here's what the J. W. PEARSONS, 510 ANGELO CIRCLE, CARLSBAD, N. M., say:

They point out that a busy home requires husband and wife to share in the household duties. As Mr. Pearson says, "My wife is so busy with the children that I do a lot of the cooking. And I enjoy our electric range because it is quicker and a whole lot cleaner. Our electric range gives us a complete selection of controlled heat for any size pan, which is a big help for any cook." The Pearsons heat their water electrically, too. Mrs. Pearson says, "With a family of 5, including a baby, which sometimes requires as many as 3 washer loads of clothes a day, our water heater is economical, less than 10 cents a day to operate. It's completely safe, even for small children. In fact, we have put it in an open alcove in the hall." Notice in the picture, Mrs. Pearson fixes her daughter's shoe while daughter and mother obviously feel no wasted heat coming from the electric water heater. And that's because an electric water heater has no flame, and so is insulated on ALL sides.
