Charm fades for the man with the all-occasion smile

By PETER ARNETT

NEW YORK (AP) - Nicky Louie had a smile for everyone, but this week his charm failed. Somebody shot him in the head.

This may help him make a decision he told acquaintances he was wrestling with for some time: retire early or — at age 23 — move further into international gangsterism.

Police in the Chinatowns of New York, Boston, Chicago and Toronto are interested in his decision. But they'll have to wait. The bullet-ridden Louie, with serious wounds in the head and back, lies in a New York City hospital. He is in satisfactory condition but faces several weeks in

"I don't trust anyone," he had told a reporter last year, and only his parents have been allowed past the round-the-clock police guard at his door to find out how he feels now.

Fiffy indictments expected

WASHINGTON (AP) — Investiga-tions of alleged fraud and extortion in the General Services Administration should lead to at least 50 indictments involving millions of dollars in bribes, says the chief of the troubled agen-

GSA Administrator Jay Solomon made the estimates Wednesday, while the agency's top investigator said investigators have uncovered bribes to GSA employees from contractors working on federal build-

The FBI, U.S. attorneys and grand juries in several cities — as well as the GSA itself — are looking into alleged corruption in the agency, which serves as the federal government's builder, landlord and supply

Earlier this summer, Solomon had told a Senate subcommittee he expected about 25 indictments to come from the various investigations...

But he raised his estimate Wednesday, saying he expected "probably in the neighborhood of 50...indictments in the next few months...at least."

Many of these people will be GSA employees and GSA contractors, but some employees of other agencies may also be named, he said.

Solomon's estimate may be conservative since sources familiar with the investigations said earlier this summer that 100 federal employees would probably be indicted by grand juries

in various cities. At Wednesday's news conference, Vincent Alto, the former federal prosecutor hired by Solomon as GSA special counsel, repeated an earlier statement that \$66 million a year in government money is being lost through criminal activities, with a substantial part of that money going

to GSA employees as pribes. He said, "I thank the indictments...will show that it is in the millions of dollars.

"This wouldn't necessarily mean that GSA employees were getting all of (the \$66 million). I think the lion's share of the money was received by contractors and vendors.'

Both Alto and Solomon said they did not know anything about talk that some of the bribe money is ending up in Swiss bank accounts, except that the FBI is conducting an investigation of that possibility.

A source who asked not to be identified said earlier this week that federal agents were piecing together the story of GSA employees funneling "big, big money" into the Swiss ac-

Nicky Louie's fate is being watched by New York police who have for nearly a decade been attempting to stamp out Chinatown gangs.

Hired as thugs to protect the traditional illegal gambling that flourish in Chinese communities, the agressive teen-agers soon went into business for themselves and profits grew into the millions.

Famous Chinatown streets such as Mott and Pell became prosperous turf for youth gangs calling themselves such names as the White Eagles and the Flying Dragons. They systematically demanded protection money from businessmen and their own rivalry sometimes erupted in gunfire.

Gangs sprang up in other American and Canadian cities, accompanied by public shootouts and private murders. Police seemed unable to penetrate the traditional Chinese silence toward outside authority, even though

with bankruptcy.
Police believe that Nicky Louie tried to link it all together. "He tried to be the Joe Columbe of Chinese ancestry," commented one detective, referring to a New York organized crime chieftain with national connections who was gunned down several years ago.

Louie doesn't seem the type. Pale and boyish, he is a dresser so natty that even his jeans are carefully pressed. He would smile disarmingly at reporters who sought to interview him at the Wha Sun coffee shop, his favorite haunt on Mott Street.

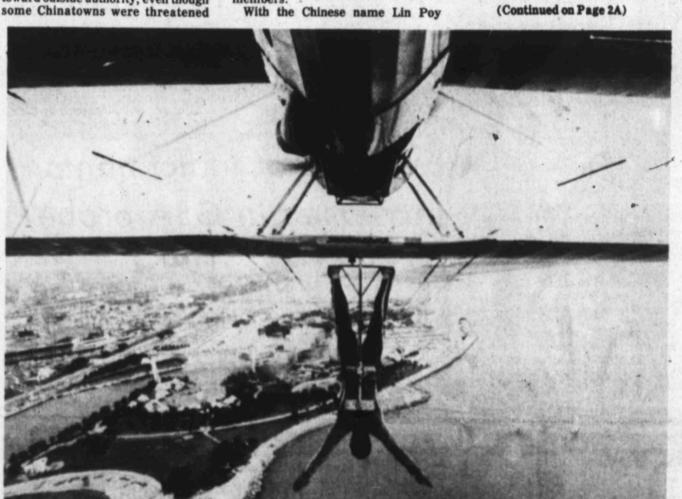

Police officers who have arrested him several times over the years only to release him when witnesses fail to testify — say Louie is above average in intelligence and leadership qualities. But in other ways he is similar to most other youth gang members.

Luy, he arrived in New York 12 years ago with his immigrant parents from Hong Kong. He left a dilapidated ten-ement to head a teen-age gang that called itself the Ghost Shadows and roamed one of the poorer neighborhoods of Chinatown.

By 1974, the Ghost Shadows had pushed out competing gangs and moved to the heart of the communi-

They had power over the narrow, twisting steets pulsing with restaurants, grocery stores with dressed ducks in the windows, Chinese fruit and vegetable markets and movie theaters with patrons wearing the black costumes of old China

By 1977, police estimated the Ghost Shadows were taking in more than a million dollars a year in extortion. Chinatown rocked with gunfights as other gangs competed, but Nicky

WINGING HIS WAY through rehearsals for an upcoming air show is wing-walker Bob Oates. Oates' feat and the Toronto waterfront were recorded Wednesday by Hollywood stunt pilot Joe C. Hughes, who photographed the scene by remote control from the cockpit. The camera, with a 17-mm lens, was attached to the aircraft's tail by Dennis Robinson, a photographer for the Toronto Globe and Mail. The four-day air show begins Friday. (AP Laserphoto)

Burleson back on today

By MIKE COCHRAN

Defense attorney Richard "Racehorse" Haynes excused Pat Burleson late Wednesday after grilling him nearly all day about a sequence of meetings he had with FBI agents, Priscilla Davis and David McCrory, the state's star witness in its case against Davis.

But prosecutors would not release Burleson and asked that he be required to reappear this morning.

Burleson, a former business associate of McCrory, was the second defense witness called by Haynes dur-ing a week-long bond hearing that has seen more sensational evidence than many trials.

Haynes carefully traced the sequence of meetings during the week before Davis' Aug. 20 arrest, but never asked the witness about the purpose or the nature of those meet-

Burleson was the intermediary between the FBI and McCrory, who claims Davis approached him with a plan to hire a gunman to kill the judge presiding in his divorce case, among

Judge Joe Eidson has since disqua-lified himself from the bitter, fouryear Davis divorce battle, claiming he believed he could be impartial but thought others might question his po-

Burleson testified he met with the FBI, McCrory and Mrs. Davis, but claimed he did not tell Mrs. Davis of his meetings with the FBI or McCrory and maintains McCrory was unaware

Some thoughts on human error, But the fate of natural gas legislation is only one of an array of complex Murphy's Laws, 1 and 2, and policy

'Tis human to err, and let's all be

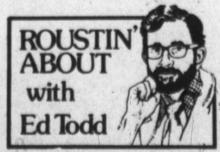

Certainly, there's nothing new or revealing about that idea. It's just like bringing up Murphy's

No. 1 Law, the axiom of engineers and scientists: "If anything can go wrong,

The law knows no bounds; it's universal.

There's yet another law called Murphy's No. 2 by Allen Hitchcock, a Midland building contractor who spends much of his leisure time working free gretis as a stage manager at Theatre Midland.

On his desk in the lofty control room, where a play can be "made" or laid to waste by wrong cues and timing, is Hichcock's anti-error

It goes like this: "If everything seems to be going well, you have obviously overlooked something."

If ever you have an opportunity to look into the control room and it's \$200,000 worth of sophisticated sound and lighting equipment, then you can

better understand how and why something could go amiss. But much of the system is com-

puterized, which, Hitchcock says, tends to cut down on any foul-ups. Of course, the programming is done by humans such as technician Hit-

But if something by oversight, mis-cue or equipment flaw does go wrong. well, maybe perfectionist Art Cole, who runs the "whole show" called the

Midland Community Theatre, will Then again, depending on the circumstance, he just might consider

adopting this company axiom, which obviously is rooted in Shakespeare: "To err is human. To forgive is not company policy."

Nicky Louie

James N. Allison Jr., R-T publisher, dies

James N. Allison Jr., 46, president and publisher of The Midland Reporter-Telegram and prominent civic leader, died of pneumonia at 6:15 a.m. today in a Houston hospital. He had been hospitalized the last month. He had undergone surgery in the Houston hospital about a month previously.

Funeral services will be held at 10 a.m. Saturday in the Episcopal Church of the Holy Trinity, with the Rev. Sam E. Hulsey, rector, officiating. Interment will follow in Resthaven Memorial Park, under the direction of Newnie W. Ellis Funeral Home.

The family residence is at 913 Allison also owned The

Plainview Daily Herald and the Alpine Avalanche. He also owned the Borger Herald for a brief period before disposing of it

within the last year. The fourth generation newspaperman also was president at one time of The

Stanton Reporter. He was president-elect of the Texas Daily Newspaper Association and was active in other newspaper organizations. He was a former president of the West Texas Press Association and a former director of the

Texas Press Association. He had other business interests in Midland and was recognized among the community's top civic

Allison was born Dec. 4, 1931, at Lincoln, Neb., and moved to Midland with his parents in 1940, when his father, the late James

James N. Allison Jr.

N. Allison Sr., purchased The

Reporter-Telegram. He attended Midland public schools through second year in high school, when he transferred to Sewanee Military Academy. Sewanee, Tenn., where he was graduated from high school with cum laude honors in 1949. He was manager of the football team during his sophomore year at Midland High School and was a

cadet officer at Sewanee. He was graduated from Southern Methodist University, where he was a member of the

President rested, fit to wrestle big ones

By FRANK CORMIER

WASHINGTON (AP) - Looking rested and fit, President Carter is back early from his Western holiday to wrestle with major issues that conceivably could make or break his administration.

The first item on Carter's post-vacation agenda is the push to win Senate passage of a natural gas price compromise. That was the subject of separate lobbying sessions at the White House today with at least 11 governors and about 100 representa-

issues and disputes that Carter must contend with in the days and weeks

Reaching climactic stages at a point when the president is striving to boost his popularity and escape a can't-do image are such other issues as Middle East peace, prospective income tax cuts, Civil Service reorganization, water policy and allocation of defense funds

These rank with energy policy as items that may well determine Carter's standing with the voters as the 1980 election campaign draws

Carter, his wife Rosalynn and daughter Amy returned to the White House early Wednesday evening after a flight by helicopter and Air Force One from Grand Teton National Park

in Wyoming.

The president cut his vacation two days short to be here for strategy sessions on the natural gas debate

and to prepare for next week's summit meeting at Camp David, Md., with Israel's Prime Minister Menachem Begin and Egypt's President Anwar Sadat.

Before leaving Wyoming, Carter told a questioner he "would be reluctant" to send U.S. troops to the Middle East as part of a peace settlement between Israel and its Arab neighbors, but he did not rule out the possibility.

"I don't know," Carter said. "We will just have to wait and see. I would be reluctant to do that."

Natural gas legislation, facing a filibuster threat and an uncertain future in the Senate, dominated Carter's schedule in his first day back in the Oval Office.

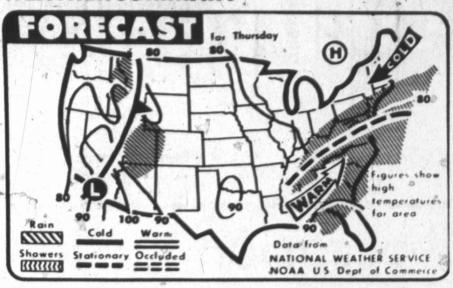

Besides meeting with governors and gas users, the president had aides arrange a general staff meeting to draft strategy for the Senate debate that begins Sept. 11.

White House press secretary Jody Powell contended the administration has "sign! Scantly more votes locked up than the other side" on the natural gas bill. But he acknowledged more votes would be needed for victory.

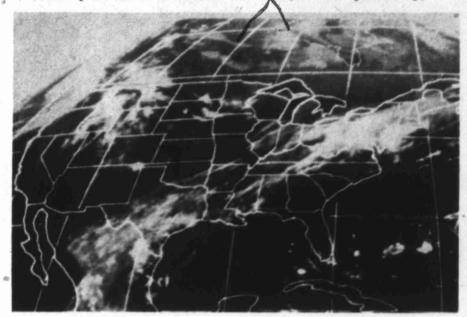

An Associated Press survey conducted this week showed fewer than one-third of the 100 senators say they will or might support the compro

The survey found 17 senators supporting the measure and another 14 leaning that way for 31 potential votes. Thirty-six senators said they were against or leaning against the proposal and another 33 said they were undecided.

WEATHER SUMMARY

RAIN is forecast today for the Rocky Mountains and the East Coast by the National Weather Service. (AP Laserphoto Map)

DENSE CLOUDS are seen over New England and Texas in today's satellite cloud picture, recorded at 3 a.m. High thin clouds are seen elsewhere, with variable cover over the northern Rockies. Tropical Storm Ella is seen at lower right. (AP Laserphoto)

Extended forecasts

Police keep close eye on fall of gang leader

(Continued from Page 1A)

Louie reigned supreme, avoiding at least one assassination attempt. Then it all fell apart.

Police say one reason was ambition. Nicky's brother, Eddie, led a Toronto chapter of the Ghost Shadows, and the brother attempted to recruit gang members in Boston and Chicago. When these new recruits began arriving here, Nicky's formery loyal, close-knit lieutenants rebelled because they felt threatened by the outsiders.

Two, nicknamed Mongo and Apple head, early this year formed another Ghost Shadows faction. Other gangs

began muscling-in. But a bigger reason for Nicky's downfall, police claim, is the success in an international campaign to stamp out Chinese gangs. Following a conference in Toronto last year, inteligence on gang activities is now rou-

tinely filed across the country. A special task force of 20 New York officers was assigned to Chinatown in February, and they claim to have closed every regular gambling game

in the community. "There may be a floating crap game or two, but that is all," said Capt. Allan Hoehl, who

heads the Chinatown police precinct. With revenues cut so drastically, gang members became even more unruly. "Nicky was clever up to a point," one detective said. "But he wanted too much and it blew up in his face.

On Monday night, Nicky was playing a friendly game of mah-jongg in the dimly lighted basement of the Gin Beck restaurant on Mott Street. It was supposed to be a safe haven, but a man with a .38 pistol walked through the downstairs kitchen and blasted Louie four times in the head and

Louie crawled and ran to the police station around the corner, splattering blood on the pavement. When he regained consciousness two days later, he declined comment on the crime. though police believe he knew his assailant

"Nicky's already too old for the youth gangs," commented one of the investigating detectives. "I'd way it's time for him to retire.'

Burleson questioning continues

(Continued from Page 1A)

of his visits to the Davis mansion. Attorneys hired to defend Davis on a charge of solicitation of capital murder have said they intend to show the millionaire industrialist was set

up and framed. A defense attorney said Wednesday

that testimony as developed by the defense Wednesday indicates a "means by which three people could be communicating through one person...sometimes known as carrying water or messages." Burleson testified he was a close

personal friend of Mrs. Davis and had known her for about eiht years, though he maintained he never spent the night at the Davis mansion.

He said he visited Mrs. Davis a half dozen times while she was hospitalized after a shooting at the mansion in 1976. Davis was charged and cleared of one count of capital murder but still faces other charges in connection with the episode.

Burleson also testified he had loaned money to Mrs. Davis and that she had paid him back in cash, checks

After several defense mentions of Burleson's financial records, prosecutors demanded and were allowed to see a porotion of the subpoenaed materials. Defense attorneys were also ordered to bring additional materials this morning.

Haynes' questions and Burleson's testimony at times became tedious, with Haynes suspending a line of. questioning just at the point when it appeared to be headed for a conclusion. But the testimony could have laid the groundwork for bringing Mrs. Davis into the case as a witness.

"We think that the financial activities between David McCrory, Pat Burleson and Priscilla Davis are significant," said defense attorney Steve Sumner.

Prosectors earlier accused Davis' attorneys of "sacrificing his freedom on bond" in their search for soft spots in the state's case against the millionaire for possible use in a later jury

The defense is now "eliminating any possibility of getting their client out on bond because the more evidence they put on, the more solid our case becomes," said Assistant Tarrant County District Attorney Jerry Buckner. He described the defense questioning of Burleson as little more than "a very, very expensive deposi-

Haynes spent most of Tuesday illing FBI agent Kon Jannings, and the defense subpoenaed two more witnesses, both FBI agents, dampening speculation the hearing is nearing a conclusion.

New Boeing line ordered

(Continued from Page 1A) mitted to purchasing 21.

Boeing has been locked in competition recently with a European consortium for dominance in the next generation of passenger jets. The European Airbus has been sold to several U.S. and world airlines, including Eastern.

The separate British and Eastern orders will also provide a major lift for Rolls-Royce, now a state-run enterprise, which has for months been negotiating to develop a new "535" version of its RB211 engine. The engine will power the 757.

Boeing got a boost in June when United Airlines became the first to order the manufacturer's Boeing 767, a 00-passenger wide-bodied craft designed for medium-range flights.

Although the British Airlines move. finalized by government ministers Wednesday, will herald a phase of closer cooperation with the United States in aerospace development, it will at the same time inevitably generate difficulties with Britain's partners in the European Economic Com-

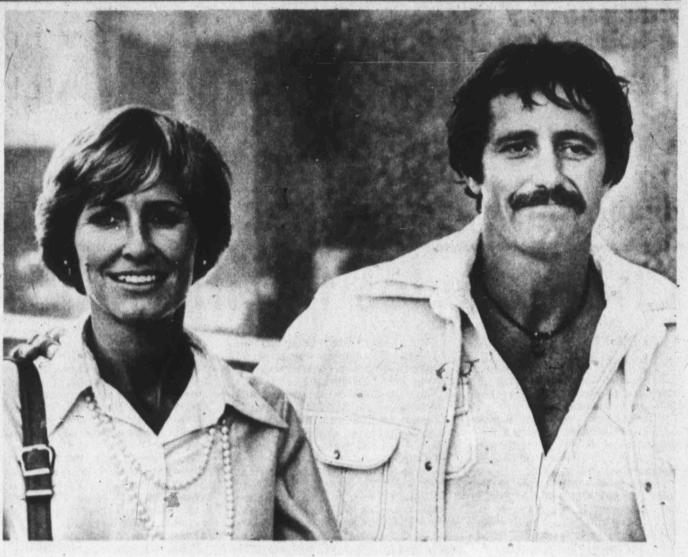

The Labor Government here has been under intense pressure from the French and West German goverments to look to Europe rather than to America for partners in future aerospace developments.

Yet British authorities are insisting that the decision announced today will not necessarily rule out the option of close cooperation between the British, French and West Germans in plans for the "Euro-airbus." Such plans are still under negotiation. The A300-B10 airbus project has become a source of British-French dispute.

Britain, as the price of joining the Airbus project, insisted the aircraft be powered with a specially designed "524" version of the Rolls-Royce RB211. But the French have opted for an engine developed by General Electric Co., a major producer of electrical equipment headquartered in the United States.

Replacement sought

In a story on the Midland County commissioners which appeared in Tuesday's editions of The Reporter-Telegram, it was inaccurately reported tha tthe district attorney's office is seeking replacement for its investigator. Dewey Lee, the investigator, is not leaving his position. The district attorney actually is seeking a replacement for assistant district attorney Timothy Sloan, who will leave her position some time in September.

With his arm around his wife Talana, Pat Burleson Wednesday leaves the Criminal Courts building in Fort Worth: Burleson, who was testifying in the

bond hearing of oilman T. Cullen Davis, was intermediary between the state's key witness and the FBI. (AP Laserphoto)

leg and bled to death.

Son of Mexican ambassador found dead after Tuesday kidnapping

There was speculation the fatal bullet was fired during a shootout between bodyguards and the four men

tariat." A police source said an au-

topsy showed he was shot once in the

and a woman who ambushed Hugo Margain Charles and an American friend Tuesday night near Margain's home on the south side of Mexico Police sources said the body was

found in a field near Chalco, 18 miles from Mexico City, at 8 a.m. Wednesday, some 12 hours later, and taken to the morgue at Chalco. But it was not identified until 10: 30 p.m., the sources

Detectives said the body was clad in a suit jacket and underwear, and the spot where it was found was relatively free of blood, indicating Margain had been dead some time before the

body was dumped there. Margain, director of the Institute of Philosophy at the University of Mexico, was riding in his 1972 Dodge with an American friend, Justin Evans, and with bodyguards in a car follow-

A police report said the Dodge was intercepted by a black Ford Galaxie containing four men and a woman.

"When the bodyguards ... tried to intervene," the report said, "the attackers...opened up with a burst of submachine-gun fire. A bodyguard was wounded. Return fire by the bodyguards also presumably wounded one of the attackers, but they all managed to escape.'

Evans, who was not otherwise identified, also was wounded, but a spokesman at the hospital where he was treated said his condition was not serious and he had been released.

The kidnappers left behind a leaflet signed by the 23rd of September Communist League, Mexico's most active left-wing urban gang. It said: "Await instructions. The kidnapping is to obtain money for the struggle of the proletariat."

Police sources reported that a member of the Margain household reported the family got a phone call from the kidnappers demanding \$2 million in ransom.

News of the kidnapping was blacked out until Wednesday afternoon, apparently because the family feared publicity would hamper negotiations for the release of the missing man. For hours after the word leaked out, the family and most official sources refused to confirm the kidnapping.

Margain's father, Hugo B. Margain, is serving his second tour as ambassador to the United States. He also has been Mexico's ambassador to Britain and secretary of the Mexican Treasury. He was reported with the family in Mexico City.

The 23rd of September Communist League takes its name from the date of a shootout more than a dozen years ago between student activists and soldiers at an army barracks in the northern state of Chihuahua. It is Mexico's largest and best-organized guerrilla gang.

Kerr and Kendall Counties - three

tack the President on.

U.S. Senator John Tower said Wednesday in Midland that President Carter is making a serious mistake by holding back the potential of nuclear energy, a technology which he considers to be one of the bright spots on the nation's horizon.

Tower told reporters that he is "puzzled" by the president's reluctance to pursue the breeder reactor program, an advanced nuclear project which would multiply its fue! while producing energy.

Texas' senior senator also said he would like to see nuclear wastes "put

in a remote area away from Texas." Tower had few kind words for the president's energy policies during a noon luncheon of the Downtown Lions Club in Midland Wednesday.

He predicted that the long-debated energy bill, which is expected to reach the Senate floor after Labor Day, will result in higher natural gas prices and lower supplies for Texas households and industries if enacted. Tower has been a longtime advocate of natural gas deregulation.

"It is not a good bill. It is better that

John Tower

we have no energy policy than have a

bad one," he said. "The passage of this bill is not going to produce anything in the way of

energy resources."

"He's not even paying his taken by the U.S. Justice Departrental bills for his Dallas campaign office," Neeley said. "It's the obligation of the Justice

During a question and answer period at the Lions luncheon, Tower said his opposition against home rule for the District of Columbia did not in any way undercut his commitment to minorities.

In fact, he said he expects to lure "a substantial part of the minority vote"

Tower contended that giving the District a chance to elect senators would "be giving the bureaucrats representation in Congress."

"The District of Columbia is not a state. This (home rule proposal) strikes against the federal system to give a non-state equal footing with

Man charged

COLUMBIA, Mo. (AP) — A 37-year-old Oklahoman, wanted in New Mexico, Colorado, Texas, Kentucky and Oklahoma on burglary charges, remains in Boone County Jail after being arrested following the theft of firearms from a rural Columbia

He added that representation of the District in the Senate would cancel out the votes of Texas' two senators on important energy matters.

"I'm looking out after minorities in Texas. That's my job," Tower said.
Tower said he opposed normalization of relations with North Vietnam and Cuba while also

decrying Carter's overall foreign affairs policies.

He particularly cited the president's diplomacies with the Soviet Union.

"I think the President started out on the wrong foot with the Soviet Union to begin with. The President showed no toughness...he is perceived by the Russians as being weak," Tower said.

Death cause

revealed

LIBERAL, Kan. (AP) - A second autopsy has revealed that a 36-yearold Liberal woman whose body was found in a field July 29 died of a blow to the head, Bert Hopper, assistant Seward County attorney, said Wednesday.

The original autopsy on Carolyn Scarborough did not reveal a cause of death, but her body was exhumed Tuesday for a second examination.

DEATHS Ralph Coan

LINDALE - Ralph Coan, 66, formerly of Andrews and a retired production engineer for Texaco, died Tuesday night in a Tyler hospital following a three-month illness.

Services were to be at 2 p.m. today in Ed B. Caudle Funeral Home in Lindale with the Rev. Bob Roberts, pastor of the First Baptist Church of Lindale, officiating. Burial was to be in Lindale City Cemetery.

Coan moved to Lindale from Andrews three years ago following his retirement from the oil company. Prior to that. Coan had worked in

Venezuela 14 years for Texaco. He was born Jan. 12, 1912, in

Texarkana, Texas. Coan was a member of the Masonic Lodge in Andrews, the Shrine Temple in El Paso and the First Baptist

Church of Lindale. Survivors include his wife, Van; a stepson, Gene Madeley of Houston; a daughter, Candy Coan of Carrollton; a brother, Ellis Coan of Muldrow, Okla., and two grandchildren.

Mary Tabor

ANDREWS-Services for Mary Jane Tabor, 95, of Andrews, were to be at 1 p.m. today in Singleton Funeral Home with the Rev. Carl Grisholm, pastor of First Baptist Church here, officiating. Burial was to be in Evergreen

Cemetery at Stanton. Mrs. Tabor died Wednesday in an Andrews hospital after a lengthy

She was born Dec. 18, 1882, in Burkett and moved to Andrews from Seagraves 28 years ago. She had lived in Seagraves from 1931 to 1950. She was married Nov. 23, 1902, to Jim Tom Tabor in Burkett. He died March 2, 1952. She was a member of the Second Baptist Church.

Survivors include two sons, Jim Tom Tabor Jr. of Robert Lee and Louis M. Tabor of Comanche; two daughters, Zara L. Ashley of Big Spring and Emma Hollon of Littlefield; 10 grandchildren, 23 greatgrandchildren and 16 great-greatgrandchildren.

Ray Holcomb

MUNDAY-Services for Ray Holcomb, 77, of Munday, father of Mrs. George (Kaye) McIntosh of Andrews, were held Wednesday in the First Baptist Church here with the Rev. Jack Mints, pastor, officiating. Burial was in Johnson Memorial Cemetery directed by McCauley-Smith Funeral Home here. Holcomb died Monday in a Knox

He was born Oct. 19, 1900, in Frost.

He moved to Munday in 1940 from Colorado City. He was a retired cotton compress manager. Holcomb was a member of the First Baptist Church where he taught Sunday School 25 years. He was a former Munday school board president and a member of Munday Masonic Lodge No. 851 in Colorado City.

Other survivors include his wife, a daughter, a sister and two grand-

John Mercer

BROWNFIELD-Services for John "Lute" Mercer, 68, of Brownfield, father of Johnny Mercer of Hobbs, N.M., will be at 10 a.m. Friday in the Church of God here with the Rev. Don Austin, pastor, officiating. Burial will be in Terry County

Memorial Cemetery directed by Brownfield Funeral Home

He died Wednesday in a Brownfield hospital after a lengthy illness. Mercer was a native of Missouri

and was reared in Buena Vista, Ark. He was married to Avis Ashby Dec. 22, 1945, in Magnolia, Ark. He moved in 1976 to Brownfield where he worked for Star Tool Co. before retiring. Other survivors include his wife,

four daughters, a brother, 12 grandchildren and three greatgrandchildren.

Sidney Woods

KERMIT - Sidney Lee "Squeakie" Woods, 62, of Kermit and formerly of Midland, died Wednesday in a Kermit hospital after an illness.

Services will be at 2 p.m. Friday in Belvue Baptist Church here with the Rev. Lee Fuller, pastor, and the Rev. Jimmy Law of College Baptist Church in Big Spring officiating. Burial will be in Kermit Cemetery directed by Cooper Funeral Home.

He was born June 23, 1916, in Midland. Woods was a veteran marine of World War II. He was retired from the Cabot Gasoline plant. He was a Baptist. He was a member of the VFW Post 6284 and the CB Club of Kermit. He had lived in Kermit 31 years, moving here from Midland.

He was married to Catherine Anderson March 29, 1948, in Kermit.

Survivors include his wife; a son, Ronny Lee Woods of Kermit; a daughter, Diana Gail Pilkington of Kermit: four sisters. Jo Brookman of Burkburnett, Eva Dee Cole of Austin. Iva Lee Huddleston of Midland and Jennie Lou Pittman of Andrews, and three grandchildren.

Henry Kurtz

PITTSBURGH, Penn.-Henry A. Kurtz, 69, of Pittsburgh, brother of Adolph Kurtz of Midland, died Wednesday in a hospital here. Services tenatively have been set

for Saturday in Pittsburgh. Other survivors include his wife. three children and two other prothers. all of Pittsburgh.

Wilbur Carruth

Services for Wilbur Vernon Carruth, 65, of 1405 Sparks St., will be at 4 p.m. Friday in the First Baptist Church with Dr. Daniel Vestal, pastor, officiating. Burial will be in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home. Carruth, owner-operator of a pump

and supply business in Midland, died at his home Tuesday following an apparent heart attack. Carruth was born Jan. 14, 1913, in

Duncanville, was reared at Ardmore, Okla., and was married to Dorothy Adams May 22, 1937, in Holdenville, Okla. He moved to Midland in 1952 from Salem, Ill., where he had lived for six years. He came to Midland as manager of

Jones & Laughlin Supply Co. and worked there until 1958, when he became associated with Walter O'Bannon Pump Co. In 1961, Carruth established the Don-Nan Pump & Supply Co., which he owned and operated. He was a member of the First Baptist Church.

include his wife, Survivors Dorothy; a son, Don Carruth of Midland; a daughter, Nancy Beal of Midland; a brother, Brandon Carruth of Shawnee, and six grandchildren. The family has requested that memorials be directed to Midland Memorial Hospital.

Pallbearers will be Jerry Lowe, John Stock, Gus Nix, Bo Bollinger, John Schlagal and Carlton Beal.

Ann Corrigan

Services for Mrs. Hugh (Ann) Corrigan III, 50, formerly of Midland, will be at 2 p.m. Friday in Newnie W. Ellis Funeral Home with the Rev. Howard Hollowell of Abilene officiating. Burial will follow in Fairview Cemetery

She died Tuesday in a Denver, Colo., hospital following a heart attack Monday.

She had been vacationing in Tin Cup, Colo.

Mrs. Corrigan was born June 1, 1928, in Midland and grew up here. She was an honors graduate of Hockaday Junior College in Dallas and attended The University of Texas. She married Hugh Corrigan III on March 27, 1948, in Midland. She

moved to Vero Beach, Fla., in the same year and had lived there since. She was a member of the Shkar Safari Club and Game Conservation International. She also was an honorary associate member of the East African Professional Hunters Asso-

Survivors include her husband of Vero Beach; two sons, Hugh Corrigan IV of Dallas and Edward Corrigan of Midland; her mother, Mrs. M.C. (Helen) Ulmer of Midland; a sister Mrs. Ulmer Van Atta of Dallas, and two grandchildren.

Social needs forum Saturday

LUBBOCK - Social-services needs of Texas' handicapped citizens and how those needs might be best served by state government will be considered in a regional public forum at 9 a.m. Saturday in the University Center at Texas Tech University here.

The forum is sponsored by the Governor's Conference on the Handicapped, state agencies dealing with the handicapped and organizations for the handicapped.

Oral and written testimony is expected at the forum, which is one of six to be conducted in the state.

"Information gathered at the forum will be used to make recommendations to the governor to insure that governmental services assist handicapped individuals in living an independent life with dignity and full participation in community life to the greatest extent possible," said Sharon Boatman, community development specialist in the Texas Department of Human Resources.

Sandoval resigns from agency post

EDINBURG, Texas (AP) - Eliseo Sandoval, the longtime leader of an anti-poverty agency that is now the subject of multiple investigations, has resigned his post with that organiza-

Sandoval, 39, has pleaded guilty to federal charges stemming from the misuse of federal funds. The Edinburg resident had taken a leave of absence without pay earlier this year as state and federal investigators began to scrutinize the Associated City County Economic Development Corp. and Sandoval's private business dealings.

The new director, Luis Ramirez, said Wednesday that Sandoval's resignation was accepted by the agency board Tuesday night. Ramirez had been acting director in Sandoval's absence.

Sandoval served as director since 1969, building the agency into a powerful organization that administered millions of dollars in federal funds. Prior to 1969, Sandoval served as director of the Bee County Communi-

ty Action Program. The state and federal indictments against Sandoval came after evidence gathered at courts of inquiry indicated federal money had been channeled into Sandoval's private

business. The guilty pleas came in July as part of a plea bargain with federal prosecutors. Sandoval is expected to be a key prosecution witness in the trials of other Rio Grande Valley men charged with misapplying federal manpower funds.

Fire races through town as firemen watch

By MARY POWERS

ANDERSON, Ind. (AP) - Fire raced through a block-long area of downtown today as most of Anderson's striking firemen refused to respond and volunteers rushing to the scene were delayed by picket lines, authorities said.

Fire Chief Ed Ballinger - who responded to the alarm with eight probationary officers — said the blaze was controlled by mid-morning.

Ballinger said the firefighters' union ignored his pleas for help, but about six strikers showed up anyway and assisted until volunteers from neighboring communities arrived. Several other strikers stood and watched as out-of-town firemen fought the blaze.

"I was surprised and disappointed that no one answered my call," Ballinger said. "We did receive word, though, that none of the men respond-

Officer harassed after complaint

PHILADELPHIA (AP) — A black police officer who complained of alleged police brutality during the arrests of MOVE radicals is being guarded by off-duty comrades who say they fear for his safety.
Officer Alphonso Deal, who also is

president of the north Philadelphia branch of the NAACP, said some officers are harassing him by "responding slowly to my radio calls for backup and interfering with my radio communications.'

Deal angered some officers when he called for the dismissal of the officers who beat Delbert Orr outside MOVE headquarters. He also sent a letter to the U.S. Justice Department asking for an inquiry into alleged police bru-

ing would be injured by the strikers. 'I like to believe that if someone had been in the buildings, the re-

sponse would have been different." No injuries were reported in the fire which broke out before dawn. At least four buildings, including the county prosecutor's office, were destroyed across the street from the Madison County government complex.

It was the second emergency in this central Indiana city of 71,000 - the state's eighth largest - since the 144 firemen went on strike Saturday night in a pay dispute.

The fire, believed to have started in the Courthouse Lounge, a tavern that had closed for the night. There was no immediate indication what caused the blaze. Chesterfield Volunteer Fire Chief Larry Musser said there was no evidence of arson.

About 31/2 hours after the first alarm was sounded, Madison Superior Court Judge Willim T. Clifford issued a temporary restraining order directing the firefighters to return to

There was no immediate indication how the strikers would respond.

Baker, White at forum today

Democrat Mark White and Republican Jim Baker, opposing candidates for state attorney general, will participate in a special candidate's forum at 7:30 p.m. today in Eden's Restaurant at the corner of Midkiff and Wadley in Midland.

Each cadidate will give a 10 minute opening statement and then will answer questions from the Midland League of Women Votes, sponsors of the event

The public will also have an opportunity to submit written questions

Musser said he and five volunteers waited 10 minutes at the edge of the city until striking firefighters received approval from their union leaders to let the volunteers through the picket line.

"I guess we'd still be standing there watching the block burn if they hadn't let us through," Musser said. "At an emergency meeting Monday, we agreed not to cross picket lines set up by the strikers."

On Sunday night, about 25 striking firefighters responded after the roof on a busy downtown movie theater collapsed under the weight of heavy rains. Three persons were injured, one critically, and 80 other patrons scrambled through exits to safety.

The firemen, however, set up picket lines Monday and vowed to ignore

future emergency calls. Supervisory personnel, who had helped answer calls the first three days, joined strikers on picket lines Tuesday.

Ballinger, who had said he was

confident the strikers would respond to emergency calls even after they vowed not to, speculated they showed up without answering the call because of the presence of the city attorney, who has been a central figure in the bitter salary negotiations.

Both firefighters and police are seeking a 12 percent pay raise, while the city has offered 6 percent. Base pay is \$11,700 for both departments.

Police have been on a work slowdown, responding only to emergencies since Monday, and have threatened to take a strike vote if no settlement is reached by Thursday.

DETROIT (AP) -They had round two of the fuel economy game all figured out at General Motors Corp. — until 1979 models began rolling off assembly lines and GM again had to revise its mileage forecast.

The GM estimate was put down to 19.1 miles per gallon. If its actual average mileage on all its 1979 cars slips twotenths below that, it could cost the giant automaker more than \$20

So it goes these days as U.S. automakers play the costly game of juggling computers to match production plans and buyers' desires to meet increasingly tough federal fuel economy standards.

And the game gets more complex each day. A GM analyst calls it a "what if" game and a Ford Motor spokesman says it's a "war game."

Its strategies are not just building smaller cars. They could include changes in advertising, in plans for importing models, in production, even in price between large and small models.

One problem with meeting the federal standards is that engineers never know what mileage a model will get until it leaves the plant. Another - and more troublesome one — is that the figure is based on the average mileage of an automaker's total pro-

That means if buyers like a company's gasguzzlers more than the better-mileage compacts, plans are thrown

The mileage figures are mandated under the

McDonald survives

ATLANTA (AP) Conservative Congressman Larry McDonald survived a strong challenge from businessman Smith Foster in a runoff election for the Democratic nomination for reelection to his 7th District congressional post.

In another, quieter runoff, state Sen. Virginia Shapard defeated Georgia Senate colleague Peter Banks to win the Democratic nomination for the 6th District seat of retiring Rep. Jack Flynt.

Both Democrats face Republican opposition in

Returns in the bitterly contested 7th District contest were not conclusive until after midnight Tuesday when a balky computer in Cobb County finally spewed out the totals that put McDonald over the top.

Final, unofficial returns from all 199 precincts in the 7th District gave McDonald 46,083 votes or 51.3 percent to Foster's 43,611 or 48.6 percent.

In the 6th District race with 214 of 221 precincts counted, the results were Shapard 30,153 or 53.2 percent and Banks 26,468 or 46.7 percent.

load

Foster finished less than 900 votes behind McDonald in the fourman Aug. 8 primary. He declined to concede the election Tuesday. "The results are so close," he said. "They may be right, and if so we can live with it."

Visible behind the plane are heat and vapor trails. (AP Laserphoto).

China and Russia won't pay for U.N. peace activities

UNITED NATIONS (AP) - The Soviet and Chinese governments, who consider themselves the staunchest supporters of decolonization, won't be paying a dime toward the estimated \$300 million cost of the U.N. operation to supervise South-West Africa's transition from South African control to independence and the African name of Namibia.

China disapproves of U.N. peacekeeping activities as a matter of principle and won't pay to support them. Since the United Nations began peacekeeping operations in 1948, the Soviet Union and most of its East European allies have refused to contribute to operations they don't endorse. Moscow insists that 'the aggressor'' - meaning South Africa - should pick up the tab for the Namibian operation.

The refusal of the two Communist giants to contribute to the cost of the operation in South-West Africa won't create a financial crisis for the United Nations. The difference will be made up by the United States and the four other Western powers that helped formulate the independence plan - Britain, Canada, France and West Germany.

"We did assure Secretary-General (Kurt) Waldheim that the Western five would ultimately be responsible for the shortfall," said Dr. Gunther Schutze, press counselor for the West German Mission. "This, of course, should not be construed as an

invitation not to pay."

This could cost the five nations up to \$75 million

above the estimated \$140 million they probably will be assessed The Security Council is expected to meet in a few

days to approve plans for the operation recommended by Waldheim in a report Wednesday. The plan calls for deployment of 7,500 U.N. peacekeeping troops and 1,200 civilian U.N. employees who will help arrange a cease-fire between Slouth African troops and the guerrillas of the South-West Africa People's Organization and then will help supervise the release of political prisoners, the return of refugees and the election of an assembly to draft the constitution of Namibia.

The Soviet Union and its republics of Byelorussia and the Ukraine have refused to pay nearly \$100 million in assessments for peacekeeping operations, while China's debt, including money owed by the Nationalist government prior to 1971, totals more than \$40 million.

Soviet refusal to pay for peacekeeping operations created a major political crisis in 1964 when the United States threatened to invoke provisions of the charter that would have suspended the voting rights of the financially delinquent nations. The United States finally backed down.

Inflation seen as causing slow economy, experts say

CHICAGO (AP) — A panel of economic experts economists forecast an improving balance of pay-

mean a sluggish economy, but no recession. One of the forecasters cautioned that the consumer will be the "most vulnerable" in an economic down-

Former presidential advisor Alan Greenspan, now

a financial consultant, and three other consultants said 1979 economic growth will drop below 3.5 percent, assuming Congress passes a proposed tax

But Greenspan, chairman of the Council on Economic Advisors under President Ford, cautioned against taking predictions too seriously.

The consensus "doesn't mean anything. We're sort of huddling close and hope we're right," he said. The economic forecasters gathered here for meetings of the American Economics Association and the

American Finance Association. In other predictions, interest rates will peak later this year and drop somewhat in 1979, said Michael Evans, of the Chase Econometrics Association Inc.,

and Robert Gough, of Data Resources Inc. All the

ments for this country.

Gough said recent indicators portend an "orderly

deceleration process" in the economy. He said the housing market and personal income levels are good and de-emphasized the longer-run impact of recent declining sales of cars and other durable goods.

"There is no definite indication of a dramatic improvement in the momentum nor of dramatic weakness," he said.

He warned, however, that the consumer is worried about the economy, particulary about inflation and will find an "individual need for a retreat in spend-

Vatican accused of aiding tax evasion

accused the Vatican bank today of helping chest people evade the laws against the transfer of capital abroad. It appealed to Pope John Paul I to impose "order and morality" on the church's finances.

In an open letter to the new pope, Paolo Panerai, editor of Il Mondo, said the Vatican's financial dealings included "speculation in unhealthy waters." Il gest and one of its most respected newspapers.

TOKYO (AP) — West German Economics Minister Otto Lambsdorff called on President Carter today to push an energy conservation program through Congress and curb inflation to avoid wrecking the international monetary system.

"The key to solving the dollar's problem is not in Tokyo or in Bonn but in Washington alone," Lambsdorff told reporters at the Tokyo Foreign Correspondents Club.

He said it is up to the Carter administration to overcome congressional opposition to the energy program and get the legislation passed.

"In the short term, it seems to me to be especially important for the American administration to take energetic steps against inflation, which at the rate of 8 percent ... has now reached serious proportions," Lambsdorff said.

'Neither the German mark nor any other European currency, nor the yen, is in a position or has the ambition to take on the role of an international reserve currency in the place of the U.S. dollar. Only the dollar can play this role and it is not going to

"The country which provides this reserve currency has taken on special international obligations and I think it must acknowledge these obligations and responsibilities."

Lambsdorff is in Tokyo for talks, with Japanese officials to follow up

last's month's economic summit in

He told a news conference Germany has met the commitments it made during the summit with the economic

stimulus package approved by his government on Wednesday. That package of tax cuts and increases in government spending will boost the economic growth rate about 1 percentage point, he said. But he warned: "Expansionary forces are still not strong enough to ensure sustained growth and rule out the danger of a slowdown in (international) eco-

79 automobiles cause fuel estimate changes

DETROIT (AP) - They had round two of the fuel economy game all figured out at General Motors Corp. - until 1979 models began rolling off assembly lines and GM again had to

revise its mileage forecast. The GM estimate was put down to 19.1 miles per gallon. If its actual average mileage on all its 1979 cars slips two-tenths below that, it could cost the giant automaker more than \$20 million.

So it goes these days as U.S. automakers play the costly game of juggling computers to match production plans and buyers' desires to meet increasingly tough federal fuel economy standards.

And the game gets more complex each day. A GM analyst calls it a 'what if' game and a Ford Motor spokesman says it's a "war game."

Its strategies are not just building smaller cars. They could include changes in advertising, in plans for importing models, in production, even in price between large and small models.

One problem with meeting the federal standards is that engineers never know what mileage a model will get until it leaves the plant. Another and more troublesome one - is that the figure is based on the average mileage of an automaker's total production.

That means if buyers like a company's fuel-inefficient autos more than the better-mileage compacts, plans

are thrown ajumble. The mileage figures are required under the 1975 Energy Policy and Conservation Act, enacted following the 1974 Arab oil embargo. They were to begin in 1976 but automakers succeeded in having them put off two years. Similar standards take effect in 1979 on light trucks.

Federal tests measure the mileage on all automakers' models. From 18 mpg on 1978 passenger cars, the requirement climbs to 27.5 mpg in 1985. As recently as 1974, GM's cars averaged 12 mpg.

U.S. officials estimate the standards will save 4.5 billion barrels of oil from 1980 to 1995 - half Alaska's North Slope oil reserves.

At GM, the first 1979 cars off the production line showed some models were a bit heavier than expected and a new clutch on a few other models depressed fuel economy. Refined miles-per-gallon testing procedures further clouded the picture.
The result: GM reduced its forecast

for 1979 cars to just a notch above the 19 mpg federal standard. The estimate of GM losing \$20 million or more for each one-tenth mpg below that standard is based on a formula fining GM \$5 for every car it produces during the year.

GM's new forecast compares to an original estimate of 19.7 mpg and an interim prediction of 19.4 mpg.

From now on, GM will monitor sales to learn if 100,000 Chevette sales are inexplicably lost to heavier Impalas. Or buyers may otherwise confound the planners who set the production mix of the 607 GM enginetransmission-rear axle combinations that affect fuel economy. The most important part of the fuel game strategy is the "down-sizing" of the automakers' models, now well under way. The vastly lighter and shorter cars need smaller engines and less fuel.

As the year unfolds, a company's flexibility is more limited. But it can boost prices on bigger, fuel-thirsty engines or push advertising on small cars if thelmileage level runs below

make some big, fuel-hungry cars in scarce supply. But marketing experts call that risky because it might send

A Ford analyst said automakers have "gotten by" so far mostly with minor price changes on engines, adding: "I doubt that anybody's suddenly said, 'Okay, we're not going to build 100,000 of these cars.' You do that sort of thing two years in ad-

GM has said it has never used advertising or sales contests solely to affect fleet mileage. GM and Ford have boosted the price spread between six-cylinder and V-8 engines, however, to ease customers toward the more economical sixes.

All the major automakers are exceeding 1978 standards: GM expects to finish the year at 19, Ford at about expect to beat 1979 levels, too.

After 1979, the strategies for meeting the standards get more complex and, as GM has said, "intensively

competitive." Next April, GM will bring out new front-wheel-drive compacts and designate them 1980 models - which normally do not come out until fall. That way the company will get 11/2 years' production of those economical cars to apply toward the 1980 require-

In doing so, GM loses a half year of its 1979 compacts for mileage purposes — one more reason it expects to barely meet 1979 levels.

For 1981, Ford is expected to drop the imported minicompact Fiesta and replace it with a similar, U.S.-built car. One reason: as of the 1980 model year, such "captive imports" - those brought into this country by U.S. automakers - cannot be applied toward

all "captive imports" in this country, would not say what its plans are for 1980. But industry observers expect Chrysler to sell fewer captives because they might work against its U.S.-built small cars on the mileage battleground.

Meanwhile, the companies are measuring the effects on mileage of diesel engines and more exotic alter-

If all else fails, the law allows

President has work cut out on gas compromise

WASHINGTON (AP) - President Carter seems to have his work cut out for him in selling a natural gas compromise to the Senate. Fewer than one-third of the senators say they will or might support it.

According to an Associated Press survey, only 17 senators said for sure that they will vote for the legislation, which would lift federal price controls on most natural gas by 1985.

Another 14 indicated they were leaning in support of the plan - for a total of just 31 potential votes. A majority of 51 votes is needed for passage, if all 100 senators are pres-

ent and voting.

The only solace to the administration may be that compromise opponents apparently are not faring much better in winning converts.

Twenty-seven senators said they will vote against the plan. Another nine indicated they were leaning to-ward casting a "no" vote — for a total potential "no" tally of 36 votes, according to the survey taken Tuesday and Wednesday. The rest — 33 senators — listed

themselves as undecided. They clearly will hold the margin of victory for one side or the other.

Both administration strategists and opponents of the plan claim a smaller margin of undecided votes in their own head counts - anywhere from a dozen to two dozen senators - but this

could not be borne out. And in a number of instances, each side was claiming for its own camp some of the same senators, possib

illustrating how wide open and diffi-cult to forecast the battle remains. Senate leaders plan to take up the natural gas compromise during the week of Sept. 11. The measure, which took more than eight months to draft, is described by the administration as

critical to its energy program.

The president, back from his Western vacation, plans a series of sales talks and strategy sessions today in behalf of the plan, including meetings with a group of governors and with industrial users of natural gas.

Meanwhile, Senate Democratic Leader Robert C. Byrd sent a sharply worded "confidential" letter to colleagues Wednesday urging them to let the administration have at least this

one energy victory. The West Virginia Democrat appealed to senators to vote down an expected opposition motion to replace the complex compromise with a sim-ple bill merely giving the president emergency powers to deal with natural gas shortages

Approval of that motion would deliver the "coup de grace" to Carter's energy program, Byrd said.

Stock market gains

NEW YORK (AP) - The stock market rose today as a rally gained momentum despite a 4-point jump in the prime rate.

At noon, the Dow Jones average of 30 industrials was ahead 1.73 at 881.93. The Dow, off by nearly 7 points late Tuesday, began gaining toward the close and continued its rise today. Advancers slightly outnumbered decliners among New York Stock Exchangelisted, and Big Board volume picked up to 16.76 millon shares from 14.43 million at noon Tuesday.

The round of prime rate increases was kicked off early this morning by New York's Chase Manhattan Bank, which boosted its charge on loans to top-rated borrowers to 91/4 percent Numerous major banks followed Chase's example minutes later.

News of the prime rate rise sent the dollar higher in New York and on some European exchanges. Recent Federal Reserve moves to push up many market interest rates had led several analysts to predict the prime rate move. The Fed has been acting to combat inflation and to make the sagging dollar more attractive to foreign investors. The foreign interest may help offset the traditional market depressant of high interest rates.

Ramada Inns fled the NYSE most-active list, down % at 12. Pan American World Airways was unchanged at 81% and Eastern Air Lines rose ½ to 15¼. U.S. Steel lost ¾ to 26¼. News reports said the Treasury may be on the verge of reducing its missimum prices for imported steel. Resorts International class A was up 41/4 to 1161/4 on the American Stock Exchange.

The NYSE composite index of all its listed common stocks/dropped .15 to 58.53: the Amex market value index was up 1.73 at 167.36.

Market's tone changing fast with inflation

By CHET CURRIER Second in a two-part series.

NEW YORK (AP) — "Buy stocks and hold them" is not the popular doctrine it once was among the investing institutions that manage money for an estimated 115 million Americans.

By all accounts, many of the nation's pensifunds, banks, insurance companies and other institutions have grown disillusioned with that time-honored approach in the chancy, high-inflation climate Five or 10 years ago, fund managers commonly concentrated on "one-decision" stocks — a select

group of high-quality growth companies — with the idea of holding those stocks indefinitely. If a money manager held, say, 10 percent of his money that was earmarked for stocks out of the

market, he was considered to be playing a conservative hand. "The attitude today is far different," observed Frank E. Block, an analyst at Bache Halsey Stuart Shields Inc. who spent 24 years working in bank trust departments before moving to the brokerage side of

the business five years ago. In place of the old stress on picking the right stock and staying with it - which worked out very poorly once the glamor issues began to fall in 1973 there has developed an emphasis on "market timing," in which the question is not so much what stock you buy, but whether you buy it "cheap" and get out of it at the right time.

Block noted that timing strategies have grown in popularity because of the market's behavior over the last dozen years or so. In that period it has experienced a long series of volatile ups and downs, but produced little or no net gain to reward those who simply sat and held stocks.

In addition, he pointed out, the rise of interest rates has encouraged a shift of money to fixed-income investments. Money held out of stocks now can earn percent-plus in short-term Treasury bills.

Sharply reduced commission rates since the advent of full fee competition among brokers in 1975 have also encouraged in-and-out trading strategies,

And human nature also plays a part. "Since everyone else is doing it, aggressive timing becomes part of the conventional wisdom," said Block. He recalled a much-quoted warning from the economist John Maynard Keynes that it is risky to be

a non-conformist, whether or not one is right. "The non-conformist is given very little credit if he is right and is condemned roundly if he is wrong. The conformist can go down in flames with his head held high, as long as everyone else is going down in

All this has left the big-name growth stocks in disfavor for most of the past five years. But those issues have shown some signs of life this summer leading a strong stock market rally.

This month stocks like IBM, Kodak, Walt Disney Productions and Polaroid all have reached their highest levels for the past year, although they remain far below their 1972-73 peaks.

Is the pendulum starting to swing back toward the glamor issues? Block said it was possible that a new "Favorite Fifty" might emerge, with a few different names from the last time around. He noted that interest in glamor stocks had perked

up lately in part because of talk of a possible economic slump — a climate in which growth companies are supposed to fare better than those more vulnerable to cyclical forces in the economy. But he added, "I doubt they will overdo the growth

stocks again, at least until the next generation of fund managers, when the ones who got burned in them the last time are gone."

Space monster could be killer

By FRANK MACOMBER Copley News Service

Talk about your Star Wars space fantasies! The Martin Marietta Corp., Denver, has a \$32 million contract with NASA to develop a spaceship which could act as a workhorse or be converted perhaps for the role of a military satellite killer.

This space monster, resembling a huge box kite, is to be called the Teleoperator Retrieval System (TRS). It's to be a reusable, television-equipped self-propelled craft. At the beginning, its chief mission will be to deliver, stabilize and recover satellites in Earth orbit. Later it conceivably could be converted and armed

to smash hostile spacecraft if space combat ever should become a reality. The TRS will be able to accept maneuvering commands by remote control from the upcoming space shuttle. The latter could become a spaceborne command post for a military version of the TRS. But NASA and Martin are quick to say they are working only on a civilian version. Nobody denies the TRS' potential as a military

space weapon, however. TRS is a low-thrust craft to be operated by remote control by an astronaut sitting at a pilot's console inthe space shuttle. It will be carried back and forth from Earth to orbit in the shuttle cargo bay. Or it may be left floating in space after completion of a mission to wait for the next shuttle to retrieve it. Back on Earth it can be refurbished and readied

for subsequent missions. The first task planned for TRS will be to dock with the errant Skylab space station, assuming it has not rolled out of control or plunged back to Earth by late

The first TRS is to be delivered to NASA by Sep Its mission will be to boost Skylab to a higher orbit

or to control its re-entry into Earth's atmosphere if efforts to keep Skylab in orbit fail.

For such a mission TRS will need extra propulsi tie-ons for added thrust.

When the time comes, the space shuttle will take the TRS into a low Earth orbit. There it will be ejected from the cargo bay and an astronaut will operate it by remote control from the shuttle cockpit. A camera mounted on the forward end of the TRS will send TV pictures to the shuttle, enabling the astronaut to maneuver the craft for rendezvous and docking with a satellite or for other missions.

The TRS will be specially fitted with a device enabling it to latch on to the Skylab to guide it.

After the Skylab mission is completed, the TRS will be used as a sort of space jack-of-all-trades. It will be able to maneuver to higher orbits to carry new satellites into position, or return them to the

shuttle for repairs in space or back on Earth.

The craft will use its own control and guidance system to maneuver in space away from the shuttle. When it returns to the shuttle's vicinity, an astronau will guide it close to the shuttle by remote control then bring it aboard the cargo bay with an automated manipulator arm.

A MIDDLE-AGED BUSINESSMAN, played by TV and movie actor Scott Brady, has more than passing interest in his young secretary, played by Enid Anne Woodward, in "Plaza Suite," the Neil Simon comedy currently at The Mansion dinner theater between Midland and Odessa. "Plaza Suite" has performances at 8:30 p.m. Tuesday through Saturday weekly, and at 2:30 p.m. each Sunday. Table reservations may be made through the box office, 563-1133 or 367-8658.

Superman' captures new Lois

By BOB THOMAS

HOLLYWOOD (AP) — Canadian-born Margot Kidder is finally getting down to earth after a wild, wild experience in the movie world.

"I spent three months flying around Manhattan," she comments. "It's a very difficult thing, making one shot a day, trying to remember what you did the previous day, striving to give an acting performance when you're hanging in space by wires. Ooops, we're not supposed to say that we used wires."

The film was "Superman," and Margot Kidder stars as Lois Lane to Christopher Reeves' Clark Kent. The Alexander Salkind production, which will reach the nation's theaters in December, turned into mini-careers for both performers.
"I was originally told the film" would last six months," the brunette actress said. "I want to tell you, it's a shock when they bring a cake on the set and it reads, 'Happy First Anni-

Hughes Rudd learns of the real America

By DON FREEMAN Copley News Service

HOLLYWOOD - Hughes Rudd, who is a self-styled ol' Texas "cracker" from Waco, has been out on the road lately for the CBS "Morning News," and just the other day he found himself in the North Dakota metropolis of Minot.

He did some speechifying before a local booster group and then he was hoisting a few with people from the city's CBS affiliate.

We're sitting around talking and there's a kid, 25 years old maybe, a reporter for the CBS station," says Rudd, "and we're talking about the English language and he proceeds to rack my backside. 'You're guilty yourself, Mr. Rudd,' he says to me. 'I've heard you talk about potholes in of Western Texas College the street. Well, they're chuckholes. A pothole is where you shoot ducks."" 'Was he right?" I asked.

"Why, dammit yes, he's right," Rudd said, dourly, "this kid who looked like he was one of the Hell's MC offering Angels, wearing the blue denim jump Mrs. Peterson, who has suit with all the racing patches on it.

"All these people gathered to hear art classes Snyder several times in my words of wisdom and I've got to the past, is a native of say to this kid, 'Dammit, you are Several special art classes are

budget was inflated by fees of \$3 million to Marlon Brando and \$2 million to Gene Hackman, but production costs of the long schedule were the major item. Kidder said at one time she and Reeves were rushing from one to another of six units which were filming simultaneously.

Actually they were filming one and

a half movies. Half of the "Superman" sequel has been made.

The second film concerns the love story of Superman and Lois; this time they will finally 'do it,'" said Kidder. "What remains to be filmed is mostly with Chris and me, plus some special effects. We're told it will take only two months. But I doubt that, after my experience with the first film."

Margot (nee Margaret) Kidder was born 29 years ago in Yellow Knife, Northwest Territories, went to school in Vancouver, was discovered in television by fellow Canadian Norman Jewison. He cast her with Beau Bridges in "Gaily, Gaily." Her other credits: "Quaker Fortune" (Gene Wilder); "Nichols" (James Garner's TV series); "Sisters" (as Siamese twins); "The Great Waldo Pepper" (Robert Redford); "The Reincarnation of Peter Proud."

Then she met and married writer Tom McGuane ("The Missouri Breaks"). They lived on a Montana ranch, where daughter Margaret was

"Except for one movie, I played the role of ranch wife and mother," Margot said. "I discovered I wasn't cut out for it.

"I was in the process of getting a divorce when the role of Lois Lane came up. I had no pre-conceived idea about it, because I had grown up in the wilds of Canada and had never read the comic books.

"I flew to London for the test and three days later I started work in the picture. It was good for me to be occupied during that upset period in my.life.

We came to be a family. Chris and I were like brother and sister; we fought like brother and sister and hugged like brother and sister. Dick Donner (the director) was daddy; he pulled me through the divorce and the sense of loss."

Her daughter Margaret remained on the set throughout the filming, spending half her life on "Superman" she is 21/2.

"I wondered, 'Am I screwing this child up?" said Margot. "But it turned out to be a terrific experience for her. She had 30 people who adored her, and she developed a great sense of self-confidence."

Margot is committed to "Superman" III, IV and V, and the prospect of playing Lois Lane thrice more doesn't alarm her. "It's a great opportunity," she reasoned.

Writer never satisfied

The book that comes out of a typewriter is never as good as the book inside a writer's head, according to bestselling author John Jakes.

"After seven months of researching and writing a book, I'm so sick of it I think it's absolute junk,' theatre productions. he said in an interview. "I always wish I could have spent another month editing it."

Still, in 1976 Jakes had three books on the bestseller lists, and one of his works - "The Bastard" - has been made into two two-hour movies.

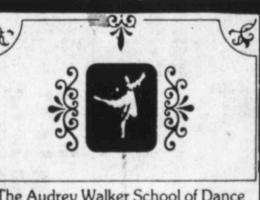

"The Bastard" is the first of seven volumes (already published) on the Kents -- a fictional American family. Jakes is currently working on the final volume of the series — 'The Americans' — which will bring the Kent family exploits up to 1900.

"When I was in college (Northwestern and DePauw universities) I fantasized about writing success but I never thought I could create anything above a 10th-rate book," he said.

Jakes said he was a frustrated actor when he got bitten by the writing bug. "By the end of my second year at Northwestern (1951), I was starting to sell short stories to pulp magazines. My first was a 1,500-word sciencefiction story on a toaster and within a year I had finished my first book a children's novel on cattle drives after the Civil War."
