A week later Eve returns to Lake City to find a new copy writer, MONA ALLEN, at the office. Mona is a trouble-maker.

Eve and Dick take an apartment in an old-fashioned house. Dick is absent from home frequently in the evening and Eve is worried because he does not explain these absences.

DON BURGER, Manager.

Ford Motor Company Doarborn Mich. About this matter of miles

The speedometer is a little thing, but can be a big source of wrong

On a recent test, two cars of different makes, with speedometers set at 0, were given each two gallons of gas, and driven the same road till they stopped. The top car went 7 miles farther down the road than the low car, yet the low car's speedometer showed that it had gone farther than the top car. Paper miles and road miles may be two quite different

Henry Ford Dearborn Mich.

It is easier to build a speedometer that will read 70 miles an hour than a car that will go 70 miles an hour.

A Detroit man who has a summer home in Northern Michigan, began several months ago to drive his first Ford V-8. He says:

"My watch tells me that I go up north in less time than I did before. but my Ford speedometer says that I go at slower speed, and the trip registers fewer miles. In my former car the speedometer speed was higher. my mileage greater on this trip, but with my Ford V-8 I go in less time and use less gas."

There is no mystery about that. His former mileage, speed and gas consumption were delusions. He figured by a speedometer that did not measure accurately, and was not meant to. All his costs--operations, repairs, upkeep---were calculated on a wrong basis. A wrong speedometer misleads on all these items.

Some car manufacturers justify this practice. They say it is just as well for a driver to think he is going 70 miles an hour when he is going only 62. Well, let that pass as to speed; does it justify telling every driver that he is getting more mileage out of his car than he really is? A speedometer measures speed AND mileage: should it cheat on both?

Speeding up a clock cannot create more hours any more than speeding up a speed-meter can create more miles. An hour is sixty minutes long. A mile is 5280 feet long. Ford mileage and Ford speed are accurately measured---they are there---you get them---no one gets more.

Anyone can buy speedometers and have them "fixed" anyway he wants them. We deal with manufacturers who know our strict stand on accuracy and are glad to meet our specifications. The limit of variation in Ford speedometers, a limit that cannot be avoided in manufacture.

We get our speed and mileage out of our engine and wheels, not out of our speedometer.

> Joe Fisher of Cisco and Benny Bolt, Sioux Indian of Bismarck, N. D., will wrestle for the right to meet Benny Wilson, junior middleweight champion. Both boys have been working hard for a shot at the title and are due to put up a good scrap. Old Joe Rivers will return to battle K. O. Ketchens in a six-round fight. Rivers has been very popular with Ranger fans and last week staged a great fight to outpoint Kid Faterson. Smity Smith of Cisco and Jelly Harry will go four rounds in the opener.

Progressive West Texas Merchants

Are INCREASING SALES This Way!

Trade associations and large mercantile organizations have proved, through

scientific research and investigation, the truth of the old proverb: "The more

you see, the more you want." They have demonstrated beyond the shadow

of a doubt that sales can be increased through adequate store lighting and

attention-compelling display lighting. Progressive West Texas merchants

vouch for the practical value of these findings . . . and you, too, can increase

TO SPEND LESS

Do as over two out of every five buyers of low-priced cars are doing: SAVE WITH A NEW CHEVROLET! You'll spend less to begin with—because the Chevrolet base price of \$445 is so much lower than the price of any other Fisher Body car! You'll make fewer stops for gas and oil, because the Chevrolet six-cylinder engine can go well over two hundred miles on a tankful! You won't have to be worrying about seeing the service man all the time, or paying a lot of repair bills beON MOTORING!

cause-well, Chevrolet just isn't that kind of car. It's built right and stays that way. Finally -you can look forward to getting a good price when you trade your Chevrolet in - its resale value is notably high.

Can you say all these same things about any other low-priced car? Evidently America thinks not-from the way that America prefers to SAVE with a Chevrolet.

In measuring the worth of your telephone, don't overlook incoming calls

· When your telephone rings, someone may have a message of vital importance to you.

In measuring the worth of telephone service, consider the importance of incoming calls, as well as the ones you make. An employer may wish to notify an unemployed member of your family that a job is open ... it may be the druggist saying that he now has the dye you wanted ... a friend who will be unable to meet you at the time and place agreed upon.

Incoming calls alone often justify the few cents a day that your telephone costs.
