

### WEATHER SUMMARY

Showers are expected today through Friday morning from New Mexico and Texas to southern New York and the mid-Atlantic region. Warm weather is expected for Gulf and south Atlantic coast states, but most of the country is expected to be cool. (AP Laserphoto Map)

A band of frontal clouds and scattered thunderstorms stretches from West Texas to the Great Lakes, as seen in day's satellite cloud picture, recorded at 3 a.m. Cool air extends westward from the front, while warm, humid air dominates in the East. (AP Laserphoto)

### Midland statistics

**MIDLAND, ODESSA, HANKIN, BIG LAKE, GARDEN CITY FORECAST:** Cooler with occasional showers and thunderstorms tonight. Decreasing cloudiness and not as cool with rain ending Friday. Low tonight in the mid-50s. High Friday in the upper 60s. Northeasterly winds 10 to 15 mph tonight. Probability of rain 80 percent tonight and 20 percent Friday.

**ANDREWS, LAMESA, BIG SPRING, STANTON FORECAST:** Cooler with occasional showers and thunderstorms tonight. Decreasing cloudiness and not as cool with rain ending Friday. Low tonight in the mid-50s. High Friday in the upper 60s. Northeasterly winds 10 to 15 mph tonight. Probability of rain 80 percent tonight and 20 percent Friday.

## Increase in interest criticized by head of home loan board

(Continued from Page 1A)

ed no decision has been made on exactly what the board might do.

The Fed controls the nation's money supply by the purchase and sale of government securities to those large banks and thereby sets the federal funds rate—the interest charged by banks on short-term loans to each other. When the Fed drives up interest rates for banks, it also indirectly influences other interest rates in the country.

Although the Fed never makes public its decisions until about a month after they are made, McKinney said he was told Wednesday by Fed Chairman G. William Miller that the Fed has set a new interest target of 8½ percent, up from 8%. The last time the interest rate was as high as 8½ percent was December 1974.

Miller later denied telling McKinney the Fed was pushing the rate to 8½ percent, but did not deny it is

buying securities in New York to drive up the federal rate.

The Fed has been trying to tighten the money supply by driving up interest rates in an effort to slow inflation and to prop up the U.S. dollar on world money markets.

President Carter is also preparing an anti-inflation program, which he describes as tougher than the one he announced in April.

In a speech to the United Steelworkers union Wednesday, Carter said the program "will not penalize labor or any other group in our society. At the same time, it will be tough. I will ask for restraint and some sacrifice from all."

Meanwhile, the Commerce Department reaffirmed in a report Wednesday that the inflation rate was 10.7 percent in the second quarter, the highest in three years. However, the report indicated the economy is growing rapidly enough to prevent extensive layoffs.

# Missionaries outline African life

"Do unto others as you would have them do unto you." — The Golden Rule from The Sermon on The Mount

Two West Texas natives have spent 14 years of their lives providing medical service for the people of the Mathare Valley near Nairobi, Kenya.

Mr. and Mrs. John Adams have chosen to aid others less fortunate than themselves in another nation at least 10,000 miles away from home.

Dr. Adams originally comes from Seminole. Mrs. Adams, (Martha), is a native Midlander.

She is the daughter of Mr. and Mrs. Arnold Scharbauer of Midland.

Dr. and Mrs. Adams were guests at a meeting of the Midland Lions Club Wednesday.

Mrs. Adams told members about life in a foreign country and about why she and her husband intend to return there at the end of this school year.

Martha Adams said there is a "very large slum called the Mathare Valley just outside Nairobi in which she and her husband operate a clinic for about 90,000 who live in houses made of cardboard and tin. Many people of Nairobi aren't exactly wealthy."

She and her husband are medical missionaries who also pass along the Gospel while helping others in need of health care.

They have been in east Africa representing the Southern Baptist Convention. Both of them are well educated, having attended a number of Texas universities.

He practiced medicine in Seminole five years prior to deciding to go overseas, along with Mrs. Adams and their five children.

Mrs. Adams is a trained nurse.

When the couple returns to Nairobi next year, four of their children will remain here attending universities, she said.

The Adams will return to Africa. "That's where we're needed," said Mrs. Adams.

She said Kenya is surrounded by Ethiopia, Somalia, Sudan, Uganda and Tanzania.

"You probably notice these names each day in the news," she said. "It's a tense political situation."

She described Kenya, a longtime pro-West nation, as a "country surrounded by nations in trouble."

Mrs. Adams cited Idi Amin, leader of Uganda, as a man "who has just about done away with one complete tribe of people. He's leading that country into destruction."

She said Amin has broken off all relations with Kenya, forcing his nation's people to seek food and goods from the north, only to later recant and try for smooth going. But the border between the two nations, once closed under such circumstances, seldom opens quickly, said Mrs. Adams.

Ethiopia, to the north of Kenya, was taken over recently by a military coup, she noted.

"There the people have no freedom at all now. Reports such as 2,000 school children being killed are coming out," she reported.

Tanzania's border has been closed to Kenya, she said.

"Because of a disagreement, Tan-

zania closed the border down. The East African Community once comprised of Kenya, Tanzania and Uganda no longer exists."

She said she sees Rhodesia as a nation "with many problems. I think, unlike us in a mainly black populated country, I feel that Americans know more about what is going on in east Africa than Kenyans do."

Kenya, formerly a British colony, has been independent for 15 years, she said.

However, since Jomo Kenyatta died, the selection of his predecessor of the highly strategic nation has left doubts in the political atmosphere as to the future of this nation, said Mrs. Adams.

"He's encouraged foreign aid while other African nations have not. Despite the poverty and unemployment, Nairobi, Kenya is a modern city of one million people," she said.

"Within 90 days, Kenya, a democratic country, must choose a president. Only one person can be chosen to run for president. Opponents can disappear," she revealed.

Mrs. Adams said three strong tribes in Kenya seek to become the ruling group to lead that country.

"Land and wealth come with that opportunity," she said.

"Watch the news and see what happens in Kenya," she said. "It's a very strategic place. Other nations will be watching."

Little electricity, sewage or garbage service is available in Nairobi, capitol of Kenya, she said. "It's a wild, desolate area."

Dr. John Adams has been about the only physician working in the Mathare Valley region, said Mrs. Adams.

"Government hospitals are available in Nairobi, but people in this area don't want to go through the hassle and the facilities are sometimes poorly run," she said.

Mrs. Adams said she and Dr. Adams became volunteers to help others.

"Each day before 8:30 in the morning the people start lining up outside our clinic. Once we heard people starting to line up to be seen at 5:30 in the morning...just to see a doctor," she said.

Some says the line stretches to 125 or more people, she said, while other days a mere 60 persons await medical treatment.

The Adams sell medical treatment for the sum of 45-cents per adult and 25- to 30-cents per child in the poverty-stricken area, she said.

"This includes exams, x-rays and laboratory expenses. We feel it's important the people have a part in their care."

"John examines the adults and I examine the children," she said. Their medicine comes mostly from Kenya. Occasionally supplies from America arrive. However, there are problems.

"It's becoming more difficult to get things through customs," said Mrs. Adams.

While in Nairobi the Adams children attended a school operated by America, Scandinavia and Canada with 600 students enrolled.

But the poverty of the people in the valley was an education itself, the Adams learned.

## Heavy rains not necessary for growth, couple discovers

(Continued from Page 1A)

thinning out, okra — thank Nature — does very well for a tropical or semi-tropical plant placed in a semi-arid climate.

"The wife and I both were raised on a farm, and we've never seen okra like that."

What he hasn't given up, his wife of 53 years has put up in the freezer.

The Stovalls have lived in Midland since the 1950s, but only 2½ years ago they moved out of the parsonage and

What started out Wednesday as a brief, hard downpour in Midland today developed into a steady deluge. Water above curb height was reported as common throughout Midland early today, while other reports indicated water was

got a place of their own. With it came a side lot for the garden.

"You know how newly-married people are (about each other)," Mrs. Stovall said. "That's how we are about this place since we've been over here."

Okra is not all that the Stovalls have going for them. There are apple, apricot, peach, pecan and pear trees and a fig shrub or so in their yard.

"We've also got berries, and that's not all..." said The pastor-gardener.

Today, he's got plenty of rain and that tall okra.

reaching mid-car door height on automobiles. Numerous vehicles had to be abandoned, and callers from south Midland said homes and businesses were being flooded in that portion of the city. (Staff photo by Mike Kardos)

Medical missionaries Dr. and Mrs. John Adams told Midland Lions Club members of life in Kenya Wednesday. The couple has spent 14 years in east Africa representing the Southern Baptist Convention while providing medical care to people who would not normally receive it. (Staff Photo)

Several streets were completely flooded by 9 a.m. today and others were partly flooded, according to the Midland Police Department.

Streets reported as being totally submerged were A Street, Illinois Avenue, Golf Course Road and parts of Andrews Highway. Wadley Avenue was reported "blocked off" at both ends.

Trouble with high water was reported on Haynes, Ward, Carver, Scharbauer Drive, North H, Louisiana and Terrell streets, FM 868 and the 500 block of West Industrial.

Water at one end of Goddard Junior High was reported to be waist deep.

A spokesman for the school said one end of the football field is the end of a drainage ditch and is lower than the rest of the area. Cars were stalled in Haynes Avenue there, he said, and the street was blocked.

According to one report, water in the stalled cars near Goddard was up to the seats inside the car.

As the rain accumulated in Midland, the number of accidents also increased, according to the Police Department. Since 6 p.m. Wednesday 21 accidents were reported.

The National Weather Service at Midland Regional Airport recorded 1.7 inches of rain in a 24-hour period ending at 6 a.m. today. The normal for September is 1.54 inches, according to the weatherman.

Total for the month as of early today was 2.84 inches, he said, bringing the year's total to 10.13.

In an average year, the total rainfall by the end of September would be 11.12 inches, and the weatherman said Midland should reach that point easily now, especially with more rain in the forecast.

A front passed through Midland about 6:05 p.m. Wednesday, the weatherman said.

Temperatures dropped from 70 degrees at 6 p.m. Wednesday to 60 at 7 p.m., he said.

The front combined with an upper trough and moisture from the Gulf.

"This was everything we needed for rain," the weatherman added.

Probability for rain should be 80 percent tonight, decreasing to 30 percent Friday. Temperatures should be cooler than normal with a low tonight expected in the mid-50s. High Friday should only be in the upper 60s.

Light flooding reported in portions of Midland

(Continued from Page 1A)

The mercury dropped to 52 degrees today for the overnight low, close to the record low of 49 degrees reported in 1971.

Wednesday's high of 77 degrees was much cooler than the record 107 degrees set in 1953.

Midland apparently was receiving the brunt of the showers as area towns reported from .1 inch to 3 inches.

Big Lake had the least amount with "not even .1 inch" recorded. Big Spring reported the most with 2 to 5 inches.

Ernest Sheppard of 1107 W. Missouri Ave. said his rain gauge only had enough room for 4 1/2 inches of rain.

Since the rain began about 6 p.m. Wednesday, he said, his gauge filled and overflowed.

The weatherman was experiencing his usual problem of not being able to please the public.

"We're rused at if we have a long dry spell here. And now they're asking us when the rain is going to stop," he said.

Very heavy thunderstorms triggered by a combination of a cold front and an abundant supply of moisture forced the National Weather Service early today to declare a flash flood watch for the southern portion of Northwest Texas.

The flash flood watch covered Brewster, Jeff Davis, Pecos, Presidio and Terrell counties.

Very heavy thunderstorms were reported during the pre-dawn hours across southern Andrews and northern Ector Counties. These thunderstorms were just a small portion of a large area of rain and thunderstorms that extended early today from the Abilene and Snyder areas southwestward across Midland-Odessa and across the Pecos River into the Davis Mountains.

Forecasters said there were no immediate reports of flooding, but warned persons in low lying areas to be alert for rising water and warned of the possibility of flooding of low water crossings. The rain was expected to continue throughout most of the day, forecasters said.

The cold front was moving across the state early today along a line from Texarkana to Brownwood to San Angelo to Del Rio. Behind the front, showers were reported and temperatures were cooler.

Early morning temperatures ranged from the upper 30s in northwestern sections of the Panhandle to near 80 along the gulf coast.

Some early morning readings included 49 at Amarillo, 55 at Wichita Falls, 74 at Texarkana, 70 at Dallas-Fort Worth, 75 at Austin and Lufkin, 74 at Houston, 78 at Corpus Christi, 77 at McAllen and Del Rio, 66 at El Paso and 52 at Lubbock.

## Cows create stir

(Continued from Page 1A)

was \$1,000 — nearly all else, the town donated: paint, labor, equipment. His effect was profound.

"We have the mural, of course," Mrs. Morrison said, "but guess what else? Every kitchen in town now stocks soy sauce."

DEATHS

Pearl Curtis

LAMESA — Services for Pearl Curtis, 76, of Lamesa were to be at 10 a.m. today in First United Methodist Church here with the Rev. Alvis Cooley, pastor, officiating.

Burial was to be in Lamesa Memorial Park directed by Branon Funeral Home.

Mrs. Curtis died Monday after a lengthy illness.

She moved from Mitchell County to Dawson County in 1902. She was a 63-year member of the United Methodist Church. She was married to H.L. Mitchell in 1917 at O'Donnell.

Survivors include three daughters, Bernice Daniels of Lamesa, Mary Ella White of Little Rock, Ark., and Pearl Stone of Clovis, N.M.; two sons, L.J. Curtis and Herman Curtis; a sister, Lou Roy of O'Donnell, 15 grandchildren and 11 great-grandchildren.

K. Anderson

ODESSA — Services for Kenneth Leon Anderson, 50, of Odessa were to be at 2 p.m. today in Hubbard-Kelly Funeral Home. Burial was to be in Sunset Memorial Gardens here.

He died Tuesday in an Odessa hospital.

Anderson was born Nov. 28, 1927, in Lometa. He was married to Francis Bozzoon in Hobbs, N.M. He moved to Odessa in 1947 from San Saba County. He was vice president of Diamond Oil Well Co. Anderson was a member of the Church of Christ. He served in the U.S. Army for two years.

Survivors include his wife; two sons, Lannie P. Anderson of Lampasas and Leslie G. Anderson of Lubbock; two daughters, Laura G. Anderson of Odessa; his mother, Mrs. Ann Anderson of Lampasas, and two brothers, Charlie Anderson of Midland and Bill Anderson of Dallas.

Midland citizens helping hospital purchase equipment

The generosity of Midland citizens has nearly cleared the equipment shopping list for Midland Memorial Hospital, Board of Trustees President M.A. Cappadonna told Board members Wednesday.

"We have had several people come forward to offer help" on the list of priority needs drawn up by a hospital committee, he said at the Board's regular meeting.

"The whole mood of the community in wanting to help with the equipment list is something we have been dreaming of," he said.

Donations have been promised both from the Hospital's Women's Auxiliary and from community donors, he noted.

R.J. Turner

BRADY — Services for R.J. Turner, 76, of Brady, father of Jerry Turner of Midland, were to be at 2 p.m. today in Wilkerson Funeral Home. Burial was to be in Resthaven Cemetery here.

He died Tuesday in a Brady hospital after a long illness.

He was born March 23, 1902, in Katemcy. He was a stockfarmer and mechanic. He was a member of the Church of Christ.

Turner had lived in McCulloch County 70 years. He was married to Zuma Baird on May 19, 1923, in Brady.

Other survivors include his wife, a daughter, a son, two brothers and a sister.

Ralph Wiese

LORENZO — Services for Ralph H. Wiese, 73, a retired farmer, cattlemen and implement dealer here and father of Mary Frances Tyson of Midland, were to be at 2 p.m. today in the Lorenzo Church of Christ.

Burial was to be in Lorenzo Cemetery under direction of Carter-Adams Funeral Home of Ralls.

Wiese died Wednesday in a Lubbock hospital following a brief illness.

He was born in Cambridge, Iowa, moved to Petersburg in 1909 and then to Lorenzo in 1938. He was married to Edna Kelly on March 8, 1934, in Lubbock. He was a member of the Lorenzo Church of Christ.

Wiese had served on the Lorenzo State Bank board of directors. He was a former member of the Lorenzo Lions Club, the Southwest Cattle Raisers Association and the Lubbock Agriculture Club.

Other survivors include his wife, a brother and four sisters.

Announcement of specific donations and the equipment involved will be made later, he said.

Cappadonna told the Board the Junior League of Midland also has funded the salary for a social worker to work in the city-county health services pre-natal clinic three days each week.

The addition of a social worker was one recommendation made by the trustee's advisory committee at the Wednesday meeting.

"We feel this will help us identify indigent patients early and provide better care and perhaps a better collection rate for the hospital," Cappadonna said.

White House furious with Begin

WASHINGTON (AP) — A sharp disagreement over Jewish settlements between President Carter and Israeli Prime Minister Menachem Begin is posing a growing threat to further Mideast peace negotiations.

White House officials, furious with Begin, insist that the Israeli leader committed himself at the Camp David summit to a moratorium on new Israeli settlements on the West Bank of the Jordan River during the five-year period in which the territory's future is being shaped.

But Begin claimed Wednesday that he had agreed only to a three-month freeze while Israel and Egypt try to translate their Camp David framework into a formal peace treaty.

Begin said he would have to return to Israel and consult with his summit delegation as well as other Israeli leaders before he could come to final agreement on the new settlements, U.S. officials said. The prime minister told a Jewish group in New York,

\$2,000 worth of tools taken from trailer

Ed Shoaff of Keys Construction Co. told Midland County Sheriff's deputies Monday an estimated \$2,000 worth of tools had been taken from a trailer located at a construction site on West U.S. Highway 80 between the Coors Beer plant and another business.

Carla Bigham of the 1200 block of West Missouri Avenue told police at Tuesday afternoon a 10-speed bicycle had been taken from the same area.

Doug Pike of the 2400 block of Golf Course Road told police Tuesday of the theft of tools and a tool box valued \$350 from the same address earlier.

Cathy Grace of the 2900 block of Franklin Avenue told police Monday afternoon of the apparent theft earlier that day of her billfold which contained \$200 cash and a check for \$1,300. The theft reportedly occurred in the vicinity of Carrows Restaurant, corner of Wall Avenue and Garfield Street.

Leroy Ledford of Route 1 told police Monday afternoon of the apparent theft of an estimated \$4,000 worth of tools and equipment from B and D Manufacturing Co. in the 3100 block of West Front Street.

County Hospital Board meets today

Midland County Hospital District Board of Directors was to meet at 3 p.m. today to hear a report from the Board of Trustees of the Midland Memorial Foundation.

Directors also were to hear a report from Administrator Wayne E. Ulrich,

meanwhile, that he had gained major concessions from both Carter and Egyptian President Anwar Sadat twice by threatening to stalemate the summit meeting.

The question of new Jewish settlements on the West Bank was one of several unsettled issues that were left out of the two agreements reached in the talks. Another is the future of Jerusalem. Instead, Carter, Begin and Sadat decided to exchange letters giving their government's positions on these knotty problems.

The letters, which were to be exchanged within "a day or two," have yet to come out while the White House — and reportedly the president himself — grew angrier with Begin.

Reporters covering Carter's speech to the steelworkers union in Atlantic City, N.J., were allowed to glimpse a few lines of a provision, subsequently deleted at Camp David, which said that no new Israeli settlements would be established and that none already there would be expanded.

Carter made a hand-written notation that the future of the settlements would be decided among the negotiating parties. These are the Palestinians, including members of the Palestine Liberation Organization; Jordan

Navy to 'draft' 'silver sausage'

MIAMI BEACH, Fla. (AP) — Saul Slater has built a hovering blimp, and the Navy thinks the design is just dandy for a vehicle to use for coastal patrol and ocean surveillance.

The Navy bought the 73-year-old Slater's first blimp — a 19-footer. He now plans to build a new silver sausage — this one 110-foot-long.

"I thought it would be nice to have something to float around in," Slater said. "I can make it go sideways. Up. Down. It hovers."

"A number of companies have come up with designs for a blimp that can hover," says John Eney of the Navy's Lighter Than Air Project. Eney says Slater's blimp has the smooth ride, endurance and energy savings the Navy was looking for.

"If a cheap blimp could be built — one that sold for \$150,000 — it could compete with yachts," Slater says. "I don't say it would replace the boat. But there are lots of people who'd like to sail around in the air."

listen to a report from the Citizens Advisory Committee and take action in other areas as they were to be brought up.

Members were to meet in the Board Room of Midland Memorial Hospital at 2200 W. Illinois Ave.

and Egypt, along with Israel. The effect would be to give the Arabs a veto over new settlements.

In a related development, Rep. Paul Findley, R-Ill., proposed that Yasser Arafat or some other PLO leader be invited to Washington as a means of bringing the organization itself into peace negotiations.

Findley, ranking Republican on the House Mideast subcommittee, said he made the proposal to Carter at the White House on Monday and received a noncommittal reply from the president.

"I got the feeling that he had not foreclosed the possibility," Findley said.

Israeli forces will stay on West Bank: Begin

NEW YORK (AP) — Menachem Begin says that Israeli forces will stay on the West Bank and in the Gaza Strip beyond five years and that his nation will never surrender Syrian territory it occupies on the Golan Heights.

The Israeli prime minister, speaking to officials of major American Jewish organizations Wednesday, said it would be necessary to keep forces on Jordanian soil to "ensure Jewish blood is never shed again."

Begin said someone in the U.S. State Department, in speaking about the accords reached by him, Egyptian President Anwar Sadat and President Carter in the Camp David summit, had suggested that Israeli forces would remain on the West Bank and

in Gaza only for five years. "I hereby declare we will stay beyond five years," Begin told an audience of about 3,000 persons Wednesday.

And Begin also said his country will not surrender any territory in Jerusalem, which had been divided by the Arabs and Israelis prior to the 1967 war.

Begin said he told Carter that Israel did not want "one square kilometer" of the West Bank and Gaza, but that "we Jewish people have a claim, a right ... to sovereignty" in Jerusalem because "it's an integral part of our Bible." He told the crowd the Israelis will maintain security forces in the West Bank, but he said, "We leave the question of sovereignty open because we want peace."

Texas Society CPA president will speak to Permian group

President of the Texas Society of Certified Public Accountants, Walter A. Bielstein of San Antonio, will be guest speaker for the Permian Basin Chapter of Certified Public Accountants at 6:30 p.m. today. The group will be meeting in the Petroleum Club.

Bielstein is a partner with the San Antonio office of the accounting firm of Alford, Meroney and Co. He has held several positions in TSCPA, including the office of vice president.

TSCPA has a membership of more than 12,800, making it the third largest CPA society in the United States. It sponsors activities related to public interest and implements an aggressive program of continuing education for its members.

Members work through a network of 74 statewide committees as well as 20 chapters across Texas.

The Permian Basin Chapter includes more than 300 certified public accountants in an 18-county area which includes Andrews, Borden, Crane, Dawson, Ector, Gaines, Glas-

scock, Howard, Loving, Martin, Midland, Mitchell, Reagan, Scurry, Sterling, Upton, Ward and Winkler.

# Museum has basketry display

Fine Indian baskets of varying shapes, sizes and uses are included in a comprehensive new exhibition at the Museum of the Southwest.

"Indian Baskets of Western North America" is the title of the exhibition which has come here on loan from the Smithsonian Institution through its Travel-

ing Exhibition Service. The show will remain on view to the public daily through Oct. 15, said Sam Grove, director of the Museum of the Southwest.

Basketry represents a vital aspect of American Indian life from the standpoint of both practical use and artistic expression. The 100 baskets included in the new show cover several major culture areas with special emphasis on the basketry of the Southwestern Indian tribes and California's Mission Indians. Many of the styles on view in the display have rarely been seen this side of the West Coast.

## ENTERTAINMENT

Among the numerous American tribes represented with fine examples of basketry are the Nonha, Makah, Yurok, Karak, Hupa, Pomo, Palute and Papago — in all, 29 different tribes ranging in area from Alaska to Texas.

The unique exhibit was organized by Reilly P. Rhodes, director of the Bowers Museum in Santa Ana, Calif., where the collection had its initial showing. Dr. Charles Rozaire, curator of archaeology at the Los Angeles County Museum of Natural History selected the baskets from the Bowers Museum's extensive collection.

In addition to the baskets themselves, the exhibition presents photographic murals of late 19th Century Indian basket weavers. The baskets on display illustrate various techniques of construction and show the role of the basket in most facets of American Indian life. Decorative designs include minute feathered examples, circus figures, coiled rattlesnakes, the American Eagle with outstretched wings, stars, standing figures, plus many well-known geometric symbols.

The Museum of the Southwest at 1705 W. Missouri Ave., is open to the public daily without charge. Weekday hours are 10 a.m. to 5 p.m., and Sunday hours are 2 to 5 p.m.

# Shriners bringing new show to city

The 28th annual Shrine Circus comes to Midland this week.

The popular family show will have performances at 2:30 and 7:30 p.m. Saturday and Sunday in Cubs Stadium at Hogan Park. Preceding the performances will be the traditional circus parade through downtown Midland, beginning at 10 a.m. Saturday.

Jim Highsmith, parade chairman, said the procession will start at Midland High School and move south on A street to West Wall avenue, east on Wall to Main street, north on Main to Texas avenue, and west on Texas back to the point of origin.

According to Highsmith, this year's parade will feature the Midland and Lee High bands, the Alamo Junior High band, Boy Scouts, the 4-Wheel Drive Club, the Austin Freshman School band, and several popular Shrine units from this area. Something new this year having special appeal for children is the Kids Klown Kostume Kontest, sponsored by the Midland chapter, Order of De Molay.

Funds derived from the annual Shrine Circus performances help support such charitable and philanthropic Shrine projects as the burns and crippled children's hospitals.

Additional information about Saturday's parade and the four scheduled performances may be obtained by contacting Bill Moler, 1978 Shrine Circus chairman, at 694-6115 or 683-8181. Tickets for the circus will be for sale at the gates before the start of each performance.

# Seating still available for Army band concert

Seating is still available for Saturday night's "Command Revue" in Lee High School auditorium.

"Command Revue," presented here under sponsorship of the Midland Chamber of Commerce, is a program of sight-and-sound featuring the band and chorus of the U.S. Armed Forces Command (FORSCOM).

Highlights of the evening will include musical selections from each decade of the 20th Century, presented by the band and choral ensemble, as well as an audio-visual program presenting the triumphs as well as the hardships encountered by the people of the U.S. during the last 78 years.

Free-admission tickets to the 8 p.m. concert are available at the chamber of commerce offices, 211 N. Colorado St. Subject to availability, tickets may be obtained at the doors before concert time Saturday.

"Buffalo Hunt," a limited-edition bronze sculpture by Allan Houser, is one of numerous sculptures included in a new exhibition in the McCormick Gallery in the Fine Arts Building at Midland College. The collection of works by

some of the Southwest's leading sculptors is from the Shidoni Foundries near Santa Fe, N.M., and is on view to the public at no charge.

# Dance troupe set to instruct and perform

The Rush Dance Company, a vigorous and exciting modern dance troupe, is in Midland this week to conduct master classes in dance and to give a pair of public performances.

The dance events are taking place at Theatre Midland, the new home of Midland Community Theatre at 2000 W. Wadley Ave., as part of MCT's September celebration of the opening of the new \$2.1 million theater structure.

The Rush Dance Company is offering master classes in modern dance to Midland area dancers. The class series will continue through today.

Public performances by the ensemble are scheduled for 8:30 p.m. Friday and Saturday in Theatre One, the 515-seat main theater within Theatre Midland. Tickets for the performances are priced \$3 per person and are now on sale at the theater box office. Seat reservations for either event may be made by telephoning 682-4111.

The Rush ensemble was organized in 1974 by Patrice Regnier, the artistic director of the company. It is a small, tightly-knit, self-managing group of professionals. The five dancers, four of whom attended the Juilliard School in Manhattan, have had training and performance experience with numerous well-known major dance ensembles. They have had strong training in ballet as well as being highly trained in the modern techniques of Jose Limon, Martha Graham and Merce Cunningham. The company has given more than 200 public performances, garnering high critical acclaim in such cities as Detroit, Los Angeles, Denver, Boston, Chicago and New York. The ensemble recently returned from a highly successful tour of West Germany.

The visiting dancers, led by Patrice Regnier, will participate in a lecture-demonstration in Theatre One beginning at 1 p.m. Saturday. The program will be open to the public at no charge.

Two members of the Rush Dance Company of New York rehearse a segment of one of the modern dance works in the company's repertoire. The Rush ensemble will present public programs at 8:30 p.m. Friday and Saturday in Theatre Midland, 2000 W. Wadley Ave. Tickets are on sale at the box office.

# Collection of tapestries now on display in Dallas museum

DALLAS — Two dozen European tapestries from the 15th through the 20th centuries are on exhibition at the Dallas Museum of Fine Arts through Oct. 29.

Selected for quality and diversity, the tapestries in this collection vividly recall the days of kings and castles. In those times tapestries, in addition to warming chilly and drafty baronial halls, were used as books to tell stories, as instruction in religious and social beliefs and, not so incidentally, to advertise the accumulated wealth of their owner.

The Dallas Museum's Center Court, with appropriately towering ceilings and a feeling of openness, has been hung with these woven wall coverings to recreate the costumes and customs,

the art and thought, of some of the great historical periods of Europe.

"Five Centuries of Tapestry: A Selection From the Collection of the Fine Arts Museums of San Francisco," is the title of the new exhibit which was organized by the San Francisco museums under auspices of the American Federation of Arts.

In the earliest of the tapestries, "Rabbit-Hunting with Ferrets," an assorted group of peasants, noblemen, dogs, rabbits and ferrets are busily engaged in the pursuit of the day. The tapestry was woven at Tuouarnal around 1460. The most recent item in the exhibit, titled "California Poppies," was woven as a demonstration at the initial showing of the collection last year

in San Francisco.

Among noteworthy wall hangings in the display which illustrate the variety of styles and subjects are the lavish "May Dance" (Brussels, 1700-1720) and the narrative "Simon the Magician" (Franco-Flemish, 1475); other noteworthy items include the decorative "Scene of A Royal Court" and the dramatic "The Execution of Joan of Arc."

The Dallas Museum of Fine Arts, located in Fair Park, is open to the public at no charge weekdays and Sunday afternoons.

# More spent on news

Copley News Service

According to the Newspaper Advertising Bureau, Inc., Americans spent \$4.3 billion last year to buy newspapers, daily and Sunday.

Canadians spent another \$333.8 million, bringing the total to more than \$4.6 billion in the two countries, a rise of 5.5 percent over the year before.

# MC courses range from climb school to painting

Midland area residents will have an opportunity to learn the basics of the metric system during a non-credit evening course offered through the Department of Community Services at Midland College.

Bryant Saxon, director of Program Development and Research for the Midland Independent School District, will be the class instructor.

In addition to the metric course, 12 other courses ranging from speedwriting to climb school begin at the college the week of Sept. 25.

Judy Morrison demonstrates the techniques of oil painting in a six-week

course meeting from 7 to 10 p.m. on Mondays. Her class is limited to 20 students meeting in room 100 of the O-T Building. The cost for the course is \$18. Classes meet Monday from 7 to 9 p.m. for eight weeks in room 104 of the O-T Building. Course fee is \$18.

Speedwriting I, a system of "ABC" shorthand, is for those who want to learn to take dictation in four weeks. Class instructor is Maxine Jarnagin. The four-week course will meet Mondays and Wednesdays from 7 to 9 p.m. in room 106 of the O-T Building. Course fee is \$16, and books may be purchased in the college

bookstore. The study and analysis of the transactions that take place between people is undertaken in a six-week course directed by Bob Avary. Subjects cover personality, ulterior motives, interaction and life styles that affect our relationships with others. Transactional Analysis classes meet Monday from 7 to 10 p.m. in room 100 of the O-T Building. Class fee is \$21.

Eddie Luce's six-week course in Batik I meets Tuesday from 7 to 10 p.m. in room 104 of the O-T Building. This is an introductory course explaining dyes, designs and waxing techniques. Individuals will be able to complete their own works of art and should call the college for a list of needed supplies. Class is limited to 12 students, and the course fee is \$19.

Up-to-date information on microwave cooking is explained and demonstrated by Linda Cranfill in a one-evening class at the Western State Bank's Community Room. The demonstration will be from 6 to 9 p.m. Tuesday and is limited to 35 students. The fee is \$5.

Mary Garay conducts a six-week course in crocheting with complete instructions in basic techniques. A trip to a stitching shop is included. Course covers a definition of terms, actual stitches, and selection of materials. Crochet I meets Tuesday from 7 to 9 p.m. in room 106 of the O-T Building. The fee is \$12. Students should call the college prior to the first class to obtain a list of needed supplies.

Silkscreen Printing, explained by Marian Ford, includes step-by-step instructions using both photographic and handmade stencils. Students also will learn to construct frames. Classes meet for six weeks on Wednesday from 7 to 10 p.m. in room 104 of the O-T Building. The course fee is \$18, which does not include the cost of materials. Class is limited to 12 students.

Richard Galle's Climb School will meet for three weeks on Wednesday from 7 to 9 p.m. in room 100 of the O-T Building. In-class instruction covers the basics of climbing, rappelling, pitoncraft, belaying and friction climbing. The initial three-week study will be followed by a minimum of six hours devoted to field trips. Course fee is \$14.

Introduction to the Commodity Futures Markets, taught by Douglas Foshagen, explains the uses of futures in speculating on the rise and fall of commodity prices. Forshagen explains the mechanics of trading, market strategies and use of leverage in buying or selling gold and silver. He also discusses interest rates and speculation in cattle and cotton. This is a three-week course meeting on Wednesdays from 7 to 9 p.m. in room 100 of the O-T Building. Course fee is \$8.

Bryant Saxon's five-week Introduction to the Metric System meets Wednesdays from 7 to 9 p.m. in room 106 of the O-T Building. The course introduces the metric measure, methods of converting measurements from one system to another, along with measures of length, area, volume, mass, liquid and temperature. The course fee is \$10.

Complexities and variations of drapery making are explained by Linda Cranfill during a six-week course meeting Thursdays from 7 to 9 p.m. in room 100 of the O-T Building. Students learn to make pinch pleated draperies, cornice boards and how to select fabrics, supplies and equipment. A trip to a local fabric shop is included. Course fee is \$12.

Rosemary White conducts a basic course in bread making which includes yeast breads, cinnamon rolls, and sour dough. Course is limited to 12 students meeting Thursdays from 7 to 9 p.m. for three weeks. Course fee is \$11. Students meet in room 106 of the O-T Building.

The class in Art Appreciation listed in the catalog to begin Wednesday has been cancelled.

Pre-registration for each of the above classes will be in room 140 of the O-T Building between 8 a.m. and 5 p.m. weekdays. The office will remain open during the lunch hour. More information may be obtained by telephoning 684-7851, extension 147 or 216.

## 'Deal' denied in Carter friend's assistance with shopping mall grant

WASHINGTON (AP) — Bill Milliken, a close Carter family friend, got a \$10,000 gift for his youth programs from a businessman he provided assistance in seeking a large federal grant, it was reported today.

Milliken put the businessman, George Zamias, in contact with Richard Fleming, a deputy assistant secretary of the Department of Housing and Urban Development. The Washington Post said in today's editions.

Milliken, who came to the Carters' attention through his programs for poverty-stricken and disturbed young people, acknowledged he asked for and took the donation, The Post said.

Zamias, a Johnstown, Pa. developer, said he gave it, and Fleming said he set up a meeting for Zamias with HUD officials, the newspaper

reported. All denied any wrongdoing. Fleming could not be reached to confirm the report.

Zamias' application for the grant for a shopping mall development in flood-ravaged Johnstown is still pending. It would be the largest grant ever provided

under the HUD action grant program, the newspaper said.

Zamias said he told friends in Pennsylvania he had a "White House connection" helping, but he also said all he really was seeking was access to the HUD bureaucracy, The Post said.

"The toughest thing is getting an appointment," he said. "That's what it's all about." Zamias denied giving the donation in return for the meeting with HUD officials, saying "There was no deal made."

Milliken, a Georgian who often stays at the White House while in Washington, said he frequently asks businessmen for contributions, "but somebody could offer me a million dollars to get an introduction; if I felt it was wrong, I wouldn't do it."

Milliken operates out of the Old Executive Office Building when in Washington, even though he is not on the White House payroll.

Fleming was quoted as saying Milliken did call him about Zamias last spring, and Fleming confirmed he set up a meeting between the developer and other HUD officials.

A White House spokesman refused to comment on the report or on Mrs. Carter's ties to Milliken.

Milliken says his programs have received about \$1.2 million in federal money.

More than one million living in nursing homes

Copley News Service

According to the National Center for Health Statistics, there were approximately 1,287,400 nursing home residents in 18,300 facilities last year.

The median age of residents was 80. Seventy-one percent were female, 58 percent were widowed, and 92 percent of the residents were white.

New birth control formula found

Copley News Service

Swedish researchers say they have discovered a safe new contraceptive for both men and women that is inhaled through the nose.

Sven Johan Niliius, chief researcher at the Uppsala University Hospital, said that although initial tests on women were successful, the contraceptive will not be available to the general public until a few more years of testing are completed.

## Epidemic cholera unlikely

ABBEVILLE, La. (AP) — Despite reports of one confirmed and two suspected cases of epidemic cholera in the Cajun country of south Louisiana, health officials say a large outbreak of the disease is highly improbable.

"We're not looking for an epidemic or a major outbreak" Dr. William Cherry, head of the Louisiana health department, said Wednesday. However, he conceded officials did not know the source of the disease, although cholera bacteria was found in raw sewage in nearby Kaplan.

Cholera bacteria was also found in raw sewage in Abbeville recently after officials confirmed a 44-year-old resident contracted the disease. He has since recovered.

The latest cases were a 52-year-old Abbeville woman and an adult male in Kaplan. Both were recovering, officials said.

Cherry said the two cases have not been confirmed because the state is awaiting tests results on samples taken from the victims and sent to the Center for Disease Control in Atlanta. Confirmation may take a week.

However, he said, the two people had the clinical symptoms of cholera and preliminary laboratory findings pointed to cholera.

Abbeville and Kaplan are about five miles apart in the fertile flatland of south Louisiana about 15 miles from the Gulf of Mexico.

The water in both cities comes from deep wells and health officials said it was not the source of the disease. But in Abbeville, stores were reporting increased sales of bottled water.

"Our bottle water business has tripled and we are having a hard time keeping it," said store manager Bobby Russo.

Eight state investigators and two from the Center for Disease Control were in the area trying to isolate the bacteria.

## Business, labor unions engaged in all-out fight

By JOHN CUNIFF AP Business Analyst

NEW YORK (AP) — While not forsaking the immediate battlefield of wage-price negotiations, business and labor are now struggling with each other over more far-reaching and consequential issues.

The battle is little less than an effort by each to tilt the entire political and economic system into a position more favorable to its credos, and each is using all the muscle it can muster.

Labor's most conspicuous thrust has been in forcing resignations from the board of J.P. Stevens & Co., which the Amalgamated Clothing & Textile Workers says has denied workers "social and economic justice."

With increasingly large investment and savings portfolios, unions also have threatened to withdraw millions of dollars from Manufacturers Hanover Bank, one of whose officers sat on the Stevens board.

Equally aggressive, business has stepped up its lobbying efforts, defeating labor, for example, on measures involving union picketing and right to work laws, and lessening the size of a minimum wage increase.

The new battlelines are based on philosophical bias and brute power. Both say their ideologies embrace the true essence of America. But to sell their views they argue on organization, numbers and money.

Each is highly aware of the new and renewed efforts to influence not just the immediate and surface issues, but the basic, philosophical approach of Americans to their system.

The lead story in a recent edition of AFL-CIO News carried the headline "Union Counterattacks Hits Rising Right-Wing Threat," and told of a drive, as one unionist put it, "to get rid of the unions."

In The Federationist, an AFL-CIO magazine, Arch Puddington, executive director of the League for Industrial Democracy, maintains the renewed conflicts result partly from a decline in political party loyalty.

"... whole series of cause groups of both left and right have moved in to fill the vacuum, the New Right being prominent among them," he comments.

The various business and right wing groups sometimes explain the phenomenon differently.

They argue, for example, that union power has led the country toward socialism, big spending, taxes, inflation and destructive federal regulation, and they insist on a return to more free enterprise.

As expected, the U.S. Chamber of Commerce and its lobbying foundation, and more stridently, the National Association of Manufacturers, are in the forefront of the back to basics effort.

Under Richard Lesher, the chamber has been transformed into a vigorous and immensely more assertive organization that fights with every legitimate tool available, both on Capitol Hill and in local forums.

But less obvious names, such as the Business Roundtable, made up of corporation chairmen and presidents, and various fringe operations, such as Americans Against Union Control of Government, are involved.

Separately, executives inclined in recent years to deliver innocuous speeches are now speaking forcefully for their point of view, their most common theme being the "threat to the American way of life."

Perhaps the only distinct, major area of economic agreement between the two sides — and it isn't solid — is on the matter of wage-price controls, which generally are viewed as intrusions.

While the business viewpoint — less Washington involvement, more free enterprise, lower taxes, more capital incentives — is currently in vogue, labor possesses in its pension funds a powerful counterforce.

These funds aggregate hundreds of billions of dollars, and while their control generally rests with corporate officials, labor might be expected increasingly to insist on an additional say in their use.

In the long run, that would seem to mean labor would have greater financial clout in its campaigns. Workers might, for instance, insist that recalcitrant companies be ruled out as investment possibilities.

Ironically, some observe, it might also force business and labor to limit disputes because of their mutual interests — business' need for capital, and labor's ability to provide it through deferred wages.

But for the time being they're fighting, and perhaps on a far more basic, ideological basis than they have in decades.

Soviets begin massive mobilization for search

TULSA, Okla.—The Soviet Union has begun a massive mobilization of equipment and workers to avert a seemingly inevitable oil production decline during the 1980s, the Oil & Gas Journal reports.

The main objective is to increase drilling in Western Siberia's Tyumen Province, where production far outstrips all other oil and gas areas of the USSR.

Soviet news media are promoting a nationwide "Socialist competition" campaign calling on factories to "deliver western Siberia's orders ahead of schedule, with high-quality workmanship."

Besides giving Tyumen top priority for new exploration, drilling, pipeline and production equipment, Russia is transferring to western Siberia many drilling and rig building crews that previously worked in the nation's Volga-Ural and other older petroleum provinces.

The mobilization is taking place at an almost frantic pace for a simple reason: Oil output by the world's No. 1 producer is about to reach a plateau.

It has become virtually impossible for Russia to reach even the lower limits of its 1980 crude-plus-condensate goal of 12.4 million to 12.8 million barrels a day.

At best, production will be in the range of 12 million to 12.2 million barrels a day, the Journal predicts. Accelerated development of western Siberian fields may slow the decline in Soviet oil output growth during the next two years, but it will take big discoveries to prevent a sharp drop by 1985.

A minimum decline of 1 million to 1.5 million barrels a day is shaping up for 1981-85, the Journal says. That would put the USSR's crude-plus-condensate output below 11 million barrels a day and well under the July 1978 level of 11.445 million barrels a day.

Conversely, gas flow is exceeding goals and is expected to equal or surpass the official 1980 target of nearly 15.36 trillion cubic feet. Output is expected to increase by at least 1 trillion cubic feet a year through 1985 and probably into the 1990s, the Journal reports.

The gas share in total Soviet fuel production increased from 23.1 percent in 1976 to 24 percent in 1977 and is expected to continue upward through the 1980s. On an equivalent basis, gas production is likely to come close to oil output by 1985.

Western Siberia, led by the super-giant Samotlor field discovered in 1965, has been offsetting declining production from other regions since 1976. During that year, western Siberia provided a 674,000 barrels a day gain, while the nationwide output gain was only 576,000 barrels a day.

Last year, western Siberia production increased by 732,000 barrels a day. Areas other than western Siberia had a production drop of 204,000 barrels a day.

This year's plan calls for a total nationwide crude-plus-condensate hike of 580,000 barrels a day, which most sources say will not be met by a wide margin. Western Siberia has been called upon to raise output by 714,000 barrels a day, which the Journal says it may approach.

Other areas are expected to lose 134,000 barrels a day output. The Journal expects a considerably larger production decline in these areas.

Executives summoned

TAMPA, Fla. (AP) — Seven executives from Florida and Texas have been summoned to federal court to face charges that they tried to manipulate the price of oil sold to Florida Power Corp. during the country's energy crisis four years ago.

Two former Florida Power officials, including its ex-president, four oilmen from Houston, Texas, and a dealer now living in Fort Myers, were scheduled to be arraigned today on conspiracy and fraud charges returned by a federal grand jury here one week ago.

Angel Perez, 70, former Florida Power president and board chairman, remained free on \$15,000 signature bond following his surrender last Thursday on a single charge of conspiracy which carries a maximum five-year sentence.

Richard Raymond, 63, retired vice president of the St. Petersburg-based utility, and Walter L. Ballard, 56, a Houston oilman now living in Fort Myers, are free on bonds of \$50,000 apiece.

Both are named in all 12 charges of conspiracy, mail fraud and fraud by wire and face 60 years in jail if convicted on all counts.

Also indicted were James B. Clark, president of Larcon Petroleum Corp. of Houston; Ronald Pruitt, 36, a Houston attorney and part owner of Larcon Petroleum Inc.; John L. Burns, 50, a former executive with the Charter International Oil Corp. of Houston and Ray Graniund, 73, a Houston-based oil broker.

Ballard was a former officer of Signal Oil and Gas Co. of Houston. The 12-count indictment culminated an eight-month investigation into allegations of daisy-chaining following the 1973-74 Arab oil embargo. Daisy-chaining is a process whereby goods change hands several times between companies with the price increasing each time before the product gets to its destination.

Prosecutors contend that Florida Power customers paid millions of dollars in overcharges in the form of fuel adjustments on monthly utility bills.

No dollar amount was specified in the six-page indictment, but investigators have estimated it to be around \$8.5 million. Florida Power serves 690,000 customers in a 32-county area of west Florida.

Scheduled as No. 1-39 Powell, it is 660 feet from north and west lines of section 39, block A, HE&WT survey. Ground elevation is 2,373 feet.

The location also is two miles southwest of the W.J.B. (Canyon gas) field.

The Estate of Alvin C. Hope of San Antonio announced plans to re-enter an old Ellenburger well and attempt completion as a 1/2-mile extension to Canyon sand oil production in the Lake Trammell, West multipay field of Nolan County.

The project is No. 3 Arthur S. Frymire, 2,025 feet from south and 1,050 feet from west lines of section 80, block 22, T&P survey.

It will be gested above 5,260 feet. The total depth is 6,769 feet.

WARD TEST Union Texas Petroleum Corp. of Midland No. 1-18-20 University is to be drilled as an 11,500-foot operation in the War-Wink, South (Wolfcamp) area of Ward County, 7.5 miles west of Poyte.

It is 933 feet from south and east lines of section 20, block 18, University Lands survey.

Natural gas bill's fate in House may be cloudy

WASHINGTON (AP) — The natural-gas bill backed by the White House may be cruising toward a Senate victory but its fate in the House remains cloudy, according to a top supporter of the plan.

Rep. Philip Sharp, D-Ind., says the proposal to lift price controls on newly discovered gas by 1985 may face more difficulty in the House than previously expected.

Sharp, one of the drafters of the gas-pricing compromise, was selected this week by House Speaker Thomas P. O'Neill to head the effort to drum up House support for the plan.

"We consider that we have a major battle ahead of us," Sharp said in an interview. He said the same type of all-out lobbying campaign waged in the Senate must be repeated in the House if the bill is to survive.

Sharp said that just because the House readily approved an earlier version of Carter's energy program in 1977 does not necessarily mean it will deliver a repeat performance once it gets the natural gas bill from the Senate.

"Certainly no one wants to take anything for granted," he said. "We'd be foolish if we did." He noted that the same coalition of conservative Republicans and consumer-oriented liberals opposing the bill in the Senate are working to defeat it in the House.

Sharp said that the House is now about evenly divided on the natural gas issue. With this in mind, the White House has already begun its sales pitch to House members.

"There is no overconfidence on the part of this administration," agreed Jim Bishop, a spokesman for Energy Secretary James R. Schlesinger.

Bishop said there have been a number of White House breakfasts with House members aimed at winning votes for the bill.

"We're in for a lot of hard work. I think everyone recognizes that," Bishop said.

Meanwhile, Senate supporters of the deregulation bill — which President Carter claims is vital to the nation's energy future — say they now have enough votes to pass the measure in a vote set for next Wednesday.

Although the plan faced stiff initial opposition in the Senate, a heavy lobbying campaign orchestrated by the White House managed to turn things around — producing a 20-vote margin of victory for the administration.

Helping the gas bill's chances is the House decision to lump it together with a number of relatively popular parts of Carter's energy plan for a single vote, Sharp said.

Opponents concede this will present a parliamentary problem that will be difficult for them to overcome: making it impossible to vote against gas deregulation without toppling other parts of the energy package.

Subsidiary organized HOUSTON (AP) — A new subsidiary has been formed by Coastal States Gas Corp. to search for new natural gas supplies.

New supplies found by Border Exploration Co. would be offered to Lovaca Gathering Co. if an out-of-court agreement is finalized for settlement of \$1.6 billion in damage suits filed against Lovaca by some of its customers.

17 wildcats find crude

AUSTIN, Texas (AP) — Seventeen wildcat oil wells, including seven in west central Texas, were drilled in the state during the first half of September, the railroad commission reported Tuesday.

The other oil discoveries included two each in south and north Texas and one each in southeast Texas, east central Texas, and the Refugio, Midland, San Angelo and Panhandle areas.

Sixty-one gas discoveries were made from Sept. 1 through Sept. 15, including 23 in south Texas; 13 in west central Texas; nine near Refugio; five in southeast Texas; two each in east Texas, east central Texas and the San Antonio and Panhandle areas; and one each in north Texas and near San Angelo and Midland.

A total of 286 oil wells were completed in the first half of September, 10 more than in the same period a year ago. There were 268 gas well completions, 133 more than in the first half of September 1977.

The commission said 85 dry holes were drilled in the two-week period.

API raps land plan TUCSON, Ariz. (AP) — Proposals to set millions of acres of western lands aside as wilderness and other preserves have been criticized by the head of the American Petroleum Institute, who says public lands are needed to develop energy resources.

"How ironic it is that at a time when the United States should be expanding opportunities to develop more domestic energy, proposals are being made to close the doors on those opportunities," Frank Ikarid said Wednesday.

Ikarid was referring to plans to set aside 62 million acres of land in Montana, Idaho, Wyoming and Utah and another 170 million acres in Alaska and 11 western states.

If those lands are tapped, America could produce 75 percent of its oil needs, he said.

"Just at a time that we ought to have flexible, balanced policies to serve the diversity of interests in our nation, policies are being developed to serve an area of narrow interest," he said.

Fasken sets Gaines test David Fasken of Midland No. 1-215 Patricia A. Jones has been spotted in the east side of the Hanford (San Andres) field of Gaines County, six miles north of Seminole.

The 5,500-foot test is 467 feet from north and 1,667 feet from east lines of section 215, block G, WTRR survey.

LONDON (AP) — A government investigator has accused Britain's two big oil companies, British Petroleum and Shell, of violating the trade sanctions against Rhodesia for years.

Lawyer Thomas Bingham also says the successive governments of Laborite Harold Wilson and Conservative Edward Heath condoned the companies' actions, although this was due to ignorance of what was going on. But he says the governments could and should have learned what was going on.

Extracts from Bingham's documented 600-page report were shown to The Associated Press in advance of publication by the Foreign Office later today. The findings in an 18-month probe seem certain to stir an international storm.

Bingham reports that Shell and BP, which is 51 percent state-owned, delivered more than 14 million barrels of oil and oil products, directly or indirectly through affiliates in South Africa or then-Portuguese Mozambique, to Rhodesia between 1966 and 1975.

DRILLING REPORT

CHAVES COUNTY Permian Oil Corp. No. 1-C Bar, drilling 1,200 feet.

CONCHO COUNTY Union Texas No. 12 Slaughter, drilling 4,000 feet in lime.

MARTIN COUNTY MGF No. 1-38 Burns, 4,700 feet, waiting on completion.

MIDLAND COUNTY Union Texas No. 1-18-20 University, 11,500 feet, waiting on cement.

REAGAN COUNTY The Hanley Co. No. 2-10-10-A University, shut in; fractured, lower Spraberry perforations at 8,817-8,902 feet, with 30,000 gallons.

WINKLER COUNTY Texas Pacific No. 1 Walton, 4,200 feet, preparing to perforate.

WARRANT COUNTY Tomlinson, North American and Warren American No. 1 Sullivan, 4,200 feet, in dolomite and shale, circulating.

Oil companies accused

LONDON (AP) — A government investigator has accused Britain's two big oil companies, British Petroleum and Shell, of violating the trade sanctions against Rhodesia for years.

Lawyer Thomas Bingham also says the successive governments of Laborite Harold Wilson and Conservative Edward Heath condoned the companies' actions, although this was due to ignorance of what was going on. But he says the governments could and should have learned what was going on.

Extracts from Bingham's documented 600-page report were shown to The Associated Press in advance of publication by the Foreign Office later today. The findings in an 18-month probe seem certain to stir an international storm.

Bingham reports that Shell and BP, which is 51 percent state-owned, delivered more than 14 million barrels of oil and oil products, directly or indirectly through affiliates in South Africa or then-Portuguese Mozambique, to Rhodesia between 1966 and 1975.

This was after Prime Minister Ian Smith's 1965 declaration of Rhodesian independence to block British plans for black-majority rule and the invoking of financial and economic sanctions by Wilson's Labor government.

By 1967, the report continues, the British government began to suspect that oil from British companies was being diverted to Rhodesia through what Wilson later described as "dubious dealers." As a result, Shell and BP through a jointly owned subsidiary in Mozambique made a deal with Total, which is backed by the French government, about February 1968.

Total took over the Shell-BP orders from Rhodesia, and Shell-BP delivered a matching quantity of oil to

points designated by Total. The two British companies advised the Wilson government of the swap. It accepted the arrangement, Bingham said, because South Africa had become a staging point for the swaps, and the British government had wished to confront or offend South Africa, one of its best trading partners.

Meanwhile, the Wilson government had led a successful campaign in the United Nations for global sanctions against Rhodesia, and a British frigate was patrolling the Mozambique Channel to stop oil from reaching the pipeline to Rhodesia at the port of Beira.

But nothing was done to stop tankers unloading at Lourenco Marques, Mozambique's capital, where the oil was shipped to Rhodesia by rail via South Africa or by road.

The swap deal between the British and French companies was replaced in the early 1970s with one involving South African intermediaries, Bingham reported. He said Rhodesia's consumption of oil was nearly 3 million barrels a year when it broke from Britain in 1965, and in the past few years it has been nearly double that.

Executives of BP and Shell in London have claimed they could not get full details of their South African affiliates' operations because of South African legal requirements. But Bingham says certain officials clearly knew what was going on.

Bingham strongly criticizes Shell's South African manager Louis Walker for not fully informing his London chiefs between 1966 and 1968 of what was going on. This, says Bingham, accounts for the oil companies' headquarters and the government misunderstanding how the Rhodesians were obtaining their fuel and for their adoption "unwittingly of false positions."

Explorer site staked

McClellan Oil Corp. of Roswell, N. M., announced location for a 2,400-foot wildcat in Chaves County, N. M., 16 miles southeast of Hagerman.

It is No. 1 M&M State, 1,980 feet from south and 990 feet from west lines of section 32-15s-29e and one and one-quarter miles southeast of the Round Tank (Queen gas) pool. It also is 3.5 miles northwest of the Henshaw (Grauburg) oil pool.

EDDY TEST Yates Petroleum Corp. No. 1 J. E. Lanning Community is a new 8,800-foot project in the Eagle Creek, East (Atoka-Strawn) pool of Eddy County, one mile west of Atoka.

The location is 660 feet from north and 2,310 feet from east lines of section 7-18s-26e.

Operators have announced locations for wildcat explorations in Gaines, Scurry, Schleicher and Runnels counties.

Forest Oil Corp. announced location for a 13,000-foot wildcat in Gaines County, 17.5 miles east of Seminole.

It is No. 1 Blue Quail, 1,980 feet from north and 860 feet from east lines of section 25, block C-30, psf survey. Ground elevation is 3,103 feet.

The project is one location south of I. W. Lovelady of Midland No. 1 Doss, active wildcat now pumping to test.

The No. 1 Doss pumped 184.75 barrels of oil and 135 barrels of water during the last 24 hours of testing reported. The fluid is coming from the open hole section at 12,846 to 12,852 feet.

It is 2.5 miles southwest of the Howland, South (Siluro-Devonian) field.

SCURRY WILDCAT Texas Drilling Co. of Abilene No. 1 J. W. Byrd will be drilled as a 3,500-foot wildcat in Scurry County.

It is one mile south of Dune and one and one-quarter miles east of the Sharron Ridge area.

Wildcat sites reported in West Texas areas

Operators have announced locations for wildcat explorations in Gaines, Scurry, Schleicher and Runnels counties.

# Oil, gas operators spot 157 Basin area projects

Scheduled petroleum exploration and development in the Permian Basin rose last week to 157 projects. Two weeks ago there were applications filed with regulatory bodies for 59 tests.

The count last week included 28 wildcats and 129 pool projects. Leading in exploration was Texas Railroad Commission District 8 (Midland) with nine planned tests followed by District 7-C (San Angelo) with six District 8-A (Lubbock), with five and Southeast New Mexico, with four.

There were 60 development applications filed at the Midland RRC office, while 28 pool applications were filed in San Angelo and the Lubbock office processed 21.
