Director of the Texas Department of Public Safety, and the final toll stands at 1,957 fatalities. This figure is 9 more than the prediction made a year ago by the chief of statistics. In forecasting the fatalities for 1949, Chief Woerner went against many existing indications of certain increases in the

death rate and said that the figure would drop. It did by the 102 margin.

75% New Oil **Reserves** Are In Texas Texas oil and gas operators ac-

"Predctions that we are running out of gas, now voiced in some quarters, appear to be unfounded according to these latest reports on natural gas reserves," Simons said. "The report shows that Texas has 99.2 trillion cubic feet of recoverable natural

gas reserves. This is 55 per cent of the national total. Texas' new gas reserves of more than 3.4 be the most costly and tragic in trillion cubic feet accounted for Pump on 110 or 220 the history of the state during 53.2 per cent of the national gain.

for 15 per cent of an the new additions to the nation's crude oil reserves during 1949, an analysis of newest reserve estimates showed today. "Although Texas operators are suffering from reduced incomes occasioned by decreased demands for Texas oil at this time, they contributed mightily last year to the development of the state's petroleum resources. The role of the Texas oil man in the national economy and national defense is highlighted by the revelation that he has discovered for Texas 55 per cent of the nation's oil and gas reserves. These reserves provide the basis for Texas prospects of long-range prosperity," said Charles E. Stmons Vice-President and

General Manager, Texas Mid-Continent Oil & Gas Association. The Texas statistics on reserves were extracted from the estimates released Tuesday by the American Petroleum Institute and the American Gas Association.

During 1949 the crude oil reserves of Texas, now estimated at 13,509,732,000 barrels, increased 7.6 per cent, or 1,025,514,000 barrels. This was 74.9 per cent

America's Lowest-Priced Straight Eight Lowest-Priced Car with GM Hydra-Matic Drive Power-Packed Silver Streak Engines-**Choice of Six or Eight** World Renowned Road Record for

1950 Pontiac.

There's nothing on the road to match the sparkling personality of a Pontiac. There's no other car that gives you so much pride of ownership, so much luxurious comfort, so much spectacular Silver Streak performance for the price of a Pontiac.

Won't Control **Insect Menace** There is no easy road to the abatement of insects and rodents, says Dr. Geo. W. Cox, State Health Officer. Frequently people get enthusiastic about the destruction of the insects and believe that, if an airplane flies over the town, or if a huge fogging machine rolls through town spreading an insecticide, the insects will be killed instantly and peace from the insect nuisance will remain forever. This is an erroneous and, unfortunately, bad practice, because it creates an unwarranted sense of security. Before any killing is anticipated, a thorough clean-up of the community should be carried on. This means cleaning up the

Hundreds Tell Bob Wills Of Hadacol's Numerous Blessings

Hundreds of folks, who are benefiting every day from taking HADACOL meet at the Trianon Building in Oklahoma City where Bob Wills, famous band leader, and his Texas Playboys broadcast each noon for HADA-COL

"It looks like all my fans are getting wonderful benefits from HADACOL," said Wills. "It is a real pleasure to broadcast for HADACOL because the folks taking HADACOL are so enthusiastic that I feel like I am performing a real service for mankind." Hundreds have told Wills of the blessed benefits of HADACOL and the following statement by Miss Betty Lou Lobb, 720 College St., Bethany, a well known singer, is a good example.

"I was tired, run down and lost my appetite. I suffered with gastic disturbances. I had tried almost everything but it didn't Bob Wills, famous western music band leader, loves to talk with his

most everything but it didn't seem to help me. I had heard about the wonderful results HADACOL had been bringing to so many of my friends. Soon after taking HADACOL I was feeling much better, had no gastric dis-turbances and had a wonderful appetite. I am no longer nervous. I am sure that HADACOL has helped me a great deal and I recommend it to my friends." Miss Lobb suffered with a de-

gists as a major cover plant to aid BRAIDED rugs may be made from castoff clothing, and such wildlife populations, is a hardy materials as faded draperies, plant, but cultivation will assist growth to nearly double their size or from remnants and mill ends. in one season. Cultivation during the first year

fuge for many forms of small wildlife, the technicians advise. Field checks have shown this simple practice more than pays with increased plant growth and all co operators are urged to benefit by the findings.

ΔΔΔ

Fishermen, here's a tip from Herb Fisher, of the University of Missouri wildlife research unit here, on the use of catfish fat. Herb finds that some commercial fishermen use catfish fat to help in frying fish, in removing tar from bands, and as an agent in bardening and eliminating the stickiness of tars used on their nets.

Dingell Bill

Sportsmen everywhere will be interested to hear that the Dingell bill which would provide for federal aid to state fish restoration and management projects is to be introduced again before the 81st Congress.

The new bill is substantially the same as the old one which was vetoed by the President during the last session. Two changes have been made that should affect the objections made by the President. One stipulates that the bill would be effective July 1, 1950, and not retroactive to 1947. Another provides for an authorization of \$2,000,000 to carry out provisions of the act from July 1, 1950, to June 30, 1951. There after, the entire sum earmarked from the excise tax on fishing equipment during each fiscal year would be available for allocation to the states to carry out the program.

The fastest tagged salmon recovered to date is the salmon caught last summer 20 miles up the Columbia river by an Astoria fisherman, William M. Pice. The fish had been tagged on July 21 by the California bureau of marine fisheries near San Francisco and was caught 22 days later in the Columbia river. The fish had travelled a distance of 660 miles or an average of 30 miles a day which is good going for a fish.

U.S. Milk Industry Vastly Transformed Cost of Product Rises Less Than Other Foods

Since the turn of the century the milk industry has undergone a transformation rivaling that of the airplane, according to dairy scientist and historian Dr. J. Lloyd Henderson.

Dr. Henderson, co-author of "The Market Milk Industry," a standard textbook whose latest edition will be released this spring said "Our research since the war's end points up the fact that although labor and equipment costs have kept pace with rising scales in other industries, the cost of milk and its products has risen less than that of any other food. In fact, milk, from a nutritive point of view, is far and away the housewife's best food buy.'

Cost-saving scientific advances in milk processing and startling economies due to improved distribution practices have been responsible for this, Henderson points out. The industry shed no tears as it

This means perors hated it and persecuted it we should have our best men in till they found they could use it action far oftener than we had them

(which, by the way, was a bad day for the church). Mohammed, a tyrant of sorts, hated the Christian church and would have totally destroyed it if he could.

"IF WE SUFFER with him we shall also reign with him," said St. Paul. But when and how? The end of the church's struggles could come in either of two ways. One way would be for the church to give up struggling against the world. Let the church become a club for the sociable, let the church raise no voice of protest against injustice in society, against untruth, violence and greed; let the church give in to the world, in short, and she will have no further trouble from the world.

But in that case she would be dead. Another way is for the church finally to overcome the world. The triumph of the true church is the same as the triumph of divine Love.

That is the future to which the Bible bids us look. When? We do not know. But the Kingdom comes "one heart at a time," and with every soul the church wins from the world-way to the Christ-way, the victory of Love draws nearer.

in 58 games, batting .318. Our pitching — anything hap-

to Borro_thoro was

pened to Reynolds-there was Page. Anything happened to Raschi-there was Page. Anything happened to Byrne or Lopat or Sanford-there was Page. "I guess that's our weakest spot," Casey finally said. "Our pitchers had to be relieved too often. No one pitcher should be yanked out of the bull pen 60 or more times in a season. That's almost half our games. Too many. We've got to do something about that. Raschi wasn't bad that way. But I think you'll find Reynolds and Byrne will need less help

"Porterfield is sure he is O.K. and that his arm ligament has healed. Shea says he feels fine, with all his soreness gone. You can't ask a pitcher to show you everything the first day of the spring season. "All in all," Casey concluded,

"We have no alibis and no excuses for what happens. I think we'll be better than we were a year ago. Don't forget to mention those two words-Yankee spirit. That's what

Officials of the chemical com pany producing the element which is accomplished by bacterial fermentation, promise feed efficiency that will represent a significant new advance in animal nutrition.

The fermentation APF, as the feed component is known, has a Vitamin B12 content approximately 40 times that of good fish meal, the outstanding natural source of APF which has been widely used heretofore in feed mixtures. This vitamin compound is one of the most effective known for supplementing chicken and hog feeds.

Superphosphate Will Help Add to Manure Properties

Adding superphosphate to manure not only increases its plant food balance, but helps it hold valuable nitrogen that otherwise might be lost, according to Prof. C. J. Chapman, University of Wisconsin agronomist. He says it should be added before the manure is spread on the field.

The superphosphate can be put in the spreader at the rate of 20 to 25 pounds per load.
