Nuke site may never be decontaminated

Bubble shrinking, but officials fear instrument failure

HARRISBURG, Pa. (AP) - Congressional experts warned today that the Three Mile Island nuclear reactor may be so contaminated by radiation that the entire facility may have to be junked, becoming "a \$1 billion mau-soleum." Federal officials said the dangerous hydrogen bubble inside the reactor was continuing to shrink.

But they also worried that vital measuring instruments might fail because of intense radiation - making it impossible to be sure what conditions inside the reactor were.

In Washington, Sen. Gary Hart, chairman of the subcommittee on nuclear regulation, said "it might be more expensive to clean up the plant than it was to build it. It might be a \$1

billion mausoleum." Rep. Morris K. Udall, chairman of the House energy subcommittee, said the contamination inside the containment building was "unprecedented in the history of nuclear power" and was "so bad it will be months before any possible cleanup can begin, if indeed a cleanup is possible.

"Nobody's seen those fuel rods, that's the trouble," Udall said. "You can't open up the top of the reactor and look in, it's just too badly contaminated in there.

A spokesman for the Nuclear Regulatory Commission reported that measurements showed the volume of the gas bubble was still being reduced while radiation emissimns that have plagued the plant since last Wednesday apparently have eased.

"We're going to check it, recheck it and check it again," NRC spokesman Jim Hanchett said of the bubble

Meanwhile, scientists on the scene near Harrisburg were studying the potentially explosive and lethally radioactive gas bubble and monitoring the sensitive instruments inside the

"We know many of these systems may be at or beyond their design performance," said Karl Abraham, an NRC spokesman

Pre-school children and pregnant women were still being kept at least five miles away from the plant, an estimated 50,000 people have left the ara voluntarily, and businesses reported widespread absenteeism.

Technicians toiled to dissolve the bubble's hydrogen by defusing it into the cooling water piped into the reac-

tor. Then, in another building, it bubbled up like soda pop does when a bottle cap is opened, releasing carbon

They also activated a "hydrogen recombiner" encased in lead bricks, which helped blend oxygen to form water, further drawing gas from the atomic powerhouse and speeding the time when the reactor could be

brought to a cold shutdown. A cold shutdown is the point at which the reactor no longer poses any risk of escaping control. Water in the reactor, some 60 degrees hotter than the boiling point, must be brought below boiling and the pressure re-

On Monday, NRC operations chief Harold Denton said the bubble had shrunk "dramatically."

Denton said radiation inside the top of the reactor building was measured at 30,000 roentgens an hour, a rate at which a fatal dose would be absorbed in 30 seconds.

One NRC official said radiation drifting from the disabled power-house had dropped to low levels on

Denton also said the reactor's temperature had dropped significantly, with only two fuel cells, out of 177, over 400 degrees, several hundred degrees below the point at which an explosion becomes likely.

Another NRC official, Richard Vollmer, said of the bubble, "We believe it is prudent to sit and wait a little while to make sure it's not com-

Vollmer said the instruments and

vital safety equipment were designed to withstand severe accident condi-tions, including high radiation, and that "we would expect that those would be capable of taking it."

If some devices failed, he said, it would still be possible to control the reactor and complete its shutdown if enough other devices continued to

Denton said a non-essential instrument - for measuring water flow failed "due to radiation" inside the

containment building. There were these other develop-

-In Washington, Energy Secretary James R. Schlesinger said Monday that despite the accident, Congress should act to speed up licensing for nuclear power plants.

No way around nukes, says energy secretary

WASHINGTON (AP) - Energy Secretary James R. Schlesinger says Congress should act to speed up licensing for nuclear power plants despite the Three Mile Island accident.

Schlesinger acknowledged the reactor accident near Harrisburg, Pa., will make it more difficult for the administration to get such legislation

But he said there's no real way around nuclear power if the nation wants to reduce its heavy dependency on Mideast oil.

"It's a question of trading Iran off against Three Mile Island," the en-

ergy secretary told a reporter.
Schlesinger predicted President Carter soon would resubmit to Congress his bill - unsuccessfully proposed in 1978 - to reduce from 11 years to about six years the time it now takes to approve, license and begin building a new nuclear plant.

Testifying at a House hearing Monday, Schlesinger warned against rushing to any judgment on the Three Mile Island accident until all the facts

"There should be a total technical review of what did indeed take place and until that review is completed we should be careful in drawing conclusions either way," thz energy secretary testified.

The licensing speed-up bill has been criticized by opponents of nuclear en-"the purpose of that bill is to cut back on paperwork. In no way is that licensing bill intended to reduce any consideration by the Nuclear Regulatory Commission of safety issues.

The measure would give states more say in environmental considerations and siting, encourage standardized reactor designs and eliminate review of the same issue by more than one agency.

Carter is expected to include nuclear issues and mention the Three Mile Island Accident in his upcoming energy speech to the nation later this week, officials say.

In related developments on Capitol Hill:

-Sen. Gary Hart, D-Colo., chairman of the Senate nuclear regulation subcommittee, said all states with nuclear power plants should update their emergency response and evacuation plans within 30 days. Sen. Richard Schweiker, R-Pa., proposed a blue-ribbon panel consist-

ing of both critics and advocates of nuclear power to investigate the reac-

Jimmy Chagra's trial moved from Midland

Jimmy Chagra will be tried in Austin instead of Midland on the five-count drug smuggling indictment against him, U.S. District Judge John H. Wood ruled Monday.

But Wood rejected a defense attempt to get the judge to remove himself from the case. Chagra was indicted in Midland Feb. 26 on charges of conspiracy to import and possess marijuana and cocaine and aiding and abetting possession of co-

The charges stem from an alleged smuggling operation to bring drugs into the U.S. from Colom-

He is free on \$400,000 bond. During pre-trial hearings in Midland's federal has been involved in setting the stage to prosecute the former El Paso man, and thus cannot fairly hear

Among allegations outlined in an affadavit filed by Chagra was a charge Wood had written a letter in which he said he thought members of the Chagra family were involved in an assassination attempt against Assistant U.S. Attorney James Kerr in

WOOD ANGRILY DENIED having written such letter, saying he doesn't believe either Jimmy Chagra, or his slain brother, attorney Lee Chagra, had anything to do with the attempt on Kerr's life. The judge demanded to know who had made the

"false accusation" about the letter. Defense attorney Oscar Goodman of Las Vegas,

district court, Chagra's attorneys charged that Wood Nev., told Wood he could not reveal the source of the information.

"If you're not at liberty to disclose it, I'm not at liberty to discuss it," Wood snapped.

Testifying for the defense on the motion to have the judge remove himself was Joseph Renteria, sentenced to 30 years in connection with his conviction on drug smuggling charges.

Renteria claimed a government representative told him in prison that Wood and U.S. Attorney Jamie Boyd had indicated his sentence would be reduced to 10 years, perhaps even five, if he would

testify against Jimmy Chagra. Renteria testified he had no information about Chagra, but had offered to testify further "about

Colombia" in return for a break in his sentence.

BOYD, CALLED TO THE stand over prosecution

objections, denied the allegations, saying he only sent word that, if Renteria would give the government any information he had, Boyd would so inform

No mention of Chagra was involved and no promises were made, Boyd said.

Wood refused a defense request that he testify, but from the bench, he denied being involved in any offer

Renteria and Boyd both testified they had known each other since the early 1960s when Renteria was part of a youth group accompanying Boyd to young people's conference on law. Wood denied the defense motion to remove him-

self, saying there were no legal grounds to take the action. And, said Wood, while in other divisions,

Magnatex withdraws shopping center plat

By LANA CUNNINGHAM Staff Writer

After almost a month of discussion on a shopping center plan, Magnatex Corp. withdrew its preliminary plat Monday from consideration by the Planning and Zoning Commission.

The plat apparently was not withdrawn to submit a completely different one later, but to give Magnatex more time to incorporate changes into the preliminary plat that already has been before the commission, according to a spokesman.

The center, to be called Midkiff Plaza, will be located on 57.398 acres on the southeast corner of FM 868 and Midkiff Road with a buffer zone of townhouses to border the southern and eastern edges.

Zoning on that parcel of land was recommended to be changed to LR-2 and LR-1 during the commission's March 5 meeting. That proposal will come before Midland City Council for consideration April 24.

Richard Hennessy, director of planning and community development department, said Monday he had received a telephone call Friday after-

noon from a Magnatex

representative, asking that the preliminary plat be withdrawn from con-

Harrell Feldt, the attorney representing Magnatex, told the commission that Magnatex was continuing to work on the preliminary plat and incorporate some proposed changes into it.

"We'll bring it (the preliminary plat) back at a later time, possibly at the next Planning and Zoning meeting," Feldt said. Hennessy said Magnatex has until Monday to get the plat into his office for it to be put on the April 16 agenda.

Designer for the shopping center plat is located in Dallas, and the Magnatex spokesman said the distance and time it takes to make changes are causing the delay on the plat. But, he added, it definitely should be ready by the April 16 commission meeting.

Delaying the preliminary plat should have no effect on the City Council consideration of the zone change request later this month, according to Hennessy. While the preliminary plat is not necessary to

Substitutes for meat going up

By The Associated Press

Consumers who've been trying to beat the high price of beef by switching to non-meat substitutes may be out of luck. An Associated Press marketbasket survey indicates that the alternatives are getting more expen-

The AP drew up a random list of 15 commonly purchased food and non-food items, checked the price at one supermarket in each of 13 cities on March 1, 1973 and has rechecked on or about the start of each succeeding

-The price of eggs - a highprotein alternative to meat went up at the checklist store in 11 cities.

-Meat prices show no signs of leveling off. -The marketbasket bill went

up last month at the checklist store an average of 1.8 percent during March. -The average marketbasket

bill at the checklist store increased 4.1 percent during the first three months of 1979.

Hance scores Brown for failure to testify

WASHINGTON - U.S. Rep. Kent Hance Monday castigated California Gov. Jerry Brown after Brown failed to show up as a witness before a congressional committee conducting a hearing on an Alaskan crude oil pipeline from California to Texas.

The hearing concerned pending legislation which would waive California state laws in connection with the 1,-000-mile proposed Standard Oil of Ohio pipeline, planned to terminate in Midland.

"He (Brown) knew it would be a detriment for him to be here today, so instead he is off running for president rather than running his own state," said Hance, who represents the 19th Congressional District, which includes Midland.

"His absence today points out that he has absolutely no explamnation for the holdup of this project...and that he did in fact aid in the holdup of the project," Hance told the committee.

Also at the joint hearing of the House energy and oversight panels, Texas Railroad Commissioner Mack Wallace said Congress should act quickly to remove obstructions that

he said California has placed in the way of the proposed pipeline, which has been in the mill for five years Wallace made the appeal today in a

statement prepared for his appearance before the hearing.

Wallace said he opposes federal interference with state responsibilities except in case of extreme emer-

"I can assure you that an extreme emergency exists," he said. "Therefore, all obstacles to the operation of the Long Beach-Midland project should be legislated out of existence. The vital interests of this nation demand nothing less."

Wallace has blamed the near collapse of the pipeline project on Cali-fornia Gov. Jerry Brown who he said had kept his state in a posture of "intrasigence" in the face of urgently needed permits and clearances for

Wallace testified in favor of bills by Hance and others that would cut through judicial and environmental barriers, mostly in California, to the

pipeline.

WEATHER SUMMARY

Rain is forecast today for much of the Northeast and New England, according to the National Weather Service. Showers are expected to stretch across the middle Atlantic states down to the Gulf Coast. Snow is due for parts of Nebraska, Kansas and Oklahoma while rain is forecast for parts of Oklahoma, Arkansas and Missouri. (AP Laserphoto Map)

Chagra's trial moved, but judge will remain

(Continued from Page 1A)

with more than one judge there is the "luxury" of voluntary removal, that is not possible in the Midland-Odessa division.

Chagra's attorneys also argued bias on the part of Assistant U.S. Attorney James Kerr, but prosecution attorneys announced Kerr is not and will not be assigned to the Chagra

ON THE QUESTION of where the

Cloud cover to continue

Midlanders can look forward to continued cloud cover through Wednesday, the weatherman said.

The sweater weather also was expected to continue, according to the National Weather Service at Midland

Regional Airport. Although Wednesday is expected to be a little warmer, the high is expected to be only in the upper 60s. Low tonight is expected to be in the upper

Winds are should be light and vari-

able tonight. Monday's recorded high was 61 derees, not close to the record high set

for the date of 89 degrees last year. The overnight low of 42 was nowhere near the record of 29 set in

Despite the threatening clouds, the forecast makes no mention of rain, so the month's zero batting average seems likely to continue, and the annual total of 1.23 inches should remain

Area towns were recording temperatures similar to Midland's, with most reporting overcast skies.

E .

case should be tried, the defense fared a little better, but still didn't get what it wanted.

Texas area forecasts

North Texas: Mostly cloudy and cool with chance of showers or thunderstorms east through Wednesday. Decreasing cloudiness west Wednesday. A little warmer central and west Wednesday. High temperatures 54 to 66. Lows 38 to 49. Highs Wednesday 63 to 69.

South Texas: Flash flood watch in effect for southeast Texas. Scattered thunderstorms with some locally heavy rainfall possible southeast Texas. Decreasing cloudiness Wednesday with thunderstorms ending. Continued cool through Wednesday. Highs near 50 Hill Country to 70s lower Coast and lower Rio Grande Valley. Lows near 40 Hill Country to near 60 lower Coast and lower Rio Grande Valley. Highs Wednesday 50s Hill Country to 70s lower Coast and lower Rio Grande Valley.

Border state forecasts

New Mexico: Travelers advisory north central mountains and northeast. Snow showers mountains and northeast with accumulations of one to three inches possible north central mountains and northeastern plains. Clearing from the west. Fair and warmer Wednesday. Highs 40s mountains and north 50s and 60s south. Lows teens and 20s mountains and north to the middle 30s southeast. Highs Wednesday 50s mountains and northwest to mostly, the 60s elsewhere.

Speaking for the defense, Goodman claimed the government had no legal basis for trying the case, as originally scheduled, in Midland or anyhere else in the Western District. And, Goodman contended, publicity in the case has made it impossible to try it fairly anywhere in Texas.

Assistant U.S. Attorney Rusty Guyer told Wood the prosecution is "placing its case on the line" on its contention the alleged conspiracy took place in the Western District, which goes from Austin and San Antonio west to El Paso and north to

Midland and Odessa. Guyer told Wood he could issue a directed verdict of acquittal if the government failed to show a legal

basis for venue in the district. But, Guyer contended, there is no legal requirement that the case be tried in a specific division of the

WHEN WOOD REFUSED to move the case outside Texas, both prosecution and defense agreed on Austin as an alternative site. Trial, with Wood presiding, is scheduled to begin there

Also with the agreement of both sides, Wood agreed to sign an order barring parties to the case from making public statements about it outside

court proceedings. Some 27 other motions, almost all of them dealing with defense attempts to gain access to prosecution evidence and witnesses, also were argued be-

fore Wood Monday. The prosecution agreed to comply with "what the law requires," but not more. Guyer particularly refused to give the location of witnesses, saying the government is "concerned about

Auto workers feel strike's effects

WASHINGTON (AP) - An estimated 70,000 automotive workers already are feeling the effects of a partial shutdown of the trucking industry, but analysts say the nation as a whole will suffer no serious economic harm for at least several days.

General Motors Corp. and Ford Motor Co., the nation's two largest automakers, sent assembly line workers home early Monday, the first full day of a trucking industry lockout against thousands of Teamsters.

GM said it was closing the nation's largest truck manufacturing plant "until further notice." Both firms said parts shortages caused by the work stoppage were responsible for their actions.

The Carter administration had no official comment on the labor dispute, although one source indicated the president had no "imminent" plans to seek a back-to-work order under the Taft-Hartley Act.

Union President Frank Fitzsimmons said shipments of food, heating oil, gasoline, chemicals, milk and bread products and medical supplies would not be affected by the lockout.

The union leader said the impact would be felt in shipments of "general freight...straw hats, glasses, shoes, auto parts, alligator coats."

An industry analyst said, "I don't think you'd see anything in the first few days that would hurt very much." The analyst, declining to be identified by name, said a shutdown would "put a crimp in the economy after a couple of weeks."

Another analyst, who also asked not to be named, said he didn't expect serious problems for more than a week "unless it (the shutdown) spreads through violence to people who are not covered" by the contract

Trucking Management Inc., which represents about 500 trucking firms,

Begin, Sadat pledge to keep up peace effort

CAIRO, Egypt (AP) - President Anwar Sadat and Prime Minister Menachem Begin agreed today to meet again next month, in Egypt's Sinai Desert and Israel's Negev, and to keep up their peace effort in defiance of the vehement opposition of other Arab leaders.

With Sadat nodding assent beside him, Begin announced after a conference with his host that they will meet next in El Arish, the capital of Sinai, on May 27, the day after Israel gives up that city on the Mediterranean coast as the first step in its three-year withdrawal from the Sinai Peninsu-

Begin said later that day he and Sadat would go by helicopter to Beersheba, the capital of Israel's Negev Desert adjoining Sinai, for more talks.

The prime minister said at these meetings they would declare the borders between Egypt and Israel open and would open an air corridor from

Cairo to Israel's Ben-Gurion Airport. "President Sadat and I have promised each other to continue our direct contacts so that progress is also made in the future," said Begin. "We decided that after so long a period of state of war, nations can make peace and, more than that, can establish friendship and good neighborliness."

Begin also announced that Israeli and Egyptian cabinet ministers will open talks in five weeks on the crucial question of autonomous self-rule for the 1.1 million Palestinians of the occupied Gaza Strip and West Bank of the Jordan River.

These talks will be held alternately in El Arish and Beersheba, he said.

The two leaders said they also decided that after the Egyptian Parliament ratifies the peace treaty Monday or Tuesday, Acting Foreign Minister Butros Ghali of Egypt will bring the document to Jerusalem, and Israeli Foreign Minister Moshe Dayan will fly to Cairo with the ratified Israeli copy of the treaty.

Begin said before he returned to Jerusalem today, he and Sadat would telephone President Carter and tell

him about their meeting. "We established friendship between the two nations," said the Israeli leader. "Now there is real friendship between the people of Israel and the people of Egypt. This is more important than anything else.

This will decide the future." Egypt's capital responded with increasing friendliness to Begin today.

"The reception by the people is marvelous," he said as he toured the National Museum before his meeting with Sadat. "I have seen thousands waving and cheering me."

The prime minister was given a chilly reception when he arrived Monday for the first state visit by an Israeli leader to an Arab capital. But the atmosphere warmed up along with the temperature - more than 100 degrees — as he visited the pyramids, placed a wreath at the tomb of Egypt's unknown soldier, and was the guest of honor at a friendly state dinner at the Kubbeh presidential palace Monday night.

"It was a wonderful day," said one of Begin's close advisers. "Sadat went out of his way to make Begin feel

Today newspapers that had been markedly anti-Begin reported the visit under banner headlines, and the

be submitted at that time, Hennessy said it usually helps to explain why the zone change is wanted.

Residents along the southern edge of the proposed center have objected to the shopping center, saying they expect problems with increased traffic, lack of drainage and not enough of buffer zone between the homes and shopping area.

In an otherwise short meeting, the commission approved final plats for Colonial Hills Addition, Polo Club Addition and Crestgate Addition and a preliminary plat for A Street Community Center.

Also given favorable recommendations were a specific use permit for a lounge for dancing at Eden Restaurant, a zone change request concerning the 500 to 800 blocks of South Terrell to build an import automobile parts and repair shop and an amendment to a Planned District requested by Tim Tabor.

government television service carried long reports.

About 1,000 Egyptians waved to

When an Egyptian reporter began asking Begin political questions, the prime minister beamed and said: 'My friend, I would be prepared to answer any of your questions, but today, please don't put me in a hot

Privacy laws forwarded

WASHINGTON (AP) — President Carter's proposal to shield reporters from surprise police searches would be broadened to protect other Americans under plans Congress is study-

The legislation the president sent to Capitol Hill Monday is part of a package of proposed privacy laws that would also restrict the use of medical records and federally financed research materials.

Rep. Jack Brooks, D-Texas, chairman of the House Government Operations Committee, said the subcommittee on government information would begin threedays of hearings on the package Wednesday.

The Senate subcommittee on the Constitution will also hold hearings. although no date had been set.

The proposal is intended to override a Supreme Court decision last May allowing police broad authority to search newsrooms without warning, even when no reporter is suspected of wrongdoing.

The president's bill would in most instances bar local, state or federal law enforcement officers from searching for the notes, films and interview files of reporters.

It would also require police to have a subpoena, rather than a more easily obtained search warrant, before gaining access to newsrooom documents that do not contain reporters' work products.

Begin from behind a police cordon at the museum. People on the streets greeted Israeli officials and reporters accompanying him with friendly "shaloms," the Hebrew word that means both peace and hello.

spot. I'm on vacation."

firms observing the lockout.

difficult to gauge the extent of the

shutdown or its immediate effects.

Money collected by the Midland County Chapter supports research and Texas Medical Service grants

totaling \$16,178.36 in 1978. In Midland County, \$10,377.74 was spent directly on providing public and professional education and medical

services to county residents. Funds from last year's Golden Mile were used to purchase an infant transport incubator for Midland Memorial Hospital to be used for the

critically-ill newborns. This year's event was planned by the advisory committee, which includes Larry Bell, Joseph W. Campbell, David Childress, Price Cowden, David Edwards, Wayne Esslinger, Don Evans, Douglas Forshagen Jr., Bill Hightower Jr., Jack Hightower, Parker Humes, Mark Leaverton, Gordon Marcum II, Paul Stafford and

Bank deposits at seasonal high

Midland bank deposits were at a seasonal high at the close of business last Friday, totaling \$763,283,029.

The figure is up \$67,031,696 from the \$696,251,333 reported on March 31. 1978. It is, however, down \$61,424,764 from the record \$824,707,793 revealed

last Dec. 31. Statements of condition of the city's six banks - Commercial Bank & Trust Co., Metro Bank, Texas National Bank, The First National Bank, The Midland National Bank and Western State Bank - were revealed this morning in line with the policy requiring reports to be issued at the end of each quarter.

This marked the first report for Texas National Bank, which opened for business on March 23, and the second for Metro Bank which opened last Dec. 1.

Loans and discounts of the banks were at a record high, totaling \$548,724,475.

The figure is up \$67,814,971 from the \$480,909,504 reported a year previously, and up \$17,314,828 from the \$531,409,647 reported at yearend

The First National Bank reported deposits totaling \$465,707,071, compared with \$422,204,034 a year ago and \$527,244,273 three months ago.

The bank's loans and discounts totaled \$352,931,093, compared with \$299,819,384 at the end of March last year and \$339,793,403 last Dec. 31.

The Midland National Bank had deposits totaling \$205,385,295, compared with \$198,120,712 a year earlier and \$211,234,284 at the end ot 1978. Midland National's loans and discounts amounted to \$135,820,578,

conpared to \$128,544,183 at the end of

the first quarter last year and Midland went up by almost 4,000. The figure was 43,980 for February 1979, \$134,675,010 at the end of 1978. Commercial Bank revealed deposits totaling \$66,885,514, compared with \$60,727,455 at the same date last year and \$66,362,417 three

months ago. It had loans and discounts totaling \$44,881,790, compared with \$41,991,120 at the end of March 1978 and \$42,248,932 at yearend 1978.

Western State reported deposits

amounting to \$20,712,053, compared to \$2,255,267, compared with \$2,051,300 \$15,199,132 a year previously and \$17,815,519 three months ago.

The bank's loans and discounts totaled \$13,401,850, compared with \$10,554,837 at the same date last year and \$14,024,898 last Dec. 31.

Metro Bank had deposits totaling

Jack Swallow.

at yearend 1978 Its loana and discounts amounted to \$1,647,743, compared with \$667,404 three months ago.

Texas National had deposits totaling \$2,337,829 and loans and discounts of \$41,421.

Indicators show Midland's economy inching upward

Midland's economic barometer inched upward in February, according to a report released by the Economic Research Department at First National Bank

All areas checked by the department showed increases over February 1978 with the exception of residen-Reports showed gas meters during

February 1979 totaled 22,681 compared to 21,867 a year ago. That figure also was higher than January 1979, when 22,460 meters were in operation in the city.

Electric meters totaled 29,981 for February 1979, compared with 29,883 in January and 28,813 in February Telephone usage picked up during

the year as 78,953 phones were operating in February with 78,516 reported in January and 74,505 in February a year ago. Number of employed persons in

43,340 for January and 39,900 for February 1978. Building permits for February totaled \$5,793,150 with \$1,185,850 of that

for new residences. In January, the figures were \$2.855,-825 with \$1,100,900 for new houses. In February 1978, the totals were \$4,707,-500 and \$2,407,500 for new homes.

Number of water meters also have increased. The figures show 22,102 for February, 22,029 for January and 21,-

499 for February 1978.

Airline boardings at Midland Regional Airport have risen steadily. In February 1979, 30,018 persons boarded aircraft at the airport as opposed to 29,529 in January. The January figure itself was more than 1,000 above the 28,479 persons who flew out of Midland in February 1978.

Bank deposits for February were \$732,398,000, down from the \$783,361,-000 deposited in January 1979. That was more, though, than the \$675,746,-000 recorded in February 1978.

Alabama groups request moratorium on executions

MONTGOMERY, Ala. (AP) - With Alabama's first execution in 14 years scheduled in three days, two groups have issued separate statements opposing the resumption of the use of the death penalty.

Bernard Bray, president of the Civil Liberties Union of Alabama, said Monday that his group plans to ask Gov. Fob James to declare a moratorium on all executions.

And eight clergymen representing a cross-section of religious faiths in Alabama issued a joint letter Monday expressing concern over the proposed return of capital punishment to Ala-

Condemend killer John Louis Evans III is schheduled to die in the electric chair just after midnight Thursday. A last minute request for a stay of his execution was filed by his mother Monday in U. S. District Court in

In calling for the moratorium on executions, Bray released an ACLU study of homicides and the death penalty in Alabama which said that killers of whites are 16 times more likely to be sentenced to death than

killers of blacks.

"We hope the citizens of Alabama will, in great numbers, tell Gov. James that in April 1979, we do not want to turn Alabama back to executions based on racial discrimination," Bray said at a press conference on the steps of the Alabama Supreme Court.

A moratorium on all executions should be declared, Bray said, until James and other state officials can explain why the murder of a white person is more likely to be punished by death than the murder of a black.

The ACLU study found that since the state's new death penalty law went into effect in 1976, 32 persons have been sentenced to die for killing whites while only four convicted of killing blacks have been given the death penalty.

And since there were roughly twice as many blacks as whites murdered in the state since the new law went into effect, Bray said the statistics indicate that a murderer is 16 times as likely to get the death penalty if he has killed a white person rather than

Bray said Monday night that he plans to deliver the study and the call for a moratorium on executions to James today. If the governor doesn't act on the request, Bray said, he "will have to live with it.'

The Alabama ACLU head also refused Monday to rule out the possibility that the organization might take court action this week to try to block Evans' scheduled execution.

The joint letter from the eight clergymen noted that the death penalty, "once imposed, is irreversible and cuts off the possibility of repentance and forgiveness within this life."

The religious leaders said they have found no evidence that capital punishment is an effective deterrent to crime. "Indeed," they said, "there are many informed people who are convinced that the use of violent and brutal punishment by governmental authority breeds further violence and brutality in society.'

They said the death penalty most often is used "on obscure, impoverished, friendless or defective prsons, and very rarely on the wellto-do and influential.'

Declaring that "each individual human life is of infinite value in the sight of Almonty God," the clergymen said it is the exclusive right of God an not man to take a human

The joint letter was signed by the Revs. C.A. Kirkendoll, 5th Episcopal District, Christian Methodist Episcopal Church; John L. May, Roman Catholic Diocese of Mobile; George M. Murray, Episcopal Diocese of the

Mother files appeal of son's death sentence

MOBILE, Ala. (AP) - With time running out, the mother of John Louis Evans III has chosen to ignore her son's wish to die in the electric chair Friday and appealed to a federal judge to block the execution.

U.S. District Court Judge W.B. Hand was scheduled to review the petition today.

Evans, who was sentenced to death for the slaying of pawn shop owner Edward Nassar of Mobile in 1977, has said he has "an obsession with freedom. If I can't have it, I'd rather be

He reportedly was distraught when he first learned the appeal would be filed but was calmed down Monday. "He was quiet. He was much calmer. He spent the day writing. He has no fear," said the Rev. Kevin Duignan, a Roman Catholic priest who spent part of the day with Evans on death row at Holman Prison.

Duignan said Evans understood his mother's actions but nevertheless opposed the appeal. He said Evans spent much of Monday drafting a final statement to be issued Wednes-

The petition, which identified the mother as Betty Evans of Beaumont, Texas, was filed late Monday by attorney John Carroll of the Southern Poverty Law Center in Montgomery. Carroll previously represented

It argues the execution should be blocked due to errors in Evans' trial and the unconstitutionality of Alabama's death penalty law.

AAPG position paper

Robert D. Gunn, president of the American Association of Petroleum Geologists, has issued an official A.A.P.G. position paper, with the approval of the association's executive committee, calling for an end to domestic oil price controls. It was released in Washington last week.

JAMES N. ALLISON (1902-1975)

The paper, prepared and presented by top-flight geologists who most certainly know the score through long and tedious study and research, has the facts and figures to back up the A.A.P.G. president's call for action. The paper is worthy of reproduction. It reads:

"As members of the American Association of Petroleum Geologists, we urge the President to take early action to phase out domestic oil price controls without imposing new legislation or additional taxes. Upper tier oil should be permitted to increase to world prices by June 1, 1979, while lower tier oil should gradually be decontrolled by October 1, 1981.

"Domestic oil production, with the exception of Alaskan oil, has declined under the present control system, which by statute is to phase out in 1981. The nation experienced a similar decline in natural gas production over the past three years which is largely attributable to diminished exploration resulting from interstate price controls. Free market intrastate prices have encouraged exploration and resulted in local gas surpluses.

"As geologists, we are confident that price decontrol will provide the economic climate needed to accelerate new oil exploration in the United States. We have no shortage of viable drilling prospects and, therefore, we see an expanded resource base available with higher prices.

"Reserves could be increased from existing fields with additional expenditures. Furthermore, we could extend the producing life of the average well by more than five years, thus increasing the ultimate recoverable reserves from these fields. Both of these would help meet the President's production targets for 1985, as set forth in the National Energy Plan. This would diminish our expanding reliance on unreliable foreign supplies, which averaged 8.1 million barrels daily in 1978. Decontrol

tion, in 1978 it was still the Siberia to

which anti-business legislation was

tee in 20 working days.

INSIDE REPORT:

should strengthen the U.S. econony because positive production responses will reduce our increasing need for foreign supplies, reduce future balance of payments deficits, and stimulate investment and job opportunities here at home. Decontrol should encourage continued energy conservation efforts and lead to a development of alternative energy sources as justified by economics.

JAMES N. ALLISON JR. (1931-1978)

"Additional tax burdens are unnecessary since more than half of the additional revenues would go to Federal, State or local governments. Added net revenue to all producers combined is estimated at \$7 to \$10 billion over the phase-in period. We are confident these monies would be largely reinvested in domestic exploration and production. Industry's capital borrowing is now at its maximum limit. The increased cost to the consumer above the controlled price increase would be about 1 to 2 cents per gallon annually through 1981. Total inflationary impact is estimated to be very small at less than 0.6 percent per year."

This is an impressive presentation, copies of which already have been distributed by any number of Midland members of A.A.P.G. It is recommended, however, that other persons make good use of the official A.A.P.G. paper by placing it in appropriate hands, agencies and organizations. Time is of the essence.

THE BIBLE CAN YOU QUOTE IT?

By LAVINA ROSS FOWLER AND ELIZABETH ROSS WIERSEMA

1. It appears that the Lord did not go along with the idea of "fighting other people's battles," especially in family affairs. What did he say to the person who said, "Master, speak to my brother, that he divide the inheritance with me."? Luke 12:13

WASHINGTON MERRY-GO-ROUND

An interview with el-Qaddafi

By JACK ANDERSON

TRIPOLI - It is only a question of time before Qaddafi becomes a household word wherever strife and revolution command the news. The name belongs to Col. Muammar el-Qaddafi, the violent Bedouin who is dictator of Libya.

For centuries, Libya has been an arid wasteland of sand and sun, inhabited by some 2 million unfortunates clinging to a parched existence of indescribable poverty. But the discovery of oil and the emergence of Qaddafi have lately transformed Libya into a nation, and a state of mind, to be reckoned with.

I have consistently abused Qaddafi in this space. I was, therefore, startled recently to receive a personal invitation from him to come to Tripoli for a face-to-face visit. My initial wariness was heightened by a warning from Central Intelligence Agency sources that not all who enter Qaddafi's door come beck through the current case in point being one Iman Musa-sadr, who has not been seen since he called on Qaddafi a few weeks ago.

Nevertheless, I immediately left for Tripoli. While crossing the Atlantic, I mulled over my interview approach and toted up with growing discomfort the many carefree attacks and epithets I had launched at Qaddafi for being "one of the world's most irresponsible leaders;" for his "madhatter" partnership with Uganda's Idi Amin; for supporting with money and safe refuge a worldwide menagerie of revolutionary extremists; for trying to buy an atomic bomb from Red China; for providing terrorists with Red-eye missiles, shoulder-fired weapons capable of shooting down airliners. Suddenly, I wished I had been more diplomatic.

Qaddafi's Tripoli is something to see. Its hotels and bazaars teem with mysterious-looking figures of varying colors, nationalities and costumery black military types from African trouble spots, Palestinian extremists plotting anti-Israeli adventures. Muslim revolutionaries studying Qaddafi as both the foremost theoretician and leading implementer of the Moslem state, Koreans wearing on their tunics identification badges featuring portraits of Kim Il Sung, even Moro tribesmen getting help for their revolt in the remote Philippines.

For the meeting, I was driven through a military compound of pleasing construction toward an almost palatial building, not huge but elegant, in the Islamic architectural style. But 100 yards short of that building, my escorts shunted me across a dirt field to a sheik's tent of multiple peaks and valleys.

Inside, the ground wes covered with rich carpets, the sides were hung with rugs of spectacularly vivid design, with cushions of bright color strewn around the circumference. In the center stood four canvas-back folding chairs. Qaddafi motioned me toward one and sat down in another.

"I like to see the sky," he said, explaining this meeting place to the infidel. "It helps me to think better than when I am surrounded by walls." He seemed young for having ruled 10 years - not over 40, about 6 feet tall, ruggedly handsome, with dark countenance and black curly

HEMISPHERE REPORT:

of Rio de Janeiro.

In his face, there is an arresting dichotomy. In relaxation, it is strikingly handsome; in agitation, it is a study in latent ferocity, with the black, blazing eyes of a desert hawk and a magnificent Bedouin scowl that caused my thoughts to stray to the missing Iman Musa-sadr.

His visage seemed to me somehow to be divided against itself - the upper half fierce, with a trace of anguish in the eyes; the lower half disarming, almost lost in thought, with a wisp of a smile playing across lips that spoke softly.

The face relected his early life in the harsh, baked world of the Bedouin. He had been a bright lad who was sent to town to be schooled and found himself unaccountably jeered as a misfit. For the robes and habits that on the desert seemed so lordly and fitting were then somewhat bedraggled and oafish. "We are lions in the desert but jackals in the city," explained a Bedouin

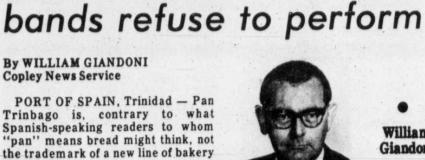

Qaddafi spoke in English, though there were interpreters present who did not hesitate to break in on their leader, lending a democratic flavor to the proceedings.

He conveyed a truculent determination to lift up the downtrodden, the laughed-at, the pushed-around. Indeed, I have seen impressive evidence that his \$10 billions in annual oil revenues are going not into the palaces of sheiks nor the coffers of oil executives but into free medical clinics, free housing and nourishment, free schooling for those who until yesterday were the poorest of

He is devoted to the world revolution of the have-nots and pours petrodollars into revolutionary upheavals across the globe. He doesn't like being called a dictator. He is not in the government at all, he said: in fact, there is no government here as Westerners call it; the people

When I asked how it is that what he wants always seems to get done, he began to draw diagrams for me, showing how the people choose representatives who, in turn, select other representatives who come to the People's Congress, which chooses ministers.

When he spoke of the United States, the future of Israel, the worldwide revolution, his words were spoken softly but, as a forthcoming column will show, they read hard - furnishing fresh proof that Muammar Qaddafi is, as I had once called him, 'one of the most dangerous men in the world."

Trinidad's popular steel

William Giandoni

protect their interests. Trinidad and Tobago, the twoisland nation located off the north coast of South America, finds itself in much the same fix as its famed musicians.

With a total population of around 1.3 million people jammed into a land area of some 2,000 square miles, Trinidad and Tobago would be just another of what Gen. Charles de Gaulle once termed "specks of dust" in the Caribbean were it not the only one of the islands that has more petroleum and natural gas than it

Trinadad and Tobago is one of less than 10 countries in the world that has energy available surplus to its needs, according to Dr. Ken Julien, chairman of the country's National Advisory Council.

"Trinidad and Tobago has reserves that over the next 25 to 40 years will allow it to export, in one form or another, some three to four times the energy it needs for its own consumption," Julien told the recent Inter American Press Association meeting here.

What is more, Trinidad is the only Latin American country that has a significantly favorable trade balance with the United States.

Mexico's total trade with the United States in 1978 led to a trade deficit of almost \$500 million. Venezuela's was about \$182 million. Brazil's deficit was over \$147 million; Colombia's a mere \$2.1 million.

But Trinidad exported \$1.4 billion to the United States and imported only \$330 million. That left the trade balance between the two a whopping \$1 billion in Trinidad's favor.

Trinidadians, like Julien, say that export of energy today means money and that money is one of the ingredients of improvement of the quality of life of this island nation, with proper planning, political direction and will. ..."

However, Julien warns against the growing syndrome in Trinidad ... "the syndrome of counting. One element is counting our blessings and another is counting the hours toward dooms-

Thoughtful Trinidadians agree that there is too much to be done to waste time counting.

That brings us back to Pan Trinbago which is perhaps symbolic of the problems facing Trinidad and Tobago. The skillful musicians who make up

the steel bands doubtlessly have made an important contribution to the country's international fame. Unquestionably, many of them feel they have been exploited by government and private business.

But to dramatize their protest and their ambitions, they risked

Mark Russell says

The Republicans are counting on a Peanutgate" scandal to put them back in the White House. They dream of a resignation next year when Carter is replaced by his appointed Vice President. Andrew Young.

Young pardons Carter and gets the Democratic nomination. Meanwhile, Bert Lance is doing three years at hard jogging at a minimum security fat farm.

Republicans, however, believing Andrew Young to be too easy to beat, will become careless and nominate Robert Dole.

Dole and his hastily chosen running mate, ex-Sen. Ed Brooke, conduct an overconfident campaign.

Andrew Young wins and, standing next to Vice President-elect Jerry Brown, declares our long national nightmare to be over.

BIBLE VERSE

A false witness shall not be unpunished, and he that speaketh lies shall not escape. - Pro. 19:5.

sent for a living death. Kennedy started this year by making sure Eastland and his old lieutenant, the late Sen. James Allen of Alabama, were not replaced by other conservatives. Kennedy twisted the rules so that his Harvard buddy and political ally, Sen. John Culver of Iowa, did not have to give up his Judiciary seat because of other committee

Novak

assignments. The new chairman then made sure that liberals Patrick Leahy of Vermont and Max Baucus of Montana were voted on the committee and that pro-oil industry Sen. David Boren of Oklahoma was kept off. The committee's token conservative Democrat is Alabama's Howell Heflin, beneficiary of Kennedy's help in January to get

the committee seat. Having stacked the committee's membership, Chairman Teddy proceeded to change the rules that Eastland employed to make sure little or nothing was done. The lack of querum, formerly used to kill liberal measures, is ended by the new authorization of proxies for absent senators. No longer can one senator filibuster the committee; 10 senators on the 17-member committee can now close debate. It may well be that the committee

Kennedy panel: worst fears of businessmen realized

has met more often in Kennedy's 66 days than in Eastland's 23 years. Business lobbyists grumble that the committee's senior Republican, Sen. Strom Thurmond of South Carolina, is no match for Kennedy. Republicans have not even tried to prevent two and sometimes three hearings scheduled in a single day.

To complete the transformation, Kennedy has 59 committee staffers under his direction including a good many bright new ones (a sample: Stephen Breyer, a reknowned Harvard law professor and antitrust expert). The thrust is indeed aimed at big business, causing meetings of

worried lobbyists around town. Most hand-wringing concerns Ken-nedy's bill to prohibit conglomerate mergers between firms with more than \$2 billion in assets or sales (endorsed by the Justice Department but, oddly, not yet by the Carter administration as such). However, what may menace corporate board rooms most is the so-called Illinois Brick Bill, to overturn a Supreme Court decision so that parties who are not direct purchasers could collect damages from an antitrust violator.

Illinois Brick is viewed by business lobbyists as the essence of Kennedy's real attitude toward business, which they considered concealed by his deregulation rhetoric. Their one asset is Kennedy's notorious losing record

on the Senate floor. Even fellow Democratic senators say his presence in support of a measure automatically loses 20 to 30 votes.

Freshman senators were surprised by Kennedy's stentorian, tablepounding style in Senate debate March 14 when his effort to stop President Carter's health budget recisions failed. But the vote of 55 to 32 was close on an issue where Republicans and Carter presumably were allied. Could Kennedy's rising presence in the Senate as a powerful committee chairman with 16 years seniority be translated into Senate votes?

It is sufficient to transform nervous tremors into the palsy for corporate America. One Senate Republican insider told us he wants Kennedy elected president because "he can do less damage down at the White House than he can from the Judiciary Committee." He was only half joking.

AUSTIN-With only a few questions asked, the House Monday tentatively approved a major overhaul of the way strip mining in Texas is regulated.

Sponsored by Midland Rep. Tom Craddick, the two-bill package is necessary if Texas is to retain jurisdiction over strip mining and not forfeit it to the federal government.

Texas has had a strip-mining law that covers coal, lignite, uranium and uranium ore since 1975. In 1977, President Carter signed a federal law regulating the surface mining of coal only.

Craddick told house members that his bills were necessary to conform the state legislation to

the more recent federal law's stiffer-standards.

The federal law, for example, requires strip-mined land to be returned to its original condition or to "a higher and better" use, whereas state law requires a restoration to a "substantially beneficial use.'

The federal law also allows citizens to file suit to force mine operators to comply with the law, which the Texas statute does not allow.

"Nobody likes to be regulated, but if we're going to be, we want it to come from as close to home as possible," said one lignite operator, explaining why the industry is supporting the new leg-

Both bills now go to the Senate for further consideration.

Officers found the airplane's tail on the Pakans' roof.

Cohen said the pilot died instantly. The disabled craft missed several homes as it crashed in a sparsely populated area about nine miles west of the Fort Lauderdale-Hollywood International Airport, where the other plane, a Piper Seneca, crashlanded on a run-

Both men aboard the Piper, Charles Mbilika of Africa and Arthur Chestnut of Opa-Locka, suffered minor injuries.

At the time of the collision, Mbilika, 27, a copilot for Zambian Airways in Africa, was on a check ride trying to qualify for an airline transport pilot rating.

Probe begins in motel fire

The fire marshal's office today was investigating the cause of an early morning fire which did heavy damage to a motel room and hallway at the Midland Inn, 3601 W. Wall Street.

Four units of the Midland Fire Department responded at 3: 30 a.m. to the blaze.

Fire reports indicated heavy smoke damage to the hallway in the two-

Navy slates lobster hearing

WASHINGTON (AP) - The Navy has escalated legal actions in the case of alleged lobster poaching by crewmen of a submarine rescue ship off Rhode Island last summer.

It has ordered a formal "pre-trial investigation" - similar to a grand jury proceeding - "to inquire into the facts and circumstances surrounding

the alleged theft of lobster traps by personnel of USS Petrel and to determine whether violations" of military law occurred.

Cmdr. E.A. Hasselman, the Petrel's skipper at the time of the alleged incident last August, and Lt. M.H. Tavares, then its executive officer, were named as "parties to the inves-

tigation" and will be represented by military lawyers.

No other members of the Petrel's crew of 105 officers and enlisted men were so designated after informal investigations, the Navy said.

The formal inquiry, to open at the Charleston, S.C., naval base in mid-April, will look into 15 charges - four

of larceny, three of "violation of a lawful general order," four of "concealment" and four of "violation of federal law.'

Navy officials said the charges of violating federal law involved theft of shellfish and that alleged violations of a general order referred to the ship leaving an assigned mission.

High court decides for cable industry

WASHINGTON (AP) Cable operators might The nation's cable have been forced to television industry now is free to develop at its own pace, spared by the Supreme Court from meeting government deadlines for lending part of its operations to

In other matters Monthe public. day, the justices: The high court ruled Monday that the Federal

Communications Commission exceeded its authority three years ago when it confronted cable TV operators with broad, new requirements that included setting aside channels for public ac-

Unless specifically ordered by Congress, the FCC cannot require such channel set-asides, the justices said by a 6-3

The 1976 rules broke down into three related -Cable systems with

3,500 or more subscribers had to have the capacity by 1986 to provide 20 television channels. -Such systems would

have to designate four channels for public, governmental, educational and leased-access, respectively. -Each system with 3,-

500 or more subscribers would have to make available "equipment for local production and presentation of cablecast programs ... and permit its use for the production and presentation of public access programs.'

After being challenged, the rules were struck down by a federal appeals court. The lower court ruled that aside from exceeding FCC authority, the rules might violate cable operators' free-press rights.

The Supreme Court's opinion Monday, written by Justice Byron R. White, did not reach the constitutional issue.

"Because our decision rests on statutory grounds, we express no view on that question, save to acknowledge that it is not frivolous," White

Had the justices voted to reinstate the FCC rules - as the government, the American Civil Liberties Union and various citizens' groups had urged - cable television's future could have been altered drastically.

Midkiff's 'country courthouse' hosts parade of pals

MIDKIFF - Wiley Bob Whisman picked up the \$50 rod-and-reel, which modern-day drummer Sammy Morgan of San Angleo was selling off of his truck.

Good fishing gear?

"I don't know," quipped Whisman, as he carried the rod-and-reel inside. "He said he'd guarantee it to catch

This place is a catch-all in itself. Whisman is a wit, who occasionally shoots a barb.

And Morgan sells off of his truck just like in the old days.

"YEAH," HE SAID, as he unhurriedly collected himself for his next stop, "we carry fishing gear, drugs, school supplies, candy, cigars and tobacco. Everything we can haul."

The location is Bob Whisman's ser-

Bob Whishman's service station offers more than "service," as the "list of characters who drop by for gab and gas" can attest.

but "the sheriff ain't here."

vice station, where the list of characters who drop by for gab and gas seemingly is unending

It's at a crossroads in the northeast corner of Upton County. Few there are who live here, but many pass by. It's in the middle of an oil patch and in good farming-ranching

The place, known as Hadacol Corner in the 1950s when oil first profusely gushed here, is now Whisman's filling station at Midkiff. It's the only one in town; the other one is four miles to the east and across the road from the Midkiff gasoline plant operated by El Paso Natural Gas

WHISMAN'S STATION is more than a gas stop.

L.W. Bell, who, as usual, stopped by to consider things, knows that as well as the next fellow pulling in for a

"This is the courthouse of Midkiff," Bell said. He joked. "The sheriff ain't He shouted to the usually bustling

Whisman: "Bob, go get T.O. (Mid-"I kid him all the time about being

sheriff," said Bell, who lives in Midland. Midkiff farms here.

Bell was just relaxing until he figured it was time to get up and go back to work in the oil field.

"A lot of people get lost in this corner," he said. "They don't know ROUSTIN ABOUT with Ed Todd

which way to turn."

There are road signs at the crossroads, but they don't say where the

"This is a helluva place, if you ask me about it," said Bell, who's a lease operator. That's fancy lingo for a pumper, he allowed

HIS CO-WORKER, Roger Vallez, a roustabout, was taking it easy, too, in

"This is the courthouse of Midkiff," one patron jokes,

the filling station office.

"When I first came out here, they said 'You're going to Midkiff," Vallez said. "I said, 'Hell, I never heard

The time was mid-afternoon on a weekday, and Bell said the "courthouse" was really full of talk and folks in the mornings.

"You should come out here in the morning," said. "Half these damn farmers are telling you how broke they are and wanting help from the

"Well," he said again from his soapbox, "these...(guys) are better off than any of us, they sit around wanting the government to help.... Bell got off his sermonizing, and he

and Vallez set off to work. Before they left, though, Virlee Parson pulled into the station to gas up her United Parcel Service van and to get directions to a ranch house. She had a package to deliver.

"NO, WE'RE NOT government; we're privately owned," said Ms. Parson, who has worked for UPS for four years.

UPS makes a profit, she noted. "I don't think the post office does," volunteered Bell. "They've got too many deadbeats

Whisman kicked in his two bits: "She's working for a non-profit organization. It didn't start out that

Ms. Parson cranked up and moved

The Door

David Cole of Rankin drove up. "I just stopped by to gas up," he said. "I need to get back to work." He

didn't tarry Whisman still was busy pumping gas, washing windshields or taking orders for the next run by Sammy Morgan, the drummer. Whisman's help, Francisco Gonzalez, was fixing

LES LANCASTER, also of Midland, dropped by to gas up his company

Whisman gets a kick out of kidding

"Leslie said he could look impressive whether he knows what he's doing or not," Whisman joked.

Lancaster said he is an "evaluation technician" for Northern Natural Gas

"As soon as I figure out what it is, I've got it made. "I work between Andrews and

Barnhart," Lancaster said. "Now, Leslie," Whisman said. Lancaster "corrected" himself:

"I hang around between Andrews and Barnhart. Lancaster left. Others came and

Bob Calcote, one of the "early day" hangers-on at Hadacol Corner, dropped by. His car had been sideswiped by a truck, but he was all right. Though the left side of his car was a wreck, Calcote wasn't complaining. The car was driveable.

WHISMAN RE-ENTERED the cramped but cozy and much-cluttered station office - the courthouse and philosopher's corner.

"They want me to open early and close late," Whisman said. He didn't say who "they" were.

"I figure as long as I own this son-of-a-gun, I can run it the way I want to.

Buford Rackley entered the station and jawed awhile with Raymond Weatherby, the sheriff over at Then Rackley, who's a plant opera-

tor at El Paso's Midkiff plant, borrowed a hydraulic jack to do some plumbing work across the road. "Tell everybody I'm the Midkiff plumber," he teased, as he walked

Henry Benningfield of Midkiff came in.

So did Marvin Radford of Midland. Talk drifted to the "high" and going-higher price of gasoline and just about everything else.

The day wore on. "Not going to get out of this world alive," said Radford, as if he resolved to stick it out despite the odds. Whisman was still busy satisfying

process, but he wouldn't have it any other way. (Staff Photo by Ed Todd)

his customer-friends and obviously enjoying his work

IT RUNS HIM ragged. "Yes, sir," he agreed. "But I kind

Whisman has been pumping gas here for 18 years. Before that, he was at Bigby Corner, where he and the wife, Sarah, ran a grocery store.

Bigby Corner rests 15 miles to the east on the road between Stanton and "Nothing's left there," Whisman

His wife runs the Midkiff grocery

store, next door to the station. Whisman came to Texas from the Midwest, from Kansas, with his late father, P.A. Whisman, and lived in Snyder and Pine Tree (finished high. school there in 1953) in East Texas before moving to Bigby Corner and then settling down at the Midkiff

community years ago. Like he said before, Whisman sure

likes his work. And the people. In his service station office is a printed message, which sounds like Whisman talking It goes like this:

> All Our Visitors Bring Happiness, Some By Coming Others By Going

Whisman, it's plain to see, gets along with all of them.

Missing mozzarella found in Brooklyn

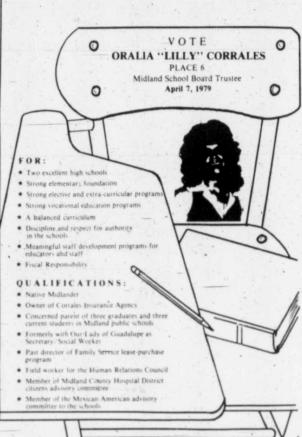

NEW YORK (AP) - A tractor-trailer loaded with a \$250,000 cargo of mozzarella cheese has been found in Brooklyn four days after it was stolen in lower Manhat-

tan, officers report. Police said they arrested Russel Taylor, 41, as he was taking boxes out of the trailer on Mon-

A police spokesman said Monday night that he could not say how much of the cheese was left in the truck and what shape it was in after more than four days.

Scott Kowalski, 38, of North Lake, Wis., was driving the trailer loaded with 700 cartons of Rando mozzarella from Milwaukee to Staten Island when he stopped at a lower west side bar late Wednesday for a drink. Kowalski said he left

the truck's motor running to keep the cheese refrigerated and stayed in the bar until 2:15 a.m. Thursday.

Charlie's truckers to suffer if clear channel stations disappear

NEW ORLEANS (AP) — When Charlie Douglas got his Road Gang together he had the highways to himself from Canada to Key West, Fla., and he knew where he was going. Now there's a detour ahead.

Douglas, 45, pioneered the all-night radio program aimed at the truck driver. From his cramped booth at WWL radio, he beams country music, road conditions and down-home chitchat to drivers all over the United States and Canada.

other way

rium

region; the music is heavy on Red Sovine, and commercials are for water pumps, CB radios, truck stops and other truck services.

Dedications are to drivers "bobtailing back from Buffalo," or "at the house," or "out of Dothan and heading for the barn."

But if proposed changes in federal regulations go through, his signal will reach only to about Columbia, S.C.,

Weather reports are given along and Springfield, Ill. — not bad by interstate highways, rather than by most standards, but pretty puny for WWL and the rest of the nation's two dozen 50,000-watt clear channel sta-

> The "clears" were created in the 1930s to make sure that everyone even those back in the hollows or out on the plains - could listen to radio. But recent surveys have shown that only a few thousand people would be out of reach of another station now if the range of the clear channel stations

were curtailed.

One of the proposals would cut back the range of the clear channel stations and add new stations in the areas they once served.

"According to their figures, they can only add another 125 stations without expanding the dial," Douglas said. "If they raise it to say 1800 on the dial, they can add 700. But that would make an awful lot of radios

"And there's an economic factor in

operating a radio station, too. I used to live in Rainbow City, Ala., and we didn't have a radio station. There was no way that town could support a radio station. And there are a lot of places like that."

His major concern, he said, is the

"If you're in any of the 43 states we get into, and you're going to be driving six or seven hours, you can just punch us up and stay with us," he said. "Maybe you'll run a mile or two where we'll fade, but we'll be right back. That's one of the things they like about us.

"You can stay with us and find out what conditions are like on down the road; you can be pretty sure you'll hear the tune you requested or the tune your wife requested for you, maybe win a contest, maybe get an emergency message.'

...we're a fine food store and a whole lot more!

Summit may be held soon

WASHINGTON (AP) - President Carter and Soviet President Leonid I. Brezhnev could meet at a summit as early as next month if the Kremlin approves American proposals to remove the last roadblock to a new strategic arms limitation treaty.

Word from Moscow is expected by the end of the week.

But the two leaders might not meet in Washington, where Brezhnev, burdened at 72 by several ailments, would have to endure tiring ceremonies and dinners.

On several occasions during the protracted negotiations, the Soviets hinted that Brezhnev would also find a long trip difficult. As a result, a summit might be held in Hawaii or Alaska.

The last two U.S.-Soviet summits were in 1974 in Moscow and Vladivostok in Siberia. The Carter administration feels it is now Brezhnev's turn to come to this country and is opposed to a signing at a neutral point, such as Geneva, Switzerland.

Reports that Brezhnev's health is failing began circulating Friday. American doctors were rumored to be rushing to his bedside, but the State Department contacted several

prominent physicians and said it found no substance to the reports. As for the treaty itself, the one major hurdle left involves verification - how to know if the other side is

Specifically, the administration is

concerned that the Russians may be encoding missile festing data beamed to earth by Soviet rockets.

This could make it more difficult to deduce, for instance, if land-based missiles were being armed with more than the 10 warheads each the treaty would permit.

There is also an unsolved problem of delineating what constitutes a new missile system

The two sides have tentatively agreed that each could deploy only

one new weapons system under the treaty, which would end in 1985. But the two nations have not re-

nuclear reactor incident, County Clerk Doris Shropshire said today. Through Monday only 724 persons had voted absentee, compared to 1,537 for the same period in the last city election in 1977. Today was the last day for

absentee voting. The election features four propostions for the South Texas Nuclear Project plus voting on 19 candidates for seven council seats.

The propositions would: - Authorize \$215.8 million more to keep the city's 16 percent share of the nuclear generator.

- Authorize selling the city's share. Authorize \$433.9 million for a coal or lignite plant that would replace the Nuke generating capac-

Authorize the use of the proceeds of the sale of the share of the South Texas Nuclear Project to help pay for the coal or lignite plant.

INS lawsuit to test

authority of agency SPOKANE, Wash. (AP) - A lawsuit against the U.S. Immigration and Naturalization Service is shaping up as a key test of the agency's authority to raid migrant labor camps in search

of illegal aliens. "This case addresses problems which have plagued Washington farm workers for many years," say Stephen R. Sady and Michael J. Fox. lawyers who filed the suit. "Through the mere fact of their residence, farm workers suffer intrusions into the most intimate areas of their lives at the hands of the defendants in this

case. Claiming that Border Patrol agents violated the privacy and constitutional protection against unreasonable searches, the suit seeks an injunction to bar such activities by immigration agents in Washington, Idaho, western Montana and northern Oregon.

Immigration agents have denied doing anything illegal.

Mail explodes,

injuring 10

FRANKFURT, West Germany (AP) - A mailbag full of air parcels exploded today at Frankfurt's Rhein-Main airport, injuring 10 employees of the West German airline Lufthansa, three seriously, police said.

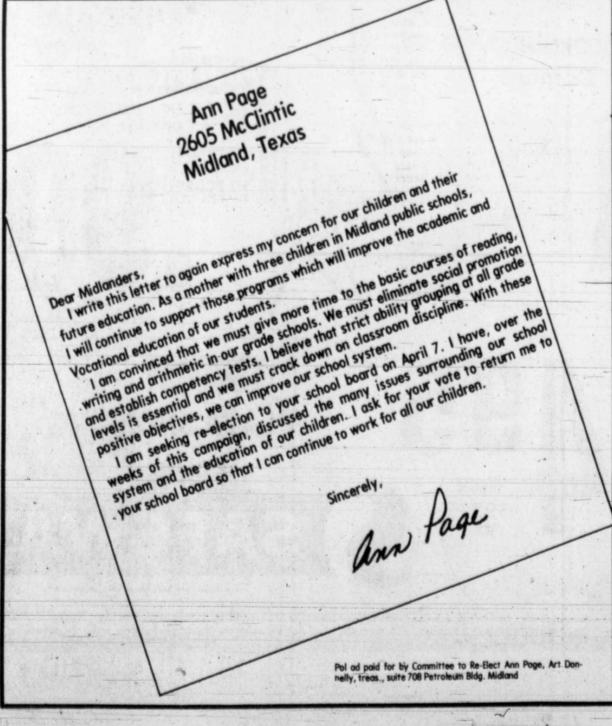

The explosion also did substantial damage to Rhein-Main, West Germany's biggest civilian airport, but "the size of it cannot be estimated yet," a police spokesman

Authorities said the explosion occurred at 7:25 a.m., and a police spokesman said, "One of the parcels inside that bag must have been filled with explosives."

The origin or destination of the parcel that exploded was not immediately determined, the Cologne radio station Deutschlandfunk quoted a post office spokesman as saying.

The report said mail sorters considered the parcel suspicious before it exploded. The building in which the blast occurred was immediately closed and only investigators were allowed in-

side, the radio said. Rhein-Main is home field for Lufthansa's fleet of more than 90 passenger planes. It adjoins the U.S. Air Force's Rhein-Main Air Base. one of the Air Force's biggest foreign bases.

TUESDAY, APRIL 3, 1979

DOE report indicates lifting prices won't increase yield

Department of Energy gave a House subcommittee a report Monday indicating that lifting price controls on crude oil would do little to improve the nation's energy supply:

However, there were conflicting statements about whether department officials resisted turning over the report to the House Government Operations subcommittee on energy and natural resources.

President Carter has indicated that he plans to lift controls on crude oil prices, but has not said when.

Earlier in the day, the subcommittee chairman, Rep. Toby Moffett, D-Conn., said the department refused to give him the complete report. He said he would ask fellow members of the panel to issue a subpoena Tuesday for Energy Secretary James R. Schlesinger to deliver the report.

But James Bishop, Schle-singer's spokesman, denied that there had been any intent to block the subcommittee from obtaining the report.

"He (Moffett) was not refused anything," Bishop said. Moffett opposes lifting con-

trols on grounds it would give the oil companies windfall profits and unfairly increase gasoline and other fuel prices for

A spokesman for Moffett said late Monday there would be no need for a subpoena because three volumes of the crude oil pricing study were delivered after the congressman sent Schlesinger a letter.

The spokesman said three separate attempts to obtain the report last week resulted in prom-

In the letter to Schlesinger, Moffett said he learned last week that the department asked an independent consulting firm, ICF Inc., to examine whether increases in crude oil prices encourage producers to find more oil and natural gas.

Moffett also said he has obtained excerpts of the resulting study which cast "grave doubts" on Schlesinger's position that prices must go up to encourage additional production

One excerpt from the study said there is a "strong presumption" that under the present pricing policy, the oil industry 'not only receives an adequate incentive for new discoveries, but generates sufficient cash flows ... to fuel all of its domestic exploration, development and production expenditures.'

Gulf quits canyon area? after second dry hole

By PETER MATTIACE

ATLANTIC CITY, N.J. (AP) -Gulf Oil Corp., saying it lost more than \$60 million in the Baltimore Canyon Trough, is giving up its search for oil and gas off the mid-Atlantic after its second exploratory well came up

Gulf's wildcat well, located about 80 miles east of this resort, is the 11th dry hole reported off the mid-Atlantic coast. Its second well was drilled to 12,813 feet below the ocean floor and

UT professor installed as president of SEPM

HOUSTON - Dr. Earle F. McBride, professor of geological sciences at The University of Texas at Austin, was installed Monday as the 53rd president of the Society of Economic Paleontologists and Mineralo-

The installation took place during the four-day annual convention of the American Association of Petroleum Geologists and the Society of Economic Paleontologists and Mineralogists which began here Sunday.

Dr. Robert L. Folk, the J. Nalle Gregory Professor in Sedimentary Geology at UT Austin, received the William Twenhofel Medal. It is the highest award the SEPM bestows and is given for outstanding research. The award was made at the Monday night award dinner.

Awards were presented to UT Austin students and faculty at this meeting in the Hyatt Regency Hotel when the UT Department of Geological Sciences has it alumni breakfast.

Wildcat tests scheduled in West Texas counties

nounced in Mitchell, Sutton and McCulloch counties.

hydrocarbons," according to company spokesman James Walker.

Five wells are still being drilled in the area by Texaco, Exxon, Tenneco and Mobil.

· Gulf's announcement was seen as another major blow to the promise of the Baltimore Canyon Trough area off New Jersey. Gulf's well was the fifth and last hole drilled into the "Great Stone Dome" rock formation between 60 and 81 miles east of Atlan-

The Great Stone Dome is the largest, most well-defined geological formation found by scientists below the mid-Atlantic seabed.

Experts had hoped that the dome would produce great quantities of gasor oil. The industry paid more than \$650 million to the federal government in August 1976 for the right to drill into the formation.

On Feb. 28, the oil industry showed its disappointment in the Baltimore Canyon Trough in general by bidding \$41.7 million, a very low figure, for only 44 of 199 additional lease tracts offered by the federal government in the area.

Gulf joins Continental, Houston Oil & Minerals, and Shell in giving up on the Baltimore Canyon Trough. Gulf was equal partners with Continental in the \$4.8 million dry hole announced Monday.

So far, only Texaco has announced any significant find, a gas strike last Aug. 13 about 106 miles east of Atlantic City. The Texaco find was off the Great Stone Dome and near the edge of the Continental Shelf.

Only three weeks ago, Texaco said its second exploratory well had come up dry only 1.5 miles west of the strike. Texaco is now drilling a third 'confirmation" well about two miles south of its original gas find.

Gulf's first dry hole was announced Jan. 10 and was about 90 miles east of Atlantic City and about 20 miles northeast of its latest failure. Both Gulf wells were drilled by the

leased semi-submersible rig New

Surcharge imposed

NEW YORK (AP) - Abu Dhabi Monday joined three other members of the Organization of Petroleum Exporting Countries in posting an approximately \$4 a barrel surcharge on oil prices. But Mexico, which generally follows the cartel's pricing policies although it is not an OPEC member, said it will not immediately match the new OPEC price increase.

OPEC raised its base crude-oil price 9 percent last week - effective Sunday - to \$14.54 a barrel, and said individual members could impose surcharges on that price as they felt market conditions warranted.

Algeria, Nigeria and Libya almost immediately said they would add \$4 per barrel to the price of their oil, while several other OPEC members announced surcharges of about \$1.20

Abu Dhabi's surcharge will raise the cost of its top quality crude to \$18.39 per barrel.

Mexico, however, said that for the time being it was leaving the price of its oil at the first-quarter level of \$14.10 per barrel.

But Jorge Diaz Serrano, head of Pemex, the Mexican National oil company, said last week the price, when set, could be "slightly higher" than the new OPEC price.

The Pemex spokesman declined to say when the new price would be set, whether or not a surcharge would also be added, or how much the new price

Meanwhile, Canada said it was moving up to May 1 from May 22 the date for implementation of a previously announced increase in the export price of its natural gas.

Oil industry attacks Peveto's taxing plan

By LEE JONES

AUSTIN, Texas (AP) - Rep. Wayne Peveto's assumption that his bill raising taxes on natural gas sold out of state would not also raise them for Texans has been attacked by the oil and gas industry.

The House Ways and Means Committee voted Monday to send the measure HB2045 to a subcommittee while it awaits a new estimate from Comptroller Bob Bullock on the price of natural gas.

But even if the new estimate in mid-April supports Peveto's view, that doesn't mean his bill will be approved. Committee chairman Bob Davis, R-Irving, flatly stated he opposes it.

rarily replace the present tax of 7.5 percent of market price with a flat rate of 12.5 cents per 1,000 cubic feet in 1980 and 13.9 percent in 1981. The flat rate figures equal what the

Peveto, D-Orange, wants to tempo-

7.5 percent tax would yield if the price of natural gas is as Bullock has estimated — \$1.66 per 1,000 cubic feet (mcf) in 1980 and \$1.84 per mcf in

Since gas sold on the interstate market costs less than gas sold within Texas, the bill would increase revenue from the same volume of gas. The tax on gas selling interstate at 50 cents per mcf would more than triple in 1980, from 3.7 cents to 12.5 cents.

"It's basically unfir for Texans to pay two-and-one-half times as much tax as the interstate market," said Peveto, the lead sponsor of the bill. "It's horrible that we in the Legislature have sat here and done nothing since 1972 while Texans have paid more and more in taxes but the interstate market has paid hardly any additional tax."

About \$330 million of the added revenue from out of state would endow a State Higher Education Assistance Fund for construction and building repairs at state colleges outside the University of Texas and Texas A&M systems.

nent Oil and Gas Association said there was no way the average weighted price for gas could reach \$1.66 in 1980, - meaning higher taxes for **Texas** consumers Peveto responded: "The comptrol-

Bill Abington of Texas Mid-Conti-

ler is the only one who has made a realistic estimate. The one we should leave it with is the state comptroller's

Robert Webb of Houston Lighting and Power said the bill would add \$21 million to Houston electric bills in 1980

Wallace makes appeal

WASHINGTON (AP) - Texas Railroad Commissioner Mack Wallace said Congress should act quickly to remove obstructions that California has placed in the way of pipeline to carry Alaskan oil to Midland. Wallace made the appeal today in a

statement prepared for an appearance before the joint hearing of the House energy and oversight panels. The hearing concerned plans of Standard Oil of Ohio to build a 1,000-mile pipeline from a tanker terminal at Long Beach, Calif., to Midland and on to refining centers.

Wallace said he opposes federal interference with state responsibilities except in case of extreme emer-

"I can assure you that an extreme emergency exists," he said. "Therefore, all obstacles to the operation of the Long Beach-Midland project should be legislated out of existence. The vital interests of this nation demand nothing less." Wallace has blamed the near col-

lapse of the pipeline project on California Gov. Jerry Brown who he said had kept his state in a posture of "intrasigence" in the face of urgently needed permits and clearances for the pipeline. Wallace testified in favor of bills by

Rep. Kent Hance, D-Texas, of Lubbock and others that would cut through judicial and environmental barriers, mostly in California, to the pipeline.

Operator changes

An operator change has been made on a pair of wildcat tests in Reeves County. Originally staked by A. N. Nor-

wood, the projects now will be operated by The Superior Oil Co. They are No. 1-24 Harrison and No. 1-12 Harrison, both scheduled for a

5.500-foot bottom The No. 1-24 Harrison is 850 feet from north and 1,980 feet from east lines of section 24, block 2, H&GN survey and 15 miles southeast of

The No. 1-12 Harrison is 1,980 feet from south and west lines of section 12, block C-20, psl survey and 16.5 southeast of Orla.

Aubrey Hamilton of Sun Gas Co., Dallas, said the bill would cause a \$5 million annual "unreimbursed tax burden" for his company, which he said sells a "considerable amount of

gas" at under 30 cents per mcf. "Should this be the case, it would result in litigaton," he said. Preveto

said he was willing to add an exemption for wells under contracts without pass-through provisions.

Robert Heath, head of the attorney general's opinions divison, said he would feel comfortable defending the constitutionality of this type of

Offset staked in Kent

Convest Energy Corp. of Houston staked No. 6 Wayne Williams and others as a south offset to production in the four-well Pollan (Ellenburger) field of southwest Kent County, near

the Garza County line. It is 4,512 feet from north and 715 feet from west lines of section 59, block 5, H&GN survey, abstract 115 and two miles southwest of Polar. It will drill to 7,800 feet.

SCHLEICHER WELL Canyon Operating Co. of Midland No. 1 Case has been completed as a 3/4-mile south extension to the Velrex (upper Canyon) field of Schleicher ounty, 12 miles northwest of Eldora-

Operator reported a daily flowing potential of 72 barrels of 42-gravity oil and five barrels of water, through perforations from 6,605 to 6615 feet.

The gas-oil ratio is 635-1. The pay was acidized with 1,500 gallons and fractured with 30,000 gal-

Location is 1,980 feet from south and east lines of section 57, block TT,

TCRR survey The upper Canyon was topped at 6,604 feet on ground elevation of 2,513

Total depth is 6,830 feet and 4.5-inch casing is set at 6,829 feet.

Jack F. Grim of Abilene No. 1 J. J. Gibson is a new 6,800-foot project in the Providence (Atoka) area of Cottle

County, eight miles east of Chalk. The location is 1,980 feet from south and 660 feet from west lines of section 20, F. T. Knott survey.

Three Scott projects staked

Clayton W. Williams Jr. of Midland staked a pair of projects in the Scott (Cherry Canyon gas) field of Ward County, and William B. Wilson & Sons of Midland will attempt to extend the field into Ward County with the No. 2 Worsham which is scheduled to test for oil or gas production inthe Delaware and Cherry Canyon.

Williams No. 1 Ona L. Scott will be drilled 1/2 mile northwest of Cherry Canyon gas production and 5,950 feet from northeast and 670 feet frm northwest lines of section 34, block 33, H&TC survey. It will dirll to 6,600

Williams No. 1 Barbara M. Williams will be drilled one and oneeighth mile north of Cherry Canyon

gas production and 660 feet from northeast and northwest lines of section 35, block 33, H&TC survey. It also will drill to 6,000 feet.

William B. Wilson & Sions No. 2 Worsham is 2/3 mile south of Cherry Canyon gas production, one and oneeighth miles south of Cherry Canyon oil production and 3/4 mile southwest of Delaware oil production. If completed as a Delaware gas well, it will reopen that pay in the field.

Location is 9,407 feet from south an 660 feet from east lines of section 13, block 6, H&GN survey.

The Williams projects are three miles south of Barstow, and the Wilson project is five miles southeast of Barstow

Polls show Democrat Jane Byrne is heavily favored to beat Republican Wallace Johnson in today's mayoral election in Chicago.

San Mateo County, Calif., voters choose a successor to Rep. Leo Ryan, a victim of the Peoples Temple killings in Guyana, and in Wisconsin, two state senators battle for the unexpired term of the late Rep. William Steiger.

The polls give Mrs. Byrne a 7-to-1 lead over Johnson. A Democratic victory would make her Chicago's first woman

A victory by Johnson would be the first for a Republican mayoral received 12 percent, and

By The Associated candidate since 1927. In the last four mayoral elections, the GOP candidate has lost by margins of at least 7-to-2.

Mrs. Byrne beat Mayor Michael Bilandic, who had the support of the regular Democratic organization, in the Feb.

Bilandic had fired Mrs. Byrne, a protege of the late Mayor Richard J. Daley, from a Cabinetlevel post in his administration after she publicly charged that he helped "grease" the way for approval of a taxicab fare increase.

A poll taken by The Associated Press and NBC News showed Mrs. Byrne attracting the support of 73 percent of registered voters most likely to vote. Johnson

Andrew Pulley, the Socialist Workers Party candidate; received 1 percent

A poll taken by the Republican Party showed Johnson trailing by a 7to-1 margin.

In California, Democrat Joe Holsinger, 57, Ryan's former top aide, and Republican Bill Royer, 58, were battling to complete Ryan's unfinished term in a special eletion.

County Clerk Marvin Church predicted a light voter turnout - between 32 percent and 37 percent somewhat less than the 41 percent who voted in the March 6 primary.

Peace and Freedom Party candidate Wilson Branch, 64, and American Independent Party cadidate Nicholas Ku-

Retired Americans sigh as debt-limit bill passes

WASHINGTON (AP) - Millions of retired Americans can cash this month's Social Security checks with confidence now that Congress has resolved a prolonged debate over the nation's borrowing.

"It's business as usual at the Treasury Department," said Richard Kelly, deputy assistant secretary for debt management. "There's absolutely no problem at all with respect to Social Security checks or any other checks.

But Kelly said the delay in passage of a new debt limit may have cost the government — meaning taxpayers - some \$35 million in higher interest rates on future Treasury borrowing.

Kelly's comments came Monday after President Carter signed legislation to allow the federal government to resume its borrowing

Carter signed the bill with no ceremony and no public comment.

The legislation, passed Monday by a 209-165 vote in the House, included a Senate amendment calling for efforts to balance the federal budget.

But a stronger amendment that would have required a three-fifths majority to authorize borrowing to cover a budget deficit was defeated, as it had been earlier in the Senate.

It was debate over various provisions aimed at balancing the budget

The legislation raised te nation's temporary debt limit from \$798 billion to \$830 billion

The limit had fallen to its "permanent" \$400 billion ceiling at midnight Saturday, forcing the Treasury to halt borrowing and raising questions about the federal government's ability to pay its obligations - including \$8 billion in Social Security checks, which were already in the mail to 35 million Americans

Also in jeopardy were checks for veterans and retired civil servants and railroad workers as well as payments to contractors, the Treasury Department said.

The House acted after Treasury Secretary W. Michael Blumenthal warned that without the legislation, "The United States of America could default." It would have been the first default "since the founding of the republic," he said.

In addition to assuring payment of government checks, passage of the bill also cleared the way for the Treasury Department to resume selling notes, bonds and bills.

And it allowed the department to approve the sale of U.S. Savings Bonds, which were suspended Monday, and the mailing of \$2.6 billion in income tax refund checks, which had been scheduled to go out last

Bill to raise sugar price runs into rough sledding

WASHINGTON — To the chagrin of sugar growers and glee of consumer groups, things have gone sour on Capitol Hill for legislation that would raise the price of sugar.

A White House rejection of a compromise to resolve an impasse among various sugar interests suggested by Agriculture Committee Chairman Tom Foley, D-Wash., has caused Foley to suspend markup of the bill and warned the administration there may be no bill at all

In the Ways and Means trade subcommittee, which also has jurisdiction over the sugar bill, Rep. Charle Vanik, D-Ohio, is putting off further hearings until he can get presidential inflation fighter Alfred Kahn to come and testify about the impact on consumers. Kahn has been reluctant to do that possibly because of administration pressure.

Kahn has said previously that each penny added on in the sugar bill would cost the American public about \$450 million to \$500 million, but an administration official said Kahn is not eager to testify and "get kicked around on the point.'

Columbia may be repaired

CANOGA PARK, Calif. (AP) -Rockwell International officials say they think they have solved the engine problems that have caused delays in the maiden flight of the space shuttle

Two of the 6,600-pound engines were sent by truck last week to the National Aeronautics and Space Administration test site at Bay St. Louis, Miss. The third would begin its overland journey today, said officials of the company's Rocketdyne Division.

The Columbia arrived at the Kennedy Space Center in Florida last month.

The shuttle, a reusable rocketplane, was was flown piggy-back from California to Florida by a jumbo jetliner.

The shuttle's first space flight is tentatively scheduled for November. The first flight has been delayed several times because of nagging problems with the main engines, described as the most advanced rocket power plants ever developed.

Rockwell is the prime contractor for the \$500 million spacecraft. Its Rocketdyne Division is developing the main engine system.

The administration might not care if there were no sugar bill, except for the fact that languishing in the Senate, as a hostage to sugar legislation, is an international sugar agreement which the United States instigated, negotiated and pressured other sugar-growing nations into signing. It would cause the administration some embarrassment if this country refused to ratify it.

According to an administration official, the president has most of the power to do what he needs to do for domestic sugar producers administratively except that he does not have the authority to raise import fees above 50 percent. That may be necessary if the price of sugar goes much

For the moment, all parties have more or less walked away from the chessboard where the complicated game of sugar legislation is being played. However, the sugar interests, divided among themselvs, are expected to meet informally Tuesday to try to work something out.

U.S. sugar growers desperately want legislation because there is a glut of sugar on the world market, where it currently sells at about 8.5 cents per pound. That price, U.S. sugar growers say, would be so far below the cost of domestic it would drive them out of business and leave the nation depending on foreign sugar the way it now is depending on foreign

That they want import fees raising the price of foreign sugar is about all the Hawaiian, Californian, Louisiana and Idaho cane and beet producers and their processors agree upon.

The administration, after a long debate within its walls, has agreed to a three-year bill providing for import fees raising the price to about 15.8 cents per pound plus a half-cent a pound payment to processors and growers for a total of 16.3 cents a pound in 1979. Legislation setting the price at about 15 cents per pound

expires this year. Though Foley, Ways and Means Chairman Al Ullman, D-Ore., and Sen. Russell Long, D-La., have introduced a bill calling for a total of 16.6 cents per pound, all pretty much agree that the administration level is where the bill will have to come out to

avoid a veto. The hangup is in the payment to processors and growers of a half-cent per pound. Hawaii and Florida, where large companies are the growers, want no limit on what can be paid to a single producer. But a limit, somewhere around \$50,000 to a single grower, is almost a sure bet to pass the House, as it already has on other crop

drovzeff, 57, also were running.

Ryan was killed in Noember while he was in Guyana to look into a commune run by the Rev. Jim Jones. More than 900 of Jones' followers died in a mass murder-suicide ritual.

In Wisconsin, Gary Goyke, a 31-year-old Democrat, was trying to break the Republican Party's hold in the 6th Congressional District. Republican Thomas Petrio, 38, was out to preserve it. Steiger, 40, died unex-

pectedly in his home last December shortly after he was elected to his seventh term in the

GOLDEN BEACH, Fla. — Los Angéles
Rams owner Carroll Rosenbloom
drowned while vacationing in this South
Florida resort city, police said. Rosenb-

Florida resort city, police said. Rosent-loom was 72.
Police Chief William Henrikson said the football executive was dragged out to sea by a heavy undertow. He said police were called at about 2 p.m. EST. The police chief said Rosenbloom and his wife, Georgia, were vacationing at a rented house in this Miami-area resort

city.

Rosenbloom, a wealthy business executive, stunned the sports world in 1972, when he swapped the Colis to Robert Irsay, in exchange for the Los Angeles Rams. Baltimore had won the Super Bowl in 1971 while Rosenbloom was the owner but he never realized his dream of having the Rams in a similar situation.

Last year, after having clashed with operators of the Los Angeles Coliseum where the Rams played their home games, Rosenbloom announced he was moving the Rams to Anaheim.

BOSTON — New England Patriots Coach Chuck Fairbanks, who tried to quit prior to the National Football League playoffs, is free to take the head coaching job at the University of Colorado, Patriots owner William H. Sullivan said.

Horner ready

ATLANTA (AP) -Bob Horner's permanent address for the 1979 baseball season will be determined by an arbitrator, but the young slugger says he'll be ready to take up residence around third base when the Atlanta Braves open the

regular season Friday. The 21-year-old Horner, last year's National League Rookie of the Year, has been locked in a contract dispute with the Braves. But despite a slightly sore arm, Horner says he'll be ready to play in the opening game in Houston.

"My arm is a little stiff. I guess I threw too hard, too soon," Horner said Monday in a telephone interview from the Braves' training camp in West Palm Beach, Fla. "I should be ready in a couple of days. I'm ready to go. My swing feels real good. I hit the ball well against Minnesota Sun-

"Obviously I'm going to be a little behind everybody else but not that much," he added. "It's just a question of getting my timing down.

Horner and the Braves have been involved in a contract dispute since November. He was seeking a long-term contract for a reported \$250,000 a year while Atlanta has offered \$100,000 for one year. The dispute will be settled in arbitration, but no date has been set.

Horner, who hit 23 home runs in 89 games with the Braves last year, has gone hitless in 11 official at-bats this spring. He stayed away from camp for the first 26 days of spring training because of the contract dispute.

If Horner is activated to the roster, rookie Mike Macha, who as had an excellent spring filling in at third for Horner, likely will be sent to the minors, Manager Bobby Cox said.

"I'd have to say we can't keep both of them." Cox said. "But if we have to send Macha out, I think we'd find a way to get him back pretty soon. Right now, there's just not room for both of

Motta says team is own worst enemy

By ALEX SACHRE **AP Sports Writer**

"We're our own worst enemy," says Dick Motta, coach of the Washington Bullets. "If we stumble and fall, it will be our own fault."

The Washington Bullets, the best team in basketball, are showing no signs of stumbling as the National Basketball Association's regular season lumbers to a close this week. The Bullets have strength, depth, poise, experience and first-class coaching - more than enough to become the first team in a decade to repeat as champion.

The Bullets also have injuries, something that has been on Motta's mind lately.

"If we can just get our people healthy, we'll be alright," he said. "But right now I'm worried about our hospital report. It's no fun to go through a whole season and not finish the way we started.'

The Bullets started by receiving the championship rings they earned in a seven-game series with Seattle last spring. They plan on finishing by nailing down a matching set of rings. "We have confidence in our ability to beat any-

body," forward Bobbby Dandridge said. "We're pretty well together as a team, and we'll be even better when we have 11 guys healthy and function-"We're as good as anybody," echoed guard Larry

Wright. "It's just a matter of us getting healthy." Wright and Charlie Johnson have been starting in the backcourt for Washington the past few weeks and the team has kept on winning, attesting to its depth. Kevin Grevey had lingering hamstring problems over the past month and is just now working himself back into game condition, while Tom Henderson is out with strained ligaments in his right knee.

"We'll have a bye through the first round of the playoffs (as champions of the Atlantic Division), noted Motta, who Sunday became only the third coach in NBA history to register 500 career victories, joining Red Auerbach and Red Holzman in that elite group. "We're pretty banged up now, but we'll be able to use that week off to get some of our people healthy again.'

Completing the Bullets' backcourt is Phil Chenier, the three-time all-star who underwent back surgery on Sept. 1 and is now the club's fifth guard. Roger Phegley, a first-round draft choice, is on the injured list because the Bullets' have nowhere else to put

"We have nine starters on our team, 10 with Chenier back," said Motta. "Other teams have depth, but no one has the trusted depth that we have. Because of the injuries, our bench grew up. If there's a better bench in the league right now, I don't want to

The Bullets' starters aren't exactly chopped liver.

Wes Unseld, Elvin Hayes and Bobby Dandridge form an experienced, powerful front line that matches up well against any in the league. Mitch Kupchak, who is recovering from a back injury, is the NBA's best front-court reserve, and second-year man Greg Ballard looks like a star of the future. Even rookie center Dave Corzine has played well in his few opportunities.

The Bullets stack up well on their own; they look even stronger whencompared to other NBA teams, nearly all of whom have some sort of glaring weakness. Give them a week off at the start of the playoffs so their wounds can heal and they should be tough to

"The biggest obstacle might be us, if we get down on ourselves," Dandridge said. "But I don't think that will happen. Neither does Motta.

"I think we can handle anyone else, I really do," he said. "We are going to lose games and not play well at times, but I don't think there is anyone in the league we can't beat for another championship."

No changes seen in Rams moving

LOS NGELES (AP) - The death of team owner Carroll Rosenbloom apparently will not affect the structure of the Los Angeles Rams, nor the team's planned move to Anaheim in 1980.

Rosenbloom, who drowned Monday while vactioning in Golden Beach, Fla., is expected to be succeeded as Rams' president by his son Steve, 34. The younger Rosenbloom currently is listed as the team's special assistant to the president. The NFL franchise will probably be held by Ro-

senbloom's widow, Georgia, in trust for his five children. Lawrence Strenger, an attorney representing the

Rams in the move from the Los Angeles Coliseum to Anaheim Stadium, said there will be "no variation in

Meanwhile, Rams' players mourned the loss of the team owner.

"I don't think any of the owners are as close to their players as was Mr. Rosenbloom," said Los Angeles' linebacker Jim Youngblood. "What can you say about a guy that's been around

football so long, that means so much to the game, not only to the Rams but to the NFL. It's going to take a while for the shock waves to get over.' "He did a lot of things for a lot of people that he

didn't have to," said defensive end Fred Dryer. "That's the type of guy he was." "He was just a friend, is the best way to describe it," said retired Rams' captain Joe Scibelli. "If I

needed advice or help, I could go to him." "A terrible thing," said guard Dennis Harrah. "He was the whole organization. Linebacker Isiah Robertson, who had some differ-

ences with the Rams last season and has asked to be traded, nevertheless had kind words for Rosenb-CASH

Lieberman top female cager

By WILL GRIMSLEY

AP Special Correspondent NEW YORK (AP) - Nancy Lieberman has never regretted the times she speaked out of the house and went down to the playground to rough it up with the boys.

"I never played against girls until I got in high school," says the 5-foot-10 All America point-guar, honored Monday night as the best woman player in college basketball.

'My parents hated it when they found out I was the one jumping up and putting finger marks all over the ceiling. The guys all resented me at first and my girl friends were envious. You have to take a lot of abuse but it was worth it.'

Now, Nancy says, boys who used to yell "Tomboy, why don't you play someplace else?" greet her with a friendly, "Hello, Nancy - gee, we caught you on the tube. You're

A statuesque redhead, Miss Lieberman is the 1979 winner of the Wade Trophy, symbolizing No. 1 in the women's collegiate sport. A 20-yearold junior, she led the Old Dominion team of Norfolk, Va., to a 35-1 record and the national championship. Her contributions included a 17.4-point scoring average, 254 assists, 144 steals and 276 rebounds.

She was a combination of Larry Bird and Earvin "Magic" Johnson, so talented that Uncle Sam will build his 1980 Olympic team around her and Carol Blazejowski of Montclair State. Carol won the award last year.

slow public acceptance of women's basketball while the female gender is thriving in individual sports, such as tennis and golf. Chris Evert collected another \$100, 000 for a weekend of tennis Sunday while Nancy Lopez, on a rival TV

Nancy is not discouraged over the

screen, missed in a bid for her third straight women's golf crown, losing in a rare five-woman playoff in a \$150,-000 tournament. "Each year women's sports have made greater strides," Nancy said. "More doors are being opened to

are making more money and generating more excitement. 'Women's basketball is the quickest growing of all team sports. It is 100 times bigger than it was five years ago. At Norfolk, we often play to

women athletes in every field. They

sell-out crowds.' This spectator appeal has not yet spilled over to the incipient pro game in the Women's Basketball League. Salaries in the 10-team league are said to range from \$2,800 to \$7,500 on some teams. Karen Logan of the New

Jersey Gems is the highest paid at a

reported \$21,000. Salaries in the men's National Basketball Association average more than \$125,000 with big name players drawing down \$500,000 to \$800,000.

Nancy and Carol both are looking to professional careers after the 1980 Olympics in Moscow, but they won't come cheaply.

"Olympic exposure should enhance our value," Lieberman sai. "I don't think \$21,00 would get either of us."

Nancy said Title IX, the law dictating equal athletic privileges for women in colleges, had done much to raise the status of women's sports but the greatest credit goes to dowager tennis queen Billie Jean King. "Billie Jean was out front all the

way," she said. "Before people knew about Title IX, she was screaming for equal prize money. She made herself heard. Nancy gravitated naturally to

sports. At age 10, instead of jumping rope and playing hopscotch, she was breaking into the boys' football, basketball and baseball games on the playground near her home in Far Rockaway, Queens.

"I got a lot of bumps and bruises and a lot of ribbing at first," she recalled. "Sometimes I would stay on the concrete court for 12 hours a day. I wasn't as big as the guys and couldn't jump as high, so I had to work twice as hard.

"Pretty soon, the guys, choosing up sides, started saying, 'We'll take Nancy.' I even played as the only girl on a man's Y team. I wore jeans and a tee shirt. I was a regular tomboy. I learned all the moves. Now my mom says she wouldn't erase my fingerprints off the ceiling for anything.

Flames goalie goes to bench

ATLANTA (AP) - Atlanta Flames goalie Dan Bouchard will return to the bench for tonight's contest against the New York Islanders, but he isn't likely to get the starting job, according to Flames Coach Fred Creight-

Rookie Rejean Lemelin, who won two National Hockey League games in a row while Bouchard was taking a forced rest, is the scheduled starter. "I think we might go with Reggie at least one more game," Creighton. "He's been playing well, and I don't think it would hurt."

Bouchard was given a five-day rest after the Montreal Canadiens scored on their first four shots against him in a game last week.

Royals line up umps

KANSAS CITY, Mo. (AP) - The Kansas City Royals have lined up a warehouseman, a policeman, a junior high school counselor and a postman to officiate Thursday night if major league umpires are not signed in time for the opener against Toronto.

'We are making plans to protect ourselves,' said Herk Robinson, a Royals vice president.

Harold Easley, former minor league umpire and warehouseman for a drug company, will work behind the plate. Bob Jones, Kansas City policeman; Larry Zirbel, counselor at Batiste Junior High and Don Schulte, mail carrier, were the others select-

They have worked the NAIA baseball tournament for four straight years and have all worked Big Eight games.

Market index

Stock market loses

NEW YORK (AP) - The stock market in general, and nuclear-power industry issues in particular, declined for the second straight session in moderate trading

Analysts said last week's accident at the Three Mile Island nuclear power station in Pennsylvania had raised new concerns in investors' minds about the energy out-

Most of the declines came in the first half of the session, however, and by midafternoon prices stabilized. The Dow Jones average of 30 industrials, off about 10 at

its lowest point, wound up with a 6.93 loss at 855.25. New York Stock Exchange volume totaled 28.99 million shares, down from 29.97 mil-

lion Friday General Public Utilities. owner of the Pennsylvania plant, did not trade during the session. J. Ray McDermott, whose Babock & Wilcox subsidiary built the plant, was off 1/8 at 19 as of the 4 p.m. close in New York.

Among stocks of companies which supply fuel and machinery for nuclear facilities, Westinghouse Electric was off % at 1814 on turnover of more than 1 million shares; Kerr-McGee 21/8 at 48%, General Electric ¾ at 4714, and UNC Resources, formerly known as United Nuclear Corp., 1% to 181/2.

The daily tally on the NYSE showed about five losers for every two stocks that gained ground. The exchange's composite index dropped .40 to 56.73.

Standard & Poor's index of 400 industrials was off .77 at 112.61, and S&P's 500-stock composite index gave up .69 to 100.90

At the American Stock Exchange, the market value index slumped 2.24 to 177.46. The NASDAQ composite index for the over-the-counter market closed at 131.36, off .40.

BUSINESS MIRROR How do you cool economic machine?

By JOHN CUNNIFF **AP Business Analyst**

NEW YORK (AP) - The battle continues. Poring over their diagrams, and conferring, hoping, and promising, they seek to cool a system gone haywire. There is little public understanding; there is great

The fight described is not to cool the Three Mile

Island power plant, although the words fit neatly, so neatly that the comparison teaches a lesson. The words relate instead to the battle of the economy. The challenges are remarkably similar. How do you cool the machinery without creating worse

conditions? How do you contain the consequences? How do you translate the complexities into meaning-

The inflated economy is an uncontrolled chain reaction, a wage-price spiral that feeds on itself and radiates problems throughout society, defying proposals of the nation's best economic brains. It isn't localized; it can't be. Its impact spreads.

Whatever it touches becomes the source of more, and in the process is sometimes devoured. Night and day it spreads, and the populace gets weaker. Everyone, right from the president on down, talks about stamping it out, but it doesn't work that way. If

force worked, then it would have been tried by now. How do you use force against a chain reaction? The measures used, economists say, must be more subtle. Education, sacrifice (of wage or price increases, for example), patriotism, guidelines, per-

suasion, leadership must substitute for direct But, the same economists say, there is another solution. Economic collapse, they tell us, is the most immediate corrective. It ends the chain reaction, or

rather the chain reaction ends the economy. Only then, some students say, does the public recognize the full consequence of an overheated economy. Only when it happens, they claim, does the lesson become real. Too often, admonitions go un-

Nevertheless, President Carter has little choice but to go that route. At first he tried to advise; he pleaded; then he proferred voluntary guidelines, and

now he has pounded the guidelines into demands. As he stepped up his demands, inflation worsened, and now a good many people believe the next move might be to involuntary controls, for which presum-

ably he needs congressional sanctions. Should the president move in that direction, the critics will swarm all over him. The imposition of controls, they will say, is the equivalent of trying to stop a nuclear reaction by stomping on it. But what remains to the president? Should he let

the economy fall into the pix of recession and possible depression? Or should he abide some of the damaging radiation while waiting for the system to cool?

And can the president afford the time?

People camp out for 'peanut fares'

LINTHICUM, Md. (AP) - The sign says: "Anyone attempting to crash the line is subject to the wrath of 69 very determined people who have been here since Friday. We all have very short tempers at this

The warning hangs above a line of people waiting to cash in on Texas International Airlines' 69-cent round trip from Baltimore-Washington International Airport to Dallas-Fort Worth.

In addition to the flight to Texas, there are campers awaiting the 99-cent sale on round-trip tickets to Los Angeles or Las Vegas.

Some 200 people were camped out on lawn chairs and sleeping bags awaiting the "peanuts fares" sale this morning. They were contained within a roped-in area marked: "Peanut Gallery - Do Not Feed the Nuts.

The first 99 people in line can get to the West Coast for 99 cents, while the super-economy Texas flight is available to the first 69 people.

Since the lines began forming Wednesday morning, "some heated discussions" have punctuated the otherwise docile environment, according to Steve Schwartz of Severna Park.

In order to assure their spots in line, the early birds have devised a numbering system. Every 12 hours, there's a roll call. Between roll calls, they can leave the area to eat and shower.

"The real rush is in the morning, trying to get into the bathroom," said one woman.

During the day, people have been occupying themselves by playing guitars, board games and cards, and watching themselves on the evening television news programs.

"What's really fun is sitting here and watching all the people stare at you," said one woman. But sleeping seems to be the main occupation. "Yeah, and they need a softer floor here," added David Nealy, 18, of Severna Park.

Odessa College offers course in marine life

Things that live in and around the water are the subject of a ten-day course offered by Odessa College

Students in the course will spend six days in the area of Puerto Penasco, Sonora, Mexico, collecting specimens, studying marine ecology, studying marine ecology in the field and doing lab work.

While en route, stops will be made at several Arizona landmarks, including Coronado National For-est, Chiracahua National Monument, Arizona-Sonora Desert Museum, the Phelps Dodge Corperation Open Pit Copper Mine, Kit Peak National Observatory and Organ Pipe Cactus National Monument.

Participants in the class will camp out during the trip and will need camping gear and sufficiant food and water.

The course is specifically designed for students who have had little or no experience in the study of marine environments, although they should have completed four semesters hours of biology or geology, college officials said.

Registration for the course is April 9-13 or until the class limit of 22 is reached.
