Hall Of Remarks

by Herrel Hallmark

A BLOOD DRIVE is scheduled for Cisco Wednesday, July 29th and everyone is asked to give for the local drive. The drive will be held from 10:00 a.m. to 6:00 p.m. at E.L. Graham Memorial Hospital.

Cisco now owes 650 units of blood to Mary Meek Blood Center of Abilene, reduced from the original 900 units during the past blood drives held in Cisco.

OF SIMILAR interest was a story in the Dallas Morning News, Thursday morning, entitled "Blood Shortage Forces Parkland to Curtail Surgery."

The story written by Scott McCartney, staff writer of The News, started as follows:

"A blood shortage, described Wednesday by spokesmen for the Wadley Central Blood Bank as the city's worst in 2 1/2 years, has forced cutbacks in elective surgery at Parkland Memorial Hospital.

"The shortage is extremely critical," said Diane Walker, an administrator at Wadley, which supplies blood to all Dallas-area hospitals except Parkland.

"Parkland, which has its own blood bank, has eliminated most non-emergency surgery since Monday afternoon, said hospital spokesman Gregory Graze.

"Other hospitals have not yet curtailed elective surgery. But many of the 46 hospitals in the Dallas area that rely on Wadley for blood are shifting units of blood to other hospitals that need them, Mrs. Walker said.

"One of the causes of the shortage, Mrs. Walker said, is an increase of open-heart operations, which require large amounts of blood.

"The blood bank has supplied blood for 13 open-heart surgical operations a day for the past two weeks, compared to five a day last year at this time, she said.

"At 7 a.m. Wednesday, Wadley had only 71 of the 405 units of blood it needs for a safe, minimum supply, she

Rev. Adkins To Be Speaker

The Rev. David Adkins of the First United Methodist Church will be the speaker this Sunday for the evening worship service at the First Christian Church at 7:00.

The members and friends of the First Christian Church, First Presbyterian Church, First United Methodist Church and Wesley United Methodist Church will continue their combined Summer Sunday evening worship services during the remainder of July and through the month of August.

This Sunday a social hour will follow the preaching and refreshments of cold watermelon and cake and coffee will be served.

\$100 Mr. Pibb Winner

Mike McKinney, second from left, of Route 2, Cisco, received \$100 from Eastland Coca-Cola Representative Walter Maynard, Thursday, July 23, at Marr's Short Stop in Cisco. Mike had a cap from a 16 ounce bottle of Mr. Pibb which showed him as a winner of the \$100.

Coca-Cola began this give-away about a month ago and will continue it until September 30th. In this area, Mr. Maynard said \$100 winners have been found in Comanche, Rising Star and Cisco. Mike was the third winner of \$100 in this area.

You too could be a winner by drinking Coke, Mr. Pibb, or Tab. The caps from bottles and pull-rings of cans give you a chance to win 25 cents, 50 cents, \$1.00, \$10.00, \$100.00 or even as much as \$1,000.00.

Pictured are (left to right): Walter Maynard, Eastland Representative of Coca-Cola Bottling Company presenting the \$100 to Mike McKinney. Also shown are Mrs. McKinney holding their child, and Kay Proctor, clerk at Marr's. (Staff Photo)

said. "Type O-positive is in shortest supply with reserves of only five of the 150 units the blood bank needs, she said.

"A unit is approximately one pint."

The article continued on, but just the amount reprinted above tells you how important it is for people to donate their blood to Blood Banks and during blood drives.

Join with the Cisco Service Club and Cisco Civic League Blood Drive in their slogan which reads, "Give a gift of life!"

Roof Garden Dinner Theater To Present Final Season Show

The Roof Garden Dinner Theater in Cisco will present Neil Simon's hit comedy, "Come Blow Your Horn," as its final show of the season.

The play relates the richly comic complications of businessman Harry Baker's two sons. One is a 33-year-old playboy; and the other is the obedient 21-year-old, who finally decides to rebel and assert himself by moving in to brother Alan's apartment.

The two brothers are continually trying their father's easily abused patience. The humor of the situations that develop is in the true Simon style. It is inventive and

Band Director Encourages Pupils To Attend Camp

New Cisco High School Band Director, Alvin Young, encourages all Cisco band students to enroll in the CJC Band Camp this August 3-7.

"This will be an excellent opportunity for band students to get into shape before the school year starts," commented Mr. Young. Meeting from 9:00 a.m. until 4:00 p.m. the students will have band rehearsals, theory and rhythm classes and section drill each day.

Cost for the camp is \$30 for the week of instruction, including noon meals. Students of all levels are accepted in the camp.

For more information call Tim Jones at Cisco Junior College.

WORD of GOD

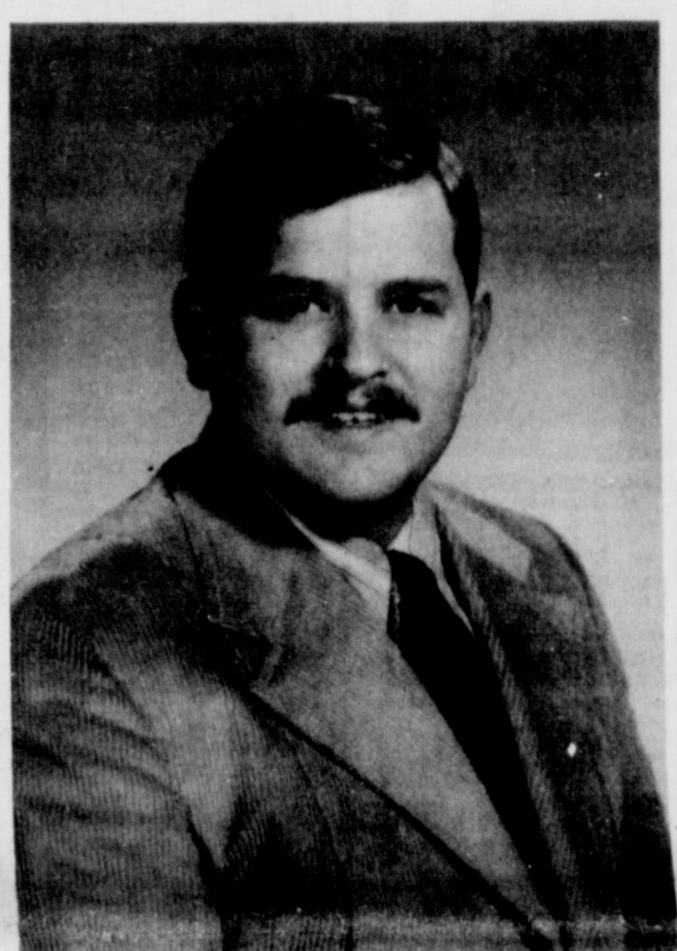

Prophecy (Old Testament)

But thou, Bethlehem Ephratah, though thou be little among the thousands of Judah, yet out of thee shall come forth unto me that is to be ruler in Israel; whose goings forth have been from of old, from everlasting.

Michael D. Moore Is Hired As City Manager

MICHAEL D. MOORE

Michael D. Moore, former City Administrator of Kaufman, Texas, has been hired as City Manager of Cisco, according to an announcement by Mayor Eris Ritchie, following a special called meeting of the city council Thursday evening.

Moore, who has a master's degree in public administration from West Texas State University, has also served in the city administration of Amarillo, Texas, and is an army veteran. He is 34 years of age, married, and has two children.

Moore will replace R.J. Turpin, who resigned on June 9. Former mayor Douglas Fry has been serving as Acting City Manager during the council's search for a new person to fill the position.

Mayor Ritchie, speaking for the council, stated "We feel most fortunate in securing the services of Michael Moore as our City Manager. We have screened many applications for the job, and have conducted several special sessions of the council for the purpose of interviewing possible candidates. We had a number of well qualified applicants, and after careful consideration and investigation of each, we have concluded that Mr. Moore is our choice to manage our city government. His experience in Kaufman as well as Amarillo, along with his professional training, equips him quite well in our estimation."

Moore, who has a master's degree in public administration from West Texas State University, has also served in the city administration of Amarillo, Texas, and is an army veteran. He is 34 years of age, married, and has two children.

Moore will replace R.J. Turpin, who resigned on June 9. Former mayor Douglas Fry has been serving as Acting City Manager during the council's search for a new person to fill the position.

Moore will replace R.J. Turpin, who resigned on June 9. Former mayor Douglas Fry has been serving as Acting City Manager during the council's search for a new person to fill the position.

Moore will replace R.J. Turpin, who resigned on June 9. Former mayor Douglas Fry has been serving as Acting City Manager during the council's search for a new person to fill the position.

council, stated, "While I know many challenges await me, I am genuinely looking forward to working with the city council, the citizens of Cisco, and the city staff in confronting each challenge. Please be assured I will always do my utmost to do the job that is expected of me. Allow me this opportunity to thank you for your confidence in me. I intend to prove this confidence is not misplaced."

Mayor Ritchie also expressed his thanks to Mr. Fry for his role in the city government over the past several weeks. He said, "Douglas Fry has done an absolutely tremendous job for the city as Acting City Manager, and we are very much indebted to him for

stepping in and helping us out during this interim period. He has worked well with the city staff, and has received cooperation from everyone involved. He will be available to assist Mr. Moore in becoming acquainted with the various details at city hall. All of the councilmen have conveyed to Mr. Fry their gratitude for a job well done."

The council voted to offer the position to Mr. Moore at their last regular meeting, on July 14, following one final executive session for interviewing candidates. His letter of acceptance was received Thursday, although his verbal acceptance was given a few days prior.

Moore will begin his duties with the city on August 3.

Rev. Armo Bentley & Wife To Participate In Crusade

Bro. Armo Bentley, pastor of East Cisco Baptist Church, and his wife, Juanita, will leave next Wednesday to participate in a crusade in South America. They will join other teams from this area in this mission effort of Texas Baptists.

Bro. Bentley will be the leader of his team composed of his wife and three other members from First Baptist Church in Early.

They will be going to Sao Luis, Brazil. Revival services will be held each evening with Bro. Bentley preaching. The team

First Assembly Of God To Hold Singing Sunday

The fourth Sunday community singing will meet Sunday afternoon, July 26, from 2:00 to 4:00 p.m. at the First Assembly of God Church, 308 West 7th Street, Cisco.

A.C. Holder will emcee the service and urges all who like to sing to come.

members will be visiting in homes during the day, with help of Brazilian workers from the church, introducing people to Jesus Christ. The name of the Church in Sao Luis translated in English is Tabernacle Baptist Church.

The group will return to Cisco August 12.

Calvary Baptist To Hold Vacation Bible School

The Calvary Baptist Church will hold its Vacation Bible School Monday, July 27, through Friday, July 31. The classes will begin each morning at 9:00 and conclude at 11:30. Classes will be provided for children three years old through the fourth grade.

Transportation for children will be furnished by calling 442-3020 or 442-2183 before 8:00 a.m. for bus pickup.

The Bible School will end on Friday with homemade ice cream and watermelon.

L.B. Carlile Wins \$500 In Big Jackpot Day Contest

L.B. Carlile of 809 West 3rd, in Cisco, was the first Big Jackpot Day winner sponsored by the Super Valu Food Store in Cisco.

Winners for the contest are drawn every Saturday at 5:00 p.m. at the store. The first Jackpot, won by Mr. Carlile, was \$500.

The award is never below \$100 and increases \$50 each week until it is won, then it reverts back to \$100.

The operating owner of the Cisco store, Harold Hendricks encourages everyone to participate and take advantage of the contest. More details of the contest are available at the local store. (Staff Photo)

9 Items On Agenda For WCTCOG Meeting

In its July 22, 1981, meeting, the Executive Committee of the West Central Texas Council of Government considered nine agenda items.

The Committee authorized submission of both a H.U.D. 701 Planning Application and the FY '82 Regional Aging Service Plan.

Consideration of proposed 1981 organizational budget revisions and FY '81 fourth quarter aging amendments was given by the committee.

The Executive Committee selected United General for WCTCOG Workers' Compensation coverage and filled two vacancies on the committee itself, replacing Kenneth Herndon (Anson I.S.D.) representing schools and Judge Donnie Carriker (Kent County) representing counties in WCTCOG sub-region 3. Ray Perry, Haskell County Commissioner was appointed to replace Judge Carriker and Mack Morris, Board Member for the Colorado City I.S.D. was appointed to replace Mr. Herndon.

400 Courses Offered At HPU This Fall

A schedule of classes for the fall semester at Howard Payne University is available from the HPU Registrar's Office.

Nearly 400 courses will be offered this fall at the University, not including late evening, continuing education and adult education courses. A schedule for those classes will be released at a later date.

Courses on the regular schedule are from the General College, School of Business Administration, School of Christianity, School of Education, School

of Music and School of Social Sciences. The various academic areas of the University offer approximately 30 major areas of study, leading to seven degree and two certificate options.

The schedule lists Aug. 31 through Sept. 2 as registration days and Sept. 3 as first day of classes.

Complete registration instructions and further information is available from the Registrar's Office located in Old Main, 915/646-2502, ext. 241 or 341.

4-H News

Four Eastland County young people will attend State 4-H Camp in Brownwood the end of July. These 4-Hers are Patri Spurlen, Leanne Brown, Rhett Harrison and Noble Laminack. Patri and Leanne are members of the Eastland 4-H Club and Rhett and Noble are members of the Gorman 4-H Club.

Activities at State Camp include workshops on canoeing, tennis, swimming, shooting sports and ground sports subjects. Evening

parties will be an exciting part of camp! One party will be a Halloween Carnival and party. Everyone will have the opportunity to dress in costumes. Another party during camp will carry out the Indian theme. Counselors will be dressed as Indian braves and maidens.

State Camp is a fun activity for our 4-Hers as they meet fellow 4-Hers from all over the state. For further information on the 4-H program in Eastland County please contact the County Extension Office.

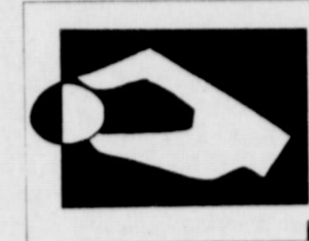

Leo Tolstoy was nominated for, but never won, a Nobel Prize.

VENDING TALK

New Technology

A vending machine that says "Thank you?" That's old hat. Talking machines appeared as a novelty in the 1920's and new technology could easily make machines talk with customers today.

Now a new generation of venders is being introduced which will utilize space age technology to perform even more reliably and to speed up feedback to the machines' keepers.

In the near future micro-processors and computer-type read-out devices will be built into new and existing vending machines. Faster reaction to out-of-order machines, better ability to consider customer brand and product preferences will be among the benefits for machine users.

Vending company engineers also say that the biggest source of machine malfunctions, coin mechanism four-ups, will be sharply reduced.

"How much money did I put in?" Digital read-out devices will show you the amount of credit.

No, space age technology won't send vending machines into orbit. But it will make them more fail-safe on the ground.

THEN and NOW!

Remember The Red Baron
If you're like many Americans, you've heard about the Red Baron, but you've a bit up in the air about who he was. Here are some interesting facts.

Then: High in the skies over France during World War I, the Baron Manfred Von Richtofen's daring earned him the title, the Red Baron. So heroic a figure was he, that even the Allied flyers held him in high regard even though he was on the opposite side.

Now: The Red Baron has returned—two Red Bar-

Soon you too will remember the Red Baron.

ons, in fact. They'll barnstorm this summer to help kids and promote Red Baron frozen pizza. Sold in grocery stores, Red Baron Pizza is manufactured by Red Baron Pizza Service, Marshall, MN.

The Red Baron and his ground crew will visit more than 40 fairs across the Midwest, passing out cents-off coupons and he'll donate a \$500 check to youth leaders at each fair.

Good News Dept.

Watching Our Wastes

There are ways to dispose of radioactive waste safely, scientists say. Many people are concerned—and confused—about the nature and the potential hazards of radioactive wastes. Actually, such wastes can be safely sealed in a special kind of glass, which is further protected by corrosion-resistant containers. The containers can then be buried 1,000 to 3,000 feet deep in salt beds or other stable geological formations.

The safest course for dealing with nuclear waste is to reprocess spent fuel elements after they have been removed from a reactor. The residual plutonium and uranium can be used to produce more nuclear fission power. The waste remaining after reprocessing can then be solidified and buried.

Does the technology exist to safely handle radioactive waste? According to a 1978 report by the American Physical Society, "Safe and reliable management of nuclear waste and control of radioactive effluents can be accomplished with technologies which either exist or involve straightforward extension of existing capabilities."

Rev. & Mrs. Madden Hold Special Services At The Assembly Of God Church

The Rev. & Mrs. Harold Madden will be ministering in special services at the Assembly of God Church, according to pastor Paul Nicely.

Services are scheduled to run July 26 - August 2, 1981, beginning at 7:30 p.m. nightly. The public is invited to attend all services.

The Assembly of God church is located at 1608 W. Commerce at Hwy. 80.

Rev. Madden will be teaching and preaching on prophecy particularly from the books of Daniel and

Revelation. He will have with him a large dispensational chart and will be answering such questions as: What's happening in the World and why; What caused the revolution in Iran; What part does Israel play in world affairs; What part does Russia play in prophecy; Where does Egypt fit due to recent events; and Will there be a temporary peace in the future?

Rev. Madden and his wife have extensive experience in the ministry having both pastored and traveled as field evangelists.

Schaefer and Talbot Keynote Annual Alcohol Institute

AUSTIN—From bourbon cowboys and honky-tonk angels to that person in the most high-risk occupation of all to become a drunk-your family doctor—the Texas Commission on Alcoholism's 24th Annual Institute of Alcohol Studies July 26-30 in Austin will cover wide-ranging topics.

Keynoters will be Dr. Jim Schaefer, an anthropologist who has studied the effects of bar atmosphere and music on drinking patterns, and Dr. Doug Talbot, who directs Georgia's program for impaired health professionals.

Schaefer will speak at an awards ceremony at 5 p.m. July 26 in the LBJ Auditorium. His presentation, open to the public, will include slides and music.

Talbot will speak on the disease model of alcoholism at 9 a.m. July 30 in the Joe C. Thompson Auditorium.

Schaefer and Talbot's

presentations are free and open to the public. In addition, more than 100 workshops with a faculty of alcoholism experts from throughout the state and nation will be offered to persons registered at the Institute.

Marriage News

Marriage is a cooperative -- not competitive -- endeavor, reminds Dorothy Taylor, a family life education specialist.

When disagreements arise, the aim is not to settle who's right or wrong, but to reach a solution both spouses can live with, the specialist points out.

Then marriage becomes a self-satisfying relationship for both partners, she adds.

Taylor is part of the home economics staff of the Texas Agricultural Extension Service, the Texas A&M University System.

A Message From John W. Clinton Hearing Aid Specialist

I want to let the people in Eastland County know that I will be on vacation from July 15th to August 1st. But on August 4th and 6th I will be having some specials that you should take advantage of.

I will be fitting new all in the ear aids for \$359.00 or the new rechargeable all in the ear for \$400.00. The rechargeable aid does not have to use batteries. If your aid needs to be cleaned or if you just want to look at the latest in hearing aids, come on in. Also ask me about the 30-day trial period. Batteries will be 1/2 price August 4th and 6th. Limit 2 packages. Thanking for your business.

ONCE UPON A FUTURE

"Once upon time..." How often we heard these words growing up. Time is so relative. I remember as a child thinking that person 25 years old was ancient.

Time is a human notion related to the span of people's lives. Time is finite; eternity is infinite. God's knowledge embraces all time and eternity. God knows, loves and enjoys each one of us the way a great artist enjoys one of his masterpieces. God sees the whole work as one, from the planning stage to the finished product; in Him the past, the present and the future are fused. You may be far from complete right now, but God the artist is still at work, and He sees the real you.

One day you will be finished, a beautiful creation full of joy. Your true identity as a person is more in the future than in the past. The revelation of Jesus is very clear on this. The Lord told us of the Father's kingdom where there are many mansions. To the good thief He said, "This day you will be with Me in paradise." The man was a thief, dying an ignominious death, but his faith altered the meaning of his life and his death. A spirit

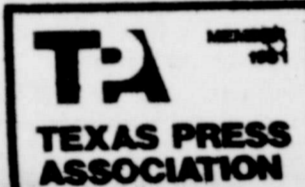

of repentance lifted the scales of darkness from his eyes and brought him the gift of everlasting happiness.

Once in awhile think of yourself as you will be a thousand years from now. Imagine the real you, free at last. In eternity you will be whole, free of sin, fully alive. The victory of Jesus over sin and death will be yours forever. Confirmed in grace, you will no longer be in danger of losing your soul through sin, you will be in paradise, your true country. By His supernatural gifts, God will have made you a new creation. Your growth will bring you to a greatness you've never imagined, for God Himself is your Maker.

Relax once in awhile in the knowledge about your future. It's going to be wonderful. Claim the victory of Jesus Christ as your own, and see yourself as you are meant to be - gentle, strong, kind, generous, self-controlled and full of joy. It will come.

The "yet-to-be" you is known to God right now. The process began at baptism. In His mercy Jesus entered your life; He became your true self. He is with you as you struggle in life. He also sees you in the future safe in paradise loving Him with your whole heart, mind and soul. He sees it all in one Divine Act.

Make Jesus the Lord of your life. Repent your sins and try to do better. He will bless you. The peace and joy of God be with you, now and forever.

GORDON SPOT

by DeMarquis Gordon

White grub worms can do a lot of damage to lawn grasses by feeding on the roots. The damage is most noticeable in the spring when the grubs are large. However, they are difficult to kill at that stage.

Now is the time to control white grubs. The worms hatched from eggs during the last month. They are small now and just beginning to feed on roots of Bermudagrass and St. Augustinegrass. The best time for treatment is from now until August 15.

If you are not sure if you have a white grub problem examine at least one square foot of sod for each 1,000 square feet of lawn area. Chemical treatment is needed if there are more than four grubs per square foot of sod.

Diazinon provides good control and should be used at recommended rates given on the chemical container label. The granular form is easier to apply and to wash into the soil than liquid or spray formulation. After using granules, drag the grass with a tow sack or water hose to knock them down to the soil. Then apply enough water to soak the granules into the soil.

Apply diazinon sprays at the rate of 25 gallons of water, including the insecticide per 1,000 square feet to wash the insecticide into the soil; wetting the lawn before spraying also helps. Always keep children and pets off the treated lawn until the grass is dry.

The key to white grub control in home lawns is proper timing of chemicals application, and getting the insecticide through the grass to the root zone where grubs are feeding.

Farmers and ranchers across the state will observe Farm Safety Week, July 25-31. Both President Reagan and Governor Clements have signed proclamations designating this week for emphasis on farm safety activities.

Rehm Advises Not To Coat Windshield Of Vehicles

A few motorists may be confused over the use of glass coatings and one way glass on motor vehicles. The Texas Department of Public Safety reports that drivers should be aware of the law and exercise caution prior to altering the window glass of a motor vehicle.

Wendell Rehm of the Department of Public Safety in Abilene advised motorists not to put anything on the front windshield or front side windows. "No coatings, plastics, liquid, or other materials may be put on the front windshield or front side windows of a motor vehicle that has not been approved by the Department of Public Safety," Rehm said.

However, Rehm said glass coating materials may be applied to the rear window and the rear side windows if the vehicle is equipped with outside rear view mirrors. Rehm says no motor vehicle glass coatings are currently approved by the DPS for application on windshields or front side windows. "Under state law, the

Theme for the weeklong observance is "Enjoy Life - Safely".

Farm Safety Week, sponsored by the National Safety Council, Texas Safety Association and the state Cooperative Extension Services is supported by many organizations serving agriculture. These organizations are asking farmers and ranchers nationwide to assist in their efforts to reduce accidents and to promote safety in all recreation.

All accidents involving Texas farm and ranch residents accounted for more than 400 fatalities and nearly 38,000 disabling injuries in 1980. Agricultural work related accidents claimed about 200 lives and caused about 20,000 disabling injuries. Ten percent of all agricultural accidents occur in Texas.

Total cost of accidents to Texas farm and ranch people exceeded 1/2 billion dollars last year while the figure topped \$5 billion nationally.

Farm Safety Week is designed to call attention to both leisure-time and work safety as a necessary part of efforts to control off-the-job, profit-eating accident losses.

If your pecan trees are dripping, a tiny yellow aphid is the likely culprit. This little insect sucks juice from pecan leaves, taking much more sap than it can fully use so that it passes through a sticky substance called honeydew. Often honeydew is first noticed on the windshield of a car parked under a pecan tree. When aphids build up in large numbers, honeydew will fall as a mist and cover everything under the tree canopy.

Pesticides labeled for yellow aphid control include Cygon, DeFend, Rebelate, Guthion, Diazinon, Malathion or Zolone. When using any insecticide, be sure to read and follow closely information on the product label.

The Home Energy Assistance Program

The Home Energy Assistance Act of 1980, Public Law 96-223, Title III, establishes the Home Energy Assistance Program (HEAP). The program is designed to assist low income households in meeting the increased cost of energy for heating and cooling their homes. It is federally funded through the Department of Health and Human Services (HHS). In Texas, the program is administered by the Texas Department of Human Resources (TDHR).

Low income families containing members age 65 or older may receive needed assistance this summer to help in cooling their homes. Under the cooling phase of the federally funded Home Energy Assistance Program (HEAP) the Texas Department of Human Resources proposes to make a one-time-only payment to qualifying households which:

1. have energy costs that are subject to increases
2. have both low income and low resources
3. contain a member age 65 or older by August 31, 1981
4. meet income limits listed below

T-C

Under TDHR's plan those households not receiving an automatic payment can apply between August 3 and August 31, 1981. Each county in Texas will have a designated location for members of such households to apply. If certified as eligible, the household should have their benefit payments within 20-30 days.

A household's resources cannot exceed \$1800 for one person or \$3000 for more than one person. The value of a homestead, cars, personal and household belongings will not be considered liquid assets. All household income must be verified and gross income cannot exceed the following limits:

Number of persons	Income Limit
1	\$296
2	446
3	613
4	756
5	893
6	1044
7	1195

All applicants have the right to a timely determination of eligibility (within 30 days of application); courteous service; reasonable assistance in completing the application; a review of any decision and, if necessary, a formal hearing; and confidential treatment of all information required for eligibility determination.

BIRTHS

We are proud to announce the birth of Robert Dale Ratliff II, born July 14th at Women's and Children's Hospital, Odessa, Texas, weighing 7 lbs. 2 oz. and 19 inches long.

The proud parents are Dale and Mitzi Ratliff of Odessa. Grandparents are Betty Boudreau of Cisco and Mr. and Mrs. Mertz Ratliff of Ranger. Great grandparents are Clay Cade of

Cisco and Ora Lee Ratliff of BelAire, Texas.

JAMES AARON RUST

Randy and JoAnn Rust of Cisco announce the birth of their son, James Aaron Rust, born at 8:39 p.m. July 16, 1981, in E.L. Graham Memorial Hospital. He weighed seven pounds and six ounces, and was 18½ inches long. He is the couple's first child. Maternal grandparents are Mr. and Mrs. Carl Stroebel of Cisco. Paternal grandparents are Mr. and Mrs. E.W. Rust of Cisco. Paternal great-grandparents are Mrs. Jessie Hammonds of Cisco and Mr. and Mrs. C.F. Yearwood of Paso Robles, Calif.

JAMIE RENE AGNEW

James Roy and Kora Agnew are the proud parents of a new baby girl, Jamie Rene, born at E.L. Graham Memorial Hospital July 18, 1981, at 10:27 a.m. Jamie Rene weighed six pounds and six ounces and was 19 inches long at birth. Maternal grandparents are Mildred Turner of Pioneer and Z.V. Turner of Ballinger. Paternal grandparents are Pearl Agnew and the late James Ed Agnew of Cisco. Paternal great-grandmother is Fannie Agnew of Cisco.

KRISTIN RAE ADAMS

Barry and Phyllis Adams of Abilene are the proud parents of a new baby girl, Kristin Rae, born at Hendrick Medical Center June 18, 1981, at 2:22 p.m. Kristin Rae weighed eight pounds and 9½ ounces, and was 20 inches long at birth. Maternal grandparents are Mr. and Mrs. Ray Turner of Breckenridge. Paternal grandparents are Mr. and Mrs. Gary Adams of Cisco.

Ron Pattons Purchase Home In Cisco

Mr. and Mrs. Ron Patton are the happy owners of the attractive dwelling located at 506 West 7th Street. Mr. and Mrs. Patton come from Eastland and you will find Mr. Patton at a desk at the First National Bank. The transaction was finalized by the Carl D. Gorr Real Estate Brokerage.

Leak Lanes Host Party

Mr. and Mrs. Leak Lane hosted a backyard party and family gathering July 18 at their home, 500 West Front Street.

Out of town guests were Opal and Jake Rhyne of San Antonio; Philip and Velma Rhyne of Phillips; De Witt Sanford, Nina and Dan Daniels, Choy Carter, all of San Jose, Calif.; Ellouise Hunter of Campbell, Ca.; Irene Brown and Laura Watkins of Reno, Nevada; Mary and Dale Rhyne, Bob Rhyne, Bill and Scyrena Rhyne of Yuma, Ariz.; Gladys and Darwin Rhyne, Darlene Rhyne of Dumas; Alta Rhyne of Carbon; Maxine and Joe Bennett, Christine and Cecil Self of Gorman; Sam and Ann Murray of Eastland.

HONORED

Rev. and Mrs. Jim Boswell were honored with a gift shower at the Moran United Methodist Church Thursday night, July 16. Rev. Boswell is pastor of the Moran and Albany Methodist Churches. A program of music was given by L.C. Kays on the violin accompanied by Lucy Burton, Mrs. Burton, also read a poem and Mrs. Mae Delle Jones showed slides made during her recent trip through the Southern States.

Charleen Donaway and Hubert Brewster of Moran are shown with two yellow catfish weighing 32 and 37 pounds. The fish were caught near Moran.

'Program Of Service Must Have Growth'

"There must be growth to sustain a program of service to the community," District Gov. Noble (Spike) Harris of Abilene told the Cisco Rotary Club Thursday noon during his official visit. He was emphasizing the club's opportunity for increasing its membership as a means of making its influence and the Rotary theme more effective in the Cisco business and professional community.

The club, chartered in 1921, now has a roster of 18 members. "I am sure," said Harris, "that with a sustained effort that membership can be doubled or more than doubled in two or three years."

Preceding his address, the District Governor, on behalf of the club, presented Anton White with a beautiful wrist watch in recognition of his 28 years of service as club secretary, a post White has now yielded to Billy Reynolds.

Harris, an Abilene real estate broker for 29 years, heads a Rotary International District-No. 579-of more than 200 square miles and 50 clubs stretching from Abilene to Arlington and Brownwood to Wichita Falls. Joining him in his visit to the group was Emmett Lasater of the Eastland club, representing four clubs in the area, not, however, the Cisco club.

The current theme of Rotary International—a world wide organization of 19,200 clubs and 900 thousand members—is "World Understanding and Peace Through Rotary." Harris suggested that Cisco Rotarians emphasize this objective during the international convention in Dallas in August by inviting certain representatives of foreign clubs to a visit here to acquaint them with aspects of the local economy and social organizations. He told the club that during foreign conventions he had attended, a

Eastland County Appraisal Work Continues Here

The task of appraising the taxable property of Eastland County by 1982 has been underway for several months now. The work is being done in compliance with tax laws passed requiring that all Counties within the State have their property valued at 100% market value by the 1982 tax year.

The reappraisal work is being done by the valuation firm of McMorries and Company and is due to be completed sometime this fall. Field men for the firm have completed work in the Rising Star and Carbon areas of the County already. There are presently several crews working in both the Cisco and Gorman areas.

Field work should start this week in the Eastland area as well. There will be a crew working in the city and at least one other crew working in the rural area of the district.

When the field men arrive at your property, they will identify themselves before making any type of measurement. If for some reason the property owner is not available, they will leave their identification with name and address before going ahead with their measurements and classification work. Representatives of the firm stress that they do not need to enter the home of the property owner, their measurements will be of the outside area.

Again we are reminded that this work is being done in order for all of the taxing jurisdiction of the County to be in compliance with the law and the cooperation of the property owners is requested. The work being done, along with new values, will not effect the 1981 tax rates or rolls; it will not be used until 1982 when required by the present law.

If you have any questions concerning the reappraisal please contact your local school district tax office.

T-60

similar hospitality had opened very informative windows on distant interests and social forms.

He praised the Cisco club for its project of scholastic aid to deserving students, and asked it to stress programs in service to youth during a September emphasis consistent with the beginning of the school year. "Service to youth is an investment in our future," he said.

Among other suggestions aimed at broadening the Rotary influence, he urged programs having to do with the international theme and some especially devoted to acquainting members and others with Rotary ideals and purposes.

Pointing out that each member is a force of "one," he declared that a club of "eighteen 'ones' can do anything they set out to do with perseverance and determination"—two qualities he found more important to success even than talent.—BAB

4-H Club Holds Meet

The Cisco Good Times Gang 4-H Club met July 16, 1981, at 7:00 p.m. at the city park. Motto, pledge and prayer were led by Kathryn Ward and Lori Ann Speegle. Jeff Kinser, president, presided over the meeting. Patricia Ray gave a report on the 4-H Field Day. Julie Weathers entered the Garden Show held earlier in July and won a first and second place. Good Times Gang members entering the record book contest were Christy Purvis and Julie Weathers.

Members and leaders enjoying games and refreshments at the meeting were Jeff Kinser, Kathryn Ward, Patricia Ray, Lori Ann Speegle, Mrs. Ray and Mr. and Mrs. Speegle. Guests were Holly Lambert and Debbie MacKellar.

WORD of GOD

3rd Commandment
Thou shalt not take the name of the Lord thy God in vain: for the Lord will not hold him guiltless that taketh his name in vain.

Exodus 20:7

Vacation Church School To Be Monday

Vacation Church School, sponsored by First Christian, First Presbyterian and First United Methodist, will be held at the First United Methodist Church, 405 West 8th, Monday, July 27, through Friday, July 31. Classes will be held from 9 to 11:30 a.m. each day.

Classes will include ages three years through sixth grade. Registrant should register for the grade which they attended during the past school year.

Coordinators for the VCS are Yukiko Kleiner, First Presbyterian; Hattie Weathers, First Christian; and Betty McGrew, First United Methodist. Registration forms may be obtained from any of the coordinators, or from the churches during Sunday School or after church, at any of the sponsoring churches. Pre-registration is helpful, but students may register the morning of VCS.

The seven classes that are planned are:

1. Nursery A: 3 and 4 year olds, Diane Yowell (FCC) and Sherry Ray (FUMC).
2. Nursery B: 3 and 4 year olds, Caddy Claborn (FCC) and Cathy Lee (FCC).
3. Kindergarten: 5 and 6 year olds (who have not attended first grade), Virginia

Pingleton (FCC), Carolyn White (FUMC) and Rev. Jim Pingleton (FCC).

4. 1st and 2nd grades: (1980-81) Janet Heyser (FUMC), and Patty Moore (FCC).

5. 3rd and 4th grades A: (1980-81) Brenda Adkins (FUMC) and Cindy Honea (FUMC).

6. 3rd and 4th grades B: Nannette Maxwell (FCC) and Pam Jackson (FUMC) and Eva Humphries (FCC).

7. 5th and 6th grades: (1980-81) Sherry Wright (FUMC) and Judy Campbell (FUMC).

Workers are still needed on the refreshment and entertainment committees. Teenagers wishing to help with crafts, outdoor games or serving refreshments are invited to contact one of the coordinators listed above. (They must have been in the 7th grade last year or higher.)

There was a meeting Sunday, July 19, at 3 p.m. at the First United Methodist Church to decide about the final program, assembly, suggestions for an offering, and room selections. The audiovisuals available were also discussed.

Teachers and their assistants will meet Sunday, July 26, at 3:00 p.m. to

prepare class rooms. Refreshments will be served each day, and a nursery will be provided for the babies of the staff who are

too young to attend a class. The three sponsoring churches invite children of all denominations to attend the Vacation Church School.

THIS IS NOT AN INSURANCE POLICY!

Doctoring Yourself May Not Be The Cheaper Way

COLLEGE STATION—Is "doctoring" yourself cheaper or not?

Americans spend more than \$3.5 billion a year "doctoring" themselves with nonprescription drugs readily available at pharmacies and supermarkets, says Beverly Rhoades, a consumer information specialist.

"Sometimes these medicines neither prevent nor cure illness or discomfort. In fact, if consumers keep a record of these expenses, most will be surprised at how much they spend," the specialist says.

Rhoades is part of the home economics staff of the Texas Agricultural Extension Service, The Texas A&M University System.

In addition, many consumers are concerned about their prescription-medicine expenses, the specialist notes.

What can consumers do? Realize that prescription and over-the-counter (OTC) medicine indeed constitutes a sizable part of medical expenses, the specialist says.

Then take a hard look at both types of medicine with your own buying-and-use procedures in mind, she

advises. In each case, decide if you're getting the most effective results possible for the most economical prices, Rhoades says.

'OTC' MEDICINES
Before taking any more over-the-counter (OTC) medicines, ask yourself these questions:

Are the drugs safe for general use without a doctor's supervision?

Does the label warn you not to take the drug if a certain illness or condition exists.

Can you take the drug SAFELY in combination with other drugs you now take?

Does the label warn about possible side effects? Do the drugs really do what the makers claim they will?

If you had to say "no" to any of those questions, avoid treating yourself, Rhoades cautions.

The money you spend is wasted if the medicine does not prevent illness, if it does not cure illness, or if it causes illness or complications, she says.

Money you "saved" by avoiding a doctor's visit may actually become an added expense when you finally do see a doctor or buy prescription medicine to treat an illness that over-the-counter medicine didn't cure.

Sunday, July 26

Malathion Is A Proven Safe Insecticide

COLLEGE STATION—Despite the public uproar in California about use of the insecticide malathion to control Mediterranean fruit flies, the material has a proven track record of being safe and free of health hazards.

"Malathion has been with us a long time—since the early 1950s—and is one of the most commonly used insecticides by farmers, homeowners and gardeners," points out Dr. Phil Hamman, entomologist with the Texas Agricultural Extension Service, Texas A&M University System. Hamman says he has been inundated with telephone calls since the California controversy from people wanting to know about the safety of malathion.

Tests sponsored by the National Cancer Institute have shown malathion to be both non-carcinogenic (not causing cancer) and non-mutagenic (not causing genetic changes). According to Dr. Bill Plapp, research toxicologist with the Texas Agricultural Experiment Station, malathion is one of the least dangerous insecticides in use today.

"Malathion is routinely used by many homeowners and gardeners to control insects and mites on trees, shrubs, houseplants, flowers and vegetables. It is also used to control external parasites on pets," says Hamman.

In addition, he explains that malathion is used widely to control many different insect pests of crops. For instance, it has been used in large area control programs for boll weevils and grasshoppers in West Texas.

Another major use of malathion in Texas has been for mosquito control programs, points out the entomologist. "Malathion is used almost exclusively to rid urban and suburban areas of disease-carrying mosquitoes," says Hamman. "In 1966-67 and again in 1971, vast areas of Texas, including major cities such as Dallas, Houston and Corpus Christi, were aerially sprayed with malathion to control outbreaks of St. Louis encephalitis and Venezuelan equine encephalomyelitis, diseases spread by mosquitoes."

The entomologist points out that in all of these uses of malathion, there has been no record of problems involving human health.

Of course, Hamman cautions users of malathion as well as other insecticides to follow commonsense precautions for safe and effective results. This means following directions on the product label, avoiding any unnecessary contact with the insecticide, and washing your hands after use. He also suggests scrubbing sprayed fruits or vegetables before cooking and eating.

Kiwanis International Elects New President Billy Webb

E.B. "Mac" McKittrick

E.B. "Mac" McKittrick, Edmonton, Alberta, was elected president of Kiwanis International, July 1, 1981, during the organization's 66th annual convention in New Orleans, Louisiana, according to Joe Wheatley, president of the Kiwanis Club of Cisco. He will assume office October 1, 1981, at the start of Kiwanis' administrative year.

Kiwanis International is a worldwide service organization of more than 300,000 members, in nearly 8,000 clubs in 73 countries. Some 18,000 people attended the New Orleans convention. All major sessions were held in New Orleans' Superdome. The convention traditionally serves as the "annual meeting" for Kiwanis. Delegates elected the organization's entire slate of officers for 1981-82 in addition to making McKittrick president. They also passed a number of resolutions and amendments to the international constitution.

McKittrick, a 24-year veteran of Kiwanis, has been a member of its governing board for the past seven years. He succeeds Merald T. Enstad, Fergus Falls, Minnesota, insurance agent. McKittrick is a chartered accountant.

He held most of the leadership positions in his club,

(Edmonton-Oil Capital, Alberta), and his district (Western Canada) before his election to the International Board of Trustees seven years ago.

McKittrick is a member of the Canadian Institute of Chartered Accountants, the Alberta Institute of Chartered Accountants, and the Edmonton Accountants Club. He is a member of the North American Association of Corporate Planners. He is also a member of the Board of the Alberta Medical Research Foundation, the Board of the Edmonton United Way, and of the RCAS Association and the Edmonton Club. He is a former treasurer of Operation Friendship Society and of the Royal Canadian Legion. He and Mrs. McKittrick have two sons.

Other officers and trustees elected at New Orleans were: John T. Roberts, Audubon Baton Rouge, Louisiana, president-elect; Aubrey E. Irby, Tyler, Texas, treasurer; Warren H. Edwards Bonifay (Orlando) Florida and Raymond W. Lansford, Columbia, Missouri, vice presidents.

Re-elected for two year terms as trustee were Frank J. Di Noto, Rosemead, California; Henry "Les" Myers, Jr., Louisville, Kentucky; and Donald E. Williams, Berea, Ohio. Newly elected to the Board as trustees were Arthur DeLorenzo, Rahway, New Jersey and Gene R. Overholt, Colonial Plymouth, Michigan. Later this summer a trustee will be selected from the Eastern Canada and Caribbean District to complete the 18 man Board of Trustees.

All will assume office on October 1.

4-H Club Meets At Bank Room

The Cisco Good Times Gang 4-H Club met June 18, 1981, at 7:00 p.m. in the Community Room of First National Bank. Jeff Kinser, president, presided. Club members repeated the motto, pledge and prayer led by Kelly Cooper, and Laurie Cagle. A report on 4-H camp was given by Laurie Cagle.

Members and leaders who attended camp were Stacy Willingham, Laurie Cagle, Christy Purvis, Teresa Maxwell, Patricia Ray, Jana Yowell, Julie Weathers, Stephanie Kimbrough, Aki Kleiner, Lori Ann Speegle, Kathryn Ward, Mrs. Dianne Yowell and Lori, Mrs. Hattie Weathers and Mr. and Mrs. Randy Speegle. Members present at the meeting were Laurie Cagle, Kelly Cooper, Teresa Gaeta, Vonda Hightower, Stephanie Kimbrough, Jeff Kinser, Patricia Ray, Lori Ann Speegle and Julie Weathers.

Diana McCaghren Receives Degree

Diana McCaghren, daughter of Mr. and Mrs. Ross McCaghren of Route 2, Box 182, was one of 683 students at Abilene Christian University who received degrees during the University's 75th annual commencement ceremony in early May.

McCaghren was a candidate for the Bachelor of Science in Education degree. Her field of study was Elementary Education. She is a 1977 graduate of Cisco High School.

Billy Webb Attends Firemen's Training School

Billy J. Webb, volunteer fireman on the Cisco Volunteer Fire Department of Cisco, attended the 52nd annual Texas Firemen's Training School July 19-24. The school, attended by nearly 2,000 students representing about 750 cities from more than 25 states, was held on the Texas A&M University campus in College Station this week.

Firemen can choose their course at the school from a list including Fire Fighting, Fire Prevention, Fire Department Officer Training, Fire Department Pump Maintenance, Specialized Fire Protection, and Disaster Rescue Training.

Fireman Webb is being sponsored by Eastland County Farm Bureau and Texas Farm Bureau Insurance Companies by contributing toward the cost of the school. Since volunteer firemen are interested in attending this school to help do a better job of fire fighting and fire prevention, 100 County Farm Bureaus and the Texas Farm Bureau Insurance Companies in the statewide program have sponsored 100 firemen at the school.

"The Farm Bureau Insurance Companies believe volunteer fire departments have been very effective in reducing the amount of loss involved by fire in rural areas," said President Carol G. Chaloupka of Dalhart. "It is our hope in sponsoring this program that the fireman will help the Cisco Volunteer Department to better serve the residents of Eastland County."

Beautiful Medina

By Millard Slaughter

On Friday, July 10, 1981, my wife Golda and I drove to Kerrville, Texas, to visit our son John and his wife Beverly.

Saturday a.m. we all discussed about some place to go that day, and all agreed to visit the Medina River and the territory around and about it. This being our first time to visit here in the southwest part of Texas we were astonished at the beauty of the river and surrounding territory.

The Medina River as it flows is a fairly short one. It heads at or near Vanderpool, Texas, in Bandera County and flows through a chain of hills and mountains called Beltones meaning (drop offs or over look), escarpment meaning (a long cliff, a place of safety, or cut away sharply to prevent hostile approach).

These hills and mountains take over where the Edwards Plateau leave off near San Angelo, Texas. The Medina flows through these mountains and hills some 100 miles and continues through Bexar County. There is a large lake built at Mica, Texas, on it in Medina County, northwest of San Antonio and finally empties into Elmendorf lake south east of San Antonio, Texas, according to my information. This is just about it except some things that has happened to and on this beautiful river. Will mention here there are at least two historical settlements near the Medina namely, Camp Verde established in 1825 and Camp Castrovilla.

The Church of Christ has a large camp there on the river called Bandina. This camp parts of which retired people of the church live on and lots will be sold to members of the church that care to buy. Also they have youth camps and river front lots on the second bank of the river for dwelling. This was where some families lived in 1978 in early summer.

All good things seem to have some things bad happen.

The above date was one of those bad things. There came a rain no a flood 28 inches in three hours on the upper Medina water shed. A

Senior Citizens Nutrition Menu

empty can, no paper, not even a cigarette butt on the camp ground.

In places there seemed to be a change in the river the flood had changed it in places where there were sharp curves. The flood caused it to cut across and two straighten the river bed. We saw children and older people wading and swimming in the blue water. The water seems to be flowing around 15 miles per hour and looked like it was from ankle deep to 10 or 15 or maybe 20 feet deep in places. One would need to see this beautiful river to really appreciate it. It is about 32 miles seems like to me west of Kerrville.

We shall always thank the good Lord we had the opportunity of seeing this beauty spot. The sunset over the mountains is something to be held. The colors are as the sun sinks up river from the bridge are continually changing and for an hour to and hour and a half or two. The river at the bridge is in cool shadows as the sun sinks slowly. Some of these mountains have a mound at the top that looks as if it had been built by hand with one rock placed on top of another and the last 25 to 50 feet of the mountains are straight up and most near all of them have a deer trail you can see for miles. Along these trails are deer blinds used by hunters in season. The next time we visit there will try some fishing.

He managed to save one child and his self by hanging onto a large tall Douglas fir tree. Some eight homes were washed away with only the concrete foundation left and at this search after the water went down there were eight bodies found and the final count was 13 drowned.

It is not my intention to blame anybody for this tragedy it was only a rain storm. We drove a long way along the bank of a winding branch that emptied into the Medina at the foot of some small steep hills which we traveled over on the way to the river. We had to use our low gears on these steep places.

When we crossed the river we stopped on the other side of the bridge and stood and gazed at the beauty that was in our sight. The Douglas fir trees we have spoke about were all over the river banks and in the river itself. As far as we could tell this is the only place that these trees grow in Texas at least my son and I discussed it and we came to the conclusion that this is right.

Also we hear that there is some cypress trees on and in the Medina. The water is as blue as the sky running clear and cold. We stood on the roots of trees in the edge of the water. The shoulders of the road was made out of white soil. As I look at this beauty spot I noticed there was not an

AARP To Sponsor Granbury Trip

By Lela Latch Lloyd

Members of Cisco and Eastland AARP will have first rights on the 35-seat capacity bus that will transport them to Granbury to see TEXAS MEG on August 29.

Anton White, Cisco AARP president, stated that after Wednesday at 1 p.m. on July 29, the reservations will be open to any person 65 or over until the 35 seat bus is filled. "Chairman of the trip, Lela Lloyd and Rose Knowlden will be at the Laguna Hotel Corral Room to take money for reservations from 11 a.m. to 1 p.m. After that time on July 29, non-member senior citizens may enroll for the trip," concluded Mr. White.

Cost for the matinee is \$3.00 for senior citizens and the bus fare will be \$2.00. Rev. Carl Begley will drive his church bus for the group at minimal cost of \$2.00 per person.

"Total cost of \$5.00 (ticket to opera and bus fare) must be paid at time of reservation next Wednesday, July 29. Each person will be responsible for his own lunch. We leave the Corral Room in Cisco at 9:00 a.m. and will stop at the bus station in Eastland for Eastland passengers around 9:30 a.m. We do not want to emphasize that the bus is not air conditioned but the seats are cushioned," concluded President White.

This will be the third or fourth year that Cisco has attended the Granbury opera. "We are grateful for reduced cost in ticket rates for the performance and bus ride," said Chairman Lloyd.

Vacancies Are On Health Care Planning Agency

There are several vacancies on the local board of the health care planning agency that meets at least quarterly in Abilene.

The Tri-Region Health Systems Agency is seeking interested individuals to serve on the Board of Directors for the term beginning September 24, 1981. The Tri-Region Health Systems Agency is a private, non-profit corporation empowered by federal and state law to perform comprehensive health planning and development activities for 44 Texas counties.

Board members will be charged with the responsibility of making decisions as to the planning and development of the health care services to be provided in this health service area. The members both consumers and providers of health care must be broadly representative of the entire population of the region by

Article Is Published In Fence Industry

By Vida Killion

Helen Wallace scores again with an article on recreational fencing published in the June issue for Fence Industry, making a total of three articles she has had published in that magazine. Another one, entitled "Fencing for Highways" will be published in the fall.

Mrs. Wallace, a freelance writer/photographer, has published ten articles in national magazines on many different subjects. She has served as the correspondent for the Abilene Reporter News for seven years, and published a column for Lake Country Star, a newspaper out of Graham.

Other article sales include two sold to *Grit*, two to *Flower and Garden*, one to *Law Reserve*, and one to *Accent*.

Helen is presently working on additional fence articles, a feature article on Dash Crofts, and an article about "bee hunting," featuring Rudolph Schaefer.

Mrs. Wallace is married to Norman Wallace, president of Cisco Junior College, and they have two sons, Kyle and Kory. Mrs. Wallace may be spotted at the Robo Carwash, that the Wallaces purchased in February, typing on one of her future articles.

Texas Office of Traffic Safety

social, economic, linguistic, and racial status. Interested persons should contact the agency to request a nomination form. All nominations received will be reviewed by the board level Committee on Selections.

New members will be selected by Tri-Region Health Systems Agency's Subarea Advisory Councils. For further information please write: Tri-Region HSA, 2642 Post Oak Rd, Abilene, Texas 79605 or phone (915) 698-0481.

THE REST OF THE GOSPEL

We all know the story about the repentant thief on the cross and how in Luke 23:43 Lord Jesus promised to take him to paradise that very day; which most people assume meant heaven. Yet, in John 20:17, on the third day, Jesus tells Mary not to touch Him for He had not yet gone to His Father in heaven. Then where did He take the thief on the first day? It wasn't heaven because He hadn't gone to heaven even by the third day. Where is this paradise that Jesus went to the three days He lay in the tomb? Why is it important to know where and why He went there? To find out the answer to this part of the gospel, write me for a personal reply at-The Rest of the Gospel, P.O. Box 763, Cisco, Texas 76437. p-61

WORD of GOD

2nd Commandment
Thou shall not make unto thee any graven image, or any likeness of anything that is in

heaven above, or that is in the earth beneath, or that is in the water under the earth.

Thou shall not bow down thyself to them, nor serve them: for I the Lord thy God am a jealous God, visiting the iniquity of the fa-

thers upon the children unto the third and fourth generation of them that hate me. And showing mercy unto thousands of them that love me, and keep my commandments.

Exodus 20 4-6

CHURCH SERVICES

Sunday, July 26, 1981

FIRST UNITED METHODIST CHURCH
Sunday School begins at 9:45 a.m. and morning worship at 10:50.

Lights from the Christian World

By: Josephine Cleveland

"The effectual fervent prayer of a righteous man availeth much."—James 5:16

The famous missionary, Hudson Taylor was traveling on a sailing vessel to China. It was necessary for the captain to route the ship close to an island inhabited by cannibals. Suddenly the wind died down. The boat began to drift slowly toward a nearby beach.

Curious cannibals gathered, eagerly anticipating a feast when the boat became stranded.

The captain said to Mr. Taylor, "Please pray. We are in a perilous situation."

Hudson Taylor replied, "I will, captain, provided you set your sails to catch the breeze."

"What!" exclaimed the captain. "I would become the laughing stock of my crew if I unfurled the canvas in a dead calm."

"Captain, I will not intercede in prayer for the vessel unless you prepare

the sails." Reluctantly, the old sailor yielded to the missionary's wishes. Later, while Mr. Taylor was in prayer there was a knock on his cabin door.

"Who is there?" he called. The captain's voice responded, "Are you still praying for wind?"

"Yes!" the man of god replied.

"Well, you'd better stop for we have more wind now than we can manage."

Hudson Taylor's fervent prayer brought down God's power.

The cannibals who were less than a few hundred yards from the ship were cheated out of their human prey.

Beloved, God honors those who honor Him. When He sees your unwavering faith and trust, He will act!

Roof Garden Dinner Theater Shows Comedy

The Roof Garden Dinner Theater in Cisco will present Neil Simon's hit comedy, "Come Blow Your Horn," as its final show of the season.

The play relates the richly comic complications of businessman Harry Baker's two sons. One is a 33-year-old playboy; and the other is the obedient 21-year-old, who finally decides to rebel and assert himself by moving in to brother Alan's apartment.

The two brothers are continually trying their father's easily abused patience. The humor of the situations that develop is in the true Simon style. It is inventive and arises out of character rather than mere gags.

Attendance at the Roof Garden has grown steadily through the summer. The second week of "On Golden Pond" played to sold out houses, and the people actually had to be turned away the last two performances.

The Roof Garden, once the ballroom of the Laguna hotel in its heyday, is located on the top (eighth) floor of the building, which is reached by a nostalgic ride on an antique elevator. The facility was completely refurbished and air-conditioned two years ago, and it is one of the

best equipped little theaters in the area.

"Come Blow Your Horn" opens Thursday, August 6 and continues through Saturday, August 8, for its first run, with a matinee performance on the 8th. The second run is August 13 through 15, with no matinee planned. Tickets for the dinner and show are \$11, and dinner is served at 7 p.m. nightly. The Saturday matinee is at 1:30 p.m. at a price of \$4.50 for show and refreshments.

Reservations may be obtained by calling (817) 442-2567 during business hours, or 442-2589 after hours and on Saturdays.

WORD OF GOD

New Testament

Then was Jesus led up of the Spirit into the wilderness to be tempted of the devil.

And when he had fasted forty days and forty nights, he was afterward ahungred.

Matthew 4:1-2

Bureau Shows Middleaged Poverty Rates

Middle-aged Americans have below-average family poverty rates, don't move much, and vote more than other age groups, according to a report issued today by the Commerce Department's Bureau of the Census.

The nation's 44 million people aged 45 to 64 also are generally earning their peak career incomes, at least for the men, and have low unemployment rates.

"Although middle age is defined in this report as age

45 to 64," the study says, "this stage in the life cycle may be defined more appropriately by the major life events taking place during the period than by chronological age: children leaving home, the peak years of economic well-being, grandparenthood, retirement, onset of chronic illness, widowhood, and the care of infirm parents."

Drawing from previously published statistics by the bureau and other federal agencies, the census report

Science Coming To Rescue Of Troubled Alaskan Reindeer

Our reindeer are in trouble, partly because of a bacterial disease called brucellosis, and scientists believe a vaccine now being developed will help save the animal.

Half a century ago, Alaska counted 640,000 reindeer, and today, they number fewer than 25,000, said veterinarian Robert Dieterich. He is one of the scientists who are working to protect reindeer in studies here at the University of Alaska. The Cooperative State Research Service of the U.S. Department of Agriculture is funding the research.

Reindeer are not just for Christmas. Like cattle, they are a commercial crop.

Better known for attacking cattle and hogs, brucellosis is just one reason for the decline of the reindeer, said Dieterich. Overharvesting of herds, severe weather and animals that prey on reindeer also take their tolls.

"Brucellosis is a serious threat for the herders who are trying to rebuild the reindeer industry," said Dieterich.

When the bacterial disease hits herds on the Alaskan tundra, he said, adult reindeer are weakened. Some die. The life spans of others are shortened, and the losses to abortions climb dramatically.

Dieterich said an effective vaccine would be a boon to reindeer and other wildlife in ways other than bringing a damaging disease under control. With better health, the animals will have the vigor to live longer and reproduce more because they won't be left defenseless against their natural enemies and the harsh climate.

Scientists are patterning the new control for brucellosis after the one now used for cattle. Success, said Dieterich, would cut reindeer deaths the same way vaccination reduces cattle and hog losses.

Reindeer first came to Alaska from Siberia aboard the Coast Guard cutter "Bear," setting foot on the Seward Peninsula in 1891. In the next nine years, 1,280 more reindeer followed.

Herds prospered. By the 1930's, Alaska's reindeer population reached well over half a million.

Clifford Weyiouanna, a herder on the small island of Shismaref along the Seward Peninsula, said Alaskans are worried about the threat to the remaining reindeer. He is president of the Reindeer Herders Association, a group of herders who live on or near the peninsula.

"Our top priority," said Weyiouanna, "is to eliminate brucellosis. Reindeer herding is the only vital industry we have here."

Weyiouanna reminded that Alaskans depend on the reindeer for food, and they use the hides for clothing and shelter. Antlers—newly developed in June and July—are sold in Taiwan, Hong Kong and Korea for more than \$40 per pound for use in oriental medicines.

Dieterich said other wildlife attacked by brucellosis, including caribou and its predators, can benefit from the vaccine.

Problem: Once the vaccine is developed, treating the thousands of reindeer roaming millions of acres of Alaskan tundra will be a formidable task, and a means of administering the vaccine in the wilds will be needed.

"One way to do this," said Dieterich, "is to use air rifles to fire implant pellets and use a dye to stain the animal's hides. That way we'll know which animals have been treated."

NARFE Meeting

July 28th

The NARFE monthly meeting is to be held Tuesday, July 28th at 5:00 p.m.

The meeting will be held at the E.L. Foster Lakeside Home. Bring a covered dish.

To locate the E.L. Foster home, take the first graveled road south of Lake Leon Dam, then take the right turn road at the fork. Stay on main road to the water.

For those who wish to follow a guide, meet the guide at the Best Western Motel in Eastland at 1-20, at 4:30 p.m.

Eastland Fair

Association Meet

The Eastland County Fair Association will meet this coming Monday evening, July 27th at 7:30 p.m. in the Eastland National Bank Community Room.

All persons interested in assisting and supporting the County Fair this fall are urged to attend this meeting.

NEED A METAL BUILDING?

Free estimates, call (817) 442-1912 or (817) 643-4289

says:

• Among 45-to-64 year olds, the unemployment rate averaged about 3 percent in 1979.

• Incomes of middle-aged persons are at or near their peak, especially for men, since most workers have risen in their occupations as far as they are likely to go. Women in this age category in 1978 earned only 56 percent of men's income.

• Sixty-nine percent of middle-aged voters turned out in November 1980 compared with 59 percent for the population as a whole.

• Of families maintained by a persons 45 to 64, only 6 percent were below the poverty level in 1978 compared with 9 percent for all families.

• In 1977, the most recent year for which data are available, men at age 45 could expect to live another 29 years to age 74 while women could expect to live 35 additional years to age 80.

• Middle-aged persons are less likely to move than younger persons. Only 23 percent of people 45 to 64 moved between 1975 and 1979 compared with 65 percent for persons 25 to 34 years old.

• Nine out of 10 middle-aged people live in families; the vast majority live with their spouses.

• There were 44 million people in the U.S. 45 to 64 years old in 1979 or about 20 percent of the total population. By the year 2010, it is projected that almost 75 million people will be in this age group, about 25 percent of the total.

The report gives measures of the following social and economic characteristics for the middle-aged population: family and marital status, fertility, mobility, residence, educational attainment, voting, labor force participation, occupation and industry, income and earnings, poverty status, health, and crime victimization.

Preparation of the report was supported by part by the National Institute on Aging of the National Institutes of Health.

Homemaker's Tips

by Janet Thomas

Don't ruin your summer vacation by losing or having your credit cards stolen while on your trip.

Millions of credit cards are lost or stolen each year with millions of dollars of unauthorized purchases made on these cards.

Consumers are partially protected against financial losses when credit cards are stolen or lost. The federal Truth-in-Lending Act provides that the maximum liability of a credit card holder is \$50 for unauthorized charges made on a credit card.

However, many consumers carry a number of

credit cards and if, for example, they lose 10 cards, they are liable for \$500. To avoid problems and financial burdens of credit card losses, follow these tips:

1. Cut up and throw away all cards not needed or used regularly.
2. Maintain a safe place where a list is placed of all credit cards and numbers.
3. Keep a list of the toll-free numbers to contact if cards are lost. Most companies that provide credit cards will provide a postage-paid postcard to send in the event that the credit card is lost or stolen. Keep this in a safe place because it usually shows the credit card number as well as a toll-free number to call.
4. Notify the issuer of a lost card immediately.

5. Upon receiving a new card, sign it immediately.
6. Never loan a credit card to anyone who hasn't been authorized to use it by the issuer - this is a violation of contract.

To recognize the possible signs of credit card theft, check the monthly bill closely. If an expected monthly bill doesn't arrive, someone may have stolen the card and sent in an address change.

RECIPE FOR THE WEEK

When all the vegetables in your garden seem to ripen at once and you've run out of recipe ideas, you might like to try this one:

ZUCCHINI SKILLET MEDLEY

- 1/4 cup cooking oil
- 1/2 cup sliced onion
- 1 lb. unpared zucchini, sliced 1/4" thick
- 1/2 cup green pepper strips
- 1 8-ounce can tomato sauce
- 1/4 teaspoon pepper
- 3/4 cup sliced celery
- 1 clove garlic, minced
- 2 tomatoes, cut into eights
- 1/2 cup shredded, pared carrot
- 2 teaspoons prepared yellow mustard
- 3/4 teaspoon salt

Heat oil in 12 inch skillet over medium heat. Add celery, onion and garlic, saute until tender. Add zucchini, tomatoes, green pepper and carrot, saute 10 minutes. Stir in remaining ingredients. Reduce heat and simmer 5 minutes, or until vegetables are tender, stirring occasionally. Serve hot or cold. Makes 6 servings.

Abilene Area Eligible For SSI Payments

There are probably many people living in the Abilene area who may be eligible for supplemental security income (SSI) payments who do not think so because they believe the small income they have makes them ineligible, Glyn Hammons, social security district manager in Abilene, said recently.

People can be eligible for SSI even though they receive a small social security check or some other small pension or annuity, Hammons said.

SSI payments can be made to people 65 or older, or blind, or disabled who do not have much income and do not own much personal or other property.

Starting this month the maximum Federal SSI payment is \$264.70 for an individual and \$397 for an eligible couple. The amount actually payable may be less if the person has other income, Hammons said. This is because after the first \$20 of unearned income a month, the remainder reduces the SSI payment dollar for dollar.

A person can also have earnings from work and still get some SSI payment. The first \$65 of earned income in a month does not count at all and only half the amount

above \$65 counts. There is a limit on the amount of property a person can own, but not all property counts. A home a person lives in does not count, nor do personal effects, household goods, or a car in most cases.

People who know of someone who may be eligible for SSI should encourage him or her to contact the Abilene social security office for more information about the possibility of applying. The people there will be glad to answer any questions. The office is located at 142 S. Pioneer and the special SSI telephone number is 695-1240.

Family Night At Adult Leaders

The Eastland County Adult Leader's Association will meet Thursday, July 30 at 8:00 at Eastland Park Hill. All 4-H parents are invited to attend and bring their families. Each family attending is asked to bring either a cake or freezer of ice cream.

Special guests who will be attending are Hagi Ahmed and Abdullahi Ibrahim from Somali. Ahmed and Ibrahim are agriculturists in Somali and are here to gain knowledge that will help them improve food production in their country. Somali is located on the east coast of Africa. Another special guest who will be attending this meeting is Japanese exchange student, Tosuke Ikeda. Yosuke is staying with the R.C. Harrington family in Gorman and is part of the 4-H/LABO exchange group.

Business to be discussed includes nomination of a new slate of officers and upcoming 4-H events. Make plans now to attend this important meeting.

WORD of GOD

But thanks be to God, which giveth us the victory through our Lord Jesus Christ.

1 Corinthians 15:57

Allsup's convenience Stores Participants For Jerry's Kids

Allsup's Convenience Stores, Inc., participants in the Jerry Lewis Muscular Dystrophy Telethon, will conduct pre-telethon activities during the month of August, according to Kurt Verlei, Director of Public Relations. The Company will display collection canisters in all 207 Allsup's Convenience Stores throughout New Mexico, Texas, and Oklahoma. "This is a very important part of fund raising prior to the telethon," said Verlei. "The Association receives no tax supported grants nor does it

seek or receive fees from patients or their families." Verlei added, "Their programs are funded almost entirely by private contributors and corporations and, of course, through the Labor Day Telethon."

The Muscular Dystrophy Association is currently seeking causes and cures for 40 crippling neuromuscular related disorders. Free diagnostic services, therapeutic and rehabilitative follow-up care are provided by Muscular Dystrophy Association's 230 clinics at no cost to any in-

dividual suffering from one of the diseases covered by the Muscular Dystrophy Association.

Allsup's will also be conducting the Allsup's Doorbell Brigade. Area youngsters are encouraged, on August 29 and 30, 1981, to visit their local Allsup's store and pick up a collection packet. After collecting donations for Jerry's Kids and returning them to the store, Allsup's will give them a free fountain drink of their choice. Verlei said, "We thank our customers in advance for their generosity and look forward to working with area youngsters in the fight against Muscular Dystrophy."

Eastland County Extension Club Sponsors Art and Crafts Fair

The Eastland County Extension Homemaker Club members will be sponsoring the concessions at the upcoming County Arts and Crafts Fair on July 31 and August 1.

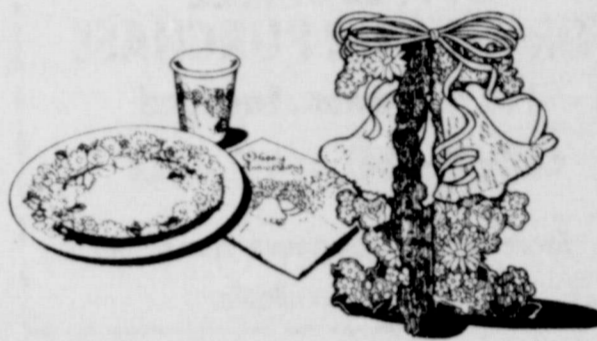

Area residents are invited to attend the Fair and to stop by the concession stand. Delicious homemade fried pies, brownies, jumbo chocolate chip cookies along with homemade sandwiches and nachos will be sold. Cold drinks will be available to

refresh you during the hot weather.

Clubs assisting in sponsoring the concessions are:
FRIDAY, JULY 31
10-2 p.m. Pleasant Hill
2-6 p.m. Morton Valley and Ranger
6-10 p.m. Kokomo
SATURDAY, AUGUST 1
10-2 p.m. Lake Cisco
2-6 p.m. Flatwood
6-10 p.m. Morton Valley and Ranger
See you at the Arts and Crafts Fair!

6 Ways To Stay Young And Healthy

Wish you could "stay young" in "health?" Practice six health steps, and you'll go a long way toward that goal, says Dr. Mary Ann Shirer, a health education specialist.

Six habits or practices can significantly influence your health and life expectancy - to the extent that a person who practices all six has the health of a person 30 years younger who ignores all of them, she says.

Shirer is on the home economics staff of the Texas Agricultural Extension Service, The Texas A&M University System.

Here are the six steps she recommends:

- 1) three regular meals a day with few snacks - make sure breakfast is one of the meals.
- 2) moderate exercise two or three times a week
- 3) not more than seven or eight hours of sleep every night
- 4) no smoking
- 5) maintaining moderate weight
- 6) little or no alcohol consumption

These are the findings of a study conducted by the California State Department of Health.

State Fair Of Texas, 17 Day Extravaganza

Texans who survive the dog-eared days of August, back to school shopping and the Cowboys' pre-season can expect a resurgence of good times down the road.

The State Fair of Texas, a 17-day extravaganza acknowledged to be the biggest in size and the broadest in scope of any annual exposition in the U.S., opens in Dallas on October 9.

"Going Places, Doing Things" is the 1981 theme, and approximately 3 million people will pass through the gates searching for new experiences in tandem with old fashioned fun. From the cattle barns to the theater lobby and back again via the circus tent and the new car displays, the State Fair offers an educational and entertainment program that challenges any visitor to see it all in one day.

A new production of an early American favorite, George M. Cohans "Little Johnny Jones", will be presented in 24 performances at the Music Hall, Oct.6-25. David Cassidy, a familiar name to tv and pop music audiences, stars in a sparkling show that features such tunes as "Yankee Doodle Boy" and "Give My Regards To Broadway."

Sports fans will want to plan for two big college football games in the Cotton Bowl, the tradition-filled match-up between Texas and Oklahoma on Oct.10, and a newer rivalry with local appeal that pits North Texas State against U.T. Arlington on Oct.24. Another sport that can boast of fierce action and hard-hitting is professional rodeo, and the best cowboys in the country will be at Fair Park, Oct.10-18, to compete for rating points and prize money.

Competition, always a cornerstone of the State Fair of Texas, can be applauded and appreciated in wide ranging activities on a daily basis. Blue ribbons, trophies, cash awards and other valuable prizes will spur thousands of entries in livestock events, horse shows, creative arts contests, high school band competition and frisbee championships. The Pan American Livestock Expedition, Oct.9-18, will be highlighted by the prestigious World Congress of Santa Gertrudis Breeders, an international conclave which is being held in the U.S. for the first time.

Fairgoers will be able to find everything from Ronald Reagans favorite candies to Amercia's favorite cow, Elsie, in the mammoth exhibit buildings. The Fair provides an opportunity to compare shop all the 1982 car models, a chance to to sample new food items and an occasion to learn about life in other countries, all in a personal one-to-one atmosphere.

Free entertainment will be offered continuously. Outstanding country talents Barbara Fairchild and Fiddlin' Frenchie Burke will present multiple shows on outdoor stages, and visitors will enjoy a full schedule of circus performances, street dances, gospel sings, fireworks displays, high-wire acts, fashion shows and parades.

Midway rides and games, all kinds of food specialties, top quality museum exhibitions, multi-media shows and special guest appearances are part of the 1981 lineup that will continue to grow from now until the official ribbon cutting. Admission prices remain at \$3.00 for adults and \$1.00 for children under 12.

CJC Is Accepting LVN Applications

Cisco Junior College is now accepting applications for the August, 1981 Licensed Vocational Nursing program at the main campus in Cisco.

In accord with certification requirements, applicants must make application in advance and pass a pre-entrance physical and examination. Pre-testing will be arranged with each applicant.

The twelve month program will hold classes on the campus with clinical work in the E.L. Graham Memorial Hospital in Cisco and the Eastland Memorial Hospital in Eastland on a rotating basis.

Satisfactory completion of the program entitles the student to a certificate from the college, and qualifies him/her to take the State Board of Vocational Nurse

Examiner's examination.

A prospective student must be at least 17 years of age and must be in good physical and mental health. Students must be in high school graduate or have successfully taken the GED examination establishing high school equivalency. The GED examination is given on the CJC main campus in Cisco.

Employment opportunities for a Licensed Vocational Nurse are very good; the demand for LVN's in the area far surpasses the supply.

For full information, interested persons-male or female-may contact Vocational Dean, Gerald Bint or Program Instructor, Mrs. Veneta Mitchell in the Vocational-Technical Building on the campus or by telephoning (817) 442-2567.

Carbon Dioxide Build-Up Could Cause Climate Changes

Unless the world's population cuts down on its burning of coal, oil, and gas, the earth's climate may warm up enough to cause drastic changes across the globe, according to the current issue of International Wildlife magazine.

While scientists are not exactly sure what the effects of the warming trend will be, the impacts are potentially so sweeping that Gus Speth, former head of the Council on Environmental Quality, terms the problem as the "ultimate environmental dilemma."

"By the middle of the next century," the National Wildlife Federation's bimonthly publication reports, "our planet could be warmer than at any time during the last 100,000 years. If that happened, entire growing zones, deserts, grasslands, and forests could all shift. Melting ice in the polar regions could raise sea levels 15 feet."

What's causing this alarming rise in temperature? The culprit is an odorless, colorless gas called carbon dioxide. A vital ingredient in photosynthesis, it makes up less than .04 percent of the atmosphere. But since the start of the Industrial Revolution in the late 1700's, the amount of carbon dioxide in the air has increased by 15 to 25 percent.

Carbon dioxide is formed when fossil fuels are burned and stored-up carbon combines with oxygen in the air. Around half the carbon dioxide generated each day is absorbed by the oceans or perhaps by green living matter. The other half accumulates in the lower atmosphere.

Explains International Wildlife: "This virtually transparent layer of gas has little effect on the sunlight which passes through it to warm the earth. But infrared heat radiated back into the atmosphere from the planet's surface has a longer wavelength. Some of it is trapped by the carbon dioxide in a process that has been called a 'greenhouse effect.'"

So far, the build-up of carbon dioxide in the atmosphere hasn't had much effect on the climate. William Kellogg, a senior climatologist at the U.S. National Center for Atmospheric Research told International Wildlife, "The increase theoretically has been something on the order of one degree Fahrenheit. When it gets near two degrees, then it'll dominate over the natural process."

That's what scientists fear. If we continue to consume fossil fuels at the present rate, the carbon dioxide build-up could cause an average temperature increase from three to as many as eight degrees Fahrenheit. What would that mean? Researchers have made a number of predictions - some good, some bad:

•Increased precipitation and evaporation might result. Decreased rainfall might occur over northern China, the USSR, and the

U.S. Midwest, with increases in Europe and Africa.

•As climate zones change, so would food-growing patterns. Northern Hemisphere farming areas might extend north, with losses for some crops such as corn and wheat, and gains for others, such as rice.

•Insect pests, which already destroy more than 35 percent of the world's crops, would likely multiply in a warmer global climate. Crop diseases could also become more of a threat.

•While most wildlife would migrate with the climate, some species that live in specialized habitats might become extinct.

•Changes in ocean circulation and temperatures could hurt fisheries by disrupting the "upwelling" process which brings nutrients up from the depths.

•The west Antarctic ice sheet could eventually melt. As a result, coastal areas throughout the world would be inundated. One study estimates that 11 million Americans would be uprooted, including more than 40 percent of Florida's population.

While these predictions are hypothetical, many scientists warn that we should plan now. "One route would be to slow down the accumulation of carbon dioxide in the atmosphere," suggests International Wildlife, "by reducing the consumption of fossil fuels - through energy conservation, greater energy efficiency, and a shift to nonfossil energy sources. Such policies, however, would have to be global."

Another way of attacking the problem is to prepare for a warmer world by developing drought-resistant crops and new strains that would stand up to higher temperatures and utilize saltier water; by improving irrigation and water management techniques; and by requiring global food reserves and plans for massive disaster relief.

According to Lester Machta, a climatologist with the National Oceanic and Atmospheric Administration, we have another 10 to 15 years before we must start planning. "The uncertainties are too large to say that some kind of positive actions have to be taken right now," he told International Wildlife.

But other scientists feel those uncertainties should force us to move right away.

As David Burns of the American Association for the Advancement of Science puts it, "We are taking the thin film of air and water upon which life on earth depends and messing around with it in an absolutely fundamental way - without really knowing the consequences of what we're doing."

GUATEMALA CITY, C.A.—You wouldn't believe the prices of US-made grocery (and other) items in the stores of Guatemala. Visiting a super market the other day, we looked at some prices. A Sara Lee frozen cake that you'd pay maybe \$2 for in US super markets is around \$8 here. A can of Campbell's soup that you'd pay 40 cents for is about \$2.40.

A jar of US freeze dry peanuts costs about \$5.50 here. They have just about everything you'd want in the super markets. A number of US food companies have plants here, including Kellogg, Foremost Milk, and others. Meats are pretty good and fairly reasonable.

GOING TO THE theater to see US made movies is interesting. Went to see Jane Fonda, Dolly Parton and others in "The Secretaries" the other day. The admission charge was \$2. The sound is in English and they have Spanish lines across the bottom of the picture.

The theater doesn't run the sound quite loud enough for you to hear it over the talking of local folks. They carry on conversations while watching the movie and seeing the Spanish dialogue. The theater was full. The picture wasn't anything to write home about.

They have popcorn machines that do a good business at the movie houses.

MET UP WITH the manufacturer of plywood here the other day. We were talking at the hotel and he invited us to join him at the bar for a drink. We accepted his invitation. What would we drink, he inquired.

"Same as you . . . you order for both of us," we told him.

So we drank Fanta orange soda pops. And they were good.

CHATTED WITH a lady who has two children, ages six and eight, and she told us about "taking them off television." It started when their TV broke down. And they couldn't get a repair man for a week or two. During the time, the lady started the girls on reading and games.

It has now been two mon-

ths and they never ask when the TV will be fixed and ready to go, we were told. And the children are enjoying reading and games. Does that give you any ideas?

THE ACTIONS of Tennis Player John McEnroe in England recently reminded us of the Ugly American stories. Folks here shook their heads and laughed when asked about their feelings for Mr. McEnroe.

A TOUR OF Guatemala City the other day was highlighted by visiting a park where they have a relief map of the country. It covers an area about 200 feet square and is made on concrete. It is pretty true in detail, showing mountains and rivers and roads and volcanoes and the like.

We were surprised to learn that the map was built in 1905 by a Guatemalan Army officer and a small group of men. They have it fenced and keep it painted and in a good state of repair. A tower enables you to climb high enough for a good look and to make a picture.

The park includes a permanent carnival, several baseball diamonds for youngsters, soccer fields, and an assortment of eating places and concessions.

THE ABSENCE of tourists, particularly from the United States, is hurting the hotels, restaurants and assorted shops of Guatemala City. Probably the main reason folks are staying away is the occasional news reports about shootings and unrest in the country.

There have been two or three incidents since we arrived. There was a shooting when police discovered a hideout for rebels. After the smoke cleared away, 12 people were dead and police found 50 or so home-made bombs (with Russian ingredients), hand grenades, machine guns and the like.

A similar place was found next day and another 15 or so people were shot in the incident.

Security is extra tight at the airport, around government buildings, banks, hotels and the like. Things seem real normal, however, when you go out on the town.

Mrs. JWS, who arrived here July 6th, is enjoying the

NOTICE OF MEETING OF THE GOVERNING BODY OF CITY OF CISCO

Notice is hereby given that a regular meeting of the governing body of the City of Cisco will be held on the 28th day of July, 1981, at 7:00 p.m. in the Council Chambers at which time the following subjects will be discussed, to wit:

- Call to Order
- Invocation
- Minutes:
- Item I: Regular Meeting of July 14, 1981.
- Item II: Special Called Meeting of July 23, 1981.
- Reports:
- Item I: Monthly Bills for June, 1981.
- Item II: Financial Report for June, 1981.
- Item III: Acting City Manager's Report.
- New Business:
- Item I: Opening of Bids on Oil and Gas Leases.
- Item II: Appointment of Committee to Research Ways of Re-Opening Old City Park.
- Item III: Request of H. Chief Brown on Proposed Subdivision.
- Item IV: Discussion of Emergency Hospital Unit.
- Item V: Council action to set tax rate for 1981 city taxes.
- Citizen-Council Discussion.

I, the undersigned authority, do hereby certify that the above Notice of Meeting of the governing body of the City of Cisco is a true and correct copy of said Notice and that I posted said Notice on the bulletin board in the City Hall of Cisco, and said Notice was posted on July 24, 1981, at 10 a.m. and remained so posted continuously for at least three days immediately preceding the date of said meeting.

Dated this, the 24th day of July, 1981.

City of Cisco

City Secretary

Sunday, July 26, 1981

cool weather, swimming, sight-seeing, eating out, helping with charity projects at the Union Church and the like. But she doesn't think she would want to move here on a permanent basis.

Public Notice

NOTICE TO BIDDERS
Sealed proposals will be received by Cisco Independent School District, Cisco, Texas, at the Superintendent's Office, P.O. Box 1645, Cisco, Texas 76437, until 4:00 p.m., August 24, 1981. Said bids will be publicly opened and considered thereafter at the School Tax Office, 610 Avenue D, Cisco, at 7:30 p.m., for the construction of an all-weather athletic track.

Bidders are urged to visit the site for a firsthand examination of the facilities. Specifications for the above construction may be obtained from the Office of the Superintendent.

No bid will be considered unless it is submitted upon the form of proposal furnished by the school. The forms may be obtained from the Office of the Superintendent. The school district reserves the right to reject any or all bids and waive informalities or minor irregularities in the bids. p-60

Oil Belt REAL ESTATE AND OIL SECTION

Consider Investment Objectives

Are you thinking about investing in real estate? If so, you need to give serious thought to the benefits you expect to receive from the venture.

Some people acquire older rental property because they need a cash income each month to help supple-

ment their other income sources.

Others buy a motel or farm because it is a source of employment for their family members. Still other investors buy unimproved land because of its appreciation potential as a hedge against inflation.

People with substantial incomes from other sources may be most interested in properties which have tax shelter advantages, such as office buildings or apartment complexes. Since each individual has unique investment cir-

cumstances and needs, considerable thought should be given to selecting the appropriate type of real estate for acquisition.

ENERGY SAVING WAYS

With DISHWASHERS

In this age of energy conservation, energy options are an important consideration when buying an appliance. According to home economists from Whirlpool Corporation, newer dishwashers do the tough job of washing dishes, pots, pans and casseroles clean at quite a low cost. In fact, those accustomed to washing and

rinsing dishes under a flowing stream of water may be surprised to find that more hot water, and therefore more energy, may be used in handwashing than by operating many dishwashers on the market.

The estimated average usage for a dishwasher is eight loads per week.

Newer machines also offer an energy-saving Air Dry option. By using this option instead of heated drying whenever possible, energy consumption can be reduced substantially. For older models without this option, the homemaker can simply turn the dishwasher off after the wash/rinse cycle is over and open the dishwasher door to let dishes air dry.

Real Versus Personal Property

If you are buying or selling a home, be certain you understand the difference between real and personal property.

Real property includes the land and everything affixed to it—buildings, plants, fences and so forth. Inside the home, permanent fixtures such as lights, built-in kitchen appliances and the hot water heater are considered real property. Personal property includes all other items.

But sometimes the definitions are not so clear cut. For instance, curtains are sometimes considered personal property but can be included in the sale of real property. Any items of personal property you want to include or exclude from the sale can be written into the contract.

Before selling your home, have a clear agreement with the purchaser about any items which might cause confusion.

EASY-TO-CARE-FOR PLANTS CAN IMPROVE A HOME

Every home can always take some improvements—but not every homeowner has the money to make them these days. Yet, there is a way to improve the appearance of your home or apartment that doesn't cost much ... and adds color, grace and pleasure to any room. Plants.

Take advantage of them to cleverly hide a cracking wall, fill in a gloomy, empty corner or "curtain" a bare window. Whether they are tall, elegant palms, succulents or hearty trailing vines, plants blend well with any decor. And, by following just a few basic rules, you'll find that taking care of them is easy, fun—and most rewarding.

Feeding, for example, once considered a dreaded, complicated chore, is now really a simple matter. According to new research conducted by Dr. H. W. Scheld at the University of Houston, unflavored gelatine is an excellent source of organic nitrogen which is what plants need to make them greener, healthier and fuller. Yes ... that familiar household product, unflavored gelatine, now has a new use ... as a good source of nourishment for your household plants.

Plants get their other essential nutrients from the commercially-prepared potting soils in which they grow ... or which you use when you repot them into larger containers. The nitrogen that they may be missing can now easily be supplied by dissolving one envelope of Knox Unflavored Gelatine in one cup of hot tap water, then adding three cups of cold water to make

Plants can enrich the appearance of any room. To keep them fuller and greener, feed them with an unflavored gelatine and water mixture about once a month as part of your normal watering/feeding pattern.

To help your houseplants grow, remember that they need to be periodically repotted into larger pots. Regulate ... monthly use of unflavored gelatine, combined with proper lighting and watering, will help assure that your modest investment in household plants more than pays off in making your home more attractive, inviting ... and fun to be in.

Texas Homes Getting Smaller

If you have been in the homebuying market several years, you may have noticed houses are getting smaller.

The average size of a Texas home built in 1978 was 1,600 square feet. This compares to almost 1,700 square feet in 1974. As building costs and utility expenses rise and the average household size continues to decline, the size of houses will likely decline further.

This reduction, however, may not mean less space for each person in the household. In 1976, there were almost three persons per Texas household. In 1990, this will decline to about 2.5 persons. What this means is that the size of houses could decline even further—say to 1,400 square feet—without decreasing the average space per person in the year 1990.

1 1/8% Interest (Conventional Only)

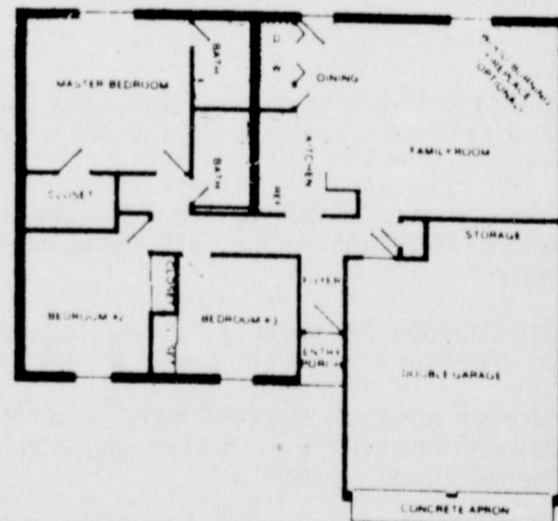

This Could Be Your Best Chance To Own A Colony Home

Because of today's high interest rates, it is becoming harder and harder to qualify for a home loan. Colony Homes has reserved for you a special interest rate of 1 1/8% for conventional home loans.

Most of the fine Answer Homes in Colony Square fall within the price guidelines. What a terrific opportunity to have your own home!

Our sales representative will be more than happy to discuss this special mortgage plan with you. In addition, we offer other financing plans such as: the \$1.00 move-in for veterans, section 245 graduated mortgage plans, and FHA financing.

Our Sales office is open from 11 o'clock until dusk every day. Come see if you can qualify and really give your living a lift!

Kitchen Can Be Sewingroom

Ever yearn for the good old days when every home had its own sewing room? Just not practical in today's houses with construction costs limiting "extras."

However, that doesn't mean you should give up having your own special sewing nook. How about a corner of the kitchen as illustrated here?

This cozy sewing

area, which even includes Grandma's sewing machine, still going strong, is versatile and allows you to keep an eye on simmering pots or active toddlers while you're cutting and pinning.

The floor, in a rich terra cotta shade, forms a warm basis for the entire room's dcor.

Matching paint is repeated on the walls and cabinets and in-

serts of the flooring material onto the cabinet door fronts add a special custom touch.

The KESWICK pattern of this Mannington floor is bold and contemporary and includes such features as the JT88 never-wax wear layer for easy maintenance (leaving more time for sewing) and a soft cushioning for comfort underfoot. Another useful

feature is its exclusive Aquabar moisture barrier coat which helps prevent moisture-related problems.

An attractive addition to the decor is the large basket holding extra bolts and cuts of fabric. The framed bulletin board keeps

sketches and sewing information in view.

For free decorating booklets on never-wax flooring, write Mannington Mills, P.O. Box 30, Salem, NJ 08079.

Mortgage Into Cash

If you have financed or are considering financing the sale of your home, then you may be interested in a new financial program which allows you to turn that mortgage into cash.

In the current high-interest-rate market, many home sellers are willing to provide financing on the home they sell by lending on a mortgage. The Federal National Mor-

tgage Association--commonly called Fannie Mae-- has a new program whereby it will purchase first mortgages from persons who sold and financed their own homes. To qualify, a loan must have been made on Fannie Mae standard documents, meet Fannie Mae credit and appraisal standards and be serviced by an approved lender.

The cash amount, however, received from Fannie Mae is likely to be less than the face amount of the mortgage. For details, check with a lender approved by the Federal National Mortgage Association.

OILFIELD DISPATCH

Eastland County Oil News Report

Wilbrook Exploration, Inc., Stephenville, No. 3 Hodges has been staked as a wildcat test in Eastland County.

Four and one-half miles southeast of Ranger, drillsite for the 3,800-foot test is 900 feet from the north and 333 feet from west lines of E.L. RR Co. Survey.

Cook Production Co., Fort Worth, has staked a wildcat test in Eastland County.

No. 1 Emma Talley is two miles southeast of Carbon and spots 1,540 feet from the south and 330 feet from east lines of Section 21, Block 2, H&TC Survey. It will drill to 3,600 feet.

Wilbrook Exploration Inc., of Stephenville has staked a site in the Mangum, North (3200) field of Eastland County.

No. 1 Sneed is four miles east of Cisco and is scheduled for a 3,800 foot bottom. It spots 788 feet from north and

900 feet from east lines of section 26, Block 3, H&TC Survey.

Van Oil Corp. of Pasadena, Calif., has staked a wildcat test in Eastland County.

No. 1 K.W. Jameson is located seven miles south of Ranger and spots 2,173 feet from north and 1,533 feet from east lines of Lot 1, north 1/2 of Harvey Kendrick Survey, A-340. It will drill to 4,000 feet.

Tenco Drilling Co. of Farmington, N.M. has spotted a site for a wildcat test in Eastland County, two miles west of Carbon.

No. 2 Ray Lovell, scheduled for a 2,000 foot bottom, is 2,380 feet from north and 330 feet from west lines of Section 19, Block 2, H&TC Survey, A-180.

Mack Wallace For American Oil Production

AUSTIN--Texas Railroad Commissioner Mack Wallace today expressed shock at opposition from the oil industry and some states to increasing oil and gas exploration on federal lands.

"Year after year, industry has begged the government for greater access to federal lands for increased exploration and production," he said. "Now, instead of rejoicing over the expanded, accelerated federal leasing program, complaints have been voiced from both inside and outside the industry."

Recently, the U.S. Interior Department announced plans to open up one billion acres of offshore land to oil and gas exploration over the next five years.

Wallace made the statement to oil industry representatives gathered for the Commission's monthly statewide oil and gas proration hearing here.

The Commissioner challenged the industry to concentrate on domestic rather than foreign exploration, saying the industry's increasing ex-

ploration overseas, coupled with a lack of U.S. production incentives, apparently makes it more profitable to drill overseas than at home.

"I want to do whatever is necessary to insure that American-made drilling rigs are operating on American soil - it is in the national interest," he said.

Wallace cited the millions of dollars U.S. oil companies are spending this year exploring and developing oil resources in Indonesia, Angola, and China, and said, "I am much more interested in jobs for Americans than I am jobs for roughnecks in China or drillers in Angola."

NGP Plans Construction Of 50-Mile Pipeline

Northern Gas Products Company (NGP) will construct and operate a low pressure gathering system and a 50-mile pipeline in north central Texas, announced John Hon, regional manager for Houston region.

The system will gather and transport natural gas from wells in Eastland, Comanche and Erath counties to NGP's Lipan gas processing plant in Hood County, which is located 70 miles southwest of Fort Worth. Propane, ethane, iso and normal butane and natural gasoline will be extracted from the gas stream at the Lipan plant.

Construction of the line is scheduled to start in August with completion in November. The line will originate in southern Eastland County where the gathering system will be built. The first 16

"Why cannot the United States Presidents and the United States Congresses make it possible and equally attractive for companies to drill in America?" he asked, noting that only two percent of

America has ever been explored by a drill bit and only three percent of U.S. federal offshore lands has ever been offered for lease until now.

"Before this nation finance a worldwide exploration program, we should thoroughly inventory our own resources and set about developing a sufficient energy base that will guarantee our position of world leadership," the Commissioner stated.

Wallace told the oil industry representatives that the time has come to "fish or cut bait."

"The counter-productive windfall profits tax must be changed to provide

that above-normal profits be plowed 100 percent back into the domestic production of energy of all forms or be taxed at 100 percent," he said. "This has been the accepted Texas position."

He went on to say that "if the industry declares and proves that capital is insufficient to meet this massive and urgent exploration effort, then I am prepared to recommend that the President and the Congress take another look at the tax laws to provide the capital in the interest of our national security."

Wallace said the nation's energy priorities are still tangled. "To be sure, drilling has increased in this country," he said. "Our storage tanks, limited as they are - are full. However, we are still almost 40 percent dependent on unstable foreign sources for our daily crude oil needs."

"There is no glut of oil in America," Wallace said.

In closing, the Railroad Commission's senior member called for the country to stop erecting barriers to all-out production in America and to thrust the full weight of government and industry behind exploration and production at home.

miles of pipeline will be 16-inch diameter pipe designed to accommodate wells under 50 PSI. The remaining line will be 10-inch diameter pipe.

Larry Eledge, director of gas liquids acquisition, said producers along the final 34 miles of pipeline will be able to hook up to the line regardless of their well pressure.

When completed, the line will have the capacity to move up to 10 million cubic feet of gas per day.

Northern Gas Products Company produces ethane, propane, iso and normal butane and natural gasoline and fractionates mixtures of these liquids into commercially pure components.

Northern Gas Products is part of Northern Liquid Fuels Company, a division of InterNorth, Inc., a diversified energy corporation based in Omaha, Nebraska.

To Exhibit Technique For Getting Asphalt Like Oil Out Of Ground

Liquifying the equivalent of an asphalt road underground and bringing it to the surface through a small oil well hole is what the petroleum industry has to accomplish in adding "tar sands" to our energy production.

Equipment for doing this by melting the thick asphalt like oil, mainly with steam, will be on exhibit at the World Oil & Gas Show and Conference to be held in Dallas, Texas

December 14-17, 1981, says Martin C. Dwyer, General Manager.

"New technology for finding and producing more energy and getting a greater percentage of oil out of existing reserves will be seen by an estimated 30,000 oil men from every state in the union and an expected 50 nations of the world", Dwyer pointed out.

Railroad Commission Grants Thrity Permits For New Pipelines

AUSTIN—A total of 30 permits to operate new pipelines in Texas were granted by the Railroad Commission in June 1981, according to the RRC's Oil and Gas Division.

Eighteen of the permits were for gathering pipelines, four

were for gas plants, four were for trunk transmission lines, two were for feed stock lines, and one was for a distribution line. Another was for other purposes.

Gathering lines bring oil and gas from

production leases, while a trunk transmission line is a larger diameter line into which smaller lines connect. At gas plants, natural gas is stripped of the liquid hydrocarbons usually present in well-head gas. Feed stock is crude oil or other hydrocarbons that are basic materials for refining or manufacturing processes.

Twenty-six of the newly-permitted pipelines will transport gas, two will move petroleum products, and two will transport crude oil and conden-

sates. Private pipelines accounted for 28 permits last month, while two were for common carriers. A common carrier performs public work for hire, such as the movement of petroleum products.

In June, 12 permits were granted in Southeast Texas, four in deep South Texas, two each in East Texas, East Central Texas and the San Antonio, Refugio, and San Angelo areas, and one each in the Panhandle, West Central Texas, and the Lubbock and Midland areas.

Gathering lines approved:

JM Petroleum Corp., Dallas, crude/condensates, Wood County; Compressor Rental Services, Inc., Breckenridge, gas, Eastland County; Seagull Pipeline Corp., Houston, gas, Galveston County (two lines—one for gas, the other for crude and condensates); National Gathering System, Inc., Houston, County (two lines);

gas, Jasper County; Intrastate Pipeline Co., Inc., Houston, gas, Harris County; Prairie Producing Co., Houston, gas, Matagorda County; Southern Natural Gas Co., Monroe, La., gas, Roberts County; Ferguson Crossing Pipeline Co., San Antonio, gas, Brazos County; Huggs Inc., Shreveport, La., gas, Harrison County; Seagull Pipeline Corp., Houston, gas (two lines—one in Tom Green County, another in Orange County); Tejas Gas Corp., Corpus Christi, gas (three lines—in Montgomery, Aransas, and Duval Counties); Prairie Producing Co., Houston, gas, Matagorda County; Tenroc Corp., Needville, gas, Rannels County; T-Gas Pipeline Co., Houston, gas, Live Oak County.

Gas plant lines approved: J.L. Davis-Wilson County Plant, Midland, gas, Wilson County (two lines);

Mobil Producing Texas and New Mexico, Inc., Houston, gas, San Patricio County; Sid Richardson Carbon and Gasoline Co., Fort Worth, gas, King and Cottle Counties.

Trunk transmission lines approved:

Esperanza Transmission Co., Corpus Christi, gas, Van Zandt County; Adobe Gas Co., Midland, gas, Pecos County; Texas Crude, Inc., Houston, gas, Brooks County; Intrastate Gas Transmission, Inc., Houston, gas, Navarro County.

Feed stock lines approved:

United Brine Pipeline Corp., Houston, products, Refugio, San Patricio, and Victoria Counties; Texaco, Inc., Port Neches, products, Jefferson County.

Distribution lines approved:

Grangerland-Wigginsville Gas Corp., Conroe, gas, Montgomery County. Other lines approved:

Mobil Producing Texas and New Mexico, Inc., Houston, gas, Nueces County.
