidextrous and failing miserably. Or maybe it's due to the inclination

in human nature to abuse the cloutless minority. Indeed, are the left-handed "the

world's most oppressed" people, as some proponents on the left contend? Probably not.

Many likely can recall the anxiety of a parent who suddenly realized that his child might be a lefty and hence stigmatized? The tendency was, somehow, to get the toddler to favor

At one time, parents fought a child's inclination to be left-handed. Maybe "they" - at least some - still

At any rate, being left-handed is just as right as it can be.

#### Around Town

Sunday signals the debut of a new local column for Reporter-Telegram readers, one designed to keep up with the comings, goings and the doings of Mid-

land's active people.

As a people column, that's exactly what "Around Town" will be about.

And it will be broad enough to include news of men and women, as well as the younger set and college students, their honors and activities, houseguests and visitors to the Tall City, trips — virtually anything Midlanders are doing or plan to do, but which normally would be expanded into a news

"Around Town" will appear daily on the first page of the Lifestyle Section and items now are being solicited by that de-

Midland residents with brief news to submit will find it easy to do. Just dial 682-5311, the newspaper's regular number, anytime between 8 a.m. and 5 p.m. Monday through Friday and ask for Lifestyle. Or mail or bring your items to the Lifestyle Department.

## New Mexicans beat Atlantic

LONDON (AP) - Three New Mexican adventurers floated across the English Channel and into French airspace today, heading for an evening landing near Paris after completing the first crossing of the Atlantic by

British air traffic controllers said the balloon was 16,000 feet high and situated east of the French channel city of Cherbourg at 8 a.m. EDT, headed straight for Paris at 38 mph. The latest estimates would put them over Paris between 7 and 8 p.m. Paris time (1 and 2 p.m. EDT.)

"So far they are on course for Paris and at the moment there is no reason why they should not make it," said Brian Smith, a spokesman for Britain's Civil Aviation Authority.

In a radio conversation with his wife, one of the balloonists, Larry Newman, 31, said they would push on until they "run out of gas." Newman, Ben Abruzzo, 48, and

Maxie Anderson, 44, all from Albuquerque, were expected to bring their balloon, the Double Eagle II, down in the Paris area - possibly at Le Bourget Airport where Charles Lindbergh landed the Spirit of St. Louis on May 21, 1927, after the first solo airplane flight across the Atlantic.

The three balloonists have set new time and distance records for balloon American Balloonists Make It! ICELAND GREENLAND UNITED STATES Atlantic Ocean

Transoceanic route of the first balloon-borne conquerors of the Atlantic.

"We hope they keep going as long as they can," said the ground flight director, W.C. "Doc" Wiley. "We want them to establish a record no one can break. It's a great achievement to cross the Atlantic, but they are in such good shape that I think they can go on for a long while yet."

The Double Eagle II completed the Atlantic crossing at 10 p.m. Wednesday (5 p.m. EDT), Shannon Airport reported, reaching the southwest coast of Ireland 121 hours and 18 minutes after the 112-foot-high, helium-filled bag took off last Friday night from Presque Isle, Maine, near the Canadian border.

It was the 18th attempt to cross the Atlantic by balloon, and the 16th from west to east. The last previous attempt, and the closest to being successful, was made two weeks ago by Britons Donald Cameron and Christopher Davies, who ditched 117 miles from the French coast. Seven persons died in previous at-

By 9 a.m. (3:56 a.m. EDT) today, the Double Eagle had floated across southern Ireland, the St. George's Channel and Wales and was being carried along by a 22-knot wind. One coast guard report put the bal-

#### Ray lays discrepancies to memory

By MARGARET GENTRY

WASHINGTON (AP) - James Earl Ray, struggling to convince the House Assassinations Committee he didn't kill Dr. Martin Luther King Jr., blames his poor memory and human foibles for discrepancies in his various stories

Committee members promised lengthy questioning today as Ray returned to the witness stand for a second day of testimony about the events which took him to Memphis, Tenn., on April 4, 1968, when the civil rights leader was shot to death on a motel balcony.

Ray is serving a 99-year prison sentence after pleading guilty to the

But for nearly 10 years, Ray has claimed innocence and offered a variety of accounts involving a mystery

man named Raoul who Ray says enlisted him in a smuggling operation and then framed him for the assassi-

The discrepancies between Ray's sworn statement Wednesday and his earlier stories clearly troubled committee members. Its chairman, Rep. Louis Stokes, D-Ohio, promised a "quite extensive" cross-examination in an effort to separate truth from

"Sometimes," Ray said of differences in his stories about Raoul's discription, "in these interviews for four or five hours, I have trouble concentrating.

Stokes asked whether Ray told the truth in a 1977 television interview. "Well, it could be," Ray replied. "I think it was essentially true. I don't

recall. I wasn't under oath." Was he telling the truth in a Playboy magazine interview? "Well, it was intended to be the truth." Was he telling the truth in some 40 hours of interviews with committee staff members? "I wasn't under oath. I know I made several inadvertent

And finally, St testimony here today is the truth?" Ray firmly said yes.

The story, as Ray told it to the committee, began in April 1967, when he escaped a Missouri prison and fled to St. Louis, Chicago and finally Montreal, where he became acquainted with Raoul in a dockside bar.

They struck a deal: Ray would help Raoul with a smuggling venture in exchange for cash and a false Canadi-

In August 1967, he and Raoul met in Windsor, Ontario, and transported contraband into Detroit in Ray's car. He said Raoul paid him \$1,500 but claimed he was unable to provide the

They parted then but kept in touch and worked together on a Mexican smuggling operation in October 1967 and met in New Orleans in December

Ray said Raoul gave him cash on four occasions in all for a total of \$7,000, including \$2,000 to buy the white automobile in which he fled Memphis moments after the assassi-

On Raoul's instructions, Ray said, he came to Bessie Brewer's rooming house across the street from King's motel on April 3, 1968.

The next day, he said, he met with

## Ford debunks Kennedy killing conspiracy line

By BOB WIELAND

DALLAS (AP) - The Warren Commission's conclusions on the assassination of President John F. Kennedy here in 1963 were defended Wednesday night by one of the commission members - former President Gerald

"I still fully support the Warren Commission's conclusions. The basic conclusions were that Lee Harvey Oswald committed the assassination," Ford told reporters at a recep-

Fifteen years after the historymaking gunshots rang out in Dealey Plaza, a House committee is trying to confirm a report on an often-repeated theory: that there was a conspiracy to kill Kennedy and that there was more than one gunman.

"I strongly believe in the single-gun theory," Ford said. "I wery strongly disapprove of any variation from

Early Sunday morning, Dallas police are to seal off the area in front of the Texas School Book Depository Building, so that the House Assassinations Committee can record gunshots from Italian Army rifles similar to those allegedly used by Oswald. The sounds are to be compared with those taped at police headquarters when a motorcycle officer inadvertently left his radio microphone open as the bullets ripped into the motorcade.

The committee is said to have received a study of the tape by a Massachusetts acoustics company. The report is said to raise the possibility that there were more shots than Oswald could have fired. Ford disagreed.

'The Commission had found no evidence of a conspiracy, foreign or domestic. Those conclusions are still valid, in my opinion, and I have seen no evidence developed by the House committee that would undercut the validity or credibility of those decisions," the ex-president said.

When asked whether he had been aware that a tape recording had been made during the shooting, Ford admitted, "that's a detail in all honesty I do not recall."

However, he added, "I can assure you that every bit of evidence the Commission had was either fully examined by the seven members of the Commission, of which I was one, or by our top staff people.

"We ended up with 26 volumes of evidence and testimony and whathave-you, so I think we went into it fairly carefully," Ford said.

Ford was also asked about politics, but denied he is thinking about another presidential campaign. Ford said he had not made a decision on

whether to be a candidate, although he said it would be a good race. The polls say we would have a

good contest if we ran again." Ford also sounded like a party spokesman as he tore into the present White House occupant.

"I think the Carter administration is very vulnerable, both at home and abroad," the former chief executive

"Anyplace you look and particularly on the inflation front, the Carter administration has been a disaster." "Internationally, a lot of our allies

have lost faith in the strength and the capability of the United States and a lot of our adversaries are taking advantage of us, like the Soviet Union in Africa with their Cuban proxy." Ford said

Ford later addressed a closed meeting sponsored by a building materials corporation.

Earlier in the day, he campaigned in San Angelo for the Republican candidate for 21st District U.S. Representative, Tom Loeffler. Ford spoke at a fund-raiser that was also closed to the media.

#### To err is human

## Surgeon's career on block in Federal court

U.S. District Judge John Wood is faced with making a decision which could put a surgeon's career in limbo or compel the administration of Odes-sa's Medical Center Hospital to rein-

state the doctor against its wishes. That's the upshot of a lengthy and complex court hearing which was to resume at 8:30 a.m. today in Midland's Federal District Court. Dr. Inayat I. Lalani is seeking a

temporary injunction to restore his privileges to perform surgery at the Odessa hospital. Lalani told Wood during the open-ing session of the hearing Wednesday that failure to be reinstated would severely damages his chances of practicing elsewhere in the country.

A lawyer for Medical Center Hospi-

tal argued that allowing the doctor to return could jeopardize the health and well-being of future patients.

During more than two hours of testimony, Lalani, the only witness to testify Wednesday, said his suspension stemmed from personality problems that had developed with influen-tial doctors at the hospital since 1976, when doctors in the hospital's surgical section failed in an attempt to

have him removed. He claimed he was suspended with-out warning May 18, just three days after he contended he was led to

believe he had been reappointed.
"I received a letter dated May 29th, the first time charges had been stated, 12 days after my suspension," he testified Wednesday.

Lalani is charged with lack of sound surgical judgment and lack of surgical assistance. The allegations were made by several surgeons at the hospital who initiated a suspension attempt two years ago, he said.

Under cross examination from W.O. Shafer, representing the hospital, Lalani admitted to having to remove the spleen from several pa-tients because of damage incurred during surgery. However, the doctor attributed the spleen damage to his

"When I did not have an assistant, I did not have to remove a spleen," he

In response to questions by Shafer about the validity/of hospital charts reflecting "mistakes" by Lalani, the

doctor disputed that they were mis-takes, and contended the doctors who supported his suspension have com-mitted the same actions.

He said surgical work confronts major life-threatening illnesses. Problems faced by the surgeon are "the nature of" his job, he added.

He claimed another doctor refused

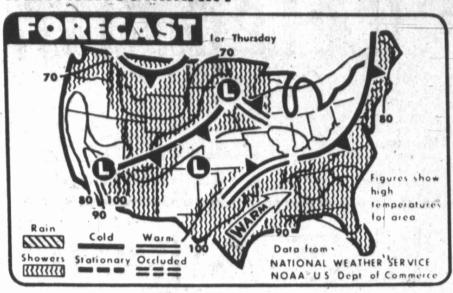

to see his patients in regard to spe-cialist problems on several occa-

Shafer, noting that the surgical de-partment had supported Lalani's sus-pension by a 10-6 vote in 1976, asked whether "everybody who voted against you is prejudiced." "To answer that question I would

South Texas: Clear to partly cloudy and hot through Friday. Highs 90 to 105. Lows 72 to 82.

Part O'Commer to Brownsville: South to southeast winds 15 to 20 knots. Winds decreasing to 10 to 15 knots tonight. Seas 4 to 7 feet today. Few showers and thundershowers.

#### Extended forecasts

Saturday through Monday

West Texas: Chance of rainshowers and thunder-storms on Saturday, Cooler in the north. Partly cloudy to clear Sunday and Monday with gradual warming in the north and continued but in the south. Highs in the 80s and 80s except near 185 in the Big Bend valleys. Lows will be 60s in the mountains and north to 70s in the south.

North Texas: Partly cloudy with slight chance of thunderstorms Saturday. Fair and a little cooler through Monday. Highs in the 90s. Lows temperatures lower 70s to the lower 80s.

South Texas: Chance of showers and thunderestorms all but the Rio Grande Valley Saturday. Chance of thunderstorms continuing along the coast Sunday. Showers ending elsewhere. Generally fair all sections Monday. No important temperature trend as oversight lows will continue in the 70s with daytime high in the 30s except for readings near 100 in the upper Rio Grande Valley.

## Senate has chance to outdo House in paring of budget

By EDMOND Le BRETON

WASHINGTON (AP) - The Senate now has a chance to outdo the House in paring down the expected government deficit for next year, estimated by the House at \$39.8 billion in a budget that calls for spending \$489.8

The House adopted the budget resolution Wednesday, 217-178, voting

## Ray blames poor memory

(Continued from Page 1A)

Raoul at the rooming house and a bar in the same building and spent the afternoon running errands for him.

At the time of the shooting, he said, he was at a service station trying to get a tire repaired but was told he would have to wait because of heavy rush hour business.

He chose instead to return to the rooming house but found the street blocked by a police car and saw people running, he said. As he drove south into Mississippi, he heard radio news bulletins that King had been shot and that police suspected a white

male driving a white car.

Realizing he was the object of the search, Ray said he kept on driving and escaped finally to London, where he was arrested June 8, 1968.

Nine months later, he pleaded guilty to the murder but he told the committee he did so only because of coercion from his lawyer at the time, Percy Foreman. He claimed Foreman hoped for great literary profits if Ray never told his story in a public fital.

revenue estimate of \$450 billion to a House-passed \$16.3 billion tax reduction in 1979. The Senate is to begin work early in

some spending cuts and tailoring the

September on a recommendation from its budget committee for a \$489.5 billion budget. That proposed fiscal plan, however, calls for a bigger deficit — \$43.7 billion — mainly because of expectations that the Senate will enlarge the House-approved tax cut.

Handlers of the House resolution said it would make possible the smallest deficit in five years, \$20 billion below the deficit President Carter estimated in January.

The two chambers are required by law to agree by Sept. 15 on the fiscal plan for the year beginning Oct. 1, making it binding.

Before adopting its budget resolution, the House rejected - twice by hairbreadth margins - amendments that would have made deep cuts in the spending totals.

It defeated a proposal by the Republican leadership that would have reduced the spending figure by \$10.5 billion and made room for a \$28 billion tax cut. The vote was 206-201. A variation, with the same spending

figure, lost 204-198. The House voted \$673 million in reductions for two programs pushed by President Carter but encountering

trouble in the House Supplemental fiscal assistance to municipalities was reduced \$338 million and funds for the Comprehensive Education and Training Act, intended to help the disadvantaged unemployed find jobs, were cut \$335 mil-

The House has not completed consideration of either program, but indications are that all the money sought by the administration will not be provided.

## Days hotter than 100 in forecast

The weatherman is predicting 100 degree temperatures both today and Friday in the area.

The National Weather Service at Midland Regional Airport recorded a high of 98 degrees Wednesday and was forecasting temperatures even higher for today and Friday.

The record high for August 17 is 104 degrees set in 1946. The evening temperatures over-

night warmed up a, little, hitting a low of only 74 degrees. The record low for today is 60 degrees set in 1972.

## Hearing to resume

(Continued from Page 1A)

have to answer another question: Was every German a Nazi?" replied the India-born doctor.

Lalani said the doctors who voted against him were simply "following the big boys."

Shafer asked about the probationary status of Lalani's 1976 reappointment which include the requirement of a person to supervise him during major surgery.

The doctor said he regarded the outcome of 1976 as a "promotion" and "vindication," adding that the hospital's probationary provisions were attached in order to "save face."

Judge Wood planned to study the volumninous cases files Wednesday night. The judge said his role in the case will be to determine: 1) what constitutional process is due Lalani, 2) whether Lalani was denied due process of law, 3) whether he has sustained property damages and 4) whether state action is required.

Lalani said his monthly income has dwindled from about \$12,000 to \$3,000 since his suspension and that his reputation has been damaged, as well as his medical career.

The 39-year-old doctor has been practicing in Odessa since 1974. Still pending is a motion by the hospital legal counsel to quash a subpoena to produce documents and tape recordings of hospital staff meetings relating to the suspension of La-

The hospital regards the records as confidential material which should not be made available for court sub-

Meanwhile, Attorney Dan Sullivan, closed meetings held to discuss Lalani's suspension may constitute violations of the state open meetings

#### Man, 28, jailed in lieu of bond

William Franklin Wise, 28, of Rt. 3, Box 373, was in Midland City Jail Wednesday night in lieu of \$5,000 bond after being charged with burglary Wednesday afternoon, according to authorities.

Wise was arrested in Big Spring Tuesday by Sgt, Bob Miller of the Midland Police Department and Texas Ranger Charlie Hodges, according to reports.

Authorities said the arrest followed more than 200 hours of investigation by Hodges and Miller, who have been searching for suspects in a \$16,300 oil field equipment burglary reported Aug. 4 at E.R. West Engineering Co. in the 3300 block of Stokes Avenue.

Miller said Dubby Joe White, 24, and Robert Simms, 42, both of Midland, were arrested last week in connection with the same case and charged with burglary. He said both men are free on a bond of \$5,000 each, set by Peace Justice Robert Pine last

Miller said some of the equipment has been recovered.

#### Carter rejects Iran's request

WASHINGTON (AP) - President Carter is rejecting Iran's request to buy the most advanced U.S. electronic warfare equipment, but the proposal could be revived later.

A senior administration official, who declined to be identified, said Wednesday the rejection is "not necessarily forever.

The request for equipment designed to destroy an enemy's radar and his anti-aircraft batteries left senior administration advisers divided. The Defense Department favored the sale and the State Department and arms control agency opposed it.

Iran, the nation's biggest arms customer, wanted 31 F-4G advanced "Wild Weasel" fighter bombers with gear that can detect and locate radar stations and fire a range of weapons to destroy them.

The first optional models have been in use in this country for just a few years and none have been sold to

other nations. The arms control specialists and the State Department said a sale to Iran would have introduced a new weapons system into the Middle East. These officials added the weapons were more offensive than defensive.

The Air Force, however, said an alternate weapons system offered'by the administration to Iran is not as

things. Rodney, with the cat in tow, was catching a

## Paris landing expected of record balloonists

(Continued from Page 1A)

loon at 20,000 feet at dawn, another at 10,000, but the heat of the sun on the helium was expected to lift it to 20,000 if it wasn't already there.

We expect them to cross the Bristol Channel, England and the English Channel about lunchtime Thursday, then the French coast in the Le Havre area and land somewhere in the Paris region at around 8:30 p.m. (3:30 p.m. EDT)," press spokesman Jim Mitchell said Wednesday night.

"I've got red eyes through crying tears of joy," said Abruzzo's wife, Pat, waiting at the London Hilton.

She and the wives of the other two balloonists left the hotel just after dawn for Luton Airport north of Lon-

"A businessman is lending us his private jet so we can buzz the balloon0" said Mrs. Abruzzo. "We will wave and blow kisses as we fly around them.'

She said they would return to London, wait for news of a landing, and then go to join their husbands.

#### Was their error spent?

(Continued from Page 1A)

the wrong account number for a \$927,000 deposit by an unnamed real estate company, police spokesman Willy Wilson said. The error was not detected until the company recently asked the bank what happened to its de-

"He began withdrawing the money about the middle of June and it was all gone by the end of July," Wilson said of the elder Ristol. "The bank had no way of knowing what was going on because it balanced out on the computer.'

Ristol's son said, "He never mentioned anything about money."

Police said Ristol's account showed \$1,100 at the beginning

Police declined to say whether any other people were being sought in the case.

"We're all going to get together and have one hell of a celebration," she said. "Then we'll all be as high as

On Wednesday morning, the three men broke the record for time aloft of 107 hours 37 minutes set by Ed Yost of Sioux Falls, S.D., in an unsuccessful trans-Atlantic attempt in 1976. By this morning, they had traveled more than 3,000 miles, eclipsing Yost's distance record of 2,740 miles.

Yost manufactured the Double Eagle II.

Shannon air controller Gerald O'Connor said the three men thought they were still half an hour from land when told they had reached Ireland. He said there were "quite a few shouts of jubilation" when they spotted the lights of Louisburgh through a break in the clouds.

It was the second trans-Atlantic balloon attempt for Abruzzo and Anderson, who stayed aloft last year in Double Eagle I for 64 hours and crashed five miles northwest of Iceland when winds pulled them off

Abruzzo married with four children, deals in real estate and is a veteran pilot and balloonist. Anderson, who is also married and has four children, heads a uranium and copper mining company. Newman, who was married five months ago, is a hangglider manufacturer and former air-

## Police report no arrests in Tuesday's shootings

No arrests have been made in connection with the shooting of two Midland men Tuesday night, said a spokesman for the Midland Police Department today.

Lt. Earl Luckey of the Detective Division said today "the case will probably be presented to the next Midland County Grand Jury because of circumstances.

Lt. Luckey did not reveal the circumstances he referred to, saying that this information should go before the grand jury.

Virgil Ray Henry, 24, whose address is listed variously as in the 2400 block of College Avenue and in the 2400 block of West Kentucky Avenue, was listed in serious condition in Midland Memorial Hospital today, with bullet wounds to his abdomen, said a spokesman.

Ken Turner, 40, whose address is listed as both in the 2400 block of West College Avenue and the 200 block of Holloway Avenue, was listed as being in improved condition today at the Veterans Administration Hospital in Big Spring, said a spokesman. Turner was treated for a gunshot wound to his abdomen, the spokesman indicat-

Police said they were told the two men were standing on a porch in the 2400 block of West College Avenue when someone arrived to talk to the men, reportedly about an earlier incident.

Authorities said witnesses subsequently heard "rifle shots." Police responded to a report of a disturbance call at 9:20 p.m. Tuesday at the College Avenue address.

Police said they found Henry lying in the front yard with gunshet wounds. Several witnesses were interviewed, according to reports.

Officials said Turner walked into Midland Memorial Hospital about 2:30 a.m. Wednesday and later was transferred to the Veterans Administration Hospital in Big Spring.

## Former insurance commissioner testifies for panel

By LEE JONES

AUSTIN, Texas (AP) - Don Odum stepped out of a pressure cooker job as state insurance commissioner and quickly found himself in the middle of a scandal as an insurance company

Odum, Jnow a Dallas insurance consultant, told the House General Investigating Committee on Wednesday there should be criminal penalties for financiers who milk insurance com-

He quit after nine months as chief operating officer of Great Commonwealth Insurance Co. in March 1976 because, he said, he didn't want to be linked with unspecified things that were going on.

Odum said the company was solvent and his integrity was intact when

Great Commonwealth was owned by American Commonwealth Financial Corp., which was controlled by

Louisiana promoter Roger LeBlanc. Joseph Hawkins, who succeeded Odum as commissioner, put Great Commonwealth under state supervision in October 1975 after it was learned the company had lent \$3 million for a land venture in Louisiana.

"It turned out LeBlanc was part owner of the land that was sold," Odum testified

Odum said Great Commonwealth's treasurer told him he transferred the \$3 million to Centram Corp. because "Mr. LeBlanc had told him to."

Hawkins paid a fine and accepted a probated jail term last year for accepting a ride in a Great Commonwealth airplane while the firm was under supervision.

David Spencer, investigating committee counsel, said Hawkins ordered a delay of the routine examination of Great Commonwealth in 1976 that worked out to the firm's advantage.

Committee chairman DeWitt Hale, D-Corpus Christi, said he would like to have Hawkins' testimony but told reporters no decision had been made

Irving testified Wednesday there had been discussions of Gulf Atlantic underwriting the trust but nothing ever was decided.

He said Hurlbut and Hovater, who had been Gulf Atlantic agents, proposed the trust.

"Is it a fair conclusion. that Hurlbut and Hovater were simply mistakunderwrite what they were propos-ing in South Texas?" Hale asked.

"Yes, sir...no formal rates were issued or contract signed that we would accept group insurance from that group in South Texas (the Houston area) or anywhere else," Watson

He also testified under oath that he knew of no attempts by Gulf Atlantic to secure favored treatment from the insurance department, or of any offers by department employees to give such treatment.

Hurlbut said in his closing statement that he and Hovater always have been available for questioning and had offered to take lie detector tests, while former Gulf Atlantic officers always had to be subpoenaed when their testimony was desired.

"Everyone we can reach by subpoena, we intend to interrogate. It seems to me...there was a big misunderstanding asAto what was agreed to anc what was not agreed to in the course

## German leadership

Chancellor Helmut Schmidt has handed the West German parliament an economic plan calling for a \$7 billion tax cut over the next two years. This is in line with Mr. Schmidt's promise at the Bonn summit to put the German economy on a more expansive track, helping to redress the serious trade imbalance afflicting some of Germany's trade partners, including the United States.

How the Bundestag will react is yet to be seen, but it is a safe bet that Mr. Schmidt will have an easier time getting parliamentary backing for his commitments at the sum mit than President Carter will have when he deals with Congress to follow up on his own commitments. Economics are the forte of Mr. Schmidt, who served as finance minister before he became chancellor four years

Statesmanship in a broader sense is also proving to be a forte of Mr. Schmidt. His up-front role at the Bonn summit resulted from more than his being the official host. It was influenced, surely, by the fact that the present American president is having trouble hitting his stride, and that the United States — always the pivotal power at a Western conference - is a nation presently embarrassed by a weakening of its currency and lack of an effective energy policy.

Mr. Schmidt, on the other hand. seems fully prepared to add a

are listening. For the first time in the postwar era, West German foreign policy is beginning to mean much more than the country's relations with its European neighbors and a limited role in European defense.

In June, Mr. Schmidt made the first trip to Africa by a West German chief of government, and from all accounts it was a diplomatic success. Germany's colonial interests in Africa were never as extensive as those of other major European powers, so there is less suspicion toward Germans on the part of many black African leaders. Mr. Schmidt also appears to have convinced Africans that Germany is not inclined to see their continent as an arena of Cold War com-

West Germany took part with the U.S., Britain, France and Canada in working out a plan for self-government in Namibia.

West Germany's "economic miracle" is over, the Germans admit it, and Mr. Schmidt faces no easy task in trying to achieve a higher economic growth rate while keeping inflation in check. He is giving the rest of the world the impression, however, that if anyone can manage it, he can. And he could turn out to be the leader who moves Germany closer to center stage in world affairs without arousing memories of Nazi aggression.

Scener or later those memories, and the fears they arouse, will more assertive German voice to have to yield to political and the international dialogue. Not economic realities. Perhaps that only is he speaking out, but others time is at hand

#### **ART BUCHWALD**

## 'Women's liberation' in sunny land of Tahiti

(Editor's Note: Art Buchwald is on assignment for a few weeks trying to find out if there are any Cuban troops on Cape Cod. He left behind his alltime favorite columns.)

Women's Liberation is working in Tahiti as well as, or better than, any place in the world. I discovered this when I visited the beautiful island of Bora Bora, which inspired James Michener's "Tales of the South Pacific." We stayed at the Hotel Bora Bora; where instead of hotel rooms visiting couples have their own grass-covered huts overlooking the crystal-clear, fish-happy lagoon.

One of the first things I noticed was that there were only women working in the hotel - at the desk or the bar, as chambermaids or waitresses.

One morning I made a discreet inquiry as to where all the men on Bora Bora were.

A Frenchman who lives on the island said, "They're probably still in their huts sleeping. They're very tired from celebrating the Fourteenth of July, which as you know has been going on for 10 days." "But don't they have to go to

"No, monsieur. The tradition of the

island is that only the women work." 'What do the men do?'

They manage to keep busy.'

"Sleep, sail, fish if they feel like it.

## Mafia clues in loaded ledger

By JACK ANDERSON

WASHINGTON - A mysterious underworld ledger, loaded with incriminating details about mob transactions, has fallen into our hands. We have spent a year checking out its contents.

The FBI has also investigated the ledger. Agents have tried to verify the transactions; handwriting experts have tested the scribblings. They have been unable to confirm that the ledger is an authentic gangland financial diary.

A Xeroxed 13-page copy of the account book was slipped to us by a Mafia hit man who is serving a life sentence for murder. It contains a record of more than \$17.7 million that supposedly was skimmed from Las Vegas casinos and squeezed from illicit corporate deals and labor

racketeering. The book also contains the names of the overlords of organized crime, including New Orleans' godfather Carlos Marcello, Philadelphia's Angelo Bruno and the infamous Joe Bonanno, now living in semiretirement in Tucson, Ariz. A typical \$510,000 entry, dated March 6, 1972, identifies the bosses who supposedly gave their approval: (Marcello OK)

Our associate Marc Smolonsky has criss-crossed the country in an attempt to authenticate the document. He has interviewed dozens of federal and local investigators; he has spoken to underworld contacts.

(Bruno OK) (Bonanno OK)

We have established that our Mafia source lied about the origin of the ledger. Yet the nation's organized crime experts have told us that the patterns of underworld associations outlined in the account book appear genuine. We also believe the ledger story is significant in light of the

following recent events: - Federal investigators claim they have evidence indicating that Tony Spilotro, whom they allege is the mob's overseer in Las Vegas, is the hidden owner of a huge corporation that holds title to casinos. The Argent Corporation, which owns the Fremont and Stardust hotel-casinos, is the target of the federal ostensibly is controlled by Allen Glick, named in government intelligence reports as a possible front man for organized crime. He built Argent with \$93 million in loans from the scandal-ridden Teamsters' Central States Pension Fund.

- The owners of the Aladdin Hotel, a plush Las Vegas gambling retreat, were indicted by a federal grand jury, which claimed the Detroit syndicate really runs the resort hotel.

- The mob has been receiving secret law enforcement reports from organized crime investigators on the Las Vegas police force. The confidential police documents were discovered by FBI agents when they raided the office and home of Spilotro.

But back to the mysterious ledger. It was first mentioned to the FBI by Gerard Denono, a Mafia torpedo, after his arrest on bank robbery charges in 1974. He is a charming cutthroat with a frightening record. In four years, he accumulated three murder convictions, not to mention the bank-robbery rap. Last month, he wound up with a life sentence for killing his own gangland partner,

Henry Poczynek. Denono and Poczynek, together

with a third button-man, got into trouble over a jewel robbery. Poczynek botched the job and murdered the wealthy woman who owned the jewels. Denono, on orders from his superiors in Las Vegas, eliminated Poczynek.

Last summer, while awaiting trial in the Roczynek case and facing life behind bars, the wily Denono offered the ledger in an attempt to make a deal. He reminded the FBI of his 1974 reference to the ledger. He was prepared to turn over the ledger, he said, in return for a deal on the Poczynek case. The least he wanted was easy time in a federal prison.

We also learned about the ledger last summer and contacted Denono in the county jail in West Palm Beach, Fla. He was slender and disarming. well-liked by fellow inmates and jail guards alike

In a small room reserved for legal consultations, Denono related the ledger story. He seemed happy to see us; apparently he figured our involvement might pressure the FBI into making a deal.

Denono told our associate, Marc Smolonsky, that he had stolen the book from the Las Vegas home of Edward "Marty" Buccieri in April 1973. According to Denono, Spilotro had instructed him to steal \$500,000 in casino skim money, which was stashed in Buccieri's floor safe. The cash was to be used to open a new casino at Lake Tahoe. Denono said he discovered the ledger in the safe and lifted it, not realizing its contents.

We sent Smolonsky to Las Vegas to check Denono's story. We learned that Buccieri, a Caesars Palace floorman, was known inside the mob as a bagman. In April 1973, his home was burglarized exactly as Denono

But no one could confirm that the underworld account book had been part of the loot - least of all Buccieri who later was executed by an unknown assailant in a parking lot behind Caesars Palace.

An expert handwriting analysis indicated that the entries in the ledger were not kept in Buccieri's handwriting. Federal and local investigators also doubted that Buccieri would have kept such a record because he wasn't high enough in the

echelons of organized crime. Denono, confronted with these findings, changed his story.

Footnote: Oscar Goodman, an attorney for Tony Spilotro, said his client "categorically and emphatically as possible denies any connection with the Argent Corporation." Spilotro has never talked to Glick and has had no business dealing with him, the lawyer said. The allegation about Spilotro's organized crime connections was "very offensive," and Spilotro denies it, the attorney concluded.

Art-Buchwald

"But if the women work, what do

the men use for money? 'The women give them the money they make." "But that's wonderful," I said.,

'This is the country of true Women's Liberation.' "It has its advantages," the

Frenchman said. 'Who takes care of the children?"

"The women. 'Who does the cooking, cleaning

and washing?" "The women. You see, monsieur, the men here respect their women and let them do everything. As a matter of fact, there aren't enough hours in the day for a woman to fulfill

"What about marriage?" "Some people gef married, some don't. If a man tires of his woman, he

can find another one." 'Then a woman here does not have to be tied down.' "No. As soon as her man leaves her,

she is free." "This is a Women's Lib paradise," I said. "It must make the men angry to

know the women have all the jobs. 'Not really. You must understand that the Tahitian man is not as ambitious as the American man. Many, many years ago, Tahitian men discovered there was nothing they could do that their women couldn't do better. Once they made this discovery,

with them." "If only American men could learn this," I said, "we would indeed have a happy country.

they decided it was stupid to compete

"I do not want to give the impression that our men do not work at all. Many of them play musical instruments when their wives dance for the

"You mean after they work all day, cook, clean, and take care of their children, the women still have time to dance for the tourists?"

"Of course," the Frenchman said. "It is part of their duties. The tourists would be-very disappointed to comall this way and not see the Tahitian women dance.

"To think," I said, "they've managed to have all this liberation without a revolution.

"It is a unique position for women to hold, but even in paradise there is trouble. A few women are complaining that they are too liberated. They're starting to demand fewer rights and more time off."

#### THE BIBLE CAN YOU QUOTE IT? By LAVINA ROSS FOWLER AND ELIZABETH ROSS WIERSEMA

1. By 1859 facts on cuneiform writing, gathered from the 17th century on, made it possible to read Nebuchadnezzar's dictionary of the 17th century Chiseled in rock or baked in clay and pieced together, they reveal the Sumerian names with Semitic equivalent. One such king was associated with four captive Israelite boys. Name one. Daniel 3:12

2. Even though one believes his taxes too high, what does Romans 13:7 teach? 3. What prophet supposedly healed

Naaman of leprosy? Luke 4:27 4. According to Biblical records, what man, early in creation, had no mother? Gen. 1:27

5. "For if our heart condemn us, God is greater than ----." 1 John

#### The Tall City of Midland is the site this weekend of the National

Softball tournament

United Girls Softball Association Tournament, with games scheduled on five diamonds at Lancaster Park.

This is a significant sports event, attracting several hundred girls, their sponsors, coaches, parents and others from over the country. The girls will be participating in different age divisions.

An impressive ceremony at 6 p.m. today will open the tournament, at which time all of the teams will be introduced. That will be followed by an all-star game, prior to tournament play. Finals in the double elimination tourney are scheduled Saturday.

National President Brent Watson is chairman of the tournament.

- 30 YEARS AGO (Aug. 17, 1948): Twenty-five Midland and Permian Basin Naval Reserve officers requested and received orders to the Volunteer Petroleum Unit Number 8-1, it was announced by Capt. William W. Studdert, USNR commanding officer.

Midland and Midlanders are

delighted to be hosts to the tourney participants and their followers, and a great big, friendly, typically West Texas welcome is directed to them. It is hoped that their stay here will be enjoyable in every respect.

IT HAPPENED HERE

#### NICK THIMMESCH

## Ted Kennedy: Is he the 'cure' for all that ails us?

WASHINGTON - Sen. Edward Kennedy (don't call him "Teddy") is hot again, just as he was in 1968, 1972 and 1976. A crowd of guessers figures he is running for president, though the 1980 season is 18 months away. Those panting for a political savior freely tell pollsters that Kennedy is the salvation, the salve, the cure-all for what ails us.

Dr. Gallup proclaims that Democrats favor him over Mr. Carter to be the 1980 nominee by a 44-20 score, and that all voters want him over Gerald Ford by a whopping 59-41 margin.

The dopesters who see all events as crafted, and ignore the power of the prosaic, mutter, uh huh, and note that: a new poll shows the public forgiving Kennedy for Chappaquidick; Joan Kennedy's confession on alcoholism is compassionately received; Kennedy has a busy political schedule this fall, one which will put even more Democrats in his debt.

All this pleases, even amuses, Kennedy. He loves his popularity and the knowledge that, given his personal setbacks, he recovered (and made his own way. He doesn't plot or make moves to run, nor will he. He actually doesn't want to, and could only be persuaded if Carter pulls an LBJ and quits, or is humiliated in the 1980 primaries, or if a nation-shaking issue

For years, even aformentioned factors of this sort wouldn't have been enough to persuade him. The trauma of all the Kennedy tragedies was too much with him, and he was too involved in being father to the children of his dead brothers.

Nick Thimmesch

In recent years, the problems of his wife, and his son, Teddy, who lost a leg to cancer, occupied him more than any presidential thoughts. Always, there were the wishes of his sisters and mother - cautious for the safety of the last son.

Besides, Kennedy relishes his role as a senior senator. "I have new opportunities in the next Congress, as chairman of the Judiciary Committee," he told me last week. "Think of the enormous impact on the system of justice, the safety of our citizens and the protection of liberties. We'll be passing on 140 new judges - one fifth of the judiciary - in one year."

He welcomes the debate he has stirred by putting up a national health plan in opposition to the president's. "If we had announced the 'principles' of a health program on Friday, and all agreed, we would have been on page 10 on Saturday. This way, we've got people thinking about the differences, and ventilating the issue," he

Once, Kennedy sometimes mouthed what was just whispered in his ear by a bright staffer. Today, he knows his

stuff down to nitty-gritty. He and Sen. Howard Cannon (D-Nev.) pushed for airline deregulation to the point that the airlines drastically reduced fares in self-defense. Now Kennedy argues for de-regulation of motor carriers, and for reform of existing regulations so that new drugs can be brought on the market quicker.

Ask about tax-revolt and big, inefficient, government, and Kennedy offers liberal rebuttal: "We can save \$59 billion by 1984, if we vote for national health insurance, I think the biggest tax spenders are those who want to grant tax-credits (tuition-aid) without applying the same criteria we do for straight appropriations. In oil and gas, why don't we give tax-incentives to wildcatters instead of to dentists seeking tax-shelters?

"Proposition 13 was also a cry against bigness in all forms. If Howard Jarvis had packaged his proposition in a way to cut the size of big business instead of big government, the voters would have approved that, too."

People warm to Kennedy, despite his liberal rhetoric, because, like his brothers before him, he holds out hope and promise. He will chair hearings this fall on his national health bill, one we really don't need, and will get big media exposure. Kennedy will stump for Democrats everywhere, and more comparisons will be made between the enthusiasm for him and the turning away from Carter.

It is heady stuff, but Kennedy has seen it before and will see it again. He said, "That's about right," when I asked him if the presidential goal was less important to him than it was to

his brothers. For all the gossip about his personal life, Kennedy has always felt a deep responsibility to the entire Kennedy family and looked after any kin in

"It's obvious that the Kennedy family has been through so much," he. told me, "and it continues to be a major factor in my life. But grandchildren grow up and get settled down. Times change, and in a period of future years, things may change for me. But my position is that I do not want to run, that I support President Carter, and that he will be re-elect-

If you ask him if he really wants to become the Irish Daniel Webster, Kennedy lets out one of those roaring laughs that make people like him. "Read those speeches," he says, "and you'll see that no on can ever be that

MEN

By MICHAEL J. DUFFY

VATICAN CITY (AP) — The next pope of the Roman Catholic Church will have to deal with the unfinished business of Pope Paul VI's reign and such brand-new problems as test tube

Vatican officials say he will also face a growing financial deficit.

The reform wave launched by the Second Vatican Council has created problems of doctrinal dissent, priestly defections and a lay revolt over sexual issues. Particularly that of

The threat of schism hangs over the church from traditionalists who refuse to accept the liturgical reforms of Vatican II. Archbishop Marcel Lefebvre, the French leader of the rebel movement, has already said he doesn't consider the electoral conclave starting Aug. 25 valid since cardinals over 80 are excluded from it. There could be a final break if, as is

likely, the new pope carries on in the direction taken by the council.

A group of prominent progressive Catholic theologians has called publicly for a pope who will carry reform further — sharing deliberative power with the bishops' synod, promoting the position of women in the church and pursuing unity with other Christians and dialogue with the world.

Whatever the personal tendency of the next pope, he will have one or more groups of theological dissidents to deal with.

The problem of priestly defections that caused Paul VI anguish is likely to be even greater for his successor. Defection and death are still outpacing replacements - 1,894 dropouts and 4,971 deaths compared to 4,469 ordinations in 1976, the last year for

which figures are available. The trend has raised the average age of priests to 53 in Europe. Unless there is a dramatic turnaround, "the real crunch is going to hit in about 10 years," one Vatican official said.

Another issue that won't go away is birth control. Despite Pope Paul's firm defense of the church's ban on artificial methods of contraception, millions of Catholics around the world continue to ignore the prohibition. A Gallup Poll this year indicated 73 percent of American Catholics disagreed with the pope.

A number of cardinals arriving for the conclave have mentioned that thz man they elect will also have to find a way to deal with other aspects of the sexual revolution - abortion, homosexuality, divorce and extra-marital

Pope Paul at his death was reported preparing a position paper on a new moral problem, the recent birth in Britain of a test tube baby conceived outside the mother's womb. His successor will have to decide what stand he will take on this and similar developments of modern society.

Pope Paul advanced the interna-tionalization of the Curia, the Vatican bureaucracy, but the next pope is going to have to reorganize it to save money. Personnel costs have been rising steadily, and Cardinal Egidio Vagnozzi, who is in charge of the budget, complained recently: "If we continue this way, in 1981 our deficit will be 35 billion lire," \$38 million at current exchange rates.

Italian newspapers reported that a special papal commission completed a reorganization study prior to Pope Paul's death and recommended a drastic cut in personnel, partly through the merger of some offices.

One such consolidation that reportedly was urged was the merger of the three secretariats for relations with other Christians, with non-Christians and with non-believers.

MISS BLACK AMERICA of Texas, Thelma Moultrie, formerly of Midland, won her title June 22 in Tyler. In addition to her crown, she received red roses and a trophy. Miss Moultrie also won an \$800 savings bond and the honor of competing against 37 other young women in the Miss Black America Pageant to be held Friday in Philadephia, Pa. Now a Dallas resident, she has been marketing representative for International Business Machines (IBM) the past three years. Miss Moultrie is a member of Theta Sigma Theta, a national service sorority.

## Music due to highlight Black America Pageant

PHILADELPHIA (AP) - If there's a message in the the Miss Black America Pageant, it's in the music, snappy and sleepy stuff that attempts to shore up the pride of a minority

"There's a theme song for every phase of the program," says J. Mor-

ris Anderson, founder and president of the pageant, which stages its finals Friday night at Philadelphia's Civic

"The opening production number is 'Dear Miss Black America,' a fast, hard-hitting song that says 'I have soul, you have soul, everybody has It trumpets the beauty and talent of black people," Anderson said in an interview.

## More Jews leaving Soviet Union

By SETH MYDANS

MOSCOW (AP) - Although it is cracking down on some of the best-known activists in the Jewish emigration movement, the Soviet Union has been quietly raising the level of exit permits for Jews. Some experts believe it is a signal for improved relations with the United States.

In the first half of 1978, according to official figures released by a Swiss-based resettlement agency, -11,500 Jews left the Soviet Union, a 60 percent increase over the same period last year.

The average of almost 2,000 exit visas a month appears to indicate a new policy in the Soviet Union, where the monthly average from the beginning of 1975 through late 1977 had been just 1,170.

Those who are getting permission to leave come from all walks of Soviet life and all parts of the country. There is, however, a heavy emphasis onurban intellectuals, including a high proportion of scientists, mathematicians, computer specialists a brain drain that clearly is a factor in the Soviets' reluctance to allow Jews to leave.

They depart by air or train for Vienna, Austria, where they decide whether they want to settle in Israel or some other country.

They emigrant singly, but more often in families, ranging in age from infants to family patriarchs. Departure costs each emigrant the equivalent of about \$2,000, including \$1,000 in taxes for an exit visa and for the required renunciation of Soviet citizen-

Then there are the emotions of leaving and uncertainties. Said Alex Goldfarb, one recent emigree: "Emigrating for me is like being launched into outer space. I'll be entering a whole new world that I know little about. And I know I'll never come back and see this place again or the people.

"I don't regret what I've done, but I feel sad. It's hard to leave my friends, relatives, and especially the people who are still in danger, who haven't got their visas.

Soviets have been moving to disperse the organized Jewish movement that has campaigned within the Soviet Union for just such an increase.

In June, two of the central organizers of the emigration movement - Vladimir Slepak and Ida Nudel - were sentenced to five years and four years respectively of exile in Siberia for their activities. Slepak, who has been waiting eight years for an exit visa, and Miss Nudel, seven years, serve as examples in an evident effort to discourage other Jews from applying to emigrate.

In addition, Anatoly Shcharansky, a symbol of the Jewish emigration movement who has been refused an exit visa since 1973, was convicted July 14 of espionage and sentenced to 13 years at hard labor.

Much of the evidence brought against him involved petitions he wrote and meetings he organized on behalf of Jewish emigration - activities which had been considered routine among Jewish activists.

But while the Kremlin has been taking strong action against these visible symbols of the Jews' desire to emigrate, some Soviet diplomats in the United States have been privately pointing out the growing emigration rate.

These diplomats, speaking to U.S. officials and Jewish leaders, have suggested the rising emigration rate is a signal to which Washington should One Western diplomat in Moscow reads the signal

as an attempt by the Soviets to improve the "atmosphere" of U.S.-Soviet relations even while going ahead with the trials of Jewish activists. He ex-

While increasing the rate of Jewish exits, the presses scepticism, however, as to whether the attempt can succeed.

What the Soviets are looking for is an improvement in conditions for trade with the United States, which has been linked in the U.S. Congress since 1974 with the rate at which Jews are allowed to emi-

The 1974 trade bill includes the Jackson-Vanik Amendment, named for its sponsors Sen. Henry M. Jackson, D-Wash., and Rep. Charles Vanik, D-Ohio, which bans tariff and credit concessions to the

It remains in effect until the U.S. president can inform Congress he has received "assurances" that restrictions have been lifted on emigration.

When the amendment was added to the trade bill, the Soviets abrogated a U.S.-Soviet trade accord agreed to in principle in 1972.

## Crashing car reportedly sounds like earthquake

An out-of-control car caused an estimated \$10,000 damage to a residence, a fence and a gas meter late Tuesday afternoon, according to Midland Po-

A west Midland housewife and her 4-month-old male infant were awakened Tuesday when a late model car driven by a 12-year-old boy came through the wall of a bedroom at the rear of 3310 W. Camarie Ave., said

Authorities reported Mrs. Mark K. Leaverton was sitting on a bed with her child, talking on the telephone, when the car crashed through a wall in the rear of the home.

Mrs. Leaverton recalled Wednesday: "I heard a car going very fast down the alley. Then I heard a crash, which I later found out to be a gas line which had been hit. Then I heard what sounded like an earthquake when the car went through our back fence and one second later it hit our house."

The impact moved the bed six feet

from the wall. Police said there were no injuries with the exception of a 10-year-old passenger in the car, whose head reportedly hit the windshield. Officers said the pair in the car were

brothers. "I was speaking to my husband at the time on the phone," said Mrs. Leaverton. "I told him I heard a crash, which must have been the fence. When it actually did crash, I said, 'Something has crashed through

our bedroom! Come home!"" She said her husband came home in "record time" from downtown, adding, "We repaired the entire wall. The builder said if the car been one foot closer, there could have been

Officers said the car's 12-year-old driver lost control of the vehicle when he pushed the accelerator in-

lives, according to reports.

Lasater, who also was named best table topic speaker. Most improved speaker was Leigh Cerboskas; best evaluator, Mark Bozar, and sparkplug, Ken Marchetti.

## Hospital trustees approve budget

Midland Memorial Hospital trustees approved a budget for 1978-79. which would require a tax rate of 15 cents per \$100 assessed value of prop-

erty in the Midland County Hospital

The budget will be presented to the hospital district directors at their

#### Dollar strengthening after Carter expresses 'concern'

LONDON (AP) - The dollar strengthened today after President Carter's expression of "deep concern" over the U.S. currency's-sharp decline on the world's foreign exchanges. The price of gold dipped.

West Germany, fearful a weak dollar will price its exports out of world markets, praised the Carter administration's interest in shoring up its

Dealers cautioned, however, that the long-term future of the dollar is still far from bright. A Frankfurt trader said the money market is in a "holding pattern" pending firm indications of what action Carter might take to shore up the beleaguered curmeeting next week. The directors are to approve the budget and tax rate in

The operating budget for the fiscal year beginning Oct. 1 calls for \$11,-223,976 revenue and \$11,883,071 expen-

The capital budget calls for revenue of \$1,008,548 and expenses of \$1,075,-

The total difference between revenue and expenses in the proposed budget is \$1,649,696. Since one cent on the tax rate is estimated to be worth \$116,000, a 15-cent per \$100 assessed value (with assessment at 75 percent of market value) would be

required to make up the deficit. At that rate, the tax on a house with a market value of \$40,000 would be \$45

District Director Frank Cowden Jr., who attended the trustees meeting, said he is pleased the budget will call for the tax rate promised when voters approved the hospital district.

Also at Monday's meeting, the trustees discussed the possibility of requiring a specific length of residence in Midland County before a person is eligible for care at Midland Memorial as an indigent.

District lawyer Ted Kerr told the directors an attorney general's opinion indicates such a requirement is not legal, but the district has other means of testing residence. The directors agreed to leave the indigent care guidelines as they are, without the specified length of residence.

## Drug company documents sought

WASHINGTON (AP) - The sponsor of a motion to cite HEW Secretary Joseph A. Califano Jr. for contempt of Congress says he hopes Califano will find some way to furnish by mid-September subpoenaed documents describing how major drug companies make their products.

The House Commerce investigations subcommittee voted 9-8 Wednesday to recommend that the secretary of health, education and welfare be held in contempt if he did not turn over the documents. The motion was sponsored by Rep. Albert Gore Jr.,

Members said the documents were needed for an investigation of whether major drug companies buy generic or chemically named drugs, put their own brand-name labels on them and then charge steeply higher prices for

At a hearing on Tuesday, Califano gave the subcommittee confidential data on the generic drugs, their manufacturers and the brand-name drug company purchasers.

But he said Attorney General Griffin Bell had said Califano could not provide documents showing the precise manufacturing process because they are legally protected trade secrets.

"I'm hopeful the secretary will negotiate more seriously in the next two to three weeks before the full committee is scheduled to vote (on the contempt citation)," Gore said.

"I think he now knows we're very serious about this matter. I predict the full committee will vote the contempt citation as recommended, but I'm optimistic we'll be able to reach a compromise solution between now and that vote," Gore added in an

## Folks just wanted swimming hole but now they may get 11 dams

MIDDLEFIELD, Mass. (AP) -What folks asked for was a new dam and a new swimming hole. What they're getting is a \$14.3 million project with 11 dams and a mile-long lake, expected to draw throngs of tourists and change their town as completely as the floods they fear.

Critics of the seemingly benevolent federal-state plan range from owners of the general store to folksinger Arlo Guthrie, a neighbor.

One opponent, former Hampshire County planner Steve Johnson, affects a Yankee accent to quote an apocryphal farmer: "Don't much care if you build your dams, just don't put 'em in our river."

This battle - and it has become that - caps a struggle dating back to 1901, when the old dam on Factory Brook washed away. A new flood control dam was finally authorized in 1960, but then it had to be "justified economically." The dam proposal is the unpopular result.

The 300 residents here like life in a town that has neither a jail nor a theater and is connected to the county seat of Northampton only by a dirt road that closes after the first snow-

The West Branch of the Westfield River - the largest remaining freeflowing river in Massachusetts - now offers some of the wildest white water canoeing in New England, said John-

Middlefield, he argued, is perfect for nature study, cross-country skiing, biking and camping. The project is biased toward motorized water sports and camping and against the simpler pleasures, he said.

Crowds and motorized recreational vehicles would drive wildlife away, he said, and plans to control water flow for the benefit of fishermen would

disrupt spawning patterns of coldwater fish.

The lake and campsites would attract an estimated 320,000 visitors a year and saddle Middlefield with big bills for police, sanitation and fire protection, opponents say.

These are all reasons why townsfolk voted 98-43 against the plan.

How did a tiny town's request for a swimming hole grow into such a monster? Opponents blame the alleged dam-building "beaver" complex of the U.S. Soil Conservation Service and a bureaucratic Catch-22.

When the new dam was approved, it came under federal guidelines that require a return of at least one dollar for each dollar spent.

By itself, a flood control dam for the West Branch and its tributaries could not be justified under the cost-benefit ratio: Dams alone would cost more than the damage floods are likely to

But add recreational benefits, the SCS said, and the project becomes worthwhile: 11 dams, seven of them purely for recreational purpose; 320 campsites; 214 picnic sites; parking for 200 cars; 27 miles of hiking trails; two beaches and a sewage treatment plant.

Paul Christensen of the SCS argues the plan will provide needed recreation facilities for New Yorkers and New Englanders.

But a compromise is in the wind: Christensen says the SCS will release a modified environmental impact study in November with an alternative plan for 100 campsites, 30 picnic areas and one beach

That, he said, is as far the SCS can back off and still justify the flood control dams.

But statistics obscure the real point: the project would attract more

outsiders than most Middlefielders lope to see for the rest of their lives.

Public opinion against the plan is strengthening. Conservation groups have joined the fight. "The mood of people has changed," admitted Christensen. "A lot of them are nervous."

#### Lubbock man killed in struggle

LUBBOCK, Texas (AP) - A Lubbock man was shot to death late Wednesday after he fired his pistol at a police officer during a struggle, a police spokesman said.

Pronounced dead at the scene was Tommy Earl Davis, 27, according to Justice of the Peace Wayne LeCroy. The police spokesman said officer Pat Hastings and several other officers responded to a disturbance call

late Wednesday. Hastings was attempting to take a pistol from the man, the spokesman said, at the time the man fired the pistol at Hastings and then whirled in the direction of the other officers.

Officer Richard Foster fired a single shot, hitting Davis in the chest, the spokesman said.

Hastings suffered powder burns on his hands, but did not require hospitalization, the spokesman said.

12 cups boiling water

# insure eating

Many parents face the problem of giving their children school lunch money, only to find it was spent for something else. And there are times when the foods available at school are not to the liking of the

There is a common solution to each of these situations: A lunch prepared at home which your child can take to school. A lunch bag full of tasty, nutritious and low-cost foods is easy to prepare. And many times it stretches the family food dollar by using leftover food items.

The favorite American lunch is the sandwich. There are countless varieties of sandwiches that can be made easily, ranging from peanut butter and jelly to cold roast meats: Turkey, cold cuts, ham and cheese are just a few of the other favorite sandwich

Tuna goes well in a sandwich. And for a nice change of pace try mixing foods such as tuna or deviled ham with cream cheese softened with a little milk. Then sandwiches could be made the night before and frozen.

Leftovers, such as meat loaf, can be made into sandwiches. And foods which might otherwise go unused at home can make a flavorful, inexpensive sandwich.

In recent years, salads have gained in popularity because they are nutritious and easy to make.

Leftover meat is a natural choice for a lunchtime salad. One lively recipe includes chunks of cooked ham, chicken or turkey, canned green beans, chopped celery and lettuce. And with the salad, how about a small thermos of cold tomato juice? But you don't need a thermos, since small individual sized cans can be frozen.

A wide-mouth thermos can be used for hot foods such as leftover beef stew, chili or soup.

Items such as vegetables are important to a child's daily diet, too. And raw vegetables are convenient for a child's lunch bag. Apples, bananas, pears, plums or an orange add zest to the lunchtime fare. And for dessert, America's favorite flavor, chocolate, completes a well-rounded lunch.

ample, box lunches served the 1976 Summer Olympic athletes in Montreal included canned chocolate pudding for dessert. U.S. space officials include chocolate on all American space flights because it is a nutritious morale booster for the astronauts.

## Star prepares stew for many

Ector County Coliseum Aug. 25, periodically cooks a delicious Mexican beef stew.

4 lbs. of 1-inch cut stew meat 6 medium potatoes (cut into 1-inch cubes) 2 medium turnips cut into 1-inch cubes 8 carrots cut into 1-inch slices

2 cups celery sliced into 1-inch pieces

Melt shortening in large kettle. Meantime, mix flour with half of salt and pepper, reserving remainder and coat beef pieces thoroughly. Brown well in the shortening. Add water and bring to a boil. Reduce heat and let simmer about two hours or until meat is somewhat tender. Add vegetables, and the remaining ingredients stirring frequentty, until tender, (usually about 30-40 minutes). Serve in large bowls. Tortillas go good with this dish.

## Explanations

## of economic signs differ

By WILLIAM GLASGALL

NEW YORK (AP) - The cost of living surged upward at better than a 10 percent annual rate in the first half of the year and is widely expected to finish 1978 more than 7 percent ahead of 1977's prices.

That means economists are predicting inflation will slow a bit as the year wanes. But it also indicates inflation remains a tough problem.

Where are the cost-of-living trouble spots that may be propelling future inflation? Here are some ques-

tions and answers about some of these areas where economists see major problems: Q. The government said earlier this month that the food price spiral is slowing. Is it too early to start

A. The Labor Department reported wholesale food prices fell 0.3 percent between June and July, and said a major part of that decline was due to dropping beef and pork prices as producers brought more animals to market. But economist Michael Gorham of the Federal Reserve Bank of San Francisco says "supplies of beef, pork and other meats this year probably will fall 3 to 4 percent below last year's level. With demand stimulated ... by rising real incomes and summer cookout weather, prices are likely to remain in the stratosphere" and may rise again over the next year. President Carter already has raised quotas for imported beef by 15 percent to help curb price growth, but he said this week he "will not permit unrestricted beef imports next year." In addition, Gorham points out that such major beef suppliers as Austalia and New Zealand "may not be able to provide the additional 200 million pounds allowed to them under the expanded quotas.

Q. How about manufactured goods and raw industrial materials - what's the outlook there? A. Food price drops cut the gain in wholesale prices to 0.5 percent in July, the government said.

But prices of finished goods - such as cars, appliances and furniture - rose 1 percent. And non-food raw materials prices shot upward by 2.3 percent. Economists at Citibank called the raw materials price gains "downright discouraging" and noted those prices now have risen 14 percent over the past year. "This trend in industrial materials prices is particularly scary," Citibank's "Economic Week" newsletter said, because factories still aren't running at full capacity and haven't built up large inventories. "It's difficult ... to see what - short of a full-blown recession - will put strong downward pressure on wholesale prices in the non-food sectors," the bank said. Q. It's often said that capital spending can be a

defense against inflation because it involves expenditures for new and more efficient plants and equipment. What's the picture in this area? A. Capital spending has been gaining rather slow-

ly, and economist Allen Sinai at Data Resources Inc. worries that "without sufficient business fixed investment, the productive capacity necessary to prevent a recurrence of the shortages that characterized the economy in 1973 and 1974 might not be forthcoming." He suggests a system of business tax incentives — tied to new spending on plants and equipment - to bolster capital expenditures. Q. What are some problems in wages? Are we in

for a surge in wage increases in the next year or so?

A. Some influential economists have proposed a wage-control system based on tax breaks for companies who keep pay increases within predetermined limits. The proposals have met with resistance from labor unions who believe they'd be unfair to workers. But the consulting firm of A. Gary Shilling & Co. notes in a recent report that the minimum hourly wage is scheduled to rise from \$2.65 now to \$2.90 in 1979. The rise, Shilling says, is likely to affect a number of key unions' upcoming wage demands. "Assuming no (government) policy shift occurs, there is the potential for a wage explosion next year," the firm says.

## Wheelchairs no bar to living full life

OWATONNA, Minn. (AP) - While other couples walk, Helen and Jack Crawford roll through marriage on wheelchairs.

And for the past 18 years, they have been quietly crusading to prove to the world that two people on wheels can live together as normally as anybody Helen's wheelchair is the result of polio she suf-

fered in 1952. Jack's legs were paralyzed by a car accident four years later. They met in an elevator in Minneapolis, at the place where he had come for therapy and where she

came for exercises. "Once we understood what we could do, we did that to the limit," Helen says. "And when we realized and found out what we couldn't do, we didn't beat our heads against the wall. We adapted, found

an alternate path." Every weekday morning, Jack, 42, drives to his position as senior life underwriter for an Owatonna insurance company. About noon, Helen, 41, gets in her car and zips to

the mental health center where she works part time. In the evenings, Jack - a hearty, outgoing man with a sense of humor - may have a go at his

painting, experimenting with acrylics and abstracts as an art student. The couple designed their home, down to the last doorknob. It incorporates things that meet the needs

of two people in wheelchairs, yet any family could move in without changing it. It has wide bathroom doors, ramps in and out of doors, a center-island kitchen eating-bar that is a little lower than most, and lots of wide hallways.

They have learned to adapt to some limits. They can't ride bicycles or pull weeds in a vegetable garden. And they decided against having children. But with their creative, busy lives, the Crawfords don't spend much time being depressed about limits.

And people around them have learned to look at something other than their wheels. Not long ago, Helen and a woman neighbor drove to a shopping center and the neighbor got out of the

car and started walking briskly toward the store.
"Hey, wait for me," Helen called. "Gracious, I forgot you were in a wheelchair," the other woman said.

"That made me feel great, made my day," Helen said. "I want people to see Helen and Jack first, and then our wheels."

Chairman Bob Casey and Gerald A. Jackson, the general manager, were authorized Wednesday to submit the application next Wednesday to the Department of Transportation.
The application actually will con-

sist of amendments to the permit offered to the Seadock consortiumthat terminated five years of effort

#### Explosion hurts one

PORT ARTHUR, Texas (AP) One crew member was hospitalized following an explosion and fire Wednesday in the pump room of a Continental Oil Co. tanker.

Al Amsden, director of Public Information for Conoco in Houston, said the vessel was offloading crude oil at the time of the fire.

The fire was brought under control

#### HO&M pays most taxes

AUSTIN, Texas (AP) - The largest single contributor of oil and gas lease income to the Permanent School Fund is Houston Oil and Minerals. Land Commissioner Bob Armstrong reported Wednesday.

Armstrong said that the Houston firm pays Texas more than \$5.8 million in oil and gas royalties each month or about four or five times more than any other contributor.

Armstrong said the Permanent School Fund, a permanent endowment to support public schools in Texas, now totals more than \$1.7 billion. He predicted it would exceed \$2 billion by early 1979.

Houston Oil and Mineral pays \$5,-206,000 in natural gas royalties and \$613,000 in oil royalties each month. The second largest gas royalty payor was Corpus Christi Oil and Gas with \$944.000 per month. The largest oil royalty payor was Atlantic with \$1,-92,000 monthly, which also pays \$437,-000 in gas royalties.

DALLAS (AP) - Texas gaso-

Lokey reviewed a number of problems he said would be encountered by a coupon rationing program and said "this could be resolved by dropping the idea of rationing coupons and utilizing an allocation program similar to the current systemLwhereas the government could set the allocation fraction for a particular region of the country or on a

He also urged that the DOE shortage of 1973."

### Rationing opposed

line distributors are opposed to any type of a rationing program that uses coupons, a spokesman for the Texas Oil Marketers Association said today.

Association president George Lokey of Amarillo appeared before a regional hearing held by the Department of Energy. He said he spoke for more than 700 members of the organization who supply petroleum products to more than two-thirds of the 18,000 service stations in Texas.

"The comprehensive and complicated proposal that has been offered serves as the best argument against its own introduction," Lokey said in a statement prepared for the panel of DOE representatives.

national basis, as needed."

"do everything possible to have these regulations completely drafted and understood by the pulic and the industry so that we would not have the disastrous, incomprehensible regulations that we had to live with when the Mandatory Allocation Program was first imposed during the

## Tenneco starts pilot program for schools

WASHINGTON (AP) - The nation's schools can save enough money through energy conservation to help ease their growing budget pinch, petroleum and education officials said

James L. Ketelsen, chairman and chief executive officer of Tenneco, Inc., announced a pilot program by use of 20 schools and recommend practical measures that could cut fast-rising fuel bills by amounts on

the order of 30 percent or more. Dr. Shirley J. Hansen, associate director of the American Association of School Administrators, endorsing the program, told a news conference

## CORCO, Derby make deal

SAN ANTONIO, Texas (AP) -Under a new six-month agreement, Derby Distributors Inc. of New York will supply Commonwealth Oil Refining Co. Inc. with its requirements of crude oil and naptha.

Edward D. Doherty, CORCO president, said Wednesday the contract replaces a similar arrangement be-tween CORCO and Coastal States Gas Corp. of Houston.

During the second quarter of 1978, CORCO's processed an average of 161,000 barrels of crude oil and naptha

Derby will supply raw materials on a daily basis under an arrangement, similar to the agreement with Coastal, that will eliminate CORCO's need to carry the costs of feedstocks during that by 1980 increases in school fuel costs over 1975 levels will be eating up money that could otherwise pay some 170,000 teachers.

"Education jobs are literally going up the chimney in smoke," she said. Ketelsen said the idea of advising schools on fuel conservation was tested last May at Montclair Elementary ommendations were made for relatively simple, low-cost measures that could cut the school's utility bills by 50

At that rate, he said, the savings would pay back the costs of these measures in less than a year and after that the savings would profit continuing net benefits to the school budget.

Ketelsen said Tenneco consultants would visit other schools, analyze their energy use, and suggest possible conservation measures, explaining their probable costs and benefits; it would be entirely up to the local school districts to decide whether to adopt the recommendations.

Answering a question, Ketelsen said Tenneco, a major producer and transporter of natural gas and oil, would not influence the recommendations of consultants who could suggest solar energy systems or any other measures appropriate to a particular

"In these days," Ketelsen said, "when you are a producer and seller of natural gas, you have no fear of losing your market, believe me" - a reference to the nation's chronic natural gas shortages.

Since the Garland, Tex., test seven other school districts have been selected with the cooperation of their superintendents to receive the energy conservation analyses; Pawtucket, R.I.; Haverford Township, Pa., a suburb of Philadelphia; Livonia Public Schools near Detroit, Mich.; the Friends School of Baltimore, Md.; Manchester, N.H.; Newport News, Va.; and East Hartford, Conn.

## Campaign on to move energy plan

By MIKE SHANAHAN **Associatd Press Writer** 

WASHINGTON (AP) - Congressional energy leaders and administration officials have opened an intensive campaign to get President Carter's energy plan moving before Congress quits for a twoweek Labor Day recess. On both sides of Capi

tol Hill, efforts were under way to obtain necessary agreements for moving the natural gas portion of the energy program into the final stages of congressional

The House adjourns today until Sept. 6. If House members of a oint congressional conference committee leave town without signing a final report on the natu-

## lines of section 17, block A, L&SV survey, abDoctor cyclists against ortheast of Stiles, 8,500. Spraberry Trend mandatory helmet laws

Eunice, 7,600.

By DAVID ZINMAN

Newsday NEW YORK - Two months ago, swarms of motorcyclists descended on Albany, N.Y., seeking repeal of the state's mandatory helmet law. They listened raptly as one of their number

"Nobody is against wearing helmets," said A. Ronald Mackenzie. 'But why should wearing or not wearing them be the concern of the law?" Hundreds roared approval. Though he won their applause, Mackenzie seemed as out of place as a De Soto in a carlot of Volkswagens.

He is 50, a widely respected, Scottish-

born physician, chief of urology at

spoke from the statehouse steps.

Long Beach, (N.Y.) Memorial Hospital and a staff member of Memorial Hospital in New York City. But as national president of the Motorcycling Doctors Association, Mackenzie shares the younger bikers' enthusiasm for the open road and

their distaste for mandatory helmet "Helmets save lives in some kinds of accidents," Mackenzie says. "But it is the element of compulsion that

rubs me the wrong way. Mackenzie is a man of many faces. To his neighbors in Point Lookout, N.Y., he is a quiet but solid citizen, the father of three, an accomplished pianist and painter, a conservative in dress and politics. To his medical colleagues, he is a competent, no-nonsense clinican, an innovative researcher whose studies have been published in the nation's leading medical journals.

But soon, Mackenzie will once again swap his doctor's white coat for his biker's brown leather jacket, boots, leather gauntlets, sunglasses and mandatory helmet. He will mount his black Suzuki Re-5 motorcycle, rev up and power off on a 2,500-mile, five-day ride to Billings, Mont. There, he will preside over the Aug. 26-27 annual convention of the Motorcycling Doctors Association, a small group he organized last year.

Mackenzie does not dispute the hazards of motorcycling. Eighty to 90 percent of all reported motorcycle crashes result in injury or death, lines of McMullen CSL while fewer than 10 percent of car accidents do. What motivates him -

and the three dozen mostly middleaged physicians and dentists in the group - to devote themselves to a dangerous mode of travel usually associated with youngsters?

"It's in the blood," Mackenzie says, a glint in his gray-green eyes, a trace of a burr in his voice. "I first rode a motorcycle as a teen-ager. It was about the most exhilarating thing I ever experienced. Some of that remains. . . It's a tremendous thing to flog the iron horse." The physician-dentist motorcyclists, Mackenzie said, want input

with state legislators considering new

motorcycle laws and fairer treatment

of cyclists in court. "Many times,

they are killed and motorists are let

off with a slap on the wrist as if they

Mackenzie said. The group also wants

to improve motorcycling safety, com-

killed someone of no use to society,'

pile more accurate and meaningful accident statistics and upgrade the image of motorcyclists. The latter goal may be the most difficult. In a recent Newsday interview, a spokesman for the National Highway Traffic Safety Administration said of the cyclists who lobby for repeal of helmet laws: "Have you seen who they are? They are frightening. They are Hell's Angels and the dregs of society. They are appalling people - violent, crude. They pride themselve on their macho. It (fight-

ing helmet laws) is a macho bit. . Mackenzie dismisses this characterization as "stupid and ill-informed." He says rowdy bikers constitute only a minute percentage of the nation's 10 million cyclists. "But," he admits, "our (medical) colleagues look at us (motorcycling doctors) askance. The public must understand that it is the average American who rides a motorcycle.

Whatever the popular image may be, it is a fact that the mandatory helmet law is the most controversial issue among motorcyclists. The National Highway Safety Administration, an arm of the U.S. Transportation Department, says motorcycling deaths rose 23 percent from 1976 to 1977 after 22 states repealed helmet
