# **Ammonia promotes** peak wheat production from start to finish

### Leading West Texas farmers like DAVID ACKER put down 120 lbs. ammonia per acre on wheat land

David Acker of Nazareth, who farms 400 acres, says: "I wouldn't put in a wheat crop without applying ammonia. Phillips 66 Ammonia promotes vigorous plant growth...good color...larger heads...bigger yields. I put my ammonia down at the rate of 120 pounds per acre, usually around the end of August."

"On maize land, I put down about 100 pounds of ammonia per acre. Last year on 165 acres I averaged 5800 pounds per acre, after a 1000 to 1500-pound hail loss," he reports.

Thousands of Texas farmers are using Phillips 66 Ammonia to help assure top net profits per acre. Actual field reports prove that Phillips 66 Ammonia (1) boosts wheat and small grain yields (2) increases maize yields (3) produces more high grade cotton (4) improves forage production.
