Carter hopes to stay to see treaty signed

WASHINGTON (AP) - President Carter's unannounced hope is to witness the final signing of an Egyptian-Israeli treaty as the climax of his dramatic Mideast peace mission.

This historic possibility, broached Monday by both Egyptian and Israeli leaders, was reinforced by U.S. offi-

When a Carter aide, who asked not to be named, was questioned about a possible treaty signing during the trip, he replied cryptically, "We have said on several occasions we would hope to bring this (treaty search) to an early conclusion.

In Cairo, Egyptian Prime Minister Mustafa Khalil said Carter's trip

"will most likely lead to a signing." Israeli Prime Minister Menachem Begin, noting his government's acceptance of U.S. suggestions for wrapping up a treaty, told a congressional audience:

"Let us hope Egypt will sjoin the effort. Then if this happens, in a short period of time, we may have the ceremony of signing."

Khalil's analysis, in a telephone interview with The Associated Press, was pointed and upbeat: "When an American president puts down all his stakes, it is natural that it has to have a positive result."

White House press secretary Jody Powell said Carter will arrive in Cairo Thursday afternoon for talks with President Anwar Sadat and proceed to Jerusalem Saturday evening for talks with Begin.

Although Powell said there were no present plans for a three-way meeting among the leaders, the U.S. official who asked anonymity did not rule out a reconvening in the Middle East of the summit started last year at Camp David, Md.

Carter will be away from Washington at least a week, officials said, and longer if there are three-way talks or treaty signing.

Mrs. Carter, who will accompany the president, postponed for five days a trip to Massachusetts, Ohio, Missouri and California that was to have

begun March 14. Begin, before going to New York City Monday night, told reporters he will fly home Wednesday to prepare

for "the memorable visit." While expressing optimism, the Israeli prime minister noted that a Middle East peace seemed at hand several times since the Camp David talks last September.

"The world was happy and then came the disappointment," Begin

Egypt and Israel have been stalemated since November over the future of the Palestinian Arabs and other controversial issues surround-

After a series of meetings between Carter and Begin beginning last Thursday, the U.S. mediation effort appeared near collapse. But late Sunday, after their fourth session, there was a sudden reversal.

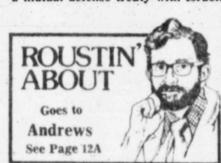

Carter gave Begin new and still-secret U.S. proposals for breaking the deadlock. They were submitted to the Israeli cabinet, which voted Monday

Begin then reported the cabinet action to Carter at a 10-minute White House meeting, which was sandwiched between two Carter-Sadat phone conversations. Powell's announcement of the presidential trip

The prime minister later met with more than 50 U.S. senators. Several senators who were present said they gained the impression one major U.S. proposal deals with assurances to Israel that Egypt would live up to peace treaty terms despite what other arrangements it might have with Arab governments.

In Jerusalem, Israeli officials who saw Carter's proposals said they involve compromises on a timetable for negotiations on Palestinian autonomy on the West Bank of the Jordan River and the Gaza Strip, and on the priority the proposed treaty might take over other Egyptian or Israeli trea-

ABC News reported from Washington that one proposal suggests the United States take over Israeli air bases in the Sinai Peninsula and sign a mutual defense treaty with Israel.

Two compromises vital to Mideast treaty hopes

JERUSALEM (AP) - President Carter's proposals to break the impasse on an Israel-Egypt peace treaty involve two compromises on the linkage issue and watered-down language in the treaty's priority clause, Israeli officials said today.

If Egypt agrees to the three changes, which Israel accepted on Monday, Carter will still face an unresolved problem on his visits to Egypt and Israel this week: the question of when the two countries exchange ambassadors after signing

the treaty. Details of Carter's ideas, which have not been made public, were given to The Associated Press by officials who saw the recommendations that were forwarded to the Cabinet by Prime Minister Menachem Begin. The officials asked not to be identified.

A major concession on Israel's part, the officials said, was in agreeing to a non-binding target date on the negotiations to set up Palestinian autonomy in the West Bank of the Jordan River and the Gaza Strip.

Israel refused to be bound firmly to a timetable, arguing that the Palestinians and Jordan have refused to join peace talks and Egypt could abrogate the treaty with the claim that Israel hadn't tried hard enough.

The new language, to be in a joint Israel-Egypt letter, has Israel agreeing to conclude the negotiations in 12 months but with no commitment to set up the machinery of Palestinian autonomy, the officials said.

Observers saw this as an effort to find a middle path between Israel's desire for the treaty to stand on its own and Egypt's need for a link between the peace pact and progress toward a general peace for the Middle East, including the central Palestin-

A similar compromise is offered for a clause in the treaty which now says, the pact stands "independently of any instrument external to this treaty. This, sources said, will be modified with language saying that phrase does not contradict the Camp David framework for a general Mideast peace. Again, this adds a measure of 'linkage" without setting deadlines

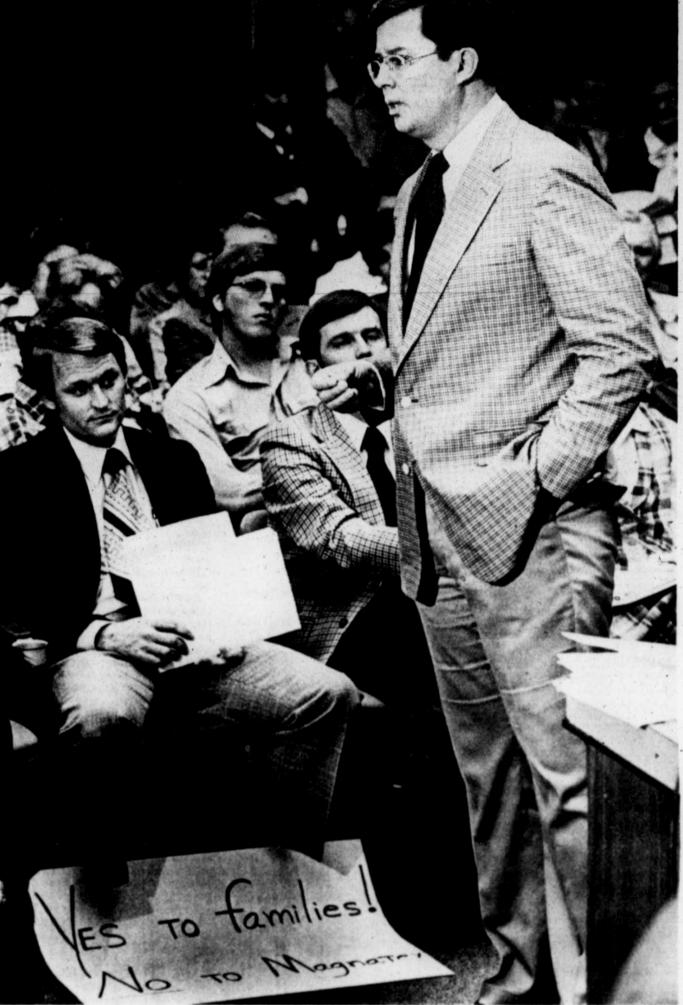

or penalties for non-compliance. The priority clause of the draft treaty is one which Egypt wanted modified because it said, "in the event of a conflict between the obligatreaty and any of their other obligations, the obligations under this treaty will be binding and implemented."

Egypt has defense pacts with other Arab countries, and this language seemed to nullify Egypt's obligations to its brother Arabs.

The proposed compromise, one official said, involves a change to a negative phrasing which will saying some-thing like: this treaty will not take priority over any other agreement just as no other agreement can take priority over this treaty. Both sides, then, can claim their interests are

There were varying reports on whether these changes will alter treaty language itself or whether interpretive notes will be attached to the

In Israel's view, the major remaining issue with Egypt is on the exchange of ambassadors, which will be covered in an annex to the treaty. Israel wants the exchange to take place nine months after the treaty is signed, at the time Israeli troops withdraw from half of the Sinai Pen-

The Planning and Zoning Commission Monday was greeted by 100 or so mostly angry Midlanders in City Hall during a meeting to hear arguements concerning an application by Magnatex Corp. to construct a shopping mall in the northwest portion of the city. Harrell Feldt, right, an attorney representing Magnatex, addresses the commission and crowd, while Steve Melcer of 3002 Meadowbrook Lane listens while sitting in front of a protest sign. (Staff Photo by Mike Kardos)

Shopping center concept OK'd by planning group

By LANA CUNNINGHAM Staff Writer

It was like a three-act play competition, replete with actors appearing before judges in a long skit - the conclusion leaving onlookers on the edges of their chairs.

At the end of the six-hour drama Monday night, Magnatex Corp. had received a favorable recommendation from the city Planning and Zoning Commission on the general concept of its proposed retail shopping center, to be called Midkiff Plaza, at the southeast corner of Loop 250 and North Midkiff Road.

The commission sat as a sevenmember tribunal, listening to the testimony from company officials and protesting area residents before giving judgment.

On a 5-2 vote, with Margaret Purvis and George Veloz the dissenting members, the move to favorably recommend changing zoning on 45.517 acres of land to LR-2 and on 2.136 acres to LR-1 passed.

The commission will study further the proposed planned district for townhouses and the preliminary

WHEN THE PROPOSAL first came before the Planning and Zoning Commission on Jan. 15, residents living in a residential area south of the proposed center appeared at the meeting to register their complaints.

Some of those complaints were noted and changes made in the preliminary plat, with the new form showing a buffer zone of townhomes between already existing single-family dwellings and the shopping cen-

Harrell Feldt, representing Magnatex, outlined the retail proposal, saying the burden to prove the plan

worthwhile had been placed upon the back of Magnatex, represented in this case by the corporation's president, Charles H. Priddy

"I want to say in all good faith and candor to the people here," Feldt began, "that the point I would like to make is there are certain parameters that Magnatex has lived within in this development

"We would like to demonstrate that this is the best use for that land and

"We are not the shark seeking to swallow the goldfish. That is not in the best interest of the commu-

develop it to be compatible with the areas around it."

Referring to comments reportedly circulated in recent weeks about the firm and its shopping center, Feldt said, "We are not the shark seeking to swallow the goldfish. That is not in the best interest of the community."

FACING THE ATTORNEY and the commission were signs with printed slogans protesting Magnatex and the shopping center. Slogans included "I'm just a fish about to be eaten by Magnatex," "We feel betrayed in Emerson Heights" or "What's happening to Midland zoning protec-

The shopping center would be across the road from the Midland Park Mall, and Feldt said this is

important to Midkiff Plaza. While Midland Park Mall will have about 750,000 square feet of space, the plaza will have about 425,000 square feet. "This is bigger than any shop-ping center that now exists in this

With the conclusion of his opening statement, Feldt then called on his "witnesses," or supporting characters, to further develop the plot.

Craig Eaton, an urban planner with a Dallas firm, said Magnatex had taken another look at the plan and decided it could live without Whitney and Lanham streets connecting into the shopping center.

INSTEAD, WITH THE buffer zone, the streets would deadend and small parks would separate the streets from the townhouses.

Loop 250, proposed to run along the same route as FM 868, should take most of the traffic to the area without putting too much on to Midkiff, Garfield and Wadley streets, Eaton contended.

Speaking slowly and deliberately, Eaton said Magnatex is giving about 20 percent of its land to the city for the Loop's rights of way. "At today's land prices, it makes you look at the highest and best uses of the land," that being a shopping center, he said.

Following Eaton was Dr. Richard Johnson of Dallas, an economics expert with Southern Methodist Univer-

Pointing out there are \$162 million in shopping center sales to be had in Midland, Johnson said there exists an increasing need for shopping center space in the Tall City.

"BIG INVESTORS don't want to go to strip, or small, shopping centers. They need the maximum exposure," said Johnson.

In a few years, Midland will be a million square feet short of shopping

Midland's Animal Control Shelter, Monday. "So far we've been lucky," he said. "There are no known domestic ani-

mals with rabies in Midland." But springtime brings out the mating instinct of animals, especially

that of skunks, Byerly said. Already, more skunks are being killed on highways, as they become more active during the breeding sea-

And skunks are a prime suspect for rabies in this area, Bylerly noted.

Texas is "endemic" with rabies, said Jewel Smith, chief sanitarian for the Midland City-County Health Department. He said that's the major reason why persons should get their animals vaccinated for rabies and to be wary of loose animals.

In 1978, Texas had the largest number of reported cases of rabies since 1961, with 563 animals confirmed as having the disease, according to a Texas Department of Health spokes-

This year, rabies already is twice as bad in some parts of the state as last year, according to the spokesman.

He said one death among humans was recorded in Texas last year - in Fort Bend County. The victim was it is believed he was exposed to the virus in Mexico before crossing the

eight cases reported in the past few years. The last one involved a rabid fox, Smith said Monday, One person currently is undergoing

rabies treatment after being bitten by a dog. Smith pointed out that the Midland City-County Health Department is the supply point for rabies vaccine for all the surrounding counties.

Determining if an animal is rabid before coming into contact with it sometimes is not easy, he said.

One example occurred in Matagorda County, where 23 persons had to take rabies shots after playing with a 7-week-old puppy. The puppy had been given to some children by their grandmother who had no idea the animal had been exposed to the virus, Smith recalled.

The largest number of rabies cases in wildlife are diagnosed in skunks, said the agency spokesman, backing up Byerly's remarks. Last year, skunks accounted for 449 cases of rabies in Texas. Since skunks do live close to man,

particularly in rural areas and small towns, there is always the chance that a pet will come into contact with a

and into the Northwest Midland Obstacle' to summit with Brezhnev removed

WASHINGTON (AP) - After a couple of months of conflicting signals, Soviet President Leonid I. Brezhnev now appears willing to meet with President Carter in the United States if the two countries reach agreement on a new strategic arms limitation treaty.

American and Soviet diplomats are indicating that development removes a potential obstacle to a summit meeting between the two.

Until this week, the Soviets had been informally telling journalists and American diplomats that Brezhnev did not want to uome to the United States, raising fears at the State Department that the issue of a summit site would further delay the long

quest for SALT II. But Brezhnev, in a policy speech last week and in brief remarks to reporters Sunday when he cast his ballot in Soviet elections, appeared to take for granted that he would be traveling when the time came to sign

the treaty. "When the documents are completed by (Secretary of State Cyrus) Vance and our minister, then we will

go and sign," he said. A Soviet source in Washington added Monday that "We have no preference. We're open to suggestions,' from the United States about the site

for a summit. The American position has always been that Brezhnev ought to come to the United States for any summit meeting, continuing the pattern that 1972, Brezhnev to Washington in 1973, and President Ford to Vladivostok in In December, the White House indi-

saw President Nixon go to Moscow in

cated publicly that it would like to have a signing ceremony in Washington, followed by several days of talks at St. Simon's Island, a Georgia vacation spot used by Carter.

Shortly afterwards, the Soviets began informally putting out word that they saw the matter differently

and wanted the meeting in Moscow. They argued that Ford's visit to Vladivostok in 1974 was not a formal state visit but a working visit to which both men traveled roughly the same distance. Therefore, it was the American turn to repay Brezhnev's

formal state visit in 1973, they said. The Soviets never raised the issue in formal diplomatic terms, however. They left it in the nature of a trial

balloon. American analysts speculated at that time that the Soviets might be unwilling to have Brezhnev go to

Washington for several reasons. Some felt that they were reluctant to place him in a position where comparisons might be drawn unfavorably to the reception accorded Chinese Vice Premier Deng Xiaoping (Teng Hsiao-ping) on his state visit.

Others felt that Brezhnev, 72, and in uncertain health, was unwilling to make a long flight to Washington, followed by another trip to a second site within the United States.

more to lose on this project than anyone else here," he said. "We have engineer who has studied drainage established ourselves here over the years in working for the community. I frequency storms," he said. "A storm now see the corporation cast in a bad on the 25-year frequency would put a foot of water in the streets (in the

Bob Stillman commented on the increasing drainage problem to the residences south of the project. 'Since Midland's drainage problems

are no secret, I recommend better drainage be planned for the development," he said. Danny White of 2818 Emerson Place

said the traffic in the area would increase. The cul de sacs in the area also would have more people turning around in them, he contended, and children would have more confronta-

Tom Gentry of 2903 Emerson Place charged the plan came well after the single family homes in the area had

been established. Wayne Merritt of 2809 Andover St. objected to the zoning, saying it would allow flashing signs, service stations and quick-eating places, just to men-tion a few of the potential problem

businesses. 2820 Emerson Place, pointed out that when the lots are sold the corporation

as Priddy had promised. there. I've watched two Dempsey Dumpsters float by after a rain.'

DIRECTOR OF PLANNING and Community Development Department Richard Hennessy said his staff had problems accepting a residential section, such as the townhouses, for a buffer zone. Commission Member Robert South-

erland suggested a garden-type office complex as a buffer zone instead of

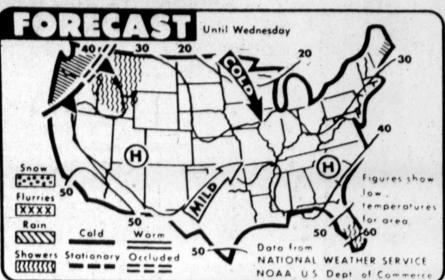

a lot of deadend streets." Conclusion to the first phase of the drama should come when the commission reviews the planned district and preliminary plat during a March

go before the Midland City Council.

Magruder seeks re-election to county hospital board

board are elected at large, with the

Candidates must have petitions w the names of 25 registered voters file in the hospital administration fice before their names can be incli ed on the ballot.

"Our history is one of performance. When we say we will do something, we do it. You won't find another developer as community oriented as Magnatex," he concluded. FIVE MEN SERVED as spokes-

first time he has needed to defend his

"Magnatex has more to gain and

Gene Stack first assured Priddy the

antees on this proposal, like planned district for the whole tract."

tions with automobiles.

Another spectator, Duke Wilson of

will no longer have control over them, And Bill Pickering of 2815 Emerson Place resides in a home off the southeast corn of the shopping center and the drainage "is a terrific problem

Another member, Margaret Purvis, said she liked the shopping center concept, but could not go with it because it fails to allow the residential section to be completed "without

After that, the plan will still have to

along with the hospital district, which also will combine forces with the (Continued from Page 1A) Greenwood school district in that Directors race filed for re-election spokesman said. Skunks, even pet skunks, can not be Monday afternoon. The only other candidate to file for area of the county. Edwin H. Magruder, 54, turned in rabid skunk, said Byerly. one of three positions open on the vaccinated, but there is vaccine for Midland County is no exception, cats and dogs, said Smith. Having all his filing petitions to the hospital adboard of directors is Dr. Henrie Mast, considering the number of people recats and dogs vaccinated would help Police continue a retired Midland surgeon. ministration office Monday. A 30-year Midland resident, Ma-The other two incumbents whose siding in the rural areas or on the eliminate future fears and problems gruder served four years as mayor of edges of the city, he added. terms expire this year, L. Decker probe of death Dawson and Robert L. Pendleton, the city, four years on the City Coun-"I've seen skunks all over town," cil and was a member of the planning have not announced their intention to Byerly said, noting the animals do To ward off an epidemic, there BIG SPRING - Police today still not confine themselves to uninhabited should be a 70 percent vaccination and zoning commission. He also has run for re-election. are investigating the Sunday morning been active in a number of civic Candidates for the hospital district rate among the domestic animal poporganizations. The director said his department

> ing in the parking lot of the Blue Moon lounge and was pronounced dead on arrival at a Big Spring hospital, pobeginning after the district was formed in April 1977 and hopes "to see the new addition and renovation

His goal for the hospital, he said, is "the best health care service the district can provide to the people at the

through to their completion."

The election will be held April 7

BUSINESS MIRROR

S&Ls beginning to feel boxed in by small savers

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) - At almost any other time, the savings and loan associations would have been gladdened by the cascade of money that spilled into their vaults in January. But now they're uncertain.

The mixed mood demonstrates again how unpredictable is this aspect of finance, in which the deposits of small savers are aggregated to provide loans to homebuyers. S&Ls are the biggest mortgage

In January, despite a drop in the national savings rate to only 4.6 percent of takehome pay, the S&Ls attracted an avalanche of \$4.4 billion in net savings, that is, after deducting for withdrawals. Since these so-called thrift institutions exist almost

solely by lending out at higher interest rates the funds deposited in savings accounts, you're justified in asking what it takes to make them smile. The answer: A better spread; the ability to earn more on loans than they must pay on savings.

Increasingly, S&L managers are concerned about their ability to do so. They're beginning to feel boxed As a result, loan commitments fell 4 percent at the very time deposits poured into their vaults like coal

chuted into a bin. Fewer loans were offered, and maybe fewer were sought by customers as well. The irony of this is that the situation emanates in part from an instrument designed to save the S&Ls, the six-month savings certificate, which carries an

interest rate close to 10 percent. Understandably, depositors like the device, even though the interest is guaranteed for only half a year, finding it far more desirable than the usual 5.25 percent offered on conentional passbook savings.

The savings certificates, approved last year by the Federal Home Loan Bank Board and first offered in June, are designed to keep money from flowing out of thrift institutions at times of generally high interest. Before this, you see, the thrifts were unable to

chase rising interest rates in the same manner, for example, as commercial banks. The law limited interest paid so as to keep mortgage lending rates But this created the problem of disintermediation,

in which depositors withdrew their funds and invested them in the money markets directly, without going through an intermediary, such as the thrift institution.

Without money to lend, the S&Ls were just about out of business, and so too was the housing industry. Federal regulators decided, therefore, to permit them to pay higher interest rates for limited times.

Now the S&Ls have lots of cash, but they've got the old problem too. With mortgage rates also around 10 percent, they find themselves without a spread. Besides, borrowers are becoming reluctant to bor-

Another complication has developed. While the high-paying certificates were designed to attract new money, that hasn't always been the case. Instead, money is often withdrawn from low-yield passbook accounts.

The certificates, which pay a quarter more than six-month Treasury bills, are therefore falling into some disfavor among the thrifts. And if Treasury bill rates rise, the situation is worsened.

Should that occur, some thrifts have indicated they'll drop out of the race. Why persist, when the payout cannot be reclaimed through higher mortgage rates, which in many states are limited by Dilemma: How do you withdraw from the compe-

tition without running into the old bugaboo of disintermediation? Won't depositors simply withdraw their funds and seek higher rates elswhere? That's the rub. Some S&Ls, therefore, sit with lots of cash and

little, it seems, to lend. Instead of financing homes, they are simply reinvesting the money at still higher returns in their big brothers, the commercial For a time, the savings certificates kept many

thrifts in business. But increasingly, the situation is distressing to everyone — to regulators, to lenders, to borrowers, to homebuilders and real estate agents. But then you must consider that inflation

There seems to be no way out without problems, and some lenders are prepared to face them. Their ingenuity now is being channeled into creative ways to limit the distress.

Laredo residents picket federal official, Alamo

SAN ANTONIO, Texas (AP) - About 30 Laredo residents, upset that a federal low-cost housing project is planned for their side of town, showed their displeasure by picketing a federal official and the Alamo this past weekend.

The Laredoans paraded in front of the home of innis Jolly, area director for the Department of lousing and Urban Development. Jolly was not home, reportedly having left about

wo hours earlier to play golf. The protestors carried placards reading "HUD strikes again " and "Why not in Your Neighbor-

A group spokesman said they were upset because the housing project would be near their homes in Laredo's Hillside subdivision. They contend those on the south side of Laredo would rather have the \$5.8 million, 126-unit apartment building there.

Schools near the selected site will not be able to absorb the students expected, the spokesman said. He labeled as extortion a statement attributed to

Jolly that Laredo would have to take the project on the north side or lose all future federal projects. After leaving the home, the protestors set up pickets at Alamo Plaza, across from the historic

Fannie L. Server

FRIENDSHIP - Services for Fannie Lee Server, 93, of Lamesa will be at 2 p.m. Wednesday in Friendship Methodist Church in Milam County. Burial will be in Friendship Cemetery directed by Green Funeral Home of Cameron.

Mrs. Server died Monday after a long illness.

She was born in Milam County and moved to Lamesa in 1970. She married P.D. Server in May 1904 in Milam County. He died in January 1957. She was a Methodist.

Survivors include two daughters, Wattie Short of Lamesa and Florine McCracken of Tahoka; two sons, Walker Server of Welch and Irwin Server of Ropesville; a brother, Clifford Walker of Buckholts, six grandchildren and 12 great-grandchildren.

Rendie Norris

PADUCAH - Services for Rendie Norris, 92, of Paducah, mother of Bernice Clark of Midland, will be at 11 a.m. Wednesday in the First Baptist Church with the Rev. Jimmy Griffith, pastor, officiating.

Burial will be in Garden of Memories Cemetery directed by Norris Funeral Home.

Mrs. Norris died Sunday at her home after a lengthy illness. She had been a Cottle County resi-

dent since 1910. She was a member of the Order of the Eastern Star. She was a Baptist.

Other survivors include two sons, a brother, nine grandchildren, nine great-grandchildren and two greatgreat-grandchildren.

C.H. Dodson Sr.

FORT WORTH - Services for Clyde H. Dodson Sr., 71, of Fort Worth, father of James "Doc" Dodson of Midland and Mrs. Arno Thies IV of Portland, Ore., formerly of Midland, will be at 2 p.m. Tuesday in Forest Hill Presbyterian Church here. Gause-Ware Funeral Home is in charge of arrangements.

Dodson died Sunday in a Fort Worth nursing home after a lengthy illness. He was born Nov. 3, 1907. He had lived in Fort Worth most of his life.

Other survivors include a son, three daughters, 15 grandchildren and a great-grandchild.

Other survivors include a stepson, Paul Wilkinson of Fredericksburg.

Ann Campbell

Services for Ann B. Campbell, 55, of Houston and formerly of Midland, were to be at 3 p.m. today in the Immaculate Conception Catholic Church in Houston with the Rev. John Ward officiating. Burial was to be in Forest Park Lawndale Cemetery directed by Forest Park Lawndale Funeral Home.

Mrs. Campbell died Sunday in a Midland hospital

She was born Jan. 2, 1924, in New York City, N.Y., where she spent her early life. She moved to Houston in 1952. She had worked for Gulf Oil Co. and was working for the City of Houston in the planning department at the time of her death.

Survivors include a son, Jerry Campbell of Midland; a daughter, Barbara Ann Campbell of Houston; a sister, Marie Polaksy of New York, and a granddaughter.

The family has asked that memorials be made to the Midland Memorial Hospital Foundation in lieu of flowers.

More extensive flooding expected

By The Associated Press

It's a grim fact of winter life in much of the Midwest: rising temperatures mean rising waters. But this year's heavy snowpack has some officials worried that current flooding is little more than a trickle compared with things to

Erie Jones, director of the state emergency services department in Illinois, said Monday the U.S. Army Corps of Engineers believes the Rock River, in the northern part of the state, may experience the worst flooding in its history.

Under the worst conditions, engineers said, Rockford, Ill. - the state's second largest city with 160,000 population - could soon be under 10 feet of water in some residential and business districts. The Rock River flows through the heart of the

"There's going to be flooding, and people should take precautions to protect their possessions and their homes if they're in flood plains," Jones said.

Some businesses, especially those located on or near the river, have already moved expensive equipment out of basement storerooms.

Jones said Gov. James Thompson has asked the Corps of Engineers to assist residents of Moline and Milan, who must raise levees on the Rock River in anticipation of flooding. If the river floods just the community of Milan, Jones said \$100 million worth of property could be des-

Odessan honored

AUSTIN - Members of the Texas Commission on Alcoholism Thursday honored fellow member Bill Masterson of Odes-

Commission Chairman Jim Clipson Jr. presented Masterson with a plaque and a resolution signed by the five other commissioners expressing their appreciation of Masterson

Masterson was appointed to a six-year term on the commission by Gov. Dolph Briscoe in October 1975, and served as chairman of the commission from November 1976 to November 1978.

At least three dead at well blaze

NEW ORLEANS (AP) - Experts at fighting wild well fires are looking for a way to control a blaze at an offshore natural gas well in the Gulf of Mexico, still burning after an explosion that killed at least three work-

abama. sy mope Saturstorms.

ULL

Three bodies were found Monday after the blast on the drilling platform 45 miles south of Morgan City, La. Five men are missing and feared dead, but 27 escaped the rig in a "survival capsule," an unsinkable lifeboat kept on deck for such emergencies.

Red Adair, the well firefighter from Houston, Texas, visited the site Monday to see how the fire might be controlled.

One possible solution, officials said, would be to drill a relief well - a complicated procedure in which an-

Station closings could cause prices to climb

By MARK POTTS **AP Business Writer**

NEW YORK (AP) - Gasoline prices, which have risen about 2 cents a gallon since Jan. 1, will continue to go up sharply over the next few months - especially if the government forces service stations to close on weekends, analysts said Monday.

But just how large the increases will be or when they will come is uncertain, the experts add, because of continued questions about world crude oil supply.

"The key variables to me are the OPEC price, which has yet to be determined, and the marketplace,' said Eugene Nowak, an oil industry analyst at the Wall Street firm of Blyth Eastman Dillon.

The price increase since the first of the year varies by area because of local market factors. For example, regular-grade leaded gasoline bought at a full-service station now costs an average 76.8 cents per gallon in Chicago, up from 74.8 cents two months ago, according to the Lundberg Letter, a gasoline industry newsletter. The average price in Newark, N.J. has risen from 65.6 cents per gallon to

The price rise for unleaded gas is even more pronounced. Motorists in

Boycott threatened

LOS ANGELES (AP) - Several major U.S. oil companies are threatening to boycott this week's Iranian crude oil auction because it would force new increases in oil prices, the Los Angeles Times reported today.

The revolutionary government in Tehran has said it plans to start the bidding at \$18 a barrel, more than one-third higher than the current world contract price of \$13.30.

"We believe these prices are excessive," a spokesman for Standard Oil of California said Monday. "We do not wish to add to the oil price spiral by agreeing to these excessive crude prices."

9

CH

LY

Gulf Oil also said it won't participate in the Iranian auction, and a spokesman for Atlantic Richfield Co. said his company believes it "should not be a party to that kind of auction selling of crude oil."

The paper said other oil companies, which it did not identify, had similar

'If the Saudis saw us buying lots of oil from Iran at \$18 a barrel, they would be tempted to jack up their prices too," explained one unidentified executive.

One company, Ashland Oil, said it will buy crude oil from Iran at high but unspecified prices. The State Department apparently

endorses the threatened boycott. "We hope the companies will avoid making purchases at distress prices," said a State Department official whom the paper did not identify. "As long as consumers act rationally and prudently, all countries can get through the present period."

Omaha are now paying an average 80.5 cents a gallon, up from 77.3 cents in January. Cincinnati prices are up

from 73.4 cents to 75.68 cents. Dan Lundberg, publisher of the Lundberg letter, says the increases so far this year are mostly the result of inflationary pressures on dealers, who have some margin under government controls to push prices up.

Lundberg said the impact of the rise in OPEC crude oil prices that became effective Jan. 1 is just now being felt. He also points out that in the next few weeks, prices will rise as much as a nickel because the Department of Energy loosened price con-

trols last week. This move, known as the "tilt," allows refiners to pass along more of their costs to consumers. The move is designed to encourage companies to build refineries, but it will also raise gasoline prices 10 cents in the next

two years, the DOE estimates. Prices will also rise in the next few weeks because of the supply squeeze brought on by the Iranian revolution. Several OPEC members have raised oil prices on their own to cash in on the tight supply, and this will soon be felt at the gas pump.

OPEC could decide when it meets later this month to raise crude prices even more than the 3.9 percent increase scheduled April 1. Nowak, who predicts a 10-cent-a-gallon rise in the price of gasoline by the end of 1979, said that would change his prediction. "If the OPEC price goes higher, that would be a bit conservative," he

Nowak says he is more optimistic, though, than Energy Secretary James Schlesinger, who said last week prices of unleaded gasoline could top \$1 a gallon a year or so from now, with leaded regular up to 75

Lundberg, on the other hand, is pessimistic. He said the inflationary pressure that drove prices up in January and February "is a trend that we are likely to see continue." He said prices could rise 15 more cents by year's end.

Two Conoco hands retire

Continental Oil Co. has announced the retirement of Othel D. Giles and Raymond E. Talley. Each has more than 36 years of service with the company.

Giles joined Conoco's Production Department in 1942 as a pumper and became roustabout at Denver City in 1956 and roustabout first class in

He moved to Levelland in 1967 and was promoted to maintenance man in 1974. He has been maintenance operator in the Levelland area since 1978.

Talley joined Conoco's production departemen in 1942 as roustabout in Denver City and was promoted to production foreman in 1957. In 1965 he became head roustabout and has been head maintenance operator since last other well would be aimed at the shaft of the wild gas line. When the wells intersect, mud could be pumped down and the fire extinguished.

The Coast Guard said a fire barge doused the wind-whipped flames and tried to cool the white hot steel through the night with 5,000 gallons of water per minute.

A spokesman said a Coast Guard cutter and a helicopter were aiding in the search for the missing men.

James King, a spokesman for Placid Oil Co. of Houma, said the dead and missing - none of whom has been identified - worked for Penrod Drilling Co. and other companies under contract to Placid.

The U.S. Geological Survey said the fire started about dawn Monday during drilling in 40 feet of water. It said the well was down to 14,615 feet when the drill pipe stuck. Some gas escaped when workers tried to remove the pipe, triggering the explosion and It was not immediately known

whether the men died in the explosion or when they leaped into the sea from their drilling rig.

Four of the 27 survivors were hospitalized at Lafayette with what King described as minor injuries.

Although the the rig's derrick melted from the heat of the flames within five hours and the Gulf was thick with debris, the Coast Guard said there was little danger of pollution.

Hunts add to holdings

LOS ANGELES (AP) - Texas oil millionaires Nelson Bunker Hunt and William Herbert Hunt have increased to 7.5 percent their holdings in Global Marine Inc., the Los Angeles-based offshore oil drilling firm has report-

William R. Thomas, senior vice president of finance and administration for Global Marine, said the firm was unaware of the Hunt brothers' expanded interest until Friday, when it received a copy of a Securities and Exchange Commission filing in the

In the SEC filing, the Hunt brothers reported that they had purchased 130,-000 shares of Global Marine stock on the open market between Jan. 23 and Feb. 12, bringing their total holdings to 328,200 of the company's 4.4 million shares outstanding.

'We had not been aware of their interest," Thomas said. "We knew there had been some activity in our stock in major transactions and we had been interested in knowing who the real buyers were."

When news of the Hunt acquisitions reached Wall Street, trading in the company's stock was halted half an hour before the New York Stock exchange closed Friday. Shares closed at \$15.75, up .625 cents.

The filing stated that the Hunts purchased the stocks with personal funds and used margin accounts in some cases. The SEC statement said the brothers have spent a total of \$3,806,782 on their acquisitions. Dow H. Heard, a Dallas attorney,

said the Hunts made the purchases for investment purposes and have no present plans for a major corporate transaction involving Global Marine.

The SEC filing further disclaimed any current plans to change the present board or management of the firm. which built and operated the controversial Glomar Explorer for the

After suffering losses in 1976 and 1977. Global Martine reported record earnings of \$8.2 million or \$1.85 per share on revenues of \$124.5 million in

Report to raise doubt

WASHINGTON (AP) - Questions about whether Saudi Arabia can continue to produce enough oil to meet the needs of the United States are expected to be raised this week in a special congressional report.

Sources in the administration and Congress say the Senate Foreign Relations Committee report will state that the Saudis' production capacity is severely limited.

According to one report, by The New York Times, the study concludes that if Saudi Arabia produced 14 million to 16 million barrels of oil a day, it would take only six to 10 years for the country's supply to peak.

Saudi Arabia currently produces 10 million barrels daily. But some analysts think it must produce 14 million to 16 million barrels a day to meet the needs of the United States and other Western countries.

The conclusions were based partly on documents subpoenaed from the Exxon Corp., which denies there are any production problems in Saudi

al judge set the stage for jury selection in the nuclear contamination trial of the late Karen Silkwood after denying a motion by the Kerr-McGee Nuclear Corp. to be removed from the \$11.5 million suit

'Nature's quirks' add to cabochon collection

ANDREWS - Unlike diamonds and many other "precious" gems, the beauty of many stones is in their imperfection.

Take agate. Butch and Rita Foreman have hundreds of polished, unfaceted maverick stones whose flaws, thanks to nature's quirks, cause rock hounds and stone buffs to rave.

'That's a geologic oddity," Dave Foreman, the couple's father and father-in-law, said of a six-panel display of cabochons.

The 1,500 convex-cut stones displayed in, of all places, his grocerystore, represent about 3,600 manhours of work from 1961 to 1969 by his son, a silversmith, who today is specializing in turquoise jewelry, and

"THIS IS SUPPOSED to be the largest cabochon collection in the world - more than the Smithsonian Institution has," said Dave Fore-

'Every one of them is hand cut, hand polished," he said.

The Foreman collection of cabochons is strictly due to pride and an adoration of the patterns, shades and colors in agate. Most of the appealing imperfections are oxides of iron in the hard-but-brittle chalcedony variety of quartz tagged by many names: banded, flame, the fern-like moss, eye, onyx, plume, crazy lace, bouquet and place-name agate peculiar to a locale.

The Foreman collection includes a Texas agate called Balmorhea, a Mexican agate labeled San Carlos, and another Texas agate Butch Foreman christened Long Walk, owing to the four- or five-mile hike required in the Davis Mountains to reach the agate's location.

"There's a lot of theories" on the formation of the patterns, colors and shades in the rock, he said.

PERHAPS FOREMAN'S most prized cabochon is a plume agate set in a gold mount.

"That stone is very, very rare," Dave Foreman said. "They said it is the finest plume in existence. "We had it appraised, but it's not

for sale," Dave Foreman said. The appraised value was in the thousands of dollars

"Oh," interjected his son, "I guess enough money could get it, but we don't consider it for sale.

Titles are affixed to cabochons to "reflect the feeling of the rock hound," the father said.

A moss agate was titled "Without Form and Void," for it brought to mind the earth as described in Genesis I, Foreman said.

"Yeah, rock hounds always find names," he said.

CINCINNATI (AP) -

Two Cincinnati police of-

ficers were shot to death

early today when one or

both occupants of a car

they had stopped opened

One of the alleged as-

sailants also was killed,

though police said they

shot to death early today

A plume agate was named Sea

A CRAZY LACE stone took on the name "High Waves, Heavy

The silver-haired Butch Foreman, who largely is self-taught in gem cutting and polishing and in silversmithing, started the cabochon collection to impress gem dealers and other rock hounds.

"It occurred to us that some of this stuff was going to be scarce," said Butch Foreman. "It's just...stuff for

our own personal collection. Butch Foreman got hooked on rocks early on.

Years later, as he got into working with silver, he started delving into turquoise, coral and mother-of-pearl.

"Back in '63, silver was a low-line," and cost about 50 cents an ounce on the market." Today, at \$9 an ounce, its value has multiplied 18 times, Butch Foreman figured.

"A dyed-in-the-wool rockhound (then) wouldn't mess. with turquoise," Butch Foreman said. "He worked in agate."

In the earlier days, lapidarians shied from the turquoise mainly because it "is more subject to breakage and color change. It was common stuff" and hence not in demand.

THAT ALL CHANGED, and turquoise in the late 1960s and early 1970s became popular. Wearing it was almost a fad. Quality was not all that important, said Butch Foreman.

It is today, though, and those who really appreciate the stone are demanding high-quality turquoise, Foreman said.

"It's a more valuable piece of merchandise. It's a supply and demand thing just like diamonds.

Butch and Rita Foreman practice their craft in their "junk room" in the back of the store. They make most of their jewelry - rings, necklaces and whatnots - "from scratch."

In their storeroom are literally tons of raw rock from here and abroad yet to be cut and re-cut and polished.

"It amazes me," Mrs. Foreman said, "what comes out of rock even after all of these years we've been

Her helpmate agreed. "Yeah, it's tedious. It's just something you have to like to do.'

Pill may lead to birth of twins

DR. NEIL SOLOMON

Dear Dr. Solomon: I recently gave birth to twins, the only one in my family, as far as I know, ever to have done so. I'm also the only one in my family to have ever been on the Pill. Is there a connection between the two?-Mrs. A.R.

Dear Mrs.R.: No cause-and-effect relationship has been established, but Dr. Kenneth J. Rothman of the Harvard School of Public Health has an interesting statistic. He found that 25 sets of twins were born to 1,609 mothers who conceived within a month of discontinuing oral contraceptives, a rate of 1.6 percent. The 4,393 other women in the study conceived more than a month after terminating use of the Pill, and their twinning rate was close to the

average—1.0 percent.
While these figures, by themselves, don't prove anything, they do imply that the chances of having twins are increased if conception takes place shortly after the use of birth control pills is discontinued.

Dear Dr. Solomon: There have been a number of deaths in our family recently, and in each case a relative was approached for permission to do an autopsy. Is there really anything to be gained from this practice? How often is permission granted?-Mrs. E.T.N.

Dear Mrs. N.: The postmortem examination of bodies provides an inconparable means for improving medical standards. Many times it is the only way to determine the exact cause of death, or the damage done by a disease.

In recent years there has been an unfortunate decline in the number of autopsies performed. Dr. William C. Roberts, of the National Heart, Lung, and Blood Institute, reports that

cases could be tried tion division, said busin-

shortly after World War II, autopsies were performed on about half of all patients who died in a hospital; in the mid-1970s, however, this figure had dropped to about 22 percent.

Dr. Roberts notes that an autopsy is one way of checking on the treatment received by a patient, and that autopsies result in a changed diagnosis of the cause of death in as many as one-quarter of the cases. From a medical standpoint, therefore, the decrease in the number of autopsies is not a welcome trend.

Dear Dr. Solomon: I was just told I have high blood pressure. I can't imagine how I might have gotten it. What causes high blood pressure?-

Dear Mr. N.K.: No one knows for sure why the arterioles clamp down, causing hypertension. In some cases, tests may show that hypertension is related to some other diseases. But in most cases, the cause of hypertension is not known. Doctors use the term "essential" to describe this type of hypertension.

Doctors think " essential" hypertension may be caused by:

1-Some problem in the kidneys or glands called adrenals which send chemicals into the blood stream, causing hypertonsion.

2-Emotions (everyone's blood pressure rises if they get excited, angry, nervous, etc. Some people's pressure rises more than others. These people are called hyperreactors or pre-hypertensives, and they are more likely to develop hypertension), and/or

3-Heredity; that is, the tendency to have hypertension may run in some

House tax relief group rejects 'ag use' break

AUSTIN, Texas (AP) — The House Ways and Means Committee has rejected a new attempt to withhold an "agricultural use:" tax break from

The action came Monday as the committee moved toward a final decision on a bill implementing the 1978 Tax Relief Amendment.

An 8-4 vote against denying the "agricultural use" tax break to corporations settled the issue in committee but it is sure to arise again on the House floor.

The committee planned to take its final vote on the bill (HB1060) today after Rep. Wayne Peveto, D-Orange, said he wanted more time to analyze the latest draft of the measure.

Rep. Bob Davis, R-Irving, committee chairman, a committee decision today would assure the bill a place on next Monday's calendar for House

Peveto and Rep. Stan Schlueter, D-Salado, reopened the issue of

"agricultural use" appraisal of co poration-owned farm, ranch and timber land for taxation - probably the most sensitive matter in the bill.

Farm, ranch and timber land would be assessed for taxation on its ability to nourish crops, livestock and trees - not its value on a rising real estate

Peveto said that would be an incentive for corporations to compete with individuals to buy farms and ranches that are offered for sale. "We are going to see much faster

depletion of the family farmer and rancher, and more land will fall under the ownership of large corporations," He said corporate ownership of tim-

Texas that giving corporations the tax break would "almost completely destroy" the tax bases of 11 coun-

But Davis pointed out the bill prohibits taxing timber on anything less than its current assessed valuation.

Rep. Bennie Bock II, D-New Braunfels, said the idea behind "agricultural use" valuation of land was not so much to encourage family farming as to keep land in production.

"If corporations can do such a better job of producing livestock and crops, why aren't they in it today? Corporations just can't cut it because they have bureaucracy laid on bureaucracy. It's the good independent businessman who can do the job," Bock said.

Peveto also failed on a clear voice vote to reduce the productivity break given timber land to less than what farms and ranches would receive.

"A six-inch rain won't wash out a timber crop. A drought won't kill it, he said.

But Rep. Jim Browder, D-Coldspring, said, "Trees are susceptible to more than agriculture - freeze, pine bark beetles, fire and trespassers cutting trees.

take-home pay.

part of a conscious effort by USDA to propagandize food costs because such analyses are issued regularly by vari-

Russ Forte of the department's Office of Governmental and Public Affairs said Monday two reports about food costs issued in the last week were coincidental and that there is "no campaign" to provide the news media with information to help soften government reports of spiraling food

The department predicts retail food prices now are "most likely" expected to rise 8.5 percent this year, compared to an earlier forecast of 7.5 percent. But experts say the earlier predicted range of this year's gain, 6 percent to 10 percent, is still possible, depending on weather and other fac-

Last week the department issued a "feature" report about how food "takes a smaller bite of your takehome pay almost every year" and provided figures back to 1929 to support that claim.

national average expenditures for food required 23.4 percent of disposable income.

TO INCORPORATE

Notice is hereby given that Friemel and Carpenter, heretofore a partnership composed of Paul D. Friemel and Richard Carpenter, doing business at Midland, Texas, will be dissolved, and that after March 1, 1979, the business will be conducted without change of name by Friemel and Carpenter, Inc., transferee, a Texas corporation, at Midland, Texas. This notice is given pursuant to Article 1302-2.02 of Texas Miscellaneous Corporation Laws' Act, Section 6.103(7) of the Texas Business and Commerce Code, and Section 35 of Article 6132b of the Texas Civil Statutes.

NOTICE OF INCORPORATION
Notice is hereby given that Smith
Bros. Pipe & Service Co., whose principal place of business in 1407 Garden
City Highway, Midland County, Texas, was incorporated December 28, 1978, and the name of the Compnay is now Smith Bros. Pipe, Inc.
Dated: January 25, 1979.
