

Doors Open For Junior Fair Saturday

The Future Farmers of America, Future Homemakers of America, 4-H Club boys and girls will celebrate the Stratford Jamboree, sponsored by the American Legion, by exhibiting their demonstrations at the Stratford School bus barn and Recreation Hall Saturday. These exhibits will be open to the public starting at 8:00 A. M. and will close at 4:00 P. M.

In the Recreation Hall, which is just behind the high school building, the 4-H Club girls will display individual exhibits of clothing articles, baked products, and records that they have completed this year. Vegetables, crops, and flowers will be exhibited in this room also.

In the bus barn, which is between the school buildings, the livestock, poultry, and rabbits will be exhibited.

Judging will start at 8:00 A. M. Saturday and will continue until 10:00. Beginning at 8:00 A. M. the crops will be judged, including wheat and various sorghum crops. Earl Riffe will judge the wheat and John Steel will judge the other field crops. The poultry and rabbit judging will start at 8:30. Marvin Harrison will judge the poultry, and a judge from Amarillo will place the rabbits. At 9:00 A. M. the flowers, vegetables, and individual exhibits will be judged. Mrs. John Bergner of Texhoma will judge the flowers, Mrs. Roy Strother, Stratford, will judge fruits and canned foods, and Mrs. Virgie P. Wheeler, Home Demonstration Agent of Moore County, will judge the individual exhibits. The livestock judging will also begin at 9:00 A. M. Mr. England, head of Animal Husbandry in Panhandle Agricultural and Mechanical College of Goodwell, will judge hogs and calves.

Thirty-six girls have prepared exhibits from the 4-H club and FHA work. Twenty girls will enter exhibits in the flower show. Boys have entered 25 head of calves, 16 hogs, and classes of four different breeds of rabbits including Dutch Ladies, New Zealand Whites, Checkered Giants, and Dee Argent Champaign; 12 coops of poultry, 25 entries in field crops, and 11 entries in vegetables.

Entries will be accepted until 8:00 A. M. Saturday when the judging will start. This year the Junior Fair is being sponsored jointly by the Stratford Chamber of Commerce, the Stratford Lions Club, and the Sherman County Wheat Producers Association. These three organizations have contributed a total of \$240.00 in cash prizes to be awarded to the youngsters for their achievements in 4-H, FFA, and FHA work in the county this year. The general public is invited to attend and inspect the exhibits displayed by the boys and girls.

PTA Meeting Announced For Monday

All parents in Stratford and the surrounding area who are interested in a Parent Teacher Association, are requested to be present at a called session of the PTA Monday, September 11, at 3:30 P. M. at the school building.

The purpose of the meeting is to discuss and decide whether or not the majority wants a P.T.A. organization or whether it shall be combined with the Band Club. It is hoped a representative crowd will be present.

Three Boys Enroll At Wentworth

Carroll Reed, son of Mr. and Mrs. Glenn Reed, has entered Wentworth Military Academy at Lexington, Missouri, and has registered as a Junior in high school.

Bill Riffe, son of Mr. and Mrs. Earl Riffe, has enrolled as a Junior in the Academy high school.

Lloyd King, son of Mr. and Mrs. Arthur King, a graduate of Wentworth High School, has enrolled for his first year in Junior College.

415 Enrolled In Stratford Schools

Four hundred and fifteen students had enrolled in the Stratford Schools Tuesday morning with others continuing to enter the classes. According to the first count, 276 were in grade school, 106 in high school, and the eighth grade has 33 students.

School officials seemed pleased with the cooperation of the public at the opening of school although parents of several first graders have failed to secure birth certificates for their children which is required by law.

Mrs. Kullman and Mrs. Stubblefield are first grade teachers, Miss Enlow and Mrs. Barker are second grade teachers, Mrs. Tinsley and Mrs. Hammons are third grade teachers, Mrs. Snow has been assigned to the fourth grade, Mrs. Gilstrap is the fifth grade teacher, Mr. Shelton has been assigned to the sixth grade and Mrs. C. D. Holmes is the seventh grade teacher.

Hugh Stewart is the grade school principal.

High School faculty members are H. R. Stewart, shop; Duard Lamb, Agriculture; Dan Whitaker, band; Miss Beatrice Kalka, home economics; Miss Arlene Hargrove, English; Lyle Green, science; Miss Ila Lewis, mathematics; David Grayson, social science; Troy Moffett, commercial; R. W. Stewart, high school principal and health teacher, and C. D. Holmes, superintendent.

Parade Will Form On 5th Street At 10:30

Parade entries for the grand parade which will be held in the third annual Stratford Jamboree at 11:00 A. M. Saturday will gather on Fifth Street between Main Street and U. S. Highway 287 at 10:30 A. M. for classification and places for appearance. Led by the American Legion Color Guard, the parade will be headed by Stratford's 51-piece high school band. Tommy Wakefield will head the band as drum major.

Colorful floats, old timers on horseback, and an array of vehicles collected by members of the younger set are expected to make their appearance on Main Street as the parade passes. Although preparations were slow in getting started, parade committeemen believe those entering the parade will present a good show this year.

Free Barbecue Arranged For Saturday Noon

A free barbecue will be served near the American Legion building in Stratford Saturday at noon to feed the celebration visitors. Jim Morton, Dumas barbecue chef, will prepare the meal.

Ten quarters of beef will be prepared to feed the crowd. The free barbecue is being made possible through donations of the Stratford Lions Club, the American Legion, the Farm Bureau and local individuals who look forward to a free barbecue as a major event in the annual celebration.

The free barbecue this year will be the first attempt of a celebration committee to feed visitors at the Jamboree free of charge.

Honored On Birthday

Mrs. D. L. Buckles entertained Friday evening with a six o'clock birthday dinner honoring R. C. Buckles. Those enjoying the occasion were Mr. and Mrs. R. C. Buckles, Mr. and Mrs. W. Arthur Milton, Mr. and Mrs. R. L. Milton of Conway Springs, Kansas, the parents of Mrs. R. C. Buckles and Arthur Milton, and Mr. and Mrs. C. M. Butte of Oakmulgee, Oklahoma.

Later in the evening the dinner party, and their hostess were entertained in the home of Mr. and Mrs. L. J. Davis where a surprise birthday party was given in Mr. Buckles' honor.

Foreman Will Receive Air Force Wings

Aviation Cadet William A. Foreman will be graduated from the U. S. Air Force Multi-Engine Pilot School at Reese Air Force Base, Texas, with the other members of his class who have successfully completed a year of intensive training qualifying them as pilots in the United States Air Force.

Graduation exercises begin September 15 at eight o'clock in the morning, with an aerial review flown by members of the class. Wings and diplomas will be awarded at a formal ceremony in the base theater at ten o'clock, after which the newly commissioned officers will review the troops of the 3500th Pilot Training Wing.

The announcement was made by Colonel George W. Parry, USAF Commander.

Mr. and Mrs. Dan Foreman plan to attend their sons graduation ceremonies.

Stratford Party Wins Third In Salmon Derby

Lyall Murdock, Lee Johnson, W. W. Davis, Van B. Boston, and Jimmy Davis, representing Stratford in the five day Salmon Derby at Astoria, Oregon, won third place in the event by catching over 800 pounds of fish. Three of the fish caught by the fisherman weighed over 40 pounds.

Approximately 10,000 sportsmen took part in the Salmon Derby.

Frizzells In Car Accident Near Dumas

Mr. and Mrs. Bill Frizzell and son sustained minor injuries when their car was involved in a three-vehicle accident near Dumas Tuesday morning.

The Frizzells had been driving in a chain of traffic. A driver of a pickup suddenly parked the motor vehicle in the right hand lane without giving any signals. The car between the Frizzell car and the pickup managed to stop his car just as his bumper touched the bumper of the pickup. Choosing between a headon crash with a car approaching from the opposite direction and striking the car ahead, Frizzell rode his brakes as his car plowed into the rear of the car just ahead.

The accident occurred on U. S. 287 about two miles north of Dumas.

McWilliams Brothers Meet In Mississippi

Mr. and Mrs. J. B. McWilliams received a telegram Friday from their sons, telling them Boyd McWilliams had arrived at Keesler Field, Mississippi, where Kirk McWilliams has been stationed since the first of June. Boyd was moved from Lackland Air Force Base at San Antonio.

Devo Oquin Hospitalized In Amarillo

Devo Oquin was returned to Northwest Texas Hospital in Amarillo Saturday night for medical treatment. He had been home from the hospital for about a week, after undergoing a major operation.

Mr. and Mrs. T. P. Oquin, Mrs. Frank Sanders, and Mr. and Mrs. J. R. Marshall visited in the hospital Sunday.

Coccidiosis
Use of sanitary feeders and waterers helps to protect chickens against coccidiosis.

Revival Meeting Will Commence September 10

Rev. Otis Runyon

Revival services will commence at the Assembly of God Church Sunday with Rev. Otis Runyon, Loveland, Colorado evangelist, delivering the evangelistic messages.

Services will be held each night except Saturday at 8:00 o'clock.

Sermon subjects will include "Salvation," "The Baptism of the Holy Spirit," "Divine Healing," and the "Second Coming of the Lord."

Rev. I. L. Walker, pastor of the Assembly of God Church, extends a cordial invitation to the public to attend any or all of the services.

Twirling Class Will Develop Drum Major

A twirling class which is open to all students, from the seventh grade up, in the Stratford School will be opened within the next two weeks. From this class will be selected a drum major and majorette. Tommy Wakefield is serving the band as drum major during the training period.

It is the plans of the band to develop its own color guard to carry the school banner, the American and State flag in all public appearances.

Six band members graduated last year and approximately the same number of new musicians will join the organization this year.

The band will play an important role in the grand parade Saturday in the Jamboree celebration, and will appear in the Chamber of Commerce parade at the Baca County fair in Springfield, Colorado, September 23.

White gloves will be worn by the marching band this year to give it a more colorful appearance.

The junior band, composed of students of the fifth and sixth grades, started practice Wednesday. Initial turnouts give rise to the hopes of a junior band of from 35 to 40 members this year.

Boy Scouts Hold First Fall Meeting

Stratford Boy Scouts held their first fall meeting in the American Legion Hall Monday night with 12 boys present. Arthur Judd states that the meetings of the scouts will continue regularly at 7:30 P. M. Mondays and invites all boys 11 years of age who have been in the Cub Scouts to join the Boy Scout Troop.

Howard Hart To Attend Lamar College

Howard Lynn Hart will attend Lamar Junior College in Lamar, Colorado this fall.

Stratford Lions Club Will Meet Monday Night

Meetings of the Stratford Lions Club will be resumed with a business meeting and banquet which will be held in the Palace Cafe Monday at 7:30 P. M.

Monday, September 18, will be observed as ladies night, and the district governor will be the principal speaker at this meeting.

Three Rodeos Will Entertain Jamboree Crowd

Three rodeos will entertain crowds visiting in Stratford during the third annual Stratford Jamboree. The rodeos will be staged at 2:30 P. M. Saturday, 7:30 P. M. Saturday, and Sunday at 2:30 P. M.

The \$1,100 in cash prizes for the events has attracted many of the best amateur rodeo performers in the state area.

The rodeo show will be opened Friday evening with a matched roping contest which will start at 7:30.

Bronc riding, bare back bronc riding, calf roping, bull riding, and bull dogging will be major attractions at each rodeo.

Trophy buckles will be presented for each event and for the best all-around cowboy.

The cowgirl sponsored contest which may be entered by girls sponsored by business firms, ranches or individuals, will be a highlight feature of the rodeo. The winner will be determined by the ability of the girl to handle her horse through the barricade course which will be set up in the rodeo arena.

Mrs. Smith Is Improving

Mrs. Earl Smith is in an improved condition in Northwest Texas Hospital. She had been recovering rapidly from a major operation until Saturday of last week when her condition suddenly became worse. Relatives state they believe the crisis has passed.

Mrs. McDaniel Brought Home Monday

Mrs. Elma McDaniel was brought home Monday from Dumas Memorial Hospital where she had been receiving treatment for injuries she received in a car accident last week.

Her daughter, Mrs. Alex Coates, suffering from a fractured pelvis, is still a patient in the hospital.

Texas Tech Will Enroll Several Local Students

Texas Tech has been chosen as the place for study by several Stratford students. Those planning to attend Texas Tech this year are Clyde Hudson, Bill Reed, Miss Jenelle Reynolds, Claude Sloan, Jr., Kenneth Pemberton, and Misses Dolores and Beverly Smith.

Two Cases In District Court

District Judge Harry Schultz disposed of two cases in a short session of district court here Saturday.

A divorce was granted in the case of Merle R. Barton vs. Mildred Irene Barton.

The case of L. M. Price vs. Alma Marie Parker et al, a case to try title, was decided in favor of the plaintiff.

Calves
Cold, damp weather is harder on calves than cold, dry weather.

Stratford Wins NPAA Baseball Championship

Stratford won the North Plains Athletic Association Baseball championship Sunday afternoon by defeating Boise City in a 4 to 3 game. The game closed one of the most successful seasons of the Stratford team.

Failure of several towns to return games scheduled to have been played in Stratford and the rising costs of materials resulted in a \$400 club deficit which was made up this week by Stratford business men and baseball fans.

Honored With Pre-Nuptial Shower

The home of Mrs. Cone Donelson was the scene Tuesday for a miscellaneous shower given by Mrs. W. N. Price, Mrs. Charles Watson, Mrs. Earl Riffe and Mrs. Cone Donelson, honoring Miss Sheila Jo Duby, who will become Mrs. Marion Moss September 12.

Mrs. William Glenn Hart registered the guests. Miss Beverly Smith assisted the bride-elect. Mrs. Charles Hooley and Mrs. Thurman Purdy assisted at the table.

The table was covered with a blue slipper satin cloth draped with blue silk maline. Four maline bows were placed on each side of the table cloth. They were centered with a gardenia and a chain of smilax extended from each bow.

The center decoration was a silver compote filled with fleur de muir, white carnations, fever few, and white button mums.

A dresden bride was placed beside the flower arrangement. One hundred and five guests called during the afternoon.

Jackie Davis Selects Tarleton State College

Jackie Davis, who graduated from the Stratford High School this spring, will attend Tarleton State College at Stephenville. He plans to leave for Stephenville Saturday.

Boy Scout Gathering September 26

A meeting to which all boys of Cub Scout and Scout ages and their parents are invited, will be held at 7:30 P. M. in the American Legion Hall September 26. A covered dish supper will be enjoyed.

The object of the meeting is to introduce the Fall Round-Up program for Cub Scouts of Sherman County. Boy Scouts and their parents of the Conlen community will be extended an invitation to attend.

Boys in the age group of 8 to 9 years are especially urged to be present. For entertainment, a movie, "The Years Between," will be shown.

A Court of Honor will be held to present awards to scouts for advancements they made while attending summer camps.

Neighborhood Commissioner Clifford Byrd will preside at the gathering. He will be assisted by W. M. Teague, scout field executive.

Mrs. Lowe Entertains Circle Three

Circle Three of the ladies of the Christian Church met Wednesday afternoon in the home of Mrs. Bill Lowe with four members present. The devotional was given by Mrs. Frank Sutton.

A short study of "Korea in the Christian Light," and "The Christians in Korea," was conducted by Mrs. R. C. Buckles.

The subject, "World Council Endorses United Nations Stand on Korea," was reviewed by Mrs. Bill Lowe.

The next wedding will be with Mrs. Frank Sutton with Mrs. Bill Lowe as leader.

4.59 Inch Of Rains Fall In Wet Season

August, the one time dry month, brought Stratford 3.66 inches of rain, with larger amounts of moisture being reported in agricultural sections. The August moisture fell in 13 rains.

September is getting off to a good start with .33 of an inch falling over the Labor Day week-end.

Just 4.59 inches of rain has many peculiar effects on Stratford. John Pemberton was seen sweeping a bull frog from the Pioneer Barber Shop Tuesday morning. It may have been planted there by some practical joker, but just the same the frog was there.

4-H Club Girls Return From Training School

Three 4-H Club girls, Miss Mildred Bennett, Miss Barbara Weatherford, representing Sherman County, Miss Mary Anne Hunter of Texline, representing Dallam County, and Miss Corrine Stinson, Dallam County Home Demonstration Agent, returned Sunday from Bastrop State Park where they attended a Junior Leadership Laboratory for 4-H club girls and boys.

Three boys from Ochiltree county attended the meeting.

Swimming parties were enjoyed by the boys and girls just before breakfast at 7:00 A. M. Following the breakfast, delegates were divided into work groups for the study of courses in "Citizenship," "Nature," "Farm and Home Safety," "Youth Leads," "Recreation," "Birds and Bugs," and "Soil Conservation."

Rest periods in the afternoons were followed by swimming and unit meetings at which plans were made for night recreation.

Table programs furnished entertainment at evening meals. This was followed by night recreation periods and camp fire ceremonies.

Friday was devoted to an achievement day program at which time youths from each study group gave reviews and demonstrations of what they had learned during the meeting.

Miss Bennett met with the Texas State 4-H Club Council at the camp and specialized in "Farm and Home Safety."

Two Dances In Legion Hall

Jamboree celebrators who enjoy dancing will have two evenings of dancing at the third annual Stratford Jamboree celebration Friday and Saturday. Dancing will commence in the American Legion Hall at 9:00 o'clock each evening.

Miss McWilliams Enters TSCW At Denton

Miss Dale McWilliams, daughter of Mr. and Mrs. J. B. McWilliams, left Friday to enter Texas State College for Women at Denton, Texas.

Mrs. Beard Enrolls In Business College

Mrs. Violet Beard moved to Amarillo Thursday of last week to enter Draughn's Business College. Fall courses of study began Monday.

Mrs. Lenoir Injured In Fall At Home

Mrs. J. T. Lenoir, a former Stratford resident, is in St. Francis Hospital in Wichita, Kansas receiving treatment for a fractured leg. Mrs. Lenoir was injured in a fall at her home in Pratt, Kansas.

Long Range Bombers May Keep Peace

During the first weeks of the Korean War Americans were stunned by the tragic inade-

quacy of our forces and equipment. Many felt a personal responsibility for the needless loss of life. It was a healthy and well-founded reaction which will lead to correction of mistakes and weeding out of inept officials. There are already encouraging signs of improvement. John Osborne, Time and Life senior correspondent in the

Pacific, writes: "The American effort and the American soldier in Korea are magnificent. Doubtless we could and should have been better prepared. But today we have in Korea more men and more arms than we sent to the invasion of North Africa in November of 1942, eleven months after Pearl Harbor."

Intelligence reports received in Washington indicate that the evident military ability of this country to cope with the communists in Korea has impressed the countries of Southeast Asia. Applications for communist party membership are dwindling and pictures of the communist leader Mao Tse-tung are disappearing from shop windows. Even more encouraging is the opinion of authorities on the mystery of why Russia has not moved into other areas while the United States had its hands full in Korea. They point out that we have in readiness, prepared to strike with hair-trigger swiftness, a fleet of more than 2,000 Air Force bombers able to carry atom bombs within a matter of hours to every major city in Russia. And we have the bombs to do the job. If the opinion of these authorities is correct, this factor, plus an industrial production potential of near astronomical proportions, has checked Russia for the time being.

Another element of strength that is not fully appreciated is the growing efficiency and productive capacity of American agriculture. Food is a mighty weapon and our farms are producing it in record quantities. The magazine Country Gentleman recently described what has been happening on the farm: "Ever since the end of World War II, farmers have been turning out, year after year, nearly a fourth more than in the year of Pearl Harbor, and it's hard to picture the peaks to which farm output might be pushed under necessity. Leading agricultural scientists now believe that the output of the farm plant of the United States could be doubled by putting to use all the production knowledge we now have."

"Significantly, the great upsurge in farm production during and since World War II came about with only a minor increase in acreage harvested. Furthermore, the gains were made in a period when farmers had fewer workers than prewar."

With all our prodigality, we are demonstrating as never before the achievements attainable by free men. It is these achievements that are now being felt in Korea and that are earning the respect of the other nations, including Russia.

James Winchell Is New Clerk In Post Office

James Winchell began work this week as a substitute clerk in the Stratford Post Office.

Richards Named To State TEC

District Attorney Floyd H. Richards has been appointed by Governor Allan Shivers as a member of the Texas Economy Commission.

The commission is a citizen's group to study the state executive branch of government with a view of increased efficiency and economy.

Anything Can Get Into Woman's Hair These Days

ROME, Italy—The International College of Hairdressers had their annual convention in Rome recently and proved, if nothing else, anything can get in a woman's hair these days.

They put on a demonstration of evening hair styles with 20 models which used everything from dye to daisies. About the only things that were not popular were long hair and dark brunets.

Almost everything that came to hand went into the masterpieces. There was hair with egret feathers; hair with lace; hair with orchids. Artificial butterflies were used and feathers and metallic leaves.

In almost every case the hair was either dressed with jewels or sparkling with tiny brilliants. The hairdressers from seven countries seemed unanimous on the short hair style—with ears right out in the open—and on their preference for blond, red haired and silver gray models.

Cow-Calls
When calling cows from pasture, the Northern farmer is likely to sound off with something like "coboss," while the midlander will call "soo-dow" or "sookie," and the linguistic southerner "so-ee" or "co-wench."

Radioactivity

Death Without Noise

WASHINGTON — An invisible dust of radioactive "death sand" could spread over a city and kill its population by radioactivity without the noisy warning of an atomic bomb says Dr. Louis N. Ridenour, dean of the University of Illinois graduate school.

What would be done would be to collect the debris of smashed uranium atoms from atomic "furnaces" in which fissionable material was being "burned." About a dozen of these fissionable products would be useful in warfare.

Very fine sand would be coated with these radioactive poisons and spread very thinly over the area where it was desired to wipe out life.

The person in a poisoned area has no way of knowing that he is in danger either by the evidence of his senses or by any unsophisticated tests. He may receive a lethal dose of radiation before he knows that he is endangered, and yet a few days later he may die.

Sow Eats Way Into Milk Can; Out Again in 8 Hours

LAWTON, Okla. — Bob Beck's prize sow was a glutton.

He found the missing porker, only her curly tail sticking out of an overturned milk can which had been filled with kaffir corn. The farmer's attempt to pull her out brought only anguished squeals from the overstuffed pig.

After a consultation with a veterinarian, Beck decided to let nature take its course. Eight digestive hours later the slightly slimmer sow slid to freedom.

March, Month of Artists

There are only eight out of March's 31 days that do not mark the birth of one or more lions of arts and letters. This list starts off with Augustus Saint Gaudens, sculptor, on March 1st, and finishes with Nikolai Gogol, Russian writer, and Franz Josef Hayden, an Austrian composer, on March 31. A partial roll call turns up artists Vincent Van Gogh, Sir Henry Raeburn, Michelangelo, Fra Angelico, Nathaniel Currier (Currier and Ives prints), Anthony Vandyke, Rosa Bonheur and Francisco Jose de Goya; and sculptors Gutzon Borglum and Jo Davidson.

Allow Time When Mixing Colors

Different colors of paint, enamel and lacquer dry in different ways. Some dry lighter. Some change quite a little. Consequently, if you can't match a wet sample of the coating material—when you think you're close to the desired result—be sure to brush out a sample and let it dry. It's best to brush out your sample on a surface similar to that on which the coating will be used.

Trolley Coaches

Trolley coaches are increasing as means of public transit while streetcars are disappearing. There were only 16,000 streetcars in use in 1949, a decrease of 41 per cent since 1944. In the same time, there was a 68 per cent increase in the number of trolley coaches.

For Emergencies

It pays to keep a pad of sterile gauze around the barn or stable, for emergency use on wounds and cuts in animals.

Flagpole Saves Man From Death in 3-Story Fall

SPRINGFIELD, Mass. — Henry Lefave was watching a parade of veterans in Springfield from the third-story window of his hotel. Suddenly he toppled out and lived to tell about it.

As he fell toward the crowd below, he grabbed the flagpole jutting from the third-floor window. The pole was too frail to hold his weight. It bent perilously and he caught hold of a sign bracket on the front of the building.

He hung there several seconds before losing his grip. He fell about 10 feet, but managed to grab a chain supporting the lower end of the sign.

By this time, his plight was noticed by other parade spectators. Several broke through the line of march, ran up the stairs of the hotel, and hauled Lefave in a second-floor window as he was about to lose his grip again.

Lefave suffered minor back and head injuries. His acrobatics broke up the parade.

Siamese Twins Born At Brooklyn Hospital

NEW YORK—Twin boys who have two heads, four arms and two chests, but only a single trunk and only two legs were born recently at Kings County Hospital in Brooklyn.

Named Peter and Paul, attendants reported they were doing nicely and had even developed personalities. Their parents have ignored them and no one else seems interested in them.

Physicians say the twins never will be able to walk. And, because of the way they are joined, it will be impossible to separate them.

Psychiatrists in U.S.

Qualified psychiatrists in this country number only about 3,200, or one to about 58 physicians and one to about 45 clergymen.

Counterfeiting

Great Increase Noted

WASHINGTON—Secret Service Chief U. E. Baughman has asked a senate appropriations committee for more money to hire more men.

He reported he needed more men to combat counterfeit rings now turning out bogus money at the rate of \$100,000 a month.

"More and more criminals are turning to counterfeiting," he said. "Additional men and equipment are needed to fight this criminal activity to prevent cashiers and storekeepers from losing hundreds of thousands of dollars."

He said the bogus money centers were New York and Chicago, although he mentioned St. Louis and several unspecified areas.

Baughman said his agents seized more than \$1,000,000 in counterfeit notes last year, and in the first five months of this year captured \$550,000. About one third of the "money" was in circulation when confiscated.

Doctor Finally Presents 60-Year-Old \$15,120 Bill

WASHINGTON.—Dr. W. Sinclair Bowen finally presented his bill for treatments he gave a woman patient for more than 60 years.

The bill came to \$15,120. Dr. Bowen presented a claim against the \$165,000 estate of the late Mrs. Louise M. Holmead.

For years, Dr. Bowen said, he treated Mrs. Holmead practically for free because he believed she couldn't afford to pay.

When she died she left him \$1,500 in her will—and the rest of her estate to the Church of Epiphany. Dr. Bowen figured his bill this way: 6,240 visits at \$3 a visit—\$18,720. But he figures Mrs. Holmead paid him \$5 a month for 720 months, or \$3,600.

In presenting his bill, Dr. Bowen said:

"As it now stands, the whole thing is unfair to me and to the whole medical profession."

Bicycle Accidents

Study of the claims paid on the lives of industrial policy-holders during 1946 through 1948 show that seven-eighths of the fatal bicycle accidents were collision with motor vehicles, and that most of the remainder were the result of falls off bicycles. Three-fourths of the deaths were among boys five to 19 years of age. There is evidence that motorists are giving increasing attention to safety.

New Canadian Nickel

Next year Canada will pay tribute to Cronstedt, the Swedish scientist who discovered nickel in 1751, with the minting of a commemorative five-cent piece. The coin will mark the 200th anniversary of the isolation and naming of nickel.

Nitrogen and Waste Products May Answer Need for Cheap Feed

MILWAUKEE—A new livestock feed, which may mean as much economically to the farmer as the introduction of hybrid corn 25 years ago, was revealed at a recent meeting of Central Retail Feed association here.

The feed, made from waste products and nitrogen from the air, was revealed by Roswell Garst, president of the Garst & Thomas Hybrid Corn company, Coon Rapids, Iowa.

Garst said recent agricultural research promised to answer the need for cheaper feed for cattle and sheep by the use of cellulose and cheap protein in the form of urea, which is made from nitrogen in the air.

He said cellulose could be used as a basic feed for cud chewing animals if protein is added. By adding the protein the cellulose becomes digestible.

There is an almost limitless supply from waste products such as corn stalks or soy bean straw, he said. Urea is about one-fifth as expensive as normal protein.

"All you have to do is pick up the waste products from the field and combine them with the protein from the air—urea," he said. "The problem in feeding people is to feed as much cellulose and as much urea as possible because they are the multiple and cheap feeds."

The process of combining cellulose and urea is actually a "perfect wintertime pasture which is a good imitation of good summer pasture because green grass already has protein," Garst said.

The University of Wisconsin college of agriculture has done most of the basic research in the development of the use of urea. Garst urged feed dealers to sell the "urea idea."

"I think finally we will have lamb chops for breakfast and beef-steak for supper at a price we can afford to pay," he said.

Today there are about 80 million cattle in the United States, the same number as when the country had only 120 million population.

Living Under the Ground Doesn't Make Man Hermit

FAITH, S. D.—Loren E. Slocum, 79, denies emphatically that he's a hermit, although he has lived eight feet underground for more than 40 years. He takes the position that living underground doesn't necessarily make a man a hermit.

He argues that because he takes a three-mile walk daily from his dugout home on the prairie to near-by Faith he is out of the hermit category. He refuses to divulge what he does call himself.

Slocum is a widely known character of the Faith area. He arrived riding a horse across the plains, pulling an Indian style travois. Nobody knows for certain where he came from.

In 1909, early residents were too busy settling Faith to pay much attention to the eccentric newcomer, but he became the topic of conversation when it was learned he had dug a hole in the open prairie northwest of the town and had moved into it.

Slocum had had three other "homes" since he dug that first hole and all have been underground. His present dugout is a five by eight hole with a trap door leading downward and a three foot smoke pipe protruding skyward.

His few personal belongings are crammed in the small dugout and the rugged old-timer sleeps on a couple of rough boards. During the summer months Slocum cooks on an old-fashioned wood range that sets on the debris above the dugout.

"Some people have said my dugout isn't healthy," Slocum snorts. "But I've lived underground for 40 years and I'm still here and those others have been dead a long time."

The wiry dugout dweller has accumulated 100 acres of prairie land in the 40 years since he first rode into Faith. The land has no building and no life except rabbits, field mice and skunks.

Say You Saw It In The Star

New Instrument Aids Farmer

FORD TRACTORS now coming off the assembly lines at the Ford Highland Park, Michigan, Plant are equipped with the new Proof-Meter, an instrument which "takes the guesswork out of tractor operation." Actually five instruments in one, the Proof-Meter shows engine speed, tractor speed, power take-off speed, belt pulley speed and total hours

worked by the tractor. The farmer in the picture is recording hours of tractor operation for use in determining his farming costs. In the lower right hand corner is an enlarged close-up of the Proof-Meter, which Dearborn Motors officials say is the first instrument of its kind to be made available on a farm tractor.

Dalhart, Texas

Here is one of the countless variations of the "Quonset 24." Three sections are used as an implement shed; the fourth section, enclosed and fitted with walk-door and window in side panel, makes an ideal workshop.

This simple adaptation, with the entire front unenclosed, is used as a loafing barn for livestock.

This sturdy, attractive roadside stand—a four-section "Quonset 24"—furnishes a fitting display for farm produce.

THE STRAN-STEEL "Quonset 24"

Designed on a new principle and built with new materials, the "Quonset 24" is a really modern farm building, better for scores of uses. It is 24 feet wide, with the length extendable in sections of 12 feet . . . 24'x24', 24'x36', 24'x48', and so on.

"Quonsets" are the only buildings that combine all-steel construction with great flexibility. Each 12-foot section can be individually equipped as desired. It may be partitioned or not; the front may be enclosed, left open or fitted with roller doors; extra sections may be added whenever required. Additional windows and walk-doors, insulation and other equipment are easily installed. This wide utility is due to a unique, fast construction method, which employs Stran-Steel nailable framing members and sheet steel covering that is nailed directly to them.

Inexpensive to build, easy to erect and maintain, fire-safe, the "Quonset 24" is a sound building investment. Write us for full details.

"Quonset" buildings are products of Great Lakes Steel Corporation, a unit of National Steel Corporation.

Materials For Eight Quonset Buildings Are Available

ARMED MIGHT

Russia Has Largest Army

WASHINGTON—Russia has the mightiest army and air forces in the world.

An official estimate made recently by American military men placed Russian strength as of today:

1. An army of 175 divisions ready for combat, and the ability to increase this to 300 divisions within 60 days and 500 in a matter of months. Together with satellite armies, the Soviet can muster 40,000 tanks.
2. An air force "whose strength in nearly all categories is now the largest in the world." It includes long range bombers but none with a range as great as this country's B-36.
3. The world's largest submarine fleet, including some smokel submarines able to remain beneath the surface for long periods.
4. The ability to produce an atomic explosion.

Develop New Weapons

To combat this tremendous force, the United States is concentrating its efforts toward the development and production of revolutionary weapons, some of which made their first appearance during the war.

These American military experts contend that scientific advances make it possible to achieve relative security without spending to the point of bankruptcy. But they say this less costly way of matching Russia's military strength will still not be cheap or easy.

America's apparent long lead in atomic bomb production, plus the capacity of the United States air force to deliver the bombs, has been and is now preventing Russia from seizing western Europe.

Among the other sensational disclosures of western military men is their belief that there is now practically a military vacuum in western Europe which invites aggression. And they predict that this vacuum will cause a war if it is not filled by the time Russia has a substantial stock pile of atom bombs and a peak of military strength.

When will that be? Military experts report that no one outside the Kremlin knows, but have estimated it around 1953.

Specialists in Training

Many military leaders do not believe huge conscripted armies will be necessary to defend Europe in case of war.

They explain it this way: the best means of preventing an invasion of western Europe is to be prepared to meet masses of heavily mechanized ground forces with smaller numbers of highly scientific ground troops equipped with revolutionary new weapons.

In connection with this point of view, Secretary of the Army Pace said recently, "Adding to these the more recent developments with regard to guided missiles and rockets, target seeking equipment, and the possibilities of tactical use of atomic weapons, it may well be that tank warfare as we know it will soon be obsolete."

These official statements about new weapons gave the people of the Atlantic pact countries new confidence, as they doubtless were intended to do. But whether they impressed Russian leaders and will affect Russian policy is something no one knows.

Startling Art Forgery Revealed After 126 Years

LONDON, Eng.—One of the most startling art forgeries in the history of art—probably committed about 1796—has been discovered by the British national gallery.

A recent X-ray of Van Dyck's portrait of Cornelis van der Geest, which hung in the National Gallery for 126 years, has proved that only the head was painted by the master and the rest of the half-length portrait is a forgery.

The painting of the head measured about 15 inches by 13 inches, and the body, painted apparently in the eighteenth century, was added, gallery authorities believe, with the view of selling the picture in England at a higher price.

The forger carefully laid in the wood on which the original head had been painted a larger panel of wood with the brand of the Antwerp Guild, and smoothed them to a continuous surface.

The forged painting was less well done and had to be altered.

The painting has been rehung with the forged part hidden by a wide Dutch frame of black wood.

Bandit Locks Grocer In Ice Box to Cool Off

LOUISVILLE, Ky. — George A. Weber, a grocer, isn't taking any chances with the lock on his refrigerator.

A middle-aged Negro recently shoved Weber into the refrigerator and held him up, taking \$700. Then the man slammed the refrigerator door and plugged the hasp latch with a steel knife sharpener. Weber spent 10 minutes in the cold before a bread delivery man heard his cries for help.

The grocer sawed the hasp off the lock to prevent another such occurrence.

Pregnant Sows

To prevent abortions from injury, sows in the last stage of pregnancy should not be permitted to run with horses and mules or to follow fattening cattle.

Grasshopper Control

Chlordane or toxaphene for grasshopper control can be applied with the ordinary farm sprayer used in weed control.

Child's Legs Broken Twenty-Two Times; She May Walk Again

CHICAGO—Marilyn Kay Howard is just a little girl—only 13 years old—but she has hopes of walking again following a series of rare leg operations.

Her legs have been broken 22 times since she was two years old. She had to quit walking at the age of six. Once seated in a chair, she broke a bone simply by uncrossing her legs too fast.

Marilyn was born with a rare bone condition called osteogenesis imperfecta. It made her leg bones as brittle as matchsticks. By the time she was six her legs had been broken six times.

Several months ago she underwent a series of rare operations at the Illinois Research Hospital. From both of her legs, surgeons removed sections of the main bone between ankle and knee. Then they cut this bone into slices less than an inch thick, threaded the slices into a straight stainless steel rod and put the reinforced bone back into her legs. The legs mended as expected.

So far she has been able to walk only with the aid of crutches or a walking support on rollers. She also wears leather braces, but physicians say all these supports probably can be abandoned in a few weeks.

The brittle bone condition usually clears up at the age of puberty, with the bone growing strong and thicker, physicians report. They expect to remove the steel rods

from her legs if her condition warrants. Already there is X-ray evidence of her leg bones growing thicker.

Said Marilyn, "I never gave up hope, but I sure was surprised when they told me I could walk again. It's wonderful."

Russian Soldier Reports Guerrilla War in Soviet

BERLIN—Sgt. Mikhail Kuratsyev, 24, who fled recently into the British sector of Berlin from Russia, reported to officials that a guerrilla war is being fought against Soviet rule in the Caucasus mountains.

Kuratsyev identified the mountain rebels as survivors of the Chechen and Ingush peoples who had been deported from their south-

ern mountain homeland to Siberia in 1944.

Kuratsyev said his home is only five miles from the border of the former Chechen-Ingush autonomous republic, whose Moslem inhabitants were deported en masse.

"Some managed to avoid deportation and go into hiding," he said. "During my short visit in the Caucasus, I heard they were at present engaged in guerrilla warfare in the mountains."

He reported them a proud, independent people, adverse to any central authority—czarist or Soviet—and they had long been a thorn in the side of the Soviet regime."

Capt. Cooks' Voyage
Captain Cook, when he set sail in 1769 on his famous trip to the South Seas, laid great stress on cleanliness aboard his ship and among his crew. This was the reason, he said, that he was able to return three years later with an enviable record of having lost only one man from disease.

Better Sight
BY THE CARTON

Lamps with empty sockets are about as handy as a ship without a sail! No matter how efficient . . . or how many lamps you have around the house . . . they're so much excess baggage if your supply of lamp-bulbs is down to the bottom of the carton.

Good light is so necessary to good sight. And a carton of bulbs always on hand is insurance against "bulb snatching" . . . being without . . . or inconvenient rushing to the store.

Yes, BULBS ARE MIGHTY IMPORTANT . . . cleanliness is, too! Your lamps and fixtures should be kept clean. Dust and dirt rob you of half the light you pay for. Reflector bowls can be washed with soap and water . . . bulbs wiped clean with a damp cloth. Shades may be dusted, washed or dry-cleaned . . . depending on the type fabric. Light-conditioning your home is economical, too . . . low cost, dependable electric service makes it so!

THERE'S A BULB FOR EVERY JOB . . .
40-60 watt—Strictly decorative . . . such as boudoir lamps, brackets, etc.
75-100 watt—Decorative and functional where the seeing task isn't too demanding.
150-300 watt—Reading, sewing . . . where good, strong light is needed for proper "see-ability."

SOUTHWESTERN PUBLIC SERVICE COMPANY

25 YEARS OF GOOD CITIZENSHIP AND PUBLIC SERVICE

Farm Bureau Announces Meetings

Texas Farm Bureau Federation will conduct a series of sub-district meetings throughout the State during September according to an announcement by J. Walter Hammond, Federation president. A meeting is scheduled for Plainview, Thursday,

September 14, in the Hilton Hotel, and another will be held in Lubbock, Friday, September 15, at the Lubbock Hotel. W. R. Tilson, state farm bureau director of Meadow, will preside. Meetings will start at 10:00 A. M. and will be concluded at 3:00 P. M. State and National Farm Bureau officials will be in attendance.

Farm Bureau policies are developed by the membership. Hammond asserted and the series of meetings has been scheduled so that state and national officials may have the benefit

of the thinking of farmers and ranchers throughout the State, and at the same time for officials of the organization to give farm people more needed information on the program of the Farm Bureau, its aims and accomplishments. Every day the business of farming becomes more complicated, Hammond declared, and the need for a stronger Farm Bureau more necessary.

Seek Furniture For School Recreation Room

School faculty members have hopes of opening the recreation room in the barracks building in the rear of the high school building by the 18th of September. They have hopes of furnishing the room with old discarded chairs which will be repaired by the boys in shop training.

Citizens having furniture they wish to discard may have it picked up by notifying members of the faculty or any high school student.

Science Says Man Can Live on Bread Alone, if Right Kind

WASHINGTON — Stanford research institute scientists report man can live on bread alone, if it is the right kind. It must contain all the natural constituents of wheat, or have these added to white flour before it is baked.

And such bread alone would provide a better diet than that of the average American family today, the scientists reported.

The report was based on extensive experiments with rats, whose nutritional requirements are almost identical with those of humans.

Rats fed only highly fortified white bread grew almost precisely at the same rate and in the same state of health as those fed a mixed diet which, it had been determined experimentally, contained all the necessary constituents.

This was essentially the same bread as could have been made of whole wheat flour. It was only necessary to add water and minute amounts of vitamins A and D.

Rats grown on ordinary bread partly fortified with vitamins, on the other hand, grew at less than one-third this rate and showed various abnormalities. Notable were deficiencies in ability to reproduce.

The experiments demonstrate, says the Stanford report, that "highly enriched bread supplied more of the nutritional factors necessary to well-being than the diet eaten by millions of Americans."

Few Americans, of course, ever attempt to live on bread alone, and the ordinary diet is so varied that there is relatively little obvious dietary deficiency. A diet of which bread constitutes by far the major part, however, is fairly common in some countries where little effort is made to fortify the dough.

"I Couldn't Put A Cow In The Bank"

 There was a time when cattle were a medium of exchange instead of money. Your "money" might get sick, might die, and you couldn't, certainly, store it in a bank and have it get more valuable with every passing year! It's no wonder that our monetary system was developed. You get better returns by banking regularly. Make it a habit.
The First State Bank
 OF STRATFORD

Evolution
 May Have Started in Africa
 PRETORIA, South Africa — Two skulls found in a cave deposit by Dr. Robert Broom, a noted South African scientist, and his assistant, I. T. Robinson, are regarded by Dr. Broom as among the most important discoveries yet made today solving the problem of human evolution.
 The skulls are described by Dr. Broom as very large and almost certainly well within the human range. The ear region and the articulation of the lower jaw are typically human, and very unlike those of the gorilla and the chimpanzee, the cheeks larger and wider. The snout, unlike that of the gorilla, is quite short and the front teeth not larger than in man.
 Dr. Broom said: "Our recent discoveries have shown that there lived in South Africa—perhaps a million years ago, perhaps more — various tribes of pre-men or primitive men. Some had small brains and some had fairly well developed, quite human brains. In some respects the small-brained are more man-like, in other larger-brained types seem more human. But we can definitely say that both are almost man and it seems highly probable that man originated in Africa."

Care of "Toddler"
 Nature quite wisely provides the toddler with the physical ability he needs to get around and "into" everything, for that is just what he craves to do. Parents should protect the toddler from physical danger, but they should not curb his curiosity.

Mr. and Mrs. C. T. Watson were Amarillo visitors Thursday and Friday of last week.

Mr. and Mrs. T. L. Taylor took Mrs. V. O. Gilbert to an Amarillo

doctor Wednesday for an examination.

Mrs. Lucy Kelp spent the week-end with relatives in Hereford.

Mrs. Anna B. Adams and son, Bud Scott, of Dalhart, spent the week-end visiting in the home of Mrs. Eunice Buster.

Miss Nancy Attabury, Amarillo, was a week-end guest of Misses Lelah and Jeanne Price.

Mr. and Mrs. V. O. Lasley visited friends in Oklahoma City over the week-end.

Mr. and Mrs. Frank Judd and Mr. and Mrs. Paul Aduddell were visitors in Oklahoma City last week-end, where Mr. Judd received a medical examination.

Mrs. Marguerite Wilson was a visitor in Amarillo Saturday.

Mr. and Mrs. R. E. Kessie, Austin, Texas, and Mr. and Mrs. Wiley Gilmore, Amarillo, were guests of the Pendleton and Jackson families Sunday.

Lieut. and Mrs. J. H. Slusser and daughter, Sally, returned to their home in Seattle, Washington Saturday after a visit with her father, L. P. Hunter.

Mr. and Mrs. Bill French were visitors in Amarillo Monday night.

Mr. and Mrs. Joy L. Yarbrough and little daughter, Jean Ann, of Ponder, Texas, visited in the home of Mrs. Yarbrough's parents, Mr. and Mrs. J. B. McWilliams, last week, returning home Friday. Dale McWilliams went home with them to enter T. S. C. W. at Denton, Texas.

Mr. and Mrs. Fritz Steinberger spent the week-end visiting relatives in Pueblo and Colorado Springs, Colorado.

Mr. and Mrs. R. A. Wilson, who have been visiting in the home of her sister, Mrs. T. D. Chisum, returned to their home in Lone Wolf, Oklahoma Monday.

Mr. and Mrs. R. C. Reeder, Bushland, are guests this week in the home of Mr. and Mrs. Lester Plunk.

Mr. and Mrs. Tommy Reeves are vacationing in Florida. John Kidwell is assisting at the G. & G. Grocery while Reeves is away.

Mrs. Lula Lee and daughter, Shirley Ann, visited friends in Stratford last week enroute to their home in Los Angeles, California from Michigan. They were accompanied by Mrs. Lee's niece, Mrs. Hazel Phipps. Shirley Ann stopped in Dalhart for a visit with her aunts, Mrs. Earl Carter and Mrs. Wendell Moreman. Mrs. Lee is a permanent teacher in the Los Angeles City schools, having received her degree from the University of Southern California.

Mr. and Mrs. Jim W. Farris spent the Labor Day week-end visiting with relatives and friends in Oklahoma City.

Mr. and Mrs. Homer Blake and Tommy, Mr. and Mrs. T. D. Chisum, Mr. Chisum's mother, Mrs. T. J. Chisum of San Jon, New Mexico, and Mr. and Mrs. R. A. Wilson of Lone Wolf, Oklahoma, visited Mr. and Mrs. Virgil Chisum in Happy, Texas Sunday.

Mr. and Mrs. E. R. McNeal spent the week-end visiting relatives in Hugo, Oklahoma.

Mr. and Mrs. W. H. Hyso and daughter of Amarillo spent the week-end visiting in the home of Mrs. E. J. Massie.

Mr. and Mrs. M. H. Harrison and Mrs. Turk spent Sunday visiting in the home of Mr. and Mrs. H. P. Ballengee in Phillips.

Howard Gibbons and Dick Diehl spent several days in Amarillo on business this week.

Mr. and Mrs. J. B. Walsh and daughter, Dorothy, and Mrs. V. W. Brands spent the week-end at Eagle Nest and Raton, New Mexico.

New Arrivals

Mr. and Mrs. Lester Plunk announce the arrival of a six pound three ounce daughter, Mary Luann, born August 25, in Neblett Hospital in Canyon.

Mr. and Mrs. Cloyce Box are

the parents of a seven pound two and one-fourth ounce son, Don D., born August 30 in Dumas Memorial Hospital. Mrs. Box and baby were brought to the home of her parents in Stratford Monday.

Correction

An error appeared in the directions of Miss Jimmie Nell Harris, extension service specialist, for preparing peas for freezing.

As a result, the fourth paragraph which read: "Place the scalded black eye peas immediately in running cold water. This chilling stops any further cooking and prevents loss of quality. From two to three minutes will be required to cool the peas (and next day) they should be drained and packed in air-tight, moisture-vapor-proof containers," was a serious mistake.

The copy should have read: "From two to three minutes will be required to cool the peas. Next they should be drained and packed in air-tight, moisture-vapor-proof containers. Miss Dorothy Dixon, Sherman County Home Demonstration Agent, advises the corrected copy will result in much more satisfactory freezing of the peas.

CARD OF THANKS

I deeply appreciate the cards, flowers, and many acts of kindness shown us while Jimmy was ill.

Mrs. Helen Forester.

CARD OF THANKS

We acknowledge with sincere appreciation your many acts of kindness during our recent bereavement.

Mr. and Mrs. Roy Harris

Mrs. Bryant Hostess To Circle Two

Circle Two of the Christian Women's Fellowship met in the home of Mrs. Odys Bryant Wednesday afternoon. The meeting was called to order by the Group Leader, Mrs. Elmer Hudson. The opening prayer was given by Mrs. H. E. Lowe.

Minutes of the last meeting were read by the secretary, Mrs. Everett Palmer, and were approved as read.

All business matters were discussed in a short business meeting. A collection of \$36.00 was taken.

Mrs. Elmer Hudson, who arranged the program, gave the devotional from Romans 13.

"What Can Christians Do About the Korean and other War Situations?" was discussed by Mrs. Irene Wakefield. "The Christian Way of Peace," was the topic reviewed by Mrs. Mildred Pendleton. Missionary John T. Chasis' Views on Mission Work in Korea, and "Mission Work in Hobei, China," was discussed by Mrs. Hudson.

The next meeting will be held in the home of Mrs. Elmer Hudson with Mrs. L. L. Lyon as leader.

Pullets which retain their ability to produce eggs with a high percent of thick albumen are the ones to keep for breeding purposes.

The Panama Canal is 300 feet wide and 45 feet deep.

Foresters
Move Baby
By Plane

Jimmy Forester, who has been seriously ill in Dumas Memorial Hospital, was brought to the home of his grandparents, Mr. and Mrs. A. L. Sutton, Monday, and moved by plane Wednesday to Alameda, California to be near Children's Hospital in Oakland where several months of treatment will be necessary. Mrs. Forester accompanied her son on the trip. Mr. Forester, who came to Stratford after being notified of the child's illness, returned home Tuesday.

Mrs. Forester and her son had arrived to visit relatives in Stratford when Jimmy became ill.

1951 Wheat
Support Set At
\$1.99 Or 90%

So that growers may make their production plans, the Secretary of Agriculture has announced that price support on the 1951 wheat crop will be at the same parity level as for the 1950 crop, B. F. Vance, Chairman of the State Production and Marketing Administration Committee, said today. The action was taken in accordance with legislation which directs that support for field crops be announced in advance of the planting season.

Mr. Vance explained that support for the 1951 wheat crop will be at 90 percent of parity but not less than a national average of \$1.99 a bushel. This figure is based upon the latest parity price information available. If parity is higher at the beginning of the 1951-52 marketing year, the support will be increased. While the mandatory price

supports for the 1951 wheat crop could have been set as low as 80 percent of parity, Mr. Vance said that Secretary Brannan put the support at 90 percent to assure an abundant supply of wheat in accordance with acreage allotments. With average yields, the national 1951 wheat allotment of 72.8 million acres would produce an estimated 1,150 million bushels. This compares with an estimated 1950 crop of 996 million bushels.

In announcing the price support, Secretary Brannan stated that "in view of the world situation, it is imperative that our supply of bread grains be maintained in strong position. Ample supplies will be a major factor in assuring reasonable food prices to consumers and our ability to meet our international food obligations. We believe wheat production and price support programs have been developed to protect the interests of both producers and consumers.

As in other years, price support in 1951 will be available to wheat growers through loans and purchase agreements. One change in the wheat program for 1951 is that no farm-storage payment will be made to the producer, and the Commodity Credit Corporation will not assume any warehouse charges, except the receiving charges, accruing prior to maturity of the loans. This change places wheat on the same basis as other grains with respect to storage charges on loan commodities delivered to CCC.

BIG SNAKES

Boa Blacks
Out Panama

WASHINGTON—It was like wartime blackout again, when Uncle Sam's Panama Canal Zone, on the Pacific side, was plunged suddenly into darkness on two recent occasions. But it was no enemy threat or attack that brought brief light and power failure to this strategic Atlantic-Pacific route. It was just a couple of wandering boa constrictors which had climbed a tower and struck a high-voltage transmission line.

The boa constrictor is a formidable snake of tropical America, although not in the class of the giant anaconda, or water boa, of central and South America, it reaches a length of 10 to 15 feet. Since the boa constrictor may be as big around as a man's leg, and weigh 50 pounds or more, one can easily imagine what it would do to a transmission wire, and in the case of Panama's 44,000-volt line—vice versa.

Name Is Misused

The term boa constrictor is often popularly misused for any big snake, including the pythons of Asia and Africa. Properly, the name belongs only to the second largest serpent of the new world tropics, now called by scientists constrictor constrictor.

This constrictor is a non-poisonous member of the reptile family that squeezes or constricts its prey to death. It is a good climber, and sometimes captures birds and small animals by reaching out from a tree or branch around which it has wound its tail.

As the boa constrictor's skin is capable of extraordinary expansion, it can swallow animals of some size; but tales of its devouring large horned deer and grown men are discredited. Actually, it usually avoids humans when possible, and is thus relatively harmless to man, despite the fears of many natives living in its neighborhood.

Docile When Tame

This snake, especially the South American variety, is a handsome one. Its brownish background, shading to brick-red at the tail, is decorated with striking elongated bars of tan, cream and other colors. The Central American specimens are less colorful but larger than those of South America, and have a reputation for vicious dispositions.

When first captured, boas are often savage, the Central America type striking and hissing like steam radiators when approached. Once tamed, however, most of the snakes are docile, and therefore much in demand for zoo and circus exhibition. Sales prices quoted by animal brokers may be eight to 10 dollars per snake foot.

Serpent dealers and exhibitors recall many odd and amusing incidents in handling their unwieldy charges. One collector, transporting two South American boa constrictors to the United States, was required to "brush their teeth," when they picked up a mouth infection. With the aid of several sailors holding the long reptiles down at various points, he was able to use a spare toothbrush to wash out the boas' mouths with healing peroxide.

Last fall, Paris strollers, seeking nothing more exciting than a browsing trip along the book stalls of the left bank of the Seine, encountered a torpid 10-foot boa stretched out on the sidewalk where it had apparently dropped out of a passing circus truck.

Freight Boosts Force
Change in Farm Economy

WASHINGTON—Postwar boost in freight rates is forcing readjustments in the agricultural economy, according to the department of agriculture.

It costs two and one-half billion dollars to transport the nation's food supply from farm to retail store, or more than double the pre-war cost, the department reported. In fact, the freight bill averaged about \$16.67 for each American.

For this reason some food processors are decentralizing their operations to avoid long hauls. Others are said to be virtually discontinuing the products that previously moved to distant markets, and aiming their production for nearby points.

Rates charged by regulated motor carriers have increased almost in proportion to railroad rates. The department reported that it cost 18 billion dollars to market last year's food supply—that is, to sell and process raw materials, and transport and distribute finished products. This compared with eight billion in 1939.

Court Room Game Allowed
To Answer Poker Question

LYNWOOD, Calif.—Justice of the Peace Ralph C. Dills was all for the experiment. He, like a great many other people, would like to know if poker is a game of chance, or skill.

The judge allowed three men, arrested on suspicion of gambling, to stage a draw poker game in his court in an attempt to prove it's a game of skill.

Two juries watched the game and disagreed. The judge, disgusted after the prosecution conceded there was no chance of obtaining a conviction, finally dismissed the case. As far as he is concerned the public will have to struggle along without being sure.

Mrs. E. Hill
Hostess To
Group One

Group One of the Christian Womens Fellowship met Wednesday with Mrs. E. Hill. A short business session was conducted by Mrs. J. B. Stublefield, group leader. It was decided that cakes for the Jamboree sale

are to be at the American Legion Hall before 11:00 A. M. Saturday.

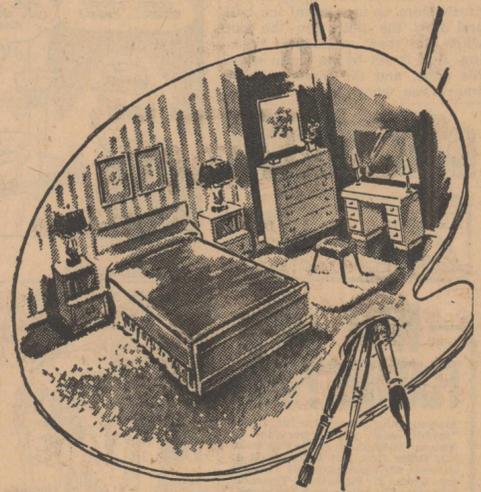

The devotional was given by Mrs. John Reaves, using scripture from the second book of John.

One new member was added

to the roll. Eleven members and one child were present. Members reported reading three books. An offering of \$10.78 was presented.

The next meeting will be in the home of Mrs. B. E. Dovel with Mrs. John Reaves as leader.

Household Hints

If you have some cold cuts and would rather have hot cuts, wrap the slices of meat in two soaking wet dish towels, put them in a pan and put the pan in a hot oven for fifteen minutes. The meat, which needs no cooking, will be warmed by steam without destroying the flavor.

You can use bay leaves to flavor a roast or soup without having to fish the leaves out later, if you crush them up in a metal tea ball and drop the ball into the pot while the roast or soup is cooking. Pull it out by its chain when it's done, and the flavor will be where you want it.

HOT FLASHES?

Are you going through the functional "middle-age" period peculiar to women (35-52 years)? Does this make you suffer from hot flashes, feel so nervous, high-strung, tired? Then do try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms! Regular use of Pinkham's Compound helps build up resistance against this annoying middle-age distress!

HAILS AMAZING RELIEF FROM CONSTIPATION

"I suffered with constipation, but bad. Medicines didn't help for long. Lucky for me, I decided to make ALL-BRAN my breakfast cereal. Believe me, I feel like a new man!"
Sam Plesky, 10517 Churchill Av., Cleveland, O. Just one of many unsolicited letters from ALL-BRAN users. If you suffer from constipation due to lack of dietary bulk, eat an ounce of tasty Kellogg's ALL-BRAN daily, drink plenty of water! If not completely satisfied after 10 days, send empty carton to Kellogg's, Battle Creek, Mich. GET DOUBLE YOUR MONEY BACK!

Mrs. Phyllis Goff, 1902 Park Ave., Indianapolis, Indiana, is now able to go about her housework in less time than it takes to talk about it. That is, of course, since Mrs. Goff has been taking wonderful HADACOL. Mrs. Goff had been suffering from a deficiency of Vitamins B₁, B₂, Niacin, and Iron, which HADACOL contains.

Now full of pep and energy, Mrs. Goff is able to give this fine statement: "It's pretty bad when you are in a run-down condition when you are only 32. That included headaches, loss of sleep . . . I was also terribly nervous all the time. Then I heard about the wonderful results other folks were getting from HADACOL. After taking a few bottles my nerves were calmed. I got a good night's sleep, and I gained five pounds. I think HADACOL is wonderful. I recommend it to all my friends."

This is another one of the statements the fine folks who have been taking HADACOL gave us. Yes, there are thousands and thousands of people all over the country who are getting blessed relief from wonderful HADACOL when they needed Vitamins B₁, B₂, Iron, and Niacin.

Let HADACOL Help You . . . if you are suffering from stomach distress, nervousness, insomnia, constipation, aches and pains of neuritis, or a general run-down condition, caused by such deficiencies. Remember, it will cost you nothing if HADACOL doesn't help you. Buy either the trial size for \$1.25 or the large family or hospital size for \$3.50 and if you are not completely satisfied—return the bottle and your money will be refunded.

If your druggist does not have HADACOL, order direct from The LeBlanc Corporation, Lafayette, Louisiana. Send no money. Just your name and address on a penny post card. Pay postman. State whether you want the \$3.50 hospital economy size or \$1.25 trial size. Remember, money cheerfully refunded unless you are 100% satisfied.—Adv.

For Better Fishing

Never invade another's fishing area. When meeting another angler, particularly in a trout stream, get out and walk far enough around him so as not to scare the fish for a reasonable distance ahead. If he is fishing a pool—stay away from the pool unless it's large enough to fish well beyond his range. Even so, it's good streamside relations to ask whether your own operations will interfere.

When moving in a boat keep reasonably clear of trolled lines or still fishermen. Never invade the extreme casting range of another. Avoid unnecessary noise or other disturbance.

Don't splash or bang rocks needlessly when stream fishing. Don't throw things in the water, even after you've quit a pool. An oncoming angler may have to wait longer than necessary for things to quiet down. At least he'll think so. Don't put down the fish by walking close to a stream's bank unless you're fishing or unless you're sure it won't hinder the operations of another.

When running an outboard, be sure to cut down speed when necessarily passing close to fishermen. Never lessen another's angling opportunity by damaging, needlessly, the fishes' room and board.

The destruction of such cover and food ladders as overhanging branches (which may impede your own casting) by cutting; the removal of bankside trees and stumps, logs, rocks, beneficial aquatic vegetation, and the like definitely is bad news for the fish. Don't do it. Of course, never pollute either the water used by the fish or the landscape used by the human eyes. Never needlessly cause or contribute to muddy water or cause a waterway to become silted or otherwise choked. Don't obstruct the passage of fish.

Never take more fish than actually will be used. Let usage, rather than laws, govern the maximum number and minimum size of the fish you take. Never unnecessarily injure a fish which may be released. Use a disgorger.

Never cause the introduction of an unwanted species. Never dump bait pails. The careless or unwitting introduction of yellow perch bait has ruined many a trout water. Young carp often are very hard to distinguish from "shiners."

Tolerate the other angler's point of view or selection of gear. Be careful with your hook. No Joe is welcome in any boat, for example, if he shows an inclination toward side-swipe mayhem. Learn to cast without endangering others.

Taking ten minutes after the bank-side luncheon to plunge fresh-cut willow shoots well into the ground may pay amazing dividends during your own fishing lifetime. There are always ways to improve unproductive water. Often a man can do much in a few hours, especially to help control erosion or to establish cover — or even to improve the beauty of the stream. It's funny how fishing anticipation generally runs much higher on a pretty stream or at least one not unnecessarily messed up by man.

This Style Will Prove Itself Fine Companion

Constant Friend

THIS CLEVERLY designed junior style will be a constant companion for social events. Tiny buttons parade down the waist front, shallow pockets accent the full-cut skirt.

A product of MCKESSON & ROBBINS

"Baby Cat"

This L & S "baby cat" casting lure shown here is an entirely new lure in the casting plug category. Officials of the firm report that this plug was tested hard for more than 10 years before being marketed and assert that it is an effective fish-getter. "It isn't generally known," they say, "that baby catfish is a major item in the diet of game fish, but it is, and we've found that a lure simulating the appearance and action of the baby catfish really gets results."

The electric sparks from a cat's body when the fur is under friction are probably caused by the peculiar dryness of the hair, which is free from the oily substances common to the coats of animals.

The tongue of the anteater is fastened to his breastbone.

When Lakers Take

Experience may show you that lake trout are inspired to take both live and artificial baits on those days when the moon is at the zenith of its travels and in its fullest face. Surface water is cooler at this time and the fish feed longer. But few, if any, trout will be wooed by your lures when the water is densely clouded with greenish plant life stirred up from the bottom—when the lakes are "working."

WEEKLY NEWS ANALYSIS

Korea Military Picture Improved; Senate Passes Mobilization Bill; Nation's Farmers in 'Fine Shape'

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

KOREA:

Picture Changes

As the Korean war went into the third month military observers were inclined to comment "the picture has changed." And from available information it seemed the Communists had lost the power to mount great offensives involving thousands of men.

North Koreans launched one attack in force, its objective the city of Taegu, temporary capital of the South Korean republic and supply terminal for U. N. forces. It failed.

In some of the bloodiest fighting of the war, U. S. and South Korean troops smashed the offensive, held Taegu, and then proceeded to smash bulges all along their lines.

One of the most spectacular operations of the Korean battle was the concentrated air attack on an assembly area at Waegwan, involving 98 B-29's each loaded with 40 500-pound all purpose bombs. The load was dropped in a rectangle 7 1/2 miles long and 3 1/2 miles wide.

General MacArthur, commander of United Nations forces, in a report to the security council said: "The ground fighting continues to be of a most savage character."

Our outnumbered forces face an enemy with "almost fanatical determination. The whole operation has assumed the character of a major campaign." He went on to ask for troops from other members of the United Nations.

To date the number accepted for action in Korea included Thailand 4,000, the Philippines 5,000, Turkey 4,500, and the United Kingdom 7,500. It will be several weeks before they can be brought to battle.

Military observers agreed that the picture had changed, but added that it will be "a long and hard winter in Korea."

FARMERS:

In Fine Shape

In a major speech at Carlisle, Indiana, Secretary of Agriculture Brannan asserted that the nation's farmers are in "fine shape" and took the opportunity to put in another plug for his farm plan.

Said the secretary: "Even allowing for increases in military food requirements we expect to have enough food so that civilians can continue consuming as much as in the past two years."

Farmers worried about possible economic controls of agriculture were reassured when the secretary said there are grounds for hope that such controls can be postponed for a considerable time or perhaps avoided entirely—"unless the emergency becomes much worse."

Talking up the Brannan plan, the secretary said we need a program which "solidly protects farm prices in case of a sudden slackening of demand" yet "puts an abundance of milk, eggs, and other perishables in the hands of consumers at attractive prices."

Brannan added that the present program of sliding-scale price supports fall to assure support on some of the most important commodities and offers no incentive for necessary production shifts.

WHEAT:

Highest Level

The agricultural department has fixed price supports for 1951 wheat at the same level as the 1950 crop—90 per cent of parity.

The department said 72,800,000 acres of wheat may be planted. If yields are average, this acreage would produce 1,150,000,000 bushels. This year's crop is estimated at 996,000,000 bushels.

In fixing the wheat support at the highest possible level, Secretary of Agriculture Brannan said:

"In view of the world situation, it is imperative that our supply of bread grains be maintained in strong position. Ample supplies will be a major factor in assuring reasonable food prices to consumers and our ability to meet our international food obligations."

"We believe the wheat-production and price-support programs have been developed to protect the interests of both producers and consumers."

The price support announcement had been expected, since Brannan is required by law to announce supports in advance of planting; winter wheat planting starts this month.

Only farmers who keep within acreage-allotment limits can get price supports.

CASUALTIES

Toll Is Heavy

The shattering realities of the Korean conflict reached into many American homes as the conflict went into its third month. More than 2,600 families in the cities and small towns and on the farms of the nation have been notified of servicemen killed, wounded or missing in action.

At the same time, a military spokesman said that Korean Communists had lost 50,000 killed.

Victories

U. S. troops won victories on nearly all fronts in Korea during the eighth week of the conflict. The big Communist push (1) on Taegu from the north was driven back; South Korean troops recaptured Pohang and Kigy (2); another bridgehead (3) across the Nakdong was beaten back; American forces flattened the bridgehead (4) in the Yongsan area.

General MacArthur, commander of United Nations forces, in a report to the security council said: "The ground fighting continues to be of a most savage character."

Our outnumbered forces face an enemy with "almost fanatical determination. The whole operation has assumed the character of a major campaign." He went on to ask for troops from other members of the United Nations.

HOME-FRONT:

Mobilization Bill

The senate, by a vote of 85 to 3, passed a home-front mobilization bill which would give President Truman power to invoke wage-price-ratio controls and other anti-inflation curbs at any time.

The bill then went to a senate-house conference for the ironing-out of differences between the senate measure and the bill passed earlier by the house.

Earlier in the bill was a defeat for the administration since it directed the President to put wage and price controls into effect simultaneously and virtually across the board if he invoked them at all.

The President has maintained he sees no need of wage-price curbs or rationing at this time. Further, the administration requested authority to control commodity speculation, but neither the house or senate versions contain such authority.

Both bills contain an anti-hoarding provision prohibiting the accumulation of excessive supplies of goods designed as scarce.

The administration suffered another setback in that its plea for retention of the provision which would let the President fix controls on selected commodities—meat, for example—in advance of any general controls program, was defeated.

AMERICA:

Angry People

Americans have never liked the evasive tactics and double-talk used by diplomats. That such a dislike still persists in the minds of average Americans was indicated by the increasing number of letters to national leaders and members of the United Nations demanding that Soviet delegate Jacob Malik be thrown out of the security council.

The letters asked why prolong the arguments in the security council? Why not expel the Soviet delegate, the people in the small towns of America wanted to know?

In answer to these questions Warren Austin, U. S. chief delegate to the United Nations, made the following statement:

"Our objective is peace. We do not find peace by throwing out the person with whom we must make peace."

"We must be firm in our principles. We must be strong. But we must also be patient."

"In the United Nations, we must keep trying to convince Mr. Malik and his government of their errors and of our peaceful intentions. Through the United Nations we can reach the peoples of the Soviet Union and of other countries."

"It is not the people, it is the 'ruling circles' that we encounter here. That creates a force of public opinion, backed by moral authority that opposes aggression—and even the Soviet dictatorship cannot ignore such a force."

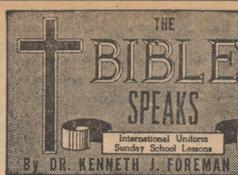

"It is a strain for us to listen to the deceit that the Russian spokesman has poured out. But truth will prevail. Meanwhile, it is better for diplomats to get nervous indignation than for young men to get shot."

That, Americans agreed, was straight talk and to their liking.

Suspect No. 8

A stocky 33-year-old American electrical engineer, who fled to Mexico when the F.B.I. began nabbing suspects in the Klaus Fuchs spy ring, had been arrested and charged with passing defense secrets to Russia.

Identified as Morton Sobell, he was the eighth American rounded up and charged with passing defense secrets to Russia. F.B.I. officials said he is a radar expert.

SCRIPTURE: Mark 14:51-52; Acts 12:12, 23; 13:4-5, 13; 15:36-40; Colossians 4:10; 1 Timothy 4:11; Philimon 24; 1 Peter 5:13.
DEVOTIONAL READING: Luke 12:35-44.

Quitter Makes Good

Lesson for September 10, 1950

UNLESS THAT boarding house in Antioch was different from other boarding houses, you could hardly have a private quarrel in it. There would be some inquisitive people who would notice when voices were raised, and who could not resist the temptation to listen.

One of the quarrelers was none other than the famous Apostle Paul, and the other was his best friend Barnabas. At least, Paul and Barnabas had been good friends up to that day.

After that day's argument we do not know that they ever saw each other again. Paul never mentioned the incident, but the story got around, and Luke put it into his book of Acts.

Young Man Seeks Position

THE ARGUMENT was all about a young man named John Mark. Young people do not always realize how often they are discussed by their elders, or how much those discussions affect their lives. A young man applies for a job (which he would rather call a "position") and he either gets the job or he does not. But he never sees the files. He never hears the conversations about himself. He never knows just what remark got him the job—or cost him the job, as the case may be. So John Mark may never have known just what Paul and Barnabas said about him.

The facts were plain. John Mark was a native of Jerusalem, son of a woman at least well-off enough to have a large house of her own. He was some relative of Barnabas, perhaps a nephew. (Tradition says he was the young man in embarrassing circumstances described in Mark 14:51-52.) When Paul and Barnabas set off on their first missionary journey together, this John Mark went with them as a general assistant.

All went well at first. But when the party landed on the hot steamy shore of Pamphylia, and when the missionary expedition was about to take off over the high lone, John Mark left the party and took the first boat back to home and mother.

Two Bosses

WE HAVE no idea why he went. Maybe he had good reasons, maybe not. Anyway, we do know that he quit. And that was all Paul wanted to know. A new missionary party was being made up, and Barnabas wanted to take his young relative along again. But Paul could not see it.

Why take a man who had already fallen down on one job? Why take an assistant that could not be depended upon? The argument between Mark's two bosses boiled down to this: Paul judged their assistant on past performance. It was all he had to go by. Barnabas judged Mark by his love for him and his belief in him. The quarrel was sharp, and the two old friends could not agree. Finally the incredible happened: Paul and Barnabas parted company, and each went his separate way from that time forward.

What happened to Barnabas we do not know. But we do know that Barnabas was right about John Mark. Years later we read in more than one letter from Paul that Mark was a real help to him. We find that another great leader, Simon Peter, called Mark his "son." These leaders of the Christian church, though they might differ on some things, agreed about Mark, that he was a man to rely on.

What This Goes to Show

ALL THIS GOES to show several things. For one, it is clear that even an Apostle may be wrong. No man can be an infallible judge of another man. And another thing: You can't judge a man on his record alone. There may be more in the man than the record shows.

On the other hand, people do judge others by their records. The dubious young man does not always have a relative who will give him the benefit of the doubt.

If your record is bad, you must realize that there are numbers of people, even good people, who will judge you by that alone.

ASK ME ANOTHER?

A General Quiz

The Questions

1. Name the first widow of a United States President to receive a pension.
2. Name the three largest cities between the Mississippi River and the Pacific Ocean.
3. Approximately how high was the Tower of Babel?
4. What water is softest?
5. Who is William Dudley Pelley?
6. What is shoddy?

The Answers

1. Mrs. John Tyler.
2. Los Angeles, St. Louis and San Francisco.
3. 300 feet.
4. Rain water or melted snow.
5. Founder of the "Silver Shirts" and publisher of "The Galliean." Arrested by F. B. I. agents on April 4, 1942 on charges of sedition.
6. Wool, re-manufactured from waste or discarded woolsens.

Writer Needs Local Color, Goes to Jail to Get It

PASADENA, Calif.—A writer, Mrs. Eloise Andrae, needed some local color for some radio crime stories she was writing. She needed to get in jail, so—

She took out a temporary driver's license under the name of Susan Ann Little and used it to cash a check for \$25. Nothing happened.

Next she charged a \$3.95 slip to a friend who didn't have an account. Still no policeman.

Then she went back to the store and pulled the same stunt for \$15.47.

Detectives hauled her away to a cell with lots of local color and booked her on suspicion of forgery.

Wading Pool-Sand Box To Please Youngsters

For Sand or Water
THIS wading pool or sand box with adjustable sun shade has a marine plywood bottom. The youngsters will be delighted with the jolly whale at each end, for which painting pattern and color chart are given.

Everything complete on pattern 308 which is 25c.

Bedford Hills, New York.

Slick Ad

One chilly day, a midwestern concern advertised that it would give away coal shovels to the first 150 persons who showed up at its office. It did, too, and that evening 150 persons were shoveling coal in their basements with brand-new shovels, each of which had this message engraved on it: "If you had installed one of our oil heaters, you would now be sitting comfortably in the living room."

WHEN SLEEP WON'T COME AND YOU FEEL GLUM

Use Chewing-Gum Laxative—REMOVES WASTE... NOT GOOD FOOD

When you can't sleep—feel just awful because you need a laxative—do as MILLIONS DO—CHEW FEEN-A-MINT.

FEEN-A-MINT is wonderfully different! Doctors say many other laxatives start their "flushing" action too soon...right in the stomach. Large doses of such laxatives upset digestion, flush away nourishing food you need for health and energy...you feel weak, worn out.

But gentle FEEN-A-MINT, taken as recommended, works chiefly in the lower bowel where it removes only waste, not good food! You avoid that weak, tired feeling. Use FEEN-A-MINT and feel fine, full of life! 25¢, 50¢, or only 10¢.

Personal To Women With Nagging Backache

As we get older, stress and strain, over-exertion, excessive smoking or exposure to cold sometimes slows down kidney function. This may lead many folks to complain of nagging backache, loss of pep and energy, headaches and dizziness. Getting up nights or frequent passages may result from minor bladder irritations due to cold, dampness or dietary indiscretions.

If your discomforts are due to these causes, don't wait, try Doan's Pills, a mild diuretic. Used successfully by millions for over 50 years. While these symptoms may often otherwise occur, it's amazing how many times Doan's give happy relief—help the 15 miles of kidney tubes and filters flush out waste. Get Doan's Pills today!

Phillips Petroleum No. 4 Well in section 15 of Block 3-T is changing over to cable tools at a depth of 6,293 feet, for completion of the test for oil. Two of the Willcoco wells have a daily production of 250 barrels of oil. One of the wells was completed for gas.

Californian Flips Car On Wet Pavement

William S. Casey, a Los Angeles, California resident, suffered minor injuries when his car skidded on wet pavement about a mile west of Stratford on U. S. Highway 54 Tuesday morning. His scalp lacerations were treated in the Stratford Clinic. Casey stated that he had driven from California with only about five hours of sleep and fell asleep at the wheel at the time of the accident. Insurance adjusters who inspected the car at the Garrison Motor Co. said it was a total loss.

Train Wreck

Too Many Movies

CARUTHERSVILLE, Mo. — Too many movies proved a bad thing for 15-year-old William L. Godsey.

The boy admitted wrecking a Frisco passenger train and told officers he got the idea from watching a movie about the notorious Dalton gang.

The boy confessed to breaking a switch lock and a signal light near Holland, Mo. A Memphis to St. Louis train hit the switch at 50 miles an hour and jumped the rails, killing the engineer and injuring 13 persons.

The boy said the movie he saw showed the Daltons wrecking a train. The title of the picture was not learned. The Dalton gang operated in the mid-west half a century ago.

Young Godsey said he didn't intend to wreck the train and thought that turning the switch would merely send it into a siding.

Sourdough Survives Bear Fight With Pocketknife, Speed

FAIRBANKS, Alaska — "You ought to see that bear," says the man who fought one with a willow switch and a pocketknife. But you ought to see sourdough Dan Gillis, 76, who is nursing bites and scratches and a cut in one arm where the bruin's teeth went completely through.

Gillis said he was walking along a trail near his cabin at Dome Creek, about 20 miles northwest of Fairbanks, swinging a willow branch to brush away the mosquitoes.

"I heard footsteps. I turned around to see a big black bear keeping step with me", he said.

Gillis said he brandished the willow branch, which was decidedly the wrong thing to do. The bear charged, knocking the old man down. By some fluke he fell toward the animal, he said, pushing the bear off balance.

"That gave me time to pull out my pocketknife."

While the bear was clawing at him, Gillis said, he closed in and let the bruin have a few slashes over the heart. The bear lurched back and Gillis ran for the road with the animal's hot "breath on my neck."

A crew car of the Fairbanks Exploration Co. had been left in the road by a group of mining men. Gillis squeezed into the cab and slammed the door in the bear's face.

"The bear stood and considered the situation. Finally his lip curled in a sneer of disgust and he lumbered off," the old-timer said.

When the mining men returned to the car, they found Gillis bleeding badly from cuts.

Fats for Cooking

Are you pennywise in the matter of fats for cooking and table use? Butter or margarine, of course, are preferred for spreading bread and rolls. But lard, vegetable fats or oils are fine for baking, while bacon fat and meat drippings make excellent meat pies, and for seasoning casseroles, stew and warmed up foods.

Newspaper Advertising Sales Set All Time High

NEW YORK—Newspapers remain the best advertising means according to latest reports.

Newspapers led the nation in advertising sales last year, the Magazine Printers' Ink reports with a total volume of newspaper advertising amounting to \$1,905,000,000, an all time high.

The newspaper percentage was 36.6 of the total with direct mail advertising accounting for the second largest share with 14.5 per cent. The direct mail method was 9.6 per cent higher than last year and amounted to \$755,600,000.

Radio was the third largest segment with 12.2 per cent of the total. Radio advertising amounted to \$633,800,000, an increase of 2.7 per cent over 1948.

Magazines fell behind the previous year by 3.9 per cent. Farm papers advanced .5 per cent, business papers were down 1.1 per cent, outdoor advertising fell .8 per cent, and the miscellaneous group advanced 6.8 per cent.

The survey showed that total volume of all advertising amounted to \$5,202,200,000 in 1949, an increase of 7 per cent over 1948.

Florida Snake Hunters Find 10 Foot 'Baby' Boa

JACKSONVILLE, Fla. — A boa constrictor has been captured in Florida according to reports of Dr. W. T. Neill, biologist and college professor.

Dr. Neill and Ross Allen, head of a Florida reptile institute, caught the reptile which weighed 45 pounds and was 10 feet long. They were looking however, for one reportedly 30 feet long which was believed to have escaped from a circus train 53 years ago.

The boa was found half buried in an armadillo hole. Instinctively timid, the snake lay still while Allen and Dr. Neill shoveled away dirt 10 feet away and uncovered the tail. Allen pounced on the snake's head and Neill caught the other end.

"We stretched it," Allen said. "It's weak as a kitten when strung out."

Old-timers living on the swamp's rim remember when a circus train derailed near there in 1897. A giant boa constrictor was said to have escaped in the accident.

The men declared there were probably others in the same area.

Medley Dish
