Bait - Other than the worm, which is good anywhere, anytime, there is no "best bait, so consult local fishermen. Only a few generalities are possible here. Minnows, crawfish, worms and hellgrammites are the big four among baits — dependable, usually plentiful. One of the four is certain to appeal to almost any kind of fish. However, don't overlook beetles, grasshoppers, crickets, grubs, catalpa worms and other caterpillars or anything else small enough.

Bass-bugs - A sturdy fly rod, level line and a short leader work best here. The leader should be about four feet long and strong. The one absolute necessity is a well-greased line. The cork, balsa wood, or deer hair lure should lift easily off the water.

The subject of flies is so big, we decided to devote all of our next column to it alone

# To Classify Reserve **Officers**

The Organized Reserve Corps officers of Texas will, in the very near future, receive a questionnaire asking for the latest up-todate information on their civilian and military skills, Colonel Oscar B. Abbott, Chief of the Texas Military District, announced today. An initial survey was made early last year when 15,000 registered letters were mailed by the Texas Military District during January and February.

As a result of the first survey detailed information as to the Reserve Officer's qualifications

## HE BELIEVES

Walter Rogers believes future of our country depends upon the homes and small communities. Believes in home rule and home responsibility Believes encroachments have been made upon individual rights which must be checked or rights will be lost to the people.

Believes a balanced economy must depend upon private competitive enterprise, free of Government control except for adjustment of wrongs brought about by bad faith. Believes capital and labor should settle own disputes with government only in role as arbiter.

Believes economy of this region based primarily on agriculture, believes farmers of this section capable, sound-thinking Americans; favors stabilized farm economy but believes many features of farm program should be at option of the farmer and not at the whim or caprice of Bureaucrats. Problem can not be solved overnight, but is being solved and that farmer's suggestions and advice should be followed and used. Pledges full assistance to Canadian Dam and all other water conservation projects in district; sees such projects as sound investment and essential to economy of district and also vital to national defense. Believes federal aid to education is double taxation; believes if government will attend to own affairs, leave our tidelands alone and conduct itself in accordance with Constitution, Texas won't have to worry about federal aid to our schools.

Believes Civil Rights is a mis-nomer, is purely political and will not aid any of the peoples involved; if Constitution is followed there is no necessity for a Civil Rights program by Congress. Constitution provides that program fairly and honestly.

Believes the old people are not getting their just dues, too much of

the money set aside for them going into overhead costs, that they are entitled to more courtesy in their claims and requests. Believes in soundness of depletion allowance for oil and gas business.

Believes that soft treatment of traitors should cease. Believes in drastic reductions in government costs, abolition of over-lapping bureaus, cleaning out of overstaffed departments, stream-lining red tape, demands full and fair day's work on part of every government employee, and courtesy to the taxpayers as they go along.

Believes in proper preparedness and defense of this country first; do the cutting where it will not weaken the strength of the nation. Believes income taxes too high, that proper economy can bring about

Believes rights of Veterans to purchase land under Veterans bill should be immediately stream-lined, completely freed of red tape and all political favoritism should be abolished.

Summed up, Walter Rogers believes in our American way of life, is for efficiency and economy in government, and pledges the people of this district to work for these ideals.

He is widely-known and respected as an able and courageous lawyer and a conscientious and patriotic citizen.

He offers to the people of the district experience and training. He is successful in his own profession.

Walter Rogers has as much at stake in the future of this country as any of the rest of us. Here is the Rogers family. Standing, left to right, are John, Walter and Tommy. Seated, left to right, are Mary Catherine, Mrs. Jean Rogers, Robert and Susan. "We're one family

# Let's Go To Church Sunday

EVERY SUNDAY . . . Easter is more to every grateful heart than the thrill of wearing smart new clothes . . . more than gladness that the long Winter is over and Spring has come again . . . more than looking forward to the full blooming of a happy Summer!

It is the renewal of hope in every heart that life can be good, a renewal of faith in the future, an acknowledgment of the joyous reassurance in those immortal words, "Let not your heart be troubled, neither let it be afraid." The glorious words that have rolled down the centuries bringing solace and relief to the burdened, are needed in today's confused and anxious world. To Him who said them, let us pay the tribute of our presence in His House. He is Risen! Come to Church on Easter!

### FIRST AID TO THE AILING HOUSE BY ROGER C. WHITMAN

QUESTION: We have white painted woodwork, which is quite a problem to keep clean, because of my small children. I would like to change this finish to a varnished effect, to get a natural wood finish. It is no pleasure trying to keep white woodwork really white with many little hands around. Please advise.

ANSWER: It will not be very easy to remove the paint completely, which should be done in order to apply varnish. If you can rent or buy a small portable electric sander it would save time in taking off the paint. If you cannot get one, soften the paint with paint remover and then scrape it off with scrapers, rough cloths and steel wool. Follow by thorough cleaning off with turpentine, for not a trace of the remover should remain to spoil the new finish. If you work in the kitchen, be sure to get a non-inflammable type of paint remover because of fire hazard. You may need to do some sandpapering to get a smooth clean surface. After wiping off the dust, apply a coat of quick-drying varnish. When this is dry, sand lightly and dust off, then follow with the final coat

# Billion Dollars Cut From ECA Fund By House Foreign Relations Group; Truman Plans Speaking Campaign

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

FOREIGN AID:

Billion Lopped

Whether it portended a more realistic view toward European recovery needs, or was just symptomatic of a seasonal purse-tightening effort on the part of some congressmen, there were major headlines in the fact that the house foreign affairs committee lopped a billion dollars off foreign aid requests for next year.

Slashing a proposal made by President Truman, the committee went on to recommend that the existing gap in foreign relief be filled with U.S. farm surpluses.

THAT WOULD make sense to most Americans, probably, except those so energetically and enthusiastically committed to foreign aid without any limit or restrictions. that they brand as narrow isolationists anyone who argues that U.S. welfare ought to be considered along with welfare of other na-

Paul G. Hoffman, foreign recovery administrator, was unable to say immediately what effect the foreign aid plan slash would have. He said he would prefer to study the proposal and ascertain what kind of farm surpluses the govern- EASTER SEALS: ment has in its bins, and whether Europe needs them.

HE SAID he already knows these surpluses include wheat, cotton and tobacco. A house committee member also named these three and added corn, oats, barley, fats, oils and dairy products. No mention was made of the huge surpluses of potatoes and eggs which America Russell, who has had cerebral palalso has on hand.

Hoffman, who most likely would end up opposing surpluses in lieu of cash, would be hard put, it appeared, to make the average American believe that a war-ravaged Europe couldn't use, or didn't need, such items as eggs, potatoes, corn, fats oils and dairy products. There are many American families right here at home who would be delighted if they ever had a sufficiency of any of these items.

### RED CURBS:

Caution Urged

The federal justice department has warned congress to "move with caution" in acting on anti-Communist legislation, some of which, the department said, would "inflict punishment on named groups without jury trial."

THUS the nation is treated to the ironical paradox of having the restrictions of its own constitution

As an example, Peyton Ford, assistant to U.S. Attorney General McGrath, told the house un-American activities committee "it is by no means certain" that the constitutionality of such legislation could be upheld.

AS ALMOST every schoolboy knows, the constitution was kicked around plenty during the days immediately preceding World War II on the pretext that such violations were for the "safety of the nation."

It seems regrettable, then, that a little leeway couldn't be taken by these same patriots when it comes to preserving the "safety of the nation" when war again is openly talked and envisioned.

## **RENT CONTROL:**

Soon to Go?

Federal rent controls soon would be a thing of the past, if a particular action of congress could be construed as an indication—and it talk" in Chicago stadium the night able for the Christian. was so construed by everyone in of May 15 at a giant Democratic Washington.

CONGRESS gave the President a broad hint that there may not be any rent controls after June 30, when it sent to him a money bill that included funds earmarked to pay off employees of the rent control agency.

The senate completed legislative action on the measure—a 783 million dollar deficiency bill-to provide extra money for various federal agencies for the year ending

INCLUDED in the measure was four million dollars for the office of housing expediter Tighe E. Woods. Of that amount, more than two and one-half million was to be used to pay for the terminal leave of employees. The other 1.25 was for operating expenses for which Woods had asked 3.6 millions.

### LEOPOLD: Storm & Strife

The future appeared rugged for ex-King Leopold of Belgium and almost as rugged and surely as uncertain for his troubled country. The fight to restore Leopold to the Belgian throne, which he abdicated when the German hordes overran

Belgium, had become a bitter one. The monarchists won a victory at the polls on a referendum on restoration of the monarchy.

Marvelous as it is, Christianity is God offering to man the power to rise out of our dead selves, to do for us what we could never have done for ourselves. What has this to do with Easter? The bills were the first two emerging from a legislative committee named recently at national crime prevention conference of federal, state and local officials

The ban on gambling communications would be enforced by the federal regulatory power over radio, telephone and telegram under the proposed bill.

It would exempt the reporting of sporting events for publication or broadcasting as news, although placing some curbs on the broadcasting of horse races.

In connection with horse racing, radio and television stations would be required to wait at least an hour after a race is run before giving the results. They would be prohibited from giving out gambling information before any race on the day it is run.

This time lag, the Justice Department said, is intended to destroy the usefulness of the information for gambling without its losing its value as news.

The proposed attack on slot machines would apply to any device which uses the element of chance to return anything of value to the player. It would not apply to vending machines, or music boxes.
