Khomeini planning return to Iran

TEHRAN, Iran (AP) — Ayatullah Khomeini reportedly told his follow ers in Iran Saturday he will end his 14-year exile Friday and return to Iran to build an Islamic republic and directly challenge the government installed by the shah.

Prime Minister Shahpour Bakhtiar "has only the military now, and that's not 100 percent," said a Bakhtiar associate.

Tehran Radio reported new political violence Saturday in the southwest oil center of Ahwaz, where 30 died or were injured last week. In the capital, more than 1,000 persons shouting "Hail to Khomeini!" peacefully marched near Tehran University, one day after pro-Khomeini

marches by millions throughout the nation.

There were new signs of a split in the military between pro- and antishah factions, and of growing divisions in the ranks of the political and religious opposition to the "vacationing" shah.

Officials at Khomeini's headquarters in suburban Paris said the 78year-old leader would return to Iran Friday and had so informed his followers there. A formal announcement was expected Sunday.

Earlier in the day, Khomeini issued a statement, saying, "I will join you very soon. With God's help, I will be in your service in a matter of days.

Khomeini was forced into exile by

Shah Mohammad Reza Pahlavi in 1964, and last year he rejected the shah's offer to return.

Ibrahim Yazdi, an aide to the Moslem religious leader, said preparations were being made for Khomeini to return some time next week, but he would not be more specific. Khomeini was forced into exile by Shah Mohammad Reza Pahlavi in 1964, and last year he rejected the shah's offer to return.

Yazdi said Khomeini may soon announce a five-man Revolutionary Council for the transition to an Islamic republic. Yazdi said he foresaw participation of members of the National Front, the political opposition to the shah, in a future government.

The Tehran newspaper Kayhan quoted a "reliable source" as saying Karim Sanjaby agreed to step down temporarily as chief of the Front so he can join the Revolutionary Council. The report said Khomeini insisted members of the Council belong to no political organization.

But a National Front spokesman said he had "no information at all on this report" and said he thought it was not true

In his statement, Khomeini repeated his call for resignation of the Regency Council appointed by the shah to rule in his absence and of the Iranian Parliament to pave the way for the "legitimate" government.

The Bakhtiar associate, who asked

not to be identified, conceded the Khomeini "does not have a high opinion of the Bakhtiar government." He said the Moslem leader's return "will be a serious problem."

Bakhtiar said in an interview on French television he did not doubt the loyalty of the military as long as a legal government - meaning his was in place.

But he suggested the army might feel differently if Khomeini takes over. "The day when I will no longer be there, I don't know," Bakhtiar said.

It was unclear what response Iran's 430,000-man armed forces would have

Hoboken fire kills at least 18 persons

HOBOKEN, N.J. (AP) - A fire of suspicious origin raged through a five-story apartment building in Hoboken's waterfront district Saturday, killing at least 18 persons and injuring 19 others in a firestorm of collapsing brick and timber, authorities said.

Rescue workers used a crane to search for three missing persons before calling off for the night their grim hunt through rubble caused by the collapse of the roof and two top stories

The search for victims lasted about 19 hours after the fire was reported early in the morning.

"There's no reason to believe the missing are not dead," said Joseph Lecowitch, executive director of the Hudson County Red Cross.

"It was an inferno. It was

Midland: Capital City of the great Permian Basin

Midland looms out of the flat West Texas plains, its skyline reflecting major changes during 1978. The Tall City enters 1979 with

many goals reached, new records set and important challenges ahead for Midland and its people.

fire for fatalities I've seen in my 30 years on the force," said Deputy Fire **Chief Francis Hunsinger**

"The bodies were pretty well mangled because of the roof collapse. Many of the extremities were burned off It was a real mess," Hunsinger said

At least five children were among those killed, authorities said

Administrator Sally Suarez of St. Mary's Hospital said 14 persons, including two police officers and one firefighter, were treated and released and five others were admitted.

Police Chief George Crimmins said "it was pretty well confirmed that it was arson." He said an unspecified accelerant, a substance used to fuel fire, was found in a first-floor hallway, where the fire was believed to have started

We are suspecting arson because of the location of the start of the fire ... and the rapidity with which the fire spread," said city Fire Marshal Ray Falco

Another year of progress for Midland

By LINDA HILL **R-T Staff Writer**

Midland community leaders spelled 1978 PROGRESS

Record value for building permits and bank deposits set the pace for another year of economic expansion

in the Tall City Several community projects moved closer to reality during the year.

3 50 Most Midlanders probably didn't need to look at the figures to tell that office space in the city is increasing at a phenomenal rate. In fact, during 1978. Midland passed the three million mark in square feet of central business district (downtown) office space. That pushed it ahead of Fort Worth in that regard

In practical terms, the growth meant shifting traffic barricades downtown and a more dense skyline Among the major projects which

began downtown during the year were the Gibraltar Savings and Loan Association Tower and an addition to the Midland Hilton.

Work continued at a rapid rate on expansion of The First National Bank Building.

Toward the end of the year, work began on the long awaited downtown Exhibit Building, approved almost exactly two years before by Midland voters. The new facility will give Midland a place to host larger conventions and exhibits than now is possible, as well as providing a spot for many local civic and business events.

WORK ALSO CONTINUES on the expansion and renovation of Midland Memorial Hospital Among other projects started dur-

ing 1978 are the 12 story W.C. Blanks Building, the four story John L. Cox. Building and the multi-story Marathon Oil Co. Building

But 1978 also was a year of finished projects. Both the Midland College. Chaparral Center and the Midland Community Theatre's new Theatre Midland opened for business during the year

Chaparral Center has been the site of a wide variety of performers, from Ted Nugent to Bert Bacharach to Kris Kristoferson But the versatile build ing also is home court for the college high school graduation ceremonies.

permorama "progress in the permian basin"

Earlier in the year, the college opened its new Fine Arts Building. A lobby art gallery has been the site of

basketball team, and will be used for numerous exhibits, and a fine small a variety of other functions, such as auditorium serves as concert hall and meeting place.

The Community Theatre also is making good use of its new home. providing the city everything from movies to children's plays to musicals

Among other projects completed in 1978 were the Hunt Energy Building, the Sun Building and One Marienfeld Place

And, of course, apartment buildings, other office buildings and houses are springing up throughout the city

In terms of building permits, 1978 was a record year, which has come to be less than unusual in Midland.

At \$86,935,762, the total for 1978 was \$24 million above the 1977 mark, although the number of permits actually was down slightly.

The year also was one of future projects. School board members were in the talking stage on planned future expansion of Midland High School.

A MAJOR INDUSTRIAL contribu-(See 1978, Page 4A)

W.C. Thomas is new publisher of Midland Reporter-Telegram

William C. Thomas has been named President and Publisher of The Midland Reporter-Telegram and the Plainview Daily Herald, effective today.

The appointment was an nounced by Frank A. Bennack Jr. President of the Hearst Corporation, and Robert J. Danzig. Vice President and General Manager of newspapers.

In making the announcement, Mr. Bennack and Mr. Danzig said, "Bill Thomas has a distinguished background as a journalism professional and 10-year Texas newspaper executive.

"He brings a fine record of community leadership to his

role as chief executive of these two premier newspapers.

Mr. Thomas, 52, was born in Chicago, Ill., and began his newspaper career with the St. Petersburg, Florida Times in 1946 after having served in the U.S. Naval Air Corps.

After participating in the Times' extensive management training program, he became the newspaper's bureau manager in Clearwater, Fla., in 1955 and established the Upper Suncoast Edition for the Times.

In 1960, he left to become vice president and advertising director for the Bristol, Va., Tenn., Herald Courier and Virginia

William C. Thomas

In 1968, following a merger of

the Miami newspapers, Mr. Thomas joined The San Antonio

New Zealanders to visit Midland as Rotary guests

A team of young people from New Zealand will be in District 573, Rotary International, this week as guests of Rotarians of Midland and four other cities in the West Texas district.

The four young men and two young women included in the party are members and leaders of Rotaract Clubs in Auckland, New Zealand. They are accompanied by Rotarian Tony Williams of Auckland.

They are scheduled to arrive in Amarillo today, after having spent the last week in New Mexico. In addition to Midland and Amarillo, they are scheduled to visit Rotary Clubs and groups at Lubbock. Lamesa and Odessa

Camal Dakil of Midland, district Rotaract chairman, is a member of the West Texas arrangements committee. Other members include District Gov. Louis Rochester of Odessa; Eugene Blasdell of Amarillo, and Rex Webster of Lubbock, a former vice president of Rotary International.

The purpose of the visit is to encourage the formation of Interact and Rotaract clubs in Rotary districts in the Southwest. Rotaract and Interact are part of the Program of Rotary International and are very active in Australia and New Zealand. The tour is being sponsored by the Rotaract

WEATHER SUMMARY

Rain is due along the northern Pacific coast, tapering into snow and snow flurries inland. More snow is expected from the central Mississippi Valley through the Lakes area, where it will blend into rain in the Northeast. (AP Laserphoto Map)

A large area of heavy cloudiness extending from the lower Mississippi Valley northwestward into New England is seen in a satellite cloud photo recorded Saturday afternoon. Lower clouds extend from the upper Midwest into Missouri, a frontal band stretches from the Dakotas to Kansas, parts of Texas and Oklahoma are cloud covered and snow cover can be seen from the Rockies to the West Coast. (AP Laserphoto)

Davis deadlock remains unbroken

HOUSTON (AP) - Jurors voted three times Saturday but failed to break the 8-4 deadlock that threatens a mistrial in the marathon Cullen Davis murder-conpiracy case.

Trial Judge Wallace Moore told the panel of seven men and five women to return at 9 a.m. Sunday to resume its efforts to reach a verdict. A total of nine votes has been taken with no crack in the 8-4 impasse.

Moore said the jury would deliberate only until 1 p.m. Sunday and then adjorn to watch the Super Bowl with millions of other American television viewers

With the specter of a hung jury hovering over the proceedings, defense lawyer Phil Burleson declared:

"They've now taken nine votes and they're still 8-4. They listened to all the tapes today and they're still not budging. That's encouraging because the tapes are the state's case." Earlier, Judge Moore torpedoed a

fleet of defense objections, and once again lead defense lawyer Richard 'Racehorse'' Haynes re-entered his motion for a mistrial

The judge denied the request. Haynes also argued vigorously but in vain to stop Moore from permitting jurors to listen to state tapes in the privacy of the jury room.

And he suggested additionally that the sanctity of the jury room might be in jeopardy.

He said prosecutors using the bathroom in the judge's chambers can overhear the secret jury discussions. Moore wearily asked state attorneys to use other restroom facilities.

The flurry of activity came on the heels of Friday's disclosure that the jurors appeared hopelessly deadocked and unable to reach a verdict.

They said they were split 8-4 and that there had been no change in the vote since their first ballot Wednesday morning. Jurors got the case **Tuesday** night

Moore said he did not want to see the 12 weeks of proceedings go down the drain without an additional attempt to reach a verdict.

The judge did not ask the panel to reveal whether the majority voted to convict or acquit, but the tenor of Saturday's proceedings indicated both sides believed the eight favored conviction.

-Davis, 45, the Fort Worth industrialist, went on trial Oct. 30, accused of plotting the murder of the judge presiding over his bitter divorce case.

The state based its case on tape-recorded conversations last August between Davis and FBI informant" David McCrory, 40, the state's key witness

The two met on the parking lot of a Fort Worth restaurant and discussed the contract killing of Judge Joe Eid-

Relief from Saturday's dust,

son and others. FBI agents secretly videotaped the Aug. 20 rendezvous and arrested Davis minutes later. The defendant maintained he was

framed. Before retiring Friday, the jury said it wanted to hear the Aug. 18, tape again and asked permission to take notes. The defense objected to

any note taking. Moore decided, over defense objections, to allow the jurors to listen to

the tape and several recorded telephone conversations in the jury room.

Because of legal technicalities, they were not given the Aug. 20 tape. But if they want to hear it again they can do so in open court.

Haynes argued futilely that the tapes are not evidence, but testimony, and that it was improper to take them into the jury room.

He complained also about the pres-

ence of Judge Eidson in Judge Moore's chambers. He said jurors might be prejudiced by seeing Moore and Eidson together.

"I don't know whether the tension is getting to the defense lawyers or if they are acting out of desperation," prosecutor Jack Strickland said of the objections.

'They're more non-issues that have been blown up by the defense into issues.

Inauguration of Tennessee's new

governor appears 'anti-climactic'

By BILL RAWLINS

NASHVILLE, Tenn. (AP) - Republican Lamar Alexander, who had already become Tennessee's governor in an attempt to head off the release of more state prisoners, was officially inaugurated Saturday.

The 38-year-old Alexander, who had snatched the office away from Democrat Ray Blanton four days earlier, called on citizens to "go the extra mile to put the agony and the anger behind us.

But Saturday's inauguration of the Volunteer State's 45th governor was anti-climatic

The torch had been passed - or rather, snatched - at 5:56 p.m. last Wednesday

"It could be called a ceremonial impeachment," said Lt. Gov. John S. Wilder, a Democrat: Alexander, soundly defeated by

Blanton in 1974 in the wake of former President Richard Nixon's Watergate scandal, was quietly whisked into power by a coalition of Democratic leaders.

Before a suprised gathering of supporters and reporters, Alexander took the oath of office in the state Supreme Court hearing room, three days ahead of Saturday's inauguration, which proceeded on schedule

The action, unprecedented in Tennessee's 192 years, followed by less than two days a Monday night clemency spree in Blanton's Capitol office in which he granted three pardons and reduced the sentences of 49 prisoners, making 30, including 17 serving long terms for murder, eligible for immediate, unsupervised freedom.

Exactly a month earlier, the FBI had arrested two members of Blanton's legal staff and a veteran highway patrolman who was a friend of Blanton's brother. All three were charged with extortion and conspiracy to sell pardons, commutations and

other forms of executive clemency. Alexander's oath of allegiance turned Blanton out of office and stripped him of his power to pardon without warning. Attorney General William Leech called Blanton to tell him he could watch his ouster on the 6 o'clock news.

During his four-year term, Blan-

warmer temperatures forecast

Saturday was a foreshadowing of a typical West Texas spring day, with the weekly sandstorm blowing through the Permian Basin.

But today should bring residents' sinuses some relief, as the weatherman is calling for a fair day with winds mercifully at only 5 to 10 mph. Winds peaked at 58 mph early Saturday with the average gust falling below that.

Dust reduced visibility to one mile at times during the day, according to the National Weather Service at Mid-

land Regional Airport. "This was one of the worst sandstorms we've had this season," the weatherman commented

A spokesman in Lamesa also described it as one of the worst dust

storms "in quite some time." By 8 p.m. the winds were fairly calm and the dust was settling, the weatherman said, though a reddish glow lingered in the dark.

Forecast for the Midland-Odessa area calls for a high today in the upper 50s, with the low tonight to be near 30. High Monday should be in the middle 60s. Winds should be northwesterly at 5 to 15 mph today.

The Big Spring-Andrews area has a slightly different forecast, with the high to be in the middle 50s today and the low tonight in the upper 20s. High Monday should be in the lower 60s. Northwesterly winds will be at 10 to 15 mph today.

High Saturday was 49 degrees, a chilly drop from the record 75 degrees for that date set in 1959.

Overnight low was 35 degrees. Rec-

ord low for Jan. 21 is 5 degrees set in 1966.

No precipitation has been recorded in the past 24 hours, the weatherman said. Total for the year still stands at .12 inch.

A fast-moving cold front zipped through Texas Saturday, dumping rain and ending a string of fairly balmy days.

Rain mixed with some snow and sleet fell from Gainesville to Abilene and fog darkened much of North Texas before sunshine broke through in the early afternoon.

Most of the state was under cloudy to partly cloudy skies.

Rainfalls were generally light, but one station in Northeast Texas reported more than two inches

Temperatures dropped behind the front, with extremes ranging from 32 at Amarillo to 68 at Brownsville.

Forecasts called for scattered snow and sleet in North Texas, with cold overnight temperatures. Somewhat milder readings were expected Sunday across the state.

Chamber head to assume post

STANTON - Ronnie Christian, assistant manager of Cap Rock Electric Cooperative, will take over as president of the Martin County Chamber of Commerce during the organization's annual banquet at 7 p.m. Monday night in the community center here

Weatherby said he receives \$20 a month, in addition to his sheriff's salary, for holding the second position.

Two hospitalized after accident

Two Midlanders were listed in satisfactory condition Saturday in Midland Memorial Hospital from injuries received Friday in a two-car accident

Admitted to the hospital were Eleanor King Greer, 44, 3817 W. Kansas Ave., and Jimmy Whitmire, 25, of Midland.

According to Midland police, Ms. Greer was driving west on Andrews Highway about 9:18 p.m. Friday. John William Moran was driving east on Andrews Highway, and the two vehicles collided in the 4100 block, police said.

Moran was treated at Midland Memorial for his injuries and released, said hospital personnel.

School textbook previews possible

Anyone interested in looking over textbooks being considered for use in the Midland public schools may make an appointment to view or check out the books by visiting Bill Cormack, coordinator of textbook adoptions at 702-N. N St., or calling 682-8611.

A public hearing for comments on the books is scheduled at 7:30 p.m. Feb. 8 in the Sam Houston Elementary School cafeteria.

Any citizen wishing to appear at the hearing must notify the superinten-dent of schools in writing by Feb. 1.

Space agency

pinpoints failure Sears WASHINGTON (AP) - The space agency said

Saturday it has pinpoint-

West Texas growth to be solid for 50-year span, says planner

BIG SPRING — The upswing of activity in the oil industry has set in motion growth trends which will continue for the next 50 years in West Texas, according to Dr. Howard W. Grubb, director of the planning division of the Texas Department of Water Resources.

Grubb, speaking in Austin last week, was defending population projections set forth by his division on which engineers have based the Colora8do River Municipal Water District's application for a 554,000-acrefoot lake at Stacy, located 25 miles southeast of Ballinger.

Following almost 50 days of testimony, the Texas Water Commission is pushing to close hearings on the application, and that may be accomplished early this week in Austin.

Written briefs then will be due by Feb. 9, and at 9 a.m. on Feb. 16 the water commissioners will ask attorneys about points in the briefs. O.H.

Late registration continues at MC

"More than 2,000 students have registered, and more are still coming in," Midland College registrar Dee Widsor announced early Friday afternoon as late registration for the spring semester continued.

Classes began Monday, but late registrations still are being accepted. Monday is the last day students may

"We encourage everyone who is considering enrolling for a credit course at Midland College to do so as quickly as possible," Windsor said. 'A number of classes are getting very close to their maximum number of students. Besides, students will get far behind in their classwork if they wait much longer."

which still have openings, both in academic and vocational-technical areas. And virtually all Midland College class offerings are available either in the daytime or in the evening.

visit the office of student services in a.m. and 5 p.m. weekdays. Additional same hours.

Ivie, general manager of the Colorado River Municipal Water District, said here Saturday that he hopes a deci-

sion will be made soon after Feb. 16. Grubb testified last week as a rebuttal witness for CRMWD and contended that, should the energy industry decline, other industrialization in West Texas will more than take up the slack in providing additional jobs

The importation of Alaskan oil from the West Coast will have an additional stabilizing effect, he said.

When attorneys for the opposing Lower Colorado River Authority complained that the population projections were too liberal, Dr. Grubb said, "I'm the one who argued for lower estimates," which he regarded as quite conservative.

LCRA expert witnesses, including Dr. James Vinson, Austin economist, haveused 1976 population figures which are from 20 to 70 per cent lower than ones for September, 1978, and which CRMWD used to support its demand estimates.

Robert S. Gooch, CRMWD hydrologist, told the commission that LCRA's estimates of impact of the Stacy reservoir on Lake Buchanan, the uppermost lake downstream.

Where LCRA had shown various Colorado watershed dams since 1937 had reduced the Buchanan drainage area to 5,421 square miles, Gooch said a more realistic figure was that the highland lakes had 11,838 square miles of drainage due to tributaries below Buchanan.

Moreover, the drainage area cut off by upper dams was much less prod-

to be topic

Accreditation

A discussion of accreditation procedures will highlight the meeting of the Greenwood school board at 8 p.m. Monday.

Consideration of the superintendent's contract and a construction progress report also are on the agenda for the meeting in the district board room in Greenwood High School.

uctive in runoff than that in the lower portion above Lake Buchanan, he said.

He rejected the predictions contained in graphs and texts which Charles Herring, LCRA general manager, had circulated around Austin on the eve of the hearings to show that in drought periods Stacy reservoir would "dry up" the highland lakes.

Even when Stacy is built, LCRA will have 263,000 acre-feet of water surplus to its 2030 needs, Gooch declared. His figures showed that in only two of the years since 1942 would Stacy have reduced the highland lakes to 600,000 acre-feet reeserve, and in only five of those years to the 1,000,000 acre-foot level.

He based his conclusions on a past policy of LCRA's heavy generation of hydro-electric power.

During the hearing, LCRA announced henceforth it will release water through hydroelectric generators only when there is a downstream need for water.

Gooch also presented charts which showed that demands on Lake J.B. Thomas and Lake E.V. Spence will equal safe yields by 1990.

Larry Smith, another LCRA attorney, asked Gooch why, if CRMWD is needing water, did it say in a 1977 refunding bond issue that it had ample water to the year 2030, and why it offered two years ago to sell West Texas Utilities Co., 20,000 acre-feet a year from Lake Spence.

Conditions have changed, said Gooch, and also the offer to WTU was predicated on getting a replacement supply at Stacy reservoir.

Gov. Alexander takes Tennessee oath second time

PAGE 7A

By SKIP WOLLENBERG

NASHVILLE, Tenn. (AP) - Gov. Lamar Alexander took the oath of office as Tennessee's 45th governor for the second time Saturday amid a celebration of bands, floats and a mile-long march. But the transfer of power has already taken

Alexander first took the oath of office Wednesday in a hastily-arranged ceremony designed to prevent his predecessor from freeing more state prison inmates. Then-Gov. Ray Blanton issued 52 commutations and pardons Monday, prompting his ouster. The Legislature reconvened Friday and the Democrat-controlled Senate approved a resolution censuring Blanton, also a Democrat. The House postponed action on a similar resolution. Censure carries no

Meanwhile, convicts whose terms Blanton commuted but were not freed immediately faced another

Judge John L. Draper on Friday set a hearing for Tuesday on a plea by one inmate, a murderer who says he is being unlawfully detained while Alexander

reviews the legality of Blanton's actions. The inmate is Fred E. Smith, 37, whose 10-year prison term for his plea of guilty to charges he killed his wife was commuted to time served.

Alexander has said he doubts he has authority to revoke Blanton's commutations and pardons, but ordered a temporary halt to further early releases while he reviews the cases.

Prison officials say 13 inmates left the prison between 'Monday's order and Wednesday's inauguration, leaving about 17 prisoners eligible for immediate release but still in prison.

Some of those granted clemency are reportedly being investigated by a federal grand jury in Nashville looking into charges that clemency was for sale in Blanton's administration.

Two Blanton aides and a state trooper were arrested last month on federal charges in the alleged pardon-selling scheme.

Jewish group blasts **Billy Carter, Young**

UNITED NATIONS (AP)-The American Jewish Congress is asking President Carter to disown pro-Arab statements made both by his brother, Billy, and his U.N. ambassador, Andrew Young.

In one of several letters just released to U.N. correspondents, Howard M. Squadron, president of the Congress, urged that the president "forcefully repudiate recent actions and statements" by Billy Carter connected with a Libyan delegation's U.S.

Squadron accused the president's brother of advocacy on behalf of a government that Squadron said was "doing its utmost" to undermine U.S.-sponsored Egyptian-Israeli peace negotiations.

"Like the rest of us, Mr. President, you cannot choose your relatives," Squadron wrote. "But you can choose your policies - and we respectfully submit that you have an obligation to make those policies clear and unequivocal." In another letter, Squadron objected to Young's describing Palestine Liberation Organization diplomats here as "a moderating influence." The state-ment was made in an interview Young had with a periodical called the Inter Dependent. Squadron termed Young's remark a "morally obtuse...foolish and damaging...unilateral reversal of this country's established position with respect to the PLO" that could "hardly be reassuring to those countries in the Middle East who are being asked to take vital risks in reliance upon our country's

Perseverance turned dairy farm into thriving country club

By SUSAN TOTH **R-T Staff Writer**

It took H.L. and Aggie Winkler only a year to turn a sandy, mesquite-covered dairy farm into a nine-hole golf course and open the Ranchland Hills Country Club in 1949

The mesquite was cleared, but steel fences surrounded the greens in an attempt to keep out the blowing sand. It didn't always work.

After one particularly bad sandstorm, 72 wheelbarrows loaded with sand were removed from what s now the No. 6 green, Winkler said.

Golfing friends who visited the two old barracks the Winklers purchased as the first clubhouse vowed never to return after enduring the blowing sand on the course

They might not recognize the place now.

Although the Winklers sold the club to the members in 1973, they are still proud of the newly remodeled club which officially was on display in an open house Friday and Saturday.

Not only does the club have grass on 18 holes, there are newly installed tennis courts, a swimming pool, dining rooms and all the appointments of much arger clubs in the country.

Coming to Midland in 1948 when the city already had one country club and only 16,000 people seemed like folly to some of the Winkler's friends.

But "owning a club of our own had always been a dream." Winkler noted.

The club opened with 150 members who had paid a 100 initiation fee and agreed to \$5 per month dues. When slot machines were declared illegal and had to be removed, dues were upped to \$10 a month, Winkler noted.

His dream of having his own course was not the idle folly many believed.

He had been in the golf business as a manufacturer's representative, tournament organizer and player since 1928.

Winkler stayed in the business through the years just after the 1929 stock market crash, he said, because of a game he saw while visiting Pinehurst in North Carolina.

The pro at the course pointed to John Phillip Sousa on the course with John D. Rockefeller Sr. and told him to stay in the business because golf was a game that could be played from the cradle to the grave, Winkler said.

One of the benefits of being in the business that long was knowing everybody in it, Winkler said. Well-known designers Rab Plumber and Warren Cantrell helped lay out the course.

The current owners have kept that insistence on quality design with the remodeling of the club facilities this year.

Midland architects Pierce and Pace designed the redone facility; Contractors, Inc. of Ardmore, Okla., carried out the plan, and Tom Hoch of Oklahoma City designed the interiors.

The project took almost two years and more than \$1 million to complete, club president Jerry Willenburg noted. It's come a long way from the beginnings nearly 30 years ago, he said.

rexas Chamber of Commerce has voiced strong opposition to legislation calling for the Texas Legislature to ratify a proposed amendment to the Constitution of the United States to provide votingpower for the District of Columbia by adding two U.S. senators and at least one representative.

Chamber

opposition

voices

Ed Coltharp, WTCC executive vice president, elaborated on the reasons for the chamber's opposition.

"In essence." Coltharp said, "the amendment gives the voting privileges of a state to a city. It is the opinion of the WTCC that, if approved, it will result in the election of representatives and senators who will favor the continuing and accelerated growth of federal programs and bureaucracy. It also would serve to give additional powers to the strong coalition of Northeastern states and could effectively nullify the senatorial influence the State of Texas now has in matters of utmost importance to the best interests of Texas."

Coltharp suggested that "If a change in representation rights is needed for persons now residing within the District of Columbia. then a much fairer alternative would be to annex portions of the District to surrounding states.'

The regional chamber has contacted the 56 members of the West Texas legislative delegation in Austin, as well as ranking state officials, seeking their support in voting against ratification of the proposed amendment by the legislature. FBI to probe

Doctors question 'detective' role

By MARK VOGLER R-T Staff Writer

City and county law enforcement officials may have outworn their welcome in depending upon Midland doctors to help in doing some of the detective work needed to prosecute rape cases.

For years, a handful of Midland physicians who specialize in gynecology and obstetrics routinely have been called upon by police to examine rape victims and later appear in court as expert witnesses.

But an increase of reported rapes has caused the doctors to complain that future demands may be disruptive to individual medical practices. The physicians now are urging law-

men to consider some alternatives. Midtand Memorial Hospital treated 16 rape victims in 1977 and 18 victims during 1978 — but 10 of those during the last four months of last year. And with the local population ex-

pected to continue to grow, the doctors forsee their community service turning into more of a chore.

Police officials are concerned that the physicians who reluctantly perform the examinations might get to the point of calling it quits - and thus jeopardize rape investigations.

MIDLAND COUNTY District Attorney Vern Martin and other law officials seem to agree on one point: It may be time to consider hiring a specialist whose primary responsibility is to conduct to rape examinations and testify about them later.

"I can see the doctors' point of view. They don't want to become courtroom people. There may be a bigger demand on these doctors asthe population increases. And most of them, of course, are concerned with healing and treating the sick, not convicting criminals," Martin said in a recent interview.

"There's always a problem with doctors not wanting to get involved in going to court. I don't know of any who have said point blank they don't want to do it. It's not that they're trying to avoid their civic duty. It's just that it's disruptive to their practices.

Getting involved in a rape case can tie up a doctor for considerable periods of time. It may involve going to court on several occassions, mostly just waiting around, Martin said. A last-minute subpoena for a doctor can result in cancellations of med-

ical appointments.

AND THAT CUTS into his medical practice as well as his billfold, according to Martin

The prosecutor said the problem actually has been building up for some time, although he was not called in by the medical community until several weeks ago.

sional pathologist who would handle all rape cases on a fee basis.

"Doctors just don't want to get involved in these things. It's not their business. This situation has always existed, but it's more of a definitive problem now because there's an increase in assaultive crimes that require doctors' testimony," he said.

'There hasn't been in the past any forensically trained doctors here, and they legitimately don't want to be forensic doctors," he added.

Wayne E. Ulrich, hospital administrator of Midland Memorial Hospital, has discussed the situation with Martin and said it is the feeling of the doctors who conduct the rape examinations that law enforcement officials ought to be considering future alternatives.

"We are gathering information at this time and looking at how other communities are handling the situation elsewhere in Texas," Ulrich said

anyone's part to deny access to medical care or physician services.

Desert Institute nearing reality

By ED TODD **R-T Staff Writer**

The concept of putting a representative sample of the far-flung Texas Chihuahuan Desert into a relatively minute package between Alpine and Fort Davis is moving toward reality.

"Oh, yeah, it's getting stronger," said Denny Miller, the new executive director of the Chihuahuan Desert Research Institute. The institute was set up to implement the project.

The Chihuahuan Desert takes in a huge and largely unexplored and unexploited expanse of Mexico between the Sierra Madre Oriental and Sierra Madre Occidental mountain ranges, a chunk of West Texas and parts of New Mexico and Arizona.

The institute was conceived by such Alpine scientists as botanist Dr. A. Michael Powell, zoologist Dr. James F. Scudday and geologist Dr. Dwight E. Deal to carry out several ambitious ideas

refuge for some of nature's endangered species, such as the peregrine falcon and the eagle

Though he supports the project and owns up to liking the CDRI concept; Williams admittedly does not side with the "environmentalists" who would save, promote and protect the eagle, for example, and cause its kind to multiply in a return to nature's balance.

"I HATE EAGLES, and there are others who hate them, too," he said of the flying predators, which, he contends, attack and eat lambs and other animals and thereby cut into the profits of his ranching operation

But, there are those, such as environmentalists, ecologists, scientists. and every-day wildlife buffs who "love" the big bird and what it represents

And because of those opposing views, Williams said, there is a dire

Clayton W. Williams Jr. of Midland, left, and Gene Cummings of Fort Stockton are supporters of CDRI. The two are standing on the 240-acre site to be used for CDRI's Visitor-Research Center between Alpine and Fort Davis. In the background is Mitre Peak.

-TO EXPLORE and do research in the desert to benefit the people of both nations

-To identify the fauna and flora in the desert and to study their life systems.

-To help preserve the wildlife and flora indigenous to those thousands of square miles.

-To set up a CDRI Visitor-Research Center fed by the findings of the scientists and their aides.

The building of the center on the 240-acre tract on rugged and rocky rangeland set in the Davis Mountains is a project now being carried out by Miller, his staff and the CDRI's board of directors and supporters.

"It'll have a real openness to it," the 33-year-old Miller said of the proposed center, to be built of native rock.

The proposed CDRI Visitor-Research Center will face Mount Livermore and the McDonald Observatory and will have its back to Mitre Peak.

The site of the center was a windfall for CDRI, largely through a gift last year of Clayton "Claytie" Williams Jr., a Midland-based rancher, oilman, and investor who is hailed as a leading booster CDRI-even if he philosophically is opposed to some of CDRI's ecological views:

WILLIAMS AND his wife, Modesta, last March 31 gave CDRI \$26,000 in a barbecue fund-raising benefit at the site and prodded the 500 CDRI supporters on hand to give.

It was Williams, too, who donated the CDRI the acreage from his rangeland.

Williams grew up in the Davis Mountains. And last March he said he would like for today's and tomorrow's youngsters to partake of experiences similar to his in the relative wilderness of the mountains. creeks, valleys, and forests.

CDRI, which is headquartered in the old Centennial School in Alpine, was founded five years ago to probe the desert, which has become a That's one reason why he is supporting the institute. Currently, the CDRI and its 27-member board of directors are seek-

ing funds to build a first-class arboretum - a botanical garden, with nature trails throughout the site.

The site would feature for both scientific and scholarly study, and for aesthetics reasons, representatives of the vast plant life in the desert, as well as the Visitor-Reseach Center and a ranch house.

"That's expensive and requires a lot of care," Miller said of the project. "And that's coming. But we're doing now what we are (financially) capabale of doing."

"WE'RE TAKING a systematical rather than an ecological" approach to the garden, said Miller, a biologist.

CDRI is involved in many projects, including the study of the eagle and falcon, as well as exotic and possibly marketable plants such as cacti and the candelilla shrub, native plant food of the American Indians in bygone years; range weed control, and the re-introduction of the Aplomao falcon to Texas.

"We're getting stronger and stronger," Miller said of the institute, which concentrates on research.

And that research would be virtually for naught were it not disseminated and utilized. That is one of the primary "callings" of the Visitor-Research Center, Miller said.

Among the CRDI board members from Midland are Williams, William B. Blakemore and Harry Clark.

Currently, Miller is tramping around West Texas in mustering financial and vocal support for the Center.

His job on the road and at the home office with staffers is taxing but satisfying.

"It's like an emotional yo-yo," Miller allowed. "You're up and down all the time."

The payoff is in the name of science, education and the environment.

The expanse of the Chihuahaun Desert is identified in the shaded area and takes in of New Mexico and Arizona.

38 high schools represented at Lee High speech tourney

More than 650 students from 38 high schools Lee High School Invitational Speech Tournament which concluded here Saturday.

Taking the Grand Sweepstakes award with the most number of points accumulated in various areas held in Texas, according to Cheryl Jezisek, spokesof competition was Jefferson High School in San Antonio with 268 points. Runner-up was Richfield High School in Waco with 129 points.

The award for squad efficiency went to Churchill High School in San Antonio. It accumulated 100 points with 20 entries.

Notrees just not so

NOTREES - Charles J. Brown looked out the window of the Cap Rock Cafe here and remarked, 'No trees.

"That's how it got to be named Notrees," said Mrs. Wayne Staten, postal clerk in this tiny west Ector **County hamlet**

The name was sent into postal headquarters in Washington, D.C., and the rest is history, she said

Today, the Cap Rock Cafe is closed and people here long ago made history by planting trees.

'In fact, as you'll notice, we've got pecan trees, elm trees and all kinds of trees around here today,' she said proudly

But it wasn't always that way. Back in the mid-1940s, when there were bustling oil camps and a couple thousand more inhabitants, nobody thought to plant trees here.

It was all the hard-working oil and gas field men could do to get into town Saturday nights to spend their paychecks.

Buf today it ain't exactly the same, according to Mrs. Staten.

"Nowadays the few kids we have go to elementary school in Goldsmith up the road and attend high school in Odessa. And Sammy Henderson now uses%the Goldsmith Schoolhouse for his racing

An awards assembly late Saturday, with 18 trothroughout Texas competed in the first Robert E. phies going to various winners, concluded the twoday event. John Gould, National Forensic League president, was master of ceremonies.

PAGE 11A

This was one of the largest speech tournaments man for the event. Cities represented included Dallas, Corpus Christi, Lubbock, El Paso and Clovis, N.M.

Directing the events were Maridelle Fryar, speech, and Horace Griffin, drama.

Ms. Jezisek attributed the success of the tournament to the more than 500 volunteer judges from the Midland community and junior high and high school timekeepers

She said judges also came from colleges in Lubbock, Odessa and Waco.

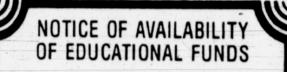

Banquet features music

STANTON - Musical talent, rather than the usual guest speaker, will be featured at the annual Martin County Chamber of Commerce banquet at 7 p.m. Monday in the Martin County Community Center.

Site of the banquet has been changed from the originally scheduled Cap Rock Electric Cooperative auditorium to the community center, where more seating is available

Martin County's farmer (or agriculturalist) of the year and outstanding man and woman are to be announced at the banquet.

Tickets to the banquet are \$5 each.

ELIGIBILITY - Those eligible to apply are descendants and spouses of persons who were employed for a minimum of one year by either the ate Mr. Sid W. Richardson or by an organization in which he had a substantial business interest. during his lifetime, or who subsequent to his death-nave been employed for a minimum of one year in a business enterprise which is a continuation of a business in which he had a substantial interest

mited funds are available to assist in defraying cost of college education and of vocational raining. These scholarships are awarded on a competitive basis according to academic chievement and financial need. Eligible persons applying for aid for the academic year beginning in the summer of 1979 must file application forms prior to March 31 1979

Lozano: One year later, his death still poses questions

By MARK VOGLER R-T Staff Writer

Larry Lozano, an unknown Odessa newcomer, died on the cold cement floor outside his Ector County jail cell on a chilly Sunday evening in January - exactly one year ago Monday.

In death, he became one of the most celebrated prisoners in Odessa criminal history.

Federal and state agents spent many hours investigating circumstances surrounding his final hours.

There have been countless newspaper stories written about what may have happened as Lozano lost his life in a struggle with eight lawmen.

Yet, 12 months later, many questions remain unanswered about what actually happened on Jan. 22, 1978:

• Who was Larry Lozano?

• Were Lozano's civil rights violated?

• Who was responsible for his death?

• Was his death homicide or accidental?

 Was Lozano mentally ill as the sheriff's department claims, and if so, why wasn't he transferred to an institution for mentally ill as required by state law?

• Why wasn't he released on bail?

• Was there a cover-up by the Ector Sheriff will be laid to rest.

Department, and, if so, why? The questions may remain unanswered and continue to spark conjecture years from now.

Most observers of the case agree that the difficulty lies in the fact that one has to decide whether the lawmen or the Ector prisoners who may have been witnesses to the death are telling the truth. There would be a tendency to believe the lawmen, since the prisoners already have a credibility prob-

An Ector County coroner's jury ruled the death was accidental, the result of a struggle between Lozano and jailers trying to subdue him.

But former state Attorney General John Hill, citing "contradictions" and charging the inquest was "one-sided," recommended that U.S. Attorney General Griffin Bell order a federal grand jury probe of the Lozano case.

The grand jury met for one week last July and heard evidence from as many as 66 witnesses. Newsmen re-hashed old Lozano stories and wrote new speculation of what may have happened. Still, six months after the grand jury adjourned,

there has been no report from that grand jury or any indication that the lingering answers about Lozano

Computing your own income tax possible with local group's course

EDITOR'S NOTE: This is the first of eight articles, furnished by the Texas Society of Certified Public Accountants, mailed in April are not designed to help taxpayers fill out their own income tax returns this year.

Would you like to compute your own income tax return this year? It's not out of the question.

You can learn to quickly and accurately complete your tax return by attending the Taxpayer Education course offered 7 to 10 p.m. Feb. 6 and 8 in the Fine Arts Building Auditorium at Midland College in Midland and in Room 201 of Deadrich Hall at Odessa College in Odessa.

Taxpayer Education is a public service program jointly sponsored by the Permian Basin Chapter of the Texas Society of Certified Public Accountants and the Internal

Revenue Service. Certified public accounts volunteer their time to assist taxpayers. in filling out the revised 1040 and 1040A tax forms

you. According to the IRS, returns mailed early are processed in four to five weeks. Those processed for 10 weeks or longer

The IRS has established certain requirements for taxpapers filing income tax returns this year

The following is a list of the minimum amount of gross income which would require a taxpayer turn if: to file a return. •Single persons can

earn up to \$2,950 before. they are required to file. •Single persons aged

65 or over have a gross income limit of \$3,700. Married persons filing a joint return have a

Recent changes in tax law will be covered. CPAs volunteer to assist taxpayers during

the two-night informal program.

In addition to receiving instruction, participants will have an opportunity to ask questions regarding specific circumstances. The two-night course is available to the public at a charge of \$1 to cover administrative. costs.

Each registrant will also receive the IRS publication, "Your Federal Income Tax," a 200-page booklet which details many tax deductions, forms and filing requirements.

If you've already gathered your financial records for reporting purposes, you've got the job half done

And, if you're not itemizing deductions, you've really got a head start. So why not join millions of individuals who will compute their own tax returns this year?

An added advantage to attending the Taxpayer Education program is that you'll promptly receive any refunds due

Joint rites to be held

Midland Presbyterians will gather in the sanctuary of Trinity Presbyterian Church, West Louisiana Avenue near Andrews Highway, for a special service at 7:30 p.m. today.

The union event will involve the congregations of the city's four **Presbyterian** churches - First, Trinity, Cove-nant and Christ churches.

Featured speaker at the gathering will be Dr. Raymond V. Kearns Jr., a clergyman in the United Presbyterian Church U.S.A.

The event is planned as a celebration of Christian unity, in commemoration of the current Week of Prayer for Christian Unity. The service will be open to all interested residents of the city and surrounding area.

Roger Staubach, right, Dallas Cowboy quarterback, says that if he has any edge over Pittsburgh signal-caller Terry Bradshaw, left, is the fact that

Dallas Cowboy Super thumbnail

MIAMI (AP) -- Thumbnail sketches of the National Conference champion Dallas Cowboys' starting team in today's Super Bowl XIII against the American Conference champion Pittsburgh Steelers:

OFFENSE Wide Receivers

Tony Hill, 22, 6-2, 198, Stanford -Rapid development in second pro season forced trade of Golden Richards to Chicago to open starting job for him...responded with 46 catches for team-leading 823 yards...possesses lightning speed and sure hands, holds all of Stanford's career pass receiving marks.

Drew Pearson, 28, 6-0, 183, Tulsa ---One of the NFL's premier pass receivers and the big play man for the Cowboys...caught 44 passes for 714 vards, pushing his career total to 280 receptions, third on the alltime Dallas list...lacks outstanding speed but is a smart receiver who runs tough patterns.

Tight End

Billy Joe DuPree, 28, 6-4, 229, Michigan State - One of the best blocking tight ends in the business...caught 34 he has more hair. The two will be facing each other today in Super Bowl XIII in Miami, Fla. (AP Laserphoto).

Pittsburgh Steeler Super thumbnail

MIAMI (AP) - Thumbnail sketches of the American Conference champion Pittsburgh Steelers' starting team in today's Super Bowl XIII against the National Conference champion Dallas Cowboys: OFFENSE

Wide Receivers

Lynn Swann, 26, 6-0, 180, Southern California - Pittsburgh's long-ball threat...one of the game's most graceful receivers and, even in the worst weather, one of the most sure-handed...starter on AP All-Pro team...third in AFC with 61 receptions for 880 yards and 11 TDs...his 64-yard scoring catch was the deciding TD against Dallas in Super Bowl

John Stallworth, 26, 6-2, 183, Alabama A&M - Set NFL playoff record with 10 catches against Denver...has caught a TD pass in last six games...No. 4 draft choice in 1970 when Swann was No. 1 and has been Pittsburgh's "other wide receiver" ever since...caught 41 passes for 798 yards and nine TDs this season.

Tight End Grossman, 26, 6-1, 215. Cowboys, Steelers set for Super Bowl

MIAMI (AP) - The Dallas Cowboys, armed with computerized offenses and defenses, face the Pittsburgh Steelers, who prefer more simple, basic football formations, in Super Bowl XIII today with the world championship of professional football at stake.

EACH TEAM will be seeking its third National Football League crown in this game, a rematch of Super Bowl X, won by the Steelers 21-17. A capacity crowd of more than 79,000 fans will jam the Orange Bowl for the game, pushing Super Bowl attendance for the 13-game series over the one million mark. Armchair football fans around the world will watch the game on NBC television or listen to it on CBS radio with kickoff scheduled at 3 p.m. CST.

The contest, which has become one of the biggest events in American sports since being introduced in 1967, matches two vastly different, enormously successful clubs.

THE COWBOYS, defending Super Bowl champions and appearing in this game for a record fifth time, depend on the sophisticated and varied formations designed by Coach Tom Landry.

On defense, Dallas uses the complicated flex formation, a coordinated, gap-filling alignment which takes players several years of experience to perfect. On offense, the Cowboys often will shift into the shotgun formation with quarterback Roger Staubach stationed 7 yards behind the line. of scrimmage in obvious passing situations.

"They try to get your defense to make mistakes with all that shifting around," said Steelers cornerback Mel Blount. "If they were to come straight at us, that'd be interesting. But we'll stop them, whatever they

PITTSBURGH USES a zone defensethat is neither complex nor esoteric. "They challenge your offense to beat it," said Dallas safety Charlie Waters. "They won't change. They say to you 'Here we are, beat us if you' can.

"We don't stunt a lot," said L.C. Greenwood, who anchors the left side of the Pittsburgh defensive line. "We use mostly straight stuff, nothing tricky Solving that defense will be the job of the Dallas attack which is operated by Staubach, who carries out Landry's plays relayed from the sidetines. The plays come straight out of the Cowboys' computer and the coach insists on protecting his play-calling privileges. He is not closed-minded about suggestions from Staubach during timeouts, though.

"I'll listen," the coach said. "But his record for changing my mind is not too good.

STAUBACH WAS the NFL passing champion, setting club records with 231 completions for 3,190 yards and 25 touchdowns. But Pittsburgh's Terry Bradshaw, who calls his own plays,

had a super season of his own. He led the American Conference in passing with 207 completions for 2,915 yards and 28 TDs, capping the season by being named the NFL's Most Valuable Player.

Bradshaw's offensive weapons include running back Franco Harris, a perennial 1,000-yard rusher who was the MVP of Super Bowl IX when he set a record with 158 yards gained against Minnesota. He works alongside Rocky Bleier, who can block with the best

THEN THERE are Pittsburgh's wide receivers, Lynn Swann and John Stallworth. Swann, MVP of Super Bowl X when he set a record with 161 yards in receptions, caught 61 passes for 880 yards this season while Stallworth hauled in 41 for 798

Swann was philosophical about today's rematch against the Cowboys. "This is a game of errors and mistakes, a human game," he said. "I think it was Booker T. Washington who said you measure a man's success not by what he has achieved but by the obstacles he has overcome. The errors and mistakes are football's obstacles.

Today, the obstacles will be Dallas' flex, spearheaded up front by Randy White and Harvey Martin, who shared the MVP title in last year's Super Bowl. The secondary is constructed around Waters and Cliff Harris, two of the best safeties in the business

THE DALLAS defenders surrendered only 208 points all season, the

best mark in the National Conference. But Pittsburgh's zone, built around veterans like Blount, Greenwood, Mean Joe Greene, Jack Lambert and Jack Ham, was even stingier, giving up only 195 points, the lowest total in the league.

The Steelers will have to stop Staubach's passes to flankers Drew Pearson (44-714) and Tony Hill (46-823) as well as the punishing running of Tony Dorsett, only the third player in NFL history to gain more than 1,000 yards rushing in each of his first two seasons. Robert Newhouse, returning from a broken leg, and Scott Laidlaw share the backfield blocking responsibilities but both can churn out yardage, too.

BOTH TEAMS come into the game riding winning streaks.

Pittsburgh posted the NFL's best regular season record at 14-2. The Steelers won their first seven games and then, after a brief mid-season slump, finished with five straight victories before beating defending AFC champion Denver and Houston to qualify for their third Super Bowl appearance.

Dallas staggered at the start of the season and after 10 games, the Cowboys' record was a lackluster 6-4. But then they caught fire, winning their last six regular season contests to finish 12-4 and then eliminating Atlanta and Los Angeles in the playoffs

PLAYERS ON both teams have each won \$14,000 by capturing their first two postseason games. The winners shares today are \$18,000 per player with the losers getting \$9,000 each. More important than that to many of the players will be the world championship rings that the winners get to wear.

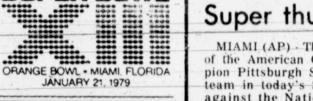

The money gets spent. The rings stay forever as reminders of the season they played on the very best team

Sports Banquet tickets still available

Tickets are still available for the Midland Sports Banquet, which will be held Wednesday, Feb. 7, at the Midland Country Club.

Tickets may be purchased at the Midland Cubs office in the Vaughan Building at the corner of Texas and Big Spring. For information, call 683-4251.

pitching great Vernon "Lefty" Gomez, star hurler for the Former New York Yankees for 13 years, will be guest speaker. In addition to Gomez, representatives from the Chicago Cubs, Texas Rangers and Houston Astros will be on hand as will pro football great Bobby Layne. Also, the banquet will feature Midland's top names in the racing world. Jim Hall, whose Chaparral-Lola won USAC's Triple Crown or racing -- Indianapolis 500, Pocono 500 and California 500--and Midland's Bobby Hillin, who is now building a serious contender in his Longhorn Racing Team, will also be at the banquet. There appears to be a little something for just about every sports fan, and could be one of Midland's top events this year.

Vince Lombardi Award ... goes to the winner

ple - Became a starter early in season when Bennie Cunningham was injured...had best season by far with 37 catches (more than twice previous career high) for 448 yards and a TD...not as big as Cunningham but faster...caught Steelers' first TD against Dallas in Super Bowl X. Tackles

Jon Kolb, 31, 6-2, 262, Oklahoma State - Rated the best offensive tackle in Steeler history ... played in a club-record 112 consecutive games before sprained ankle kept him out of 1977 season opener ... studying to be a veterinarian.

Ray Pinney, 24, 6-4, 240, Washington - Beat out Larry Brown for a starting spot this year ... snaps the ball

(Continued on 2-B)

MIAMI, FLA .--- The Dallas Cowboys are on their way to a good Super Bowl appearence today and, funny isn't it, no one ever wonders what ever became of the Cleveland Browns and Green Bay Packers.

The faithfuls who have followed the Dallas Cowboys since that 0-11-1 beginning back in 1960, might with a little memory jogging, recall that the years it was Cleveland and Jim Brown who kept the Cowboys from respectability and, after all, it was Vince Lombardi's Packers who stood like the Siegfried Line between Dallas as its destiny.

And how far the Cowboys have come from 1965 when they finished 7-7 to qualify for Miami's Runnerup Bowl, a feat that at the time, created the kind of fan hysteria that is received exclusively for a Super Bowl trip. Little matter that Baltimore sent the Cowboys home with a red bottom, 35-3.

IN 1966, Dallas gained its first win over the Browns in the second meeting that year and qualified for the NFL championship game, which is where the Packers rose up an ugly ogre to win a controversial 34-27 thriller in the Cotton Bowl.

By 1967, Dallas appeared to have the Browns jinx clinched for good, thrashing Cleveland, 52-15 in the Eastern Division championship, only to lose that 21-17 frostbite bowl game to Green Bay with the winner advancing to the first Super Bowl game.

The ghost of the Browns, however, wasn't easy to chase. Dallas losing to Cleveland in 1968 and 1969 in Eastern championship games to be relegated to two more by now, unwanted runnerup bowls in Miami.

PITTSBURGH ALSO grew up in the school of hard knocks, but for the Steelers it was agony that began in 1933, the Steelers' first year in the NFL and seemed destined to spread to infinity. Chuck Noll took over as coach in 1969 and looked like just

TED BATTLES

another in a long line of failures, bu Pittsburgh finished 1-13. Few realized it was the turning point for the Steelers, and the two enigmas of 1960 would dominate the NFL in the 1970s.

This, of course, is a rematch of the 1975 game, also played here, when Pittsburgh won, 21-17, but the game has changed since then. What then was a runner's game, now with the

introduction of the no bump rule this year, is a receiver's game and no teams are better to play catch than Dallas and Pittsburgh.

This is Dallas' fifth Super Bowl appearence, accordingly. Pittsburgh is in its fourth title game and both will be going for their third championship, which is also a record.

TRUE, TONY DORSETT could break the long run or Franco Harris may grind it out as a whole, but chances are it's the teams with the best pass rush that will win.

Drew Pearson complains that Dallas has abandoned the long pass down the middle, the one he and Roger Staubach used to fleece opposing secondaries with, but Coach Tom Landry responds that the Dallas offense (Continued on 3-B)

Haas takes narrow lead in Phoenix Open

PHOENIX (AP) - Jay Haas reeled off a string of three consecutive birdies on the way to a 6-under-par 65 that gave him a 1-stroke lead Saturday in the first round of the twice-delayed and now abbreviated Phoenix Open golf tournament.

"After two days off, I didn't know what to expect out there," said Haas, who last year won the San Diego Open as a tour sophomore.

Play was rained out both Thursday and Friday by a storm that caused flooding in the Phoenix area. With the start of the event delayed two days, officials decided to cut the tournament from the regulation 72 holes to 54. It will conclude, weather permitting, on Monday. The purse also was reduced, from

\$250,000 to \$187,500.

The storm, which produced almost two inches of rain, left the flat, 6,726yard Phoenix Country Club course a

soggy mess. It hasn't been mowed in almost a week. Pools and puddles of casual water dotted the fairways, but the greens, Haas said, were very good

"I'm probably biased, though, after shooting a 65," he said.

The extremely wet conditions prompted officials to allow players to lift, clean and place balls in the fair-

Cowboy thumbnail sketches

(Continued from 1-B)

returned to win back starting job at end of the 1978 season, replacing Andy Frederick...four-time All Pro...old man of an otherwise youthful offensive line.

Guards

Herbert Scott, 26, 6-2, 252, Virginia Ucton - Celebrated birthday three days before playing in the Super Bowl...a 13th-round draft choice in 1974 who worked his way into the starting lineup first as a messenger guard, alternating on plays with Burton Lawless, and then as a fulltime regular last year.

Tom Rafferty, 24, 6-3, 250, Penn State - Inherited his job when All-Pro Blaine Nye retired in 1977...equally comfortable on either the left or right sides and also has played center...coach Tom Landry calls him "a good, solid football player.'

1

Center

John Fitzgerald, 30, 6-5, 260, Boston College - Has developed into one of pro football's premier centers and handles the difficult "shotgun" formation snaps routinely...underwent off-season knee surgery after playing hurt most of 1977 season...an accomplished blocker against nose tackles in popular 3-4 defensive formations.

Quarterback

Roger Staubach, 36, 6-3, 202, Navy - Seems to improve with age...set a host of club passing records and led the league with an 84.9 rating ... completed 231 passes for 3,190 yards and 25 touchdowns with just 16 interceptions...passed for two TDs in NFC championship game against Los Angeles.

Running Backs

Tony Dorsett, 24, 5-ll, 190, Pittsburgh - Became only the third player in NFL history to rush for more than 1,000 yards in each of his first two professional seasons...his 1,325 yards set a Cowboy club record was second best in the NFC...dazzling speed and moves...also caught 37 passes fr 378 yards.

Scott Laidlaw, 25; 6-0, 205, Stanford - Starting in place of Robert Newhouse, who broke a leg in mid-season...injuries slowed his progress with Cowboys until this season ... a bread aand butter type of runner who is unspectacular but gets the job done ... gained 312 yards in 75 attempts.

Defensive Ends

Harvey Martin, 28, 6-5, 250, East Texas State - College teammate of Steeler Dwight White...one of the most feared pass rushers in NFL shared Super Bowl MVP with Randy White last year ... recorded 16 quarterback sacks this season, tied with White for high on the club.

Ed "Too Tall" Jones, 27, 6-9, 270, Tennessee State - Reached his peal

Steeler thumbnail sketches

(Continued from 1-B)

in punting situations...was three-year starter at center in college...Got first start at tackle in 1977 opener when Jon Kolb was sidelined. Guards

Sam Davis, 34, 6-1, 255, Allen --- Has been with Steelers longer than any other player and is oldest player on roster...he and Rocky Bleier are only two Steelers on team longer than Coach Chuck Noll...offensive captain since 1970

Gerry Mullins, 29, 6-3, 244, Southern California - Can be deadly as a pass-catcher as second tight end or on tackle-eligible plays...had a pair of fumble recoveries in AFC title game against Houston...has scored four TDs in pro career, two on fumble recoveries, two on pass receptions.

Center Mike Webster, 26, 6-1, 250, Wisconsin - Starter on AP All-Pro team ... exceptionally strong and particularly effective when playing face-to-face against noseguards in three-man defensive fronts...outstanding speed enabled Steelers to play him at guard earlier in pro career.

Quarterback

Terry Bradshaw, 30, 6-3, 215, Louisiana Tech - AP Most Valuable Player and starter on AP All-Pro team ... first Steeler to win a passing title...led AFC with completions on 207 of 368 passes for 2,915 yards and NFL-high (and career-high) 28 TDs...completed 27 of 48 passes for 472 yards and 4 TDs in playoffs.

Running Backs

Franco Harris, 28, 6-2, 225, Penn State - Jumped from ninth to fifth among all-time NFL rushers with 7,-377 yards...was third in AFC rushing with 1,082 yards, his sixth 1,000-yard season...only Jim Brown had more, holds Super Bowl rushing record with 158 yards against Minnesota...needs 58 yards to pass Larry Csonka's career Super Bowl rushing record of 297.

Rocky Bleier, 32, 5-11, 210, Notre Dame - His 633 yards rushing was second highest in career to 1,036 three years ago...drafted into Army after rookie season of 1968, fought in Vietnam and suffered leg injuries that nearly ended career...won 1974 Halas Award as NFL's Most Courageous Player.

Tackles Joe Greene, 32, 6-4, 260, North Texas State - No. 1 choice in the Steelers' watershed draft of 1969...was NFL Defensive Rookie of the Year that season...tied for club lead this season with five fumble recoveries...had 41/2 sacks during 1978, tying for second on club, and was sixth in tackles with Steve Furness, 28, 6-4, 255, Rhode Island - Was considered the fifth man in the four-man Steel Curtain during his first few years, a capable reserve at end and tackle ... won starting job in 1977 ... played entire second half of Super Bowl X against Dallas and led all Steeler linemen in tackles.,

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Billy Allen (5) of SMU, dribbles past Julio Gallardo of Baylor Saturday during SWC game in Waco, but the Mustangs found the Bears a little too tough, losing 93-67. (AP Laserphoto).

Notre Dame posts win, 82-73

SOUTH BEND, Ind. (AP) - Kelly Tripucka scored 22 points and Tracy Jackson came off the bench with 21 Saturday as top-ranked Notre Dame turned back stubborn South Carolina 82-73 in a regionally televised college basketball game.

The Irish, now 11-1, held a sevenpoint lead at halftime after trailing by one in a close first haff.

South Carolina's Zam Fredrick and Jim Strickland kept the Gamecocks within striking range early in the second half, but a three-point play by Orlando Woolridge gave the Irish a 10-point lead with less than eight minutes to go.

Woolridge, a 6-foot-9 sophmore, scored 15 of his 17 points in the second

South Carolina, falling to 7-6 for the season, came no closer than six points after Woolridge's three-pointer before a basket by Tripucka and two layups by Woolridge pushed theFmargin to 12 and the Irish coasted to

Illinois upset again

CHAMPAIGN, Ill. fouled out. (AP) - Center Joe Barry Carroll scored 24 points and Purdue outscored Illinois 22-0 from the free throw line in the second half Saturday as the Boilermakers upset the fourth-ranked Illini 69-57 in Big Ten basketball

Purdue opened the game in a full-court press and caused several Illinois turnovers. Arnette Hallman pumped in 13 of his game-total 17 points as the Boilermakers took a 35-27 halftime lead.

Illinois, whose record dropped to 16-2 overall and 4-2 in the Big Ten, was paced by Eddie Johnson's 15 points. Rob Judson and Levi Cobb added 12 apiece. Purdue improved it8

record to 13-5 overall and 3-3 in the conference.

half. victory

Tar Heels edge past

Maryland

in playoffs and Super Bowl a year ago...Size makes him a massive problem for offensive lines.

Tackles

Randy White, 26, 6-4, 250, Maryland - Shared Super Bowl MVP with Harvey Martin last year and tied Martin with 16 quarterback sacks, tops on the club, this season ... won Outland Trophy as top college lineman in 1974...Cowboys contemplated turning him into a linebacker but he turned out to be too good a tackle for that.

Jethro Pugh, 34, 6-6, 255, Elizabeth City State - Playing in his 25th postseason game, the most for any player in NFL history...sole survivor of the original Doomsday Defense...a cagey, intelligent player who uses his experience well.

Linebackers

Thomas Henderson, 25, 6-2, 220, Langston - Call him Hollywood ... delights in goading opposition...if he scores a TD, watch for the crossbar slam dunk last performed when he returned an interception 68 yards for the wrapup TD in NFC title game against Los Angeles.

Bob Breunig, 25, 6-2, 225, Arizona State - Only the third middle linebacker in Cowboy club history ... holds down tough "Meg" position in complicated Flex defense...relays defensive signals from sidelines...recovered a fumble, had an interception and six tackles in Super Bowl XII win over Denver.

D.D. Lewis, 33, 6-1, 215, Mississippi State...underrated and often overlooked...least publicized of the three Cowboy linebackers but coaches say he's one of the most efficient members of the defense...he and Pugh are the old men of the unit.

C ornerbacks

Benny Barnes, 27, 6-1, 195, Stanford - Led team with five interceptions, giving him seven for his career ... Doubles on special teams and is considered a vital member of that unit, as well ... underwent surgery for bone spurs in his foot and ankle before the 1978 season ... played on two Rose Bowl winning teams at Stanford.

Aaron Kyle, 24, 5-10, 185, Wyoming - Only cornerback Dallas ever drafted on the first round...intercepted a pass and recovered a fumble which set up the clinching TD in Super Bowl XII...suffered a fractured wrist

Safeties

Charlie Waters, 30, 6-2, 200, Clemson — His two interceptions in NFC championship game against Los Angeles set up first Dallas points against Rams...he had four pickoffs during regular season, giving him 33 for his career...played quarterback and wide receiver in college ... considered one of best strong safeties in the NFL.

Cliff Harris, 30, 6-1, 192, Ouachita Baptist — Has been a starter since the first game of his rookie season, 1970...perennial All Pro at his free safety position ... always is among the club leaders in total tackles... four interceptions this season gave him 27 for his career ... a tough hitter.

Linebackers

Jack Ham, 30, 6-1, 225, Penn State Starter on AP All-Pro team ... third in Steeler tackles with 94...has missed just one game in seven seasons...his three interceptions this season raised his own Steeler linebacking record to

Jack Lambert, 26, 6-4, 220, Kent State - One of the lightest middle linebackers in pro football, but one of the quickest...led the club with 178 tackles, 125 of them unassisted ... NFL Defensive Rookie of the Year in 1974

Robin Cole, 23, 6-2, 220, New Mexico Has been given starting job on right side for Super Bowl after sharing spot with Loren Toews during 1978 season...was No. 1 draft choice in 1977...also can play defensive end, where he was a four-year regular in college.

Cornerbacks

Ron Johnson, 22, 5-10, 200, Eastern Michigan - No. 1 draft choice in 1978...became a starter at the right corner when a blood ailment forced five-year veteran J.T. Thomas out of the game ... was an offensive guard in high school.

Mel Blount, 30, 6-3, 205, Southern -His four interceptions in 1978 put career total at 39, second only to Jack Butler's team-record 52...had a goalline interception in Steelers' Super Bowl IX victory over Minnesota...selected to Pro Bowl...was MVP in 1977 Pro Bowl.

Safeties

Donnie Shell, 26, 5-11, 190, South Carolina State - Tied for first with Joe Greene with five fumble recoveries...was fourth in team tackles with 87...became a starter in 1977 as a free safety, then moved to strong side when Mike Wagner was hurt.

Mike Wagner, 30, 6-1, 200, Wisconsin second in Steeler tackles with 103...returned to top form after missing 11 games in 1977 with cracked vertebrae...had an interception in each previous Pittsburgh Super Bowl and his five in postseason play is a club record...two during regular season put him third in team history with

land in an Atlantic Coast Conference game Saturday.

COLLEGE PARK, Md.

(AP) - Al Wood's 15-foot

jumper with three sec-

onds remaining gave

second-ranked North

Carolina a 54-53 vioctory

over 19th-ranked Mary

The victory left North Carolina, playing without injured starters Mike O'Koren and David Colescott, in first place in the league with a 5-1 record while Maryland dropped to third place behind Virginia with a 3-2 record. Two baskets by Albert

King, one after a steal by the Maryland sophomore, gave the Terps a 53-49 lead with 1:59 remaining

John Virgil sank one free throw for North Carolina with 1:34 left and the Tar Heels got the ball back after he missed a second shot. Rich Yonakor then scored for North Carolina at 1:15the Tar Heels' first basket in almost five minutes.

After the basket by Wood, who played with three fingers on his left hand taped together because of a severe cut, Maryland tried a shot from the corner by Greg Manning as time expired and the ball bounced off the rim.

Louisville takes win

TALLAHASSEE, Fla. (AP) - A Florida State tip-in with no time remaining was ruled offensive goaltending, preserving a 67-65 Metro Conference basketball victory for seventh-

ranked Louisville Saturday. Louisville held a 67-57 lead with 1:17 remaining, but missed five

straight one-and-ones to allow Florida State to storm back. Seminole forward Murray Brown was fouled with no time remaining. His shot bounced off the rim and was tipped in, but officials ruled the ball was still within the extended

cylinder of the rim when touched. Darrell Griffith hit 11 of 16 shots from the floor and scored 24 points to lead Louisville. Roger Burkman added 13 points for the Cardinals, now 2-0 in the Metro Conference and 15-3 overall.

These six specialists are cutting insurance costs for the oil, gas and petrochemical industry onshore and offshore.

Whether you're running a rig, a plant, or some other oil-related operation, you want the most you can get from your insurance protection.

We would like for you to meet and get to know personally the people at our agency who can save you money. They will work for you to:

- · Tailor-make coverage to fit your specific risk
- Market your insurance to your best cost advantage
- Design insurance to let you use self-insurance and deductibles to your benefit
- · Design a safety engineering program to help you control and reduce losses
- Take full advantage of cash-flow studies and opportunities
- · Design and maintain premium and loss records to help you with month- to-month analysis and control

If you would like to explore these ideas or know more about the individuals shown above, call John Hervey or write for our latest booklet. John L. Wortham & Son, P.O. Box 1388, Houston, Texas 77001 (713) 526-3366.

hasn't seen that much.

"I think the biggest thing we have going for us is Tony Hill, not that Golden Richards and others that complimented Drew in the past weren't capable, but Hill is a big play man. He can beat a defense deep or he can turn a short one into a touchdown anytime he handles the ball. Therefore, our attack this year has been a little bit more balanced that in the past." When Tony and Drew are double-teamed, there is always Billy Joe Dupre.

Pittsburgh comes equipped with the same type weapons with Lynn Swann, John Stallworth and Randy Grossman

ALL INDICATE points toward the best of all Super Bowls. Two veteran teams at the peak of their game, no strangers to the distractions of Super Bowl week, a malady that has laid waste to more than one first-timer.

None of the games adhered to the prescribed scripts. New England-Houston, Denver-Pittsburgh, Los Angeles-Minnesota figured to be close. They were routs instead. Dallas-Atlanta also figured to be a rout, but was close. Fans who looked forward to Houston-Pittsburgh and Dallas-Los Angeles, and experienced to be sovored, classic examples of how championship games should be, were disappointed.

It may happen again today. A couple of mistakes, turnovers leading to quick scores, could scramble all of the best-laid plans of Landry or Noll and playoff games are notorious for their devestating results of a team forced to play catch-up. So don't discount a rout, either way.

ODDSMAKERS AND a wide major= ity of the writers favor the Steelers. Up until now, we have too. After all, the Steelers won in 1975, the ran roughshod over Dallas in a regular season game in 1977, although Pittsburgh was going nowhere.

But it was a young team that lost to the Steelers in 1975. A team despite its success that was in-the process of being rebuilt as rookies, who are now mature veterans. There is also Hill and Dorsett. And if the Cowboys can avoid fumbling away the game in the first half, we pick them to win, 24-17.

Battle scene Aggies stage comeback to topple Red Raiders

COLLEGE STATION, Texas (AP) - Rudy Woods, who sank the goahead basket with 11:20 left in the game, scored 21 points to lead his 15th-ranked Texas A&M to a 68-63 Southwest Conference basketball win over Texas Tech Saturday night.

Tech took a 35-30 lead into the locker room at halftime. The Red Radiers used up much of the clock looking for their open men, and compiled a blistering 70 percent first half shooting percentage.

Texas A&M had trailed Tech most of the game when Woods scored the layup that gave the Aggies the lead for good, 48-47.

David Britton, who scored 12 points, and Rynn Wright with 16 paced the Aggies during the crucial final period. Tech almost stole the lead back with 5:22 remaining in the game when

Porkers rout TCU, 90-51

FORT WORTH, Texas (AP) Freshman Scott Hasting and U.S. Reed dropped in 18 points each to lead the Arkansas to a 90-51 rout of Texas Christian in Southwest Conference basketball here Saturday night.

All-American Sidney Moncrief, hampered by tendonitis, shot for 15 points, eight shy of his 23 average. The win snapped a three-game los-

ing streak for Arkansas and raised its record to 11-3 for the season and 3-2 in SWC play. TCU dropped to 5-9 for the year and 0-4 in league play.

Freshman center Kenny Haynes came off the bench to score 10 points for TCU.

Arkansas scored nine points in the remaining two minutes of the first half to lead 30-18 at intermission. "We played great basketball for 19

minutes," said TCU Coach Tim Somerville. "We substituted for a couple of guys, and then instead of four down at the half, we're 12 down.

"We came out in the second half and didn't score for 41/2 minutes. We just didn't get any offensive rebounds and that'll kill you.

Arkansas hit 52 percent from the field while TCU managed only 29 percent-

A&M was ahead by three. A&M Coach Shelby Metcalf received a bench technical and Tech's Kent Williams connected on the two resulting free throws, cutting the margin to one. Tech then had three opportunities to go ahead, but the A&M defense held strong.

The win gives Texas A&M a 4-1 record in SWC play and sets up a game against Texas Monday night to determine the conference leadership. Tech fell to 3-3 in the league

A&M Coach Shelby Metcalf said the Aggies learned their lesson in the first half and came out more aggressive in the second period.

'We had to get out early and not let them sit on the ball, because they were perfect in the first half," he said. "They were getting only one shot, but they were making it."

Woods said he broke out of the first half doldrums and played much better later in the game. "In the first half I wasn't doing anything n the middle. I was in a trance. I snapped ou of it and started playing like I should in the second half.

Tech Coach Gerald Myers said. "I'm pleased with our effort and poise, but we were playing a fine team. A&M is realy tough with Rudy (Woods) inside - he makes a lot of difference. It's tough when you lose, but I don't feel that bad about our effort and poise." TEXAS TECH (63)

Baylor thunders past Southern Methodist, 93-67

WACO, Texas (AP) - Vinnie Johnson, Wendell Mayes and Terry Teagle combined for 71 points Saturday as the Baylor Bears thrashed Southern Methodist 93-67 in a regionally televised Southwest Conference game.

Johnson led the 20-point brigade with 29 points, while senior Mayes scored 22 points and pulled down 15 rebounds.

Teagle, a freshman, scored 20 points as Baylor hiked its SWC record to 3-2 and 9-6 on the year. SMU fell to 7-7 and 2-2.

SMU had control of the game only once, moving seven points ahead in the first five minutes.

Johnson, the league's leading scor-

er, then triggered a rally of nine straight points that propelled the Bears ahead and to a 43-38 halftime lead. SMU never got closer than four points the second half. Brad Branson scored 18 points and

had 14 rebounds before fouling out with 5:06 to play for SMU Gordon Welch scor4ed 12 whil guards Billy Allen and Phil Hale had 10 each for SMU.

Chaps return home for **Appreciation Night tilt**

Hopeful that the friendly confines of Chaparral Center will help end a losing streak, the Midland College basketball team plays its first home game in more than 40 days Monday night.

And there is no doubt that the Chaps will have to be at their very best to win this one since they are hosting Western Texas College of Snyder, the No. 8 ranked junior college team in the nation, in what could be the most crucial conference outing of the year for the struggling Chaps

And if it is a crowd that helps the home team, then the Chaps could be in good shape since MC has done everything possible to insure a big turnout. The game has been tabbed as "Community Appreciation Night" which means free admission for everyone. There won't be a ticket seller in sight, and that's a promise

Although there have been good crowds for many of our games, and a lot of people have seen Chaparral Center, there are so many people in this area who haven't watched the exciting Chaparral brand of basketball or seen this great new building," said Delnor Poss, MC athletic director. "We just want to share with everyone our excitement about the team and the building, which the community has made possible.

Meanwhile, Chap Coach Jerry Stone will be trying to get his squad back into the win column after losing four of their five outings this month. all on the road. The Chaps left for the Christmas break with an 11-3 season mark and a perfect 4-0 conference standing. Now they are 12-7 and 4-2, but still very much in the running for the conference title. They could be right back in the thick of the fight with a victory Monday.

The Chaps lost to WTC in the Big Spring tournament 80-76 in a close game. A big home crowd might be enough to turn that around. WTC is 18-1 on the year and 6-0 in conference play, and highly ranked.

Although the Chaps have come close, including a double overtime game, they have never beaten WTC in either conference or non-conference action

"The players know they can play with Western Texas," Stone said. "They scrimmaged them before the season began and then played them just about even in the ABC tournament. They are confident they can take them this time.

TV coverage on **NBC** is extensive

By HOWARD SMITH **AP** Sports Writer

If Super Bowl Sunday goes according to plan -- NBC's plan -- the kickoff will take place at precisely 12 minutes and 15 seconds past 3 p.m. CST

NBC's script for the opening ceremonies also calls for player introductions from 4:03.45 to 4:06.45; George Halas to officiate at the coin toss from 4:07.00 to 4:09.00, and the playing of the National Anthem from 4:09.45 to 4:11.45

And there is a fascinating script notation that reads

'4: 09.10....sky divers leave plane." 4:11.45....sky divers land at end of Anthem

Whether the sky divers will land on cue and what they will do once they arrive remains to be seen, and chances are more than 80 million Americans will be watching. The Super Bowl is annually the most watched sports event on television and NBC has marshalled its forces for a blockbuster 7-hour presentation, including 3½ hours of pregame hoopla.

York Jets' historic victory over the Baltimore Colts in Super Bowl III; an interview with NFL Commissioner Pete Rozelle; flashbacks of past-Super Bowls; a look at how TV deals with the Super Bowl and the NFL deals with the invasion of sportswriters, a report on how Miami is dealing with the game and analysis of Pittsburgh and Dallas

Dick Enberg will be the host for the entire afternoon and NBC regulars Bryant Gumble, Mike Adamle and Donna DeVarona will participate in the pregame show, as will Joe Namath. Curt Gowdy will call the playby-play during the game with Merlin Olsen and John Brodie handling the commentary:

The halftime show will be a salute to the Carribean and Bahamas and, according to an NFL press release, will include "pulsating tropical rhythms and bold splashes of colorful native costumes." Not to mentionlimbo dancers and steel bands. A postgame locker room show is also planned.

The game will be televised on 218 stations and broadcast on radio on 269 THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

LE BRASSUS, Switzerland (AP) -Oddvar Braa of Norway scored in his second World Cup victory in a week when he won the 15-kilometerer cross-country race Saturday. The victory moved him into first place in the overall Cup standings.

In the fifth World Cup race of this season's Nordic schedule, the 27-year old farmer covered the course in 44 minutes, 15.9 seconds. Second, 6.1 seconds behind, was Swede Thomas Wassberg. Ivan Levanov of Bulgaria finished third.

Two U.S. commpetitors, Tim Caldwell of Putney, Vt., and Doug Petersen of Hanover, N.H., dropped out during the first five kilometers, which were almost entirely uphill.

LONDON (AP) - Bill McCracken, the man whose offside tactics forced a change in the rules of soccer, died Saturday. He was 95.

McCracken was a former international player for Ireland. The 'McCracken plan'' maneuvered attackers into offside positions, even if it meant McCracken having to stand on the halfway line

He first adopted the tactic when a player with Newcastle and when he started to manage Hull in 1923, that club also adopted the tactic.

PERTH, Australia (AP) -Manfred Aufmann, a yacht race organizer from Brazil, won the second heat of the World Laser championship being sailed in Western Australia's Sovburn Sound amid a 20-25 knot sea breeze Saturday.

Peter Conde of Australia, who won the Australian national championship two weeks finished second, followed by New Zealander Paul Meo in third

Indiana State still unbeaten

OMAHA, Neb. (AP) - All-Ameri-

can Larry Bird's torrid second-half shooting turned back a Creighton rally and enabled unbeaten Indiana State to beat the Bluejays 90-80 in a Missouri Valley Conference basketball game Saturday

The fifth-ranked Sycamores are 16-0 overall and 6-0 in the conference while Creighton is 8-7 in all games and 2-4 in the league

Creighton charged into contention after trailing at halftime 46-43 as Bird hit nine shots without a miss in the first 11 minutes of the second half.

Creighton pulled into the lead 60-58 with 14:36 to play on a jump shot by David Wesely. Bird tied it 60-all before Kevin McKenna hit a free throw for the final Bluejays' lead 61-60 with 13: 53 to play.

Bird's 12-foot jump shot at 13:41 triggered a spurt that saw him score six straight baskets as the Sycamores_

There were finally a few golfers at the Hogan Park Golf Course this week for the first time this year. The weatherman gave us a break and the golfers took advantage of the opportunity to play.

Highlight of the week has to be Larry Melzer's hole-in-one. Larry scored the ace on the 150-yard, par 3, No. 3 hole at Hogan with a perfect six-iron shot. Witnessing the ace were his wife, Dorothy Melzer, along with Bob Lopez and Joe Lopez.

Dennis Griffiths and Gene Bates of Kirby Player & Associates were in town Thursday for a site inspection on the new nine holes. Also present for the inspection were Stephen Best of Gundersons Inc. and yours truly.

The site is beginning to look like a golf course with the shaping of some of the tees and fringes about 80 per cent completed. The dirt work on the first six holes is just about finished and the crew will begin cutting some of the sandtraps and doing some more of the finer shaping on the fairways, tees and greens. We are also looking

Johnson paces Bullets' win

LANDOVER, Md. (AP) - Charlie Johnson, starting in place of the injured Kevin Grevey, tossed in-a season-high 24 points Saturday night to pace the Washington Bullets to a 109-104 come-from-behind victory over Indiana

Johnson connected on 11 of 25 shots and scored 8 points in both the second and third quarters in his first starting assignment of the season. Grevey was sidelined with a pulled hamstring muscle

Mitch Kupchak sparked the Bullets' fourth quarter surge with 14 of his 18 points, including 7 in a row late in the game

Elvin Hayes and Bobby Dandridge also contributed 24 points each to the

Midland girls

nab golfing win KERMIT - The Midland High girls

golf team won their first dual match of the season here Saturday with a 390-394 victory over Kermit.

Patty O'Neill paced the Bulldogs with an 88 and earned medalist honors. Kim Hopkins had a 93. Others Jazz this season. were Nancy Spaugh, 103; Ann Coomes, 106; and Dana Bostwick, 114.

forward to starting the tile work in the base of some of the greens within the

next two weeks. Construction on the golf shop and snackbar area stopped during the wet, icy weather, and then picked up again as the weather cleared. The framework of all the walls is about completed. Roof trusses and decking are up over the snack area, restrooms and mechanical room. . It seems the lumber got snowbound in St. Louis and hopefully will be here Monday or Tuesday. Golfers playing holes six and seven can pretty well tell what the building is going to look like as they go by.

The Hogan Park Women's Golf Association 18-hole division held their first general meeting Thursday at the golf course. Weather did not permit the scheduled playday to be played. The ladies scheduled a Most Bogies event for Thursday and will make their own pairings and tee times for the event.

The HPWGA 9-hole division has scheduled a general meeting at Hogan Park Thursday, Jan. 25, at 9:30 a.m. to start their year.

Bullets' 19th victory in 23 home

Indiana took an early lead. The Pacers led 39-34 midway through the second period and 57-52 early in the third quarter

The Bullets tied the score at 59-59 on Dandridge's free throw and then went ahead to stay on Hayes' tap-in seconds later.

Guards Ricky Sobers and Johnny Davis led the Pacers with 24 and 21 points.

Hawks top

New Orleans ATLANTA (AP) -John Drew scored 36 points to lead the Atlanta Hawks to their sixth consecutive victory, a 118-94 trouncing of the New Orleans Jazz in the Nation-

tion Saturday night. Drew and Eddie Johnson combined for 35 of the Hawks' 63 secondhalf points to_key the

rout. It was Atlanta's

Vet Riessen stages net upset in Prix

TOWSON, Md. (AP) - Marty Riessen, an aging giant-killer looking for his first singles title on the professional tennis tour in almost four years, upset third-seeded Peter Fleming, 7-5, 7-6, Saturday to advance to the finals of the Grand Prix Tennis Classic.

Riessen will face the winner of Saturday night's semifinal match between top-seeded Harold Solomon and Andrew Pattison for the championship of the \$75,000 tournament at Towson Center.

Handling Fleming's powerful serve with apparent ease, Riessen, 37, displayed sharp vollying through the match.

action.

He broke his 6-foot-5 opponent, who will turn 24 Sunday, in the 12th game to win the first set but quickly fell to 1-3 in the second set. When Fleming broke him in the third game, it marked the first time in the tournament that Riessen had lost service.

Riessen, who last won a tournament in the 1975 U.S. Indoor Championships in Phladelphia, held in the fifth game after trailing 15-30 and broke Fleming at love in the eighth game as his opponent double-faulted on each of the last two points.

In the tiebreaker, Riessen won 7-2 as Fleming lost all four of his serves.

UTEP captures win

EL PASO, Texas (AP) - A pair of free throws by Anthony Burns with three seconds left in the game staked Texas-El Paso to a 78-74 victory over Colorado State Saturday in a Western Athletic Conference basketball game.

CSU had chopped UTEP's lead to 76-74 with 37 seconds remaining before Burns stepped to the line and ended it.

UTEP had five players in double figures, led by Terry White's 22. The Miners held bulges of 18 points in the first half and 14 in the second half, but the stubborn Rams kept coming back, paced by Eddie Hughes' 23 points.

games.

NBC, which telecasts the Super-Bowl in alternate years with CBS under terms of its agreement with the National Football League, has invaded Miami with a force of about 150 executives, broadcasters and technicians. And they are armed to the teeth with 10 stationary cameras, four hand-held cameras, one blimp camera, six slo-motion replay discs, one videotape machine, over three miles of video cable and almost four miles of audio cable.

George Finkel will be producing his third Super Bowl and Ted Nathanson will be directing his seventh. In addition, NBC will again have a special unit assigned to concentrate on the defense. A separate producer and director will have three cameras assigned strictly to coverage of defensive players to provide replays from a different perspective. NBC provided 23 defensive replays during its coverage of the American Conference championship game, the first time a special unit had been assigned to the defense

NBC has also hired Cleveland Browns' coach Sam Rutigliano as a sort of scout. Rutigliano will sit in the pressbox and contact the producers from time to time, suggesting possible upcoming plays and players that NBC may want to isolate on.

Coverage will begin at 11:30 a.m. CST with a special edition of "Sports-World" that will include a lengthy lookback at the regular season, just in case anyone has forgotten what happened.

The pregame show starts at 2 p.m. and will include a look at the New

HOUSTON (AP) - Victor Ewing and Ken Williams combined for 53 points Saturday night as the Houston Cougars bombed the Rice Owls 101-75 in Southwest Conference basketball The win lifted the Cougars to 10-8 for the year and 2-5 in the conference. Rice dropped to 5-11 on the season and 2-4 in league play. Ewing had an incredible first half, shooting 10 for 10 on his way to a game high of 28 points. Williams added 25 points and George Walker dropped in 21, 17 of those from the free-throw line. Elbert Darden, the high-point man for Rice, had 17 points, but was unable to help the Owls who dropped their 15th straight game.

Schuler said that the first half's shooting string put together by Ewing just about finished his Owls.

"Obviously, Ewing and Williams played great games for them," the agrined coach said. "When Ewing

made all 10 of his shots in the first

"There was no need to discuss it

half, the game was as good as over.

THE MIDLAND REPORTER-TELECIRAM, SUN., JAN. 21, 1979

Jack Harn ready for Super Bowl

PITTSBURGH (AP) — He plays down his big plays, dismisses the idea he might be the best in football at his position, and don't look for him to warm up for Super Bowl XIII with hot rhetoric.

"I'm not very good copy, am I?," outside linebacker Jack Ham of the Pittsburgh Steelers recently told a reporter.

Copy aside, Ham is a very good outside linebacker, a man with whom the Dallas Cowboys must reckon.

Go back to Pittsburgh's 35-4 victory over Houston last weekend in the American Football Conference cham-

pionship. On the first scrimmage play, Ham hit Earl Campbell for a 3-yard loss. In

Sonics cop NBA win

CHICAGO (AP) - Dennis Johnson scored 29 points and Lonnie Shelton added 20 Saturday night to lead the Seattle SuperSonics to a 107-101 National Basketball Association victory over the Chicago Bulls.

Johnson rattled off 6 straight points as the SuperSonics spurted away from a 95-95 tie with 3:59 left. Johnson's two free throws gave Seattle a 97-95 edge, and a layup and a 15-foot jumper by the guard gave his team a 101-95 advantage with 2:38 remain-

Artis Gilmore countered with a basket for Chicago, but Fred Brown got an easy layup as Seattle regained a 6-point lead.

Trailing 105-99, Chicago cut the lead to 4 points again on Mickey Johnson's hook shot, but two free throws by John Johnson sealed the victory.

The Bulls, who trailed by 17 points in the second quarter, launched a methodical comeback in the third. Four times Chicago narrowed their lag to 8 points, but the Sonics countered with a basket each time to regain a 10-point lead.

UCLA topples Arizona State

TEMPE, Ariz. (AP) - Senior forward David Greenwood scored 22 points as third-ranked UCLA, held in check by Arizona State for all but three minutes of the first half, erupted in the second period for a 95-79 Pacific 10 Conference basketball victory Saturday night.

The 6-foot-9 Greenwood overcame a. sluggish start to tally 16 points in the first half, when the lead seesawed as the collision, Ham's face mask cracked on both sides where it attaches to his helmet.

He later grabbed a fumble to set up a Pittsburgh touchdown, caused and recovered another fumble in Steeler territory, sacked Dan Pastorini for a S-yard loss, and intercepted a pass at the Oilers' 15-yard line set up a field floal.

What about the broken helmet? "I knew Earl Campbell hit hard, but that was ridiculous," said Ham.

The fumble recoveries? "No big deals," he said. The interception on which he dove

in front of a running back who'd slipped out of the backfield? "All I

had to do was step in front of the man. It wasn't that hard," said Ham. You may get the idea Ham doesn't dabble in personal press agentry. He

doesn't, but Joe Greene will handle it

"Jack has the instinct, speed, quickness, intelligence, desire to play the game, love of the game," said Greene

"Jack likes to play. He REALLY likes to play, and he does it quietly, like a gentleman. He doesn't talk. He doesn't brag. He doesn't rub it in. He doesn't play dirty football. He just goes out there and plays, game after game.

"Ham probably hasn't had a penalty since he's been in the league.

There are some around the league who will tell you Ham is the best at his position. What does Ham think of that?

"My mother likes to hear it, but it's not true," he said. "I'm on an excellent football team. I complement the team. But if I didn't have guys like L.C. Greenwood and Joe Greene ... '

Ham has intercepted 26 passes in his eight pro seasons, plus five more in the playoffs. He's been named to the Pro Bowl six straight seasons.

PAGE 5B

He got a game ball for his play last weekend against Houston, something of a rarity because he hasn't received many game balls in his career.

"He's played so well so long that we kind of get used to-it," said Coach Chuck Noll. "We were just talking about that the other day, saying, 'When's the last time Jack had a bad game?'

Nobody could recall. That's a tribute to Ham's basic approach to his work

"I try to do a steady, consistent job, just like an accountant or an insurance man," he says. "It's nice to play a great game sometimes, but the real challenge is to play a good game all the time.

Midland girls to share title as Lee posts win

SAN ANGELO - Midland got some good news and some bad news Saturday as the District 5-4A girls basketball race came to a close with two makeup games.

First the good news. Midland Lee walked to a 55-26 victory over San Angelo to end the first half race with a 5-2 mark while San Angelo fell to 1-6. Lee is now 19-7 on the year.

Now the bad news. Abilene High defeated Odessa Permian Saturday afternoon by a 42-30 count to earn a share of the first half 5-4A title with Midland High. MHS and Abilene both finish the first half race with 6-1 records. The Bulldogs defeated Lee Thursday to earn at least a share of the title, but were hoping for a Permian upset in order to own sole possession of first place after the first

Midland Lee (55):

Score by quarters: Midland Lee San Angelo

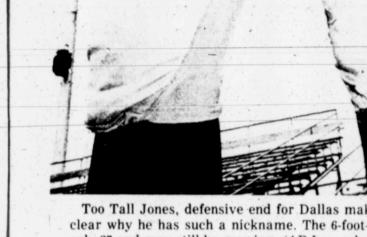

Team x--Midland High x--Abilene High

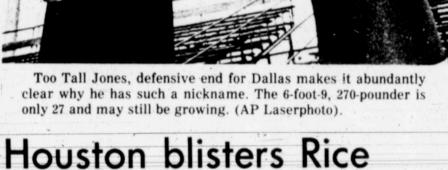

gelo Saturday. Shoot, San Angelo never scored more than eight points in any one guarter. Lee ran to a 28-14 lead at the half, and were never pushed.

Gale Wilson led the charge with 12 points while Dee Dee Poole contributed 11, but the Rebels also had 10 players scoring points. The second half race begins Mon-

day with first half co-champ Midland High hosting Odessa Permian while Lee travels to Odessa High, a team that tied Lee for third place in the first half race with identical 5-2 marks. Lee and Midland High both won outings against these teams in the first round. All varsity games have an 8 p.m. start with JV contests at 6:15 p.m.

in SWC game, 101-75

The Cougars were smoking from the outset behind Ewing's hot streak as they rolled to a 49-29 half-time score. The Owls never seemed to come close as Houston led by as many as 31 points.

Rice Coach Mike Schuler was less than happy with his team's performance.

"I'm embarrased, " Schuler said, shaking his head. "This was the worst game we've played all year. It was just an old fashioned kicking.

"Our players are embarrassed, or if not, they certainly should be," he added

any further. The Cougars, who shot a torrid 59 percent from the field, complimented their devastating offense with an stingy defense as they pressed the Owls

all over the court. The cold-shooting Owls shot only 39 percent from the floor during the game.

Houton Coach Guy Lewis said his team seems to be playing the way it was in December when the Cougars were winning.

"Although we lost to Baylor (last week), we played well. We are playing well now. We need improvement on our rebounding and what we do inside," Lewis added.

Super Bowl XIII impact has hotels overflowing

MIAMI (AP) - This sub-tropical tourist capital, teeming with the normal mid-winter crush, reeled Saturday under the impact of Super Bowl XIII.

Hotels were booked to overflowing. People queued up for hours awaiting tables at popular restaurants. It was wall-to-wall humanity at the bars and private clubs.

The Office of Tourism estimated that 60,000 out-of-town visitors had poured in by air, sea, train and private conveyance for Sunday's National Football League championship game between the Dallas Cowboys and Pittsburgh Steelers.

The football revelers figure to pump an extra \$69 million into the city's economy over the week-end.

'The Super Bowl guest spends about \$100 a day compared with \$60 a day spent by the average tourist," a spokesman for the tourist office said.

Steeler fans poured in from subfreezing Pittsburgh, wearing arctic apparel which was quickly exchanged for attire more suitable to 70-degreeplus temperatures. Many Dallas supporters showed up in wide-brimmed sombreros and high-heeled boots.

Almost all of them were wearing team colors, waving banners and blowing horns.

United Airlines said it had booked 8.000 seats from Pittsburgh to Miami for the weekend. Art Rooney, colorful owner of the Steelers, chartered a DC-8 for \$50,000 to transport family and friends to the scene.

"We will have the whole Texas Air Force in by Sunday," said an airport spokesman, referring to the mass of private planes expected from the Lone Star State.

Leading hotels were completely booked. The Omni, where Commissioner Pete Rozelle and other NFL personnel blocked out 350 rooms, said there had been no boost in rates. In fact, \$100-a-day rooms were going for \$74 under package deals. A check of other hotels indicated no tendency toward "gouging."

The press corps was the largest in the game's history, put at-more than 2,000. Most of the members were quartered at the NFL press headquarters on Miami Beach.

While private parties, celebrity tennis and golf tournaments and a variety of other events marked the pregame festivities, the high point was Rozelle's traditional Friday night 'bash,'' a festival of food, drink, dancing and song with a Caribbean theme. The NFL commandeered half the Miami Airport for the occasion, entertained 3,000 guests at a cost of \$100,000

Rozelle said the NFL spent \$1 million for the week's entertainment and promotion.

The game, kicking off at 4:15 p.m. EST, will be shown by NBC-TV, goingto a total of 218 stations in the United States, including Hawaii and Alaska, and 269 U.S. radio stations. The event also will be telecast in Canada and overseas to such places as Japan, Australia and New Zealand.

NBC paid \$6 million for the broadcast privileges. The network will get its money back by charging \$370,000 a minute for commercials, an industry record.

the Sun Devils' fast break and free substituting counter-acted the Bruins' outside shooting. But after the score was deadlocked six different times, forward Tony Zeno sank two jump shots to give ASU a 24-18 advantage.

Nehemiah bolts to second record

Super Bowl lineups

DALLAS

PITTSBURGH

NEW YORK (AP) - Renaldo Nehemiah, the brilliant University of Maryland sophomore, bolted to a world indoor best for the second consecutive night, winning the 55-meter hurdles in 6.88 seconds in the U.S. Iniviational Track and Field Meet Saturday night.

The 19-year-old Nehemiah, ranked No. 1 in the world, got off to a flying start and held the lead throughout in beaing archrival Greg Foster of UCLA and the Muhammad Ali Track Club

Friday night at Philadelphia, Nehehmaih and Foster, rated No. 2 in the world, had dead-heated for first place in the 60-yard hurdles in 6.95 seconds, bettering Nehemiah's previous mark of 7.02 set earlier this year. Fifty-five meters is 5.35 inches longer than 60. yards, and therefore Nehemuah will get credit for the 60-yard indoor mark.

In this second meeting in two nights between the brilliant hurdlers, ther e was no question about the winner.

The quiet, soft-spoken Nehemia h. from Scotch Plains, N.J., who- coritends that his technique still is far from perfect, was first out of the blocks after two false'starts -- one b'? Foster and the other by Kerry Bethel

of the Philadelphia Pioneer Club. And no one came close to catching him. Foster was the closest, finishing second in a distant 7.09 before tum-

bling as he crossed the finish line. Afterwards, Nehemiah said he did not know how much faster he could

"I guess the perfect race is wherever I want it to go," he said. "Maybe if Greg had been right there tonight, the time would have been lower. "I'm not satisfied with this time,

but last night I was tied and I don't like to share world records."

"Last night, I was not really prepared mentally for the race," he added. "But tonight I was forced to get prepared. The closer I got to New York, the more hyped up I got. This is home for me - it's not New Jersey, but it's close enough."

Nehemiah was one of 13 defending champions in the men's events.

Harvey Glance of Auburn, a 1976 Olympic relay gold medalist, won the 55-meter dash for the third consecutive year, edging indoor record holder Houston McTear of the Muhammad Ali Track Club in 6.17 seconds.

McTear finshed second in 6.20, shading Steve Riddick of the Philadelphia Pioneers, the winner at Philadelphia Friday night.

Brenda Morehead of Tennessee State University, the American outdoor record holder at 200 meters, won the women's 55-meter dash in 6.83 seconds. Pat Dunlap of the South Jersey Track Club and Maria Parsons of Morgan State, tied for second at 6.94

DETROIT (AP) — Bob MacMillan scored twice, then set up the gamewinner by Eric Vail, as the Atlanta Flames downed the Detroit Red Wings 4-3 Saturday in the National Hockey League.

Vaclav Nedomansky notched a pair of goals for Detroit, which lost its second game in as many nights and remained in last place in the Norris Division. Atlanta, too, is in the basement, but it's Patrick Division record of 25-18-4 gives it 54 points - 23 more than the Red Wings.

Atlanta grabbed a 2-0 lead in a 43-second span of the first period. Jean Pronovost scored at 3:50 and MacMillan, the Flames' leading scorer, got his 21st goal at 4:33. Nedomansky, Detroit's scoring leader, notched his 18th on a power play at 14:54 and Danny Labraaten scored on a 20-footer 95 seconds later

Mrs

Nedomansky gave Detroit a goal lead with 2:57 left in the second period by flipping a backhander in from a sharp angle after stealing the puck from Atlanta defenseman Pat Ribble and faking goaltender Rejean Lemelin to the ice.

MacMillan got his second goal and 22nd of the season at 5:26 of the final period when his shot bounced off the shin guards of sprawling defenseman Thommie Bergman and eluded goalie Rogie Vachon during a power play.

BOULDER, Colo. (AP) - The Chuck Fairbanks-New England Patriots-University of Colorado legal battle has gone into overtime here, with no indication the resolution will shed any light on the complicated issues

A 11.651

TON (109)

The legal war, being fought on two fronts, already has produced a suit, countersuit, preliminary injunction, appeal, request for temporary injunction, and three motions for dismissal.

A hearing in Boulder District Court resumes Monday afternoon. Judge Richard W. Dana must rule on the three motions filed by the Patriots, and then presumably hear arguments on a request by Fairbanks and the University of Colorado for a temporary injunction that would prohibit the Patriots from interfering with Fairbanks' right to seek employment outside the National Football League.

Fairbanks has announced his intention to leave the Patriots and become the new head coach at Colorado, but the Patriots have obtained a preliminary injunction from a federal judge in Boston preventing the coach from signing a contract with Colorado.

In the most dramatic testimony, Fairbanks said Friday that even though he has four years remaining on his contract, he's finished with the Patriots after he coaches the American Football Conference team in the Pro Bowl on Jan. 29.

'When that game is over, I'm done, regardless of what happens in the courts," he testified. "I'm not coaching the Patriots after that. My intentions are to coach at Colorado and to get my family out of that intolerable situation. I live in a country where I don't think I have to coach the Patriots, and I won't.

Fairbanks cited the demands of turning a floundering franchise into a winner during his six years with the NFL team, and said he won't continue to disrupt his family life

"I'm mentalby tired of the job I've been doing," he said. "The situation recently has deteriorated so much that I won't expose my family to it any more . I cannot and will not do the job any longer.

Charles Sullivan, vice president of the Patriots and son of the team owner, also testified Friday, and addressed himself mainly to the right of the NFL commissioner to arbitrate contract disputes.

One of the three motions filed by the Patriots seeks a stay in proceedings pending arbitration of the contract dispute by NFL Commissioner Pete Rozelle

"In no case in the history of the NFL has it been determined that the commissioner did not have the authority to arbitrate disputes," Sullivan testified. But he later conceded that the right of an NFL coach to seek employment outside the league never has been arbitrated.

Patriots attorney Walter W. Garnsey Jr. contended that the NFL constitution and bylaws, as well as Fairbanks' contract, call for arbitration in cases of disputes. "The documents speak for themselves, they're not ambiguous," he said.

But John Russell, an attorney representing Fairbanks, said the contract isn't clear, and maintained that Fairbanks "has a constitutional right to choose his employer, and you cannot arbitrate a constitutional right."

'79 Permorama

The year 1978 was another fantastic one for the vast Permian Basin Empire of West Texas' and Southeast New Mexico, of which Midland is the Headquarters City.

The year just ended might well be termed "explosive," with records having been blasted at practically all levels, economic and otherwise. It perhaps was the best year on record.

But there is nothing particularly new or surprising about this, since Midland and the tremendous region it serves have been establishing new and impressive records one right after the other for many years.

Progress has continued to be in the forefront as the overall economy of the city and section soared to new highs.

And this, then, forms an impressive, rose-colored backdrop for the yet young 1979 as it moves across the stage. It appears now that the new year will be equally as good and perhaps even better than was the record-shattering 1978

Residents of the Tall City of Midland have had little time to look back as they moved faster and faster in an effort to keep pace with progress, and in planning future programs and activities. It's great, it's exciting and it is all taking place right here

It is a thrilling experience, reviewing the recent past and looking ahead into an exceptionally bright future.....and this is what this "Permorama '79" edition is all about. It chronicles the rapidly developing drama of continuing progress in Midland and the Permian Basin Empire. The fantastic account is presented in news stories, pictures and advertisements appearing in this particular edition. This is a story of a prosperous, progressive, productive region blessed with an abundance of natural resources, a near-ideal climate, and populated by an industrious, far-sighted and alert people who believe in the free enterprise system, a balanced budget and a strong America. They have faith and confidence in the future, and they are willing to invest their means and their efforts in the building of an even greater and better region.

continuing the fast and furious pace set in previous years.

Bank deposits at the end of 1978 were well in excess of \$824 million, marking the first time combined deposits of the city's five banks had exceeded the \$800 million mark. The deposit figure was up more than \$83 million from yearend 1977.

The city's building permits totaled \$87 million as 1978 drew to a close. This represented an increase of some \$20 million from the year previous.

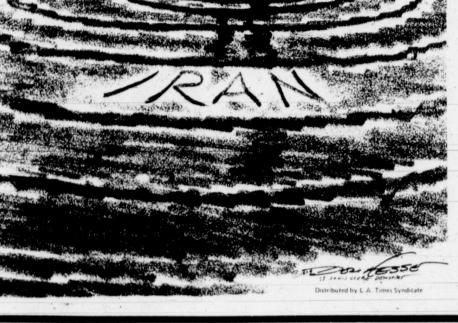

Construction continues on a , large number of projects started during the last year, pointing to a continuation of the building boom in the months ahead

The petroleum industry, of course, yet holds as the region's major industry, with major companies and independent operators striving diligently to find and produce additional oil and natural gas to help ease the nation's energy crisis. The number of oil and related firm's continues to increase, which also tends to boost the population figure.

Another growth factor is the continuing industrial expansion highlighted by announced plans of a major industrial firm to start construction of a large plant here later this year. More and more companies are looking to West Texas as the location for new and expanded plants

Agriculture expects increased production in 1979, with improved moisture conditions at the start of the year

Retail and other commercial interests also are going strong and expect to continue in that most favorable position

CHARLEY REESE Women are different,

ideology notwithstanding

By CHARLEY REESE Sun Belt Syndicate

ORLANDO, Fla. - Pope John Paul II is catching heck from the tweety birds in the Equal Rights Amendment ranks who are ideologically committed to the funny notion that human genetics and instincts can be changed by majority vote.

The Pope had the audacity to remark that motherhood is the vocation women. When you consider that Mother Nature discriminated against men and denied them the mechanical tools with which to bear children, the Pope's statement does not seem all that extreme

Actually, I hesitate to write about the ERA. Of the world's billions of souls, the ERA is of concern only to a smattering of upper middle class American women, a gaggle of frightened American politicians, and a sprinkling of comrades from other countries who have been assigned to women's rights as their task in the revolution.

When you consider that 85 percent of the world's population have lost their rights to life and property and the other 15 percent are in imminent danger of losing theirs, then the furor staged by a few over-fed, over-paid, over-pampered American women drops easily into its proper slot - the theater of the absurd

The ERA movement is tantamount to a campaign to put a potted tulip in every window - begun during the Middle Ages. It's like a passenger on the Titanic rasing heck with a waiter because the champagne is too dry. It's like a Hiroshima businessman complaining about high taxes the day before the A-bomb fell.

Honestly, you've got to have your gut stuffed full of food and your brain emptied of any knowledge of human affairs before you can say with a straight face, "Passage of the Equal **Rights Amendment is the most press**ing cause I can devote my time

Otherwise you would realize that women already have enough equality. They have an equal opportunity to starve, to be blown to bits, to be unemployed and to suffer slavery, prison, diseases and all the other ills which affect mankind.

Ideology notwithstanding, women are different. They have different organs, a different bone structure, and different muscles. They are constructed to produce babies. Since survival of the human race depends their doing that, I hardly think it is a cosmic put-down.

Anybody who thinks it requires less intelligence, less strength of character, less dedication, less energy and, less creativity to be a good mother than it does to be the president of a business is obviously too stupid to be either

The fact that a woman can votuntarily choose not to be a mother is no more going to change her biological programming than a man who chooses to be celibate can change his. The human being has the power to disregard temporarily his basic nature but not the power to avoid paying the price

It is ironic that if the ERA passes, it will pass because predominantly male legislatures voted for it and that it will be meaningless until implemented and interpreted by the Con-

Promises versus performance

WASHINGTON MERRY-GO-ROUND

By JACK ANDERSON

WASHINGTON - Comparing a politician's performance in office with his campaign promises may strike the politician's supporters as the ultimate in journalistic dirty tricks. But in the case of a president about whom little was known beyond his campaign rhetoric, such a comparison is a legitimate yardstick with which to measure the man's

character. An examination of the record. from griculture to Wear Contro shows Jimmy Carter to be a Zigzag President. He has backtracked on more issues than perhaps any chief executive in modern times

paign oratory. He outpromised Jerry \$95.7 billion Carter inherited for fiscal Ford, and if his promise has failed to live up to his performance, the public is entitled to be reminded of it.

Here are some of the twists and turns that our Zigzag President has, rightly or wrongly, followed between the high-falutin' principles of his election campaign and the lowfalutin' practicalities of his performance as chief executive:

- Taxes. One of Carter's campaign promises was that he would "never increase taxes for the working people of our country and the lower and middle-income groups." Within four months of his inauguration, he urged an increase in employee contributions Soviet dissident Andrei Sakharov, to Social Security. Carter assured the Kremlin he wasn't

1977 to \$103.1 billion in fiscal 1978. The estimate for 1979 is \$112 billion Nuclear weapons. In his inaugural address, Carter promised to work for "elinination of nuclear

To the

An excellent business climate prevails here, attracting new business and industry to the Permian Basin.

Midland, in 1978, experienced one of the greatest years ever.

NICK THIMMESCH

It all adds up to excellent business conditions here and elsewhere in the Permian Basin Empire.

Progress is the word for it, and it is_due_to continue its thrillpacked drama as "Permorama '79''-unfolds.

IT HAPPENED HERE

- 30 YEARS AGO ; Jan. 21, 1949); George T. Abell, Midland oil operator and civic leader, was presented the Silver Beaver Award for distinguished service to boyhood at the annual meeting of the Buffalo Trail Council, Boy Scouts of America. last night at Big Spring.

Midland Jaycees held an informal discussion of their projects at their meeting today noon. Irby Dyer presided.

Slow: soaking rains fell in Midland and vicinity during the weekend.

This was inevitable, considering Carter's background - an "outsider" with political experience limited to a single term as governor of Georgia. If his proposed solutions to the nation's problems turned out to be simplistic or unworkable, it could be explained away as simply a case of harsh reality catching up with a well-meaning outsider's high principles.

But Carter's chief claim to the voters' affection was his supposedinnocence of how things were done in Washington. He owed his election to the image he created of a man who would straighten out the mess in Washington by refusing to go along with the established technique of wheeling and dealing, a man whose strength, like Sir Galahad's, "was as the strength of ten because his heart

was pure. So we may be forgiven if we hold Carter's feet to the fire of his cam-

Carter promised to seek tax reform. and he specificelly vowed to repeal the deduction on mortgage interest. which favors the rich over the poor. the homeowner over the renter, the suburbanite over the city dweller. He dropped this idea once he was elected.

Farm prices. Like most presidential aspirants, Jimmy Carter promised to see that farmers were paid a reasonable price for the food they produced. But Carter threatened to veto a congressional farm bill that would put farmers in the black with federal subsidies, saying that it would cost the government too much money. His pressure forced modification of the price-support bill.

Defense spending. Carter promised the Democratic Platform Committee in 1976 that he would trim \$5 billion to \$7 billion from the Defense Department budget. Yet defense spending increased from the

Will Proposition 13 help germinate new thinking?

WASHINGTON - If necessity is the mother of invention, as the ancients proclaimed, are there any pregnancies out there in state and local governments as a result of Big Daddy Howard Jarvis' Propositon No. 13?

What I am asking is, now that countless tax jurisdictions operate on restricted spending - by law or philosophy - is anybody coming up with new ideas on how services can be provided when money is short or gone?

Proposition 13 and its mentality are a disaster to government spenders everywhere, a hardship on many worthy citizens and a temporary joy to taxpayers. So, until the alternate caterwauling and jubilation die down, governments are going to have to contain budgets and programs and lay off employes. Most officials are resigned to living with the new frugality for the foreseeable future.

But I wonder how many who regard this as an era of travail, reflect on the notion that beneficial products can come out of adversity? If World War II was a horror which took 50 million lives, it also produced a generation of wonder drugs (penicillin, et. al.) pushed us into the jet and space age, and even made driving easier for lay-back motorists who came to enjoy power steering and power brakes, both spin-offs of military technology.

So if there is any Yankee ingenuity left in the Republic, particularly in the halls of government administration, perhaps it will be put to work on the new realities. Besides budget trimming and layoffs, there is a great

opportunity here to consolidate government services and eliminate duplication. For example, adjoining fire districts, each with a full complement of firemen and equipment, could be merged. In California, there are some 9,000 tax districts, and if that isn't a challenge to consolidators, I don't know what is.

Vandalism plagues every local government. Several years back vendors advertised "vandal-proof" items. Today, they are only called "vandalresistant." Plastic windows instead of glass, park benches that resist everything, street lights that rebuff rocks - all these can cut vandalism's staggering costs. And perhaps volunteer wardens or monitors, working their neighborhood to find out who smashes windows and who throws the rocks, can also help keep spending down.

If you call around the various organizations dealing with community life-the National League of Cities. the U.S. Conference of Mayors, the Urban Institue, and others-reports of innovation are scarce, but complaints about Howard Jarvis are many. "Right now adminstrators are

trying to do the traditional thing by lopping off big expenses." one official told me. "It will take some time before innovations are worked out."

But there are some. In Contra Costa County, Calif., the children's shelter was closed to save money - but a lagging effort to place orphan children in foster homes was stepped up. Near San Francisco, the East Bay **Regional Park District went against** public sentiment and upped its use charges for facilities. By putting more of the costs on the users, governments bring the new reality home fast. A homeowner suddenly faced with a 40 percent rate hike in sewerage fees, for example, finds out what Proposition 13 really is.

In Suffolk County, N.Y., free transportation for senior citizens and lower income people had to be cut back because of budget trimming. This is one of the first services to go in many communities. How do old people who don't have cars get to the doctors or to the store? Mention the idea of recruiting volunteer drivers, say, college students, and the bureaucratic response is: What will the public service employes union say, and what about liability insurance?

For many years, mayors and governors have harped on the need for revenue sharing, less regulation from Washington, and the freeing-up of creative energies on the local level. Now that these mayors and governors face the Era of Proposition 13, are they going to show their stuff by putting their minds to work on how to make do without going to Uncle

Sam If you read, say, a Governor James R. Thompson (Illinois), one wonders. In a recent article, Thompson argued that his colleagues are so "hooked" on federal dollars, that they are locked onto a federal mind-set.

Washington is laced with offices representing states (three-fifths of them) and scores of cities and counties - all determined to get their share of the federal boodle.

Moreover, to get more federal money, the locals must spend more local matching money or at least ensure a "maintenance of effort" (meaning don't cut the budget.) Egads, perhaps there is no room for

made with the inexperience of 1976 innovation, if our governments are so thickly staffed with coordinators, special assistants, consultants, re-**BIBLE VERSE** source personnel and "spokespersons." How can anyone think clearly and with originality in this bureau-

OP-ED

LETTERS TO THE EDITOR

A beginning

To The Editor:

The concept to use Lee High School for all junior and senior students and Midland High School for all sophomores is a beginning.

Please do consider that Midland High was built when the downtown area of Midland was very peaceful, but time has changed that situation. Midland High is sitting on a piece of property that might well provide another high rise building and more parking area. The downtown area is not likely to move east, nor south and it is very possible that it might move west in the very near future.

Also, please do consider that our children are now being bused in the 4th, 5th and 6th grade and through the 7th, 8th and 9th grades. This brings changes almost every year already and with the new suggestion they will additionally be bused to their 10th grade classes and adding an additional change for high school. Buses and gasoline cost money and from recent news there is to be a shortage of both items in the very near future. Constant changes and busing from here to there every year can be over-done and it also does away with school spirit and a feeling of belonging.

If the present system of busing grade school children is kept, it seems possibly we could return our junior high students to their home locale for the 7th, 8th and 9th grade years. This would allow these energetic students to get to and from school by themselves for three years and give them a junior high "home" school. Upon completion of the 9th grade, we could then bring the students all together for the 10th, 11th and 12th grades with them unified and supporting their ball teams, etc.

Much less busing would be done as many students would be driving and have their own transportation to high school and Midland High could be sold and good use of the area made in our 'breadbasket" in the Tall City.

Yes, this new concept is a beginning, but children, time, money and future, should all be considered. Barbara Keaton

Cambodia again!

To The Editor:

Here comes Cambodia (now Kampuchea) again! Over the years we have granted that country much in foreign aid "loans" only to have it thumb its nose at us when it is of such a mood

One cannot condone the aggression of Vietnam, but neither can one feel too concerned over the demise of the Khmer Rouge. A more ungodly, despotic, tyrannical and genecidal re-

Hold fast!

To The Editor:

In a religious news article Dec. 30. 1978, in The Reporter-Telegram it was stated that "the nation's leading New Testament scholars have decided to discuss and vote on parable by parable, saying by saying which words of Jesus in the gospels are most likely authentic and which were 'put into His mouth' by early church tradition.

It will be interesting what these scholars will come up with. If they use the "modern critical methods" as they say, they will then be predicting the outcome of their study, as far as Bible-believing scholars are concerned. High criticism is generally dead except as regards the Bible. It is strange that these methods have been abandoned in other fields of literary study but not for the Bible despite the reality that more factual material is available to prove its reliability.

The article also implied that the Bible is not inerrant when it said: 'most of the New Testament specialists expect some heat from Christians who believe the Bible is unerringly historical." Christians everywhere hold to the fact that the Bible is without error because it came from God. The Bible says: "Holy men of God spake as they were moved by the Holy Ghost" - 2 Peter 1:21 and "all scripture is given by inspiration of God" - 2 Timothy 3: 16. These are the clear-cut words of scripture and Christians still hold to these unerring truths. If Christians don't hold to this particular truth that God's Word is without error, what would be sure and certain? So Christians would have no hope for a future life in heaven with Jesus, because the modern critics would tell us, "there is no historical Jesus, there is no heaven and hell. Christians, "hold fast the form of sound words, which thou hast heard of me, in faith and love which is in Christ

Jesus" -2 Timothy 1:13 Rev. Robert Neumann

Special prayer

To The Editor: All of our government officials (elected and/or appointed) need our prayers, however, a special prayer is needed for each of those who propose(ed), advocate(ed), vote(ed) for and/or otherwise support(ed) the degradation of our national defense posture in such ways as: 1. Panama Canal Treaties. 2. SALT I and SALT II.

3. Murder of the B-1 and Minutemen Projects.

4. Reduction of military bases, military manpower, and existing defense hardward.

Pilgrim statue

To The Editor:

I would like to call to the attention of the people of Midland the fact that a very unusual work of art will be visiting Midland from 7:30 p.m. Wednesday, Jan. 24 until 8 a.m. Jan. 25. This work of art is one of two statues of the famous apparition at Fatima, Portugal. The statues were carved under the guidance of Sister Lucy, the only survivor of the three chilren in Portugal to witness the 1917 apparition of the Mother of God, in which she predicted the rise and spread of communism over the world unless the world begins to live up to the teachings of Christ.

These two statues, known as the "Pilgrim Virgin Statues of Fatima," have been traveling throughout the world for many years as an inspiration to men of all nations and faiths to join in prayer for world peace. There are only two of these traveling statues in the world, though there is a copy left in Vietnam by the request of the Vietnamese people, and another copy in the chapel of the American Embassy in Moscow.

During the visit of one of these statues to Vietnam, a large public gathering of Buddhists, Hindus, Protestants and Catholics praved together for peace in the world and the conversion of Russia, the first time for all these faiths to unite in prayer in the history of the East.

With the blessing of our pastor, I extend an invitation to all who are interested in World Peace to come spend a few minutes in quiet prayer with us while the statue is on display at St. Ann's Catholic Church, 206 North M St

There will be a special service at 7:30 p.m., Jan. 24; lasting approximately an hour. After this time the statue will be displayed all through the evening and early morning hours, with those dedicated to World Peace in attendance at prayer. Please join us

Rang-A-Ule day

To The Editor

Hooray! Rejoice! The day of Rang-A-Ule is coming!

What? You ask what the day of Rang-A-Ule is? Why, the people of Midland have such a day every two orthree years. So, for the uninformed, I will attempt to explain.

A Rang-A-Ule is a combination of Orangutan and an alcoholic mule. Now, the Orangutan, when he is not riding the mule on Rang-A-Ule day, is an assistant to the planning coordina--tor of boundaries in the Midland Independent School District. At times, he sits in on administrative meetings bles (that's when he goes up an alley or crosses a vacant lot), but he always gets back on course. Thus, the boundaries are established, and the day of Rang-A-Ule begins. Oh joy, what happiness!

The above was an attempt at satire. My deepest apologies to the orangutan and the mule. J.M. Horton

Midland

Big mud hole To The Editor:

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Pioneer Natural Gas Co. may well need more money, but I do not think the City of Midland should allow them to raise their rates to their custom-

About the first part of November 1978, the gas company had a contractor dig up and replace the gas line on South A Street. They had the streets and parking blocked off for several days with about nine men on the job -three were working and six were watching.

Before Thanksgiving, I paid a plumber several dollars to find out that our sewer line was not stopped up, but the contractor for the gas company had crushed the city sewer

After Thanksgiving, the city repaired the sewer line and we were back to normal, except the ditches dug in the street have yet to be covered with blacktop. We had a few days of bad weather, but not a few months.

So, I suggest the gas company diversify and set up shoe shine stands on South A Street to obtain their needed revenue. I'm sure business would be good for a long time because it looks like we have a permanent mud hole in near downtown Midland. . Lee R. Johnson

106 South A St.

More than a bike To The Editor:

My 10-year-old son came to me and said, "Dad, my mini bike is gone. If you could only see the disappointment on his face. Yes, someone came into our back yard and took the bike. The police said it was probably taken for a joy ride and would be dumped somewhere when whoever took it got through with the bike.

My son and I had a good time when we got together, he would ride his and I would ride mine

I don't really understand why some people do these things. My son's heart is broken. You can see this in his face when we are out looking for the bike. It is really a sad one.

Nuclear facts

To The Editor:

The yellow Honda Z-50 is gone now, so is a part of the love between a father and son they shared together

It's too much

To The Editor:

An open letter to TV networks: Trying to cash in by imitating a

trend" which has caught the public's fancy can be understood. If the imitation is pretty good in imitating a currently popular theme - whether it's life in the legal or medical profession, life in prairie or outer space,

whatever - success may follow. Imitating a satire is more risky. I

enjoyed "Animal House." I admit it. Five minutes of "Delta House" was too much. M.A. Bonnar

Midland

A few facts

To The Editor:

In a Jan. 15 editorial about Rep. Sam Stratton of New York and Rep. Dan Daniel of Virginia investigating the Hale Koa hotel, you stated that the hotel was a spa for retired officers who pay 60 percent less for rooms and services than at private hotels in Waikiki. The retired officers and enlisted personnel who take advantage of the Hale Koa are receiving an average of 40 percent less pay than their counterparts on active duty. All active duty personnel from Army, Navy, Air Force and Marines from Korea, Japan and other far eastern stationsas well as the Continental United

States have first choice of rooms with retired personnel using those left over. At certain times of the year, I'm sure that there are more retired personnel who do take advantage of the empty rooms.

When we were in Hawaii, although we did not stay at the Hale Koa, but at the more expensive Sheraton Waikiki a short way down the beach, we visited the Hale Koa one Saturday. There we saw families with small children on the beach, an indication to me that

they were young enough men and women to be active duty personnel, although I didn't ask. There were also a number of teen-agers as well as older people.

I can't understand why the Vietnam veteran would say "Hear Hear" to closing the hotel when - if they had stayed on active duty in the service of our country long enough to retire they, too could have the benefit of the hotel. Actually, the rooms, although less expensive are definitely not camparable to the Sheraton Waikiki, as hey are smaller.

It seems to me that when writing an editorial, although an opinion, there should be more than just words expressed. There should be a few facts to support the opinion.

Lemuel R. Goodwin Major, U.S. Army Retired would like to tell you how the concert actually went - Great Concert! "Angel" rocked right and Ted Nugent sings to make people happy. **Corey Petree** Midland

PAGE 9B

Poor taste

To The Editor:

I am 15 years old and I am extremely disturbed about the biased articlewritten on Ted Nugent and his concert, in Midland's Chaparral Center. If this article would have been written in a "Critics Corner" it may have been in good text; but this information has put one-sided ideas in the minds of those readers not at the concert. If approximately 7,000 peo-ple paid money to hear "...shrieking sounds, music (?) ... " than maybe 7,-000 West Texans know another side to Ted Nugent's "erratic style of play."

I found this article to be in poor taste and I urge you to choose a different or less one-sided rock and roll concert informant.

Jeff Howes 903 Douglas St.

Stagnant taste

To The Editor:

It is a terrible injustice for someone such as Ed Todd, whose musical tastes stagnated several decades ago with the soft Frank Sinatra sound, to attempt a review of a current, youthoriented rock 'n' roll band. Be careful, Mr. Todd, your age is showing.

Perhaps you reviewed the concert rom somewhere in the parking lot. The dynamic energy, the rhythm, the hard-driving rock 'n' roll beat, the spectacular light show, all this and more ignited the crowd. Ted Nugent energized the audience for an incredible two hours. He guided the crowd's emotions from song to song. The driving beat was only momentarily interrupted by Nugent's excellent guitar riffs, which magnificently demonstrated his mastery of his instrument.

One doesn't "whistle a happy tune" to rock 'n' roll, one flows with the driving beat; the music doesn't "soothe" a rock 'n' roller, it energizes, entrances, captures the mind and body. Ted Nugent masterminded the performance from beginning to end, the result having been, uncontestedly, Midland's foremost rock 'n' roll event of the year.

So Mr. Todd, next time a rock concert favors this small Texas town, stay home and watch "Laverne and Shirley;" at least that is something you can comprehend.

Loveable man

To The Editor: The unknown custodian at Sam Houston Elementary School is named Abel Contreras. He is a lot more than just a custodian, he is a nice, loveable man and every time something is broken you can always depend on him to come and fix it. At lunch, he is very helpful, he takes the teachers' trays, and he goes around table to table to talk to the students and sometimes takes our trays. We think he is a very special person.

Signed by Mrs. Mary L. Johnson. teacher, and the 28 members of the 5th grade class, room 119.

and helps some members of the school board when they have to "bite the bullet," or make a decision of major importance without consulting their constituents. The mule, although handicapped by his inability to stay away from the sauce, keeps the grass clipped around school property. In addition, the threat of making one (one being-defined as person or persons who disagree with the administration or school board) ride such a dangerous animal in his most tipsy condition is horrifying. The thought makes even the strong-hearted back off.

Now to the day of Rang-A-Ule. On this day, the boundary lines are drawn to indicate which high school ayoung person will attend in Midland. In recent years, the attendance lines have appeared to favor. Midland High, much to the dismay of Lee High. The question of "why" is most prevalent. It's simple. The leadership of Midland High supporters has been more effective because of detailed planning. On the morning of Rang-A-Ule, they very carefully place buckets of beer along a predetermined route that covers the portion of town that they wish to attend Midland High. The mule not only has a taste for beer but also a nose for same and walks the beer-lined route. He sometimes stumwhen they rode together Jerry Epperson

Strange reviewer

To The Editor:

Having attended many rock concerts, including Led Zepplin, Z-Z Top, Bob Seger, Black Sabbath, Boston, Foghat, and two different concerts in Austin and Dallas featuring Ted Nugent, I must overwhelmingly disagree with Ed Todd's statement, Any class amid the hard rock 'n' roll certainly wasn't Nugent ...

Todd's most obviously narrow minded (bordering on ignorance) approach to rock music criticism plus his Sinatra and Dorsey vs. Nugent comparison added up to a totally inadequate critique of Saturday night's concert.

No mention was made of Nugent's renowned tight precision guitar playing, nor his dynamic rhythm guitar, bass and percussion back up, who blend together to produce an exciting powerhouse of rock music! (Not Dorey or Sinatra swing-era melodies!)

Following the concert Saturday night about 25 concert goers related to me that the concert was, in their pinion, thoroughly enjoyable and exciting. Further, we believe it was the biggest thing that has hit Midland.

In the future, I believe The Reporter-Telegram should assign a more knowledgeable rock music reviewer than the "strange" Ed Todd. **Freddie Calderon**

1301 E. Front St.

ed a disaster in January 1977. On that Did he go? day of killer cold, the coal piles were frozen and the oil barges were immobilized in the Ohio River ice, as a,

To The Editor:

I haven't much to say for Ed Todd's review of the Ted Nugent concert except it was reported through the typewriter of someone who didn't like rock 'n' roll, didn't like Nugent, and had decided all this previous to the concert (did he go?).

This must have been so, because if Mr. Todd had not been so prejudiced and nit-picking during the concert, he would have enjoyed it and written an enjoyable review, rather than one which grossly exaggerated and slandered events at the concert.

For example, Nugent didn't wear incredibly tight blue jeans, he wore black tights, which are supposed to be tight. He didn't use his mike stand as a "cane, stick horse, and sex object" the lead singer for "Angel" came, closer to that. Yet another correction: 'Nugent may have thought the concert was over. The Chaparral Center was darkened silence." - technically speaking the concert was over, but not finished, it was encore time. Why should Nugent think it was over? Certainly he has more experience putting on a concert than Mr. Todd.

The Reporter-Telegram should send_someone with some common sense, less prejudice and a more open mind to review concerts. In closing, I

Mary J. Goodwin Slanted viewpoint Midland

To The Editor:

Ed Todd's review of Ted Nugent last weekend was written with a preconceived, slanted viewpoint. For him to review our age group's entertainment is comparable to our reviewing a Frank Sinatra concert.

In our opinion, along with most of the audience's, Ted Nugent is, was, and will be the best performer ever to come to the Chaparral Center. Ted Nugent provided a lightning experience of hard rock and roll.

We would remind Mr. Todd even Frank Sinatra had his critics, though not among his hysterical, weeping, fainting fans.

Please send one of our peers to review the next rock concert - and save Mr. Todd for when Lawrence Welk comes to town.

> Susie Scott **Debra Wilson Toni Herring**

Unjust evaluation

To The Editor:

Last Sunday, Ed Todd certainly voiced his opinion of the Ted Nugent concert - unjustly, I think. Most of the remarks Mr. Todd made were uncalled for and very biased. I'm no avid fan of Ted Nugent's and rock-nroll isn't my favorite music either. I still believe that a performer should be given credit when credit is due.

The difference, Mr. Todd, between Sinatra, the Dorsey Band and Nugent is not "Frank Sinatra would sing and sing well. And the Tommy Dorsey Band could play that music and how. The difference is in your narrow mind. I, personally don't care too much for Frank Sinatra's singing, but I'm not so biased that I don't consider him to be an excellent performer.

The definition of performer is as follows: fulfill, to carry out, accomplish, to do in a set manner, function, to give a performance, play, synonymous with execute, discharge, achieve, effect. Nugent did all those things. Whether it is a "strange event" isn't up to you or me but to the public response, and anyone at the concert certainly saw and heard the positive response Nugent got.

Objectively speaking, the Angels, whom you didn't care to criticize so fervently, did not receive near the positive audience response Nugent did. You wrote "Before Nugent appeared, there was Angel, a five-piece rock band with more color and relative class than Nugent." If the Angels had more color and class than Nugent did, the audience didn't notice.

Mr. Todd, I believe you walked into that concert with a closed mind. I'm certainly not as versed in the art of criticism as you, but I just don't appreciate someone whom I believe is so narrow-minded that they are incapable of being objective.

Marcia Maxey 503-D W. Estes St.

'Quiet, calm deliberation' leads to successful solving of problems

By NORMAN VINCENT PEALE

POSITIVE THINKING

A prominent man in England used to proudly tell how his grandfather arrived in London with only a shilling in his pocket. This man was a politician and apparently politicians always find it an asset to talk about their poor relations. But in this case that lonely shilling was the basis for one of the world's great book-publishing fortunes.

The grandson became a typical upper-class Englishman in dress. manner and suavity. He won one of the greatest election victories in English history. His name was Harold Macmillan.

In the office of Prime Minister Macmillan at 10 Downing Street a sign hung on a wall - a sign that really said something. It read: "Quiet, calm deliberation disentangles every knot." If you want a positive success quotation, that is one for sure.

You see, whenever we let ourselves become excited, nervous or apprehensive, our minds become "hot" and cannot function at maximum efficiency. It is impossible to think at top form when we are under the heat of emotion.

It is always a mistake to think with

the emotions. Quiet, rational mental activity is the secret of solving problems, No wonder Mr. Macmillan liked that sign on his wall. It worked for him. It will work for anyone.

It is a fact that you can think your way through any situation with which you will ever be faced. Each person is fully equal to the demands life may put upon him. He has what it takes to handle any crisis. He has a good mind with which to think.

Yet some fail to handle difficult situations. Some do not have sufficient confidence in their resources to meet the problems which develop.

How can we achieve this confidence? One answer is in that sign in Prime Minister Macmillan's office: Quiet, calm deliberation disentangles every knot.'

Many people have found that faith in God can help in maintaining that attitude of quiet, calm deliberation. Prayer and meditation definitely condition the mind to quietude and create calm confidence. Once you have this, you can then go on to what I like to call the practice of "thought coloration.

In the long run we are what we think; we are what our thoughts are. If we color our thoughts with anxiety, nervousness and apprehension, we will take on all those things. But if we color our thoughts with optimism, goodness and courage, we will achieve the confidence we are seeking.

The great Roman emperor-philosopher, Marcus Aurelius, once said, 'The soul is dyed the color of its thoughts." It is a powerful truth. The personality does indelibly take on the color of long held thoughts.

So, if over a long period of time, your thoughts have been the type of thinking that destroys your ability to deal with your problems - namely, evil, fear and weakness - naturally you will lack confidence in yourself. But fortunately, by the grace of God, we can change our thoughts; we can recolor our minds. I say "by the grace of God" because often we need greater strength that our own to re-, vamp old habits of thinking. When we think thoughts of faith, good thoughts of courage, then things start changing because we are changed. By changed thinking we become strong and confident. And as a result you will find yourself achieving far beyond your expectations.

Learn to think calmly and confidently and you will be on the way to effective living.

ed a total collapse. I think it's time we urge our congressmen to promote the building of more nuclear power plants. I don't like the idea of living without electricity

'Red scare' alive

I'm sure the arch-conservatives that run this town are still in agony over recognition of the People's Republic of China. I'd be very surprised if Midland College would take, or even want, any students from there. But just think, we could show them a bustling city under the capitalist system. (But don't let them see the southeast portion of Midland.)

"Red scare" and Joe McCarthy's spirit are still alive and well in Midland, Texas.

Clements starts to prove his business-like stance

By GARTH JONES

AUSTIN, Texas (AP) - Gov. Bill Clements told Texans on inaugural day he would be a business-like governor, then set out to prove it the next four days.

This week he tries his hand at international diplomacy.

"I will continue to proceed. cautiously and carefully," he told a Friday news conference. "But you can say I am enthusiastic_and pleased.

When asked if he was ready to announce for reelection, Clements said that decision would comelater

"I've hardly got my seat warmed so far.' Clements' administra tion started off with a rush Wednesday when the Senate approved his appointment of Secretary of State George suggestions," he said dent Jose Lopez Portil-'We need their input."

"I will be acting as an At 11 a.m. Tuesday, interested cifizen,' Clements makes his first Clements said. "I don't formal address to the have to clear it with the Legislature. He admitted it would be a "little teaser," not his entire legislative program. "It'll be the first chapter. There will be other chapters later.'

He said his budget recommendations will not come until the latter part of February. Tuesday afternoon he flies to Mexico City with a party of aides and advisers for a talk Wednesday morning with Presi-

State Department. I am a representative of the state of Texas - not the United States. I don't have to ask the State Department if I go to Mexico - or anywhere else." Clements said he would talk with Lopez

Portillo about illegal aliens in Texas, a Mexico-Texas natural gas pipeline, "and all these matters that need to be explored

year, but was court-martialed in September and convicted on charges of being AWOL from the base. His punisment was a \$5,000 fine and 60 days confinement to base, but Jacobs filed a lawsuit in federal court in Fort Worth, Texas, in the meantime, and his courtmartial sentence was never carried out.

Strake and Brig. Gen Willie Scott as adjutant general without discussion or the usual committee screening. Thursday, the fast-

moving governor chose to eat a \$2.48 liver and onions lunch with state employees. Later, he visited the Capitol press rooms, asking numerous questions about news operations.

Friday, his official reception room was jammed for the first news conference of his administration. "Sure glad to see you," the governor said, obviously enjoying every minute of the question-and-answer contest.

He briefed reporters on his plans for next week. Monday, he and his staff will meet with 20 or 25 leaders from throughout the state who are interested in Mexican-American problems "We want their ideas and

Retired Brunswick head dies

HIGHLAND PARK. Ill. (AP) - Benjamin E. Bensinger, retired chairman of the Brunswick Corp., died Friday of cancer. He was 73.

Bensinger was a greatgrandson of the founder of Brunswick and was with the firm for 47 years. He relinquished his chairmanship of the board in 1971 and retired as chairman of the firm's executive committee in 1975.

Bensinger was the father of Peter B. Bensinger, head of the federal Drug Enforcement Administration and the **Unsuccessful Republican** candidate for Cook County sheriff in 1974.

During his long career with Brunswick, Bensinger also was active in many civic and charitable efforts as well as other businesses, including serving as a director of the American National Bank and Trust Co. of Chicago and the George Washington Life Insurance Co. He also was a trustee of the University of Chicago.

Nuclear Regulatory Commission opens way for new safety debate

WASHINGTON (AP) - The U.S. Nuclear Regulatory Commission has set the stage for renewed debate over nuclear power plant safety, repudiating a report it has been relying on for five years.

n

for a fact that al executive has suggest-

ny chapters

t the United

in order not

charters re-

y should follow

s example,'

IA

There was no indication the commission's action Friday would have direct impact on the 72 domestic nuclear plants with operating licenses or those under construction.

However, the mere existence of the commission statement and the uncertainty surrounding it was hardly welcome to a nuclear industry already struggling. Largely because of eco-

nomic pressures, the industry has review past and pending licenses to received only 37 orders for new reactors since 1973 compared to 39 cancellations. It recorded only one new sale last year

The commission's new action was praised by Rep. Morris Udall, D-Ariz., who had urged the review. "Nuclear proponents have for years used the Rasmussen study to assure the public that nuclear power is safe," he said. "The commission has now made clear that the Rasmussen report is useless for that purpose.

The commission ordered its staff to

Competency testing asked

AUSTIN, Texas (AP) - Texas legislators will be asked this session to consider requiring public school students to pass minimum competency tests

Rep. Lee Jackson, R-Dallas, filed a bill Friday that would require testing in reading, writing and math for all 12 grades beginning with the 1980-81 school year.

Demonstration of a minimum achievement level would be necessary for grade promotion only in

grades five and eight and a graduation requirement from high school. Such requirements would not go into effect until the 1982-83 school year, Jackson said. Test scores would be confidential

and could not be used to evaluate individual teachers.

"Competency testing is designed not to punish any student but to guarantee to each the appropriate tutorial and remedial services necessary to acquire minimum skills necessary to cope with modern society," Jackson said.

A testing project of the State Board of Educaton revealed last fall that Texas sixth graders are slightly below the national average in reading and math skills, he added.

to go" but added that he was "almost tempted to say there will be no tangible result. Goldstein said he assumes the commission's staff review will be looking for any licenses in which the Rasmussen Report was "crucial" to their being granted and might reopen hearings if it finds any in which the

PAGE 12B

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

By OTTO C. DOELLING

TEHRAN, Iran (AP) - Shah Mohammad Reza Pahlavi's handling of the events that forced him to leave his country is being studied here as a classic casebook of mismanagement of a political crisis. This is the view that emerges from talks with

diplomatic observers, who now assert that: -The shah displayed indecisiveness and "amaz-

ing inactivity," allowing smoldering resentment against the absolute monarchy to explode last year and ultimately to force him out of Iran, into what may become permanent exile.

-He showed lack of foresight in depending so heavily on the backing of the 430,000-man armed forces while failing to broaden the base of his support.

-And until too late, he did not act to mend fences with his powerful religious foes, to restrain his feared secret police, to halt corruption in high places, or to rein in his ambitions for converting the 2,500-year-old Persian Empire into a modern power.

THE YEAR-LONG political turmoil had a religious spark - an attack on the exiled Ayatullah Khomeini, the shah's chief religious opponent, pub-

Analysis

lished in a Tehran newspaper last January. Khomeini, an old foe of the monarchy, is the 78-year-old religious leader of Iran's 32 million Shiite Moslems. The attack was written by Amir Abbas Hoveida, minister of the imperial court and former prime minister

It proved a major miscalucation. It underrated the influence of the nation's 180,000 mullahs (Moslem clergymen), even after five decades of secularization under the dynasty founded by the shah's father

The day the letter appeared, riots broke out in the holy city of Qom. Seven protesters were killed, setting off a cycle of violence

Khomeini had been exiled in 1963 for leading protests against the shah's "white revolution" - the campaign that deprived mosques of landholdings and decreed the emancipation of women. Gradually, he grew into a symbol of political as well as religious opposition.

In addition to the army, the shah counted on the support of those who had prospered under his rule and peasants who had benefited from land reforms. But support from both groups was spotty; many were disgruntled about mismanagement of land reform and neglect of the countryside in the industrialization drive. In addition, bazaar merchants, the new class of Western-educated technocrats, and the nation's million civil servants largely threw their lot in with the opposition.

THE MERCHANTS resented price-control measures. The technocrats, who had tasted liberalism asstudents in the West, were revolted by alleged excesses of the secret police, known as SAVAK.

The oil boom since 1973 had fed corruption, spurred over-ambitious industrial projects and accelerated the rate of military spending, which opponents considered to be squandering the nation's wealth.

In defense of the shah, some maintain that he honestly sought to root out chronic corruption but was stymied because members of the royal family and his closest political supporters were involved.

Recent reports say the royal family's wealth was in the billions of dollars - although the shah turned over some of that to the Pahlavi Foundation for the use of the nation shortly before leaving Iran.

Per capita income rose from \$200 to \$2,000, but industrial workers found much of their added earnings eaten up by inflation.

So the gap between rich and poor widened, and increased material wealth threatened traditional values. Mullahs complained of an invasion by Western decadence. The boom brought in a million foreign workers, 45,000 of them Americans, and recognition of Iran's dependence on foreign technology and skilled labor fed deep-seated fear of foreign influence. Streets became choked with cars. A perpetual cloud of smog veiled the towering Alborz Mountains.

AS THAT WAS happening, a long-standing opposition was being led by the persecuted old guard of liberal and socialist politicians who had supported the fiercely nationalistic Mohammad Mossadeq, prime minister from 1951 until his ouster in a pro-shah military coup in 1953. The old guard eventually found allies among politically active academics, students of liberal and leftist persuasion - and the religious conservatives.

The unlikely mix "put aside a lot of profound differences when they focused on the shah," a Western diplomatic source said, expressing surprise that the shah "allowed the religious opposition to mingle more and more with his traditional leftist-liberal opponents.

The shah relaxed press censorship and tolerated some peaceful dissent - but concessions usually came too late, satisfied only part of the opposition's demands, and made his foes hungry for more.

Then political turmoil mounted in the late summer of 1978. The shah kept a low profile at his palace on the Caspian Sea and reportedly ignored advice to get out and lead. Martial law was declared on Sept. 8, but was unevenly enforced after troops opened fire on demonstrators in Tehran, killing 121 and wounding 200 others.

From a Machiavellian perspective, some diplomats believe the shah might have quashed the revolt through uncompromising enforcement of martial law. He opted instead for what one observer described as military "half measures" - although that appraisal is not shared by the opposition, which today mourns more than 1,500 dead.

Still, the toll clearly would have been much higher had the army not fired more bullets into the air than into crowds of demonstrators

"The shah evidently felt that, while he could hold on to power himself (through harsher measures), his dynasty would not survive," a Western political observer said. Even at the end, the observer said, the shah hoped that if he lost power, his son might regain it

Lump sum retirement payments are no problem with an Individual **Retirement Account (IRA)** at First Savings...

PROBLEM:

Simple, all you have to do is protect it by putting all or some of it in a tax-sheltered Individual Retirement Account at First Savings and Loan of Midland. You get a tax break, plus the added advantages of protecting that money and earning the current 8% annual interest rate. (effective annual yield is 8.33%.)

By putting that lump sum payment in an IRA, you've protected it from high taxes, its drawing interest daily, its insured up to \$100,000, and its a healthy sum to start your retirement.

So, if you're planning for retirement or have just received a lump sum cash payment from your company's retirement plan, come see us "THE FISCAL FITNESS PEOPLE" at First Savings and Loan of Midland. We can help you plan the kind of retirement that takes the worry out of financial matters, and allows your funds to grow the safe, secure First Savings Way. Individual Retirement Accounts at First Savings ... the Great Way to prepare for retirement ... Remember, the deadline for opening or adding to your IRA is the day your taxes are due.

7,000 Grunts, townfolk

get along in Quantico

By TED GUP The Washington Post

1

QUANTICO, Va. - "Q-town," as its 800 residents call it, is a community obsessed with the Marine Corps. Its tailors stitch Marine "dress blues," its cobblers resole combat boots, its gift shop sells portraits of "The Commandant" alongside T-shirts bearing the legend: "Grunts do it in the Mud.

Here in this small Virginia town, 35 miles south of Washington, that is surrounded by a huge Marine base, the Grunts (Marine infantrymen) and townsfolk appear as one.

DeRonda Wilkinson, the town's navor until he quit recently in midterm, citing family reasons, is a retired Marine Corps major whose critics called him "that old skin-head Marine" and accused him of "'running the town-like a dictator.'

"Happy to hear it," answered Wilkinson. "God knows this town needs some leadership."

What Quantico needs, many city planners would argue, is diversity, someting to break its economic wellbeing away from the 7,000 Marines who are assigned to the 55,000-acre base that stretches along the potomac River and nearly engulfs the town. Quantico's fortunes rise and fall with those of the Corps. When troubles brew abroad and the Corps expands, Quantico booms. Its population swells and its streets are filled with khaki-clad shoppers. In times of peace, Quantico, the townsfolk say, suffers.

But no one in Q-town complains. "The Marines are great, honey," says Rose Koutsounadis, who runs the Olympia Restaurant with her husband, Mike. "They are my bread and butter. I love them.

"We deal with the best people in the world - United States Marines," boasts another merchant, Charles T. Tylor, himself a 20-year veteran of the Corps and owner of the "Semper Fi" Gift Shop. The shop's name is a contraction of the Corps' Latin motto "Semper -Fidelis" (Always Faith-

"I'm faithful to the Corps and always will be," said Taylor, who settled in Quantico because he wanted to remain near the Marines. "It was my life and still is."

Today Taylor makes his living from Marine Corps mementoes, such as his best-selling Grunts T-shirt (5,000 this year). His second-ranking item is another T-shirt that depicts actor John Wayne in the movie role of a Marine Corp sergent and the words

"Gold Bless John Wayne." Quantico likes the image of a square-jawed, flag-waving Wayne and town fathers have attemped to mold the community in that image. There are no flashy neon lights, girlie shows and, police say, no prostitutes in the town, a sharp contrast to many

military communities "It (prostitution) has been discouraged by every legal means possible and I suspect by some not so legal means," said Wilkinson. "Over the years the town fathers have operated at a high degree of moral presence.' The Town council recently set a \$5,000 license fee for massage parlors when one such establishment expressed an interest in moving to town. The applicant withdrew the request.

"A hooker playin' our street corner at 10 o'clock would stick out like asore thumb. I'm proud of that," said Town Sergeant Richard Gabriel.

Four out of five of those arrested by Quantico's seven-man police force are Marines, said Gabriel, a 250pounder with a blond moustache that is twisted at the ends. Gabriel, nonetheless, speaks with great resect for the leathernecks' physical prowess. When you grab one you now you

got something, so you better be a good psychologist," he said. There was a disturbance in the town in 1972 that required calling out the Prince William County riot squad, but police say there has been little serious crime there - only two murders in the past decade

If the Marines provide the town with sustenance, they also girdle its nine city blocks, preventing the community from expanding or diversifying its economy.

"Incorporated as "Potomac" in the late 1800s, it was a bustling river port where shipvards attracted large numbers of Greek and Italian immi grants, When the shipyards closed and the base encircled the town in 1916, these immigrants and their children turned to cooking and tailoring for the Corps.

Today, their descendants own the majority of the town's 43 businesses. The inability to expand beyond the nine blocks has taken its toll on the spirit as well as the economy of Q-Town.

"Over the years the land-locked situation has been responsible for our people subconsciously falling into the what can we do' frame of mind. It breeds a certain desperateness for want of the capacity to expand," said Wilkinson

"Out of that has grown a certain lethargy. I suppose 'hopelessness' is the better word."

The town is full of aging housing and the main street resembles a town that has seen better times. At least 40 percent of the town's housing could not pass the local building code, if it were enforced vigorously, Wilkinson said

Elections in the town can be bitter, hard-fought affairs with all opponents stressing their credentials in the Corps.

"It was just like you were bidding for the White House. It was cutthroat, a hard-stinking' little election," said Police Sgt. Gabriel of the last election.

But the spoils of victory are few. The mayor's job pays \$3,000. 'Why should anybody buy a vote

for a job like this?" asked Wilkinson, sitting in his spartan office upstairs from the town's police desk.

Marines walk down the main street of the small town of Quantico, Va. which is surrounded by the Quantico Marine Base. The town's fortunes rise and fall with the Corp. (Washington Post Photo)

Sovereignty means little to Sinai Bedouin tribes

By FRANK CREPEAU

BIR EL-ADED, Israeli-Occupied Sinai (AP) — Egypt and Israel may settle the issue of sovereignty over the Sinai Peninsula but the stark and eerie Jand really belongs to the Bedouin tribesmen who live here.

Just over the hills from the few coastal settlements, the oil towns or the military airfields, the Bedouin Arabs go about their lives much the same as they have for hundreds of years.

In this village 15 miles inland from the Gulf of Suez, Bedouin girls take out their herds of goats when the mountain peaks cast their first jagged shadows in the morning sun. Bedouin women gather at the well and men depart for their chores in the hills

The Sinai, traditional bridge between Africa and Asia and a battlefield in Egyptian-Israeli wars, has a population of only about 100,000 and an estimated 70,000 are Bedouin tribesmen - some settled but most pursuing traditional nomadic ways.

About 30,000 non-Bedouin live in the northern coastal town of El-Arish. There are a sprinkling of Arabs and Israelis at oil sites on the Suez Gulf, a few hundred Israeli settlers on the Gulf of Aqaba and a dozen Greek Orthodox monks at St. Catherine Monastery.

In an Israeli-Egyptian peace settlement, Israel will gradually withdraw its troops from the Sinai, and Egypt will return. The Bedouin? "Nobody has bothered to ask them," said Clinton Bailey, an Israeli who lectures on Bedouin culture at Tel Aviv Universi-

The Bedouin will go on pretty much as before - making a frugal living with their herds, a bit of smuggling, harvesting date palms, tilling patches of land near oases and working for whoever controls the Sinai.

According to Bailey, there are about 30 Bedouin tribes in the Sinai, an area of 24,000 square miles or about the size of West Virginia. It seems bigger because the land is so barren.

'The Bedouin feel the desert belongs to them and any government is illegitimate," Bailey said. "Any government that takes an interest in the desert does it at the expense of the Bedouin.'

Under Israeli occupation, military disengagement lines have interdicted smuggling routes from Saudi Arabia and Jordan to Egypt. Grazing lands have been taken for army training grounds or airfields, and Bedouin camels trigger electronic sensors in the demilitarized zone monitored by a United States post set up to keep Egyptian and Israeli armles apart. Israeli authorities say they have

stopped the smuggling, but the stone houses that used to store tea, coffee or drugs that were passed from tribe to tribe on the smuggling routes still exist.

Asked about smuggling, one Bedouin at Wadi Firan conceded that he might transport something "to help a friend," but denied any knowledge of smuggling.

Modern life has impinged on Bedouin ways. Pickup trucks now kick up plumes of dust across the Sinai, rubber tubing is used to carry water from wells to cultivated plots and the plastic containers have replaced the goatskin water bag.

At a museum of Bedouin culture near St. Catherine Monastery, one item on display is a frilly, handsewn cloth cover for a transistor radio.

In Wadi Naseb, east of the monastery, a group of Bedouin children playing a rude stringed instrument made of wire, twigs and a tin can pursue a slow-moving bus. Printed on the can: "Soybean salad oil. Furnished by the people of the United States of America." The children sell two of the primitive instruments to Israeli tourists for a dollar each.

Most Bedouin won't talk openly to strangers. "They put a lot of stock in decorum and reserve," said Bailey who has spent much time with the Bedouin.

Why are so many Bedouin pickup trucks blue? Is it because blue is protection against the evil eye?

"We have other colors," answers a white-robed Bedouin.

But why so many blue trucks, persists a tourist?

"Who knows," the Bedouin shrugs. "Maybe we like blue."

The old Bedouin ways predominate. Women are veiled and hover in the background. The pickup truck hasn't replaced the camel and pitta bread is still baked directly on the desert sand with only a few brushwood coals needed to bake the flat disks.

The Israelis say relations with the Sinai Bedouin have been good and many Bedouin have gone to work at Israeli settlements, especially along the Mediterranean coast.

And, according to Bailey, the Bedouin are uneasy about the return of Egyptian rule. Like the Israelis, the Egyptians are outsiders to the Bedou-

"They are glad the military situation will be changed in the Sinai," Bailey said. "But they are concerned that they won't be able to work in Israel and are not sure if they can find work in overpopulated Egypt," Bailey says he believes the Bedouin

would probably prefer some sort of United Nations control of the Sinai and a U.N.-operated civil administration

Archeologists plan joint area projects

What? A mystery to solve in Midland?

The trail is cold, but groups from The University of Texas of the Permian Basin and Midland College are working on the case.

Velcome

UANTICO

200

The case is to determine who lived in an area around Midland long ago. The detectives are Dr. Gorden

Bronitsky, assistant professor of anthropology at UTPB; Don Forsyth, instructor of anthropology and archeology at Midland College, and students from both colleges

They plan to survey a plot of land near Trinity School Saturday to see what evidence there is of past life and culture. The owner of the land has given permission for the archeological dig before construction begins on the site.

Surveying this plot of land, as well as others in the city, before new construction covers it is important to determine whether the site has archeological or historical value, Bronitsky said. If it does, archeologists will suggest the least damaging way to complete the project in a report done after each survey, he added.

Robinson rites set

SAN DIEGO (AP) - Services for Dr. Kenneth Robinson, an internationally known nuclear physicist, will be held Tuesday at Riverside National Cemetary.

Robinson had a central role in developing the Cambridge Electron Accelerator, the world's largest instrument for studying the basic properties of matter. The San Diego native was a graduate of the California Institute of Technology and earned his doctorate at Princeton.

Working at Harvard University, he was recognized as an expert in the specialized field of high energy synchrotrons and storage rings, the most advanced theory in atom smashers. Robinson died Jan. 10 at the age of 53 in his suburban Ocean Beach

volved, United Auto Workers Vice President Martin Gerber said the

"From just a general overview of the property, it appears to be the remains of an extinct lake bed which suggests-archaic occupation around 500 B.C., but the work must be done before we can speculate further," Bronitsky said.

The schools plan other joint ventures like this one.

"Neither school has the people to do extensive research, but with the two schools combined, we have the manpower and more equipment," Forsyth explained.

Unlike other scientists, archeologists often have trouble finding data to study because evidence is destroyed before anyone has a chance to study it. This can happen as the land is cultivated and artifacts are scattered.

In a dig such as the one in Midland, determining if the data found has been there for some time or if it was scattered there from some other source is important, Bronitsky said.

Archeologist must study each artifact such as a tool, noting how it was made and guessing what it was used for. Often scientists can determine whether the person who used it was left- or right-handed, he said.

"West Texas is one of the least known parts of Texas in the archeological sense. Unfortunately, the sites where we might find artifacts are fast being destroyed by vandalism and by development," Bronitsky explained. Both instructors look for undeveloped land in the Permian Basin to explore.

'We would be glad to look at someone's land to determine its archeological value," Forsyth said. "The problem is that very few people realize we are here and ready to help in this way.

The sight-surveys and excavations give students a chance to update their skills and gain needed experience before going into the work in a professional capacity, the professors said. It also gives the residents of the Permian Basin a hint of the past - a clue to a mystery of long ago.

Shah's family moved to Lubbock air base

LUBBOCK, Texas (AP) - Several members of the family of Shah Mohammad Reza Phalavi of Iran were moved to nearby Reese Air Force Base following reports that about 200 armed Iranian students were en route here from Houston to stage an antishah demonstration.

Police sources said the family members were moved to the confines of the U.S. military installation late Friday after rumors circulated of a possible demonstration in this West Texas town

Capt. Robert Brus, information officer at Reese, said he could not comment on whether or not security at the training base had been beefed up, or whether any members of the shah's family were on the base today.

The Lubbock Avalanche Journal placed a security guard at its newspaper office and locked all doors after Texas Department of Public Safety intelligence officers told them the students were en route and"were armed with guns and incendiary devices.

Lubbock police called in extra officers and were on alert this morning after rumors that the students were on their way to this West Texas city that serves as temporary home for some relatives of the shah.

A police spokesman said about 60 extra officers were summoned and that riot control equipment was available. He said other law enforcement agencies were also standing by if needed.

"We've heard that they are going to try to get some national attention for their cause," the spokesman said. Rumors said the anti-shah students left Houston Friday night, but police there said they were unaware of any mass departures

been undergoing supersonic flight training at Reese. Earlier this week, he was joined at his ranch-style home in Lubbock by other members of the shah's family. They were identified as the shah's mother-in-law, Farideh Diva and Princess Farah Naza, 15, Prince Alireza, 12, and Princess Layla, 8

Crown Prince Reza Pahlavi has

They flew into Reese aboard an Iranian 707 aircraft from McGuire Air Force Base in New Jersey.

Lubbock police said State Department officials who have been in the city since early this week remained on hand.

The crown prince's house nestles on about an acre on Lubbock 's W. 21st Street amid other plush homes. Surrounded by a low brick wall, shrubbery and guarded by lights on standards, the home was reportedly purchased for \$250,000.

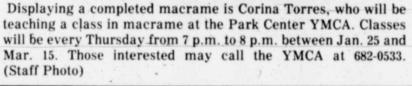

On Wednesday, some 25 Iranian students marched on the Alamo in San Antonio, shouting, "Death to the shah.

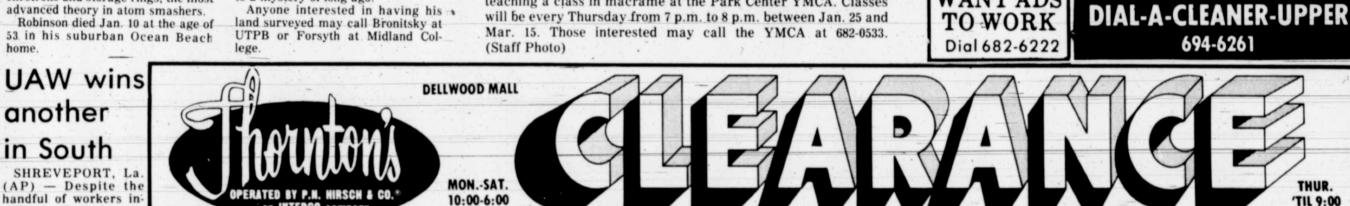

At the Texas shrine, a group of residents shouted down the Iranians with a chant of, "Deport radical Iranians

About 2,000 Iranian anti-shah demonstrators staged a wild, noisy demonstration outside an estate where the shah's mother, Tadj el Moulouk, and the shah's sister, Princess Chams, lived in Beverly Hills, Calif. last month

The women later moved to Palm Springs, Calif., and were-reportedly staying at the estate of former Ambassador to Great Britain Walter Annenberg. It has been speculated that the Shah himself might take up residence at the Annenberg estate.

Economics of 'old' oil

prove discouraging

By MAX B. SKELTON **AP Oil Writer**

HOUSTON (AP) - F.E. Ellis says the economics of producing "old" domestic crude oil are discouraging.

Ellis, Continental Oil's vice president for North American crude oil and natural gas production operations, says stronger incentives are needed to reduce declining production rates in old oil fields.

During the past five years, a twotiered federal system has controlled prices for crude from old domestic fields while permitting prices for new production to approach world levels. Continental estimates the natural production decline rate in old fields to be 18 to 20 percent a year and Ellis says other industry estimates run as high as 23 percent.

This rate of decline, he said, can be reduced somewhat by additional investment in old fields for step-out drilling, well workovers, and enhanced recovery projects.

"However, many investment projects must be deferred because either lower tier prices will not justify the project or cash flow from these fields is not sufficient to fund marginally profitable investments," he said

Ellis outlined his views while testifying before an Economic Regulatory Administration hearing on proposed rulemaking for production incentives for marginal properties.

"I submit the subject we are addressing is not how to provide incentives for marginal properties, but, rather, how do we stimulate investment in properties producing lower tier crude oil before they become marginal and are abandoned," he said

Ellis said Continental's domestic production from lower tiered crude properties account for about 50 percent of its total production.

"We currently allocate only 5 per cent of our development capital drilling budget to investments on these properties," he said.

"A much greater amount of investment would be allocated to projects on these properties if the economics were improved and the capital was available.

Ellis said the insufficiency of lower

The principal beneficiary of any increase in domestic crude prices, Ellis said, would be the federal and state governments.

"Conservatively, Continental estimates at least half of the incremental revenue from any price increase will flow to governments in the form of increased royalties and taxes," he said.

Crude price controls are scheduled

to end May 31 but President Carter holds an option to extend them to September 1981. At a news conference last week, Carter said he had not made a decision on the matter.

Ellis said. Continental recognizes intense pressures are being exerted on the White House, Department of Energy, and the Congress on the decontrol issue

Gas industry awaiting market results of act

TULSA, Okla - The U.S. natural gas industry is anxious to see how the Federal Energy Regulatory Commission will open the gates between the under the Natural Gas policy Act of 1978 (NGPA).

If the gates are opened only part way, the U.S. could miss a chance to displace imported oil with gas backed utilities away form reliance on natuup on the intrastate market, reports the Oil & Gas Journal in its Jan. 15 issue

At stake is an intrastate gas surplus estimated by the Department of Energy of 700 billion cubic feet to one trillion cubic feet of natural gas a year.

The surplus developed because gas markets within producing state have become saturated. And industrial fuel users during the past 3 years have switched to fuel oil because gas curtailments have so often interrupted their supplies.

Some petroleum industry officials are calling for the gates to be opened even before the March 1 implementation date proposed by FERC. They say recent oil price hikes and the current intrastate gas surplus make this winter a prime time to reconnect industial fuel users for a share of the gas

There is a small amount of intrastate gas already moving across state boundaries by virtue of an NGPA provision and extension of emergency sales. This maximum 120 day gas trickle was unlocked to the interstate market when FERC issued its interim implementation regulations Dec. 1, 1978

DOE's Economic Regulatory Administration already is trying to ease its unpublished proposals implementing portions of the Power Plant and intrastate and interstate markets Industrial Fuel Use Act that involve existing plants.

The move came as part of a gas policy change of DOE, which earlier had sought to shift industries and ral gas and oil, Now DOE views U.S. gas as an alternative to imported oil. On related front, the Journal re-

ports, agencies from 19 states are enrolled with FERC to rule on well category applications filed by producers under the NGPA.

The agencies will determine whether gas from individual wells qualifies for NGPA ceiling prices in these categories: new natural gas and certain Outer Continental Shelf gas, gas from new onshore wells, high costs gas produced from below 15,000 feet, and stripper gas.

Increase gets okay

AUSTIN - The Railroad Commission has authorized Southern Union Gas Co. an increase in its gas service rates in the Monahans and Pecos areas of West Texas

The new rates, according to Gas **Utilities Division Hearings Examiner** Michele Sanchez, will be sufficient to

Exxon Co., U.S.A. has announced the promotion of Alton L. Sossaman to senior drilling superintendent and observed 30-year service anniversaries for Roy J. Keel Jr. and Joe F. Brown.

Sossaman has been assigned to the drilling organization in the Mid-Continent Production Division in Midland.

He joined the company as rotary helper with drilling rig locations in Fort Stockton and Kermit areas and in 1972 he transferred to the drilling group

Service awards will be presented to Roy J. Keel Jr. in a luncheon planned for Monday

He is assigned as geophysical spe-cialist in the Midland District, Southwestern Exploration Division. He

Edward D. Pittman

WTGS slates Pittman talk

Dr. Edward D. Pittman, a Distin: guished Lecturer for the American Association of Petroleum Geologists, will be the speaker for the Tuesday meeting of the West Texas Geological Society.

The meeting will begin at 11:30 in the Midland Hilton.

The paper he will present is entitled "Diagenesis: Key to Pore Geolmetry and Reservoir Potential of Sandstones.

Pittman, research supervisor for Amoco Producton Co.'s Research Center in Tulsa, Okla., earned a B.A. degree, an M.A. degree and his Ph.D. degree at the University of California

His professional experience includes work as a geologist with General Petroleum Corp. in California and Alaska; as a petroleum geologist with Amoco Production from 1962 to 1966 in Oklahoma, and a research scientist for Amoco in Tulsa from 1966 to the present. He was named research supervisor in 1973.

joined the company in Thibodaux, La., with geophysical assignments with increasing responsibilities that took him to other areas of Louisiana, Florida, Mississippi, New Mexico and in 1966 he transferred to Midland.

In 1949, he received a B.S. degree in Geology from Mississippi State and is a member of the Society of Exploration Geophysicists.

At a recent dinner Senior Supervisory Geologist John McDonald presented service awards to Joe F. Brown, being assigned as senior petroleum geologist in Production Geology Reserves, Midcontinent Division in Midland.

Brown joined the company in Denver, Colo., where his geological assignments followed in Grand Rapids, Mich.; Mattoon, Ill.; Tulsa, Okla and in 1970 he transferred to Midland.

Employees get awards

DALLAS - Nineteen employees of Texas Pacific Oil Co.'s Midland Region, working largely within the Permian Basin, were honored for their achievements in individual training. Collectively they have amassed nearly 5,000 hours of training.

R. L. Womack, region manager, made the awards presentation at a banquet in the Holidome in Odesa. In presenting the awards, Womack said "The accomplishments of these individuals reflect great credit on themselves and on the company." American Petroleum Institute training certificates and pen sets were presented to the recipients.

Receiving 500-hour training awards were B. L. "Billy" White, foreman; D. L. "David" Noble, foreman; J. L. Hooper, foremen; R. B. "Bob" Porter, district exploration geologist; R. M. "Bob" Akin, foremen and K. W. "Ken" Brown, senior foreman.

Receiving 250-hour and 150-hour training awards respectively were P. A. "Paul" Kennon, lease operator and R. L. Shipman, senior foreman.

Receiving 100-hour traning awards were R. E. "Robert" Kennedy,

pumper; R. W. "Ron" Snead, foreman; R. D. "Rick" McWright, engineering assistant I; W. B. "Wayne" Peters, operations coordinator and B. J. "Billy" White, foreman.

Receiving 50-hour training awards were K. C. "Kenny" Smith, foreman; P. K. "Phil" Carey, engineering assistant I; M. L. "Mike" Reed, draftsman; Martha Gully, engineer; R. E. "Ed" Jones, engineer and R. D. "Dee" Marrs, engineering assistant

"Through training programs like this one. Texas Pacific employees improved the quality and the caliber of their work. In fact, a foreman in this company today carries as much operating authority as did a district manager just ten years ago. You are to be commended for your achievements," said Womack

In 1949, he received a B.A. degree in Geology from the University of Colorado and is a member of the West Texas Geological Society.

tier prices to fund such investments is more dramatically evident if current prices are viewed in constant dollar terms relative to prices in effect during January 1974. The 1974 lower tier price of \$5.04, he

said, compares with an average September 1978 price of \$5.55 a barrel. "In constant dollars, deflated at the

gross national product deflator, this price is equivalent to \$4.02 per barrel, or some \$1.02 less than the average price of \$5.04 received for 'old' oil in January 1974," Ellis said.

the wholesale price index of oil field equipment, Ellis said, would place the September 1978 real dollar price at \$2.81 a barrel or \$2.33 below the average January 1974 price.

disincentive," he said.

no significant increase in lower tier prices since December 1973 a comprehensive survey of Continental's domestic crude oil operations reveals its average per barrel operating costs have increased more than 150 percent

during that time.

A more appropriate index such as

"This fact is a big and significant

Ellis said that while there has been

It's just a whisper compared with the noise an extra one trillion cubic feet could make in the nation's gas lines.

Two important provisions in the NGPA could coax significant volumes of intrastate gas into nationwide distribution channels.

One is NGPA's Section 311(b). which is drafted to permit intrastate gas to be sold on the interstate market. But certain industry officials fear FERC will dilute its effectiveness in implementing regulations

The other is Section 312, the contract assignment provision. Under it, an intrastate pipeline can assign to an interstate pipeline its gas-purchase rights if the gas involved exceeds demands on he intrastate system.

The American Gas Association says the next few months will offer a rare opportunity to encourage greater use of natural gas by industrial facilities. But this opportunity cannot be used unless the natural gas industry has sufficient supplies to meet the needs of these potential users.

Meanwhile, DOE is trying to make it easy for industrial and utility oil burners to switch to natural gas if they can't burn coal or other fuels.

earn Southern Union slightly more than \$166,287 annually which was determined by the examiner to be the company's gross annaul revenue deficiency in the service areas.

Approximately 7,850 residential and commercial customers in the seven towns and environs of the Monahans and Pecos service areas will be affected by the new rates. They are effective back to Sept. 3, which is 60 days from the closing of the rate case before the Commission.

Under today's order, Southern Union's rates will be allowed to increase an average of \$1.16 per thousand cubic feet. About \$1.03 of that is due to the increase of the cost of gas, according to the examiner.

Sanchez said a 90 percent purchase gas adjustment clause will be allowed in the new rate structure in order to cover further increases in the cost of

The new rates, the examiner explainded, will allow for a 7.43 percent rate of return for Southern Union to an adjusted value rate base of \$2.9 million, which will generate a monetary amount sufficient to provide a return of 14 percent to common stockholders.

An average eight Mcf residential monthly bill will increase under the new rates from the current \$17.11 to \$20.12.

255 rotaries working Permian Basin areas

Horner named

WASHINGTON D.C.-An executive of Amoco Oil Co. John F. Horner, has been appointed chairman of the American Petroleum Institute's General Committee of Refining, it was announced by Charles J. DiBona. president of API.

The committee functions as the overall policy-making group for the API's Refining Department and its committees, subcommittees, and task forces concerned with the refining branch of the petroleum industry

As chairman of the General Committee, Horner, who is vice president, Refining and Engineering of Amoco, succeeds Charles H. Barre, vice president, Refining, Marathon Oil Co., Findlay, Ohio.

Horner began his career at the American Oil Company's Texas City. Refinery as an Associate Chemical Engineer in 1949

Ray Diemer joins firm

Ray Diemer was recently admitted as partner to the petroleum consulting firm, Peppard-Souders & Associates in Midland. Diemer is also the manager of the

Midland office of Geomap Co. and Peppard-Souders & Associates.

Diemer has more than 30 years experience as a geologist. Prior to joining PS&A he was an independent consulting geologist. Previous geological experience was gained at Signal. Oil & Gas Co. and Stanolind Oil & Gas

He obtained B.S. and M.A. degrees in Geology from the University of Wyoming. Diemer is a member of the West Texas Geological Society, the Society of Independent Petroleum Engineers and the American Association of Petroleum Geologists.

Don Davis Holloman

adds Davis

ODESSA - Don Davis has joined Holloman Construction as manager of plant construction. Sam E. Holloman, president, announced this week. Davis was with American Energy

Co. where he was general manager. Other experience includes the positions of superintendent and instrument and electric construction manager of the Orloff Corp. and six years as owner of an Odessa-based instrument and electrical engineering

company. He attended Odessa College and is a member of the Lutheran Church of the Risen Lord and active in the Boy Scouts of America.

Wylie named

HOUSTON-Milton Wylie has recently been named District Manager for the Hobbs, N.M. office of Drilco. division of Smith International, Inc. and as such will oversee Drilco's sales opertions for that area.

Oil workers walk out at Phillips in Texas

DENVER (AP) - As the oil workers union announced tentative approval of contract offers for twothirds of its 60,000 members, more than 800 of them went on strike against Phillips Petroleum in Texas. Phillips' failure to meet Gulf Oil's contract model approved last week sent 429 Oil, Chemical and Atomic Workers union members on strike at Phillips' Adams Terminal at Pasadena, Texas, and another 413 walked out at the firm's facility in Borger, Texas, said union spokesman Jerry Archule-

Other major oil companies who haven't presented acceptable contract offers include Mobil, Chevron and Exxon, he said Friday.

Meanwhile, Archuleta said union locals representing 7,500 of OCAW's members have now approved new contracts

The Gulf model contract provides a 73-cent-an-hour first-year pay raise and a 5 percent pay boost the second year plus improved fringe benefits and a reopener clause. The average oil worker's salary was \$8.82 under the old contract that expired Jan. 7.

Archuleta said the union has approved contracts from 33 companies covering 43,240 of its union members. Sixty seven companies are still at the bargaining table.

Archuleta said he expected the smaller companies to reach agreement quickly.

As for the major holdouts, he said, 'For some of them the offers are being reevaluated or clarified. Some of them may be going back to the bargaining table for more negotiations.

Contract offers approved Friday included B.F. Goodrich Chemical Co. at Port Arthur, Texas, with 350 workers involved; Husky Oil Co., with refineries at Cheyenne and Cody, Wyo., and Salt Lake City, involving 300 workers; and Continental Oil, Archuleta, said.

Other union approvals were Pester Refining at El Dorado, Kan., with 120 workers; Atlas Processing at Shreveport, La., wth 150 workers; Dorchester Refining Co., at Mount Pleasant, Texas, with 170 workers; and Sun Oil with 1,875 workers.

PAGE 3C

D. N. Ewan promoted

Donald N. Ewan has been promoted to vice president of sales for the Midland Division of The Ortloff Corp. announced Verne E. Griffith, president of division.

Ewan has 24 years of diversified experience in the petroleum and chemical processing industries. He joined Ortloff in 1967 as a sales development engineer with responsibility for Ortloff's business development and sales efforts.

Ewan received his Bachelor of **Business Administration degree and** his Bachelor of Science in Industiral Engineering from Southern Methodist University in 1954. Following graduation, Ewan was employed by Chance Vought Aircraft Co. as an industrial engineer and later by Ingersoll-Rand Co., as a general sale-saman. He joined Ortloff's parent company, Elcor Corp., in 1966.

A registered professional engineer in Texas, Ewan is a member of the Amerian Petroleum Institute, Gas Processors Association, National Petroleum Refiners Association, Southern Gas Association, and the national and Texas Societies of Professional Engineers.

A wholly owned subsidiary of Elcor Corp. Ortloff is headquartered in Midland, with operating divisions and subsidiaries in: Midland; Houston; Tulsa, Okla; and, Golden and Grand Junction, Colo.

Oil Industry Notes

PITTSBURGH - Gulf Oil Corp. announced that Robert T. Brown has been named to head the Corporate. Planning Group, succeeding Juergen Ladendorf, who is resigning his position effective Feb. 1.

Brown, currently vice president strategy center business plan analysis, also will serve as a member of the chairman's advisory council.

DALLAS - Jack R. Denman, a 25-year Sun Co. yetern, has been named Training Coordinator for Sun Gas Co.'s Natural Gas Group.

In the new position Denman will direct field training programs for employees at Sun Gas operating facility headquartered in Houston, Corpus Christi, Lafayette and Oklahoma City.

He is assigned to the Natural Gas Group from the Human Resources & Administration Department at Sun Gas Co. headquarters offices at Northpark III in Dallas. Sun Gas Co. is a unit of Sun Co., Inc. of Radnor, PA

Denman transferred to Dallas from Snyder, where he was senior plant foreman at the Sun Gas-operated SA-CROC Carbon Dioxide Removal Facility. He joined the Sun-organization in 1953 at the Delhi Natural Gas Plant in Delhi, La

FINDLAY, OHIO - John O. Goffe, Casper district exploration manager for Marathon Oil Co., has retired after 30 years of service with the company. He has been succeeded by Reed K. Bitter, senior staff geologist on the staff of the vice president, exploration U.S. & Canada, at Find lay

Fred B. Knapp, operations manager, retail marketing, for Marathon will retire Feb. 1 after nearly 41 years with the company. The appointment of Harvey L. Thomas to succeed Knapp was announced earlier.

Knapp joined Marathon in 1937 at Findlay, advancing through a long series of sales positions. He was named district marketing manager at Grand Rapids, Mich., in 1962 and regional sales manager of the company's Chicago marketing area in 1966. Prior to assuming his current duties. Knapp served as operations manager. marketing, of the Indianapolis region. He was named operations manager. retail marketing, 1972.

HOUSTON - Pogo Producing Co. has appointed John O. Goffe exploration manager of its new Mid-Continent Division office in Oklahoma City. it was announced by Bill D. Holland

senior vice president of the Houstonbased oil and gas exploration - production company.

Goffe joined Marathon Oil Co. in 1949 as an assistant geologist in Durango, Colo. He was with Marathon, including service in Libya, until 1978, holding positions of increasing responsibility. Since 1974, he had been district exploration manager in Casper, Wyo.

DENVER, COLO. -- Wesco Pipe Line Co. announced the appointment of J. C. deGraffenried a executive vice president

Degraffenried came to Wesco Pipe Line Co. last December as vice president/general manager. In addition to his new duties, he will continue to be responsible for the operation, maintenance and administration of Wesco's crude oil and natural gas pipeline systems located throughout the United States, as well as Western Crude Terminals, Inc. facility at Cushings, Okla., of which he is vice president.

HOUSTON - Philip M. Keeley has been appointed vice president and manager of land for Cotton Petroleum Corp., J. L. Burkhart, president of Cotton, announced.

Keeley joined Cotton in February, 1977 as manager of land and previously was associated four years with Apexco, Inc. (Tulsa) as manager of land. Prior to his position with Apexco, he spent nine years with Texaco. Inc

HOUSTON - IMCO Services, a division of Halliburton Co. named George L. Jackson as Southern Region manager and G. Del Purvis-as Northern Region manager for the company's domestic operations.

According to R. C. Rockwell, vice president, domestic operations, these newly-created positions reflect company growth in domestic markets and will enable IMCO to better service its domestic customers

Jackson is responsible for the company's South Louisiana and Texas Gulf Coast areas, as well as an area yet to be named which will encompass Eastern seaboard and other states. He was an employee at the time IMCO was formed in 1963 and most recently was manager. South Louisiana Area.

Purvis is responsible for the company's present Central, West Texas, California and Rocky Mountain areas. He rejoined IMCO 1972 as assistant to the South Louisiana Area manager and previous to this most recent promotion was manager, Texas Gulf Coast Area.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Discovery announced

CALGARY, CANADA - Quasar Petroleum Ltd., Calgary, Alberta, Canada, an 81 percent subsidiary of American Quasar Petroleum Co. announced a naturl gas discovery in Northeastern British Columbia. Initial production tests indicate the well is capable of producing 7.5 million cubic feet per day of sour natural gas against a flowing pressure of 2,000 pounds per square inch.

The discovery well, the Pacific et al 93-I-19, C-12-L, is eight miles southeast of the existing Grizzly Natural Gas field. The well was drilled on a 7,393 gross acre block of land to a depth of 11,539 feet and encountered a 160 foot waterfree pay zone in the Baldonnel formation. Additional wells will be required to delineate the discovery.

Pacific is the operator of the well and holds a 25 percent interest in the discovery. Quasar Petroleum Ltd. and Can-Am Limited Partnerships 1977-1-2 & 3, hold a 50 percent interest until after payout which reverts to a 25 percent interest. Other interests in the discovery are held by Hudson's Bay Oil & Gas Co. Ltd. and Phillips Petroleum Co. Western Hemisphere.

Agreement reported

BOSTON, Mass .- Southwestern-Public Service Company and Cabot Corporation jointly announcd the agreement in principle by both boards of directors for the acquisition by a Cabot subsidiary of all the outstanding stock of TUCO, INC., a Southwestern subsidiary

The purchase price will be in excess of \$30 million. Conclusion of the sale is conditioned upon negotiation of certain additional contracts and on final approval of the respective boards of directors.

TUCO, formed in 1974, and a TUCO subsidiary supply natural gas, fuel oil and coal to several of Southwestern's power stations

They have built or acquired approximately 500 miles of gas pipelines through which purchased gas is gathered, and they own two gas processing plants in which the gas is processed and then transported to Southwesterns's power stations for use of fuel. Gas deliveries amount to about 55,000 Mcf per day.

Natural gas liquids production is about 104,000 gallons per day.

Loyd L. Peek L. L. Peek

honored

Loyd L. Peek, senior production superintendent with Sun Oil Co. in Midland, has been awarded Sun's Diamond Service Pin for 35 years of continuous service.

Peek's career began as a roustabout with Sunray Oil Co. in 1943. He progressed through the levels of pumper, production foreman, area superintendent and district production superintendent. Peek was appointed district manag-

er of the Sunray-DX Oil Co.'s Midland office in 1969 and held that position until the merger of Sunray-DX and Sun Oil Co. in 1970.

Peek is a member of the American Petroleum Institute and a deacon in the North A Chruch of Christ.

Company

organized Jack W. Young, Midland, announced the formation of a new company, Consolidated Petroleum Indus-

tries, Inc The company, headquartered in Midland has acquired the capital stock of Producers Crude, Inc. located in Midland, Abilene, Houston, and Tulsa, Okla.; Falcon Crude Trading. Inc., located in Houston; Lancer Industries, Inc., located in Houston, and

Beaumont Oil, Inc. of Beaumont. Young, president of the new-company, said Consolidated Petrolum Industries, Inc. has been formed to combine the efforts of the four companies involved in the production, gathering, transporting and refining of crude oil and the marketing of finished petroleum products.

Hearing scheduled

AUSTIN — The Railroad Commis-sion has scheduled a public hearing on proposed rules applicable to coastal zone management in Texas.

The proceeding is set for 9 a.m. March 28 in Room 812 of the Ernest O. Thompson State Building, 10th and Colorado streets, Austin. The proposed rules were published in the Texas Register; Volume 3, Number 90, Page 4185, under the date of Dec. 5, 1978.

The proposals pertain to submission and processing of applications to conduct acticities within Texas coastal natural resources areas, such as oil and gas drilling and production and surface mining operations, and for which a federal environmental impact statement is required.

The proposals would require submission of date to the Railroad Commission which: -Provide estimates of impacts of actions for which authorization is

sought. -Demonstrate that granting of an application will have no significant impacts which the Commission is requiréd to consider.

-Describe procedures to be used for preparing estimates of impacts.

big contract

DOE awards

ALBUQUERQUE N. M.-The Department of Energy's Albuquerque Operations Office has signed a contract with Westinghouse Electric Corp. of Pittsburgh, Pa, to provide technical support to DOE for the proposed nuclear Waste Isoloation Pilot Plant (WIPP) project in southeastern New Mexico.

The contract was signed by Thomas R. Clark, Deputy Manager of DOE's Albuquerque Operations Office, and George W. Hardigg, vice president of Advanced Power Systems Divisions of Westinghouse.

The Contract covers services costing an estimated \$9 million and extends to October 1, 1979, at which time an extension will be considered to cover future WIPP tasks that may be assigned to Westinghouse.

The firm has established a project support office in Albuquerque. Under the contract, Westinghouse will review preliminary engineering specifications and designs of the WIPP facility, assist in the preparation of environmental documentation, develop a quality assurance program, and provide other management support services

A. G. "Louise" Martin

Long tours completed

A. G. "Louise" Martin, senior clerk in the Comptroller Department, Western Division," Southwest District in Midland, completed 25 years of service with Gulf Oil-Exploration and Production Co.

Ms. Martin began her career with Gulf in 1953 and in addition to her present classification, she has also served as a log plotter in the Exploration Department and was promoted to a clerical assignment in the Production Department.

B. H. King, stenogrpaher of the Comptroller Department, Western Division. Southwest District in Midland, has completed 10 years of service with the company.

Ms. King has been a stenographer for Gulf since 1968

Hearing scheduled

AUSTIN, Texas (AP) - A public hearing on proposed rules for oil and gas development in the coastal zone will be held March 28, the Texas Railroad Commission announced.

The proposed rules were published in the Texas Register Dec. 5.

The commission said the proposals pertain to submission and processing of applications to conduct activities within Texas coastal natural resource areas, such as oil and gas drilling and production and surface. mining operations, for which federal environmental impact statements are required.

New veeps

appointed

HOUSTON - The appointment of four new vice presidents to head divisional operations of Tenneco Oil Exploration and Production was announced by Joe, B. Foster, president.

The new officers are Robert T. Bogan, Pacific Coast Division, Bakersfield, Calif.; Charles Wayne Nance, Lafayette Offshore Division. Lafayette, La.; Louis L. Parish, Rocky Mountain Division, Denver, Colo, and Harris E. Phillips, Mid-Continent Division, Oklahoma City, Okla

Each was formerly division general manager and now becomes vice president and division general manager.

Bogan joined Tenneco in 1957 and has been general manager of the Pacific Coast Division since 1975. He is a 1954 graduate of the University of Houston with a bachelor's degree in business administration.

Nance went to the Lafavette Offshore Division as production manager in 1974 and was promoted to general manager in 1977. He has been with Tenneco since 1958. He was graduated from The University of Texas in 1952 with a B.S. degree in Petroleum Engineering.

Parish, who joined Tenneco in 1955. is a 1948 graduate of the University of Oklahoma with a bachelor's degree in Business Administration. He has been general manager of the Rocky Mountain Division since 1970.

Phillips has headed the Mid-Continent Division since 1974. He is a 1951 graduate of the University of Tennessee, where he received a M.S. degree in Geology, and joined Tenneco in 1959.

Tenneco Oil Exploration and Production is a major operating unit of Tenneco Inc.

Program revealed

STAMFORD, CONN. - Continental Oil Co. announced its 1979 consolidated capital outlays and cash exploration expenses will be at a record level, ranging from \$1.3 to \$1.5 billion.

The program represents an increase of 8 to 25 percent above the estimated \$1.2 billion in comparable 1978 expenditures.

Conoco Chairman and Chief Executive Officer Howard W. Blauvelt said that about two-thirds of the 1979 outlays are earmarked for North Amercian activities, which include "continutation of an aggressive petroleum exploration program in the lower 48 states."

He said U.S. outlays include up to \$465 million for all petroleum activities: \$200 million for coal; \$155 million for chemicals, mostly for Conoco's joint petrochemicals project with the Monsanto Co.; and \$25 million for

minerals, mainly uranium. Blauvelt said that "the most signi-

gicant new initiative for 1979" is the commitment of a new underground coal mine that will require an investment of \$110 million over several years. "It will be the largest investment Conoco has ever made in a single coal mine," he said, adding that the mine will produce almost 2.4 million tons annually when it reaches full capacity in 1984.

Outside the United States, some \$125 million in 1979 outlays are, CROCKETT WELL planned for Canadian petroleum exploration and production projects," he noted.

Of the overseas portion of the outlays, nearly two-thirds are for North Sea projects, principally to continue the development of the Murchison and Statfjord fields. Blauvelt said that both fields are scheduled to be producing crude oil in 1980.

Young artists converging on Odessa for meet

ODESSA - For the 17th year, gifted young musicians from throughout the United States will converge on the Permian Basin to participate in the National Young Artist Competition.

The NYAC, which alternates yearly between Midland and Odessa, will take place this year at Odessa College with the Odessa Symphony Guild in charge of arrangements.

The NYAC is held each year under auspices of the Midland-Odessa Symphony and Chorale.

Finalists in the two major divisions, college and secondary schools, will be

ENTERTAINMENT

chosen Saturday afternoon and will be presented in concert Saturday night in the OC main auditorium.

Winners will be selected at that time, including students who are designated "performing winners" i.e., those who will return to this area to perform in concert with the Midland-Odessa Symphony in its pair of February subscription concerts.

This year, approximately 85 contestants have been accepted for participation in the contest.

They are students at colleges, universities and conservatories in many parts of the nation. Secondary schools participants are students at outstanding high schools and academies in various parts of the country.

The students will be vying for more than \$7,000 in prize money which is distributed to finalists, winners and performing winners. (Performing winners, in addition, are recipients of the Lara Hoggard Performance Award established last year.)

The prize money is donated each year by Mr. and Mrs. W.D. Noel and Mrs. Paul Moss of Odessa, and by Mrs. A.A. Bradford, Mrs. Raiford H.

Burton and Mr. and Mrs. D.A. Ross, all of Midland.

The Hoggard Performance Awards are provided yearly by Mr. and Mrs. Jerome Fullinwider of Midland. Administrative costs of the annual competition are supported by a grant from the Beal Foundation of Midland

Serving as general chairman of the 1979 NYAC is Odessa Symphony Guild member Mrs. Paul E. Campbell, with Mrs. Joel Locke as co-chairman. Mrs. James Stimmel of Midland, who will be general chairman of the 1980 competition in Midland, also is assisting in the Odessa contest.

Mrs. Bill Gray, current president of the Odessa Symphony Guild, will be the official hostess of the event.

Outstanding musicians and musical educators will make up the panel of judges for the competition. They are as follows:

Dr. Jerry N. Smith, director of the School of Music at the University of Oklahoma, who will judge woodwinds.

Tadeusz Wronski, professor of violin at Indiana University, Bloomington, Ind., who will be a strings adjudicator

Edward Ericksen, who is associated with the artists management firm of Kolmar-Luth, New York City: Ericksen, who has sung professionally, will be a judge of vocal events at the upcoming competition.

Dr, Samuel Jones, dean of the Shepherd School of Music at Rice University, Houston, is active as a composer and guest composer. He will serve as a keyboard adjudicator.

Eugene Pridonoff, a concert pianist who currently is artist-in-residence at Arizona State University in Tempe, will also be a keyboard adjudicator in the Odessa competition. Pridonoff, who has been a prize winner in the Levetrigtt and Tchaikovsky piano competitions, has played in Midland and Odessa in the past.

Music strong force for Midlander

By ROGER SOUTHALL R-T-Staff Writer

Music has been, and continues to be, a strong force in the life of Midlander Jane Huddleston.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

"I love it," she says. "It's been a vital part of me all my life!" The talented Mrs. Huddleston approaches music on a variety of levels. She is a singer, instrumentalist, teacher, composer and choral direc-

Mrs. Huddleston moved to Midland five and a half years ago with her psychiatrist husband and three children, and she has been deeply involved in the city's musical life ever since.

She has been singing in the Chorale of the Midland-Odessa Symphony for five seasons and is now the leader of the alto section of the

ensemble. ("We have T-shirts that say 'Alto Power' on them," she reports gleefully.)

She became a member of The Musicians Club, affiliated with Texas Federation of Music Clubs and National Federation of Music Clubs, not long after arriving on the local scene. This season she is serving as first vice president of the organization, in charge of club programs.

Mrs. Huddleston has participated in several of the musicales which the Musicians Club has presented in the past as fund-raising projects. Some of the early-musicales benefitted the instrumental fund of the Midland-Odessa Symphony, while funds from more recent musicales have gone to the instrument fund at Midland College.

(The Musicians Club this season is "resting on its laurels," having presented a kind of "super-musicale" last spring as one of the first public events in the new Music Building recital hall at Midland College; thus, the club does not plan to give a musicale this year.)

Mrs. Huddleston has been director of music at Midland's Trinity Presbyterian Church for the past year, and before that served three years as choral director at Christ Presbyterian Church here.

'Choirs and choral music are something I've been interested in nearly all my life," she says. "I was in charge of a graded choir program by the time I was 18 years old. And my mother is a professional musicsain and still is choir director for a big Baptist church in Shreveport.

"I really enjoy choral directing; I like working with amateur groups and I enjoy convincing them that they have a lot of talent and ability to offer!

from an ensemble for 3-year-olds to a choir for adults. "It's a rewarding, highly-challenging program," she declared.

Mrs. Huddleston holds membership in the Midland-based West Texas chapter of the American Guild of Organists, an international organization which promotes the cause of worthwhile church music

Mrs. Huddleston also teaches voice privately in her home. Currently, she herself is a music "student" - she's taking violoncello lessons from Jeff Levenson, 'cellist in the Thouvenel String Quartet here - and

A native of Shreveport, La., Mrs. Huddleston attended Centenary College in that city before enrolling in Baylor University where she earned a bachelor's degree in voice.

training, and later the family moved to El Paso. Mrs. Huddleston did graduate work in music at The University of Texas at El Paso, including vocal training with Bryan Swingle, a member of the UTEP music faculty

University-Civic Opera productions. She sang the role of Floria Tosca in-'Tosca," Giuietta in "Tales of Hoffmann," and Marcellina in "The Marriage of Figaro," as well as a role in the Puccini one-act opera, "Seour Angelica.

Midlander Jane Huddleston, a singer, instrumentalist, composer and choral director, prepares for some vocalizing - and is joined at the keyboard by a household pet known as "Jennie's Little Kitty." (Staff Photo)

Mrs. Huddleston considers herself a dramatic soprano rather than a lyric soprano, and explains that the former has more "heft," and is larger and somewhat darker, than the latter.

Mrs. Huddleston has had several hymn arrangements published in recent years, and she also has composed a children's Christmas cantata, "The Christmas Story.

The cantata has not been published but nevertheless has had a number of public performances around the country.

Mrs. Huddleston's three children are Jennifer, a senior elementary education student at Texas A & M University; Jessica, a senior at Lee High School, and Joel, a junior student at LHS. Jessica and Joel currently are deeply involved in music in their way - both are members of the all-state honors band, their mother proudly reports.

Lee High School play slated Friday, Saturday

Lee High School drama students are in final preparations for their production of "Barefoot in the Park.

The Neil Simon comedy classic will have public performances at 8 p.m. Friday and Saturday in LHS auditorium. Tickets, priced \$2, are being sold by LHS drama students and will be for sale at the doors before the start of each performance.

"Barefoot in the Park," one of playwright Simon's biggest comedy hits, centers around an up-and-coming young attorney, Paul Bratter; his new bride, Corrie; his mother-in-law, Mrs. Banks, and a nonconformist neighbor from upstairs, Mr. Velasco.

Gary Hamilton has the role of Paul and Kathy Shaw will portray Corrie, with Robyn Rose as Mrs. Banks and John Gould as Mr. Velasco.

Others in the cast include David Walton as a telephone repairman and Edwin Scherzer as a deliveryman. The production is being staged by Horace Griffin, LHS drama instructor.

Santa Fe Opera planning earlier start this year

SANTA FE, N.M. - The Santa Fe will be July 21. Opera's season this year will open a few days earlier than usual - on June 30 in place of the traditional early July.

And it will feature several operas especially well-loved by Santa Fe audiences, in addition to lesser-known works

Opening the season on June 30 will be Jacques Offenbach's immenselypopular "La Grande-Duchesse de Gerolstein" which will be having its fourth production here.

Gaetano Donizetti's "Lucia di Lammermoor," last presented at Santa Fe in the 1965 season, will be the next opera to enter the 1979 repertory on July 5.

One of the great favorites at Santa Fe, year-in and year-out, is Mozart's final operatic masterpiece, "The Magic Flute," and this season will be having its first presentations here since 1974. Opening night for "Flute'

A truly important event in operatic history will take place at Santa Fe this summer, when the complete opera, "Lulu" is presented here, in-

cluding the long-awaited third act of the Berg opera. "Lulu" has been produced in several past seasons at Santa Fe, and of course has had productions in many of the world's opera houses -- but

always in incomplete form. Before Alban Berg's death, the composer had written, but not scored, the third act and his widow later refused to release the act for performance, claiming that she had received messages from her husband beyond death, telling her not to have the act performed. Mrs. Berg ultimately died and every important opera house in the world vied for the opporunity of premiering "Lulu" in complete form.

The world premiere rights went to

the Paris Opera while the Santa Fe Opera received the rights for the American premiere, mainly because the American premiere presentation of the first two acts of "Lulu" took place at Santa Fe in 1963.

The 1979 premiere performance will be on July 28, and additional performances of the complete opera are scheduled for Aug. 1, 9 and 17.

"Lulu" will feature glamorous young soprano Nancy Shade, who sang at Santa Fe in the 1976 season, in the title role, and she will be joined by baritone William Dooley as Dr. Schoen and Jack the Ripper. Other. featured singers will include Michael Cousins, Katherine Ciesinski, Andrew Foldi, Leo Goeke, Lenus Carlson and Jack Davison.

with Santa Fe audiences, "Salome," by Richard Strauss, will return this season, a repeat of the acclaimed 1978 production.

Josephine Barstow, the beautiful and talented young British singer, will return as the willful Princess Salome, and others in the cast will include Ragnar Ulfung as the wicked voluptuary, Herod, William Dooley as Jokanaan and Jean Kraft as Herodias. Still others are to be Leo Goeke, Claude Corbeil and Douglas Perry.

Performance dates for "Salome" are Aug. 3, 8, 11 and 14.

SFO's opening production, "Le Grande-Duchesse," will have acclaimed British soprano Ann Howard as -the beautiful young duchess. Others One of the all-time favorite operas in important roles in this elegant and

Rosalind Redfern Glenn new museum president

Rosalind Redfern Glenn is new president of the board of trustees of the Museum of the Southwest, to serve during 1979. She succeeds Bascom L. Mitchell in the post.

Serving with Mrs. Glenn during the current year are Bruce Pearson as vice president, Mrs. George Thomasas secretary and William H. Malone as treasurer. These four comprise the trustee executive committee.

Current members of the Museum of the Southwest board of trustees are Phil M. Adams, Dr. Brent Blonkvist, Mrs. Jack E. Brown, E.D. Dorchester, Mrs. John C. Dorn, Mrs. Lynn D. Durham, Edwin A. Dwyer, Mrs. J.H. Isbell, Mrs. William H. Jowell, Mrs. Gordon S. Knox, Dr. Al G. Langford, Bascom Mitchell, W.F. Pennebaker, James H. Purvis, Mark Schweinfurth, Pomeroy Smith, William H. Thams and Edwin B. Weyman.

Museum of the Southwest, organized here in the mid-1960s, serves the city and surrounding area as a science, history and fine arts museum,

with an ever-changing series of displays and special-interest exhibits. Units of the museum are the Turner _ Memorial Gallery, including the Thomas Gallery, at 1705 W. Missouri Ave., the Naomi and L.B. Lancaster House, site of the Lancaster-Garden Center, at 1705 W. Indiana Ave., and the Marian Blakemore Planetarium in Haley Park, corner of West Indiana avenue and South K street.

Featured at the museum at the present time is a collection of "Old Master" paintings loaned by the Sarah Campbell Blaffer Foundation of Houston.

The exhibit of almost two dozen paintings includes works by leading European painters of the 13th through 17th centuries, among them Murillo, El Greco, Rubens, Cavarozzi, Fyt, Moraulus and Lucas Cranach the Elder

The collection will be on view during the next several weeks. Museum hours are 10 a.m. to 5 p.m. each weekday, and 2 to 5 p.m. Sundays. There is never an admission charge.

night

ALL NEW

witty comedy, containing some of Offenbach's most beguiling music, are Jack Davison as Baron Grog, Douglas Perry as Baron Puck, Sunny Joy Langton as Wanda and Sftephen Dickson as Prince Paul. Following its June 30 opening, the opera will be repeated on July 4, 6, 14 and 20, and Aug. 6, 23 and 25.

"Lucia di Lammermoor," scheduled for performance on July 5, 7, 11, 13 and 18, and Aug. 4, 7, 16 and 22, will star soprano Ashley Putnam, a former Santa Fe Apprentice artist, as the ill-fated Bride of Lammermoor. (Miss Putnam made her professional debut in this role at the Virginia Opera, to rave reviews.)

Two Santa Fe favorites, baritones Brent Ellis and Lenus Carlson, will share the role of Lucia's brother, Enrico. Ellis will sing the role in the first six performances while Carlson will take over for the three final presentations in August. Others in the cast will be Joseph Frank, Michael Cousins and Gwynne Howell.

Mozart's "Magic Flute" returns in

a new production this year. The famous fantasy opera, which has had numerous presentations at Santa Fe since the opera was founded in 1957, is full of wit and humor, exaltation and sacrifice, all set against one of the composer's most sublime scores.

PAGE 7C

The new production will feature British soprano Isobel Buchanan as Pamina in several performances, while talented young American soprano Sherri Greenawald will sing the role in several other presentations. Other featured singers in the large cast will include tenor David Kuebler as Tamino, Sunny Joy Langton as Papagena, Stephen Dickson as Papageno, Ragnar Ulfung as Monastatos, Gwynne Howell as Sarastro and Julien Robbins as the Speaker.

Performances of "Flute" will be given July 21, 25 and 27, and Aug. 2, 10, 15, 18, 21 and 24.

Additional information on the Santa Fe Opera's new season, and a schedule of ticket prices, may be obtained from the SFO at P.O. Box 2408, Santa Fe, N.M. 87501.

Rosalind Redfern Glenn is new president of the Museum of the Southwest board of trustees, and Bruce Pearson is new vice president. Above, they admire an El Greco painting, "St. Francis in Meditation With Fray Leon," one of the choicest works in a current exhibition of Old Master paintings at the museum. The exhibition is open to the public daily, including Sundays. (Staff Photo)

Groups of fourth and fifth grade students from the city's public and private schools will attend a special youth concert Tuesday afternoon.

The 1 p.m. concert in Midland High School auditorium will be presented by the Midland-Odessa Sym-phony. Dr. Thomas Hohstadt, conductor and musical director of the orchestra, will be on the podium. This second youth concert of the 1978-79 season is presented under auspices of the Midland Symphony Guild and the Midland Independent School District. Attending Tuesday's event will be fourth and fifth

graders who did not have an opportunity to attend the first youth program last October.

Programmed for the concert are movements from Richard Strauss' famous symphonic poem, "Thus Spake Zarathustra" and Tchaikovsky's "Romeo and Juliet." Also to be presented is a selection from the Broadway musical. "Annie." and the theme music from the hit movie, "Star Wars."

Preparing packets for the Mothers March of Dimes which starts Monday are Midland's poster child Jonathan Whitehead and Mrs. Don L. Evans, march chairman. (Staff Photo)

'79 March of Dimes

drive starts Monday

It's the International Year of the Child, and for the March of Dimes that ties in directly with the organization's aim to help the unborn child.

The annual march to raise money for the national March of Dimes organization is about to begin. President Jimmy Carter has signed a proclamation declaring January as March of Dimes Birth Defects Prevention Month

Mrs. Don L. Evans is chairman of the Mothers' March on Birth Defects' or the Midland March of Dime ter. The 1979 campaign will kick off Monday and walkers will knock on residents' doors through Jan. 29.

Courtroom moved out onto lawn

ELBA, Ala. (AP) - It was crowded inside and clear and unusually warm outside, so District Judge Gary McAlliley moved his courtroom to the lawn of the Coffee County Courthouse.

But it wasn't just the weather that kept McAlliley outside throughout the day - it was the overcrowded courthouse.

Circuit Judge Terry Butts said the overcrowding problem was worse than usual because of wide interest in a \$15 million civil suit arising from a 1976 explosion at a local plant.

Butts said he has often been unable to hold court because no courtroom was available. "We simply cannot do the job to which we (the judges) are elected with the facilities we have," he said.

This year's band will be led by new officers for Goddard Junior High School. They are, from left, Cindy Besek, captain; Tim Davis, 1st lieuten-

ant; David Hicks, brass lieutenant; Kellie Wetsel, woodwind lieutenant and Wade Perry, percussion lieutenant. (Staff Photo).

Mexican-American legislators in Senate,

House form separate caucuses on goals

By SOLL SUSSMAN

AUSTIN, Texas (AP) - Mexican-American legislators have formed separate House and Senate caucuses for the first time as they bid for greater visibility - with an eye to 1981.

"Once we redistrict again in 1981, we'll pick up a number of seats," said Rep. Arnold Gonzales, vice chairman of

the House caucus. Eighteen Mexican Americans are in the House - the same number as in 1977 - while representation in the Senate has increased from three to four.

'The separation was only for convenience," Gonzales, a Corpus Christi Democrat, maintains. "It's just like two arms and one head.'

But Gonzales admits

grams to protect maternal and new-

By building a productive partnership with the community, the health professions and government at all levels, the March of Dimes hopes that maternal and-newborn health care can become a national priority.

"If we hope to make our next generation our healthiest ever; it will mean all citizens must become involved today," Mrs. Evans said.

"I hope everyone will remember the 250,000 babies born each year with birth defects, and give a gift to the March of Dimes volunteer who knocks on their door," she added.

the senators "were out-Texas, let's say," said voted a lot of times. Truan They felt that they need-

ed to have their own cau-CUS Sen. Carlos Truan, D-Corpus Christi, was one of the first caucus leaders as a representative. Now he talks of growing pains and the different styles of the House and Senate.

'We have our own way of doing things over here," he said. "Their politics in the House are different in many re-. spects from our poli-

tics. Truan, characterizing himself as the only liberal of the Senate caucus members, does not see the group as a bloc vote but as a loosely struc-

tured forum. 'You have four very independent persons who are working in the Senate but are brought together by our ethnic hands full. background on those

"Frankly, after looking over Briscoe's ap-The Capp Finish-It-Yourself House" pointments I'm optimistic that Clements is going

to do better. Gonzales said the House caucus will voice clear opinions on appointments to senators and the two groups could join on key issues.

Rep. Ben Reves, D Houston, called the separate Senate caucus a plus and said the two groups will develop a strong relationship

"I'd have to say that the caucus is the best thing that's happened to the Senate in a long while," he said.

Reves, who tost his chairmanship of the **House Rules Committee** after Speaker Bill Clayton's new appointments Friday, said the House members will have their "We can have it either

ADDRESS. STATE _ZIP_ PHONE

Dear Dr. Solomon: For the past two years I have been suffering from headaches. Sometimes they are so severe that I am incapacitated for a couple of days. The doctor tells me they are probably migraine, and I would like to know more about the condition and what causes it .- Mrs. A.S

Dear Mrs. A.S.: Although migraine, headaches are a common problem. there is much that is still not understood about them. One of the confusing aspects of the disorder concerns the many forms it may take. Most-but not all-attacks are accompanied by head pain, often on one side. The intensity of the pain may vary from mild and annoying to severe and incapacitating. Other common symptoms include abdominal cramps, nausea, vomiting and diarrhea. The patient also may experience changes in blood pressure and pulse rate, chills, nasal stuffiness and tearing.

Writing in the Journal of the American Medical Assn., Dr. Joel R. Saper, of the University of Michigan Medical Center, says that some degree of disorientation may occur during a migraine attack. One study he cites revealed that 14 percent of patients experienced a transient loss of consciousness or confusion during an attack. Other researchers have described patients in whom disturbances ranged from aggression to unconsciousness lasting from two hours to five days.

The attack can begin at any time. Some persons are awakened fron their sleep by an intense, pounding headache: others experience morning;onset headaches. Their frequency may vary from an almost daily occurrence to isolated attacks. Hypertension is believed to beassociated with frequent attacks. Migraine headaches often start after puberty, but they may begin or disappear at any age, from early

childhood to late life. The family incidence of migraine has been estimated at from 65 to 90 percent. There appears to be a genetic predisposition, but how this is passed on is still unknown.

It is generally understood that excessive dilation of blood vessels is involved. Blood flow studies indicate there is reduced cerebral flow during the preheadache phase of classic migraine, and increased flow during the headache phase.

An objective method of establishing a diagnosis of migraine still does not exist. The diagnosis based almost entirely on a description of the headache, the accompanying symptoms, and identifiable precipitating characteristics. A complicating factor is the host of other disorders that produce symptoms not unlike these of migraine. For example, brain tumors and glaucoma may be responsible for headaches as well as for other disturbances similar to those associated with migraine.

The differential diagnosis of migraine must therefore take into account the patient's previous medical history. details of the headache, and the results of a physical examination. The physician may suggest an electrocardiogram. chest X-ray, and blood and urine analyses. An electroencephalogram and brain scan may also be justified.

rejects proposal

MANAGUA, Nicaragua (AP) - President Anastasio Somoza says the only way he'll leave Nicaragua is by force.

dum to decide if he should resign to bring peace to his strife-torn nation, Somoza told reporters Friday:

get me out by force. I was born in Nicaragua and I do not expect to die in exile, and if they want that, they will get it only by force.

United States, Dominican Republic and Guatemala and presented to Somoza last week by U.S. Special Ambassador William Bowdler.

Somoza's foes in the Broad Opposition Front have accepted the plan. It was advanced by the mediating team that was named after an anti-Somoza revolt in September left an estimated 1,500 Nicaraguans dead.

The plan calls for a plebiscite next month to determine if Somoza should leave before his term ends in 1981

Somoza wants a government-supervised election and says if he loses a constitutent assembly will select his successor.

psychiatrist who has done a study of Navajo children placed in Mormon homes recently said, "I don't mean to pick on the Mormon Church specifically; there are certainly other churches who do mis sionary work among the Indians. But the Mormons do want to build up a cadre of missionary Navajos to convert the tribe ... An Indian child cannot be placed successfully unless the cultural background is considered.

Mormon families take on the cost of clothing, feeding and providing medical and dental care for the children and house them for the school term. They receive no reimbursement. The children return to their reservations each summer, and all transportation expenses are paid by the church. With luck the child will have two loving families, retain his Indian heritage and still feel comfortable in non-Indian, middle-class America.

Brigham Young University, run by the Mormons has more than 500 Indian students, more than any other school in the country, and about 65 percent went through the Indian Student Placement Program. The freshman dropout rate for Indians is over 50 percent overall, the general Accounting Office, the congressional investigative arm has reported.

THE ASSOCIATION for the Study of Afro-American Life and History, Inc., which originated the National Afro-American Black History Month observation (formerly Negro History Week) for promotion of ethnic understanding in America, has selected: "History: Torch for the Future" as a theme for the February 1979 observance.

In 1978, the Afro-American History Month received statements of approval from President Jimmy Carter, governors of most of the states, mayors and city councils. The torch continues and expands the search by many citizens for their own ethnic roots and encourages a period of introspection about ethnic heritage, leading us all into a fuller participation in the American dream.

NAACP IN FINANCIAL Trouble? Our Chicago bellringer sources report that a race for support dollars and inflation area being blamed as chief factors underlying the dwindling treasury of the NAACP. The once proud spokesman of America faces an official deficit of \$680,000 but these same sources say it might reach \$1 million by the end of 1979. New civil rights organizations such as the National Urban League, the Southern Christian Leadership Conference and Operation PUSH, are all competing for the same dollar the NAACP is seeking. these sources report.

BLACK RELIGIOUS, civic, fraternal and other leaders in Oklahoma are engaged in a life and death struggle to keep the doors of Langston University open. The black-oriented institution has trained and educated a great majority of present day educators and leaders of Oklahoma. Commenting on the situation, the black-oriented Oklahoma Eagle said recent-"It is a brassy attempt to defeat the federal government's mandate to keep Langston open, integrate it and bring it up to par...It's the Board of Regents way of thumbing its nose at the federal government... It's time to take a look at the merits of a federal grand jury investigation."

If you're like most businesses, you sell more than one key product or service. That's why you need more than one ad in the Yellow Pages. Four out of five people look in the Yellow Pages when they're ready to buy.

More than 80% of the time they respond with a call, visit or purchase. But customers look under the heading that interests them. If your ad isn't there, they'll buy from someone else. For less than a dollar a day, you can add a super salesman to your staff. Then you won't miss those

extra sales that extra Yellow

Pages advertising delivers.

For example, if you sell office equipment, you could also run an ad under Typewriters, another under Cash Registers, and even one under Calculating Supplies. A Yellow Pages sales representative from

Southwestern Bell will call on you soon, with facts and figures about how the Yellow Pages works for your specific products and services. Chances are you'll discover it's a good business investment to be in two, or even three, places at once. The Yellow Pages. Make sure it's genuine. Make sure it's...

New Orleans civil service body battles Sunshine law in courts

NEW ORLEANS (AP) - One of the authors of the state's Sunshine law has testified that it was meant to apply to all public bodies which spend or receive tax money, including the New Orleans Civil Service Commission

"It was the intent of the law that the people's business should be presented in public," said-state Rep. Emile Bruneau of New Orleans.

He said Civil Service Commission has administrative functions, which also brings it under the law.

Bruneau testified Friday at a hearing before Civil District Judge Oliver P. Carriere. The hearing stems from a suit by a city workers' lobby - the Public Employees Association which wants to force the commission to comply with the Sunshine law. Carrier took the matter under advisement without giving any indica-

tion when he would rule. The Sunshine - or Open Meetings law requires public officials to years, even though it is governed by old legislation that would exempt it from the Sunshine law.

He said the suit was merely a thinly disguised attack on the city's new pay plan for classified employees.

'The whole idea we have here today, your honor, is to upset the pay plan, and why I don't know," he told the court. "It was voted on in a public meeting and is now in effect.

Mike Doyle, a labor relations specialist with the New Orleans personnel department, said it was sometimes essential for the Civil Service Commission to meet in secret on wage scales. He said the commission consults other cities and businesses about pay scales, job titles and descriptions, working hours and the like.

He said many sources of information would dry up if they felt their figures were to be made public. On the eve of the hearing, a mem-

her of the staff of Attorney General

Garsaud contends the commission is not a public body as defined in the law because it does not receive or disburse tax funds, is not enumerated by the law and members are paid a negligible amount. They receive \$50 a meeting.

According to the spokesman for Guste, who declined to be named, the commission regularly discusses such matters as employee competence. That is among eight topics which can be discussed in private, according to the law. But the spokesman said the commission violates the statute by not calling a public meeting and taking a public vote before beginning private discussions.

Late last year, New Orleans Mayor Ernest Morial took the sunshine law to court and won a limited victory. He contended that private discussions with members of the City Council were necessary, and was upheld by a

Ex-governor's pardoning record inspires new country music hit

By RICHARD LOWE

The Midland Reporter-Telegram

SUNDAY, JAN. 21, 1979

NASHVILLE, Tenn. (AP) - "Pardon Me, Ray," an uptempo country tune sparked by the pardoning ways of former Gov. Ray Blanton, is tops in Music City, U.S.A.

The song is sung by Nashville TV weatherman Brian Christie, who coined the title, wrote some of the lyrics and recorded it for Sound Factory Records.

Christie said he was upset when he heard Blanton had pardoned three convicts and commuted the sentences of 49 others, including double-murderer Roger Humphreys.

So, earlier this week he threw out a line — "Pardon Me, Ray" — in the newsroom of television station WNGE and immediately received lyric suggestions from station employees.

By the time he entered a recording studio Wednesday, the day Republican Lamar Alexander was sworn in as governor early to prevent Blanton from granting more pardons, at least 100 persons had contributed to the song. They included the musicians at the recording session who wrote the melody, he said.

"I was so mad at Blanton I just said, 'Why don't we write a song about him as a fun thing."" Christie, 29, said in an interview Friday. "Musicians were calling us to get in on the recording session because they felt the same way about Blanton.'

"Pardon me, Ray, are you the cat that signs the pardons?" the song begins. "Cause you're an old friend of mine, just put your name on the line.

"Double-murder and rape, that's all the jury put me in for. And I'm sure you'll agree, they took advantage of me."

Christie said 100,000 copies of the record have been shipped to stores and another 100,000 are on order from the distributor.

"The requests have been unbelievable," Christie said. "It's the most requested record in the state right now. One station had to ask people to stop calling in."

He said the record has been played on more than 160 radio stations, mostly in Tennesse, and has spread to stations in Kentucky, Alabama, Georgia, Missouri and Oklahoma. Two former Blanton aides and a

Tennessee highway patrolman were arrested Dec. 15 by the FBI and charged with extortion and conspiracy to sell clemencies, pardons and paroles. A federal grand jury is probing the state's clemency-for-cash scandal

Blanton has said he granted the convicts clemency in line with a court

order to relieve crowded conditions at the state prison. He could not be reached for comment on the record. Christie said the song may be therapeutic.

"The people have no way to vent their anger over Blanton and the pardoning," he said. "So maybe they're using this record to do that."

A Swimming Pool Is A

Most people don't realize how practical it is to build a pool--a quality pool that is. Owning a pool will make you feel wealthy and maybe a little extravagant, but it isn't Your car will depreciate sharply in value in a year or two but your pool is likely to be worth even more than its original cost in the same amount of time

Most West Wind Pool owners who have sold their homes have realized a return in added property value, besides enjoying their pool for many years. West Wind builds only this type of quality pool and continues to serve you with a complete line of accessories and parts, as well as service. Let us create an investment for you.

Federal, state health officials will soon take part in mock alert

By DON KENDALL **AP Farm Writer**

WASHINGTON (AP) - A nationwide mock alert involving hundreds of federal and state health officials soon will be under way to test U.S. defenses against an imaginary outbreak of foot-and-mouth disease.

The nationwide exercise will be coordinated by the Agriculture Department Jan. 29 through Feb. 2. Thousands of cattle and hogs will be

"killed" in the project to control the mythical disease outbreak A spokesman said the script for the

exercise calls for a variety of simulated control measures and that "it goes without saying, we will be victorious" at the end

Foot-and-mouth disease - referred to as FMD by the department - has not been detected in U.S. livestock herds since 1929. It is prevalent, however, in much of the world and offi cials fear that it could be introduced here accidentally.

The disease affects cloven-hoofed animals, including cattle, swine, sheep and goats. It is highly conta-

-Somewhere in the Corn Belt a farmer who recently returned from a foreign trip with "a piece of sausage in his pocket" takes a bite, doesn't like the taste and spits it on the ground.

-The sausage, infected with FMD virus, is eaten by hogs which then go to market and spread the disease to other animals. A nationwide epizootic results

-Federal and state authorities swing into action to inspect livestock herds, locate the disease and destroy infected and exposed animals, burying them in large pits.

-Quarantines are imposed to restrict the shipment of animals so as to limit the spread of the disease.

Although the simulated battle against FMD will be only five days, Goodman said that 30 to 45 days of actual operations will be compressed into the exercise.

We're trying to get everybody tuned up as to what could happen if we had a situation like this," he said.

Field operations will be coordinated from an "EPIC Room" - which of them federal or state employees, are expected to participate, Goodman said. No estimate of the cost of the exercise was available.

Goodman said that the mock battle against FMD will include theoretical situations that will enable officials to test procedures for tracing infected animals to herds of origin, including actual visits to farms, interviews and filling out assorted papers.

Last year surprisingly profitable for business

By KRISTIN GOFF **AP Business Writer**

NEW YORK (AP) - Last year turned out to be surprisingly profitable for America's businesses, judging by-the final-quarter earnings statements now coming out.

While few companies are expected to match Du Pont's 86 percent leap in fourth-quarter profits or 46 percent gain for the year, analysts say earnings reports in nearly all industry groups are coming in stronger than expected

International Business Machines

BUSINESS

joined the exclusive club of corporate giants like American Telephone & Telegraph and General Motors when this past week it announced that its profits topped \$1 billion in the final quarter of 1978.

IBM net earnings of \$1.02 billion in the last three months of the year represented a 27.2 percent increase from the fourth quarter of 1977. For the year as a whole, IBM's profits rose 14.4 percent from 1977 and totaled more than \$3 billion.

And, among basic industries, the Aluminum Company of America posted a 124 percent gain in fourthquarter earnings and a 60 percent earnings increase, to \$312.7 million, for the full year.

Those are only a sampling of some reports out lately - the major portion of earnings reports are still to come. But analysts say the figures so far are encouraging.

Based on figures implied from other statistics, the Bureau of Economic Analysis, expects after-tax corporate profits in the fourth quarter to reach an annual rate of about \$131.5 billion, a 26 percent increase from the year-earlier figures. For all of 1978, corporate profits should be up 15 to 16 percent over 1977, in the range of \$118 billion.

Many industry groups are expected to show improved profits because of the strong-rate of economic expansion. Because of that, picking standouts is difficult.

But airlines and aircraft builders are frequently mentioned as "standmillion the week before. out industries" because of a boom in the number of passengers flying and the increase in orders for new planes. The 1978 housing boom, which saw about 2 million new housing units its latest report on the business outbuilt, is also helping profits in com-

grocery-store chain. The Tengelmann Group said it planned to buy 42 percent of A&P's stock for about \$75 million. A&P's executives weren't unhappy about the offer, since they have been in the process of trying to shore up the profits of the big supermarket chain in recent years, and Tengelmann represents one of Europe's largest supermarket owners.

-McGraw-Hill and American Express began a series of suits and counter-suits in a bitter takeover fight. American Express announced two weeks ago its plans to buy up McGraw-Hill for about \$830 million. The publishing company this pastweek formally rejected the offer and filed a number of suits aimed at halt-

BUSINESS NOTEBOOK Residential property interest hike sought

By BILL KIDD **Austin Bureau**

Austin - Legislation has been filed in both the House and Senate to allow savings and loan associations to increase the interest charged for residential property loans to a maximum 12 percent annum.

Sen. Bill Meier, Euless, is carrying the measure as SB 134 in the Senate, while Rep. Jerry (Nub) Donaldson, Gatesville, is sponsoring HB 409 in the House.

Durward Curlee, exective vice president of the Texas Savings and Loan League, which is backing the bill, says his group hopes for an early hearing on the proposals.

Curlee and other finance industry officials have cited the movement of the prime interest rate to and over 10 percent, along with the increase cost of money paid savers by savings and loan associations on "money market certificates" tied to U.S. Treasury bill interest rates, as the reason for the requested 12 percent.

Under the Texas Constitution, interest rates are not to exceed 10 percent, unless authorized to do so by the Legislature.

Lawmakers have done that in the past on consumer finance company interest rates, and credit unions now are allowed 12 percent rates on home loans, should they chose to make such loans.

In the past, increases in the prime rate have been relatively temporary, lenders say, with a cyclical falling off of housing demand and decreses in interest rates.

Now, with continuing inflation, interest rates-with home loans in some other states already over 10 percent-and housing demand have remained high.

To avoid large cutbacks in residential housing construction, which would result in increased unemployment in many other parts of the economy, lenders must be able to make home loans above the present 10 percent limit, financial industry spokeman argue.

The legislation speaks to single-family dwellings "or dwelling units for not more than four families."

There have been indications con sumer loan companies may seek to create a new loan category under separate legislation-providing for loans of \$100 to \$300 with somewhat higher rates that currently permitted-but Sen. Bill Patman. Ganado, has indicated he would fight that proposal.

Patman has never been enthusiastic about any interest rate increase suggestion, but has indicated to some Capital sources he might not fight the change proposed in SB 134 and HB

Rep. Carlyle Smith, Grand Prairie, is offering legislation to license public adjusters-with a view to hearding off problems in Texas such as have occurred elsewhere.

The question, Smith says, is whether such persons, who deal with the public on insurance matters, should be regulated by the State Board of Insurance.

Austin attorney Hector De Leon, who assisted in preparation of the bill, HB 53, says public adjusting isn't as well known in Texas as it is in some other parts of the country, with most of the firms doing such work in Texas located in Houston and Dallas.

While adjusters working for insurance companies are required to be licensed by the SBI, an attorney general's opinion has held that public adjusters may-but aren't required to-be licensed.

There have been some scandals inthe North and East involving public adjusters he notes, and recent nationally--published reports indicate some unethical adjusters may actually have started some home and business fires

Public adjusters in Texas want to avoid having such situations here and feel the licensing proposal may be one way of doing that, De Leon indicates.

Smith notes he's also carrying a bill redefining arson-including putting indestruction of a vehicle under the definition of that offense-so that he has something of a dual interest in the public adjusters legislation.

Sen. Ike Harris, Dallas, is carrying the proposal in the Senate as SB 120.

share distribution.

IDS Progressive Fund announced a record fiscal yearend distribution of 11.45 cents per chare, or \$4.3 million, an 18.5 percent increase over last year's record 9.66 cents per share distribution.

IDS Tax-Exempt Bond Fund, a municipal bond fund, announced a fiscal yearend accumulated tax-exempt income dividend of 26.34 cents per share, compared to a 1977 vearend dividend of 26.38 cents per share. -Investors Mutual fund declared a

first quarter-distribution of 14 cents per share, up .5 cents from the same guarter last year and from the previous quarter.

Permits near \$1 million

Building for the new year still has not hit the \$1 million mark in Midland. Permits for last week totaled \$469,650 to put the year's total at \$816,100.

Only one permit for a new commercial building was issued and that went to J.L. Moore Construction for an addition to the Women's Clinic at 2007 W. Wall Ave. Cost is \$70,000.

Permits for commercial alterations were issued to Southwest Exploration, 1910 M.B.S., \$20,000; Patrick Aleman, 905 S. Mineola St., \$2,500, and Western United Life Building, 300 W. Texas Ave., \$10,000.

Permits for new homes went to Dan Dalton, 3312 Neely, \$60,000; Simpson-West, 3901 Bedford, \$61,500, and Jim Patterson, 1417 Sparks, \$65,000.

Two permits for new duplexes were issued to Leddy-Montgomery for \$70. 000 each. Addresses of the multiple family residences will be 5104-A, 5104-B, 5106-A and 5106-B.

Taking out permits for residential alterations were James E. Graham Sr., 4417 Stanolind, \$10,000; Elpidas Lopez, 421 E. Dengar, \$1,550; Ciro Sanchez, 1112 E. Nobles St., \$4,000; August Macha, 1403 Boeing, \$1,200; George Price, 2307 Fannin, \$1,700; Olen Tubbs, 1724 S. Alanta, \$10,000, and Don Parsley, 1405 Douglas, \$9,200

R. Semple in new post

DALLAS-Robert W. Semple, nat tive of Midland, was promoted to vice president of Mercantile National Bank at Dallas. Semple has been employed by the bank one-and-a-half years.

Prior to his employment at Mercantile, Semple was a bank examiner for five years. He holds a BBA degree from Texas Christian University in Ft. Worth, an American Institue of Banking standard certificate and a certificate of completion from Texas A&M Farm and Credit School.

panies producing building products or

home appliances, analysts say. Evans at Chase Econometrics and Allan McKinnon of Merrill Lynch Economics Inc., both specialists in economic forecasting, acknowledge that guessing what will happen next year is difficult. The economy has maintained a stronger growth pattern to date than most economists expected

early this year. "Retail stores came away like gangbusters because of strong consumer spending. There were good gains in the machinery industries, chemical industries with strong price increases and the banking sector came back very strong," said Michael Evans, an economist at Chase Econometrics in suburban Philadelphia

Many industry groups are expected to show improved profits because of the strong rate of economic expansion. Because of that, picking standouts is difficult.

But airlines and aircraft builders are frequently mentioned as "standout industries" because of a boom in the number of passengers flying and the increase in orders for new planes. The 1978 housing boom, which saw about 2 million new housing units built, is also helping profits in companies producing building products or home appliances, analysts say.

Evans at Chase Econometrics and Allan McKinnon of Merrill Lynch Economics Inc., both specialists in economic forecasting, acknowledge that guessing what will happen next year is difficult. The economy has maintained a stronger growth pattern to date than most economists expected

early this year. Evans figures the fourth quarter of last year represented the "last big splurge" in consumer spending. But he estimates that pre-tax profits for all of 1979 will be up about 5 percent and after-tax profits up about 10 percent compared to 1978 levels.

In other business developments this week

-A West German company announced plans to buy a major interest in the Great Atlantic & Pacific Tea Company, the nation's second largest

Paul named manager

-The 84 Lumber Co., with regional offices in Denver, Colo., announced the appointment of Bobbie Paul as manager and Pat McCullough as comanager at the local outlet located at

Highway 80 West of Terminal Station between Midland and Odessa. Paul started with 84 in January 1967 in the Rochester, N.Y., store, McCullough started with 84 in July 1978 in

Sherman The 84 Lumber Co., presently has over 250 stores coast to coast and plans for an additional 75 stores to be opend during 1979.

"Figures released in recent days indicate that the consumer continues on a spending binge."

ed Thursday that the gross national product, after adjustment for inflation, grew at a solid 6.1 percent seasonally adjusted annual rate in the October-to-December quarter.

That, in turn, provided an almost ideal climate for corporate earnings. International Business Machines, which plans a 4-for-1 stock split this spring, posted a 16.3 percent profit increase for the quarter, considerably better than most analysts had expect-

Du Pont chalked up an 84 percent earnings gain for the quarter, and celebrated by raising its dividend and proposing a stock split of its own, 3 for

Aluminum Co. of America - like Du Pont a component of the Dow Jones industrial average - came in with a 124 percent increase, and raised its quarterly dividend from 50 to 60 cents a share.

All these pleasant surprises, however, don't seem to have prompted much change in the caution which dominates most analysts' view of 1979 prospects.

Commerce Secretary Juanita Kreps said the fourth-quarter GNP figures increased her hopes that a recession could be avoided, but she also acknowledged, "This strong rate of growth won't continue in 1979."

Air traffic

record set

HOUSTON - Texas International Airlines reported record traffic growth for the full year of 1978 with its December results, the carrier's twenty-eighth consecutive record-breaking month.

Revenue passenger miles (one fare-paying passenger flown one mile) for 1978 were 1.6 billion, a 33.7 percent increase over 1977, reflecting the best rate of growth in the carrier's 31 years of opertion. The airline carried over 3.7 million passengers during the 12 months of 1978, up 23.2 percent from the 1977 level of 3 million.

Revenue passenger miles for December were 144 million, an increase of 16.4 prcent over December 1977. The airline carried 314,792 passengers in December, 1978, an increase of 4.6 percent over December, 1977.

Twelve month average load factor in 1978 was 60.0, an increase of 2.3 points over 1977 results. Load factor for December, 1978 was 60.8, the same as a year earlier.

The airline attributed its continued traffic growth to the popularity of its discounted "Peanuts Fares", which saved travelers \$29.9 million on Texas International flights in 1978, and to the strength of the Sunbelt economy.

Jerry L. Foote J. L. Foote

named VP

Jerry L. Foote has been named vice president and cashier of the soon-toopen Texas National Bank of Midland, President W.J. Mewhorter has announced.

Texas National will open in mid-March in new quarters at 4309 Garfield, north of Midland College. John L. Cox is chairman of the board of directors

A business administration graduate of West Texas State University with a major in finance and minor in economics, Foote joins Texas National from the Texas Bank, Lubbock, where he was also vice president and cashier.

Phyllis A. Gifford

Midlanders

Three Midlanders have been accepted as members of the National Million Dollar Real Estate Club.

honored

They are Ms. Phyllis A. Gifford, Ms. Joan Ramey, and Mrs. Louise Culver.

Ms. Gifford is a sales associate for Roberts Realtors and has been in the real estate business two years. She is a member of the Midland Board of Realtors.

Ms. Ramey is a sales associate for Carriage Co. and she has been in the real estate business 10 years. She also is a member of the Midland Board of Realtors

Mrs. Culver, another member of the Midland Board of Realtors, is a broker and partner in Carriage Co. Realtors. She has been associated with the real estate business 15 years.

Midland is now 94 years old. Some years prior to 1880, a lone hunter by the name of Lum Medlin made this area his home. He was among one of the first white men to settle here. Early in 1880, R. N. Garrett arrived with a herd of sheep destined for market. Garrett took an immediate liking to the surroundings and stayed. His California family soon joined him here.

The railroad people had dropped off a box car to serve the growing community as a depot, post office and general store. On Feburary 2, 1885 Midland County was established; 26 days later the City of Midland was formed.

The old, middle-aged and young enterprises of Midland have contributed immeasurably to the progress, pride and prosperity of our city. You will be interested in reading this list of leading firms and organizations whose names have been arranged by the number of years they have served

Used Car Salesman No Joke When You Get A CLUNKER

You will probably spend the least if you buy from an individual, but you may have to pay a price for your savings. Individuals usually sell cars "as is". You may have to put added money for repairs into the auto you select. You will not get a service agreement and will have no recourse if something goes wrong.

The new-car dealer probably will have the newest used cars; the older, less-desirable cars he gets as trade-ins are usually sold to used-car dealers. The new-car dealer also will, as a rule, give you the most complete service agreement.

Only at ROGERS FORD do used vehicle buyers get a NO CHARGE, 12 MONTH or 24,000 MILE SERVICE CONTRACT and ROGERS FORD puts it in writing! WHY TAKE LESS?

Teng Haiao-ping

Nguyen Cao Ky

People in the news

SEATTLE (AP) - Chinese Deputy Premier Teng Hsiao-ping won't be given a key to the city of Seattle when he visits next month, but it won't be a Texas-style snub, either.

The key issue has caused quite a flap in Houston, where Mayor Jim McConn has decided not to present a key to the city to Teng because of opposition to the visit voiced at a Houston City Council meeting

In Seattle, however, the point is moot. The city does not give out keys.

LOS ANGELES (AP) - Former South Vietnamese government leader Nguyen Cao Ky says the exiled Shah of Iran gave ammunition to his opposition by accepting American support and building a strong war machine.

Ky, who now owns a liquor store in Norwalk near his suburban Huntington Beach home, likens the unrest in Iran to what happened in South Vietnam.

A by-product of American support, he said in an interview with the Los. Angeles Times, is a loss of national identity.

Ky said Shah Mohammad Reza Pahlavi's mistake was spending. billions of his oil-rich country's petrodollars on building a strong military force.

VATICAN CITY (AP) - Dr. Renato Buzzonetti, an Italian, has been named the head of the Vatican medical department and Pope John Paul's personal physician, the Vatican announced Saturday.

Buzzonetti, 54, who once served as a physician to Pope Paul VI, replaces Professor Mario Fontana, who reached the compulsory retirement age of 75.

A specialist in gastroenterology and hematology, Buzzonetti will accompany the pope on his visit to Mexico and the Dominican Republic next week. The pope will also take along a Polish doctor, Mieczslaw Wislocki, who used to treat the pope when he was the archbishop of Krakow, Poland.

NEW YORK (AP) - Anthropologist Margaret Mead was posthumously awarded the Presidential Medal of Freedom - the nation's highest civilian honor -- during a memorial ceremony in her honor Saturday.

Andrew Young, U.S. ambassador to the United Nations, representing President Carter, read the official citation which praised Mrs. Mead as a 'student of civilization and an exemplar of it.'

She was "intrepid, independent, plainspoken and fearless," the citation read.

Stories at AA meet end similarly

By SUSAN TOTH R-T Staff Writeer

Their problems were different, but their stories had similar endings.

The two women who addressed the Ninth Annual Midland Mid-Winter Alcoholic's Anonymous Conference each talked about her problems and her recovery from disease.

One is a recovering alcoholic. The other, a member of Al-Anon, is married to a recovering alcoholic.

Ann P. told those gathered in the ballroom of the Midland Hilton Saturday that sobriety brings its own rewards. Everything comes full circle eventually

One of the benefits of nearly 21 years without a drink is that so many things have come full circle, she said

Her son became her reason for staying sober when he returned to her after his father's death, she noted.

When he called to say he was getting his wings after Air Force training, "there wasn't time to sober up, lose 30 pounds, grow back my hair

and get ready. I had to be sober and waiting," she said. After being out of touch with her son for seven years, she plans to fly to-

and you know how they are," she told

Her recitation of experiences before

Even suicide attempts had humor-

"I always fantacized about what

the stretcher bearers would say. One

would look at the other and say, 'I've

seen some clean ones in my time, but

The cleaning ritual before her at-

her recovery had her audience alter-

her appreciative audience.

nately in tears and stitches.

ous aspects in hindsight.

this is the cleanest."

tempts, however, would make her feel so good, "I'd go out and get drunk again," she said.

After finally reaching for help in

"You've lived with this drunk for all these years, and you're used to looking down on him. Then all of a sudden, he goes to this club and you've got a hero on your hands."

Corpus Christi to see him and her AA, she's married to a man she met a grandson when this conference ends the meetings, and lives to be sober one day at a time. "He's been in AA for a year now,

Karin A., a member of Al-Anon from Anaheim, Calif., also talked about recovering from her disease. "If you joined Al-Anon to sober up a

spouse, that's one of the finest motivations you could have.

"It won't work, but it's admirable," she told the group of fellow formersufferers.

Partners of alcoholics also are sick and follow the same 12 steps to recovery their spouses use, she said. Through Al-Anon, she stopped casting herself as a victim, and "I was on the way to being free," she noted.

After her husband reached for help through AA, Karin noted, she still had to deal with her problems. 'You've lived with this drunk for all

these years, and you're used to looking down on him. Then all of a sudden, he goes to this club and you've got a hero on your hands," she said.

Members of Al-Anon do not talk about their alcoholic partners during meetings, she noted, only about their own problems and recovery. "I had some trouble with that --- I had some juicy tidbits I thought they should know," she told the laughing audience.

Her husband, during the time he was drinking once pointed to a man outside a liquor store. "See that man over there," he asked. "He's an alcoholic.

"How do you know?"

'Because he's here every day when I come in."

Having admitted the problem, each is now recovering from the sickness, she said.

Rape charge now 'Gone With the Wind?'

The Los Angeles Times

WASHINGTON - I don't know anyone in this country who has taken a stronger position on rape than this columnist. I've been against it. Therefore, when Greta Rideout charged her husband with raping her and Mr. Rideout was tried for the crime last month in Salem, Ore., I, with so many women's liberators in this country, was hoping he would be sent to the slammer for life and the authorities would throw away the

It so happens that a bleeding-heart jury found John Rideout innocent of the charge and set him free. My indignation ran high. By letting him walk

Installation set

New officers of Parkview Hospital will be installed during the meeting Tuesday at the hospital.

Outgoing president E.W. McCullough will turn the meeting over to the new president Dr. Albert Horne. He also will install Dr. Bill Alexander as secretary, Dr. Ramon Domingo and chief of medicine and Dr. Ralph Berry as chief of surgery.

The new officers will review the recent refurbishing of the hospital including both patient wings and the the newly completed surgical faciliout of the courtroom the jury was saying that, in so many words, John Rideout could rape any wife he was married to without fear of doing 10 to twenty. But Greta Rideout would live with the scars for the rest of her life a woman, if we were to believe her testimony, who had been violated by her own husband against her will. I was willing to march on the state capitol of Oregon to protest this flagrant disregard for justice.

Then a couple of weeks ago a funny thing happened. The newspapers reported that Greta and John Rideout had reconciled and were back together. After attempting to send her husband to the prison farm, Greta had decided it was all a big mistake and that she loved him in spite of what he had done to her, or maybe because he had - I wasn't quite sure from reading the story.

John, instead of being bitter about having to stand trial, said he loved Greta and he hoped they would live happily ever after.

The taxpayer of Oregon who footed the state's bill for prosecuting Mr. Rideout were of course happy that John and Greta were reconciled. But they were also a little peeved because they had to pay for such expensive marriage counseling. The only ones who came out looking good were the members of the jury, who said after

they had reached their "not guilty" verdict that, despite all the evidence presented, they just could not buy Mrs. Rideout's story.

So the question arises: Should a husband be charged with raping his wife? Obviously, the Rideouts have made it more difficult for another test case. Those of us who took a strong stand in favor of hanging John Rideout will now have to rethink our position on this issue. Had Rideout been found guilty and sent away there would have been an entirely different conclusion to the drama, and one of Oregon's great love stories might never have reached the happy ending we were treated to last week

I must admit that all during the well-publicized trial my wife kept saying, "You're being too hard on John Rideout. There is more to this story than Greta is admitting."

"How can you say that?" I would shout at her.

"Do you remember 'Gone With the Wind'?" she asked.

'What does Gone With the Wind' have to do with a husband raping his wife?

"The big scene in 'Gone with the Wind,' for most women, was when Clark Gable and Vivien Leigh had their famous fight and Clark grabbed her and carried her upstairs to the bedroom. The next scene showed Vivien the following morning in a rumpled bed with the happiest smile she'd had on her face during the entire picture 'Are you trying to say John Rideout

is Clark Gable?

'Not necessarily," she said, "but Greta Rideout could be another Vivien Leigh.

Well, at least in the case of Greta, I guess my wife was right.

I'll never take sides again in a husband-wife rape case without first. thinking of "Gone With the Wind." In fact, I wouldn't be surprised if the Rideouts sell their story to the movies and become the Rhett Butler and arlett O'Hara of our time.

Commissioners to meet Monday

Midland County commissioners are scheduled to approve County Child Welfare Board appointments when they meet at 1:30 p.m. Monday in the county courthouse.

Also on the agenda for the meeting will be a discussion of changes in the Xerox billing procedure, a proposal from Dallas Smith concerning communications personnel in his office and discussion on appointing a Public-**Responsibility Committee.**

SECTION

In the special world of Midland's clubs, groups, sororities and societies, at least one organization has emerged as a real leader in volunteer service to the community: Junior League. Object of the league is to train its members for effective participation in the community through a program of education and volunteer service. And here in Midland, the league fulfills

Spotlighting

that purpose very well. Over the years, the organization has poured several hundred thousand dollars into community projects. But, even more importantly, they have trained countless persons for volunteer

service. Three projects initiated this past year will join the group's many ongoing projects, including the Children's Dental Clinic, directory of Community Services, Docent Program at the Permian Basin Petroleum Museum, Library and Hall of Fame, Exhibit and Docent Program at the Museum of the Southwest, film service and audiometric screening, musical

therapy, Sara Wooldridge Clinic, Pickwick Players and the Student Art Festival. The League also has been contributing to Midland Memorial Hospital in many capacities since 1950. Contributions to the hospital have been donations of equipment through the league's Memorial Fund which is de-

THIS YEAR the league began Cardiopulmonary Resuscitation (CPR) instruction in the public schools.

signated for hosital purposes.

The course is taught to all ninth grade health classes at Austin and Edison Fréshman Schools. CPR is described as artificial oxygen for a victim because his body cannot perform these func-

Junior League

tions on its own. Common causes of CPR arrest are heart attack, drowning, electrical shock, suffocation, poisoning, choking and smoke inhalation.

In short, CPR training car save lives.

The classes are taught by the league's CPR committee members, composed of about eight members, who are all qualified to teach the course from the American Heart Association. Junior League members teach

one third of the children the basic skills of CPR each quarter. Another recent project of the

league is the Perinatal Clinic which operates at the City and County Health Department.

THE LEAGUE meets a real need of the community by its support of the clinic. League volunteers provide an educational and financial program to pregnant women prior to birth and in the hospital following birth.

Women who are eligible to participate in the program meet once a week at the clinic's three locations where they receive information on pregnancy and child care conducted by volunteer physicians and staffed by licensed nurses.

Subjects in the curriculum include fetal development, nutrition, infant feeding, exercise and home safety. The value of good prenatal care is stressed. One of the newest projects begun by the Junior League is the Cultural Arts Pilot program in the Midland Independent School District.

Purpose of this project is to offer a program of fine arts to young children by incorporating the school district's curriculum with related art, dance and drama. public school children. One of the biggest projects taken on by the league is the Partners in Reading program.

THIS PAST FALL, 800 packets were prepared for children reading below grade level in grades three through six in Midland schools.

Midland Assessment Program test results were received by the school district in mid-October and partners were assigned shortly thereafter.

A welcome addition to the program in the current year has been the 1,000 packets for advanced readers in grades four, five and six. Another new effort is the booklet which is being prepared for all first and second grades. The league hopes that this will serve as an incentive for parents to begin a program of at-home reading and study with their children early in the students' school careers.

Junior League has provided the packets for the program and was involved in contracting for local printing of many packet materials, visiting all elementary principals to discuss and offer assistance with the program, and coordinating volunteer recruitment with the PTA City Council.

The league also planned and assisted wih training for volunteers, assembled packets, prepared a slide presentation about Partners in Reading and are now making plans for the remainder of the year.

AS IS EVIDENT, countless hours of preparation and work go behind the scenes to bring off a project, whether new or ongo-

The upcoming Charity Ball and the Next-to-New Shop, 509 E. Illinois Ave., are the league's only two fund-raising activities. All proceeds from these two ac-

SUNDAY, JAN. 21, 1979

breathing and artificial circulation of blood by a trained rescuer who must externally provide Junior League volunteers work periodically at Carver Center with all second grade tivities are returned to the community through league projects.

Prenatal patients at the City and County Health Clinic are instructed by Julie Wolfe, left, Junior League volunteer and chairman of the prenatal committee. Students are Sharon Langley, middle, and Rose Atchison.

Ninth grade students at Edison School Candy Kiker and Jeff Schaerer are taught the method of Cardiopulmonary Resuscitation by Sue Roberts, Junior League volunteer.

Participants in the Partners in Reading program are, sitting from left, Lori Thames and Lisa Ivy. Linda Sherman is enrichment teacher at the Fannin Elementary School. These girls are members of the advanced reading program.

The Junior League of Midland, Inc., will host its annual Charity Ball at 8 p.m. Jan. 29 at the Midland Country Club.

Theme of this year's event is "Cinema 79--A Wonderful Night at the Movies."

The Charity Ball is one of only two annual fund-raising projects of the Junior League. The other is the operation of the Next-to-New Shop located on 509 E. Illinois Ave.

All proceeds from the event will go back to the community through the league's numerous projects.

As guests enter the Country Club for the ball, they will be greeted and welcomed down memory lane by a large freestanding Mickey Mouse.

They will then step into the world of movies, complete with movie posters, theatre ropes, a large MGM movie company lion, and popcorn.

The ballroom will feature the World World of Disney movies. "The Jungle Book" starring Baloo the Bear and Mowgli the Boy will be shown in the Garden Boom.

For those who prefer the fifties, "Grease", accompanied by assorted fifties paraphernalia, will highlight the grill, private dining room and an add-on room.

Annual Charity Ball Jan. 29

The tavern will specialize in movie sections from newspapers and the Ladies 19th Hole room will show Gable and Bogart.

This year's Charity Ball Committee is led by Mrs. James H. Isbell, chairman; Mrs. Larry Bell, decorations chairman, and Mrs. Dan F. Secker, assistant decorations chairman.

Other members of the ball committee are Mrs. James C. Brown, Mrs. Charls W. Perry, Mrs. Dean E. Wolf, Mrs. Michael B. Kelly, Mrs, Gordon Votaw, Mrs. Waye Ulrich, Mrs. Carl C. Foulds, Mrs. Robert Mann, Mrs. Ferrell Davis, Mrs. Keith Diepraam, Mrs. John Elphick, Mrs. Gordon Marcum II, Mrs. Spencer Beal, Mrs. Bill Worley and Mrs. Dan Moody. Mrs Glenn A. Rogers is president of the league. Other execu-

dent of the league. Other executive committee members are Mrs. Mac Williams, vice president; Mrs. Emile M. Farha, recording secretary; Mrs. Redfern Glenn, corresponding secretary; and Mrs. Dean E. Wolf, treasurer.

Members of the board of

Inside

directors are Mrs. Bruce W. McKague, Mrs. Harvin L. Landua Jr., Mrs. Gordon Votaw, Mrs. Andrew E. Reed, Mrs. James H. Isbell, Mrs. Reid Caskey, Mrs. Verne Griffith Jr., Mrs. James H. Avocado good buy

By CECILY BROWNSTONE **Associated Press Food Editor**

We want to make sure you notice the nutritious avocado is thrifty to buy now and in excellent supply. The United States has more plantings of avocado trees than ever before.

And so we've been trying avocado recipes and are eager to share a particular favorite. It's for a delicious and practical version of guacamole, an avocado dip served with tortilla chips.

Usually guacamole has to be made at the last minute to guard against the avocado darkening. Our guacamole is a "make-ahead." Its ingredients include unflavored gelatin - just enough to give some body - and thus it needs time to chill and set softly. Prepared in the morning, it still has its pretty color in the evening.

MAKE-AHEAD GUACAMOLE

ornennonn	Two Centers
1 envelope unflavored gelatin	To Serve You
1/4 cup cold water	10 561 46 100
1/2 cup boiling water 1 tablespoon lemon juice	
1½ cups finely mashed avocado	Diet Center No.
1-3rd cup mayonnaise	Carol Miller
³ ⁄ ₄ teaspoon salt 2 tablespoons finely diced mild sweet onion	Certified Counselor
1 small ripe tomato, seeded and finely diced (1-3rd	684-5081
up)	409 Kent
Tortilla or corn chips	

In a medium mixing bowl sprinkle the gelatin over the cold water and let stand about 5 minutes to soften. Add the boiling water and stir until dissolved.

Urban buildings source of fossils

SYRACUSE, N.Y. (AP) - Fossil hunters in urban areas need not leave the city to pursue their hobby. They can join the growing trend of spotting fossils in building stones.

Syracuse University geologist Osborne Nye says more and more fossil hunters and rock hounds are combing urban areas, enjoying the abundance of fossils to be found in building stones.

The wedding will be held at 6 p. March 10 at the First Baptist Church in Rankin.

The bride-elect is a 1978 graduate of Rankin High School and is employed by Gibson's in Midland. Her fiance is a 1976 graduate of McCamey High School and is employed by Compressor Dynamics in Odessa.

PAGE-FATOUT

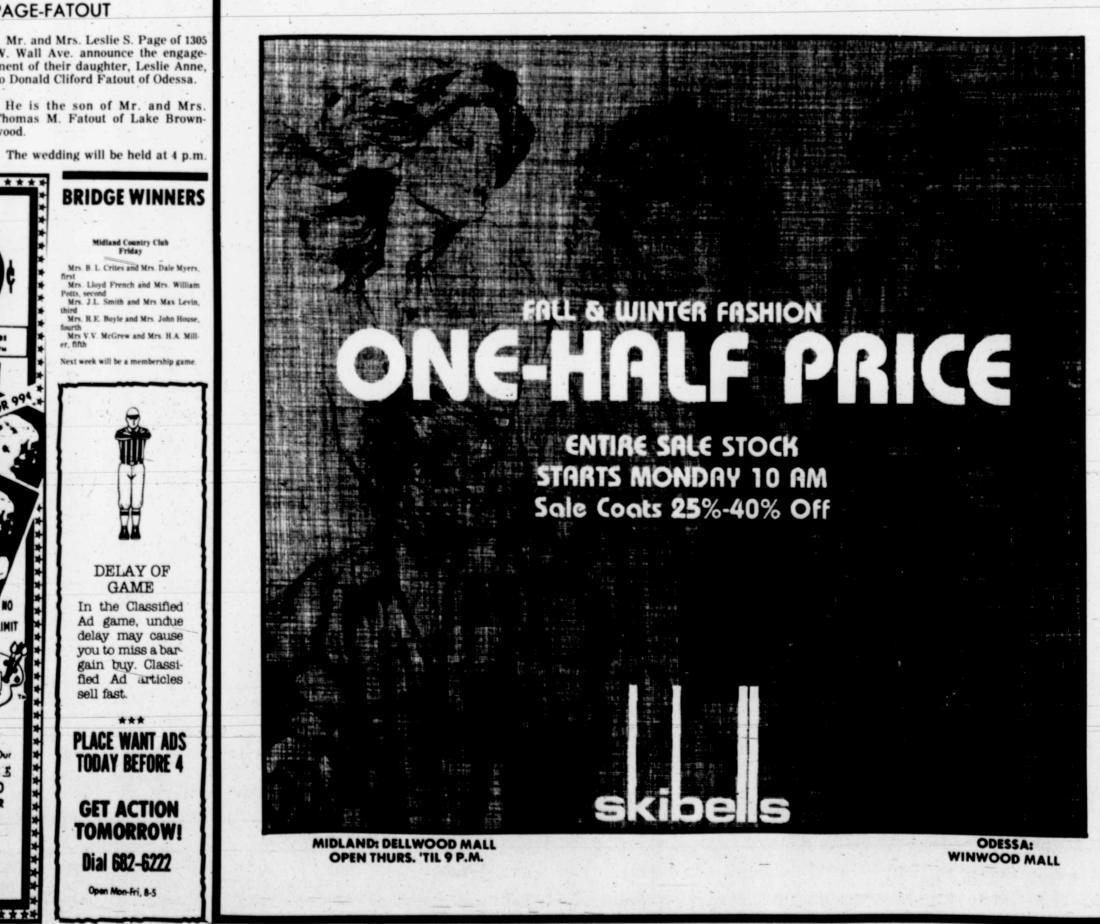

Mr. and Mrs. Leslie S. Page of 1305 W. Wall Ave. announce the engagement of their daughter, Leslie Anne, to Donald Cliford Fatout of Odessa.

Thomas M. Fatout of Lake Brownwood.

The wedding will be held at 4 p.m.

Whisk in the lemon juice, avocado, mayonnaise and salt to blend; stir in the onion and tomato. Turn into a 3-cup mold or bowl. Cover tightly with saran. Chill to set. Unmold or leave in bowl and serve with tortilla chips. The Guacamole will be soft enough to use as a dip; it may be made in the morning and served in the afternoon or evening without its darkening.

Andrea Dey Arnold and James Ri-chard Hatteberg of Houston were married at 4 p.m Saturday in the Church of the Holy Trinity in Midland

Parents of the bride are Mrs. L. Kimble McAbee, of 1701 W. Illinois Ave., and H. B. Arnold of Arkadelphia, Ark.

Parents of the bridegroom are Mr. and Mrs. John Hatteberg of Houston. The Rev. Sam B. Hulsey officiated the ceremony. The bride was given in marriage by her stepfather, L. Kimble McAbeee of Midland.

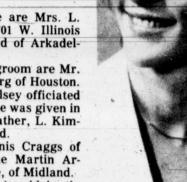

Attendants were Denis Craggs of Houston and Katherine Martin Arnold, sister of the bride, of Midland. Ushers were Gordon B. Arnold, brother of the bride of Midland, and Mason Standley of San Antonio. Organist was John Bryant.

The bride wore a winter white suit and carried a prayer book which was covered in needlepoint patterned by her sister.

Reception was held in the Garden Room of the Midland Country Club. Rehearsal dinner was held Friday and hosted by the bridegroom's parents at the Hilton Inn.

A brunch for the bridal party and out-of-town guests was hosted by Mr. and Mrs J. Harvey Herd of Midland in their home Saturday.

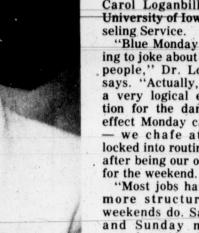

Pre-departure breakfast was host-

Mrs. James R. Hatteberg

ed by Mr. and Mrs. Foy Boyd in the Charolais Room of the Midland Hilton this morning.

The bride is employed in the LNG division of El Paso Natural Gas. The bridegroom is employed by the Red Adair Company in Houston

Association of University Women's International Group meeting in the home of Adelina Ochoa, 905 Pine Court.

The meeting Feb. 21 will be at 2 p.m. in the home of Mary Olgin.

Why does one clean a chimney? There are a number of reasons but mainly because they aet dirty. When chimneys are dirty, the fire doesn't burn well. Dirty chimneys sometimes emit offensive odors. When dirty the damper cannot close properly, which causes a loss of heat in the winter and air conditioning in the summer. And last but not least, when chimneys are dirty they sometimes catch on fire (which immediately causes an emergency and a disaster)

When should a chimney be cleaned? When it is not in use of course-you can't clean one with a fire in it. If you wish to be completely safe, have your chimney cleaned after 2 /2 to 3 cords of wood is burned in it.

Easy Crab Quiche delicious finger food

By CECILY BROWNSTONE ed; stir in the flour, then the water. AP Food Editor

DEAR CECILY: My

daughter, newly married and learning to cook, loves a recipe of yours I passed along to her. It's for a crab quiche made in a 9-inch pie plate to serve as a main course for a company lunch or supper. The recipe's big attraction for her is its pat-in-the pan crust because she is not yet adept

at rolling out pastry. Now she is having a cocktail party and wondered whether you would give a recipe for the crab quiche made in a square or oblong pan so that it can be cut in bite-size pieces for finger food. I volunteered to ask you. - HELPING HAND.

DEAR HELPING HAND: Here's an oblong

Spread over pastry. Sprinkle with the Swiss cheese. In a medium bowl beat together until blended

the Parmesan and crab.

the eggs, milk, salt and pepper. Carefully pour over the crab and cheese. Bake in a preheated 350-degree oven on the

rack below center for 35 to 40 minutes. Cool slightly. Cut into squares each about 2 by 2 inches. Remove with a small spatula and serve

at once or keep warm in a low oven for a short time.

Makes 24 FINGER PASTRY: Stir together 1 and 1-3rd cups fork-stirred all-purpose flour and 1/2 teaspoon salt. With a pastry blender, cut in 1/2 cup (one quarter-pound stick) butter. Sprinkle

Mrs McMann, program chairman, introduced Mrs. Buddy Ice of Odessa, vice director of District I, Texas Garden Clubs, Inc., who spoke on "Bonsai Collection." She defined bonsai as a "tree in a pot." On display were a juniper, catalin elm and ginkgo bilboa

quiche for willing fingers. Patting the dough over the bottom and partly up the sides of the large pan isn't as speedy a process as one might think, but it certainly is easy. Tell your daughter not to worry about pressing out the pastry absolutely evenly; a slight variation in thickness doesn't seem to matter in this recipe. If she does the best she can, all will be well. - C.B.

CRAB PICKUPS Finger Pastry, see below 1 tablespoon butter

4 cup finely chopped mild sweet onion

1 tablespoon flour 1/4 cup grated Parmesan cheese

6 to 8-ounce package

frozen (thawed) or 71/2ounce can Alaska king crab, well-drained

1 cup lightly packed grated (medium-fine)

Swiss cheese 3 large eggs 1 cup milk 1/2 teaspoon salt 1/4 teaspoon pepper

Make up the Finger Pastry. Shape into a flat rectangle; cut into 4 equal portions and place in a 13 by 9 by 2-inch baking pan. Pat dough evenly to cover the bottom and extend 1/2 inch up the sides of the pan. In a medium skillet in the hot butter, gently cook the onion until wilt-

Miss Chalnessia Mitchell, Mark Thomas Allen marry

Chalnessia Deborah Mitchell and Mark Thomas Allen were married in a double ring ceremony at 2 p.m. Saturday in the chapel of the First Baptist Church. Officiating were the Rev. Glen N. McNerlin and the Rev. Edward Vrazel, O.M.I.

Mr. and Mrs. Billy J. Mitchell, 1402 Lanham St., are the parents of the bride. The bridegroom is the son of Dr. and Mrs. Francis Arnold Allen, 2601 Harvard St.

Sue Lee was the matron of honor, and Sharon Allen, sister of the bridegroom, was maid of honor. Erin Allen, sister of the bridegroom, and Tracy Logan were bridesmaids, and Sheri Smith was bridesmatron.

Attending as best man was Rick Schmidt of Nacogdoches. Groomsmen were Mario Castillo, Drew and Neal Mitchell, brothers of the bride, and Raymond Castillo. Brett Hanson of Lubbock and Kevin Allen of College Station, brother of the bridegroom, were ushers.

Music was provided by Donna Padgett, organist, and Charles Oxford,

Mr. Mitchell presented his daughter in marriage. She wore an original traditional gown of candlelight Oriental silk with Venise and Alencon lace. The fitted Empire bodice had a sheer yoke overlaid with pearled lace and finished with fluted edging. It had a sheer portrait neckline and long sleeves of sheer Oriental silk finished with cuffs overlaid with matching pearled lace and fluted edging. The A-line skirt with scalloped Venise lace

around the edge ended in a fluted ruffle orming the chapel train. A pearled lace Camelot cap was attached to a two-tiered veil of candlelight silk illusion. She carried a cascade of gardenias.

The reception was held in the church parlor.

After a trip to Hawaii, the couple will reside at 4405 N. Garfield St. Out-of-city guests attending the wedding included Peggy Bowen of Fort Worth, grandmother of the bride, and Helen Thomas of Fort Worth, the bridegroom's grandmoth-

Cynthia Coleman marries **Michael Mullins here**

Cynthia Joyce Coleman, of 4201 N. Garfield, and Michael Ross Mullins, of 2405 Hayes St., were married at 10 a.m. Saturday in the chapel of the First United Methodist Church.

Parents of the bride are Mr. and Mrs. Robert A. Coleman of Odessa. Parents of the bridegroom are Mr. and Mrs Ross Mullins of Albuquerque, N.M.

of apricot Quiana. She carried a bouquet of yellow cymbidium orchids. Reception was held in the Mirror Room at Ranchland Hills Country Club.

Following a trip to Ruidoso, N.M. the couple will reside in Midland.

The bride received her bachelor of science degree from New Mexico

Acker at the February city council meeting. Chapter scrapbooks are to be turned in at the April meeting. Odessa **City Council of Beta** Sigma Phi will judge this contest, with winners to

be announced on Founders Day in April. Next meeting is scheduled for Feb. 5 at The First National Bank.

Jenice Miller is one woman who can hold her own against a man in the ring-and out of the ring.

Who says karate is for men only?

By PATSY GORDON R-T Lifestyle Writer

150

10

She is tall, blonde, blue-eyed and quite attractive. She speaks with a soft, Southern accent and is quick to smile. and, she can kill you with a single blow. She is the U.S. Women's karate champion, fifth degree black belt holder and the first black belt woman in Texas.

Jenice Miller, 33, has won a total of 468 trophies in national and international competition.

She has moved back to West Texas, more specifically Midland, "to promote karate as a competitive sport." Ms. Miller was reared in the oil_fields of Andrews, where her parents, Mr. and Mrs. T.A. Payne, still live.

Jenice did not have "an athletic background to speak of," even though Andrews High School won the girls basketball championship several times.

When she graduated from high school, she set off for a career in nursing because "she likes helping people."

After graduation from Eastern New Mexico University, an illness stopped her nursing career because of the rugged pace, so she switched her profession to that of a secretary.

Jenice left Andrews for Big D to take a job with Texas Instruments, where she got her first introduction to the sport that became her livelihood.

She used her soft accent to describe how karate became her profession.

"The employees of Texas Instruments were having a little trouble with purse stealing, that sort of thing, in the parking lot. The company decided to offer a course in self-defense and one thing led to another."

The martial arts champion acquired her first degree black belt in 1970, three years after entering the field of karate. From there she advanced to the fifth degree black belt and "all of my rank was achieved against men. I never tested my ability against women." And that should answer the question of whether women can fight men, " successfully.

But when she enrolled in Allen Steen's school of karate in Dallas, she was frightened. Once when she was trying to slip out of class, the instructor caught her and the next thing she knew she was freesparring. The next weekend she found herself in her first tournament. In fact, she came wihtin one point of being the top female fighter in her first tournament.

The black belt is based on set standards of ability. Prospective holders take tests for each stage or period in training "to see if they are progressing properly," said Ms. Miller.

It is no easy chore to get to black belt status in karate, said Ms. Miller. The beginner starts as a white belt and remains that way until he has shown he has mastered the sport enough to move up to orange belt, usually a six-week trip. From orange belt, it's about four months to green belt, then eight more months to blue belt. About four months later, the karatica reaches the stage called brown belt. He begins as a fourth degree brown, and it will take him normally more than one year to advance to first degree black belt. Once a first degree black belt, the karatica, if he is seeking the ultimate in perfections in the Korean school, will strive to reach the ninth degree black belt, normally a 20-year ordeal. Another thing the self-defense course led to was her marriage to Jim Miller, then a young sheetmetal worker from Dallas. They both received their first black belt Dec. 6, 1970.

She and her former husband opened karate schools in Louisiana, Mississippi and the Gulf Coast area, and their sons Brad, 12, and Christian, 2, are involved in the sport, although the youngest son is not too thrilled yet.

"I really love karate, and I just believe in it so much. It helps you in so many ways. Karate involves your total being and not special equipment.

"What small people lack in size, they gain in speed" with karate, said Ms. Miller, who practices Tae-Kwon-Do, the use of hands and feet for self-defense.

Ms. Miller, who works for Laguna Petroleum Co. here, feels karate is good for kids, too. "It doesn't turn children into attackers. It gives the child confidence and a sense of accomplishment."

The largest percent of the children that came to the Millers school were "weaklings" or "bullies."

"Normally the 'fighters' are actually kids with little or no confidence," said Ms. Miller. "When the parents brought them to us, they asked us to take the bully out of them, and we did it by teaching them different lessons, while they were learning the sport.

"The bully learns he has ability, and with the ability comes responsibility. He gets to scrap in a place where there is supervision.

"Usually when they get into karate, they leave the bully behind.

"Sometimes the parents brought their "weakling" sons to have dragon killers made out of them. Usually, the child was steered to karate instead of just brought in and told 'learn how to fight.' In these cases, the child has been over-protected by his mother or he is just physically unable to defend himself. Most parents are not equipped to teach their children how to defend themselves. That's where we came in."

She has proved that the karate business need not be strictly a man's world.

"I only had one male student who questioned my ability as an instructor simply because I was a woman.

"He couldn't believe I had to meet the same black belt requirements as a man." After a period of time, less was less competition between her and the male student. "He decided he didn't have to prove anything to me."

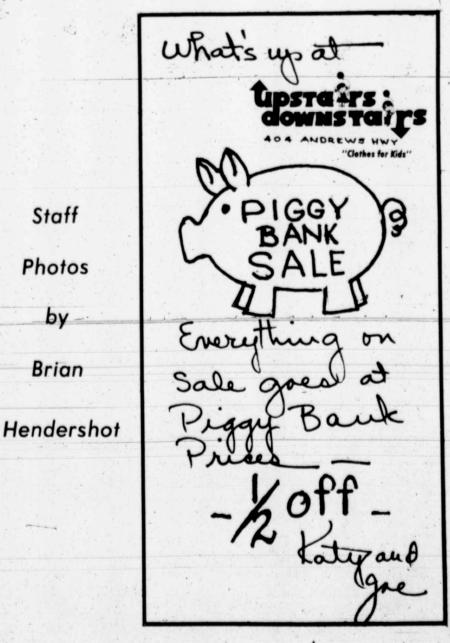

"For as long as I can remember, I've always wanted to accomplish something more than just being a housewife or a baby machine," Jenice said candidly. When I was a young girl straddling an oil barrel, making believe it was a horse and I was winning every race in the world. Well, as my height went up," she's 5-foot 9½, "my chances of becoming a jockey went down. But I wanted people to know who I was, that I was more than a knock-kneed, freckled-faced girl who lived too far from town to be a Girl Scout, take dancing lessons or be in the in-crowd."

She has come a long way since she grew up as a tomboy in the Andrews oil fields. And she has won a lot of the recognition she sought as the would-be jockey. But the race hasn't been an easy one and her female 'handicap' hasn't made it any easier. Neither has her recent bout with diabetes.

It seems that blisters acquired during a recent marathon race failed to heal and doctors discussed the possibility of amputating her leg—but didn't. She gives credit to her active physical life for her successful fight against gangrene. Because of this, Jenice vows to incorporate aerobics into her instruction.

In fact, she will be teaching classes at Golden Life Spa in Midland and aerobics will be taught, both intermediate and advanced. Persons interested in talking to Jenice about learning karate can reach her at 683-0859.

If every woman knew what Jenice Miller knows about karate, the Midland Police Department's Rape Squad probably would be unemployed.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Faithful preacher deserted by wife feels preyed upon

By Abigail Van Buren

DEAR ABBY: I am an ordained minister in the Presbyterian Church. I have tried in all good faith to fulfill my duties as a husband and father (we have two young children), but my efforts have been rejected by my wife

She left me for another man. Soon after, she decided she wanted our . house and children (but not me), so she petitioned the court and was awarded temporary custody of the children plus possession of our home. This meant that I, who had cared for the children after she deserted us, had

to pack up and leave. Abby, this automatic favoritism the

courts have towards mothers is unjust. My wife has shown herself to be unfaithful and unfit to raise the children. Yet I am the one who is being punished.

I want my house and children back. What should I do? (P.S. Yes, I have a good lawyer.)-

BACHELOR FATHER DEAR FATHER: You say you have a good lawyer. Good. You need one.

Take his advice. Be patient. The wheels of justice sometimes grind slowly. Practice what you preach: "The Lord never gives us a heavier

load than we can carry."

DEAR ABBY: In response to the dieter who finds it tough to turn down dessert-pushing hostesses, may I offer the following solution:

When the insistent hostess brings on the dessert, simply say, "Sorry, I'm allergic to it." Then add, "It makes me break out in fat!"

It's straight to the point and it's true.-WEIGHT WATCHER DEAR WATCHER: Thanks for a timely reminder to take off those extra five pounds we put on over the

holidays. I've already done it, which entitles me to the "no-belly prize."

DEAR ABBY: I borrowed \$200 from a friend 14 years ago. Nothing was said about interest at the time.

I am able to pay the money back now. My friend says I owe her interest because if I had borrowed from the bank I would have had to pay interest.

But, Abby, it wasn't a bank I borrowed that money from, it was from a friend.

What do you say?-WONDERING

DEAR WONDERING: Since no. mention was made about the interest when you borrowed the money, pay her \$200 and call it square. (P.S. I should think your friend would be glad to see any money at all after 14 years.)

DEAR ABBY: My daughter is making plans for her wedding. Her mother and I were divorced, and we have both married again.

My daughter phoned to tell me that her brother is going to give her away in marriage. Abby, I thought it was traditional for the bride's father to

give her away. I told my daughter that if I could not give her away I would not attend the wedding. Was I right or wrong?-S. C. IN ALA.

Bonnie Quatkemeyer

Eagle officer to visit

Bonnie Quatkemeyer, president of the National Fraternal Order of Eagles Auxiliary, will visit the local Eagles auxiliary this week in Midland.

Mrs. Quatkemeyer is to be honored at a dinner and initiation ceremony at 7 p.m. Wednesday in the Eagles home. She will also visit High Sky Girl's Ranch Thursday.

A resident of Sarasota, Fla., Mrs Quatkemeyer began her leadership in Eagle activities as Madam President of her local auxiliary, District No. 3, which she organized in 1975. She was first Madam President of the Florida State Auxiliary. In addition, she was active in the auxiliary's four major humanitarian projects which are the Heart Fund, Cancer Fund, Jimmy Durante Children's Fund and the Golde Eagle Fund. Mrs. Quatkemeyer is active in ritual work, having been vice-president on the Sarasota Team for a number of years. She has served the Grand Aerie and the Grand Auxiliary on various occasions by organizing new auxiliaries in Florida uting new units for the Order

She was unanimously elected to the office of Grand Madam President-elect during the 26th Grand Auxiliary Convention in Minneapolis, Minn.

HOROSCOPE

By CARROLL RIGHTER

(Sun., Jan. 21)

GENERAL TENDENCIES: The daytime has no very good aspects in affect until evening and it is necessary to live the Golden Rule and refrain from making vital decisions for best results. ARIES (Mar. 21 to Apr. 19) Making radical changes in your life-

style is not wise at this time. Make sure your surroundings are in good condition. TAURUS (Apr. 20 to May 20) Be certain to carry through with pro-

mises made and not try to get out of them. Follow your hunches which are accurate now.

GEMINI (May 21 to June 21) Showing appreciation to those who have been loyal to you in the past is wise now and right. Try to be more cheerful

MOON CHILDREN (June 22 to July 21) Plan how to better express your finest talents. Your mate may be irritable during daytime but by evening will be cheerful. LEO (July 22 to Aug. 21) Use tact at home and maintain harmony

and then the evening becomes a happy one. Make sure your activities are well organized.

VIRGO (Aug. 22 to Sept. 22) Think along lines of the highest precepts through which to regulate your life in the future. Try to please your mate more.

LIBRA (Sept. 23 to Oct. 22) Be careful not to get into any money troubles with others today. Take no risks with your reputation. Be logical. SCORPIO (Oct. 23 to Nov. 21) Wait until evening to go after a par-

ticular aim and get excellent results. Take time to make plans for the days ahead.

SAGITTARIUS (Nov. 22 to Dec. 21) It is to your best interest to handle a family situation in the evening when the planets are favorable. Be ready for the new week.

CAPRICORN (Dec. 22 to Jan. 20) Avoid certain friends who are very determined to get what they want at your expense. Take no risks with your reputation.

AQUARIUS (Jan. 21 to Feb. 19) Make sure you do nothing that could irk a long-time friend or you could seriously regret it later:

Strive for happiness. PISCES (Feb. 20 to Mar. 20) You will get into trouble if you fail to keep a promise today. Get together with family members and make plans for the future.

By CARROLL RIGHTER

(Mon., Jan. 22)

GENERAL TENDENCIES: You are under good influences for seriously considering a new and improved set of circumstances whereby you can gain a well-rounded expression of your goals. Good for investigating what you do not understand.

ARIES (March 21 to Apr. 19) A good time to clear the slate for bigger activities ahead. Be more supportive of your loved ones and get good results

TAURUS (Apr. 20 to May 20) Cement better relations with associates through discussions and operate more intelligently in the future. Don't take on any unnecessary expenses. GEMINI (May 21-to June 21) Schedule your time so that you can

accomplish a great deal. Talk over work with co-workers and plan it well as to individual duties

MOON CHILDREN (June 22 to July 21) Show more affection for loved ones and get good response. Plan for amusements you want to

enjoy later on. LEO (July 22 to Aug. 21) Improve conditions at home where needed so that you don't have to worry about them. Be careful of details in an important matter.

VIRGO (Aug. 22 to Sept. 22) Organize routines better so that they work more efficiently in the future. Confer with associates and come to a fine meeting of minds.

LIBRA (Sept. 23 to Oct. 22) You now understand better how to handle important monetary affairs and make progress. If you have any doubts, consult with an expert.

SCORPIO (Oct. 23 to Nov. 21) You are capable of getting whatever you want most, so go after such now. Be charming with those you love and admire.

SAGITTARIUS (Nov. 22 to Dec. 21) Take time to be alone and plan the future with greater clarity and intellect. Meet with an adviser and be well guided.

CAPRICORN (Dec. 22 to Jan. 20) Get in touch with clever friends and gain their advice, support for your aims. Enjoy socializing together later. Pay bills on time.

AQUARIUS (Jan. 21 to Feb. 19) Make good use of today by handling personal and business matters efficiently. Use standard, othodox methods.

PISCES (Feb. 20 to Mar. 20) You get many brilliant ideas now and should make notes of them. Plan a trip for some good purpose. Take no risks where health or reputation is concerned.

The Midland Reporter-Telegram

PERMORAMA EDITION,

PAGE 1AA

Ready to welcome theater-goers for an entertaining evening is Theatre Midland, the ultra-modern new \$2 million home of Midland Community Theater at 2000 W. Wadley Ave. The community theater enjoyed 20 years of spectacular growth and accomplishment in its former home, Theatre Centre near Dennis the Menace Park. The theater organization and its backers expect more phenominal growth now that the magnificent new quarters have been opened. The first 1979 performance will be a traditional season-opening musical—"The Music Man."

33-year-old theater expands in new home

By ROGER SOUTHALL R-T Staff Writer

Midland Community Theatre, now 33 years "young" has embarked on a new era of influence and accomplishment.

The organization, long regarded as one of the outstanding community theater enterprises in the nation—and the world—just seven months ago moved into its splendid new 45,000quare-foot home, Theatre Midland. Now, it is zooming straight up with myriad programs and projects aimed at benefitting the citizens of Midland, the county and a wide surrounding sector of the Permian Basin.

Following 20 years of spectacular growth and accomplishment at its former home, Theatre Centre, MCT backers and boosters are firm in their conviction that "you ain't seen nothin" yet," now that the theater has expanded into its spacious, ultra-modern new quarters at 2000 W. Wadley Ave.

Arlene Edgar, now in his second term as president of the MCT board of governors, recently challenged the MCT membership and the board with sets of one-year and five-year goals.

Within this current year, Edgar challenged the theater membership and leaders to: Complete the funding on the new \$2 million building; continue expanding the theater program with Midland College; increase the theater membership count and income by at least 15 percent, and purchase a site and construct a new warehouse on the north edge of the city, while at the same time disposing of theater properties elsewhere in the city.

Edgar's goals for the next five years include: Increasing the MCT endowment fund to \$100,000; doubling the theater membership and theater income (annual increase of 15 percent compounded); establishing a touring ensemble to perform in West Texas schools, and continuing the excellence of MCT's theater arts program, thus completely utilizing the new theater facilities.

Midland Community Theatre certainly reached a milestone when in mid-1978 it completed and then occupied its new structure in north Midland.

Then, this past October, it reached another milestone, of sorts, when it mounted its 200th major stage production, "Stalag 17." (That venerable comedy had been MCT's 50th major production when it was first produced here in 1953.)

The theater, which operates on a calendar-year basis, will open its 1979 season very shortly with its traditional musical.

This year's musical production is to be Meredith Wilson's popular and melodic "The Music Man," which had its first staging at MCT in the early 1990s. Also scheduled for presentation during the 1979 season at Theatre Midland are "Heaven Can Wait," a comedy-fantasy by Harry Segall; a drama, "Crown Matrimonial," by Royce Ryton; an adaptation of Volpone's witty comedy, "The Sly Fox," and another of British playwright Alan Ayckbourne's wacky farce commedies, aptly titled "Bedroom Farce." The season also will offer "The Prisoner of Second Avenue," by Neil Simon.

In addition, 1979 will offer several special productions (not on the regular season lineup) to be staged in Theatre Midland's smaller, more intimate performing area, Theatre II. These productions will include new and untried stage works, classic dramas and "experimental" theater pieces.

And, not least, MCT's Pickwick Players, a performing company of young people, will stage spring and fall productions, in addition to its traditional summer entertainment series of three plays for children.

During its 32 past seasons, MCT's stage offerings have run the gamut from light and frothy commedies, such as "You Can't Take It With You," "Light Up the Sky," and "Room Service," to such blockbuster dramas as "Death of A Salesman," "Inherit the Wind," "Annie of the Thousand Days" and "The Caine Mutiny Court Martial."

To this date, the most popular and best-attended production of them all at MCT was "Sound of Music," which opened the 1967 season at the theater. Other notable musicals done here in past seasons include "Oklahoma!" (two productions), "My Fair Lady," "Damn Yankees," "How to Succeed in Business Without Really Trying," "Oliver," "Camelot," "Anything Goes," "South Pacific," "Hello, Dolly!," "Annie Get Your Gun," "Carnival," "1976" and "Promises, Promises."

Among the dramas and comedies staged at MCT which are particularly well-remembered are "Aunt Mamie," "The Odd Couple," "Barefoot in the Park," "The Night Thoreau Spent in Jail," "Butterflies Are Free," "God's Favorite," "The Andersonville Trial," "A Man For All Seasons," "Julius Caesar," "Shield Head," "Last Meeting of the Knights of the White Magnolia," "A Shot in the Dark," "No Time for Sergeants," "Arsenic and Old Lace," "Cyrano de Bergerac," "The Little Foxes," "Taming of the Shrew" and "The Miser."

A few other stage works have had two separate productions here through the years, among them "Harvey," "The Man Who Came to Dinner," "My Three Angels" and "The Fantasticks."

In the years since it was organized in the spring of 1946, Midland Community Theatre, a non-profit organization, has grown from a membership of 250 to more than 4,800 in 1978, with an annual budget now in excess of \$300,000.

Art Cole, who has been at the helm of MCT since it was organized by him and a group of interested Midland citizens, now is the executive director of the organization. Rick Schiller came to MCT in mid-1977 as managing director.

Other members of the theater staff include John Michael Warburton, technical director; Deborah Waddell, director of children's theater; Bebe Fisher, secretary; Cherry Jones, choreographer; Mary Lou Swindell, costume shop; Willie Swindell, custodian and Mick Epley, building engineer. These are the "pros," the fulltime employees, but there are literally

dozens of other Midlanders who give freely of their time and talents in such areas as costuming, set construction, scenery painting, prop gathering, publicity and mailing.

Joining Arlen Edgar on the current MCT board of governors are J. M. Fullinwider as vice president for business; James Salners as vice president for production; Mrs. Robert M. Mann, secretary-treasurer, and Mrs. Jim Conine, Mrs. William U. Summer, Mrs. James P. Boldrick, William F. Ortloff, Larry J. Bell, William C. Morrow, Lynn D. Durham Jr., and Mrs. Charles M. Younger.

ACT IX, the women's volunteer service auxiliary organized in 1969, currently is headed by Diana Younger as president; Aimee Sheeham, vice president; Karen Beal, secretary, and Janice Thomas, treasurer.

Ham Hocks, an organization of backstage workers at MCT, has Susie Hitchcock as its current president, Sandrea Wright as vice president, Rhonda Hicks as secretary and Bill Cook as treasurer.

The MCT Production Board has been headed this past year by Jim Salners, with the following members: Brenda Hughes, secretary; Suzy Boldrick, Lee Harley, Joanne Dinsmoor and Rhonda Durham, play selection committee; Sally Mogford, talent; Gloria Lambert, casting; Bill Schneider, construction; Mae Dawson, costumes; Becky Freeman, graphics; Dottie Fox, painting; Joe Hathaway, Prompter; Newt Page, projections; Anne Semple, properties; Marilynn Philpy, soft scenery; Linda Bond and Beck Baskin, publicity; Rusty Collins, lights; Jesse Grimes, sound; Randy Hicks, stage and crews and Ron Hughes, stage managers.

The MCT Services Board has been headed by J. M. Fullinwider as chairman, with the following members; Janice Henry, mailing; Susie Hitchcock, library chairman; Lucille Boykin, librarian; Cheba Bianchi, library assistant, Tricia Boyd, scrapbook; Carol Mann, finance; Jane Kester and Ruth Cole, box office; Marty Conine, membership; Florence Whealdon, newcomers; Susy Boldrick, youth activities; Ann Newman, gallery exhibits; Mary Lou Swindell, costume shop.

The Pickwick Players performing group is headed by Karen Holmes, president, and Mark Andrade, vice president. Scott Morris is secretary, and board members are Kelly Patterson, Anne Peterson, Karen Price and Lura Wolf.

The theater also has an area advisory board made up of theater-minded area residents. These people represent MCT in their respective communities. Members include Mr. and Mrs. Bayford Sealy of Andrews, Mr.

Mac Southall, 14, of Lamesa, watches his father, C. M. Southall, right, swab out his gun bore after firing at the Midland Shooters' Association Range. The association boasts of separate shooting facili-

ties for its shotgunners and its riflemen and its pistol shooters. The Midland organization hosted the National Varmint and Sporter Rifle Championships last year.

Adobe is publicly-owned company

Adobe Oil & Gas Corp., a publicly owned company, is engaged in the exploration and development of oil and gas, coal operations, refining, and gas processing plants.

The company is listed on the American Stock Exchange, and, with its predecessors, has been in operation since 1960 when the first Adobe company was organized.

The company maintains in excess of 1.2 million net acres of exploratory leases onshore U.S.; operates approximately 700 oil and gas wells and participates in approximately the same number of wells operated by others.

Adobe owns majority interest in two natural gas processing plants and one 8,000-barrel-oil-per-day refinery located in West Texas. The company commenced uranium

exploration in 1975 in Wyoming and has more recently acquired a \$35 million strip coal mining operation in northwest Pennsylvania.

Foreign interests include a 7.5 percent interest in a gas discovery in the Dutch North Sea and an 8 percent interest in an oil and gas discovery in the Persian Gulf.

Adobe's 1979 oil and gas drilling budget is expected to be expanded over its 1978 budget of \$22 million for exploration and \$10 million for oil and gas development.

Joe Pevehouse organized the first Adobe company in 1960. He serves as the president and chief executive officer of the parent organization, Adobe Oil & Gas Corp. Pevehouse is a 1948 geology graduate of Texas Tech University.

For the next five years, Adobe expects to continue expanding its domestic oil and gas exploration. It will continue to expand uranium and coal operations to become a total energy company as oil and gas reserves become more difficult and expensive to find.

Major growth for Adobe is foreseen during the next five years, with the additional capital provided by higher prices received for oil, gas, uranium and coal. A continuing increase is expected in the price of oil and gas

caused by both demand and inflation. The company employs 180 persons

and the annual payroll is \$4,500,000.

Shooters have fine facilities By JIM STEINBERG

R-T News Staff

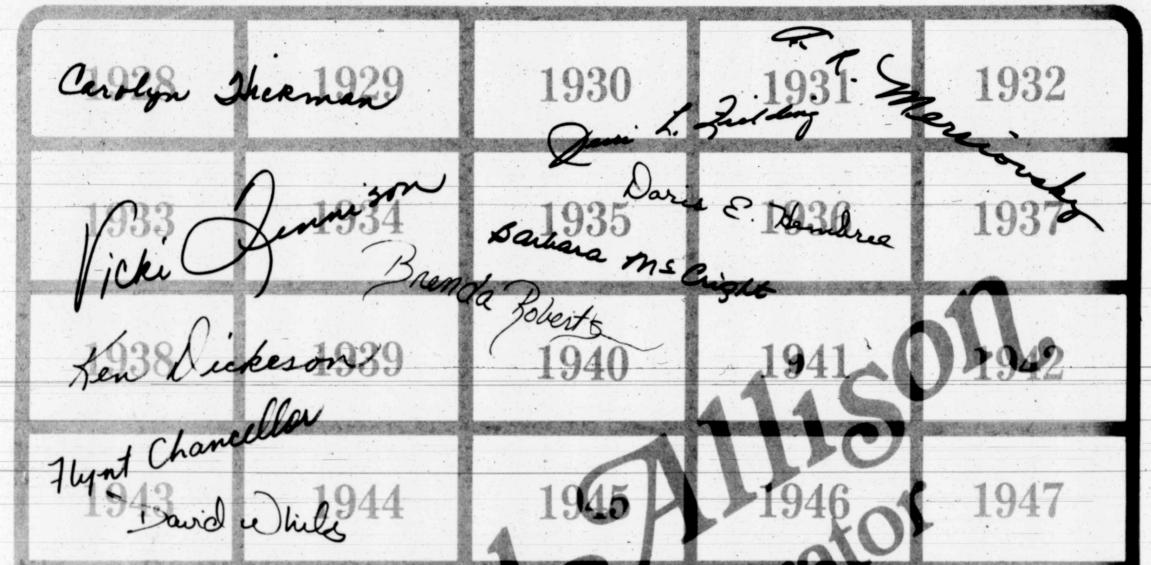

PAGE 2AA

Midland takes to guns in a big way so it shouldn't be surprising to learn that the Tall City boasts some of the finest shooting facilities in the country.

The Midland Shooters' Association has grown from a one-bench, oneskeet house operation on U.S. 80 West to now occupy separate shooting facilities for its shotgunners and its rifle and pistol shooters.

The trap and skeet range is located on Holiday Hill Road north of the Andrews Highway, while those with rifledbarreled guns have plenty of shooting room at a site located on FM 1213. And would you believe they have enough benches to accommodate 50 bench rest shooters? No wonder the MSA range was selected to

No wonder the MSA range was selected to host the National Varmint and Sporter Rifle Championship sponsored by the National Bench

Rest Shooting Association this summer.

And it was not the first time the renowned range has played host to national competiton. Midland was host city to the 'Nationals' in both 1963 and 1970.

Of the shooting experience in Midland, gun author Warren Page writes in The Accurate Rifle, "I distinctly recall shooting in Midland, Texas in enough winds so that my vertical cross hairs had to be off left of the target paper by six inches in order to punch holes, only occasionally visible through the mirage...The wind may blow hard at Fassett, Pennsylvania, for example, but if it does the mirage shimmer has long gone."

Although the club has about 750 members, more are always welcome. Membership fees are \$33 for the first year and \$15 per year thereafter.

The MSA offers competitive inter-club shooting for rifle and shotgun shooters. Additionally, the club offers non-members pre-hunting season rifle 'sight-in' days and shotgun practice sessions.

Midland shooters are quick to assert their rights as Americans to "keep and bear arms."

Notes founding MSA member Bob Maberry, "Every country where guns have been forbidden, has been taken over by tryanny."

The club is run by four directors, representing the four shooting classifications of the membership. They are Bill Dawkins, skeet; Charles David, pistol; Howard Scott, rifle and Joe Daskevich, trap.

Al Sisk is the club's secretary and Ray Peacock is the club's treasurer.

and infla-

80 persons

4,500,000.

Men of varied backgrounds, representing many professions and pursuits in life, make up the Permian chapter, Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America, Inc. that's S.P.E.B.S.Q.S.A. for short!

The Midland-based chapter, which for the last 16 years has drawn its membership from Midland, Stanton, Odessa and numerous other communities in the Permian Basin, is one of approximately 700 local and regional chapters of the organization throughout the nation and elsewhere. With more than 30,000 active members, S.P.E.B.S.Q.S.A. is now the largest organized all-male singing fraternity in the world.

Vocal barbership harmony originated in America during the closing years of the 19th Century. It is a true, native form of amateur music stemming not from professional music makers but from the American people themselves.

In by-gone days, the local barbershop was a community gathering place, for fellowship, for swapping news of the day and for "getting away from it all." In this all-male environment, men began to sing together in four-part harmony. During World War I and afterward, this kind of singing gradually began dying out. Hence, the founders and early supporters of the S.P.E.B.S.Q.S.A. performed a real, and an indispensable, service in revitalizing interest in barbershop harmony

The S.P.E.B.S.Q.S.A. dates from the spring of 1938 in Tulsa, Okla., when O.C. Cash and Rupert I. Hall set up an organization known as the "Society for the Preservation and **Propagation of Barber Shop Quartet** Singing in the United States." The word "propagation" soon was changed to "encouragement" and "United States" became "America." During the first year of its existence, the organization functioned on an informal basis. Soon, chapters were organized in St. Louis, Kansas City and Oklahoma City, and barbershop singing was well launched.

The first national quartet contest was held in Tulsa in 1939, with 23 quartets taking part. The first midwinter meeting, or convention, was held in 1940. The organization has been "on the go" and "on the grow" ever since.

True barbershop harmony is always sung without accompaniment. The only instrument used is the pitchpipe to establish the key tone. The lead singer sings the melody, the tenor singer is above the melody and the baritone and bass singers of the quartet fill in the chord below the lead. Only rarely does one of the parts besides the lead carry the melody; when one of them does, it is only for a short time. A particular chord called the "dominant seventh" is frequently used in barbershop harmony and produces much of the effect referred to as "close harmony." In addition, "swipes" (progressive chords extending the ends of phrases) and "tags" (a coda or final fling at the harmony) are characteristic. Time, tempo and rhythm are quite informal and are varied at will to produce an individual expression of the quartet's (or the chorus director's) own musical feelings. Members of the S.P.E.B.S.Q.S.A. have a sense of responsibillity to benefit others through the use of their music in community service and charitable endeavors. For many years, the international Society and all its chapters have actively supported the National Insti-tute of Logopedics. The institute, headquartered at Wichita, Kan., treats speech defects of children. The Society's motto is, therefore, "We Sing That They Shall Speak.'

For Midland's Permian chapter, organized in 1962, financial support of the Institute of Logopedics has come from the chapter's 13 annual "Parades of Harmony" which have featured the chapter's "Sun Country Gentlemen" chorus as well as its barbershop quartet. The chapter has not presented a Parade of Harmony since its Bicentennial show in 1976, but the organization is hoping to stage another harmony show in the near future.

In addition to the Institute of Logopedics, the local chapter gives financial support to the Mental Health-Mental Retardation Center here. In addition to revenues derived from its musical shows in past years, the chapter's funds come from membership dues and from contributions from interested supporters in the city and area.

The Permian chapter of the S.P.E.B.S.Q.S.A. is a unit of the Society's Southwestern District, with other chapters in the district being located at Lubbock, El Paso, Abilene, Austin, New Braunfels, San Antonio, Houston, Galveston, Corpus Christi, Harlingen, Arlington, Dallas, Fort Worth, Nacogdoches, Sherman and Longview, in addition to chapters in several Louisiana, Arkansas and Oklahoma cities.

Current officers of the Permian chapter include Verne Odiorne, president; Leo Mitchell, administrative vice president; Stan Eubanks, program vice president; Dr. Allan M. Fisher, secretary and Bill Southerland, treasurer. Thane Akins is musical director of the chapter.

The chapter holds meetings each Thursday night during the fall-winter-spring months in the offices of Dr. Allan Fisher at 1111 W. Wall Ave., in Midland. The organization invites all interested men in the city and in nearby cities to attend a meeting and sample the chapter's unique musical fellowship. Formal music training is not required of prospective members - the most important requirement is a desire to sing, chapter leaders said. Additional information on the chapter and its programs and activities may be obtained by telephoning Odiorne at 697-4090, Mitchell at 694-0549, or Akins at 684-6564.

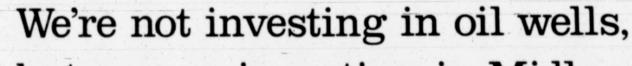

Trying out that "good close harmony" are a group of members of the Permian Chapter,

Society for the Preservation and Encouragement of Barber Shop Quartet Singing in .

America, Inc. Going over music with the men is Vern Odiorne, president of the chapter.

Headquarters near Midand

Diamond Oil Well Drilling Co. (DOWDCO), a manufacturing and service company, has headquarters in the Permian Basin area at 126 County Road West, between Midland and Odessa.

The company, owned by Bill Price and Alton Goodrich, manufactures and sells diamond bits and maintains a regular coring and pressure coring service.

The firm has been in business since 1948 and has 52 employees with an annual payroll of \$600,000.

The company has the only pressure coring service in the world which takes cores and brings them to the surface with bottom hole pressure. This is a fast expanding business based in the Midland area.

DOWDCO is gearing for foreign sales in diamond bits after serving the domestic market since 1948.

Firm provides

compressors

I-R Compression Services, headquartered in Tulsa, Okla., maintains a facility in Midland at 1403 W. Industrial Ave.

A division of Ingersoll-Rand Co., I-R- Compression Services provides air and/or gas compressors, complete with their servicing, on a rental basis. They are provided complete with personnel to operate and maintain them as well as with all required repair parts.

The company operates throughout the world, but most activity is in the United States, Canada, Europe, North-Africa and the Middle East.

I-R Compression Services was originated in 1963. Its parent company, Ingersall-Rand, was founded in 1863.

The compression firm has more than 300 employees, while Ingersall-Rand employs 40,000 people. Company officials report that con-

tract compression, as a service to the oil, process and manufacturing industries, is a concept that is gaining rapid acceptance and growing at a 30 percent annual rate.

Customers receive from I-RCS a guarantee of compression availability on a monthly basis. They pay only for the gas (air) that is compressed and read through the flowmeter.

Additional equipment and people will be added to the company's rental program in expanded geographic areas. New sizes and types of equipment will be available in the company's compression services. In 1979, smaller horsepower units, larger horsepower units, electric drive units, trailer mounted units and offshore units will be added.

The company believes West Texas is a particularly attractive area for contract compression services. Oil companies are under ever-increasing pressures to maximize hydrocarbon production and to replace depleting production with an expanded exploration-drilling program. These requirements are draining operator's capital and people resources so they must conserve what they have for what they do best-explore for, drill and produce hydrocarbons-and leave the other periphery requirements of their business, such as compression, to other experts like I-RCS who do that best.

Robert J. Miesen is the general manager of I-R Compression Services.

ADOBE OIL & GAS CORPORATION

1100 Western United Life Bldg., Midland

Bicknell heads region for Western Company

Ted J. Bicknell is the Southwest Region manager in Midland for The Western Co. of North America. He also serves the company as region. vice president.

The company, with corporate headquarters in Fort Worth, has its Southwest Region office here in Suite 205. One Marienfeld Place.

The publicly held company, listed on the New York Stock Exchange, offers various well services, including stimulation and cementing work.

The company provides stimulation services through eight districts in the Southwest Region-Rankin, Odessa, Kermit, Snyder, Eldorado, Seagraves, Breckenridge, and Hobbs, N.

The Western Company originated in Seagraves in 1939 and now employs 370 persons in the Southwest Region. The companywide employment total is 2,000.

The annual payroll for the Southwest Region is approximately \$6,500,-

For many years, Western has sponsored Junior Achievement activities and for the last five years has sponsored a Little League baseball team. Since early 1977, Western has enjoyed a 56 percent increase in assets and a 50 percent increase in revenue. The most recent expansions include opening stimulation services in the Fort Worth Basin area, and the addition of a district office at Breckenridge, plus subdistricts at Mineral Wells, Abilene and Wichita Falls.

The company will add cementing services in mid-1979 at districts at Odessa and Hobbs, N. M.

Western has offered cementing services since 1961 in South Texas and Gulf Coast areas of Texas and Louisiana, and plans to offer the same high

Ted J. Bicknell

quality services to the Permian Basin in 1979.

In addition to the Southwest Region, the company operates a Southern Region, with headquarters in New Orleans, La.; a Mid-Continent Region, with headquarters in Oklahoma City; the Gulf Coast Region, with headquarters in Houston, and the Rocky Mountain Region, with headquarters in Denver, Colo.

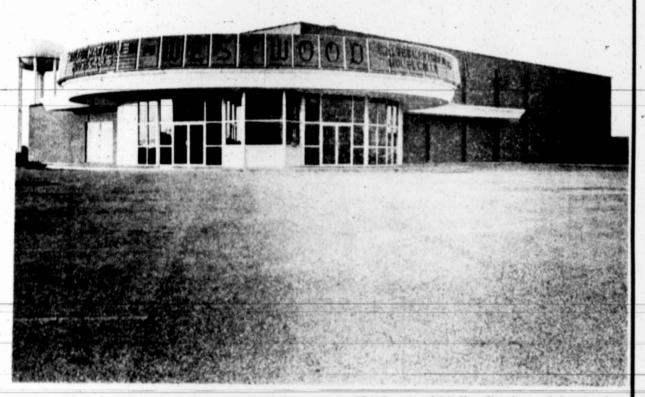

The Western Company was founded in the Permian Basin almost 40 years ago, and has expanded far beyond its beginnings, now serving an area from the Rocky Mountains to Louisiana. The company has always believed that the Permian Basin offers a good business environment, and intends to continue to expand its activities here.

A HORSEMAN ONES JAMES CAAN

Cinema 1 is the only theater now operat ing in the downtown area of Midland. Until recent years, there were three such facilities in downtown Midland. Cinema 1 is in the

200 block of North Main Street. The Ritz Theater operated across the street, and the Yucca Theater, a lavish movie house, was in the 200 block of North Colorado Street.

The Westwood Cinema is located at 4310 Andrews Highway. It is one of four inside picture shows in Midland and has but one screen. It is immediately west of the Chief, one of Midland's three drive in the aters. The other two are the Texan on West U. S. 80, and the Fiesta on the Big Spring Street near the north edge of the city.

The Howard Hodge Theater in the Village has changed its name to Howard Hodge Cinema 2. The former one-screen movie house now has a pair of screens as the

double billing on the marquee indicates. This theater was the first to be built outside the downtown area of the Tall City. (Staff Photo by Mike Kardos)

Midland's newest movie house is UA Cine' 4 located on West Cuthbert Street near the Town and Country Shopping Center. This facility features four screens, each offering its own feature daily. This theater is the first in Midland to feature more than one screen. The graded area in the foreground is a developing shopping area.

Dance organization

reaching maturity

Permian Civic Ballet is fast reaching maturity as a performing arts organization in Midland.

The dance organization has rounded out its first 10 years in existence and now is well into its second decade, carrying with it justifiable optimism for its future and renewed dedication to its basic goals.

The Permian Civic Ballet Association, the "parent" organization, was founded in 1967 under the guidance of Robert Mann, then conductor and musical director of the Midland-Odessa Symphony and Chorale.

The first performance by the association's Permian Civic Ballet troupe did not come about until April of 1969, however. That was when "Pandora," an original ballet written by Mann, had performances in Midland and Odessa with the full symphony orchestra in support. For a number of years following, the ballet troupe gave winter and spring programs annually in the two cities - until Odessa withdrew from participation in the dance organization and the Permian Civic Ballet became Midland-based and largely Midland-supported.

Guest choreographers who have. assisted in directing and training dancers of the Permian troupe for productions have included George Zoritch of Hollywood, a former star of the Ballet Russe; Pittman Corry, director of the Southern Ballet of Atlanta; Mme. Nathalie Krassovska of Dallas, a former leading dancer with the London Festival Ballet and Ballet Russe; Nikita Talin, also of Dallas, a noted choreographer-teacher and former dancer; Enid Holm of Odessa, then director of Odessa's Permian Playhouse and now producer-director of The Mansion dinner theater; Cherry Jones, choreograher an8d dance instructor for Midland Community Theatre; and Bill Martin-Viscount of Fort Worth, director of Southwest Ballet Center in that city and widely-known free-lance danc-

Martin-Viscount, who was first hired by Permian Civic Balle8t in early 1972, staged the first "Spring Gala" ballet performance that year. In September of 1972, Martin-Viscount was signed as Permian Civic's artistic advisor and artist-in-residence on a part-time basis. That Christmas season, he staged the com-plete "Nutcracker" ballet for Midland and Odessa audiences. This represented another first for the association and its dance company -the first complete classical ballet work attempted. Permian Civic Ballet has presented Christmas and spring dance concerts each year since, offering performances of works from its repertoire which now includes such famous works as "The Nutcracker," "Graduation Ball," "Les Patineurs," "Swan Lake" (Act II), "Les Sylphides" (also sometimes

h- called "Chopiniana"), "Giselle" ts (Acts I and II) and "La Favorita," among others.

When Permian Civic Ballet Association came into being in the late 1960s, it listed the following basic objectives:

-To present ballet programs of i. highest possible quality to the pub-

-To elevate the art of the performing company dancer to the highest degree possible.

-To provide young dancers living in the Permian Basin with the same opportunities in dance as are available in the metropolitan areas of the state and nation.

-To stimulate interest in, and support of, ballet.

-To solicit and raise funds to further these objectives.

The association sponsors weekend workshops regularly during the season under direction of Martin-Viscount, artistic director, in order to build and improve the dancers' technical abilities. The association's classical productions are presented twice yearly, in winter and spring, to provide dancers with actual performing experience — and, it might be noted, to provide local audiences with "live" ballet.

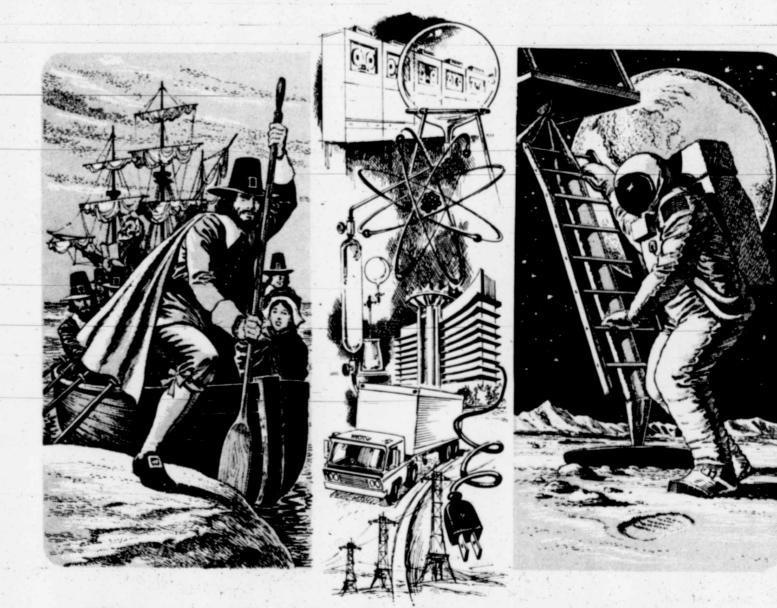

The association also enters into joint educational-arts projects with the Midland Independent School District to provide special ballet performances for entire grades of school students, as well as lecture-demonstrations for special class units. And a special two-week summer workshop is sponsored after the close of the season each year, to which all eligible dancers in the Permian Basin are invited to participate.

Guiding the destinies of Permian Civic Ballet Association and its ballet company are officers and directors of the association.

President of Permian Civic Ballet Association for the 1978-79 season is Gordon Marcum II, who succeeded Barry Beck in the post. Other officers include Jim Shelton, first vice president; Patrick Lipscomb, second vice president; Tom Bruner, third vice president; Mrs. Joseph I. O'Neill III, secretary, and Dave Edwards, treasurer.

Directors of the association include all the above, plus Ronald Bumpus, Chic Murphy, Mrs. Wes Perry, Don Huxman, Mrs. Lyle Eberly, Mrs. Thomas Hohstadt, May Taylor, Mrs. Smith Ray, Mrs. Watson LaForce Jr., Dr. James McGee, Mrs. H.A. deCompiegne, Mrs. William E. Gau and Mrs. L. C. Slape.

A "good right arm" to Permian-Civic Ballet Association is the Permian Civic Ballet Guild, which was organized in late 1970 with Mrs. James Mashburn as first president.

mond and members of the Wednesday Club. The museum was relo-County Library base-

trucking business with his brother-in-law, Bryan Estes," Mann Rankin said. He said that his father moved back to Midland about 1926 and began

working as an independent in the oil business. "In about a year, he gained some oil interests in Wilbarger County and

a little later in the East. Texas field. Shortly after this, he gained some production in Winkler County," Rankin said.

Mann said business was good until the 1929 crash, which took all the oil production away. As a true independent, Porter Rankin began drilling wildcat wells, and about 1931 drilled a well near Rankin (named after the Rankin family) which was 4,006 feet deep, the deepest well drilled by an independent without company help at that time

'The well had a small' amount of oil in the San Andres, but was not commercial." Rankin

DUR STATE'S STRENGT

Reviewing the record of our community is reason for considerable pride. Yesterday's ideas and goals are today's visible achievements. Potential that has been realized is indeed true progress.

Rankin Oil Co. is justifiably proud of their 30 years of service to the oil industry of our area...we are proud to be a member of the team that is working to create an even greater community for all our citizens.

Tomorrow can be a wonderful new era...for our growing area...we promise to do our very best to keep our community the best in Texas...to serve in our way another 30 years, and even longer.

hibits here provide an insight into the history of this vast land and are keyed to theme "Prelude. to Oil: "Historical Prospectives on the Permian Basin." Much of the history is portrayed in orginal paintings by Tom Lovell, Frank Gervasi, William Brigl, Hugh Cabot, Warner Hoople and Robert Summers. Lovell's titled works include: "Cabez de Vaca," the early Spanish explorer; "Salt Bearers at Lake San Juan Cor-dona," depicting saltladen Indians; "Trading at Pecos Pueblo," illustrating Plains Indians at market; "Comanche Moon;" Coronado's Expedition"; "Horsehead Crossing of the Pecos River" (1850); "Camels in Texas"; "Free Lunch on the Slaughter Ranch," showing geologists dining with ranchers; "Trade at Mid-night," portraying landman George Abell trying to reach a leasing agreement with a settler; "Capt. John Pope," and "Bride's Home at a Wildcat Well.'

Gervasi's works include "Santa Rita" No. 1, which, in 1923 at Texon in Reagan County, became the first major well in Permian Basin; "Ira G. Yates No. 1-A.' which, in the late 1920s, become one of the world's major oil producers; "Wink, Texas," an oil boom town of 1928 and "Skelly-Amerada University No. 1-A," a productive well, which caught fire in 1930, in the Penwell Field.

Exhibits in the West Wing include Indian, Espana and Anglo artifacts.

Among the lot are Indian arrows and grinding stones, Spanish armor and weapons, and Anglogringo tools, such as branding irons, axes, hammers, six-shooters, rifles, ranching and farming implements, and oil field tools. This

ars in nu-

rojects.

According to Wayne Kohout, director of parks and recreation deparment, this is the basic philosophy behind the city department.

The city tries not to duplicate programs or services being provided through private and civic clubs and organizations, he explained.

We try to coordinate our efforts through the other organizations in town to see if we can fulfill a deficiency. You have to keep in mind that most agencies offer programs on a membership basis." He added that the city department has to meet the needs of the general public and this includes residents who can not afford memberships into those organizations.

The department also works with the school sytem "to utilize land and to get the maximum benefit from it. It is beneficial to the taxpayer if we use part of the school area for a play-

"We need a source of money to do all this," he said. "We hope to meet all our capital improvement needs with money available in the budget.

The department also will be applying for state and federal monies to help it realize some of its plans.

Kohout said he feels that the taxpayer already has paid this money into the government and it should be used for what the city needs. "We will be applying for grants as applicable

One idea for Midland developing in Kohout's mind is a jogging and exercise trail. It would include a measured jogging track of any type surface in a nicely landscaped area. It could include as many as 18 exercise stations where the participant can warm up, build up their muscles or slow down after jogging. It would apply to all age groups and all body sizes, Kohout said.

"This (jogging track) is a concept that first started in Switzerland and went to Canada before coming to the Carnett, head of the recreation division

Her division has added and expanded programs to the point that new facilities would be needed to add anything more, she said. "We are operating at peak load."

Tennis has skyrocketed in popularity in the past few years, and courses have been added during the winter months. But even these are full, and there is a waiting list for more sessions, she said.

The city offers few crafts programs because other organizations in the city, such as Midland College, fulfill that need.

Ms. Carnett would like to see the department eventually have an indoor pool to allow for swimming classes year-round.

A new recreation facility was proposed in a bond issue which failed in 1977, and Ms. Carnett said the facility would have been more efficient than the current building at 300 Baldwin Street.

She said Midland could have afforded this facility, considering the rapid pace at which the city is growing. "Recreation is becoming more important to the people," she said. We introduce things to people at a low cost, and we open up new skills for them to master.

Programs during the summer offered by her department include swimming lessons, golf lessons, tennis lessons, baton twirling, dance and supervised play at school play-

grounds.

Winter programs include classes for pre-school children, a ladies swimming class, a keep-fit class, tennis, mens and women's volleyball, men's basketball league, a football league, model aircraft class, boy's flag football, soccer and dog ob edience course.

The senior citizens' center at 1301 W. Louisiana Ave. and 700 W. Scharbauer are sponsored by the city.

The city has five outdoor swimming pools which are open only during the summer months. These are Alamo, Ulmer, Halff, Washington and Hogan.

A Showmobile owned by the parks division is available to any group that wants to use it, according to George

Logan, superintendent of parks.

"Basically, this is a stage on wheels," he said. "It can go anywhere and be set up anywhere.3 Uses include the Septemberfest,

Pops in the Park and a Shriner parade.

It's highest use comes during the summer and other warm weather days, he said. If the event is sponsored by the city, there is no charge for using the Showmobile. A charge is assessed to a group requesting it for non-city sponsored activities.

Logan said the department prefers to be notified about 30 days in advance of the time it is needed. "It is easier for us to set it up on schedule," he said. "We get more use out of the parks with this."

The Parks and Recreation Department requests individuals to voice their opinion as to what things should be provided to make Midland a better community from the standpoint of recreational activities. & inne

ground," Kohout said. He explained that by working with the schools, the city does not have to purchase quite as much land for a playground if it can be located next to the school's play area.

Schools and organizations are not the only groups asked for advice on programs, he said. The department also requests individuals voice their opinion as to what things should be provided "to make Midland a better community from the standpoint of recreational activities. Parks are a part of the civic beauty.

Kohout has been director of the department for less than a year, but he was superintendent of parks before the promotion.

The parks department in the city has changed within the past few years, he said. With internal growth, the department has reached a point where parks can be adequately maintained.

Along with that internal growth is coming plans for future changes. One . recent change is the addition of a golf course superintendent. Rex Worrell, golf pro at Hogan Park Golf Course has filled that spot, Kohout said.

"He will act as the division head. Worrell can better understand the needs of the golf course," Kohout added.

The department now is trying to address itself to the growth of Midland and the needs of newly developing areas of the city to provide park and recreational facilities as these

United States," Kohout said. They often are seen associated with parks or university campuses.

Another plan is to renovate all playground areas, he said. "But we need support from civic organizations in the form of money and manpower." Kohout also is looking at another

zoo for Midland, but this time it will be a small petting zoo. It probably would be located in Cole Park and would be open mainly during the summer. To give school children a chance to visit, the zoo also might open in the late spring and close in the early fall.

Instead of exotic animals which the previous zoo had, Kohout is proposing the more domestic type such as cows and chickens. The city could purchase them in the spring, and the animals could be sold in the fall when the zoo closed.

The setting would be a rustic barn that would not require a lot of money to build, he said. "This is a pet project of mine," he said, "but we will need support from the community."

The Parks and Recreation Department only is about 6 percent of the entire city's budget, he said. The department employs about 45 persons on a permanent basis. During the summer, the parks division has about 10; the golf course, two, and the recreation division, 80.

The additional personnel in the summer are needed to operate the swimming pools and added recrea-

Santa Rita Club helps with volunteer work

When the Permian Basin Petroleum Museum, Library and Hall of Fame was about to open, the Santa Rita Club was organized to assist the museum through volunteer work, club president Nell Blackman said.

"The purpose of this non-profit organization shall be to assist and to promote the petroleum industry of the Permian Basin.

"This is to be accompanied through volunteer efforts of its members in support of the Permian Basin Museum, Library and Hall of Fame," reads Article II of the bylaws of the Santa Rita club.

According to Mrs. Blackman, credit for turning the idea into reality belongs to Mrs. Charles Cole.

She worked with museum officials to see the club hold its first election of officers in July 1975.

Founding members felt the club should named after the oil well that made the Permian Basin one of the richest producing oilfields in the United States

Santa Rita No. 1 blew in May 28, 1923, 15 miles west of Big Spring.

In keeping with that feeling, the club's fiscal year is set to coincide with the anniversary and the annual meeting is held at that time.

There were 28 charter members for Mrs. Conrad Reaves to serve as president for in that first year of the club. Mrs. Blackman said that the club

now has more than 150 members. Other club officers are; Mrs. John Rhea, vice-president; Mrs. Scott

Hickman, secretary and Mrs. Richard Powers, treasurer. Mrs. David Miller is general day chairman, coordinating the work of the specific day chairmen, who are Mrs. Don Wambaugh, Tuesdays;

Mrs. Leonard White, Wednesdays; Mrs. Donald Troy, Thursdays; Mrs. J. C. Bradshaw, Fridays; Mrs. Conrad Reaves, Saturdays and Mrs.

W. J. Grissitt, Sundays. Membership includes active and patron members and is open to anyone wishing to do volunteer work at the museum.

Duties include "manning the store," serving the admissions desk, hostessing in "Boom Town," or conducting tours to the many schools and private groups that visit the museum each year.

As of August 1,232 volunteers had contributed 18,357 hours, of which 16 members have worked every month since the museum was opened.

Midland-based Coquina operates in many areas

Coquina Oil Corp., a company which originated in Midland eight years ago, now is a wholly-owned subsidiary of St. Joe Minerals Corp.

Coquina's headquarters are in Midland at 400 N. Marienfeld St. St. Joe is headquartered in New York.

The Midland oil and gas producing and exploration concern employs 109 persons, eight more than at this time last year.

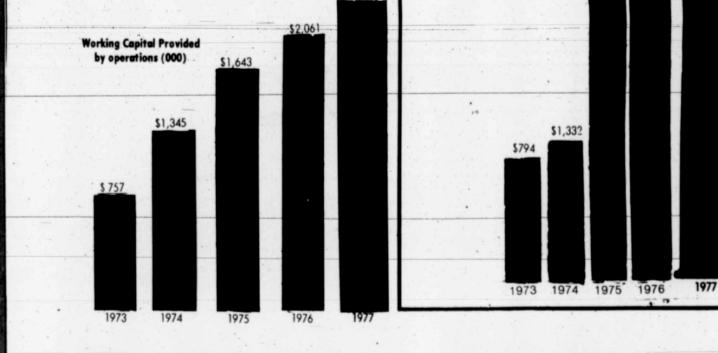

Ì

The company conducts oil and gas operations in Texas, New Mexico, Colorado, Oklahoma, Mississippi, the Rocky Mountain area and other areas.

Coquina has division offices in Dallas, Oklahoma City, Denver, Colo.; and Jackson, Miss. The area served by the Midland-based firm includes Texas, Oklahoma, New Mexico, Wyoming, Kansas, Mississippi, Colorado and other states.

Coquina actively supports the Little League program by sponsoring two teams. The company also is a member of the West Texas Chamber of Commerce, the Midland Chamber of Commerce, supports the Lions Club, United Way, Jaycees as well as other activities, including all local high school activities.

Coquina has expanded its new building at 410 N. Marienfeld St. and its offices in Oklahoma City and Denver. The office in Jackson, Mss., was established in 1977.

OUR HOME OFFICE..... MIDLAND, TEXAS

MGF Oil Corporation is an aggressive independent natural gas and crude oil explorer and producer. These graphs depict our growth during the last five years of our corporate history. Today, MGF is dedicated to building its reserves of proven natural gas and crude oil. Proven reserves are amassed through our own exploration program and through acquisition by purchase or merger of producing and prospective nonproducing properties.

Currently, MGF owns varying interests in over 200 producing oil and gas wells located in Texas, New Mexico and Oklahoma. Sixteen drilling rigs operating in Texas and New Mexico, and Louisiana and substantial proven and non-producing acreage.

MGF Oil Corporation has approximately 2000 shareholders residing in all parts of the United States and several foreign countries, and employs over 525 persons.

28 Years Growing With Midland Country!

We are happy to belong to a region that has contributed so much to the dramatic story of the growing west...The changes that have taken place...in the name of progress...have been startling to say the least. We are pleased to take our place in providing the order to all these remarkable deeds and achievements.

Midland Senior Services director Marion Fisher, right, confers with office assistant Virginia Jones on income tax form preparation, one of the many services provided by the office for senior citizens. The organization provides a handy-

man serice through a volunteer who Mrs. Fisher describes as a capable ex-Marine. (Staff Photo by Mike Kardos)

Organization assists senior citizens

By SUSAN RUTHERFORD R-T Lifestyle Writer

All Midlanders over the age of 55 should know Marion Fisher.

Mrs. Fisher makes it her business to keep up with all agencies, services and individuals who have something to offer the senior citizen. She is the director of Senior Services of Midland, an Outreach office of the First Christian Church located in the church building at 1301 W. Louisiana Ave. There she and Virginia Jones, a senior citizen on the Senior Texans Employment Program (STEP), combine efforts with a team of 27 volunteers.

They say they are always looking for more volunteer help.

The senior citizen designation is lowered to age 55 to include some widows who need her services, Mrs. Fishersays. She is herself a widow, who learned the art of social work from her husband's twelve years with the United Way — five of those years he was executive director of the United Way in Midland.

Many in Midland know Mrs. Fisher from her days as director of the Senior Citizens Center, also located at First Christian Church.

"I've seen what it can do," she says, and her job now is to extend the services offered by the center without duplicating what the center or other. Midland social services have to offer.

The director has initiated several surveys of older Midland residents to identify their needs and she then puts the information to work.

Currently these are the offerings of the Midland Senior Services: Income Tax and Medicare Forms Preparation Service is provided by trained volunteersto help get the elderly through the legal red tape. Handyman Service is being provided by a volunteer who Mrs. Fisher describes as a capable ex-Marine. His job is helping older people fix things in their homes and Senior Services keeps an appointment list for him to work from.

A nominal fee is charged for his transportation costs and the actual costs of the materials. "If he can't do it himself, he'll try

to find someone else who can," says the director.

Telephone Reassurance is a service begun by the Midland Junior League and taken up by Senior Services. Each of the older people on the telephone list, at present this includes 25 senior citizens, receives a telephone call once a day five days a week and often also on weekends. These are "check-up" calls.

If something is wrong and the telephone is not answered when it should be or if the person answers and is in trouble, anemergency plan goes into effect with the police department. The 20 volunteer callers check with Senior Services each day. Information Directory is a direct-

ory published in connection with Mid-

land College. An effort is made to update it annually, says Mrs. Fisher. It's full of information the senior citizen could need on who to call in Midland.

The directory includes a listing of the organizations and programs available to the older resident and then lists needs of the senior citizen and who to call for help.

Dental Screening Clinic is a program tested this past summer in connection with the Junior League, Casa de Amigos' Road Runner Bus Service, Midland Memorial Hospital, Senior Services and six volunteer dentists,

Thirty-nine senior citizens were taken to the clinic to find what kinds of dental care is generally needed. It's hoped that this will be continued year round, says Mrs. Fisher, on a once a month basis.

Podiatric Clinic is in the initiating stages.

Windmill Handcraft Guild is a

group of senior citizens who make handcrafted articles and who wish to sell them to the public. Chairman of the guild is Florence Little and treasurer is Ruth Carden.

Three sales are held a year and any senior citizen having something to sell may register with the Senior Services. It is not a group which meets to make handcrafted objects together, but rather is a way for individuals who like to make things to earn extra money.

Hillcrest Information Service is a service offered at Hillcrest Manor, 700 W. Scharbauer Ave., a residence for senior citizens and handicapped people.

Mrs. Fisher keeps them updated on what's new in town for senior citizens and visits with their resident council about once a month to keep them informed. Also Senior Services maintains a rack of printed material at Hillcrest with information applying to older people.

Summer Services Program is done with teens from Manpower, a Department of Health, Education and Welfare program, where teens visit with senior citizens five days a week providing help around the house.

Agency Update is an event in its fourth year, and is a gathering of agencies and groups occuring in the fall. It is an opportunity for these services to share with others what they are providing the senior citizen. Agency Showcase takes place in May, Senior Citizens Month, when the Windmill Guild has its spring fair in Dellwood Mall.

There agencies set up exhibits to inform people about themselves. On top of this, Mrs. Fisher attends City Council meetings when something comes up on transportation, utility rates or other items pertaining to senior citizens.

"This way I know what's happening and I can speak in behalf of older people."

MS also is a

said.

But today, something is wrong. You can't hold your tennis racquet. There is no strength in your grip.

You may be a victim of multiple sclerosis. What is multiple scle-

rosis? It's the "crippler of young adults." It's the disease that sponsors the nationwide Read-A-Thon. It's a neurological disease of the central nervous system - the brain and spinal cord.

MS usually occurs in persons 20 to 40 years of age. It occurs "when they are in their childbearing, home-building said Hazel years, Lewis, executive director of the Permian Basin Chapter, National Multiple Sclerosis Society.

"It affects the most productive years.'

The number and type of symptoms, the order in which they appear and the intensity with which they affect the MS sufferer vary — "perhaps more in MS than in any other medical disorder,' the Society says.

Most often, numbness or a tingling sensation in an arm or leg, or a sudden visual problem is the victim's first sign that something is wrong.

At other times, National Society literature explains, vertigo, speech difficulties or paralysis of some part of the body signals the onset of the disease

In the course of the disorder, the chemical sheath covering the body's nerve cells and spinal cord (called myelin) disintegrates and is replaced by scar tissue or plaque. This is how

ing passage of or slow- ject to seizures. ing and altering a signal This social stigma and from the brain to some apparent lack of public part of the body.

The petroleum industry is a vital part of our nation's heritage and will play an even more vital role in the future. In addition to the great effect a healthy oil industry has on the nation's well being, a larger share of the conveniences we now enjoy is the result of petroleum pioneering. We are proud to be a part of that great industry and take this opportunty to salute our co-workers and particularly the members of the Permian Basin Petroleum Pioneers.

MIDLAND A GREAT COMMUNITY

Community

is sharing both in work and in wealth

Community

is people working together for common goals with the freedom to fulfill personal ones.

We think Midland is a great community. We are proud to join in this salute to the progress of our city and the Oil Industry.

neglected, homeless and pre-delinquent" boys in West Texas. The ranch is a private, non-profit operation organized three decades ago.

Midland center called journey rest station

By MARK VOGLER R-T Staff Writer

The Pastoral Counseling Center of Midland has been described by its staff as a rest station or regrouping point in the journey through life.

A broken marriage, the loss of a loved one, a deep sense of guilt, a down-in-the-dumps attitude about life or a feeling that nothing matters anymore or nobody cares are some of the people problems that the center deals with to help those in need go on their way again.

"People come to us because they are bored, hurting or in pain. We counsel about 500 persons a year,' said Dr. Ray Bristol, executive director of the center.

Like an automobile, the human being breaks down sometimes and has to go to a garage for repair, he said of the center's function in the community

"Everybody has a need to stop at some point along the way so they can make the journey the rest of the way.

The center is staffed by ordained clergy who are intensively trained in counseling and are carefully supervised, according to Dr. Bristol. It was the seventh such center founded in Texas when it began operation in January 1974.

Individual counseling, marriage counseling, family therapy and group counseling are among the services

Seminars, workshops and special classes are also offered by the center to help clients cope with everyday

Dr. Ray Bristol

A fee is charged each client depending on family and personal circumstances. It varies at the rate of \$5 to \$50 per hour. But even those who cannot afford to pay for the service will be given help.

The center receives its support from concerned individuals, churches, businesses, foundations and fees. All gifts to the center are tax-deductable since it is a non-profit corporation.

Dr. Bristol said people often use the center instead of going to a psychologist. Marriage and family crisis issues are the common problems clients seek help on.

"People may come to us because they cannot afford help from a psychologist. But there are some basic differences between pastoral counseling and counseling, he said.

'The medical model (psychologists) deals with the past where we deal with the present. The medical model deals with patients where we deal with people. The medical model is more passive. The pastoral model s more actively involved with the person.

"The medical model is diagnosing where we deal with relationships. The medical model is usually on a long term basis where the pastoral model is more shorf term. The medical model is based on behavioral science while we draw from whatever resource that works."

As the center enters its sixth year, it looks back on counseling services administered to about 2,000 persons, from age 10 to 80, according to Dr. Bristol.

"We deal with a lot of young people,

PAGE 3BB

About 36 churches in the Midland-Odessa area support the center which is open Monday through Friday, from 9 a.m. to 7 p.m.

The 1979 board of directors include the Rev. Bailey Stone, pastor of the First Baptist Church of Odessa; the Rev. William Henrick, pastor of the Trinity Presbyterian Church of Midland; Father James Considine, pastor of St. Nicholas Episcopal Church of Midland; the Rev. Don Hungerford, pastor of St. John's Episcopal Church of Odessa; Audrey Gill of Midland; Dubb Duff of Odessa; David Fitzgerald of Midland; Glenn Brown of Odessa and Mike Harrison of Pecos.

Dr. Bristol retired as a hospital chaplain with 24 years of service in the U.S. Army Reserves. He served as the senior minister of Midland's First Christian Church from 1968 to 1975.

Assisting Bristol at the center is the Rev. John T. Winham, who is certified as a member of the American Association of Pastoral Counselors and as a clinical member of the American Association of Marriage and Family Counselors.

Directory published

As a public service, the Junior League of Midland, has published its 17th edition of the Directory of Community Services.

The agencies and organizations included in the community services directory cooperated in its compilation

In publishing the book, the Junior League of Midland said it passes no judgement on the standards of operation of the agencies and organizations listed-inclusion does not signify endorsement, nor does omission indicate disapproval, an Junior League official said.

The director is for the use of staff members of listed agencies, for board members, volunteer workers, churches, schools, law enforcement agencies and civic groups-laymen and professional-in making referrals and in expanding their knowledge of the community's various resources in the fields of health, welfare, recreation and education

SAN ANGELO - The West Texas Boys Ranch runs on faith in the morrow, trust in people and hope for those it serves

"We're kind of like a church," said H.D. "Dave" Gottshall, executive director of ranch for Oliver-Twist type boys. "We operate on faith." The 963-acre ranch, 17 miles west of

here, has been a temporary home for more than 800 boys in its 31 years of existence. Sixty-two of that number were from Midland County.

The Ranch depends on free-will contributions to fund its \$550,000 annual operation of guiding and building toward manhood the approximately 72 boys on the campus at any one time.

"Our kids are classified as dependent, neglected, homeless and what we call 'pre-delinquent'" when they first come here, Gottshall said.

...Our program is one of prevention.

The average stay for boys, who can be admitted here as young as 7 and as old as 14, is two to three years, Gottshall said.

They can stay here until they finish high school." The youth are bused into school either at San Angelo or Christoval, which are about equal distant from the Ranch. Boys from small towns or the country general fit in better in school at the Christoval community. City-raised boys generally attend school at San Angelo.

By policy, the Ranch "stresses strong academics and encourages them (the boys) to improve their grades." The Ranch has a tutoring system.

'Most of them come (to the Ranch) with bads grades, and that is symptomatic of their problems," Gottshall said.

This place that develops into a home for boys is fronted by Spring Creek. And on "the spread" are 200 acres under cultivation in hay and grain crops. "We raise all of our own beef that we eat here," Gottshall said.

The Boys Ranch is a private, nonprofit" operation, which was organized more than three decades ago to serve the disadvantaged and potentially wayward boys of West Texas.

The staff is made up of 32, including a consulting psychologist, house parents, and case workers. Physicians and dentists donate their services to the boys.

The Ranch's beginning was spear-

WESTERN

Pacesetters

headed in 1947 by the San Angelo Optismist Club and is maintained by donations from the private sector.

"We're supported entirely by freewill donations and contributions," said Gottshall. "We have no federal aid of any kind We don't want any."

The Ranch is supported by 18,000 "known" donors who are on the thrice-yearly "Rand-hand News" mailing list.

Ranch supporters include Midland and area people

The Mabee Petroleum Co. of Midland has donated \$153,000 for the construction of a field house, an athletic field for football, baseball and track, and two staff dwellings.

The new facilities were dedicated in October 1978. Ranch property also includes three dormitories, a food service center, laundry and clothing units, a combination gymnasium-student center, a library learning center, vocational center, chapel, administration building, and a livestock training center containing barns, holding pens and an arena.

The Ranch is governed by a 22member executive committee and 30 directors

offered at the center.

Rev. John T. Winham

The Western Company And The Permian Basin

Pacesetters...

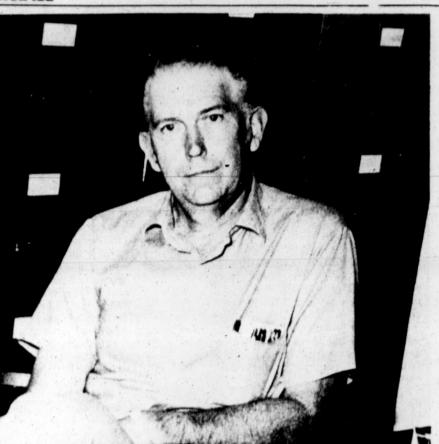

Over the years, The Western Company of North America has become the pacesetter of the service companies to the oil industry. To become pacesetters, it takes innovation, ability and determination. Innovation to solve the difficult problems and to forsee new methods to solve the problems as yet unseen. Ability to apply methods born of innovation is yet another face of pacesetting, and The Western Company has proven ability time and again in places such as the North Slope. The Gulf of Mexico, The North Sea and last but not least, The Permian Basin. The Permian Basin, it's people and industries, have demonstrated the qualities of pacesetters also and The Western Company of North America is proud to join in this tribute to their progress.

Charlie Green, Midland County's agricultural extension agent since 1949, works closely with the Midland County Livestock Association. For more than 25 years, the association annually has hosted shows for the youngsters to present the cattle, swin, sheep and goats they have raised and horses they have trained.

Resources department aids low income people

By Linda Hill **R-T Staff Writer**

The state of Texas assists some categories of persons with little or no income through the Department of Human Resources, formerly the De-partment of Public Welfare.

There is no "general assistance" program in Texas, according to program director Molly Whittington, but the department does administer financial aid to families with dependent children and for the aged, blind or disabled.

There are a variety of other serdepartment ces provided by generally to those who qualify for one of the financial assistance programs.

treatment. A similar program provides dental checkups and treatment

SAX31

The Medical Special Services program provides eye glasses, hearing aids and dentures for Medicaid recipi-

ents. Another medical service is the vendor drug program, according to Ms. Whittington. That program provides up to three prescriptions a month free

to Medicaid recipients. Transportation often is a problem for low-income families. The department provides transportation for Medicaid recipients to non-emergencontract with the Midland Community Action Agen-

working on the farm.

County agent works closely with association

The Midland County Livestock Association was organized more than 25 years ago to give youth an opportunity to show the products of their labors on the farm and ranch and, mostcommonly, in 4-H Club and Future Farmers of America projects.

Though the association was set up in 1953, livestock raised and groomed by the boys and girls were being shown some years earlier through sponsorship of the Midland Chamber of Commerce, recalled Charlie Green, who has been the Midland County agricultural extension agent since 1949. He works closely with the

association. One of the early and present-day supporters of the show is farmer R.D. Jones Jr. Back around 1950, he started out as chairman of the 'fat barrel'' (swine) exhibition and in the early 1970s, he was president of the association.

"One of the biggest joys in his life is working with the children" and youth interested in livestock, said Jones's wife.

Dig, Inc.,

employs 22

Directional Investment Guidance, Inc. (Dig, Inc.), a three-yearold Midland firm, now has 22 employees engaged in directional drilling and surveying. The company is locat-

ed at 3919 W. Wall St., and is owned by Glen Harbert, president; Joe Thompson, vice president; Jerry Holt, secretary-treasurer; Glen Cothrun, second vice president, and Loyd Jones, second vice president.

The company serves the Permian Basin, Mid-**Continent** and **Rocky** Mountain areas.

Since its inception in Midland in December 1975, Dig, Inc., has expanded to Oklahoma City, Denver, Colo., and Casper, Wyo. Plans are to open offices on the Gulf Coast of Louisiana and Texas this year. The owners are firm believers, that West Texas is a very good area to do business, with a good climate, knowledgeable people, availability of equipment and manufacturing, good local governing bodies and top flight communications. Dig, Inc.'s annual payroll is \$950,000.

economics.

Supplemental Security Income is a federal program which provides funds to persons who are over 65, blind or disabled and who do not qualify for Social Security payments. That program replaced the former state program for adult assistance, but it is administered at the state level

Aid for Families with Dependent Children is perhaps the best-known aid program. That plan is in the department's Financial Services Division, administered in Midland by Terry White

AFDC is usually available only to families with one parent, or with two parents if the father is disabled, with dependent children 18 or younger, Ms. Whittington said. The maximum age is 21 if the child is in school.

For families that qualify, the state provides a fixed amount, ranging from \$86 for a parent and one child to \$185 for a parent and five children, to a maximum of \$300, Ms. Whittington said.

Also included in the Financial Services Division is the food stamp program, a federal plan administered by the Department of Human Resources. In Midland, supervisor is by Paula Talbot of Big Spring.

The food stamp program is one of the department handles which are not tied to a financial assistance program. All families which meet income requirements may participate. Ms. Whittington said new guidelines eliminate the requirement for participants to pay money in order to get stamps, although the new plan does not entitle the family to any additional benefit.

Under the old plan, for instance, a family might qualify for \$200 a month in food stamps, but be required to pay \$50 for the stamps. Under the new plan, the family would not have to pay anything, but would get only \$150 worth of stamps, she said.

A second division of the department handles medical services. That division accounts for about 60 percent of the department's budget statewide.

Medicaid is the state program which provides medical insurance to those who qualify for AFDC or Supplemental Security Income, as well as some persons confined to nursing homes.

In Midland, Medicaid eligibility is handled by Lewis Thompson. Once qualified for Medicaid, the recipient also becomes eligible for several other programs, Ms. Whittington said.

Early Periodic Screening, Diagnosing and Treatment is a service which allows any child, up to 21, covered by Medicaid to receive free health screening at least once a year.

In Midland, that program is headed by Landre Doan.

The service is provided under a contract between the Department of Human Resources and the State Health Department, Ms. Whittington said. Any problems that are uncovered are referred to physicians for

A third Department of Human Resources division is the Family Services Division.

Ms. Whittington said services provided by that division are tied closely. with the AFDC program.

Employees in that division provide help families may need in finding clothes, a safe place to live or filling other needs.

Community Care for Aged, Blind and Disabled provides several services to adults, usually those on SSI.

Among those, Ms. Whittington said, is the homemaker program, which is designed to help elderly persons remain as independent as possible. In Midland, the program operates under a contract with Home Help Inc. "Homemakers" go into participants homes and provide help with tasks such as house cleaning.

Meals on Wheels also has a contract with the department, Ms. Whittington said, to provide a hot meal daily to persons unable to prepare food for themselves.

The Social Services Division has responsibility for child protection, she said

Through the Child Welfare Unit, headed by Beverly Acker, services are provided to both families and children. Stopping neglect and abuseare among the major responsibilities of that unit, Ms. Whittington said.

Providing foster care and finding adoptive families for children legally free for adoption also come under the Child Welfare Unit's perview.

Family planning services are provided under contract with Permian Basin Planned Parenthood. Birth control information and prescriptions and medical examinations are provided to persons eligible for Medic-

The Licensing Division of the department, headed by Keith Bailey in Odessa, is the only regulatory division, Ms. Whittington said. That division-handles licensing of daycare. facilities, either private homes or daycare centers. Staff members certify that a facility meets state standards.

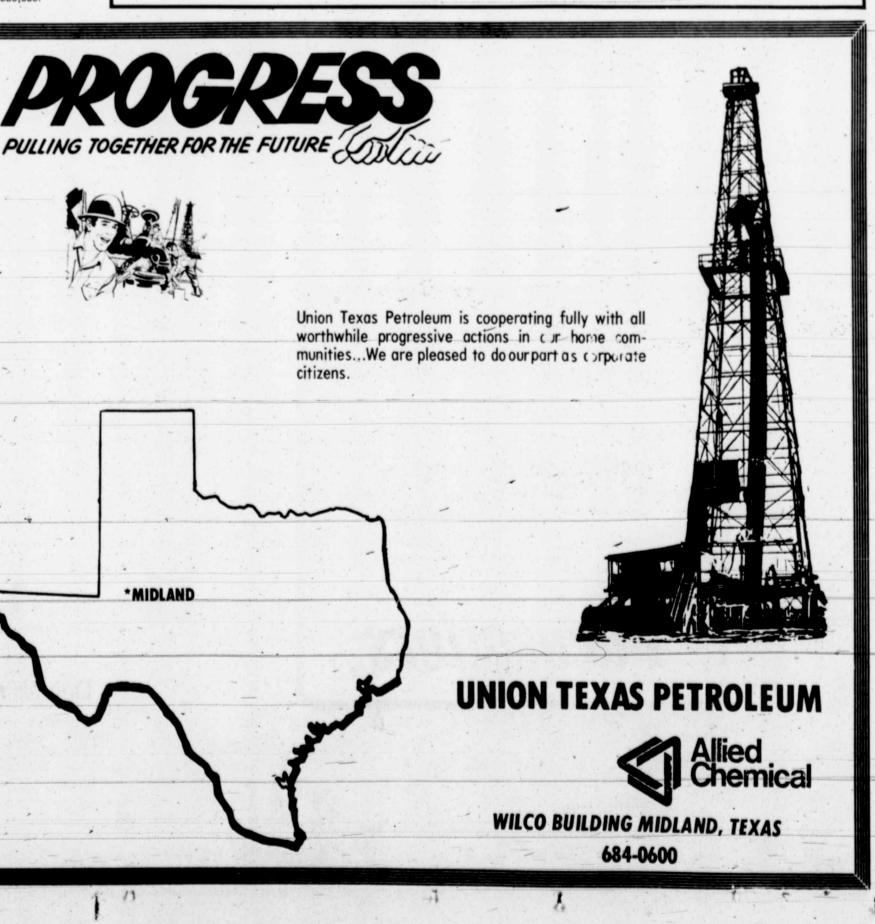

Two other divisions are designed to help the state save money.

The Child Support Division, headed in Midland by attorney Mark Hoover, helps the parent with custody collect from the other parent child support ordered by the court.

Money collected under that program is sent to Austin, where it is used as part of the monthly welfare payment, Ms. Whittington said. But, even though the parent does not get extra money because the child support has been collected, she does not have to cope with irregularity of payment and the responsibility of collecting it.

If the check is for more than the benefit amount, and it starts arriving regularly, the parent is taken off the rolls.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Teen Challenge provides place for users to kick drug habit

Drug abuse is a problem that is here to stay, and that includes Midland.

For men who are 18 years and older, there is a place in Midland where they can go to try to "kick the habit.

Teen Challenge, located at 201 N. C St., is one of 87 centers throughout the United States with a program designed to help men overcome their drug habits, according to the Rev. Chuck Redger, administrator for the Midland facility.

The Midland center was started in October 1971. It is based on the Teen. Challenge program started by David Wilkerson in New York City to help people involved with drug addiction.

The name is a misnomer." Redger said, since the men must be at least 18 years old to join the program. When Wilkerson started it, though, the program was aimed at teen-agers.

Redger has headed the program here since Novemer 1973. He had worked with the New York City program in 1963 and then went to San Francisco for five years. He returned to New York to work with a Christiantype of volunteer program. The Kansas native said he was not prepared for Midland when he came.

"I had the experience of working in huge metropolitan areas where you could find all the work you needed in one block," he said. Redger did not think Midland would have much of a problem with drug abuse, but he said he has found otherwise.

"There is a big problem in Midland with drugs," he said. "A lot of kids are smoking pot and drinking and a lot of them are getting into other stuff (drugs).

While he first encountered many heroin addicts when he first came to Midland, Redger said the drug scene. has switched to "poly-drugs, such as sniffing spray paint or taking LSD." The heroin addicts are easier to work with, he said.

"We jump for joy when we see an old-fashioned heroin addict," he said, adding hastily they don't condone the use of heroin. "It's just that we would rather see them on heroin than on hallucinogenic drugs. At least they still have a brain when they kick the habit." The poly-drugs destroy the brain, he said.

Teen Challenge is a voluntary program and the participants live at the residence on North C Street. "It is a complete rehabilitation program that. lasts a year," he said.

If the participant is on heroin when he arrives at the center, he must go "cold turkey." If he is addicted to barbituates, the man must go through a withdrawal phase at a hospital. Those on poly-drugs don't have withdrawal to face. Redger said.

program: induction, therapy and reentry. Midland is the induction phase.

"We concentrate on four relationships in this phase," Redger said. The first phase is the participant's relationship with God. The Bible is taught in relation to life. "The Bible is a work book that can be made a part of their life. It even shows how to deal with getting bored," Redger said.

Second relationship is that of authority. "This is the stickiest problem. They are rebels at heart," the administrator said. "They must obey certain rules which we found are nec essary here.

Relationships with other people are necessary. "They (drug addicts) are very self-centered and must learn to give and take. This is a home and we try to keep a family atmosphere," he said.

Fourth relationship is with themselves and the future. Many of the addicts have a long string of failures and they are taught to face themselves and look at the future.

"A guy can go to prison 30 years and never face himself." Redger said. "You have to face yourself here. Our goal is to try to bring them (the men) to a place in the induction phase so many of their problems will surface.

After four months in the Midland center, the men are sent for their second phase to a training center in one of three places in the United States - Cape Girardeau, Mo., Riverside, Calif., or Rehrersburg, Pa. The individual remains here eight to 10 months where he receives academic, spiritual and vocational training.

They learn to discipline themselves here," Redger said. The men learn different trades so they can obtain a job in an area they enjoy upon leaving the center.

The third phase is re-entry. Some will go directly into the working field; others return to the first center and work with the new individuals. "After going from strict supervision into none, it is like jumping into ice water," Redger said, "Being back at the center helps them to stabalize into living on their own.

The center has about eight men going through the induction phase. Another 10 have been sent to the three training centers.

Staff at the Midland facility should include a dean of men, two day counselors and a night counselor.

Funding to operate the center comes from private donations in the area, Redger-said. There also is a women's auxiliary which helps in various areas.

Working with drug addicts, "is a very taxing job," Redger said "You have to constantly be on guard.

level is still close to the 14-year-old range. "That's why they have so many problems," Redger said.

The counselors often do more than just work with the participants. They also do counseling with others in the community, such as parents who realize their child is using drugs. Or, the parents send their child, who is too young for the program, for counseling

"Sometimes we'll shake up a kid enough to stop it (using drugs)," Redger said.

But, there are times when the situation with the teen on drugs has reached a point where the parents are ready to kick the youth out of the house, according to the pastor. The parents feel guilty about doing it, but Redger said there are times when it must be done

"He (the drug user) is contaminating the other kids in the family," Redger said. "If the kid has refused all help, kicking him out will allow the family to live in peace. It's painful, but sometimes necessary," he admitted

Executive committee of the board of directors includes Cecil G. Robinson, president; Fred Gist, vice president; the Rev. Paul H. Coxe; and Ed Gemmell, secretary-treasurer.

Board members are Harvey Andrews, Guy Brown4, Dr. John N. Bryan, Tom Coleman, Joe Gilmer and Jack Hopper.

Measuring oil not easy

HOUSTON - Oil and gas are retained in rocks, sand and other materials much like water in a sponge.

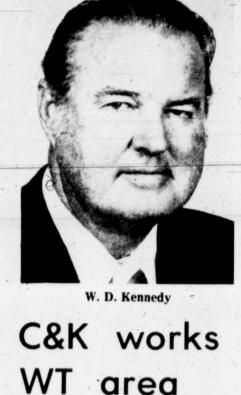

Measuring methods of reserves are sophisticated, but still inexact. The only sure method is to measure

all the oil and gas produced until a field runs dry.

C&K Petroleum, Inc., with headquarters in Houston and offices in Midland, is a highly-successful publicly-owned company engaged in the exploration for and production of oiland gas.

Operations of the company include both offshore and onshore exploration and production.

The company operates in all the principal known producing areas within the United States, with particular emphasis on on the Louisiana Gulf Coast, West Texas and New Mexico, the Mid-continent area and the Rocky Mountains.

The firm is 24 years old, having been organized in 1953 as a partnership. Since 1970, it has been operated as a corporation and currently has 140 employees with an annual payroll of \$2,500,000

C&K became a public company in 1971.

W. D. Kennedy of Midland, executive vice president, points out that a \$1 investment in C&K stock at the time of its initial public offering now is worth \$2.77 for an annual rate of return of 15.5 percent.

Kennedy said the company is benefiting from increasing gas production resulting from placing several offshore Louisiana wells on production.

Boyd firm 8 years old

Foy Boyd Associates, Inc., of Midland is a petroleum engineering consultant concern featuring all services related to drilling, completion, property management and production.

Oragnized eight years ago, the firm's primary areas of operations are the Permian Basin and Rocky **Mountains**

Foy W. Boyd Jr. is the owner of the concern which has headquarters at One Marienfeld Place.

The company, with its 12 employees and 18 associates, sponsors a Junior League baseball team, supports the Midland Cubs, is a member of the Midland Chamber of Commerce and a sustaining member of the Midland Community Theatre.

Anyone associated with the oil and gas endeavors could not be more fortunate. The petroleum business is needed to meet national energy requirements, and the time is now in

Gibraltar once known

said.

as Midland Savings

The savings association known today as Gibraltar was founded in 1921 by a group of nine Houston businessmen led by Israel Friedlander.

W. T. Carter Jr. served as the first president of the savings and loan association, with Friedlander succeeding him in 1928. Friedlander was president of Gibralter until his death in 1944.

One of Friedlander's major accomplishments was helping to write the aw which created the Federal Home Loan Bank. Because of this agency's existance. Gibraltar later became the first savings association in the United States to offer its customers the safety of federally insured savings accounts.

In addition to being the first to offer federally insured savings plans, Gibraltar was the first savings association in Houston to make a home repair loan under Title II of the Federal

Housing Administration. Gibraltar. also made the first GI home loan, as well as the first GI-FHA loan granted in Houston.

Foy Boyd

Midland, Texas, and surrounding

areas. We are proud to be able to

participate and contribute," Boyd

We will continue to provide com-

panies and independents without ade-

quate staffs with engineering-orient-

ed services," he said.

Gibraltar was purchased in 1959 by Imperial Corp. of America of San Diego, Calif. Gibraltar's assets at the time totaled \$136 million and it had only three banceh offices. Just prior to the Texas merger, assets in Houston had-passed the \$1-billion mark. The Gibraltar Savings Association at 103 N. Colorado St. in Midland, was the Midland Savings Association before it was merged into Gibraltar Jan. 1. 1978.

In Midland, the association serves the Permian Basin area withs 30 employees who earn \$250,000 annually. Midland Savings Association was organized in 1934.

Spencer Blocker is the current regional manager of Gibraltar Savings Association in Midland.

Teens Aid Retarted efforts aid Midlanders

Every year, countless retarded citizens in Midland are able to participate in camping trips, the Special Olympics, dances and field trips - largely through the efforts of Teens Aid the Retarded.

Teens, between the ages of 12 and 25, work indivdually with all retarded citizens who want to participate in the activities sponsored by the TARs, said Doug Merz, sole staff member for the organization.

"One of the big things in Midland is the 'Pop Bottle,' which is similar to a youth center where the retarded can go Saturdays and Sundays to play pool, watch TV and just have a chance to socialize with the TARs," he said

"Another of the TARs' biggest activities is a summer camp sponsored by the Midland Association for Retarded Citizens. Usually the TARs end up making up the bulk of the counselors for the camp, which covers a large region including Midland, Odessa and most of the Permian Basin.'

The camp is held one week each summer.

Merz said that the TARs keep a full day of activities scheduled at the camp, including horseback riding, crafts and free time to explore.

TARs is primarily funded through the annual Hike-Bike, which is a national publicity and fund-raising project.

The Hike-Bike is quite popular in Midland, Midland has led Texas for the most money raised for the past six or seven years straight," Merz said. Currently, there are 39 members of Teens Aid the Retarded, but Merz said a membership campaign is underway and that they hope to have 70 to 75 members by April.

'We recruit most heavily into the junior high area. After high school, they become less active because they leave to go to college.

Merz said members must be between 12 and 25.

"That allows you to be a voting member and hold office. After 25 you can become an auxiliary member, one who gives financial support and serves in an advisory capacity to younger members," he said. Dues for TARs are \$2.50, \$1 of which

goes to the state association. The remainder goes to local activities. Current TAR officers are Susy Alexander, president; Susy Kirkpa-

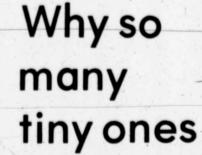

trick, vice president; Debra Synatschk, treasurer, and Athena Deande, secretary. Advisers are George Ann Powers

and John Murphy. General meetings are held monthly

at the Opportunity Center, 2701 N. A

Anyone interested in joining Teens Aid the Retarded should contact Merz at 682-9771.

"This is a good vehicle for those who are interested in related fields; such as psychology, to get some expe-rience in this area," Merz said.

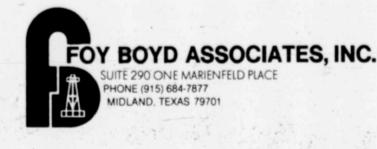

CLEVELAND (AP) - Ask Cleve-land's registrar of vital statistics, Edward A. Fern, to what he attributes the recent boom in babies, and Fern will tell you: "A long, hard winter."

Cleveland was hit by a big blizzard Jan. 26, 1978, and there were two other big snowstorms earlier in that month.

Births recorded at the bureau in September 1978 numbered 1,718, up form 1,472 in September 1977. Fern calls that a "big jump.

For October 1978, the total was 1,572, up from 1,352 in October 1977. Seriously, I think the youn families of today are thinking of having larger families," Fern said. "Recent figures have been showing that trend."

Fern's office records births for Cleveland and 22 suburbs.

Lion' eye bank started in '72

By LANA CUNNINGHAM **R-T Staff Writer**

The sign above the double doors read: "Intensive Care. Absolutely no one admitted.' But through those dou-

ble doors and at the end of a hallway off to the right is a cubbyhole used as the office for Lions Eye Bank Inc. in Midland. The office is housed on the fourth floor of Midland Memorial Hospital.

The program has been going since 1972, but operated out of a home until this office space was uncovered three years ago. Leonard Hanson

worked to get the effort off the ground. It is a Lions Club sponsored project with a majority of the funding coming from that organization. But other donations are accepted.

It is governed by a Lions Board of Directors with representatives. from all sections of the district. Hanson is the executive director.

Purpose of the organization is to obtain donor tissue, or corneas, explained Nan Oestmann, secretary in the office.

The local eye bank handled five pairs of eyes through its office last year. Four pair were sent to other places in Texas where they were needed; the other pair was used here. Sometimes the eyes are used for transplant purposes, Mrs. Oestmann said, and other times they are used for research

The problem in the Midland area is that people do not realize an eye bank exists, Mrs. Oestmann said.

Hot meals assured

SUSAN RUTHERFORD **R-T Lifestyle Writer**

"Home-bound" elderly poor in Midland can be assured of one thing - at is a hot meal five-times a day brought to their homes.

"Meals-on-Wheels," directed by dietician Elizabeth Glenn, serves noon meals five days a week to needy senior citizens. Unfortunately there are many who are in need and remain on a waiting list.

These are people whom the "average" Midlander never sees. Some live alone in shacks on nameless, unpaved streets without any means of getting to a grocery store, even if they had the money. Some live in unkept houses swarming with unclean little children who no doubt share the daily meal. All are appreciative of the program, and formany it means not being "put away" in a nursing home.

A sister program for Meals-on-Wheels is the "Need-a-Meal" program for senior citizens who don't qualify for Meals-on-Wheels for reasons of age or income. These are primarily people recovering from hospital stays and who can afford to pay for their meals.

Between the two programs, approximately 90 hot lunches are delivered on weekdays to senior citizens, who are unable to prepare their own meals for reasons of illness, disability, recent surgery or lack of income.

Volunteer teams of two take the lunches made by the Midland Memorial Hospital kitchen staff to homes on six routes, involving every section of the city except the northwest.

Sponsoring the program is Midland Senior Citizens, Inc., a non-profit organization which gathers funds from the county, the Department of Human Resources, local private contributors, as well as from churchs, businesses and foundations.'

"People go off the Meals-on-Wheels programm when they either die or go to a nursing home," says Mrs. Glenn."Many can now bypass the nursing home, thanks to this program."

What do these people do for food on the weekends? "They tell me they sink and swim and look forward to Monday," says the director, adding that many can save some of the lunch and make an evening meal out of it.

Hospital cooks prepare regular and special diets according to specifications made by Mrs. Glenn and individual's physicians. Special diets include one-for diabetics and for those on reduction, fat-free, low cholesterol, weight reduction and gound and chopped meat diets.

Senior Citizens, Inc. board members for the 1979 year include Jim Fitz Gerald, chairman; Susie Hitchcock, vice chairman; Dr. Gregory Bartha, secretary, and Tom Brumer, treasurer.

Another function of this organization is a mini-bus service, which takes approximately 200 senior citizens each month to the Midland Senior Center, also listed in some directories as Midland Senior Activity Center.

Midland Senior Center, located at First Christian Church at 1301 W. Louisiana Ave., is an activity center operated and financed through the city's Parks and Recreational Department. It provides recreational facilities and programing for Midlanders over the age of 55. Directed by Marge Holland, the facility is open five days a week.

Center activities include art and stichery classes sponsoring sales atvarious times throughout the year at Dellwood Mall,

a catered luncheon every Wednesday under the direction of Mrs. Glenn, a Friday night covered dish held on the second Friday of the month, birthday luncheons held on the last Wednesday of every month, tours, table game facilities, musical entertainment,

AMERICA'S

OIL

NEEDS

Fred Allison holds many firsts

Fred M. Allison, an independent oil and gas operator in Midland, has been engaged in oil industry operations in the Permian Basin since 1947.

His offices are on the 11th floor of the Vaugh Building.

Allison is the owner of Estoril Producing Corp. which has 35 employees. The company has been in the-oil business since 1918.

Primarily an operator in West Texas, New Mexico, Oklahoma and Kansas, Estoril plans to expand into

concern in Midland, G. W. Brock, Inc.

West.

exas

the Rocky Mountains and Texas Gulf Coast area this year. Allison has several outstanding oil industry firsts.

In 1962, he drilled and completed the deepest triple completion in Ector. County, a well that went to a total depth of 11,000 feet and potentialed in three separate formations

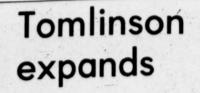

Allison also originated the idea for a pressure maintenance program in the giant Wasson field in Yoakum Countu, and in 1963 becme the first person

to re-inject casinghead gas into the field's producing formation. Allison also installed the first suc-

cessful water flood program in Coleman County

Allison's family has been active in the oil industry since 1918, and he got his start working for his father in the oil fields around Seminole, Okla.

Fred M. Allison Sr. was one of a group of men that developed the rotary drilling rig, and he himself developed and patented the first straight hole guide.

Tomlinson Oil Co. is not a big company, but it rapidly expanded its petroleum reserves, and it's gross revenues experienced a surge in fisca 1978.

In fiscal 1977 (year ends Aug. 31), Tomlinson Oil participated in 30 wells drilled in Kansas and Texas, which resulted in: Three discoveries, two field extensions and 25 dry holes.

In August 1978, Tomlinson announced a significant natural gas discovery in Reeves County. The well, No. 1-A-24 State, opened the Double Eagle (Castile) pool when it was completed for a calculated, absolute open flow potential of 18 million cubic feet of dry gas per day, through perforations from 3,672 to 3,687 feet.

Aug. 31, 1977, net reserves were reported at 1,171,394 barrels of oil, and 972,775,000 cubic feet of natural gas. Related to fiscal 1977 production, these indicated oil reserves had a life of 11.4 years; and of natural gas, 6.8 years.

Thus, Tomlinson has a comfortable position with respect to reserves; and reasonable expectation for enhanced production from its ongoing drilling programs.

On April 1, 1977, Tomlinson acquired all the outstanding capital stock of Pioneer Refining, Inc., owner of a 50 percent interest in a 5,000-barrel-a-day refinery at Nixon, Tex. Tomlinson later acquired an additional 37.5 percent interest in the Pioneer Refinery.

After an expenditure of \$3 million for new equipment, this refinery went on stream in June 1977, supplying a contract to deliver 22 million gallons of jet fuels to the Defense Fuel Supply Center.

April 1, 1978, Pioneer received another contract, this one to furnish 24 million gallons of JP naptha based jet fuel. Acquisition of the refinery doubled Tomlinson's assets, added stability to earning power; and accounted for most of the increasse of \$16.8 million in total company revenues for the nine months ended May 31, 1978. For that nine-months period gross revenues of \$20,719,000 were reported. (twice the total of full fiscal year 1977), and net income of \$599,000 was defined, more than than double the net income of (\$245,000) for fiscal 1977), and equal to 45 cents a share on the common stock.

HOW much of what you own is really yours?

You're familiar with the tax the government levies on your right to make money. It's called income tax, and it to Uncle Sam and your family. you pay it every year. But even though you've paid income tax all your life, part

You cannot deed your entire estate to your family. You will deed Uncle Sam will come first, and your family will come second.

SEC

PAGE 12BB

of what you have left still isn't yours.

You see, the government also levies a tax on your right to keep what you've earned. It's called estate tax. You may not be familiar with it, because you've never died.

You spend a lifetime building your estate. Suppose that much of your estate is tied up in your business. You have plowed your profits back into the business to keep it growing, locking your assets up in cattle, oil and cotton. You owe little or no money at all.

Yet the day you die, you may owe hundreds of thousands even millions — of dollars in estate taxes. Those dollars you've locked up will have to be unlocked. Liquidation may be the only way. You've spent a lifetime building your estate. Uncle Sam will take it apart in one day!

A person must either create enough cash to absorb the tax impact, or the tax impact will absorb the estate. I can create that cash for you. The tool I use is life insurance. I represent New York Life in the Permian Basin.

You can accomplish more with life insurance, with more certainty, than you can with a lifetime of work. For pennies on the dollar, I can help you create instantly the cash you need to keep what you've built. Let me show you how I can pay the taxes for your estate, instead of from your estate. If you're interested in learning more about estate planning and conservation, Call or write: William H. Jowell

Scouts reflect Americans' changing ideas

By LANA CUNNINGHAM **R-T Staff Writer**

As the youth of today change, so do the Boy Scouts of America.

The Buffalo Trail Council, with headquarters in Midland, reflects the changing ideas of Americans and the growth of the organization.

The biggest change in the Chaparral District of the Buffalo Trail Council has been the addition of a Metro Exploring District which covers the explorers' posts in Midland and Odessa. Rob James is the executive over this program.

One of the main changes this past year has the addition to and remodeling of the headquarters at 111 N. D St., according to Gerald Petty, executive director of the Chaparral District.

"The old building had 4,300 square feet added," he said. "This includes a self-service trading post where the scouts can come in and browse around like in a store. They then will pay for the items at the front desk." Before, the scouts always had to ask a secretary to get him or her a

specific item, Petty added.

The addition is the first for the building since the scouts moved their headquarters into it in 1957, he said. The Buffalo Trail Council covers 18 counties; the Chaparral District includes only Midland and Martin counties.

There are about 300 troops in the council with 75 of these in the Chaparral District. They are sponsored by all types of groups including churches, civic clubs, industries and parentteacher associations, according to Petty

Breaking it down even farther, Petty said there are about 9,000 scouts in the council and 2,778 in the district. The district also has about 1,000 adult volunteers who work with the scouts. Funding comes almost entirely from United Way, according to Petty

Scouting is divided into three groups, he said. Cubs are for those 8 to 10 years old. Boy Scouts are 11 to 17 while Explorers are 14 to 20. Each troop, pack and post has its own individual program it follows throughout the year, he-said.

Cubs can receive awards ranging from bobcat, wolfe, bear, webolow and finally arrow of the light. The arrow badge is the only one that can be worn when a Cub goes into the older scouting program.

Cubs can receive their awards dur-

ing the regular monthly meetings. Boy Scouts have their own progress awards, these are scout, tenderfoot, second class, first class, star, life and Eagle. the Eagle is the highest award.

Scouts have a court of honor about every three months in which they receive their badges, Petty said.

Explorers is a coed group and mainly involves high school students. They follow a program which deals with their career interest. For example, Petty said, they have Explorer Posts for law enforcement, medical, computer, banking, high adventure and western heritage. The latter deals with horse care and horseback riding.

There is another group, but a scout must be elected to it, Petty said. This is the Order of the Arrow, an honor camper group.

'They have worked weekends at the scout camp to maintain the camp and get it ready for the summer. Their specialty is Indian lore and Indian dancing. All their ceremonies center around Indian culture," Petty said.

There is one chapter for the Chaparral District, and the director said members come from all chapters.

"It is an honor to be elected to this," Petty said, adding that the members of each individual scout troop elect someone in their troop to the Order of the Arrow. One qualification is that the person must have reached the

П

first class rank. There are about 700 to 800 scouts in this group.

The Buffalo Trail Scout Ranch just south of Toyahvale in the Davis Mountains is the location for many of the scouts' activities, according to Petty

This camp has a dining hall by the name of Buffalo Hall, a swimming pool, riding stables, a refreshment center, cottages for staff members and numerous camping sites.

All troops spend a week there in the summer and work on merit badges. Other events are planned for scouts who are a little hardier than the average person. Some scouts can spend a week on horseback, exploring and camping in the back country.

Or they can take the same trip, but without horses Petty said.

The ranch is open all winter on weekends to troops for camping. "It is filled almost every weekend," the director said. The Midland headquarters handles the scheduling for the troops in the Buffalo Council

There is a one-week winter camp right after Christmas. The scouts do about the same things as during the summer, except they must cook all their meals.

While the ranch is used primarily by troops within the council, Petty, said it is available to any troop in the United States.

Assisting Petty in the scout headquarters is Steve Odom, scout executive over the Buffalo Council, and

aycee-ettes		

Rick Wilkins, assistant scout executive.

Although scouting dates to before the Buffalo Trail Council was organized, the council did not get its beginning until 1927.

Troop 51 was the first Midland unit associated with the council. In 1928, a second troop, No. 53, was organized. The first scoutmaster for Troop 51 when the council was organized was the Rev. Stanley Haver.

When Troop 53 was organized its scoutmaster was the Rev. Thomas D Murphy.

The first executive of the Buffalo Trail Council was F. D. Craft.

In 1929, a third troop, No. 52 was formed. Its first scoutmaster was Malcolm Brenneman.

The 1979 members of the Chaparral District committee include George Eng, district chairman; Dottie Slattery, secretary; Jimmy Stoval, program chairman; C. D. Johnson, membership and relationship chairman; and Ken Osborne, district commissioner.

Oley Hedrick Jr. was the 1978 Buffalo Trails Council president.

Other 1978 officers of the council include the following council vice presidents: Edwin McGruder Jr., Finance; John Crosby Jr., Program and Administration; Mary Bruton, Cub Program; K. D. Van Horn, Scout Program; Harry Clark, Exploring; Homer Stewart and J. Arnold Marshall, vice presidents at large.

The council treasurer is Don Jones, and Ronald Farquhar is the council commissioner.

The 1979 officers will be elected at the annual Buffalo Trail Council banquet and business session Friday at The University of Texas of The Per-mian Basin in Odessa.

Steve Odom is the Buffalo Trail Council scout executive, and Rick Wilkins is the assistant scout executive.

The office staff of the council's headquarters in Midland include Frances Luccous, office manager; Carolyn Edmiston, receptionistthpist; Jean Linville, registrar; Mary Wildes, printer; Dorothy Walker, advancement clerk and Frances Price, booker.

Wayne McBee is director of the council's ranch in the Davis Mountains.

Petty said that the national headquarters of the Boy Scouts of America would be moved from Brunswick, N. J., to Irving sometime in April of this year

High Sky Girls Ranch offers place for its residents to grow, develop

When a young girl is having a difficult time living with parents or relatives and needs an environment to grow and develop in a home-like atmosphere, High Sky Girls Ranch of Midland can fill that need.

In 1963, the Juvenile Probation Department expressed concern that there were no emergency shelter facilities to house young girls.

Mrs. Gerald Nobles donated 100 acres of land four miles northwest of Midland, and the first-cottage was built.

Today, the ranch has a capacity for 27 girls and will expand that to 31 with completion of remodeling work.

David Maley, executive director of the ranch said "for one reason or another they (the girls) could not stay with their families...and that could mean a lot of things."

But, Maley stressed, "we are trying to become a family support system, rather than a family replacement system."

He said the current median length

of stay is about 18 months to two years.

"That median length of stay is decreasing because we are becoming more aware of how important it is to work with the family," he said.

work with the family," he said. He said most of the girls are referred to the ranch by their parents.

"For one reason or another, the girls could not stay with their families...and that could mean a lot of things."

Most others are referred by Department of Human Resources, juvenile probation, foster homes and relatives.

Maley pointed out that better than 90 percent of the girls come from homes with just one parent.

The girls range in age from 6 to 18 years of age.

Each of the three cottages the girls live in is staffed with house parents. The intent is to provide the girls with as normal a home atmosphere as In addition, Maley said, High Sky Girls Ranch works with The University of Texas of the Permian Basin

possible.

counseling program to help the girls solve their problems. Maley tries to see that the girls are given all the help they can get. Also, "one of the services we're trying to

expand is the followup service." High Sky is somewhat unique in that it receives no state or federal monies for operating or service ex-

penses. "About 75 percent" of the ranch's operating budget is raised in the Midland-Odessa area from private groups and individuals.

Maley feels "the need is certainly there for this type of program."

And he added that the number of referrals to the ranch has been on the increase.

When it comes to long-range goals for the ranch, Maley said he hopes that in five to ten years 50 or 60 girls will be able to live at the ranch.

Centers provide relaxation for Midland's school students

Youth Centers provide a place to go and some- school? thing to do for Midland's young people.

The two centers, located next to the high schools they serve, sponsor after-the-game dances during football season and an annual community concert.

Moreover, since they are considered a part of the school campus, the snack bars in the centers serve as alternatives to eating in the school cafeterias.

The centers also are open evenings and weekends for unplanned but adult-supervised recreation.

A \$7 yearly membership fee allows the students to use the facilities, including free ping pong and pool tables and coinoperated foosball and pinball machines. Members also get substantial discounts for the afterthe-game dances. Midland Lee Youth

Legion post named after veteran Sam Burnett

By GUY SULLIVAN R-T Staff Writer

Sam Burnett American Legion Post 574 is named after a World War II Midland veteran who died in an auto accident, according to members.

Officers include Commander James Lister, First Vice-Commander Carlton Price, Second Vice-Commander Howard Moore, Chaplain Homer Griffin, Finance Officer Leonard Johnson and Historian Sterling Young.

Other officers include Sgt.-at-Arms Joel William, Sgt.-at-Arms Robert Lee Shawand Adjutant Young Suggs.

Perhaps the best evidence of what this group is all about comes from a piece of writing done by Sharon Wilson, age 11, who is a junior member of South Houston Unit 490. Her writing, entitled "The American Legion, goes as follows:

"These places are throughout the

They are known as the American Legion

fought the wars

can come to forget scores of pains which they have suffered.

They come here to have good times to drink and be merry.

as the saying goes, yes! They are spread throughout the region, the wonderful American Legion.

The group's source of funds come from selling poppy flowers on Veterans Day, drawings for prizes and other events.

The post's Auxiliary was begun Sept. 21, 1967. This group, composed of women members, is "dedicated to God and country and to the service of disabled veterans and their families," said Callie Mae York, a very active member.

The post and auxiliary activities include Music Month in September which involves poppy sales, Constitution Day activities and a membership

campaign; an annual membership drive each October; Past President's Parley held annually; providing gift shop goods to veterans in area hospitals; December marks Rehabilitation Month in which Christmas Gift Shops are established in hospitals for veterans to "shop" for their families and friends, and January is Legislarion and National Security Month.

February is traditionally Americanism Month; March is Community Service Month in which members take part in community service drives; April is the month members take part in Children, Youth and Foreign Relations Month; May is Poppy Month and on Mothers Day, all Gold Star mothers are honored; June marks Girls State in which junior students are sent to Austin with others from around the state; the post offers junior boys the same opportunity each summer.

July marks Independence Month

and each unit sends delegates to the annual convention.

The auxiliary has won several awards for members8hip campaign. participation which has resulted in more new faces

Mrs. York, who acts as activities director for the auxiliary, said "The auxiliary means serving others. It means helping others. It's a service organization dedicated to aiding the disabled veterans and their families. It's composed of the wives of post members and it involves many meetings and activities.

Auxiliary charter members include Emma J. Ward, Claudia Rosser, Venus Price, Mattie L. Stovall, Jessie L. Stovall, Pauline Griffin, Mozell L. Loftis, Bertha Mae Starks, Lucille Ellis, Nina Jones and Callie Mae York

Sam Burnett American Legion Post No. 574 is named after a veteran of

"My grandfather, Mr. H.W. Batie of Midland, was one of the first black men to settle here. Sam Burnett, my brother, was his grandson. I guess that's why they named the post after him," she said.

PAGE 5CC

"He was fantastic," she recalled of her brother.

Great year upcoming

"I am looking forward to a great 1979," Louise Patterson, owner of Decorate W/Louise, said.

She has been in the decorating business in Midland 15 years, specializing in custom draperies, miniblinds and woven woods, with matching bedspreads.

Patterson is a member of the Opportunity Center auxiliary.

Midland

The Midland Cerebral Palsy Center annually treats 225 to 250 babies, children and young people who are afflicted with disorders caused by brain damage.

James Lister -

Physical, occupational and speech therapy treatments are administered at the center.

The facility is for out-patients who make periodic treatment visits, which may range from thrice or twice weekly, to weekly, or once or twice a month. The intervals between sessions depend on where the patient lives in the 19-county area served by the center at 802 Ventura Drive in Midland. Usually, the closer in the patient lives, the more frequent the visits to the center.

Patients range in age from 5 months to 21 years.

Brain damage leading to the muscular and sometimes neurological disorders called cerebral palsy generally occur at the pre-natal stage, at birth or shortly after birth.

"It's not like muscular dystrophy or multiple sclerosis," said J.P. "Jim" Crawford, the center's director and physical therapist. "You're (generally) born with CP (cerebral palsy). It's

Puff Aycock

Treatment at the center comes in three basic phases:

• Physical Therapy: This entails the uses of braces, crutches, canes, wheelchairs, the parallel bar and "anything that has to do with locomotion" to cause to bring about a "functional pattern." Crawford said.

region,

A place where people who have

not a disease; it's a condition of a brain-damaged person."

Strokes, brain tumors, or injuries such as a fall, may lead to the disorder which, though not curable, can be lessed in severity degree by degree. "Cerebral palsy is never cured," said Crawford. "But you have to live with what you have - to get back into a functional citizen within our society.

The process is tedious and requires patience, determination, love and work on part of the patient and his family.

Those qualities, plus skill, knowledge and care, are required, too, by the therapists, physicians and volunteer workers.

"It takes a whole team-type thing," said Crawford. "One can't 'get it' without the other.

"It's like climbing a hill," he said. "The further you get, the better you are,...the closer you get to the goal.

In addition to the treatments offered the patients, the center also serves as a classroom for orthopedically-handicapped youngsters. The "schooling" helps prepare the student-patients for regular classroom studies in the school system.

The children and young adults come to the center in wheelchairs, on crutches and canes or just walk in. Some are carried. They come in "ever which way," Crawford said.

"In Midland, we take care of any (children) handicapped neurologicalwise," said Crawford.

Therapy at the center helps the handicapped learn muscular control.

"You start with them when they are babies, and you take them to their potential," said Crawford. One goal is to teach the more handicapped "functional control.

In cases, the initial brain damage may result in varying degrees of mental retardation.

Muscular disorders may appear in jerky movements, lack of balance and impeded speech. "There are thousands" of other symptoms, he said.

"Their potential (for improvement) depends on the amount of brain 'involvement' (damage)," Crawford said. "Not all CPs are mentally retarded, but some of them are.

In others, symptoms may be hardly detectible.

'They walk just as good as you or I." he said.

 Occupational Therapy: This in cludes taking care of personal hy giene and other functions considered everyday and normal in the mainstream of society.

• Speech Therapy: This involves basic communications, whether verbal, picture board, motions, gestures, sounds or "some way they can communicate with another per son," said Crawford. "We can't function too well unless we can communicate.

Crawford is the center's physical therapist. Beth Ledbetter is the occupational therapist. Vickie Morris is the speech therapist.

The center began operation in 1956 just for the care of handicapped children" and was located in a building behind Midland Memorial Hospital until 1974, when the center re-located to a new building built by donations from the people of Midland.

The Children's Service League, which sponsors and sustains the center, holds its Beef-eaters' Ball and Fashion Show in alternate years to raise funds to sustain the center's work.

And the more than 50 women in the League are volunteers who give of themselves to help excercise and otherwise train, care for and teach patients in the center's therapy sessions. Parents, families and guardians of the handicapped children are taught how to administer the exercises and other treatment patterns to help the patients "reach their potential" outside the center.

"It's a good organization," Crawford said of the League. "There's not another like it anywhere.

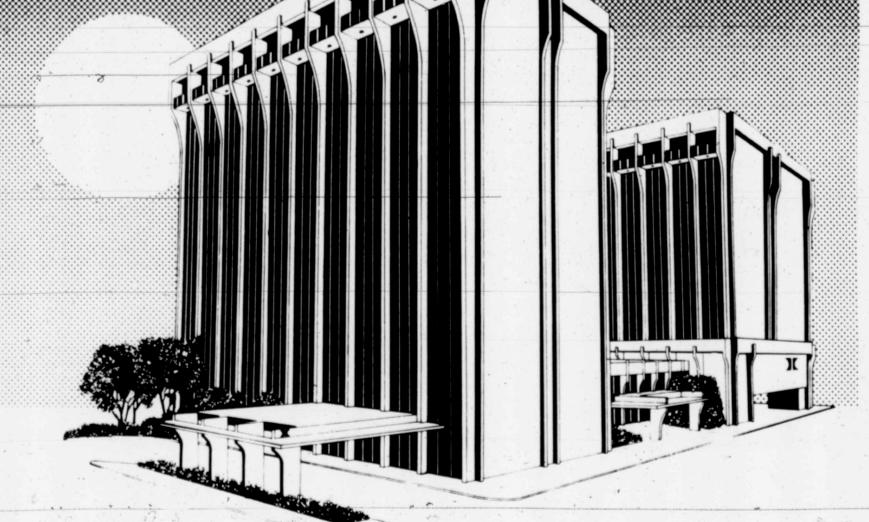

Puff Aycock is chairman of the CP center's seven-member board of directors and is a member of the League

The center's medical director is Dr. Thurston Dean, an orthopedic surgeon. He is assisted by fellow orthopedists Dr. Bill Alexander and Dr. Charles Younger.

The center's pediatrician is Dr. John Foster.

Neuro-surgeon is Dr. William L McGavran.

Dentist is Dr. J.C. Whitaker. The CP board of directors is made up of four women from the League three men at-large from the community

When the new identical tower is added to the Midland Hilton Hotel, it will not only become a landmark in the Permian Basin but it will have increased its capacity for treating people ROYALLY. The Midland Hilton already

can boast that it has the finest facilities for wining and dining, as well as for meeting and greeting, but once the second tower is complete, the Midland Hilton can offer the finest available TWICE as well.

Jaycees conduct community projects including Christmas shopping tour

"It's individual improvement, fellowship, and community involvement. Jaycees is the growth of young men through community involvement and trying to pass some of this along to other people.

That's how Lynn Williams, president of the Midland Jaycees, expressed the meaning of the organiza-

The Midland Jaycees are committed to providing the community with many civic projects which benefit the underprivileged, the elderly, and the youth of the city, said Williams.

Several of the better known activities members are involved in include the Christmas Shopping Tour, Holiday Rest Stop and the Toy Bowl.

For several years the Midland Jaycees, in cooperation with Gibson's Discount Center, have treated between 150 to 200 underprivileged children to a Christmas shopping 'spree." Children, who are selected by Midland Independent School District employees, are picked up. at school by Jaycee-volunteers and taken to the store

EACH CHILD is allotted about \$12 to spend on whatever he or she wishes during a three to four-hour period at Gibson's, after which they are taken to the Boys' Club for a party with cookies, punch and filled stockings. Williams said Jaycees feel there is no better way to show the Christmas spirit than by giving these children a Christmas which would otherwise be impossible.

Members reàlize traffic deaths have taken a steady climb each Labor Day for the last 10 years. In an effort to lessen this death toll, the Midland Jaycees in conjunction with the Texas Jaycees sponsor a "Holiday Rest Stop.'

A spot located about six miles west of Midland on Interstate 20 is set up for weary travelers to stop and enjoy coffee, soft drinks, ice cream, cookies and donuts

The rest stop is manned by Javcees and Jaycee-ettes 24 hours per day

throughout the holiday weekend. Williams said there is no way to accurately measure how many lives the Jaycees have saved each year by doing this. But he said members feel if only one life is spared, it is well worth it.

The Toy Bowl is an event held close to Christmas in conjunction with the Marine Corps "Toys for Tots" campaign and features a flag football game at Memorial Stadium between the Midland Jaycees and the Midland Police Department. Admission to the game is one toy (new or an old one in good condition,) and the rule even. applies to players. This project was begun by the Midland Jaycees two years ago and has now become a statewide effort.

WILLIAMS SAID the Jaycees are solely dependent upon community patronage of their services rather than "donations" or "fund-raising drives

He said the largest money-making

Winners of many awards are the Midland Jaycees. From left front are President Lynn Williams, holding the Blue Chip plaque for outstanding achievement in the community and a state convention participation award, and David Howard, past president, who holds an award for outstanding Jaycee chapter in the city's population division.

From left back are Wayne Greene, who holds the 1977-78 outstanding Texas Javcee award: Fred Koontz, holding the outstanding state director award for 1977-78 and Bill Stovall, holding the awards for outstanding Texas Jaycee district director. (Staff Photo)

project that the Jaycees have is football concessions. Those who've ever attended either a Lee or Midland High School football game at Memorial Stadium on a Friday night, have probably "donated" to the Midland Jaycees.

For every cold drink or box of hot popcorn and for every hamburger or candy bar bought at the concession stands, the largest portion of that money is being used by the Jaycees to run their civic and administrative projects.

Football concessions also require the most members to participate.

Williams said this allows fellowship for those who take part. This project, he said, runs 10 to 12 weeks and usually nets the Jaycees about \$8,000 a season.

Besides these projects, Jaycees also keep an administrative vice president and six directors busy running activities

Personal development programs offered to Jaycee members are designed to train young men in the techniques of goal setting, human relations, self-confidence, leadership dynamics, and public speaking.

PARTICIPANTS ARE given background and training otherwise only available through expensive courses.

Midland Jaycees officers for 1978-79 include President Lynn Williams of the Frame Depot, Administrative Vice President John Walker of Lanier **Business Products, Financial Vice** President David Smith of the First National Bank, Civic Vice President Les Riek of The First National Bank, Secretary Alan Hale of First Savings and Loan, Treasurer Jody Gilles of Lynch, Chappell, Allday & Aldridge, Chaplain Wayne Green of Tamarack Petroleum, State Director Max Emfinger of Lanier Business Products and Past President David Howard of Williams and Associates.

Administrative directors include Paul Cristiani of The First National Bank, Mike Hicks of Pizza Hut, Max Reneau of Do Rite Business Services, Dean Robinson of Main LaFrentz, Charles Walne of Landman and J. D. Webster of Delta Mud & Chemical.

Financial directors are Johnny Cappadonna of Midwest Electric, Chris Dikemen of Office Plant Leasing and Jerry Sullivan of The First National Bank

Civic directors include Brian Bass of Main LaFrentz, Rick Hodges of Terra Resources and Gred Ulvestad of Anease Jewelers

Jaycees of Midland probably have saved countless lives through their annual Labor Day "Holiday Rest Stop," which traditionally is set up six miles west of the Tall City along Interstate 20. (Staff Photo)

When you'd like something more than mud, Delta delivers...

Lots of people sell mud. A select few suppliers give you far more for your mud dollar. One of those, throughout a growing segment of the uil country - and now including the Permian Basin, is Delta Mud and Chemical. Look to Delta when total mud service is important to your operations.

- Advanced mud technology
- Active research and development
- Ample warehousing and liquid-mud storage
- Mud schools open to your personnel
- Qualified field-service representatives
- Sound mud programs

for secretaries.

Mr. President and members of Congress ... Unfortunately, this nation can't run on peanut oil or hot air!

Now is the time for this administration to bring forward an incentive program for energy. Austere conservation measures aren't the whole answer. We need new oil and gas development on the east coast, as well as added drilling and exploration in our old fields to lessen our dependence on uncertain foreign energy supplies. Why should companies and individuals risk enormous sums of their own money to bring the nation new domestic sources of energy, without hope of equitable compensation and only to be called greedy rip-off artists, when they ask for just and reasonable treatment!

FORGING THE FUTURE **FROM LAYERS** Chronicles of civilization relating to our past and future are **OF THE PAST** still being written in the silent, layered history of

the land. Amarex, Inc., through its exploration, drilling and production activities for gas and oil, is dedicated to the continued study of this history recorded in the fossilized footnotes of millenia.

As an explorer and producer of gas and oil, Amarex is helping find solutions to tomorrow's energy needs. With principle drilling activities in the Anadarko Basin of Northwest Oklahoma and the Texas Panhandle, Amarex is now extending its aggressive drilling program to areas in the Mid-Continent and Rocky Mountain regions and Southern Alaska. As an integrated producer of gas and oil, the Company applies the latest technology in its seismic, geological and engineering activities.

A progressive exploration and development company, Amarex is interested in reviewing drilling prospects of merit in promising areas and invites industry participants to submit drilling proposals for consideration, either on a promoted or exchange basis. Prospects should be directed to Mr. Harold J. Reedy, Vice President-Exploration, or Mr. Robert Rich, Land Manager. -

A copy of our latest Annual Report and other information on Amarex may be obtained upon request to Denton 1. Howard, Vice President-Corporate Affairs.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Midland YMCA organized by residents in 1952

By BRUCE PARTAIN R-T News Staff

In 1844, a group of 12 London boys joined together to form a bible study group

They called themselves "The Young Men's Christian Association.' In 1952, another handful of citizens set up a Midland chapter of that oldest of youth organizations - the YMCA.

Today, 10 to 15 percent of all Midlanders belong to one of the four Midland YMCA branches - Central, Park Center, Washington and Alamo.

Although many changes have taken place in YMCA functions, the basic philosophy is still related to the "Body, Mind and Spirit" motto of the world-wide physical-education oriented group.

With over 10,000 members served each year, the Midland "Y" is one of the pace-setters in the country.

18

"No other town of this size in the U.S. has four YMCAs," said J. Durwood Owen, general director of the Midland organization.

"When I go to 'Y' conventions, a lot of people ask me 'How do you do Owen has a two-part answer.

"The key thing is money. The affluency of this town has made it possible," he said.

"But the fact that somebody cared enough — the volunteers, the leaders and the board - and had the vision to see the needs and do something about it is what made it happen," he continued.

Owen, only the third chief executive in Midland "Y" history, expects a budget approaching \$900,000 for 1979.

The funds are divided between the four physical branches and the metropolitan branch, which oversees administrative tasks such as bookkeeping for the YMCA.

Owen's 1979 budget projection has the Central branch receiving \$500,000, the Alamo branch getting \$150,000, the Park Center branch having \$78, 000, the Washington branch receiving \$65,000 and the metropolitan branch getting \$75,000.

The YMCA, a non-profit charitable organization, has taken pride in its efforts towards self-sufficiency

"We've tried to reduce our dependency on the United Way," said Owen.

In 1973, the United Way made up 46 per cent of the YMCA's budget, according to Owen. By 1978, that percentage was down to 26.

"Our goal is to reduce it to 15 per cent," he said.

The YMCA has received over \$150,-000 a year from the United Way for the past five years, and projections indicate a \$195,000 figure in 1979.

At the present time, the Central branch pays its own way through memberships and contributions, with the bulk of the United Way money

branches,

Over 75 per cent of the Park Center branch budget is funded by the United Way.

Owen said the effect of this is to reduce the cost of memberships in those outreaching facilities.

"A youth membership there is only \$5.00 a year and a family membership is \$12.00 a year," he said.

Contrasting those figures are the Central's \$30 youth membership, \$85

adult membership and \$150 family membership. 'We have a great capacity to earn our own way; we don't like to take anymore funds than we have to," said

Owen. Part of the higher cost of the Central branch membership is the available facilities

"The fact that somebody cared enough made the Midland YMCA possible."

Until the construction of the new Alamo building at 901 N. Midland Drive, the Central branch was the only facility offering more than a gymnasium with limited equipment. The Central branch, located at 800 N. Big Spring, still boasts the most complete physical plant

With nearly 60,000 square feet of building space, the 18-year-old structure features a hardwood-floored gymnasium, swimming pool, locker rooms, weight room, racquetball and handball courts, outdoor track and several recreation rooms.

Men's health center and women's health center memberships are available for \$300 per year, allowing members with an inclination towards "spa" type exercise access to their own weight room, sauna and steam baths, massage service and stress testing

In the two health center weight rooms, specialized equipment such as motorized treadmills is supplied.

Health center members also can get stress test analysis and have a separate, carpeted locker room.

All four YMCA branches offer extensive youth sports programs, such as basketball, football and aquatics, in addition to youth and adult fitness programs, day camps and physical skill programs.

Officers of the Central YMCA board of directors are Tevis Herd, chairman; Clarence Scharbauer III, first vice chairman; Eugene Greenwood, second vice chairman; and Frank Kubica, secretary-treasurer.

The newest chapter in Midland's YMCA story is the construction of the 23,000 square feet, \$700,000 Alamo branch building at 901 N. Midland Drive.

The Alamo "Y" operated out of "The Little House on the Prairie" at 3910 Cedar Spring St. for 10 years, using Alamo Junior High and various west side elementary schools for facinue

budget has nearly tripled and membership is pressing 2,000.

Executive Director John McVickar sees the Alamo branch best serving west Midland's needs by offering a family-oriented program.

"The Central branch serves the single adult and businessman well, and that's only right," said McVickar, a

Midland "Y" staffer since 1974. 'We tend to be more family and

youth oriented," he said. The Alamo branch attempts to fill that role by offering classes for family units.

One night each week the west side YMCA holds a "Family Night."

"This is a chance for planned family games and recreation," explained McVickar.

The whole family comes in for a good time together. We even have an inexpensive movie to show - one of the classics everyone enjoys

Cost of Alamo memberships runs slightly lower than Central rates, with a family membership going for \$90.00. an adult for \$65.00 and a youth membership for \$20.00.

Some of the Alamo's facilities include exercise rooms, a weight room, locker rooms, a six lane swimming pool, a sunning patio, classrooms, a part-time nursery and a gymnasium with room for basketball, volleyball and indoor tennis.

The flooring of the gymnasium is similar to the Midland College Chapparal Center's - a resilient poured vinyl surface.

Basket rental and a laundry service also are available to members.

McVickar, along with program director Richard Galle and physical director Dean McInturff, a complete program which includes aquatics, gymnastics, exercise classes and fitness testing.

"The only thing we don't have that the Central branch offers is racquetball and handball," said McVickar. "And that's the second phase of our

construction." he said. McVickar expects handball and racquetball courts will be added to the existing building within the next two years, and other facilities, such as football fields, will be constructed as funding becomes available.

Heading up the volunteer Board of Managers at Alamo are Chairman Clint Adams, First Vice Chairman Al Keller, Second Vice Chairman Barry Zinz, Secretary Kay Sutton and Ex-Officio Board Member Jerry Payne.

The newest of the four YMCAs is the Washington branch, located at 1600 E. Wall. It was chartered in 1976 and is still housed in the old Carver High School gymnasium.

Executive Director Earl Townsend, along with his program directors Otis McCarty and Thelma Mosely, serves Midland's southeast side with a full sports and physical exercise program.

Unique to the Washington "Y" is heir c "We have a College Information and maintain," he said.

J. Durwood Owen talks about YMCA programs in the Central Y Men's Health Center weight room. Owen is the general director of the Midland organi-

Center here that is associated with the United Negro Colleges," said Townsend. "We try to motivate kids to go to

these six colleges by recruiting, counseling and working with the school counselors," he said.

Townsend said four students were assisted in college enrollment in 1978. and bigger plans are set for this year, with seminars and workshops planned.

The Washington YMCA plays an important community role in Midland's predominantly black south side

"We serve the minorities," said Townsend.

"These people can't afford a big membership (fee), but we still offer the same programs to them. "A lot of the kids around here have

only one parent or maybe live with. their grandparents and they'd have no place to go, nothing to do if they

didn't come here," he said. One of the programs Townsend has great hopes for is the "National Youth Project Using Mini-bikes.

"We work with the police department, probation officers and schools to help problem kids such as dropouts and juvenile delinquents," explained Townsend.

"We have 12 mini-bikes (small motor bikes) that the kids will ride

The program is designed for youthful offenders ages 11 to 15, and Townsend hopes to get the youngsters involved in other YMCA programs as

well "The first thing you're trying to do is just get them involved and interested in something," he said.

Officers of the Washington YMCA Board of Managers are Julius Brooks, chairman; Walter Nedd, vice chairman; Jean Ward, nominating committee chairman and Willie Wilson. financial chairman.

Since 1967, the Park Center YMCA has operated in Midland's east side, serving the community north of U.S.

Hwy. 80 and east of Big Spring St. Located at 1509 Orchard Lane, Park Center's facilities include a gymnasium, weight room, exercise room and a newly constructed recreation-game room.

According to Executive Director Nick Sanchez Jr., the Park Center 'Y" fulfills-vital needs of the predominantly Chicano and black east Midland.

'We're just about the only agency on this side of town that offers the community any sort of recreation," said Sanchez.

According to Sanchez, the Park Center branch has had a more profound effect on the northeast Midland community

zation. He is only the third chief executive in the Midland YMCA's history. (Staff Photo by Bruce Partain)

> more involved; they pay more attention to their kids. Instead of telling them to go away somewhere, they want to know where they're going and who they're with, and I think we've had something to do with that."

Some of the Park Center programs, such as the annual Valentine Coronation, are aimed specifically at boosting Chicano pride and encouraging teenage participation.

Girls compete for the Valentine sweetheart title by holding fundraising events with their friends, the proceeds going towards Park Center equipment and maintenance funds.

Another unique Park Center event is the Graduation Banquet Dance for all Midland High School and Lee High School graduates in the Park Center area

"The parents started this," noted Sanchez, "It's a mainly Chicano event.

In addition to the regular YMCA sports and exercise programs, the Park Center "Y" offers a babysitting course, a cooking class, and a nurse's aide course.

Officers of the board of managers are Manuel Reyes, chairman; Charles Roberts, vice-chairman and Isabel Rey, secretary.

In addition to Sanchez, other fulltime personnel are Carolyn Ken-

More than 2,000 in ball program runs for 18 games before The Midland Junior

Baseball Association oversees an extensive program for more than 2,000 young baseballers in Midland from April until the middle of the summer.

Organized leagues are conducted for eight to 18 year olds, ranging from Little League (9-12), Sophomore (13-14) to Hi-Junior (15-16). There also is a Senior program for high school players. The Little Leagues are organized in three divisions A (American), B (National) and C (Texas Leaguers) for players depending upon age and ability. The American League teams in the city's seven leagues. (Tower, Central, Southern, Northern, Eastern, Western, North Central) play to a city championship. Teams are eligible to participate beyond the city level, but do so out-side the MJBA.

The National League also plays to a city championship, although it is a single-elimination tournament, whereas, the American is a double elimination.

The Sophomore and Hi-Junior Leagues play to city championships and then go on to tournaments that lead to state titles eventually.

Little League play begins with the annual preseason draft in March. Workouts begin in April and the season

run into August. The Senior league also has a later start. The Little Leagues play on city parks throughout the city while Sophomore League games are played at Redfern Field (Eastern) in Hogan Park, and at Ulmer Park (Western). Simon Field, the newest diamond used for MJBA games, and Cubs Stadium are used for

the playoffs.

games by the higher leagues. Simon Field is located in Hogan Park. Little League games start at 5:30 p.m. Midland's Junior baseball program got its start back in 1953 under John

J. Redfern, Jr., and the program included youths of varying ages from LL age and beyond. The following year, the

program became more organized and eventually matured into the sophisticated operation it is today. At one time, the program was free to any youngster desiring to participate. Expenses were defrayed by the Dad's Club which gave liberally to support the program, but with the skyrocketing of equipment prices over the

years, it became necessary to charge a small fee for youngsters who can afford it to offset ex-

... the job of the Midland Chamber of Commerce.

A growing and stable economy, like we have here in Midland, is the product of a great deal of hard work done by dedicated people. The people at the Chamber of Commerce fit into that category. Their main purpose is to create and generate economic growth, help develop new leaders, and to promote a greater sense of civic pride.

The Chamber does this by getting people involved in projects that are geared to improving our way of life, which means expanding Midland's economic, civic, and social horizons.

The Midland Chamber of Commerce is a good investment in your future.

If you are not a member, join today; if you are, THANK YOU.

FLA^{*} 100 keeps treating fluid where it works best:

in the fracture.

That's the **Dowell Difference.**

In stimulating many of the naturally fractured formations of West Texas, leak-off is high and fractures are wide enough to make normal fluid-loss-control agents ineffective. As a result, penetration is not deep and production increases are often much less than expected.

FLA 100 fluid-loss additive helps control leak-off. It is designed to enter hairline fractures and provide a bridge on which the normal fluid-loss agents can filter out of the treating fluid.

Because FLA 100 helps keep treating fluids confined to the fracture, results have been deeper penetration and improved after-treatment production

In low-permeability formations, FLA 100 additive usually has more permeability than the formation,

which means that it doesn't damage conductivity. Dowell equipment handles FLA 100 easily without balling up in the mixer.

FLA 100 can also be added to a nonreacting pad fluid injected between stages of acid, as in Duofrac* II acidizing service. This again allows deep penetrating stimulation for maximum rate of production and utltimate recovery. Ask your Dowell representative for more information and case histories showing the use of this exceptional fluid-loss-control agent in your area.

Good friends aren't hard to find in Midland.

When you grow up with someone in Midland, you know they will become a good friend. The Ortloff Corporation has been growing since 1962, and has done its best to become a strong corporate citizen by steadily improving its position as a leader in developing a healthy economy for the Midland area.

After 17 years of providing leadership and growth to Midland, Ortloff today is a fully integrated engineeringconstruction firm serving clients in the hydrocarbon, minerals processing, petrochemical and energy development industries, both domestic and international.

Our new Midland Division, combined with recently completed fabrication facilities, allows Ortloff to more effectively serve our clients. As a result, we can provide high-quality modularized processing plants for shipment to jobsites located anywhere in the world—on offshore platforms or barges, on ships or on shore.

With flexibility such as this, it is no small wonder that Ortloff's growth has paralleled that of the Permian Basin. Ortloff is now the Basin's largest employer of professional engineers and construction personnel.

And, just as demand for Ortloff's engineering and construction capabilities has grown, so has the demand for strong corporate citizenship grown. Ortloff has met this demand by success-

fully encouraging Ortloff employee participation in community oriented programs and activities.

We at Ortloff will continue to remain interested in Midland's future development, in terms of our quality of life and our business environment.

After all, isn't that what you expect from your friend and neighbor?

The Ortloff Corporation (CC

Midland College's Chaparral Center, the new multipurpose facility opened in 1978, has become the entertainment and activities center for Midland and many other cities in the Permian Basin. Open only a short time, the spacious center attracted 48,000 persons for the first 18 events, or an average of 2,666 persons per event. (Staff Photo by Mike Kardos)

Chaparral Center attracts area residents

In just four months, Chaparral Center has become the entertainment and activities center for Midland and much of the Permian Basin.

The large multi-purpose facility on the Midland College compus has attracted area residents for meetings, dinners, entertainment activities, and sports events.

Although there have been just 18 events in Chaparral Center, the attendence has totaled more than 46,-400 and thousands of residents still haven't been in the building.

The complexities of operating such a facility aren't generally understood by the public. And that's probably as it should be. Those who come only know that the building is large, the seating is comfortable, the sightlines are good, the acoustics enable them to hear, the food and drinks are good, and a number of stars are appearing who didn't used to play in Midland.

But for the Chapparal Center director Larry Campbell, concession manager Jimmy Dike, and their staffs the opportunities are large and varied.

Basically, Chaparral Center is owned by Midland College and operated for the entire community.

"What many people don't understand yet is that we are simply building operators," pointed out Campbell, who joined the Midland College staff in April after having served as assistant manager of Tarrant County Convention Center with earlier experience at Oral Roberts University's Mabee Center, Tulsa Convention Center, and Farmington Civic Center.

"Chaparral Center doesn't act as a booking agent," Campbell said, "The agents contact us about open dates, sign a contract if the date is open, guarantee us a set fee against a percentage of the gross, and handle everything else."

Once a concert date is confirmed, things begin to happen rapidly. Tickets are ordered from a bonded printing company, received in less than a week and distributed to various ticket outlets in Midland and Odessa. The booking agent is responsible for selecting the ticket outlets and the advertising media.

Since the main arena floor is a synthetic surface, called Pro-Turf, it must be covered if floor seating is necessary. That calls for the installation of hundreds of 40 inches squares of plastic which interlock to protect the floor. Then rows upon rows of folding seats with padded backs and bottoms are placed on the floor, locked together, and marked with chalk on the bottom for the seat number. Tape is used on the floor to designate each row.

Next comes the task of setting up the stage, again according to specifications provided. The stage units, which may be raised and lowered, usually are put together to form a performance area of about 40 feet by 60 feet. Usually two additional stage units are placed at the corners to hold the sound equipment. Velcro strips hold skirting around

Velcro strips hold skirting around the edge of the stage and portable stands can be used to provide a backdrop, again held in place with velcro strips.

The four "super trouper" spotlights owned by Chaparral Center may have to be moved and a small platform near the rear of the floor area often is installed for the show's own light and sound control panels.

The sound system in Chaparral Center is excellent, but most shows prefer to use their own equipment. Each day Campbell receives reports of ticket sales from each outlet and relays these to the show's promoter. Sometimes slow sales indicate the promoter should buy additional advertising.

In the meantime, Jimmy Dike has begun preparing for the concession operations.

Dike is manager of food service for Ogden Foods at Chaparral Center. Ogden is one of the nation's largest concession service operators. Depending upon the crowd expected, Dike prepares to have personnel available to operate from one to four of the concession stands. That entails. ordering hot dogs, buns, soft drinks, popcorn, peanuts, pickles, napkins, cups, trays, and numerous other items. That can be as simple as a couple of cases of soft drinks. More often, it entails snack trays, hot meals for the crew and stage hands, bowls of fruit, a wide assortment of beverages, cheese, bottled water, even flowers. For some of the major stars, Dike might be required to provide china, silver, and crystal, even linen table cloths. Brand names frequently are specified; one contract called for a variety of fruit but stipulated "no bananas.

The usual format, depending upon where the previous night's performance was located, has the equipment truck arriving about 8 to 10 a.m. The usual show requires at least one semi-truck of equipment and many use three or four trucks. The equipment is unloaded through a ramp from the parking lot onto the floor. Stage hands and members of the show's crew unload the truck, uncrate the equipment, and place it on stage according to the stage manager. Portable lighting and sound equipment is installed, cables are run to control panels, and equipment checks begin. Usually by 2 p.m. all is in readiness. The star or stars usually have a brief first-hand check, called a "soundcheck" about 4 p.m. for an 8-p.m. show. Minor adjustments are made at that time, but major problems may

require longer. For the Kris Kristofferson and Rita Coolidge Show, the margin was razorthin. Soon after leaving Amarillo for Midland, the equipment truck turned over. That was about 2 a.m. The tractor was wrecked and the driver injured. Wreckers were required to right the trailer and another tractor unit had to be rented. Local stage hands were already on hand before news of the wreck reached Midland. The equipment arrived about 2:30 p.m. and work frantically began to get ready for the show. No one knew what equipment might have been damaged or destroyed in the accident

It wasn't until after 7 p.m. that all was in readiness on the stage, so the stars had to come on without any sound check. Fortunately all the essential equipment was entact, although a piano tuner had to be located to check out the concert grand before the show began.

Ticket sellers, concession workers, security personnel, and ticket takers all report-for duty about 6: 30 p.m. and the doors open an hour before the show is scheduled to begin.

Technicians check out headsets that enable them to communicate with the stage manager, spotlight operators, and sound engineers.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Fine Arts, Chaparral buildings added to college

Two major physical facilities are the most notable changes at Midland College during the past year. And they've made a lot of difference to many Midlanders.

The Fine Arts Building was officially opened in April, adding a major art gallery and a recital hall to the community's inventory of assets.

But when the Chaparral Center opened in October, area residents really began flocking to the campus, for they had a multi-purpose facility that brought in headline talent, space for local events, even a place large enough to get high school graduation ceremonies indoors.

Meanwhile, Midland College was continuing to expand its programs and its offerings to the community as it worked to achieve its goal as the finest comprehensive community college in the state.

And, at year's end, construction of a **Tennis Center by Midland College and** the City of Midland promised more convenience for those who flock to the 12-court complex for recreation or to see some outstanding tennis tournaments

Completion of the Fine Arts Building was marked with several special events, many of them centering around the large McCormick Gallery

which forms the entry to the building. Made possible by a gift from Col. and Mrs. Walter B. Smith of Midland and named in honor of her parents ad brother, McCormick Gallery provides more than 4,000 square feet of open exhibit space with fabric-covered walls, track lighting, comfortable resting areas, and display cabinets and pedastals.

Both commercial and student shows have been displayed in McCormick Gallery, along with the Midland Arts Association Show. The largest single collection of bronze-cast sculpture ever shown in Midland drew thousands of spectators.

A 258-seat lecture and recital hall is another widely-used feature of the building. With its stage, sound system, acoustics, and lighting, it is utilized for numerous musical and dramatic presentations. It also has been provided by the college for several public meetings and forums.

Both college-and community musical groups have presented recitals in the hall. Its seating capacity is ideal for many smaller activities that would be lost in major auditoriums.

The building, of course, was primarily designed for use by the college. It includes one wing for art,

journalism, and publications. Another wing has 16 general-purpose classrooms. The central area is comprised of choir and stage band practic areas, piano lab, future radio classroom, and individual practice

Learning Resource Center, A gift of several Midlanders, the LBJ Educational Forum is a unique blend of sights, sounds, displays, and memorabilia from the life and times of the late President. The facility is open

The McCormick Gallery provides more_than 4,000 square feet of open exhibit space with fabric-covered walls, track lighting and comfortable resting areas.

rooms.

Chaparral Center already has been the scene of a district teacher's convention, luncheons and dinners, new car show, two basketball tournaments, several Midland College basketball games, plus numerous touring shows. Although the spacious facility wasn't designed for a recital facility, its acoustics have been widely acclaimed both by music stars and by the Houston Symphony, which appeared with Burt Bacharach.

Also recently added to Midland College was the Lyndon Banes Johnson Educational Forum, located in the

to the public in addition to its wide use for history ad government classes.

Course offerings continue to be expanded at Midland College in response to demands of loca residents and area industry and business. Just beginning this month is a new allied health program to train badly-needed personnel in Respiratory Therapy.

An electronics program was begun last fall in response to local needs, with plans to expand its classes in the near future as student enrollment climbs.

In-a lighter vein, the Physical Education department this month started offering classes in "Disco Dancing".

Services has constantly changed and added to its wide variety of non-credit classes that annually attract more than 6,500 area residents to expand their knowledge, learn new skills, polish old skills, or gain enrichment for their lives.

One of the most heart-warming programs at Midland College has been expanded and centered on-campus. That's the Adult Basic Education and English has a Second Language offerings that enable school drop-outs or illiterates to gain such common place skills as how to read, count change. For many it offers a chance to get the high school education they never completed and earn the GED certificate that's recognized in lieu of a high school diploma. And for the new residents who don't speak English, it's an opportunity to learn the local language that opens up whole new horizons.

"With our construction program all finished, we now area able to devote something important about educaour major empnasis to improving our tion ... It's the learning and growing programs, whether academic, voca- that's really important, not the detional, technical, or community ser- grees earned. vice," pointed out Dr. Al G. Langford, president, "We're now in our tenth mitted to lifetime learning experi-

And the Department of Community _installed most of the needed programs. Now we want to polish them, make them serve community needs better.'

September

Texas.

Those who have watched the development of Midland College through its growing, formative years are excited. They're even beginning to see some growth and maturity on the trees that were planted when they looked like sticks. As Beal Plaza becomes a tree-shaded area for resting and listening to the lovely sounds of the Hodge Carrillon Tower, it's almost strange to see the entire campus without torn-up ground, partiallycompleted buildings, and construction barricades.

But, as a comprehensive community college, the change continues as students arrive, learn, absorb, grow, mature, and leave. But even the graduates keep returning for additional courses, many of them even looking forward to gaining new knowledge. For they have learned

quarters in the Gibralter Building at 300 W. Wall St. The company has been in the oil and gas business 104 years, and has been

the Midland Production Division for 1979 is \$31.8 million for capital investments and \$43.8 million for operating costs.

active in Midland since the 1930s

The Midland Production Division has 130 employees and the payroll is approximately \$5.5 million annually.

D. W. "Pete" Matthews is division manager of production here, and Frank B. Balke is assistant division manager.

"We operate 2,800 producing oil wells from Pecos on the west to Wichita Falls to the east," Matthews said. "Our production is approximately 55,-000 barrels of oil per day.

The company is active in Junior

During the last three years, Conoco's Midland Division has drilled more than 400 wells. In addition to its oil and gas ex-

ploration and producing efforts, the integrated company is engaged in refining and marketing operations. The company has twice received. the API Accident Prevention Award

for more than 1 million man hours of work without a disabling injury. The company also is a recipient of the API Meritorious Safety Award.

I-R Compression Service mans office in Midland

I-R Compression Services, headquartered in Tulsa, Okla., maintains a facility in Midland at 1403 W. Industrial Ave.

A division of Ingersoll-Rand Co., **I-R** Compression Services provides air and/or gas compressors, complete with their servicing, on a rental basis. They are provided complete with personnel to operate and maintain them as well as with all required repair parts.

The company operates throughout the world, but most activity is in the United States, Canada, Europe, North Africa and the Middle East.

I-R Compression Services was originated in 1963. Its parent company, Ingersall-Rand, was founded in 1863.

The compression firm has more than 300 employees, while Ingersall-Rand employs 40,000 people.

Company officials report that contract compression, as a service to the oil, process and manufacturing industries, is a concept that is gaining rapid acceptance and growing at a 30 percent annual-rate.

Customers receive from I-RCS a guarantee of compression availability on a monthly basis. They pay only for the gas (air) that is compressed

and read through the flowmeter. Additional equipment and people will be added to the company's rental program in expanded geographic areas. New sizes and types of equipment will be available in the company's compression services. In 1979, smaller horsepower units, larger horsepower units, electric drive units, trailer mounted units and offshore units will be added.

The company believes West Texas is a particularly attractive area for contract compression services. Oil companies are under ever-increasing pressures to maximize hydrocarbon production and to replace depleting production with an expanded exploration-drilling program. These requirements are draining operator's capital and people resources so they must conserve what they have for what they do best-explore for, drill and produce hydrocarbons-and leave the other periphery requirements of their business, such as compression, to other experts like I-RCS who do that best

Robert J. Miesen is the general manager of I-R Compression Services.

provide people for ticket takers and ushers. All of them work frantically as thousands of people arrive and look for their seats.

The show's underway, the audience is relaxed and responsive. The stars put on a good show. Everyone leaves happy.

But Campbell already has checked up on the total sales and settled with the promoter. Dike is taking inventory and tallying sales for the night. A few fans mill around hoping to get an autograph or a word with the stars.

Already the equipment is being taken down, crated, and loaded in the

truck for another performance hundreds of miles away.

And at times a crew might work all night storing the chairs, taking up the flooring, moving the stage and rolling out the basketball goals.

Chaparral Center leases the building for a \$700 guarentee against 10 percent of the gross sales. It also gets a percentage of the concession sales. For local non-profit groups the guarantee is reduced and the percentage taken is just six percent of the gross.

And for some non-revenue acticities, there is asmaller rental fee. For example, more than 2,000 teachers from District XVIII, Texas State Teachers Association, held their meeting in the building.

an benefit

While the public often has the idea the commission is a clearing house for grants, the executive director said that is a misconception.

Ernie Crawford, who has headed the commission since it began, described PBRPC as a liaison with state and federal agencies for local governments.

"Our purpose is to conduct longrange planning for the local governments within this region and to provide technical assistance and administer such programs as the board of directors deems necessary;" Crawford said.

The region includes 17 counties with more than 24,000 grant applications sent to the funding agency for consideration.

"We make sure there is no duplication of effort," he said. "We check all aspects of the application and how it will affect the people in that area. Sometimes we go by what elected officials say, and sometimes we also consider the environment."

The commission deals with sevenbasic programs areas: aging, criminal justice, alcoholism and drugs, health systems, manpower training, physical planning and human resources.

Criminal justice was one of the first projects the commission started, according to Crawford.

A long range plan was developed for the Permian Basin Regional Police Academy which is located in Midland, Crawford said. A state law had been passed that all law officers must obtain 240 hours of training "and the commission was set up basically to provide that service."

The regional academy eliminatesany potential law officer having to leave his or her home to attend the school at Texas A&M Uniersity or other college.

The academy also is, designed to have several in-service training programs such as robbery or crime prevention, Crawford added.

PBRPC went on to establish a highspeed teletype system to link all law enforcement agencies within the 17county area. The commission completely designed and installed police radio communications systems enabling the officers to talk to other law agencies in the region, the executive director said.

Another program, which has been administered 51/2 years by the commission, is the Manpower program under the Comprehensive Employment and Training Act. Crawford said the regional agency administers the program for all cities and counties under a "prime consortium. "It is designed to give employment and training to the unemployed and under-employed of the region," Crawford said. "We administer about \$3 million a year in these grants and are serving about 1,800 clients in the region."

ng categories ranging from summer emin ployment for teens to jobs for older ast people.

If the client is a "hard-core unemployed," Crawford said the agency tries to place the person in a job where he can learn. Manpower pays the salary for that person's first year of work. If the person is underemployed, he is placed into a business and trained with marketable skills while Manpower also pays the first year's salary.

After that first year, the person has the skills to make it on his own without having the government pay his salary. "We're trying to take these people off the welfare rolls," Crawford said. "The taxes they pay into the government eventally pays back that money spent on them the first year."

The alcoholism and drug abuse program is being developed further, according to Crawford. It involves planning and gathering of data to help cities and counties in establishing alcoholic treatment facilities, he said. Several alcoholic "drying-out" facilities have been established in the region. "Before, the alcoholic was arrested and put into jail. Now he can

receive the proper treatment," Crawford said. The Health Systems Agency for the Permian Basin deals with the fourth basic program and that is the health

basic program and that is the health field. This program is designed to "identify health needs in the region and implement plans to address these needs," the executive director said. The agency deals with all aspects of

health and services and also works with doctors and hospitals in the region to determine what is needed. "We are working to identify the gaps in the health system."

Another program, the Area Agency on Aging, has been working with local governments to set up programs for the elderly within the region, Crawford said.

Purpose of the physical planning program is to develop a water and sewer plan for all 17 counties. The commission has provided technical assistance to 14 of these counties in implementing the plan, Crawford said

An annual housing study is done to determine what condition of housing is in the region and what future needs of housing will be, he said. The group also assists in areas such as airport planning, solid wastes or air quality studies.

A new program is the human resources plan. Purpose is to develop a plan for the region to identify what human resource programs are available. These then will be coordinated, Crawford said. approved by the board of directors which includes members of the region's governments.

Peggy Garner, Upton County judge in Rankin, is the board's chairman. Other members are Roy D. Bennett, Andrews County judge; Charles Blue, Crane County judge; Jim Burkett, Borden County judge; Fred George of Odessa; Marcus Crow, Gaines County judge; Blake Hansen, Midland County judge; Edwin A. Dwyer of Midland; Dayton Elam of Seminole; Leslie Emfinger of Andrews; Ollie Garland, county commissioner of Iraan; Reagan Legg of Midland, and Jimmy Mathis, Martin County judge. Also, Leon Nutt, Winkler County

judge; D.W. Parker, Glasscock County judge; W.O. Bill Pigman, Pecos County judge; Leslie Pratt, Dawson County judge; Charles Stavley, Terrell County judge; Chester Taggart, Ward County judge; Carroll Thomas, Midland city councilman; Bill Tune, Howard County judge; Gary Watkins, Ector County judge; Gene Cummings of Fort Stockton and G.L. McGuire of Kermit.

Company makes seals for oil patch

Mechanical Seal & Service, Inc., of Odessa is a subsidiary of Texas International Co., headquartered in Tulsa, Okla.

The concern is involved in the manufacture and sale of mechanical seals for dump rotary shafts.

The Odessa location is at 1104 Market Ave.

Mechanical Seal & Service manufactures, reconditions, sells and maintains mechanical seals for use as an engineered effective means of sealing rotating shafts.

The company, in business 17 years, serves the entire United States and places particular emphasis on Permian Basin customers.

Fifty-three persons work for the firm and draw an annual payroll of approximately \$925,000.

Mechanical Seal & Service is active in the Little League program, the 4-H Club, and supports children benefits through organizations such as the Lions Club.

The company, which opened a new plant facility in 1976 in Odessa, has doubled its business in five years, a company spokesman said.

A service center for repair and parts was opened in Houston in 1977. The company will design a seal for almost any shaft. For most of the more common requirements, various types are available for immediate, off-the-shelf delivery.

The company's Mec-O-Sel has many features designed to save time and money, such as: —Easy assembly—just press and

twist. —Anti-clog design—no tiny springs

to clog or foul. —High and low pressure sealing—

L.P.Model to 150 psi; H.P. Model to 750 psi.

-Uniform face load-possible only with Belleville spring. -Positive drive-heavy duty lug

-Positive drive—heavy duty lug drive on carbon and retainer. -High temperature capability—

sealing to 600 degrees with elastomers. —Interchangeability—Will dimen-

sionally interchange with competitive seals.

To plant this wheat, today's farmer must pull four separate machines over the same soil. Consuming energy with every step. But now Phillips Petroleum has helped develop a better way. We worked with the University of Idaho to create a system that tills, fertilizes, plants, and replaces the soil in a single step.

The Ecofallow system at work.

We call the new planting process Ecofallow. And it's an important development for farmers. And everyone who depends on the crops that they produce.

Fields that used to take weeks to prepare and plant can now be completed in a few days. So the farmer lightens his work load and at the same time cuts his energy requirements in half.

Conserving energy for all of us, while we make fine products for your car. That's performance. From Phillips Petroleum.

The Performance Company 66

Teaching a geology short course sponsored by the American Association of Petroleum Geologists at the Permian Basin Graduate Center in Downtown Midland is

Institution of higher learning surrounded by tall buildings

By ROGER SOUTHALL **R-T Staff Writer**

In the midst of retail stores and churches on North Main street in downtown Midland, there's also an institution of higher learning.

It doesn't occupy a campus or ivy-covered buildings, but nevertheless it's an important

Watson sells, rents

Thirty-five employees of Watson Packer, Inc., 600 N. Big Spring St., in Midland are engaged in oil well tool sales and rentals.

The firm, organized 25 years ago sells oil well packers, tubing, anchors and other downhole tools and has six service locations. They are in Monahans, Seminole, Snyder, Abilene, Jacksboro and Eunice, N. M.

The company, which has an annual payroll of \$725,000, services the Permian Basin of West Texas and southeast New Mexico, the West Central Texas area and the Fort Worth Basin.

Watson Packer, Inc., is a member of the Midland Chamber of Commerce and sponsors a men's softball team

The firm, organized as a one-man operation in Monahans, now has its headquarters in Midland. The move to the Tall City was made in 1977.

One of the most recent expansions of the company was the purchase of Top Aciders, Inc., of Snyder and Sundown.

The company plans to improve its service to the Permian Basin in 1979. with the possiblity of the addition of another ser-. vice location.

Desk & Derrick Club features employees in crude industry

By WANDA MOUTON **R-T Lifestyle Editor**

Continuing education is a primary goal of Midland's Desk & Derrick CLub.

Chartered here in 1951, titled "The Time Mathe organization is composed of women who are employed in the petroleum and allied industries

"We attempt to educate our members in all phases of the oil industry so that they can better serve the industry," said Deanna Wauhob, outgoing president.

For example, the organization sponsors seminars, meetings and periodic oil field trips for members.

In addition, the Desk & **Derrick Club registers** for the various petroleum-related societies, conventions and meetings which are held in Midland throughout the year. The club staffs the Information Booth at the Permian Basin Oil Show held every other year.

And each year, the organization sponsors one or more scholarships for students at Midland Colcareer preferably in the oil industry.

The local Desk & Derrick Club, composed of 150 members, is affiliated with the North American Association, which vice president; Elowiese also includes Canada.

Olix Industries accenting exploration for oil, gas

Olix Industries, Inc., headquartered in Midland and with offices in Houston and Kansas City, recently consumated a \$5 million acquisition of Hightower Oil & Gas Co. of Houston.

"The acquistion assured that two years of financial house cleaning had paid off," Kenn S. George, Olix president, said. "It also confirmed that the future emphasis of the company will be directed to the oil and gas business.

The history of Olixdates to 1900 when it was founded as the United States & Mexican Trust Co., with the Kansas Mexico and Orient City. Railroad as its major

Like most people, you've probably had bad experiences with commercial airlines. Time consuming layovers ... misplaced baggage ... long waits in ticket and baggage lines. All of these add up to one thing: wasted time.

Now, you can fly anywhere in the continental United States, day or night, at your own convenience. How? Airways Charter Service. ACS offers you the opportunity to set your own flight schedule, avoid costly delays in crowded air terminals, and enjoy all the comforts and conveniences of owning your own plane. Whether you're headed for an important out-of-town business meeting, a ski vacation to the Rockies, or a "Group Getaway" for the weekend, Airways Charter Service is waiting to take you there, and for practically the same price you'd pay for a commercial flight.

Airways operates two fully-equipped aircraft that are on call 24-hours-a-day to handle your flying needs. For short flights, there's the Cessna 210, an economical threepassenger plane ideal for quick trips to anywhere in the Southwest. Fly to out-of-town business conferences in the morning and return that evening, without changing planes.

For the ultimate in comfort, ACS offers their Cessna 414, an executive aircraft with spacious seating for six passengers. The 414 features radar equipment, air-conditioning, all weather capability, AND a pressurized cabin that lets you fly above the weather up to 23,000 feet. Both the Cessna 414 and the 210 offer air freight and air ambulance

Jaycees organizations active at four levels

By GUY SULLIVAN **R-T Staff Writer**

The U.S. and Texas Jaycees are involved in programs on the local, state, national and international levels to meet community needs.

Members are involved Little League teams, fighting drug abuse and even promoting the Special Olympics for the mentally retarded.

Members also support the Texas campus of the Victoria College, a paraplegic rehabilitation and education center in Gonzales. Work in government such as taking partisan stands on controversial issues and backing immunization employees, communities programs for school children are other pursuits and government with of the Jaycees, said officials.

Other interests include environmental improvement, fighting rampant pollution, rehabilitation work in penal institutions, crime prevention and detections, spiritual and personal development, and supporting community recreational needs

Members said Jaycees frequently provide service through leadership to mobilize the community to positive action to

solve its own problems. Texas Jaycees serve young men of all walks of life between ages 18 and 35. They are served by a state headquarters staff in Grand Prairie. Actions are taken involving program development in such areas as community health. legislative action, crime and corrections, individual and spiritual development among others.

PERSONAL, To Mary: I will not pay for the newspape unless you subcribe for home delivery to SAVE 40%. Call The Reporter Telegram "Circulation, 682-5311. Your ever-loving Flint.

PERSONAL, to Skinny: I called The Reporter-Telegram to start home delivery, and I'll pay for it! I'm saving not only 40% but dollars more with all those coupons every week. Gratefully

More than 13 000 Texas Jaycees pursue these activities in more than 280 communities. Also, the Jaycee-ettes supplement the efforts of their husbands in the Jayces.

Members said the in programs such as prime purpose of the youth assistance; aiding group is to develop young men through programs which provide definite solutions to community problems. Skills Junior Chamber of Comin decision-making, planmerce ning, organization, and

problem-solving are learned by members. Jaycee members be come the technicians of change and the authors groups of acomplishments, providing business and industry with more skillful with involved citizens.

knowledgeable participants, said an official. dent. Members welcome potential members of all races and religious persuasions. Javcees come from varying educational, economical and career backgrounds. Each year a new im-

portant chapter is added to the history of the U.S. Jaycees, as more and more members express a willingness to contribute to the organzation's future success. The group known

today as the U.S. Jaycees resulted from the expansion of a fundamental idea that young men can become actively involved in public service since youth is no handicap for participation in city, state and

national affairs. The Jaycees began as the Herculeaneum Dance Club of St. Louis, Mo., a group of people led by founder Henry

Giessenbier Jr.. Organized in 1910, the dance club had as its original. purpose the social elevation of its members, a goal it rapidly attained. In 1914, it merged with six other similar groups to form the Federation of

Dancing Clubs. During the summer of 1915, Giessenbier was especially impressed with the comments of a local politician who came to the U.S. Jaycees. to talk to a meeting of

creasing its oil and gas assets, thereby enabling the federation. The ora-Olix to take a more sig tor, Col. H.N. NAR's Midland District office largest, oldest manned by firm

North American Royalties, Inc., which is headquartered in Chattanooga, Tenn., operates its oldest and largest district office in Midland, with A. W. "Bill" Glover as the Midland District

manager. North American has two divisions: The Oil and Gas Division, which carries on exploration and production activities in the continental United States through its four district offices, and the Wheland Foundry Division, which manufactures grey iron castings, principally for the auto-

motive industry. The Midland District office is actively involved in exploration, development and production in the Permian Basin and the Rocky Mountains. With a staff of 10 people, NAR's Midland operation is seeking participation in exploration and development ventures and is involved in producing properties in many areas scattered throughout the Permian Basin

'We are involved and we want to be more so," says Glover, a 21-year veteran of the oil and gas business who joined NAR in February 1977.

North American Royalties' other district offices are located in Houston, Lafayette, La., and Oklahoma City. G. Jack Fisher, who has 24 years experience in the petroleum industry, isdivision general manag-

Individual **Retirement Accounts** at First Savings are the sure way to build for a secure retirement

OUR 2nd ANNIVERSARY

ALONG WITH OUR EVERYDAY LOW PRICES ON OUR QUALITY STEAKS WE ARE OFFERING EVEN LOWER PRICES ON SELECTED MEALS, FOR A LIMITED TIME TO HELP YOU CELEBRATE OUR ANNIVERSARY WITH US!!

and get a tax break at the same time.

If you're working for a company that does not have a retirement plan and you feel unprotected, then an Individual Retirement Account (IRA) at First Savings is the thing for you.

With an IRA, you save for the future at the impressive current interest rate of 8% (effective annual yield 8.33%). Deduct whatever you save - up to \$1500 - from you gross income, and defer every penny in taxes on your IRA until you withdraw it, normally after retiring. Then, you'll probably have less income and possibly be in a lower tax bracket.

(NOTE: There are severe penalties for withdrawals before age 591/2.)

Here's an example of what an IRA can do for you. If you start an IRA at age 30, and deposit the maximum of \$1500 per year until age 65, at the current interest rate, your IRA will be worth over \$300,000. That's a tidy sum to start retirement, is you want to retire that young. By the way, your IRA is in addition to standard Social Security benefits. But remember, the deadline for starting or adding to your IRA is the date your taxes are due.

So stop by either First Savings office . . . downtown at 500 West Wall or San Miguel Square . . . , and let the "FISCAL FITNESS PEOPLE" show you the sure way to save for retirement. It's getting later than you think

CHROMIUM CORP.

in fiscal 1978 was the result of several factors: (1) successful marketing and sales programs provided a good beginning backlog and kept the workload at a stronger level throughout the years; (2) management control of projects benefits from application of new computer scheduling and control programs; (3) greater use

tries

of new computer systems provided better engineering and drafting efficiencies and enabled its technical organization to perform a greater workload without a proportionate increase in staff; and (4) successful development of international business and excellent performance on two contracts with Petroleos Mexicans (PEMEX) for major gas processing projects.

Ortloff's Midland oper ations, located on the Andrews Highway begtween Midland Drive and Holiday Hill Road, have been expanded by the additions of a fabrication yard for assembly of large modularized plants, such as those designed for PEMEX.

THESE NEW facilities enable Ortloff to excercise tighter scheduling and control which also benefits the customer by achieving earlier completion schedules.

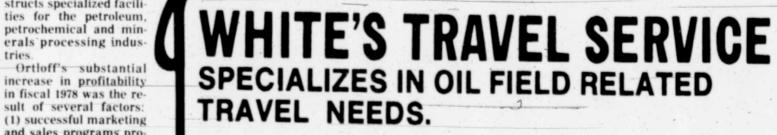

Ortloff Mineral Services Corp., an Ortloff subsidiary, also has expanded its engineering facilities in Golden, Colo., to handle a grow-

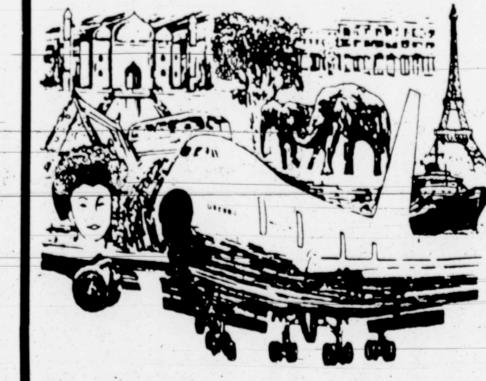

ing volume of domestic uranium, oil shale and coal projects. During the year, the first of a series of U.S.

patent applications pertaining to cryogenic (low temperature) gas pro-

The company covers West Texas, the Panhandle, southeast New Mexi-

co and Oklahoma. MWL sponsored a Junior League baseball team in 1978 and the company is a member of the Petroleum Equipment Suppliers Association.

Lindsey and the company are members of the Five Mile Club. MWL has worked on the two deepest wells in the world and has run equipment in the deepest well in Europe.

Lindsey says the company has enjoyed a 20 percent annual growth since 1972.

He said MWL plans to start con-

struction on a new facility in Midland County along U.S. 80 late this year. Also planned is a new facility in Elk' City, Okla.

Lindsey is the designer of several major oil tools used in deep well completions and is the holder of several oil tool patents.

"This is a very competitive oil field service area, and no company can last very long without superior people and equipment," Lindsey said.

El Paso Natural one of nation's top natural gas transporting companies

only the city of El Paso. Today, it is one of the gas transmission firms, serving not only West Texas but also New Mexico, Arizona, southern Nevada and California.

It is a principal subsidiary and the predecessor of The El Paso Co., a holding company which is engaged, through subsidiaries, in such diverse activities as natural gas transmission, chemical manufacturing, liquefied natural gas activities, and oil and gas production.

El Paso Natural gas sells gas on a wholesale basis, obtaining it in the fields where it is produced, processing it where necessary to make it transmissible and a more desirable fuel, and transporting it through long-distance pipelines to areas where it is used.

'The company's activities are regulated by the Federal Energy Regulatory Commission.

El Paso Natural Gas has pioneered many innovations in the natural gas industry. These include, among others, development of a method for purifying sour gas through soda ash treatments, and the first allwelded pipeline for long distance transportation of gas.

In 1928, Paul Kayser, then a young Houston lawyer, formed El Paso

Remodeling and expansion work at Midland Memorial Hospital, above, was one of the major construction jobs in the Tall City during 1978 when a record \$86,935,62 in building permits were issued by the city of Midland. Major projects either started or continued in downtown Midland last year were The First National Bank remodeling, the W. C. Blanks Building, the Gibralter Savings & Loan Building, the John L. Cox Building, Midland Hilton remodeling and the Marathon Oil Co. Building. (Staff Photo by Bruce Partain)

Midland undisputed leader in construction

By LANA CUNNINGHAM R-T Staff Writer

From the flat, dry plains, Midland's skyline soared upward in 1978. Building permits for 1978 topped out at just under \$87 million with \$86,935,-762, the official figure from the city Building Inspections Department. This figure was far ahead of last year, and makes Midland the undisputed leader in building when compared to other area towns.

The year 1977 set the previous record, with \$62,408,629 issued in building permits. While economic watchers were expecting Midland to break it again this year, the \$87 million was an unexpected surprise.

"Downtown commercial building is what has put the permits way over last year," said Les Riek with the Economic Development Research Department at the First Natinal Bank, Examples include the addition to the Midland Hilton, the Blanks Building, John Cox Building and First National Bank expansion.

This type of jump in building usually comes with addition of new industries to cities, but Riek said this is not the case with Midland. The new office buildings are being constructed by people and businesses already located in the Tall City.

Odessa, Riek said, was expecting to have only about \$42 million in building permits issued by the end of the year, or about half of what Midland reported. San Angelo was below that with only \$39,996,035, down from its 1977 figure of \$55,535,607.

Lubboek, more than twice the size of Midland, did not do twice as much business in building. Total for the year 1978 was \$132,600,657, slightly more than its 1977 total of \$136,951,-646.

With the addition of the new office buildings downtown, Midland now ranks ahead of Fort Worth in downtown office space with little more than 3 million square feet, Riek said. Ahead of Midland are cities like Houston and Dallas. Midland is fifth in the state.

The city department reported issuing 1,589 permits in 1978, down from the 1,793 issued in 1977. The average permits issued per month was 132, a 12.8 decrease over last year.

Permits issued for new residences — which includes single family and multi-family dwellings - total d 575 with 143 being issued for new commercial structures. The remaining 861 went for residential or commercial alterations.

There were 561 permits issued for single family residences for a total of \$33,553,210. This is an average of \$59,-809 per house. Six permits totaling \$449,000 were for duplexes with a total of 12 units. Eight permits were issued for multiple family residences, or apartments, with a total of 545 units. Final cost of these units should be \$6,095,000.

Speaking in terms of money, people are spending \$38,536,905 for new homes, \$3,503,939 for residential alterations and repairs, \$30,630,590 for new commercial structures and \$14,-264,328 for commercial alterations. Permits issued for \$100,000 or more totaled 75, according to a city report. In those 75 were 13 permits for \$1 million or more. Builders receiving the permits and the purpose of the

 \$3,550,000, W.C. Blanks Building, 12 stories, 113,000 square feet.

Glynn Day Construction, 4300 W.
 Wall Ave., \$1,787,000, new motel with 210 units.

- H.B.F. Construction, 125 W. Missouri Ave., \$3,700,000, Marathon Oil Co., Building, four stories with 80,000 square feet.

 Area Builders, 105 N. Main St., \$1,108,000, city of Midland Exhibit Hall.

- Epoch Properties, 4410 Lanham, \$2,500,000, 204 apartment units.

 Texas Diversified Properties, 3001 N. Midland Drive, \$1,000,000, 128 apartment units.

Permits for new houses started off fairly slowly last year with 45 permits being issued in January. As weather turned colder in February. the number of single family residence permits dropped to 43. It took a leap in March with 79, but dropped to 40 for April. May saw a resurgence with 68 permits and June continued with 46 permits.

It apparently became too hot to build in July, for only 28 permits were taken for new homes. From there it went up to 58 in August, 27 in September, 62 in October, 30 in November and 35 in December.

The city had several of its own building projects going on through 1978. The Exhibit Hall, with a cost over \$1 million, was the last one started in 1978. The Central Fire Station at 1500 W. Wall Ave. came close to \$1 million. Its permit was issued for \$987,000 and will be built by Rose and Sons.

The third major city project was the fire sub-station being built at 3301 Haynes for a cost of \$232,816.

The city also went to work on its nine-hole addition to Hogan Park Golf Course and pro shop. The pro shop addition is costing about \$230,000 and will be adding 5,600 square feet to the present facility.

Even though there were several \$1 million projects undertaken, a large number of other office buildings were started with the cost ranking under the \$1 million mark, but at a cost of more than \$100,000.

These include a commercial office building owned by Paul Davis at 406 N. Big Spring St., \$415,000; a McCoy retail sales store at 3112 W. Front St., \$150,000; a new commercial office at 1209 W. Wall Ave., \$100,000; a Carrows Restaurant at 2201 W. Wall Ave., \$225,000, and a Handy Dan retail sales building, 1004 Andrews Highway, \$474,000.

A new YMCA for the Alamo branch at 901 N. Midland Drive should cost \$500,000. Other structures include drive-in facilities for Commercial Bank and Trust, 2300 W. Missouri-Ave., \$525,000; Tall City Cable TV, 2530 S. Midkiff Road, \$182,000, offices at Plaza Shopping Center, \$200,000; a new distributing center for Pepsi Cola, 1501 N. Fairground Road, \$211,-000: a dental clinic for Mike Cummings, 1811 W. Texas Ave., \$125,000; an addition to Lexington Motor Inns, 1003 S. Midkiff Road, \$750,000. A new bank, Texas National Bank of Midland at 4309 N. Garfield was

Making a brief stopover in late 1978 at Midland Regional Airport is a British Airways SST Concorde leased by Braniff International. A jetway reaching out from the airport's new concourse area attaches to

the aircraft, allowing pilots and passengers off for a brief rest period. The Concorde made a one-time onlystop at Midland on a proving flight. (Staff Photo by Brian Hendershot)

Midland Regional Airport groans with growing pains

Hammers pounded, saws buzzed and machinery roared as the Midland Regional Airport groaned under the growing pains of expansion this past year.

Care and the second

The airport underwent its largest expansion and growth in more ways than one during 1978 as work continued on the renovation of the Permian Basin's major airline carrier facility and a new airline was added to the services.

Starting out with a \$5 million plan, the project soon was expanded to about \$6 million with the addition of items including two baggage carrousels and a ticket counter for a fourth airline

As construction continued, the face of the airport building changed with straight lines replacing the wavy ceiling and roof. Things slowly began

taking shape with new parts opening one at a time for the public's use One baggage carrousel was installed in the north end of the building and the rental car offices were moved into the same section, all opening

in July.

But the one baggage carrousel immediately proved inadequate for the fast increasing number of passengers. An application was submitted for federal money for a second carrousel, and this was approved in December.

Board of Braniff's application, the idea became A concourse area a reality equipped to handle four planes with jetways and for the service in June, another two with outside receiving tentative appassenger walk-ons fiproval in October pendnally was unveiled to the ing a "'show-cause" public in the middle of order and was given the December. final okay at the end of

accomplishments this past year possibly is the stopover at Midland Regional Airport of the SST Concorde

On a proving flight before inaugurating Concorde service at Dallas-Fort Worth Airport, the supersonic bird touched down in Midland for an hour, giving thousands of area residents a glimpse of the sleek aircraft.

Permian Basin residents now have easy access to West Coast cities with Continental Airline's additions in service and East Coast cities with the startup of Braniff International. These changes put Midland within a few hours of the rest of the world. 1978 probably will

mark the year of the biggest changes at the airport. By the end of 1979 all major construction should be finished with things settling into a nor-

Ruthco promotes Terrell to new post in Midland

stairs lobby

Cecil G. Robinson, president of Ruthco, announces several promotions and changes in key personnel.

W. E. "Ed" Terrell, former branch manager at Hobbs, N. M., has been moved to Midland as vice president in charge of sales

A. R. Lunsford, former assistant manager of the Odessa Branch has been moved to Hobbs as branch manager, replacing Terrell.

W. M. Joyner Jr., field superintendent of the Odessa Branch, has been promoted to assistant manager there.

Leon Snelson, field foreman, now is Bearing Services manager of the Odessa Branch.

Terrell, who is completing his 20th year of service with Ruthco, has a varied experience and a vast knowledge of the operations of his company, having served in several capacities.

He and his wife, Hilda, who is a secretary for Exxon Co., U.S.A. have established a home in north Midland, having moved here from Andrews.

They have a daughter, Terri Lynn, who is a freshman at Texas Tech. She is an honors graduate of Andrews High School.

Terrell says he is looking forward-to seeing his many friends and acquaintances he has established over the years, and hopes to make many new friends among the many oil companies based in Midland.

Robinson said he believes these changes will enable Ruthco, who has been supporting the oil industry in the Permian Basin since 1957 with portable concrete bases, to better serve the oil companies with their pumping unit needs.

Ruthco is headquarterd at Odessa, 8317 East Highway 80.

The company, in addition to its concrete bases business, installs and repairs pumping units.

Ruthco's area of service includes

W. E. Terrell

Texas, New Mexico, Oklahoma, Arkansas, Louisiana and Missouri. Its 126 employees draw total salaries annually of \$1,750,000.

The clompany supports the Odessa and Hobbs Little League programs as well as Levelland Bowling, the Odessa Future Farmers of America. Midland Junior Achievement and West Texas Teen Challenge.

Robinson said the company has experienced a 250 percent growth in five vears

Ruthco plans to erect a new shop and office building for its Odessa operations and remodel the home office.

The company also is in the process of installing a new IBM 34 computer system throughout its operations.

"Due to the geographical locaton and the increasing demand for energy, this area has proven to be highly adaptable to our type of operation in ideal working conditions and fasterand better service for our customers

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

Hospital capabilities, scope expanding to meet needs

from driving by, Midland Memorial Hospital is growing.

The growth, however, is not limited to mortar and bricks. The massive construction project is only the most obvious evidence of the hospital's growth.

In its first year under the direction and support of the Midland County Hospital District, the hospital board of trustees is expanding the capabilities and scope of the hospital to meet the growing health care needs of the community. The voters of Midland County approved the new hospital district in Sept.

1977 At the same time, the voters approved the sale of \$10 million in bonds

(Continued from 4EE)

funds are supporting the expansion and renovation of the buildings, the hospital is fortunate that gifts continue to come in from people to help purchase large and expensive pieces of new equipment, Cappadonna noted.

These gifts are essential since, as Ulrich pointed out, "the technical aspects of health care delivery continues at an unabated pace.

"New equipment costs money. We feel most fortunate in continuing to enjoy community support to enable us to obtain the newest equipment as it hits the marketpalce.

"To attract new physicians and to promote local physicians to more effective care for patients, we must continue to avail ourselves of the latest equipment as it becomes available," the administrator said.

"While Midland Community Hospital District has access to tax money," he continued, " any money donated for purchase of special items of equipment enables us to continue to hold down the tax rate."

Sixty-nine physicians make up the staff of the hospital now, Ulrich noted, but Midland is still "medically underserved" in some areas. Because of the higher average income and education levels in Midland, patients tend to seek medical help sooner and cialties, 97 percent of the people who use this hospital come from Midland County," Cappadonna

for spill agent

Ace distributor

Ace Industrial, 3707 tained through conven-Brazos St. in Odessa, is distributor for a new chemical developed to combat environmental problems caused by oil spills and salt water overflow.

Labeled MP900 and bearing U.S. Depart- pits. ment of Agriculture approval, the product was developed by Dallasbased Lawton Specialty Co. of Texas.

When mixed with water, it reportedly will convert the hydrocarbons to a neutral, nonflammable, non-toxic, water-soluble solution and also aid in leaching out chloride from the soil which will seep down well below root level.

It cleans the soil and allows vegetation to grow at a much faster rate than by natural biological means.

Lawton officials emphasized that salt water overflow during production normally sterlizes the surrounding land for upward of three to five years.

In addition to the chemical's feaching effect, the company says that when MP900 or OD-1, another Lawton product, is used as a buffer or spearhead in the flood, the same results to hydrocarbons can be

achieved. The materials, through their solubility, will as-sist in increasing the percentage of oil removed from the formation over what normally is at-

tional floding. Companhy officials say that for years the ol industry has tried various methods to overcome the environmental damage caused by spills, sludge, pits, and drilling

They feel the results in general have been unsatisfactory or the problems simply ignored.

Today, ever-increasing pressures from the environmental agencies and forward-looking executives are causing the oil and gas industry to re-evaluate and search for new methods to restore valuable land.

According to ace Industrial and Lawton officials, this can, in most cases be accomplished simply and economically.

They point out that accidental oil spills or residual formation deposits can be made water thin and water soluble to facilitate their removal or reclamation,. On land, the water sol-

ubility allows for deepgrown penetration. cleaning the soil and allowing vegetation growth to reoccur faster than by natural biological degradation.

Lawton Specialty is a leader in the manufacture of chemicals for uses in oil clean-ups on land and water; land reclamation from salt-water spills, tank bottoms and sludge pits, and secondary recovery.

may prevent the young ster from getting into "trouble.

'He is less likely to drift off and get into drugs and other problems," Ms. Lambert said.

Today, more than 2,000 boys and girls in Midland are from single-parent homes. And that situation doesn't mean that they are "bad" or "wayward," either, she said. What it does mean is

that the potential for errant behavior is there. Pointing to that poten-

tial for delinquent behavior is a Texas Youth Council survey, which indicates that "75 percent of all youth" judged delinquent and deemed in need of reforming are from single-parent homes, Ms. Lambert said

The program's goal is one of prevention - to guide the child toward wholesome living and away from forces that would pull the child downward.

One of Ms. Lambert's tasks is to interview adult volunteers who want to befriend youngsters. Likewise, the boy

The East Side Lions Club is in volved in the community, according to its president, Philip Marquez.

The club is active in a sight conservation project, providing glasses for school children whose parents could not afford them.

East Side Lions Club members also help support the Lions' Crippled Children's Camp in Kerrville.

In addition to the traditional Lion Club projects, the East Side Lions try to help people throughout the community in areas they are most needed, Marquez said.

They donate food or money if it is needed for emergency situations.

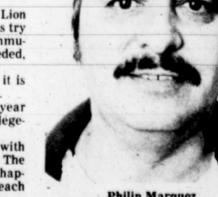

The Lions also give \$2,000 each year in scholarships to Midland's collegebound students.

They support these activities with two major fund-raising events. The fiesta is an annual September happening, and the taco sale is held each April.

Several other smaller projects throughout the year also add to the Lions' ability to "do our share of community service," Marquez noted. Other officers for this year include

Exhibit hall to change face of Midland's downtown area

By LINDA HILL R-T Staff Writer

its

The face of downtown Midland is in for a big change this year, as construction swings into full speed on the downtown exhibit half

The exhibit hall has been a goal of Midland planners for years and was approved by Midland voters in a Decemreality. ber 1976 bond election.

When finished, the structure should dramatically increase the size convention and meeting the city can accommodate, as well as provide a place for community activities and meetings. Actual construction

didn't begin until Decem-November, the low bid of ber of this year. Final \$1,102,000 was well below have five meeting Chamber of Commerce exterior plans are still the architect's estimate awaiting City Council apof \$1.25 million. proval, while planners Area Builders is conalso examine possibilistructing the facility.

feet. A storage area and room for expansion also are planned.

The massive structure will be bounded by Wall and Texas avenues and The completed facility Main and Lorraine streets.

> Architects have said the hall primarily is "designed for people," with its size precluding use of the structure for shows involving large pieces of equipment.

Current planning is for tract of land downtown

The basement will aged by the Midland rooms, ranging in size under contract with the from 325 to 1,300 square City Council. The chamber has leased land from the city and plans to construct a new building adjacent to the structure.

> To provide parking for the facility, one possibility is an underground parking garage. That facility would be built under land on which the old post office was locat-

ed, which has been dedicated as a park. The City Council also

has been negotiating for purchase of an adjoining

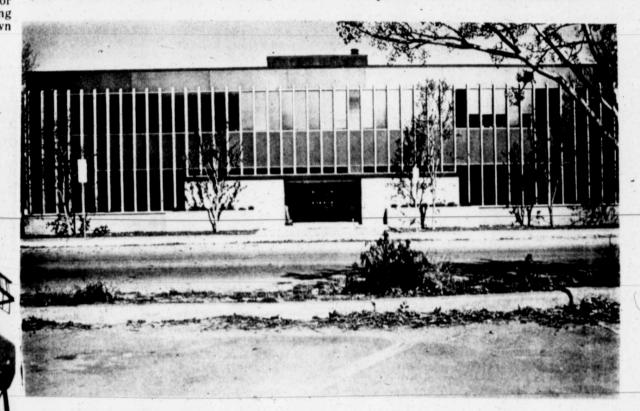

the building to be man- for parking spaces.

Jack Blake, an independent oil and gas operator, added to the list of buildings in

Midland last year when he completed his headquarters office at 400 N. Main St.

The O'Neill Building, housing the headquarters of independent oil operators Joseph I. O'Neill Jr. and Joseph I. O'Neill III, is only one of several buildings erected by independents in the downtown area. (Staff Photo)

New fares

reported DALLAS - Continen-

tal Airlines has filed with the Civil Aeronautics Board two new promotional fares to be effective during February

and March. The first filing provides for one child between the ages of 2 and 11 to travel free when ac companied by a farepaying passenger.

The reservations must be completed 14 days prior to departure.

The second filing permits a second passenger to ride at 20 percent of the round trip fare when accompanied by a passenger paying full round trip fare.

Scenes such as these two homes under construction in Midland were the rule rather than the exception throughout the Tall City during 1978. These two are in northwest

Midland, however, almost all areas of the city were busy with building activity throughout the year. (Staff Photo)

INC.

MIDLAND, TEX

Advanced fluid offered HOUSTON-IMCO Services a divi-

sion of Halliburton Co., announced its improved IMCO Ken Systems, offering a significant advancement in oil-base drilling fluids. The advanced systems replace the basic invert, IMCO KEN-X, that IMCO's customers have successfully used for years. Drilling fluids (mud) are highly complex liquids that are circulated through the wellbore during drilling operateions. They are essential in rotary drilling operations to carrry out cuttings and contain formation

pressures IMCO Ken Systems were developed by IMCO's research and development people. Based on experience and lab research, the systems were improved to meet a variety of different drilling conditions, to offer customers greater flexibility than is normally possible with oil-base muds, and to help reduce costly rig delays.

IMCO Ken Systems consists of three systems:

IMCO Kenol-S -- the top of the line high-tempeerature invert specially designed to help handle severe well problems. The Kenol-S System provides increased versatility by mixing quickly, accepting numerous weighting materials, blending well with other systems, and it can be stored easily for reuse on subsequent wells.

IMCO Kenol-Rx -- a modified fluid for improved penetrations rate. The Rx System is designed for faster drilling rate exhibiting higher fluid loss, lower viscosity and minimum solids content, than is possible with normal oil-mud systems.

IMCO Kenol-LT -- an economical system used when an oil mud is advantageous, but when extreme temperature is not encountered and high mud weight is not required.

The Ken Systems have been suc-cessfully used offshore and onland in the Gulf and West Coast areas, and onland in Oklahoma and the Rocky Mountain areas.

IMCO Services, headquartered in Houston, is an international supplier of drilling fluids products and related services to the petroleum and natural gas drilling industry.

Firm employs 100 persons

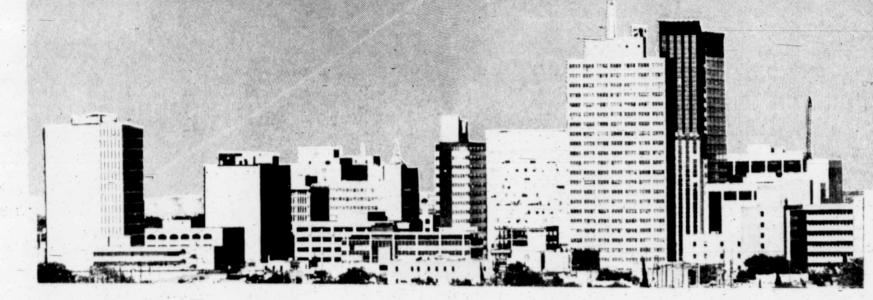

Gene Sledge Drilling Corp., one of the Tall City's many oil and gas field drilling contractors, has been in business in the Permian Basin five vears.

The firm, owned by Gene Sledge, is headquartered at 105 Wilco Building. Approximately 100 persons make up the company's work force.

Symbols of Vitality, Viability

The UPward Thrust

of Midland's ever-expanding skyline is distinctly symbolic of the area's economic vigor. As this profile of brick and steel continues to rise

- Bank deposits are at an all-time high
- Employment figures are up
- Retail and gross sales are up
- All standard indices are up

Beyond the commercial and financial indicators, it is comforting to know that intrinsic, human and spiritual values have been kept in focus, with advancement of the arts, music, theatre, education, religion, recreation, and humanitarian goals. Through the years, as the skyline symbol has risen from single story or "walk-up" to "Tall City" image, The Reporter-Telegram has recorded the story for you. And as the empire was built, The Reporter-Telegram made its own contribution to this growth, not only in editorial support of every sound move forward, but also in financial help as well as the time, talent, energies, creativity and interest of publishers and staff. More than an instituiton, The Reporter-Telegram is PEOPLE OF THIS COMMUNITY, serving side by side with others interested in Midland as a place

It is gratifying to be able to report to you that The Reporter-Telegram has kept pace with Midland's UPward thrust in circulation growth as well as in the areas of news and editorial responsibilities. The chart above presents the facts. We think a newspaper must keep faith with its readers, in every respect, to gain and hold a position of leadership in its market, because it is the readers that determine any newspaper's acceptance. The Reporter-Telegram today is planning, investing, equipping and staffing to provide its readers with a continuously improved product. Whatever your age or interest, it is our intention to give you a newspaper that will help you cope with the needs, the demands, the challenges and changes to come in the months and years ahead. Our very existence depends upon how well we serve you and satisfy you.

Presbyterian Church moved to city of Midland before 1900

R-T Staff Writer

Midland has had a Presbyterian Church for has been a Midland services as well, County.

In fact, Midland County had been in official existence only a few months when the Presbytery of Dallas, on Oct. 19, 1885, appointed the Rev. O. F. Rogers, the Rev. E. P. Palmer, Dr. P. C. Coleman and J. C. Peoples as a committee "to organize churches at Midland and Big Spring and anywhere in the region adjacent to these, if the way be clear."

Methodists in the city had already organized a church here, in August of 1885, and Midland's Baptists were laying the groundwork for the formation of their own church in early 1886. The Presbyterian Church came in between these two, in the closing days of 1885.

a

Rogers was at the time pastor of the Colorado City Presbyterian Church and Dr. Coleman was ruling elder there. Palmer was pastor of the Abilene Presbyterian 1897 Church and Peoples was

a resident of Midland. In keeping with Presbytery of Dallas' directive, the commitee organized the Midland church Dec. 22, 1885, with Peoples, J. C. Kerr and Lee Thompson³as elders; J.C. Shear and Henry Peoples as deacons and Mrs. S.N. Peoples, Mrs. M. E. Thompson, Dr. Peoples and Mrs. M.E. Peoples as additional members.

The Rev. O.F. Rogers came to Midland almost every month to hold services here. After he moved from the area, the Rev. W.N. Dickey and others held services in the town. In those early years, a visiting minister often would hold services on several consecutive tery for 1900 show that days.

After organizing in the early part of 1886, Midland's Baptist congregation erected the first in May, 1900. The edifice

BY ROGER SOUTHALL That congregation held Midland congregation, was held in July, 1949. services usually twice with modifications and monthly, and generously renovations, until the Presbyterian's existing loaned the building to mid-1930s when the first facilities were taxed by almost as long as there other denominations for unit of the present increasing membership

> The first and only resident pastor the Presbyterians had in the early years was the Rev. H.M. Smith who moved here in 1890. When he came, the congregation numbered only seven members, none of them charter members. Times grew harder in

the final years of the 19th Viser, the Rev. O.H.

The Presbyterian Church came to Midland in 1885, just after the Methodist Church and just before the Baptist Church.

Century - the area suffered a severe drouth for number of years, and one by one the church Willis, the Rev. B.K. members moved away. Tenney, the Rev. Ted Finally, by 1896 only two Holifield, the Rev. members remained, and Grover Bidwell, the Rev. the Fort Worth Presby-J.W. Allen, the Rev. T.D. tery, which by then had Murphy, the Rev. W. J. assumed administration Coleman (whose minof Fresbyterian istry from 1931 to 1941 churches in this sector of was one of the longest tenures in the history of West Texas, ordered the Midland church disthe Midland church), the solved in the spring of Rev. Hubert Hopper and Dr. R. Matthew Lynn,

Within a few more whose 25-year-ministry years, however, the here (1947 to 1972) is the drouth was over, the longest for any church in town was growing and Midland.

Dr. Robert Boynton the time seemed right for the reorganization of Smith in the fall of 1972 the Midland church. The succeeded Dr. Lynn as leaders, including Mr. and Mrs. W.D. Watts, senior minister of the congregation. Other Postmaster C.P. Fuller present members of the and F.H. Burney, chose a FPC pastoral staff insite at West-Wall and Big clude Dr. F. rian Church, now disbanded, was the second Presbyterian unit in Midland. The Rev. Lewis Waterstreet came to First Presbyterian as assistant pastor, with one of his duties to be the organization of a new church.

St. Andrews was organized in October, 1950 and he became its first pastor. The church facilities were at Terrell and Jax streets.

The formation of St. Andrews Church in north Midland took some of the pressure off FPC, but not for long. By early 1952, another Presbyterian unit, this one in fastgrowing west Midland. was urgently needed. Westminster Presbyterian Church on West Louisiana avenue was the result. The Rev. Flynn V. Long Jr., became its first

(Continued on 15EE)

OUR HISTORY

The First United Methodist Church in Midland was organized August 23, 1885. It was the first church organized in Midland.

The first building was a frame structure erected in 1889 in the 100 block of North Main The second structure that housed the congregation was a red brick building located at the corner of Main and Illinois. The cornerstone was laid on Thanksgiving Day, November 28, 1907. (One of the memorial windows that was placed in that building is now in the Glass Memorial Chapel as a memorial.

The third sanctuary structure that served the congregation was completed and dedicated May 2, 1943. This structure was of mission-style. Portions remaining are the Scharbauer Education and the Fellowship hall wings.

In the early 1950's one portion of the educational buildings was erected. The other section, the area related to the offices and library, was completed in 1960.

The present sanctuary, parlor and classrooms were completed for the official open house on May 5, 1968. The 90th Anniversary Celebration was observed August 24, 1975.

The Glass Memorial Chapel was completed and the first service conducted in it February 29 1976.

All church properties were dedicated May 28, 1978.

DEAR MIDLAND

int.

As we are in our fourth year in Midland, we reflect with the kindest thoughts of the hundreds of friends and business associations we have gained.

We again express our deepest appreciation for all the wonderful things that have happened to us since our move here. And we look forward with great hopes to an even better 1979.

Once again we wish to say.....

THANKS MIDLAND.

Permian Basin operators find 345 fields

Permian Basin Empire oil and gas operators enjoyed another banner year in 1978, completing 345 discoveries in West Texas and Southeast New Mexico.

With the nation demanding more and more gas and oil to run its industries, heat its homes and run its automobiles the depletion rate in the country's oil and gas reservoirs continued to increase at an alarming pace.

With predictions being made on all fronts that the domestic oil supply can't last much more than 20 years at the present rates of discovery and consumption, the nation's oil and gas operators stepped up their quest for new supplies.

Drilling in the nation and the Permian Basin reached its highest level in 21 years in 1978.

Throughout the year, the weekly survey of drilling activity conducted by Reed Drilling Equipment, Divison of Reed Tool Co., averaged 285 rotary units in operation. Add the uncounted cable tool rigs and workover units in the hunt for oil and the weekly average climbs to the 300 mark.

The stepped up drilling accounted for 180 oil discoveries and 165 gas discoveries in the Permian Basin.

Eddy County, N. M., was the champion in new discoveries with 43, with an amazing 36 of that total being gas discoveries, the most talked about commodity in the petroleum indus-

try. On the Texas side, Runnels County was the top discovery area with its 18 oil strikes and 12 new gas pools.

The West Texas portion of the Permian Basin includes all are parts of five of the Railroad Commission of Texas' regulatory districts.

District 7-C, with headquarters in San Angelo, handled more completion reports than any of the other district. That area was the scene of 122 discoveries, 63 for oil and 59 for gas.

Following Runnels County in 7-C was Crockett with 23 discoveries, 10 for oil and 13 for gas. Schleichder county reported 10 new gas pools and eight new oil pools.

District 8, with its headquarters in Midland, reported 83 discoveries with the number of gas discoveries edging the oil strikes 42 to 41.

The top discovery area in District 8 was Pecos with 23. Reeves County was next with 15. Fifteen of Pecos's new fields were opened to gas produc-tion and 11 of the new pools in Reeves produce as gas reservoirs.

Only two discoveries, both for oil, were completed in Midland County in 1978, and only three oil discoveries were drilled in Ector County, one of the states top oil producing areas.

In District 8-A, headquartered in Lubbock, the top areas were Garza with eight oil strikes and two gas openers, and Scurry County with its

seven new oil pools and one gas field.

The three Permian Basin counties in District 7-B, Stonewall, Fisher and Nolan, were the scene of 17 discoveries, all for oil production.

In Southeast New Mexico, operators completed 16 discoveries in Lea County, six in Chaves and one in Roosevelt to go with Eddy's 43 for a total of 68. Forty-six were gas strikes

Gulf Oil Corp. was the No. 1 discovery operator in the Basin in 1978 with 11 discoveries. Amoco Production Co. was second with nine, and two independent operators, HNG Oil Co., operating from Midland, and Yates Petroleum Co. tied for third with eight each.

A Midland-headquartered independent, Gifford, Mitchell and Wisenbaker, was successful with six of its wildcat operations. Petroleum Development Corp. of Albuquerque, N. M., matched that number.

The new 1978 Permian Basin fields were completed from many different depths and formations. Some were good wells and some were marginal at best.

The most prolific gas discovery completed during the year was Monsanto Co.'s No. 1 Rogers, five and one half miles north of Pyote in' Ward County

The strike, which opened the Rogers (Ellenburger) pool, was completed for a calculated, absolute open flow potential of 85,000,000 cubic feet of gas per day.

One of the deepest wells completed in the Basin during the year, it was finaled through perforations in casing from 18,290 to 18,574 feet. The total depth is 19,190 feet. Gifford, Mitchell & Wisenbaker

completed the deepest discovery in 1978 in the Delaware Basin at its No. 1 Roman Nose 16 miles northwest of Kermit in Winkler County. From the Ellenburger at 21,865-22,909 feet, the strike potentialed for a calculated, absolute open flow of 33.5 million cubic feet of gas per day.

It also was completed as a discovery from the Atoka, through perfortion from 14,660 to 14,681 feet, for a calculated, absolute open flow potential of 21,800,000 cubic feet per day. Its combined potential of 55,300,000 cubic feet of gas per day makes it the second most prolific gas discovery completed last year in the Basin.

The Railroad Commission of Texas designated the No. 1 Roman Nose the discovery well of the Cheyenne (Ellenburger and Atoka) field

The second deepest strike in 1978 was Gulf No. 1 Emma Lou, a Bend discovery in Pecos County 21 miles southeast of Fort Stockton. It completed through perforations from 22,-156 to 22,1196 feet for a calculated absolute open flow potential of 8,800,-000 cubic feet of gas per day. It opened the Puckett, West (Bend) pool

Gifford, Mitchell & Wisenbaker joined Joseph I. O'Neill Jr. in completing 1978's third deepest discovery. It is the No. 1 Raymal-Eagle which opened the Gomez, North (Devonian field when it completed for a calculated, absolute open flow potential of 15,100,000 cubic feet of gas per day through perforations from 18,900 to 19,053 feet.

Three other discoveries were completed below 17,000 feet. They are Kimbell Production Co. of Houston No. 1-27 O'Hanlon, American Trading & Producion Co. of Midland No. 1-1 Adam Estate, and HNG Oil Co. No.

1-12 Sabine-State

Kimble opened the Rojo Caballos, West (Atoka) field at 17,320-17,330 feet. The potential was 5,050,000 cubic feet of gas per day. It is 12 miles southwest of Coyonosa in Pecos Coun-

American Trading finaled its No. 1-1 Adam Estate in Reeves County from 17,208 to 17,234 feet for a calculated, absolute open flow potential of 12,100,000 cubic feet of gas per day. It is 13 miles north of Pecos.

HNG No. 1-12 Sabine-State finaled for a calculated open flow potential of 14,000 cubic feet of gas per day through perforations from 17,068 to 17,088 feet. It is 20 miles northwest of Pecos in Reeves County and opened the Aylesworth (Pennsylvanian) field.

Although a great amount of emphasis was placed on deep drilling in the Permian Basin in 1978, many of the discoveries were completed from shallow zones. One hundred and fiftytwo of the new 345 new fields were discovered below the 6,000-foot level. At 1,000-foot intervals those completions were, with depth figured to the top of the producing zone: below 2,000 feet, 18; between 2,000 and 3,000, 25; between 3,000 and 4,000, 42; between 4,000 and 5,000, 42, and between 5,000 and 6,000, 25.

Twenty-seven strikes were completed between 6,000 and 7,000 feet and 29 were completed in the 7,000- to 8,000-foot zone. Another 31 discoveries were potential from 8,000 to 9,000 feet.

The interval from 9,000 to 10,000 feet accounted for 25 new fields and 18 were found in pays between 10,000 and 11,000 feet.

Two discoveries were hit between 11,000 and 12,000 feet, while 10 were completed between 12,000 and 13,000 feet.

Operators found hydrocarbons in three tests between 13,000 and 14,000 feet. The zones between 14,000 and 15,000 feet gave up discovery production six times.

From 15,000 to 16,000 feet, operators opened four fields. Only one strike was finaled between 16,000 and 17,000 feet.

The number of discoveries by Railroad Commission district and counties in the Permian Basin:

-District 1 (3 gas), Edwards, 1 gas. Val Verde, 1 gas.

-District 7-B (17 oil), Fisher, 9 oil; Nolan, 3 oil; Stonewall, 5 oil.

-District 7-C (63 oil, 59 gas), Coke, 3 oil; Concho, 3 oil, 5 gas; Crockett, 10 oil, 13 gas; Irion, 4 oil, 8 gas; McCul-loch, 2 oil, one gas; Menard, 1 oil; Runnels, 18 oil, 12 gas; Schleicher, 8 oil, 10 gas; Sutton, 2 oil, 3 gas; Terrell, 1 oil, one gas; Tom Green, 5 oil, 4 gas; Upton 7 oil, 1 gas.

-District 8 (41 oil, 42 gas), An-(Continued on Page 8FF)

Charter members still active in Lions Club

By BRUCE PARTAIN R-T News Staff

Almost half of the charter members of the Tall City Lions Club still participate in the Midland service organiza-

Organized in November of 1971 at a meeting of Shell Oil Co. employees, the club boasts 28 members. It is active group of people.

In July, the Tall City Lions hold their main fundraising barbecue at the Lions Den, 504 S. Stonewall. A similar mouth-watering event is puton by members at Hogan park during the August Slo-Pitch softball tourna-

William Merritt III

ment. Other fundraising projects include Holloween candy sales, eyeglass collection for needy persons, cleaning up alleys and vacant lots, and fixing up homes of elderly citizens.

Every other month, the Tall City group sponsors record hops for teenagers at their meeting place, The Lions Den.

And a madcap event, the annual 'Shopping Spree," is held in October. A local citizen is given three minutes of wild, all-you-can-grab-for-free shopping in a Midland supermarket. Each member contributes a minimun of \$10 per year to the Texas Lions' Camp for Crippled Children in Kerrville.

In the past, members have donated blood through Midland Memorial Hospital:

The club participates in the Lions International eye bank and sets aside a percentage of money to help victims of overseas disasters.

Officers of the club are William Merritt III, president; John Cooper, vice president; Willie Holloway, second vice president; Alvin Smith, third vice president; Roosevelt Campbell, secretary; Bennie Harrison, treasurer; Joe Cookes Jr., Tailtwister and Ellis Littlejohn, lion tamer.

Directors of the club include all officers plus Leonard Johnson, Harold Jones and Earl Booker.

The Tall City Lions meet the first and third Thursdays of each month at 7 p.m. in the Lions Den, 504 S. Stonewall St

Construction work is nearing completion at the Texas National Bank of Midland, one of

the Tall City's newest financial institutions. When completed, it will be the city's fifth

bank. It is being built on North Garfield Street north of Midland College. (Staff Photo)

Four Optimists Clubs chartered in Tall City

The four Midland Optimists Clubs help young people. And club members do it in a variety of ways.

Tall City Optimist Club, Evening Optimist Club, Westside Optimist Club and Midland Optimist Club members all have one thing in common: service to young people in order to make the community a better place in which to live in the long run.

Tall City Optimist Club officers include President Don Huxman, Secretary Poppy Westbrook, Vice Presidents Kelly Jacobson and Bob Evans. Their source of funds is an annual Christmas tree sale.

Programs sponsored by club members include Boy Scouts, Girl Scouts, softball teams, Little League teams, Youth Appreciation Week, a Lawman of the Year Award and others. Club members meet at 6:30 p.m. each Wednesday at Sambo's Restaurant.

eld Street

Evening Optimist Club officers include president Joe Watson, vice president T. Akins, Secretary Leroy Stewart, and the fourth member of the four-member club is Harlin Michael.

Fundraising drives provide their source of revenue for activities.

Programs sponsored by club members include providing a Boys Club building, formerly a youth activities building. Members help pay the bills and work with young people in various activities there.

Members also donated funds towards traveling expenses for students to attend oratorical contests.

Westside Optimist Club officers include president Danny Storch, vice president Oland Butler and secretary-treasurer Charles Sonnenberg.

Programs sponsored by club members include a moto-cross track, bicycle moto-cross track, Tri-Star-basketball, oratorical contest, Youth Appreciation Week, Miss American Softball team: YMCA Youth Football team, Respect for Law program and bicycle safety project.

Fundraising is done through a sports show and flea market.

"Optimists are a group of men who are interested in helping youth, thereby improving their communities," said Storch

Members meet at noon each Wednesday in the Granada Club.

Midland Optimist Club officers include President Ernie Webb, Vice President John Glennan and Secre-

tary-Treasurer Marvin Nash. Funds for activities of this club are raised by a Christmas tree sale plus

Programs sponsored by this club include Little League teams; punt, pass and kick competition; Youth Appreciation Week; Youth of the Month; contributions for youngsters to attend summer camp; softball teams; Boy Scout Troop 211; Youth for Understanding Exchange program, and soccer teams.

"Our club is a friend of youth." said a member. "If we can help any group of kids, we want to know about

Members meet at noon on Tuesday at Conner's Banquet Room.

'Serving the youth of the community is our primary objective," said **Optimists** lieutenant governor Danny Meador of Midland.

Presidents of the four Optimist International Clubs in Midland are, from top left, Don Huxman of the Tall City Club and Danny Storch of the Westside

Club. From left front are Joe Watson of the Evening Club and Ernie Webb of the Midland Club. (Staff Photo)

Morning Lions Club meets early each week

By BRIAN HENDERSHOT R-T News Staff

They are much like other Lions clubs in Midland or anywhere else. They pledge allegiance to the flag, believe in God and country and respect the Lion motto, "We Serve."

What sets the Morning Lions Club apart from other Midland Lions clubs is their meeting time.

"We used to meet at 6: 45 a.m., but had to change it to a quarter of seven because that just sounded too early," joked Leo Merriman, past president and club member since 1968

According to club president A.E. Smith, a 20-year member, morning meetings are handy.

"Work schedules can conflict with noon meetings," he noted.

"We wanted to merge with the West Side club but they like their evening meetings as much as we like our morning meetings," Smith said.

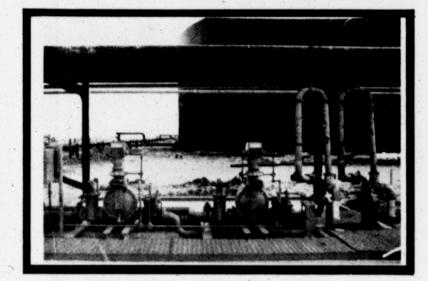

Both clubs are small. The morning club has only 11 members (at the time of this writing).

Members agree that they would like to be a larger club so they could accomplish more.

Small in number but big in heart, this group of gents would make anyone feel welcome to their monthly Tuesday meetings at Green's Restaurant in the Commercial Bank Tower. Breakfast is ordered, club business is completed and the conversation to current events the economy, politics or whatever interest the lot of them. It's a very congenial and informal atmosphere. Revenue for the club comes mainly from its annual light bulb sale. Members go door-to-door, earning 30 percent profit on each sale. The money helps support Lion-ac-

A. E. Smith

tioned projects such as;

-Eye glasses for needy children, a project in which the Lions and city nurses indentify students who need glasses and would otherwise not get them.

-The Texas Lions Camp for Crippled Children, a no-charge facility in

Kerrville. Even transportation to the camp, which doubles as a school for the blind during winter months, is provided.

Officers of the club are A.E. Smith, president; Leo Merriman, membership chairman; Frank Harlan, treasurer-secretary; J.B. Waid, vice president; Bill Pirdy, tail-twister and Leonard Hanson, eye bank chairman.

Early risers interested in joining the club sould contact Leo Merriman

B&W, Inc., serves oil from office in Midland

B&W, Inc., a well completion company, has a location in Midland on Country Road 125 West.

The firm is headquartered in Torrence, Calif., and Houston

In addition to its well completion services, the firm sells scratchers, centralizers, float equipment and liner hangers.

The company has been in business 39 years, with five years of operations in Midland. The five employees here call on all major and independent oil producers in the Permian Basin.

Chuck Potts joined B&W as the Permian Basin region general manager last November. He formerly was general manager of Ruff Cote and Centralizer Division of OPI, Inc. He attended Texas Tech University and West Texas State University. He is a member of the American Petroleum Institute and the American Institute of Mining and Metallurgical Engineers

B&W was founded in 1939 by Bruce Barkis and Kenneth A. Wright to manufacture a wall-cleaning guide (scratcher).

Wright's invention was the first of several that soon established B&W as a leader in the engineering and manufacture of high quality tools needed for well completions. Now, B&W is a worldwide firm supplying tools and services from more than 80 locations

Strides in primary cementing have been made with B&W's Full-Circulation Rotating Liner Hanger. Rotation is continuous during cementing to ensure successful bonding the first time and to virtually eliminate costly remedial squeeze jobs.

ind TUR-

SERVICE

NG and

S COM-

B&W's experience on thousands of successful cement jobs has led to manufacture of the industry's widest selection of centralizers, scratchers, stop devices, and packer-type cement baskets; a full range of casing and liner cementing equipment, complete gravel packing systems, and more. B&W's list includes more than 75 different standard models of shoes, dollars and invert valves and a family of liner hangers, packers and accessdries to accomodate any completion. Major surface equipment includes gravel packing injectors, pipe cleaners, casing and tubing swivels and precision pipe perforators.

The firm's news engineering development is the "Vibra-Pak" Gravel Packing Method that uses the B&W Rotary Compactor Vibrator to provide the highest density downhole gravel packs commercially avail-

Chuck Potts

able B&W clients range from small independents to the largest multi-national majors, with services tailored to the specific needs of the individual customer.

The company's representatives are available to help with orders and to help the customer get the right tools and service.

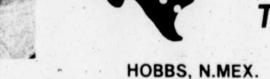

Jet routes get okay

DALLAS - The Civil Aeronautics Board last week granted Braniff International new non-stop jet routes to Frankfurt, West Germany, from both the Dallas-Fort Worth and Boston gateways, the airline announced.

Braniff last month was granted non-stop routes from both Dallas-Fort Worth and Boston to Paris, Amsterdam and Brussels.

THE MIDLAND REPORTER-TELEGRAM, SUN., JAN. 21, 1979

The record since 1887:

Strong long-term growth in oil and gas production

The graph shows Marathon's daily average North American net production of liquid hydrocarbons, plus natural gas volumes expressed in barrels of crude oil on the basis of equivalent energy content.

1887 1900 1910 1920 1930 1940 1950

Nine decades of progress are reflected in the steady upward trend of Marathon's North American production. Over the years, we have expanded aggressively into new areas, conducted many successful exploratory and development programs, and acquired carefully selected producing properties to strengthen our position in domestic oil and gas.

An essential element in our progress is our dedication to constant improvement in the complex skills of reservoir management—the application of advanced technology and sound business concepts to the art of oil and gas production. Through these efforts, in many fields across the continent, we have enhanced current production rates and added significantly to the volume of recoverable reserves.

Pioneer celebration set for Midland in October

Permian Basin Petroleum pioneers can now register for the October 1979 celebration which will be held in Midland

The Midland Chamber of Commerce is taking the registrations. The only requirement for persons to be a pioneer is that they must have been associated with the oil industry or one of its allied industries in the Permian Basin at least 30 years before Oct. 1. The biennial Permian Basin Petro-

leum Pioneers Celebration was originated in Midland in 1959. The celebration is held on alternate

years with the Permian Basin Oil Show, and upwards of 700 persons have attended the celebration.

The late Gen. Ernest O. Thompson, who at the time was chairman and senior member of the Railroad Commission of Texas, was the principle speaker at that first celebration.

A group of Midland pioneers were the first hosts of the one-day initial celebration. They were George T. Abell, Harry Adams, Glenn A. Black, R. S. Brennand Jr., P. F. Brid-

gewater, C. P. Bristol, Paul L. Davis, Gerald FitzGerald, Fred H. Fuhrman, N. B. Garner, R. T. German and J. P. "Bum" Gibbons And, Morgan Gist, O. C. Harper, A. N. Hendrickson, Fred T: Hogan, Wallace W. Irwin, Sol Kelly, Ralph Lowe, Hal C. Peck, John V. Terrill, R. C.

Tucker, Fred Turner Jr. W. A. Yeager and R. L. York. In 1959, the designation of Permian

Basin Petroleum Pioneer was given to any person-man or woman-who worked at any job connected with the exploration, development, production, transportation or precessing phases of the oil industry in the Permian Basin Empire prior to Oct. 1,

driller.

Each year, new persons become pioneers by virtue of having been associated with the Permian Basin petroleum industry 30 years.

The Permian Basin is defined as that part of West Texas and Southeast New Mexico south of the north lines of Chaves and Roosevelt counties in New Mexico and of Bailey, Lamb, Hale, Floyd, Motely and Cottle counties in Texas, and west of the east lines of Cottle, King, Stonewall, Fisher, Nolan, Coke, Tom Green, Schleicher, Sutton and Val Verde counties

That area extends to the Rio Grande, from Del Rio to El Paso, and then north along the west lines of Eddy and Chaves.

Ford Chapman pioneer of Basin oil industry

Ford Chapman of Midland, one of the pioneers of the Permian Basin oil industry, is the owner of Ford Chapman Drilling & Production Co.

Headquarters for the firm are at 1100 Vaughn Building. The firm features cable tool drilling and is engaged in the production of oil and gas.

The company is active in the vast Permian Basin area of West Texas and southeast New Mexico and in South Texas.

Chapman has been associated with the oil industry 52 years. His company employs 18 persons who receive an annual payroll of more than \$250,000. Chapman is active in the YMCA,

Southside Lions Club boasts 58 members

The Southside Lions Club, with 58 children's camp, a four-week seminar members, is an orginization that keeps itself busy throughout the year by raising money and supporting several projects that aid the handicapped, club president David L. Norton said.

Norton said the Southside Lions Club raises money and contributes to the Crippled Children's Camp in Kerrville, a facility whose main purpose is to help handicapped or disabled children feel more independent by doing more things on their own.

"And it's completely free" to the campers, he added.

He said that the club has had a 100 percent contribution record to the camp for the last 15 years. Each Southside Lions Club member donates \$10 a year to the camp.

Norton said that after the crippled

to better aquaint young diabetics with their condition and how to best deal with it is then held at the camp. Norton pointed out the camp is a

year-round facility because "in the winter time this is a rehabilitation camp for the blind."

Another project that the club has taken on is the sponsoring of Boy Scout Troop No. 108.

"We try to go camping once a month," he said.

One Lions Club project that most are familiar with is the eye donor program, whereby a person agrees to donate their corneas upon his death to be transplanted into those who are blind.

Norton told of a story of a person who had conated his eyes to another, and the corneas were later trans-

Midland Kiwanis Club has projects for youth

By ED TODD **R-T STAFF WRITER**

"Right Start; The Formative Years" is the Midland (Downtown) Kiwanis Club's main service-to-youth project for the year.

The "Right Start" project has been adopted by Kiwanis Internationalclubs worldwide as their "major emphasis program" for the year and focuses on school children ages 6 through 12.

The program is directed toward "influencing the habits, attitudes, personalities, characters, and aspirations of young children," stated a Kiwanis pamphlet.

Right Start's primary goal "to involve children in activities designed to reinforce the family's vital role in society by instilling into them attitudes of honesty, industry, coopertion, responsibility, respect for the rights of others, and desire for excellence."

Other projects sponsored by the 50-member club include:

-Sponsorship of Boy Scouts of America Troop No. 151.

-Sponsorship of a sophomore league baseball team.

-Recognizing the Rookie (Policeman) of the year at the club's annual banquet.

-Naming of the Outstanding Teacher of the Year each at Midland and Lee **High schools**

-Carrying out a "safeguard Agains Crimes" emphasis program. -Sponsoring a Key Club for high school boys.

-Lighting up the nigh sky on July Fourth in a spectacular display of fireworks.

-Holding a July Fourth "occurrence" for children of all ages.

-Helping out in the Christmas-in-April project by fixing up a house, in a state of disrepair, lived in by a "finan-

cially stressed" family -Investing at least \$10,000 in playground equipment for an in-planning

Kiwanis Park in northwest Midland. The Kiwanis Club members' objective is to be a true "Friend of Youth.

"We work with them (youth) to em-

phasis their role in society by instilling in them the attitudes of honesty, industry, cooperation, responsibility and the respects for the rights of others," said Howard Mills, secretrytreasure of the Midland Kiwanis Club.

The club, which was established in 1946 meets at noon each Monday in the Midland Hilton.

Club officers for 1978-79 are Robert Lampkin, president; Gene Bartus, president-elect; Morrison Brown, first vice president; Bob Jemison, second vice president, and Howaqrd Mills, secretary-treasurer.

Conference scheduled

DALLAS - Plans for the second European Offshore Petroleum Conference and Exhibition, to be staged in the United Kingdom in the autumn of 1980, have been announced by the Society of Petroleum Engineers (U.K.).

Registration for the first EUROPEC held last October at Earls Court in London topped the 15,300 mark. A 100-paper technical program and an exhibition of 13,000 net square meters were features of the 1978 EUROPEC.

The statement announcing plans forthe 1980 event was issued by D. P. J. Holbrook, with Gaffney, Cline, and Associates. Holbrook stated that the sponsors of the 1978 - The Institution of Civil Engineers, the Institution of Mechanical Engineers. The Institution of Electrical Engineers, The Institute of Petroleum, and the Society of Petroleum Engineers had provisionally agreed to sponsor the 1980 event.

Holbrook said negotiations were under way to set the date and site for the 1980 EUROPEC. An announcement on the date and site for the meeting is anticipated by February.

An interim secretariat has been established in London to coordinate plans for the 1980 event

SUPPORTING PROGRESS **OF MIDLAND AND** THE PERMIAN BASIN

We are happy to belong to a region that has contributed so much to the dramatic story of the growing west. The changes that have taken place..in the name of progress...have been startling to say the least. We are pleased to take our place as one of the growing industries providing jobs for local citizens and making every effort to increase the economic development of our home community.

Downtown Lions 3rd largest club in state

By MARK VOGLER R-T Staff Writer

The Downtown Lions Club of Midland, the third largest Lions organization int Texas and ninth largest in the world, spreads about \$20,000 worth of good will around each year, according to President George Weis.

The club has been in existence since 1928 and celebrated its 50th anniversary last spring.

Weis said the club generates its civic activities funds strictly through gumball machines posted throughout the city and its annual pancake jamboree in March which 'fed hungry

George Weis

jacks to more than 8,800 persons last year. Organizations and major programs

receiving funding from the Downtown Lions include the Crippled Children Camp in Kerrville, Lion's International Foundation, site conservation, scholarships for students graduating from Midland High School and Lee High School, Boy Scouts of America, foreign exchange student program, West Texas Boys Ranch, Casa de Amigos and Associated Citizen. The club has also helped to fund new additions to Garrett Brown Park.

More than 3,000 members belong to Downtown Lions. Membership is by invitation only. The club meets every Wednesday at noon in The Midland Hilton.

"We have a variety of speakers, everything from a Baptist preacher to a belly dancer. We cover a wide spectrum of interests," said Weis. "My job as president of this club is

like a second job a week. I put in upwards of 20 hours a week on club activities. It's a busy organization:" The 1978-79 club officers include Weis, president; Ray Gywn, first vice president; Morris Hulsey, second vice president; Jerry Speck, third vice president; Frank Marlow, secretary-treasurer and Garland Chapman, immediate past president.

Board of director members are Paul Murray, Art Oestmann, Douglas Beck, Eddie Klatt, Keith Somerville, Al Dirnberger, Normand Gould, Larry Hunnicutt and Ab Ellis. Tom Mixon is the Lion Tamer. The

tailtwisters are Jack Darden and Hap Palmer. The Lion Sweetheart is Carol

Allen Cason stands near some of the recreational vehicles in the Billy Sims Trailer Town yard in Odessa. The firm has been in business in Odessa since 1973.

Recreational vehicles supplied by Billy Sims

Six full-time and two part-time employes are on hand at Billy Sims Trailor Town in Odessa to handle the trailer needs of Permian Basin residents.

The business, which sells and service recreational vehicles, was founded six years ago and now has a payroll of \$82,000 annually.

The firm sells travel trailors, mini motor homes, pick up shells and foldout camping trailers, in addition to parts and supplies for each.

Billy Sims Trailer Town has the expertise to service Terry, Tauras, Nomad, Twilight Bungalo Travel Trailors, the Cruisemaster and Mobile Traveler mini motors, plus Rockwood foldout campers.

The business opens daily at 7 a.m. Principal cities served by the business include Midland, Odessa, Alpine, Andrews, Seminole, Kermit, Fort Stockton, Big Spring and Pecos.

The firm is owned by Allen Cason and Billy Sims.

Cason is on the land, air and sea division board of the Permian Basn Fair & Exposition

Billy Sims Trailer Town has been listed in the Top Ten among recreational vehicle dealers five years.

Recent company expansion has included increased number of full-time servicemen and a larger area for extra units. The company also has added more sales personnel.

Cason said the firm plans to add to its lines of quality products and at the same time continue its policy of "If we can't service it-we don't sell it."

The sales department is open seven days a week and the parts and service department is open Monday through Friday

The owners of the firm believe the Permian Basin trade area is great. "The people of the Permian Basin appreciate a fair deal and a dealer who will service the product. We have made many good friends in this area because of this belief."

Billy Sims Trailer Town is located at 520 E. 2nd St. "We invite customers in the Permian Basin to call collect concerning our sales and service." Cason said.

The firm's first location was in Lubbock. The Odessa location was open for business Jan. 1, 1973, with two employees. By 1974, the firm was in the Top Ten for two brands of vehicle. It has kept in the Top Ten with the products handled each year since. State wide, Billy Sims Trailer Town has been in the Top Five.

The company is known throughout the Permian Basin for its complerte service department with personel who care about the work they do.

Allen Cason, partner-manager of the Odessa store, has been in the recreation vehicle business since 1964 when he started out in a service department.

"Our personnel not only sells and services recreation vehicles, but each has owned his own trailer, mini motor or camper and can help the customer through their own experiences," Canon said.

24 HOUR SERVICE **1509 E. BIG SPRINGS HWY. ANDREWS**

=Apache Services, Inc. A WIRE LINE SERVICE COMPANY * P. O. BOX 3347 ODESSA, TEXAS 79760 "A Company on the Move"

Apache Services, Inc. is a wireline service company that since its beginning in 1972 has had a steady growth offering a quality wireline service to its customers of the Permian Basin and surrounding area.

Apache Services specializes in multi-stage well completions where pressure control is essential. Our combined years of experience and high rate of success is instrumental in saving our customers time and money.

Services offered by Apache Services:

- ·Gammaray, neutron logging service
- Temperature logging service Conventional and select-fire perforating
 Bridge plugs and packers ·Casing and tubing cutting service

By ED TODD **R-T Staff Writer**

The Village Kiwanis Club's youth emphasis project this year is "Right Start: The Formative Years," said Jim Pilgreen, president of the 24member club.

The program focuses on youngsters ages 6 through 12 and is "aimed at involving children in activities, which will supplement the role of the family itself in teaching basic beliefs and basic values," Pilgreen said.

"The program is directed toward influencing the habits, attitudes, personalities, character and aspirations of young children," Pilgreen said. The program has been adopted by

Kiwanis clubs around the world. The community-minded club's

major emphasis last year was the Midland Cerebral Palsy Center. The club donated to the center.

which serves 60 youngsters from 10 West Texas counties.

Other club projects include: -Awarding of \$1,000 annually in scholarships to four graduating seniors in Future Farmers of America and Future Homemakers of America at Midland and Lee High schools.

-Sale of Kiwanis International ready-to-pop popcorn to raise funds for projects.

-Sponsoring of a mixed golf tournament in May.

-Programs in schools promoting crime prevention and fighting use of illicit "fun" drugs and narcotics. The Kiwanis effort is battling to make children beware of organized crime's "products," such as narcotics, gambling, fencing, prostitution and pornography.

"That basically is our song and dance," said Bill Hight, past president of the club, which is one of 7,375 **Kiwanis International clubs in 63** countries. More than 292,000 business and professional men are members of the worldwide organization.

Village Kiwanis Club meets on noon each Thursday at the Sheraton Inn in downtown Midland.

The 1978-79 club officers are Pilgreen; Dewey Baucum, first vice president; Bobby Sanders, second vice president, and James Hall, secretary-tressurer.

Club directors are Bernard McKenna, Bob Davis, Clyde Greene, Bill Lentner, Fred Hansler, Charles Priddy and Gene Thomas.

for Dowell of Canada and for Dowell Schlumberger, a 50 percent, jointly-owned company. Dowell of Canada operates from 25 locations, while Dowell Schlumberger privides service from 75 facilities in 38 countries of the world: Dowell technology is

worldwide application controls approximately 35 percent of the market demand for petroleum services. Petroleum ser-

revenue Newly developed products such as friction reducers, fluid loss additives and surfacants figure significantly in Dowell sales, 60 percent of which are derived from the sale of the chemical products applied by Dowell. Most of the approximately 1,000 chemicals which comprise Dowell's product line are manufactured by Dow.

Lion Tamers serve Midland many ways

The Lion Tamers Club, established in 1947, is a service organization open only to wives of members of the Midland Downtown Lions Club, the third largest Lions Club in the state

Currently boasting a membership of 55, the club is led by Mrs. H.W. Hugly, the president of the Lion Tamers until September 1979.

Other officers are Mrs. Stephen G. Scott, vice president; Mrs. Leland H. Franke, secretary; and Mrs. Norman Gould, treasurer.

The club raises money through garage sales at member's houses and "we will make donations of money

when we feel there is a worthwhile project," Mrs. Hugly said.

"For instance, at Christmas we always provide a meal for a needy family in the city," Mrs. Hugly added, "and recently we helped a 10-year-old here in town who was shot and paralyzed and needed money to get back home.

Club members also served as docents for visually handicapped persons at the Permian Basin Petroleum Museum, although, according to Mrs. Hugly, "there apparently has been no further call for our services. We are ready anytime the museum needs

The club also assists the Downtown Lions Club with its big fund-raiser every year, the Pancake Jamboree, held in March at the Dellwood Plaza Mall

The Lion Tamers meet the third Wednesday of each month at the Midland Woman's Club

Committee chairwomen are Mrs L.N. Garner, sunshine; Mrs. Arthur F. Oestmann, reservations; Mrs. Francis Y. Grubb, decorating; Mrs. Phil Scott, ways and means; Mrs. Lester Van Pelt Jr., membership; Mrs. Maurice G. Cole, hospitality; Mrs. Robert B. Bechtel, historian; Mrs. Victor Horn, projects; Mrs. Carl Hyde, parliamentarian and chairman of the by-law revision committee; and Mrs. W.H. "Bill" Collyns, reporter.

Westside Lions believe in community service

Westside Lions Club members believe strongly in community service and also believe in getting results.

Their record is impressive. For although they have only 32 members, they were able to provide 30 needy Midlanders with eyeglasses during a recent fund raising drive.

And since those glasses averaged \$56 a pair, the fund raising effort is one club members point to with pride, says president L. R. Shannon, who happens to be principal at Midland's Herderson Elementary School.

But perhaps the club's biggest drive is to raise funds to send handicapped children to a special camp in Kerville.

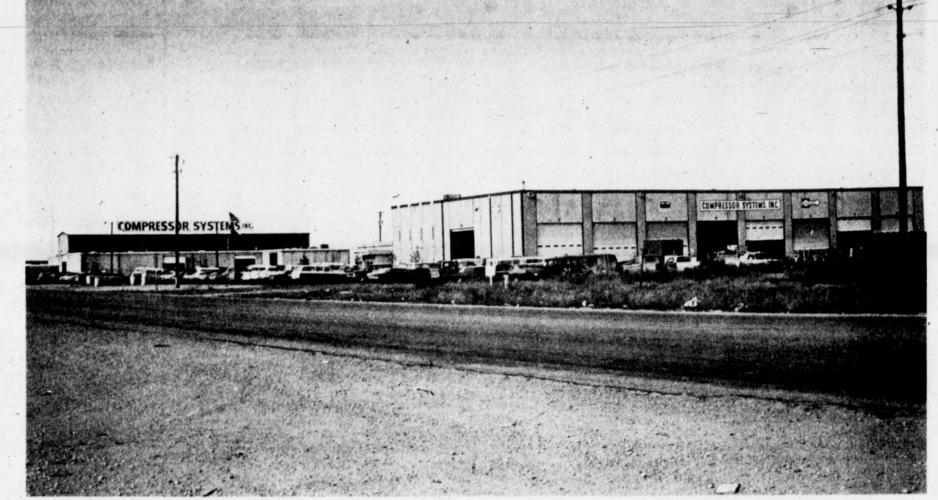

"It enables children who would otherwise be stuck at home to get out for two weeks during the summer," Shannon noted.

The Westside Lions Club has its own club-house for weekly meetings and special events located at 37131/2 Thomason Drive. The club has been around for some 25 years.

Marshall Whitmire is the first vicepresident; Tommy Miller, 2nd vicepresident; Joe Fussell, 3rd vice-president

Tommy Miller is also chairman of the building committee; Carl Pirtle is head of finance; Leroy Castleberry,

25 members chartered Rotary club in 1928

The Midland Rotary Club has enjoyed 50 years as an international community service organization in the Tall City since being chartered here April 10, 1928, when it started out with 25 members.

Among its ideals, the club bases its activities on fostering good citizenship, promoting high business and

professional standards, and working toward the advancement of international peace, understanding and good will

The club, which has a membership of 122, meets at 11:55 a.m. each Thursday in the Midland Hilton Inn. Membership is based upon classification and invitation.

The club's community service projects include two \$500 scholarships per year, Little League Baseball, High Sky Girl's Ranch and Rylay Camp among others.

W. Aly Pratt served as the club's first president. John M. Tyler and Percy F. Bridgewater are two current members who have served as past district governors.

J. Rudolph Wright is president of the club. Other officers include John R. Seay, vice president; Theodore M. Pierce, treasurer; and Russell O. Smith, secretary.

The 1978-79 board of directors are David Grimes, Richard B. Saxe, Francis A. Bitrano, Dr. Tom McIntosh, Marvin McCree and James E. Crodder

Fees are gained through membership dues.

Midland West Rotary sponsors scout troops

The Midland West Rotary Club is one of 17,828 clubs in the world belonging to the organization of Rotary International.

With its membership of 46, the club is the smallest of the city's two rotary clubs. It's also the youngest, having

been chartered in 1962 with Wade Hodges serving as president over a then membership of 46. The membership is made up of a cross-section of business and profes-

sional men. The club's community service projects include the sponsoring of two Boy Scout troops and an Exlporer post, college and nursing scholarships and three Rotary scholarships for foreign study.

At each of its weekly luncheons, the club presents a program, which is often oriented to community service. Hugh McBeach is president of the club

Other officers are Raymond Nicholas, vice president; Tom Stovall, treasurer and John Schmidt, secretary.

The 1978-79 board of directors include Bob Gersten, Kary Miller, Milton Post and Jerry Campbell.

West Midland Rotarians hold their meetings each Thursday at noon in the Best Western Motel.

The largest Rotary Club is in Houston which has a membership of 850 persons. The smallest ranges from 15to 22 members.
