Anti-nuke protesters pull out at Seabrook

SEABROOK, N.H. (AP) - Hundreds of anti-nuclear protesters, many proudly nursing wounds received in battles with police, withdrew this morning from the woods, marshes and highways ringing the Seabrook atomic power plant.

Demonstrators had said they might try to block the main gate when costruction workers returned this morning from their 3-day Columbus Day holiday weekend, but only a handful of protesters remained. They stood quietly in a chilling rain and watched the workers drive into the plant site.

Their four-day effort to occupy the partially completed plant was lost, but the activists called it a victory. They said the tear gas, Mace, fire hoses and clubs they faced "have taught us what it's all about and will strengthen the movement."

"The only reason the civil rights and anti-war efforts were successful was because people showed they had the guts to take the worst the opposition could throw at them and hold their ground," said one protester, Daniel Upton of Hartford, Conn.

'This weekend, for the first time, the anti-nuke movement faced that same challenge, and we showed that

Related photos, Page 2A

we too have guts," he said as he held up a bandaged arm he claimed was broken by a police club.

But New Hampshire Attorney General Thomas Rath said the protesters may have harmed their cause by shifting attention from the issue of nuclear power to the tactics both sides used to make their points.

He said there also were assaults on police officers, including one incident in which a trooper was held face down in a puddle of water.

Such incidents, he said, are "the whole reason I don't think a demonstration like this accomplishes a Seabrook has been the focus of antinuclear protests since construction began in the mid-1970s. Previous demonstrations have been largely

one or two, protesters this time repeatedly assaulted the miles of fence around the 140-acre construction site.

Hundreds of police from throughout New England, along with New Hampshire National Guardsmen, repelled the attacks, usually using minimal force and following the guideline: 'Take no prisoners.

Many demonstrators expressed surprise and anger when they were not arrested but instead forced back with riot gases and fire hoses.

"They have no right to hurt us for breaking the law," screamed Carla crowds.

Riggs of York, Maine, as medics poured water over her Mace-covered face. "The Constitution says we're to be arrested and tried for our crimes, not gassed and beaten.'

Rath said he thought police acted appropriately but would "look into" any formal complaints of brutality.

And one state trooper told protesters they had been lucky. "Nobody was killed," he said. "If you think this is violence, you should have seen what happened when we were fighting against the war.'

The violence did not diminish the

County residents seek road repairs

By BILL MODISETT Staff Writer

A delegation of five Midland County residents appeared at Monday's Midland County Commissioners meeting, submitting a petition for improvements on a county road described by . one man as nothing but a "drainage ditch."

Jim Estes, who served as spokesman for the delegation, presented the petition containing the names of 27 Midland County residents who live along County Road 1065 South about 16 miles east of Midland.

Estes told commissioners the road had been dedicated to the county five years ago, but it has never been covered with caliche. The three-milelong road consists primarily of sand and deep ruts, Estes indicated, and is impassable following a rain.

"It was better five years ago than it is right now - a lot better," Estes told commissioners.

cles to overcome."

Following the meeting, Estes said he didn't feel he received an answer to his request.

Another resident, Darwin Almand, said he also was dissatisfied with the answer. "They've been working on it (road) for five years and haven't done anything."

In other action, commissioners approved a contract with Western Data Service of Waxahachie for four computer terminals to be installed in the tax assessor-collector's office.

The four terminals, to be installed in November at a cost of about \$20,-000, will facilitate improved preparation of voter registration lists, property tax receipts and so forth, according to Commissioner Durward Wright.

In the past, the tax office has sent the materials to Waxahachie to be prepared and returned. With the addition of the terminals in the courthouse, the various functions of the tax office can be handled quicker and Another resident, Julia Eckerty, locally, Wright said. showed commissioners photographs

HOUSTON (AP) - A congressman, a federal official, and a New York City engineer agree that the American public is not aware of the dangers of a water crisis or of how many billions of dollars it would take to solve the problem

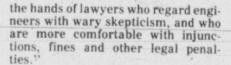

Rep. Ray Roberts, D-Texas, said at the 52nd convention of the Water Pollution Control Federation Monday that the United States is facing a water crisis, "that must be solved or the energy shortage will look like a tea party.

The congressman, chairman of the House subcommittee that handles all water-related legislation, said some sections of the nation will face water shortages in the future unless Congress can come up with a plan to move the fluid from areas of abundance to sections of shortage.

He said most Americans are not aware of this problem, nor do they understand how much money is needed for solutions.

"Federal funds are becoming tighter and we must make good use of every dollar we get. Traditional approaches to water problems no longer work and we must find new answers.

· Martin Lang, president of the 27,000-member federation, said the nation's quality mission "is largely in

"Lawyers may try to achieve water qualities with show-cause orders, but eventually the answers will be pro-

"expected" to support the president.

president, Bentsen replied: "Yes, I am."

previous statements, not a major switch.

the options become clear, I've made a decision.'

vided by engineering and scientific elected officials have been able to efforts.

Lang, a former New York City water engineer, also said, "The public has not been adequately informed about water pollution problems." Neither the federal Environmental Protection Agency, the news media nor

convey to the public the cost of water pollution control, he said.

He said the federation had always been concerned about the clean water act passed by Congress in 1972. "'It promised to provide fishable,

swimable waters virtually everywhere in one decade. It could not be done and we knew it.'

Adelene Harrison, a regional director for the EPA, told the conference that the public has not been convinced of the importance of water pollution control or proper sewage treatment. She said, "Three of every four mu-

nicipal treatment plants in the southwest region do not meet minimum requirements. No longer can we be content to simply make plans and pour concrete. We have simply failed to sell our program and this is a necessity.'

The EPA official said the federal government cannot handle the situation alone and "we must have public participation.

"We have been using our dollars wrongly an we must nderstand that each community has a different problem and a different need.

There are 12,000 delegates attending the five-day conference, where many technical aspects of water control are being discussed by experts from 50 states and several foriegn

Two more computer terminals may be installed at a later date, Wright added.

In other action, commissioners approved extending the lease of the American Legion Hall by the Summer, Mummers and paying the Permian **Basin Regional Planning Commission** \$1,000 for the county's participation in the Emergency Medical Systems Program.

The PBRPC is attempting to raise about \$35,000 from its 17-county area to sfund a coordinator's salary, according to County Judge Bill Ahders. The Emergency Medical Systems Program is a plan to provide emergency medical ambulance care for residents of the region.

Commissioners also renewed the annual ambulance service contract with the city of Midland at a cost of \$15,000 a year and signed the tax roll

Andrews man killed; Two injured in wreck

ANDREWS - An Andrews man was killed and two Odessa men seriously burned in a fiery collision of an 18-wheel tractor-trailer rig with a road grader near here Monday afternoon.

Hugh Lewis of Andrews died early this morning in Permian General Hospital in Andrews of burns received when a road grader he was driving was in collision with a southbound 18-wheel Frost Bakery truck being driven by two Odessa men.

Both vehicles burst into flames on impact.

Lewis had recieved third-degree burns over 100 percent of his body. Specialists from U.S. Army Institute Surgical Research Burn Unit 'at Brooke Army Medical Center in San Antonio were rushed to Andrews to transfer him, but could not stabilize his condition, a hospital spokesman said today.

Gary Sudbury and Rolando Garcia, both of Odessa, were transferred to the San Antonio burn center after being admitted initially to the intensive care unit of Permian General Hospital with first- and second-degree burns over 40 to 50 percent of their bodies.

Garcia was listed in critical condition and Sudbury was in serious condition at the San Antonio burn center this morning.

The accident occurred about a mile south of Andrews on Texas 385, as, Lewis was pulling out of a C&R Trucking Co. parking lot.

ODESSA - Two Ector County sheriff's deputies were fired following high-speed chase of their vehicle by Odessa City Police about 2:50 a: Saturday, Ector County Sheriff Elton Faught said Monday.

Deputy Vaughn Maddox, a one-year department veteran, and Depu Charles Armstead, who had been with the department only five days, we fired by Faught for what he termed "unforgiveable action on their part."

The incident occurred when police officers were investigating a traff accident on East 42nd Street, police said.

A westbound car passed the scene of the accident at an estimated spe of between 60 and 65 mph, investigating officer Mervin Hayner said.

Hayner turned on red lights and siren in his patrol car and chased vehicle for several blocks at speeds up to 80 mph, the officer said.

The car was lost when its lights were turned off and it turned into alley, the officer said.

Hayner found the car when he saw the dust from the car, which at th time had stopped, he said.

The patrolman said the deputies produced their driver licenses an badges from the Ector County Sheriff's Office.

Man wounds wife following shootout

VINTON, La. (AP) - A former. mental patient held his estranged wife and daughter at gunpoint for three hours, then shot and wounded his wife after he was wounded in a gunfire exchange with police, authorities said.

Eddie Dean Alford, 25, of Houston was listed in stable condition today after emergency surgery at Charity Hospital in New Orleans, hospital officials said.

He was arrested for attempted murder and aggravated assault, police said

His wife, Sandria Lassien, 21, apparently suffered only minor injuries, Police Chief Lionel Alamond said. Officials at West Calcasieu-Cameron Hospital said she had been moved to a hospital in Lake Charles, but officials at that city's three hospitals were unable to find any record she had been transferred there.

Alamond said the confrontation began around 11:30 a.m. Monday, after Alford forced his way into his wife's home and pulled a gun on her. Also taken hostage were his daughter Kimberley, 3, his wife's sister. Rochelle Lassien, 18, and his twoyear-old niece.

Rochelle Lassien fled the house and alerted police, Alamond said. When he arrived, he found Alford standing in the front window of the house and holding a pistol to his wife's head, Alamond said.

Alamond was joined by Calcasieu Parish sheriff's deputy Ron Perkins, who assisted with the negotiations while police and deputies sealed off the neighborhood.

One deputy, a sharpshooter, took up a position covering the house with a high-powered rifle, Alamond said.

"We negotiated with him for three hours and met all of his demands. We tried to get him to release his hostages

Alford released his niece and demanded that police contact his brother in Lafayette, his mother in Carencro, and a doctor who had treated him at the Acadiana Mental Health Clinic in Lafayette, Alamond said. Alford's mother called him, and a

staff member at the clinic who knew Alford spoke to him. But Alamond said Alford suddenly began shooting at police and the sharpshooter shot back, wounding

him in the neck and arm. Officers then rushed the house.

Official wants to stall bilingual education plan

SAN ANTONIO, Texas (AP) -Texas' top public school adminstrator says that responsibility for teaching bilingual education lies in the home and not in the classroom.

Texas Education Commissioner Alton Bowen proposed that the expansion of bilingual education be halted until there is proof the program is working.

'We should not expand bilingual education until we know that it's good," Bowen told members of the Texas Association of School Boards and the Texas Association of School Administrators at a joint meeting.

The state will spend about \$4.5 million this school year on bilingual education, a program where the basic learning skills are taught in Spanish to Mexican-American children.

He said the responsibility for maintaining a culture's language lies with the home and community and not the school

"Without proficiency is the dominant language of this country, joining the mainstream is impossible," he said

Citing conflicting studies on bilingual education, Bowen said, "The jury is still out.

Bowen, who stepped up as the

TEA's top man Sept. 1, said the State Board of Education should not compel bilingual education past the third grade until accurate data on its effects are available.

"For 200 years this country has been well served by the melting pot concept of one nation, one people, one common language," Bowen said. "Race and language are extremely important elements of any group's heritage and should be maintained. But the responsibility for such language and cultural maintenance is with the home, the family, the community and not with the school.'

With school days limited to seven hours, Bowen said, "we simply don't have time to be all things to all people. We cannot solve all of society's social problems."

Ruben Bonilla of Corpus Christi, national head of the League of United Latin American Citizens, said if Bowen cannot recognize the need for bilingual education in Texas schools, he should consider resigning.

'In the first place it is outlandish and the height of absurdity for one of our highest educational administrators to speak in obviously disparaging tones regarding our Spanish-speaking children.

How can a defenseless dog that's penned or tied keep from barking if someone mistruats him?

I would appreciate for someone smarter than that dog to answer this situation. - Sincerely, M.S.

Midland County man drowned

MARFA - A Midland County man, Joe A. "Mickey" Mullens, drowned Saturday in the Rio Grande River while on a fishing trip with three friends near Lajitas, according to Presidio County Sheriff Rick Thomp-

Mullens, 38, who lived in rural Midland County, and three fishing companions were staying in a house on a bluff a few feet from the water, Thompson said.

Three of the men had been visitedby other friends earlier Saturday. They noticed Mullens was missing about 6:30 p.m., and the sheriff's office was notified about 8:30 p.m.

Thompson said his deputies dragged the river Sunday and located the body about 12:30 p.m.

Mullens had moved to Midland in 1978, when he bought out Glynn Gibson and Associates Polygraph Co. in Odessa

The group, part of about 300 protesters still attempting to gain control of the cite, is from Maine. They had chained themselves to the fence before police began spraying Mace. (AP Laserphoto)

First session Thursday for Leadership Midland

Members of the 1979-80 class of Leadership Midland will meet Thursday for the first day-long session of nine planned over the next several months.

A coffee hour at Midland College beginning at 8:30 a.m. will open the session. After that comes a welcome to the Leadership Midland participants by Joe Kloesel, president of Midland Chamber of Commerce, and remarks from Reagan Legg, chairman of the program.

Helping participants with their understanding of the city will be Smith Ray, an attorney who will outline Midland's history

Grant Billingsley with the Economic Development Department of the chamber will look at the existing environment and the future for Midland

A panel-consisting of Legg, Parker Humes, Mike Bradford and Harriet Herd will review perspective of the program.

After lunch is a talk by Joan Baskin and Pat Baskin on "Your Growth as a Volunteer.

Harrell Feldt, Ted Kerr, Joann Foster and Paula Cahoon will lead a discussion on how the participants can work with boards and other agencies within the system.

Concluding the day's session will be Dr. Eugene Nini, chairman of the faculty of accountancy and information systems, who will talk on "Qualities of Effective Leadership."

Other sessions on the schedule in-

clude health care on Nov. 8; housing and poverty, Dec. 13: youth and education, Jan. 10; city and county government and the criminal justice-system, Feb. 14; culture and recreation, March 13; transportation, communication and design of the city, April 10; industry, agriculture, energy and the economy, May 8, and objectives for Midland, June 5.

An awards banquet will conclude the program year on June 10.

Leadership Midland is a project involving leadership development. It is sponsored by the Midland Chamber of Commerce and Midland College.

Things were sizzling in Midland on Monday, but it wasn't tempers. It was the thermometer.

For the second consecutive day, a new record high was set as the mercury topped 100 degrees. This broke the 45-year-old record of 93 degrees set in 1934. The weatherman said this marks the hottest it has been for so late into the fall season.

But autumn weather should be taking hold for a couple of days, giving some relief from the sultry summerlike days, according to the National Weather Service at Midland Regional Airport.

A cold front blew through Midland early today, dropping the thermometer to an overnight low of 56 degrees Low for tonight should plummet into the mid-40s, said the weatherman.

Record overnight low for this date s 36 degrees set in 1970.

High on Wednesday should be near 80

Winds should be gusty and 15-25 mph this evening, decreasing to 5-10 mph late tonight, the weatherman said.

Along with the cold front today came blowing dust throughout the Permian Basin, according to weather watchers in area towns.

Heating: Costs climb up chimney like smoke

By LOUISE COOK **Associated Press Writer**

More than half the money you spend to heat your home this winter may be wasted. And it doesn't have to be.

Your dollars leak through cracks around windows and doors. They flow from attics that don't have enough insulation. And they vanish, like smoke, up the chimney. Terms like thermogram, energy audit and payback period are becoming household words, as consumers faced with warnings of fuel bills that could be double last year's - try to find ways to cut costs by saving en-

ergy Utility spokesmen say anywhere from 10 percent to 60 percent of the heat produced to warm U.S. homes is wasted. That means that you may be throwing away from \$1 to \$6 of every \$10 you spend on heating.

The cure may be something as simple as setting back your thermostat at night - a move that can cut energy costs by 9 percent to 15 percent depending on where you live. Or it may require a major insulation effort - a project that can mean a savings of 50 percent to 60 percent for some homes.

. The Department of Energy estimates that 40 million single-family homes — a little less than two-thirds of the total - are not properly protected against the weather.

Government studies show that about one-fifth of the energy consumed in the nation is used in private homes: Almost three-fourths of that amount goes to provide heat and hot water:

Regulations being developed under the National Energy Act of 1978 will require large atilities to help you find out where you are wasting energy and suggest ways you can save. The utilities also will have to help you arrange to pay for and install energy-saving devices.

Some states already require this kind of effort by utilities; in other areas, companies have voluntary programs to encourage customers to add insulation, caulk and weather strip windows and doors, etc.

Paeific Gas & Electric Co. of California, for example, has offered energy audits to its three million residential customers since last November. By the middle of September, the company had completed 14,000 audits, according to spokesman Mike Willhoit. By the end of the year, it expects to finish an additional 6,000 audits.

Utility-sponsored conservation programs vary; some are free, others cost from \$3 to \$10. Some utilities send a trained inspector to the customer's house; others require the homeowner to do his or her own checking. In most cases, however, the end is the same: A computer analysis that tells you what you can do to cut energy use? how much it will cost, how much it will save and how long it will take you to save enough to cover the expense.

Willhoit said Pacific Gas & Electric's "energy conservation specialists" visit customers' homes, spending about an hour and a half or two hours, to check things like the amount of window space, the number of appliances, the exposure, the construction of the walls and frame, the amount of actual living area, the setting of the thermostat, the type and size of heating and cooling systems used and the amount of insulation.

The results are fed, via, telephone, into a central computer and, within minutes, a mini-printer gives the homeowner a set of conservation recommendations. If he or she decides to add attic insulation - one of the biggest energy savers and one of the things that is most often needed - the company will arrange for installation, would have a bias against utility in C financing and inspection. Loans for up to \$500 are avail-creases," Hightower said at a news able at an interest rate of 8 percent a year.

Willhoit said it is too early to tell how many people are following the advice of the auditors. "But we do know that Kirkland's claim to the presidency of million member federation this fall. Connally's presidential candidacy 15 percent to 20 percent will install insulation through our service program," he said.

ties in Iowa are using thermograms - infrared

escaping — to boost conservation. The Skyscan program run by the Iowa Utility Association began in the fall of 1977 and spokesman John Lewis said about 35 percent of the major communities in the state have been surveyed.

Once the thermogram for a city is finished, customers are invited to look at the prints, to see whether their houses are losing energy. "We have had excellent results," said Lewis. About 35 percent to 40 percent of the customers have viewed the thermograms and about one-fourth of those have done something to plug leaks.

Lewis said he doesn't know how much energy is being wasted in Iowa homes. "Almost any home you might pick, there is something that could be done in the way of insulation," he said, adding that "60 percent to 65

The cure to 'lost energy' may be something as simple as setting back your thermostat at night — a move that can cut energy. costs by 9 percent to 15 percent depending on where you live. Or it may require a major insulation effort ---- a project that can mean a savings of 50 percent to 60 percent for some homes.

percent need to do something substantial."

Jan Hickman of the Long Island Lighting Co. just outside New York City said the utility's energy audit program, started in June 1978, has been "quite successful." But the real response came this summer. "There's been quite a jump since the gas lines," Ms. Hickman said.

Long Island Lighting - known as Lilco - offers three. types of audits: a free, do-it-yourself one; a \$3 mail-in audit; and a \$10 on-site inspection. Almost 10,000 of the utility's 800,000-plus residential customers have signed up for one audit or another.

The federal government offers help in several ways. Tax credits are available both for basic conservation equipment and for things like solar systems and windpowered devices. The credits apply to work done on the taxpayer's principal residence after April 19, 1977, and through 1985. Information is available in Publication 903 from Internal Revenue Service Offices.

Legislation pending in Congress would expand the tax credit. The revenues lost by the federal government would be offset by President Carter's proposed tax on the increase in oil company earnings resulting from deregulation.

Low-income homeowners and renters can qualify for grants of up to \$800 for materials and labor used to insulate ceilings, install storm windows, etc. To get more information, contact your local Community Action Agency or the state energy office and ask about grants under the National Energy Act.

The savings can add up. John Shearer of Gulf Power Co. in Pensacola, Fla., said that if you spend \$2,000 to save energy on a typical home built before 1971 you will save that much money in 10 years at current rates. And as the rates go up, the payback period gets shorter. Shearer said that owners of older homes could reduce their heating and cooling costs by 40 to 60 percent through conservation.

In California, Willhoit said that 200 therms of gas about the average monthly usage for a homeowner in a moderate climate - would have cost \$45 last year; the same 200 therms will cost \$65 this year. But the homeowner who weather strips doors and windows, insulates; the hot water heater, installs a low-flow-shower head, lowers the thermostat at night and, if necessary, adds insulation, will be able to cut energy consumption enough so that this winter's monthly bill will be only \$35.

sources report

The sources said Kirkland, the AFL-CIO's No. 2 official and the lead- . 2dent. ing contender for the presidency, faces opposition from J.C. Turner, 62, president of the 400,000-member International Union of Operating Engineers.

The sources, who declined to be named, said Turner told them he plans to seek the powerful labor post even though his colleagues give him_ little chance of defeating Kirkland, Meany's own choice as his succes-

Meanwhile, supporters of Plumbers Union president Martin J. Ward, 60, have been boosting his candidacy as a successor to Meany, a former plumber himself. However, Ward has not said if he would challenge Kirkland. according to AFL-CIO sources.

Neiter Turnernor Ward could reached for comment

Kirkland, 57 AFL-CIO secretary treasurer since 1969, is the only an nounced candidate to succeed the ailing Meany, 85.

Meany, the fderation' co-founder and only president since it began in 1955, announced last month that he would not run for a 13th two-year

684-7804

But one federation official said the prospect of a contest may prompt union leaders to reassess their support for Kirkland.

'Everyone's assumed for so long that Lane would be unopposed," said the official. "Once someone challenges him, it could be like opening the floodgates. Who knows what might happen?'

Kirkland is a veteran AFL-CIO He has been running the AFL-CIO during Meany's extended absences over the last six months and has won praise from member-union presidents for his leadership.

Union leaders say Kirkland has arned a crack at the top spot, but he could be ousted after one term if his stewardship is lacking.

A scenario for a Turner or Ward victory this fall has one of them emerging with the solid backing of the AFL-CIO's powerful building trades unions, which are holding their own convention this week in San Diego. Both the plumbers and operating engineers belong to that group.

mary gave him a chance to beat Nugent

'I doubt I would have run had it been otherwise," he said. Hightower said he realized he would not prevail in many votes on the three-man commission if he is elected but would go public with his views when he is outvoted.

He said he expected to raise and spend \$300,000 on the campaign and already has donations or commitments of \$100,000. He said he would not accept any contributions from staff official who never held a union persons in the oil and gas business but office before joining the federation. - would raise his money from "law yers, farmers, unions, just people. The candidate is a 1965 graduate of North Texas State University, where he earned a degree in government. He was former Sen. Ralph Yarborough's legislative assistant from 1967 to 196 and was national campaign coordinator in 1975-76 for the Fred Harris

presidential campaign. He became editor of the Observer in 1977.

Energy savings booklets offered

By The Associated Press

The federal government offers more than half a dozen booklets on saving energy in the home. They are all available from the Consumer In-, formation Center, Pueblo, Colo.,

Here is a list some of the booklets

(Be sure to order by number.): -Tips for Energy Savers. 610G. Free. A 46-page guide on heating, cooling, lighting, appliances, etc. -In the Bank or Up the Chimney? 056G \$1.70. A 70 page "how-to" book let, with instructions for installing

weather stripping, caulking, storm,

worksheets to help you figure out what you need and advice on how to select a contractor.

How to Improve the Efficiency of Your Oil-Fire Furnace. 605G. Free. A 12-page pamphlet on adjustments. that can cut costs. -The Energy-Wise Home Buyer.

109G. \$2. A 59-page look at energy

windows and insulation, as well as features you should consider when buying a new or used home. The booklet includes charts and maps to help you figure energy costs and detailed checklists.

-Home Heating, 048G. \$1.10. A 24page explanation of the most commonly used heating system, with information on installation, operation, maintenance and costs.

We're Diamontrigue, and we're new to West Texas but we're not new when it comes to pleasing thousands of Texans with the finest diamond simulation jewelry.

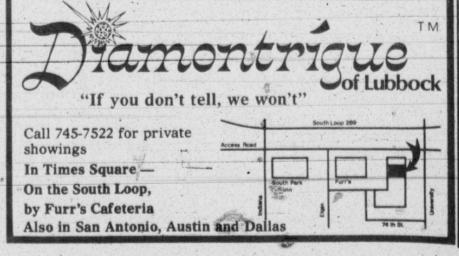

A Diamontrigue has the color, cut and clarity of a diamond, but none of the flaws found in natural stones. In a word, they're beautiful! So beautiful and so natural in appearance that even jewelers are surprised.

All Diamontrigues are exquisitely mounted in brilliant 14 karat white or yellow gold, accentuating the rings, earrings, tie tacs, bracelets, necklaces and stick pins that are now available.

Many Texans have already discovered that Diamontrigue can be a man or woman's best friend. And, priced from an unbelievable fraction of the cost of diamonds, you can easily afford several elegant items for those festive occasions that demand you look your best.

Did you see a Diamontrigue today? Chances are, you'll never know. And we're not about to tell. But you can see a Diamontrigue today, just by visiting our new West Texas showroom. And, for holiday gift giving or for special events like birthdays or anniversaries, ask about our Gift Selector Card Program.

At Diamontrigue, we want you to see what just a little' money and a lot of imagination can do for your lifestyle.

We use a medically supervised proven method that will help you lose 20-30 pounds in 30 days, without diet pills, without heavy exercise and without being hungry!!! WEIGHT CONTROL CENTER

Fire Prevention Week

The display of winning posters of Midland school students in the 1979 Fire Prevention Poster Contest calls public attention to the observance of "Fire Prevention Week" now under way in the Tall City, and across the state and nation.

The poster contest was sponsored by the Midland Fire Department and the Independent Insurance Agents of Midland.

Activities of the observance largely are centered in the schools, and this is great since it. also gets the desired message home to the parents in most cases. And the practice of fire prevention in the home is perhaps where it is needed the most.

But interest is not confined to the schools alone. For instance, the Midland Downtown Lions Club will observe its annual Fire Prevention Week program at its Wednesday noon meeting. The club at that time will recognize the city's "Fireman of the Year," while presenting him with a \$100 cash award. His name also will be placed on the large Firemen of the Year plaque in the Central Fire Station

Fire prevention programs also are scheduled by other clubs and organizations of various kinds. This is all well and good, and the community and its citizens will. benefit from the interest generated during the observance.

It was 108 years ago Monday (Oct. 8, 1871) that the famous, disastrous Chicago fire occurred, and ever since then the danger of fires has been stressed by fire departments and others at this time of the year. The National Fire Protection Association in recent years has sponsored Fire Prevention Week, nationwide.

It is a most important observance, one which should have the full support and interest of all citizens.

It is predicted that in 1979 more than 12,000 Americans will lose their lives in fires, and 1 million buildings will burn in the United States. Approximately 30 percentof the deaths from fires will be children, often unable to help themselves.

If this doesn't gain your attention and turn your thoughts to fire prevention practices, we do not know what will

And the worst part about the whole business is that most of the fires could be prevented, with proper attention and care. .

Your participation in Fire Prevention Week, through careful 9nspection of your homes and places of business, is urged.

Conservative approach

Conservation is an essential source of energy in large quantities

That is one of the conclusions of "Energy: The Next Twenty Years," a report by a study group sponsored by the Ford FoundaEdison in New York, has been saying for years: The American people must develop a conservation ethic

There are dissenters, of course, and we are among those who do not believe that conservation are no longer even minor irritants. Cuban submission has been com-

WASHINGTON - Scarcely a decade ago, Cuban Premier Fidel Castro was portrayed in intelligence reports as an undisciplined, flamboyant firebrand who sought to stir up revolutions throughout Latin America.

Now he is described as a subdued old fox who has completely sold out to the Soviets. He still has flashes of what one report calls a "tropical temper." But he submits to the Kremfin with "a careful mixture of adulation, confidence and ostensible humility.

By JACK ANDERSON

This dramatic change in Castro may help explain what is happening in Cuba today. The Caribbean country has come under the Soviet thumb; the secret dispatches are explicit aboutthat. Indeed, the Russians are transforming Cuba into a Soviet beachhead in the Western hemisphere.

The brash, young Caribbean rebel

The reports speak of "the faithful Cuba's loyalty.

LETTERS TO THE EDITOR A place for us tion of SALT II.

To The Editor: The teen-age generation of Midland is widely misunderstood. Many people feel that teen-agers should be greatly restricted during the weekend evenings. Several complaints are made by older citizens every weekend involving teen-age activities. Teen-agers, however, are not basically bad. They just have a routine that they find very interesting to follow. One example of this routine is that teen-agers like to go places and join together in rather large groups. The purpose of these groups is not destruction. These groups are based on friendship and teen-agers like to be around many of their friends.

When a rather large group gathers, however, there is bound to be a little noise. This noise is the basis of several complaints. Teen-agers do not intentionally disturb people. The problem is there is no place in Midland for teen-agers to go where no one will be disturbed. I feel that it would aid greatly to the community if some sort of park or recreational facility would be built for the teen age generation away from citizens who would be disturbed. Midland has the money. Why isn't something done about this problem?

> **Kevin Barton** Midland

The real calling

To The Editor: It's hard to believe that on Sept. 12 representatives of 35 denominations and 65 religious organizations went to the U.S. Senate to push for ratifica-

Fidel Castro kneels to U.S.S.R.

Long, D-La., routinely uses his poweras Senate Finance chairman in the service of the wealthy and the special interests. Now he is holding the health needs of the nation's poor children hostage in a cynical maneuver designed to help his re-election chances next year

Here's what has happened: Long is pushing a national health insurance. plan in competition with Sen. Ted Kennedy's more celebrated plan. Long's bill is not popular with congressional liberals, who feel that it would benefit primarily the middle class and do little for the poor.

"I want to get national health insur-

They also got the royal carpet treatment which began with a breakfast briefing at the White House by the president and Mr. Brzezinski. These religious leaders came from Southern Baptist, Catholics, Lutherans and Reformed Jews and numerous other persuasions. Their joint cry was: "Failure to ratify SALT II would endanger us all.'

Would to God these church leaders would take their calling seriously and see to it that they stay in their own back yards and preach the saving Gospel of Jesus Christ in their own pulpits. Church leaders, whether pastors or laymen, are to be about the Lord's business, not marching, rioting nor sippin' tea in the president's house. That's not their calling!

The National Council of Churches was also represented by its president, the Rev. William Howard. Mr. Howard was quoted in an official press release that "the council will more diligently study the Bible, particularly 'the Scriptural mandate for one church.'" Mr. Howard was the moderator of the WCC Commission for the Programme to Combat Racism when that body voted to give grants to groups so radical that even the Salvation Army withdrew its membership in protest from the WCC

* The main intersts of the NCC are political, its rengious programs are liberal and unscriptural and its influence is certainly detrimental to the true Christian faith and a free Ameri-

tion. The findings were published last month.

"Both in the short and the long run, energy conservation is often the cleanest, quickest and cheapest way to react to the inevitable higher energy costs," the report says. "Over our 20-year period. conservation inevitably will become one of the most important energy 'sources' quantitatively. Because effective conservation involves the decisions of millions of diverse individuals, with a few notable exceptions it cannot realistically be mandated or managed centrally, but requires that information and incentives be provided to energy users who make their own adjustments."

The conclusion is in line with the recent report of a Harvard Business School task force on energy. It emphasizes what Charles F Luce, board chairman of Con

NICK THIMMESCH

alone will remedy the energy shortage. But widespread conservation can and will herp. But it will take a lot of doing to lead Americans into the fold. It very definitely cannot be mandated. But times are changing and the public is coming to realize that we have been careless and wasteful. We can be more conservative.

BROADSIDES

But the process has been so gradual that, though it hasn't gone unnoticed. it has not alarmed the surrounding governments. Cuba was even accepted last month as the host for a gathering of non-aligned nations.

Recounts a defense intelligence study: "Castro supported Latin American insurgents almost indiscriminately in the 1960s, despite the strains it created in his relations with Moscow. But he apparently now accepts the Soviet view that Latin America is not yet ripe for armed revolution.

"Castro reportedly also agreed in mid-1975 that any future support for armed insurgency would be channeled through the local pro-Soviet communist parties.

Another analysis, classified "Top Secret Umbra," declares flatly: "Castro has demonstrated that the issues that had strained Cuban-Soviet relations so severely (12 years ago).

Soviets, meanwile, operate regular reconnaissance missions from secret Cuban airfields. An "independent fighter unit" has also been conducting "mock combat sorties" out of Cuba. Soviet submarines have been spotted refueling in Cuban ports, and sophisticated Soviet monitoring equipment has been installed in Cuba to intercept U.S. microwave telephone conversations

Suggests a secret intelligence analvsis: "The Cuban and Soviet focus at the present time is on expanding state-to-state relations and on encouraging the development of broad 'anti-imperialist' fronts. Both countries appear satisfied with their present policy

This does not mean, however, that Castro and Soviet leaders will give up the option to support 'national liberation movements' in Latin America when they feel conditions for revolution are propitious. Cuba's constitution recognizes 'wars of national liberation' as legitimate and describes Cuban aid to them as its 'right and international obligation.

LONG'S CHILDREN: Sen. Russell

ance out this year." Long has told associates. Of course, he meant hisplan, not Kennedy's: The political credit that would accrue to the sponsor of a health insurance program would, Long reportedly feels, assure his re-election.

So the astute Louisiana solon, casting about for some way to get liberal support for his bill, latched onto the Child Health Assessment Program a bill that had already been passed by the Finance Committee and, is supported by liberal senators.

Long approached Sen. Abe Ribicoff, D-Conn., an enthusiastic sponsor of the child-care program, and told him he wanted to join the child-care bill to the health insurance plan.

Long explained candidly, "I need to do something for the poor." He promised that if his national health insurance bill gets bogged down, he will then support a separate child-care bill

But insiders tell us that Long's unprincipled manipulation of the childcare bill will cause needless delay and may end up killing the bill entirely. The health needs of poor children may thus be sacrificed to the political needs of a senator trying to play down his well-established image as Big Business' best friend on Capitol Hill.

Note of thanks

To The Editor:

The coverage given te St. Ann's Family Fair by The Midland Reporter-Telegram was outstanding! We are grateful to you for providing such a boost to our efforts. Thank you for your generous and well-done publici-

We at St. Ann's are grateful, also, to the entire community of Midland for being a part of the beautiful Fair day and for sharing the fun with all of us. Without this marvelous community support and the gracious donations of Midlanders, such success would not be possible. Thank you

Don and Marge Hellinghausen General Chairmen 1979 St. Ann's Family Fair

Vital importance

To The Editor:

The upcoming school bond election is of vital importance to Midland's future. Not only can it be a positive factor in Midland's potential growth, but it will also affect the academic performance of this and future generations of students.

Midlanders have historically sought excellence in our educational system. One big step in this search can be a 'yes" vote in this election.

Paula Cahoon

Midland

BIBLE VERSE

Seek good, and not evil, that ye may live: and so the Lord, the God of Hosts, shall be with you, as ye have spoken. - Amos 5:14.

HEW's folly on Chicago's public schools is preposterous Administration officials to settle the

CHICAGO — 'This city's public school system is now foolishly being forced by federal bureaucrats to atone for its past sins of school segregation. After many year of trying, HEW has finally cornered Chicago with an Oct. 17 deadline to comply with a plan for total integration or Gotterdammerung.

Such insistence was lacking 15 years ago when Chicago ran a dual system as segregated as any in the South. But Washington bureaucrats are like wrongheaded generals who usually fight new wars with the same battle plans they used in the last ones. no matter how much conditions have changed.

In the mid-Sixties when it would have been truly valiant to fight the school integration battle in Chicago, the enrollment was about 50 percent white. But cities are like rivers they are never the same. Today, only 19 percent of the children in public schools are white. The other 81 percent is Tabeled "minority." As Detroit's black mayor, Coleman Young, once said, confronted with the same problem, "How do you squeeze 80 into

The HEW answer, printed and in map form, makes computer technology look simple by comparison. I cannot, in this short space, possibly ex-plain HEW's complex formula for jiggling and juggling those black, white, Indian, Asian and Latinoyoungsters around every morning in gasoline-filled buses.

-

An alternate plan by Chicago School Superintendent Joseph P. Hannon, euphemistically titled "Access to Excellence," involved busing and juggling, too, but on a mostly voluntary basis. Naturally, the federal bureaucrats nixed it. So HEW is now ready to spend up to 80 days after that Oct. 17 deadline to prepare its case for Justice Department prosecution

Back in 1965, during the heyday of the Great Society, HEW threatened to withhold a swatch of federal millions in aid to education from Chicago unless it desegregated its schools. President Lyndon B. Johnson always wanted to be advised of such potentially explosive orders, but the bureaucracy messed up, and L.B.J. wasn't told. By the time Johnson learned about the move, a first-class potential ruckus was under way, with Mayor Richard Daley blasting the feds.

Johnson, a fan of Daley, became furious over the mix-up and ordered

matter quickly. HEW folded like-atent. Secretary John Gardner, whose public piety always exceeded his courage, reversed the action of his underlings. The five-day war was won by Chicago, and to this day Chicago can honestly claim it has never been taken to court over school integration

Johnson and Daley are gone. Gardner and other key figures in that crisis are now obscure. But bureaucrats live on, and now, armed with court decisions for precedence, they have seized on the Chicago of 1979.

Some are tempted to credit or blame Patricia Harris, the new HEW secretary, for the latest order, because she is black. But Harris has limited discretion in this matter, whatever her color. The bureaucracy usually prevails over the most willful appointees

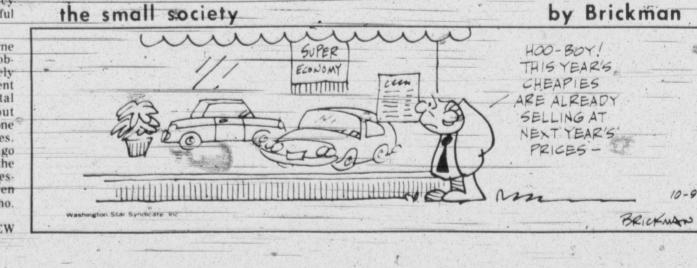

But some say Mayor Jane Byrne should show leadership on this problem. But so far she has alternately criticized and praised Superintendent Hannon or muttered noncommittal replies to public questions about what-to-do. "We'll work it out." is one of her recent ambiguous responses. The mayor could reassure Chicago blacks by filling a vacancy on the school board with a black. The present board is lopsided, with seven whites, two blacks and one Latino. Tsk, tsk

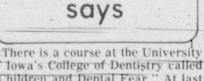

There is no earthly reason for HEW

to push this order, but Washington is often not on this earth. The record shows, that when Cromwellian bureaucrats demand the final solution, whatever white pupils are left soon shift to private, parochial or suburban schools. Children, black, white, Asian or whatever, do not get better educations because they are bused. If HEW prevails, Chicago could wind up

with a 95 percent minority school system. Would that be integration? Time is the only saving factor here. Since Chicago hasn't passed the HEW litmus test, the bureaucrcy will have to grind some more, go to court and let the calendar leaves fly. In the meantime, perhaps, there will be

Services will be at 2 p.m. Wednesday in Hamilton Funeral Home chapel in Alamogordo, N.M. Masonic graveside rites will be conducted during burial in an Alamogordo cemetery. Newnie W. Ellis Funeral Home of Midland handled local arrangements.

Bryars was born Nov. 11, 1895, in Stockton, Ala., and grew up in Alabama. He attended Anninston College in Anninston, Ala. At age 18, Bryars moved to Alamogordo. In 1929, he was elected to the New Mexico Legislature, where he served as house majority leader. He was elected to a second term.

In 1933, he assumed the position as chief clerk of the U.S. Federal Court in Santa Fe and Albuquerque and served until he retired in 1968. He returned to Alamogordo and, six months ago, moved to Midland.

Bryars was a member of the Ala nogordo Masonic Lodge, Scottish Rites in Sante Fe and a charter member of the Alamogordo Rotary Club. Survivors include his wife; a daughter, Mrs. M. E. McEuen of Midland, and two grandchildren.

Russian drifts

to Japan

TOKYO (AP) - Police today arrested a 29-yearold Russian coal miner who said he drank too much yodka, fell asleep in his boat and drifted aeross 100 miles of ocean from Siberia to Hokkaido, Japan's northern-

most main island. A police spokesman in Wakkanai, a community facing the Sea of Ok hotsk, said Aleksandr Markeev told them he went hunting on a lake on the Soviet island of Sakhalin, drifted down a river, then across the strait to Hokkaido.

The spokesman quoted Markeev as saying he had fallen asleep from two bottles of vodka he drank to keep warm.

Markeev was taken into custody for allegedly firing a volley into the air from a double-barreled shotgun when he was approached by Japanese fishermen at a nearby harbor

Wainoco hits gas discovery

HOUSTON (AP) - Wainoco Oil Corp. reported Monday a natural gas discovery well in northeastern British Columbia flowed 30 million cubic feet of gas a day on a recent completion test for one of four possible production zones.

The company estimated total reserves for the well at approximately 35 billion cubic feet.

The 30 million cubic foot a day test flow on the 7-30-82-20 W6M well was with a 1.5-inch choke with 520 pounds of tubing pressure. Perforations in the Belloy carbonate geologic zone were between 6,773 and 6,789 feet. Perforations between 6.838 and 6. 850 feet in a lower Belloy sand were said to have flowed naturally through a 2-inch choke at a daily rate of 2 million cubic feet with an unmeasured amount of condensate. Wainoco said two other pay zones appear at shallower depths, one involving 11 feet of Charlie Lake sand at 4,400 feet and the other 42 feet of Halfway sand at 4,870 feet. With a 100 percent interest in the discovery well, Wainoco said it has acquired for \$6.9 million 3,260 offsetting acres of leases at two recent government sales. The well is on the east side of the Monias field, where the company said it controls approximately 29,000 acres in a 60,000-acre block. Wainoco said additional drilling is planned for the development of both the Halfway and Belloy zones.

responsibilities," he said

A Mexican well, Ixtoc I, blew out June 3 and has been spewing millions of gallons of oil into the Gulf of Mexico since that time. Great globs of the black goo landed on Texas beaches in July and August, cutting tourist trade and threatening several environmentally sensitive lagoons and bayous.

The Clements-founded company, SEDCO, leased drilling equipment to Pemex, the Mexican oil monopoly, but Clements has said his company is not responsible in any way for the spill.

Hike in coal yield urged

CHICAGO (AP) - Speakers at a coal conference Monday criticized President Carter, Congress, and environmentalists and urged an immediate increase in domestic coal pro duction as a solution the the nation's energy problem.

, Several industry and scientific representatives at the "Coal Now" conference said that government boomdoggling and "no-growth" environmentalists have succeeded in recent years in slowing coal production and its use as a fuel.

Texas Railroad commissioner Mack Wallace especially blamed "radical environmentalists" for slowing U.S. coal production. He compared the lobbyists for a better environment to a surgeon treating a patient for an ingrown toenail while the patient is dying from a severed jugular vein.

Another speaker, Democratic Sen. Wendell H. Ford from the coal-producing state of Kentucky, urged the federal government to ease the socalled "energy crisis" by ordering plants capable of burning coal to do so at once, instead of continuing to burn gas or oil.

"The President's Coal Commission has identified 117 plants ... capable of being converted to coal, which would save the nation 724,000 barrels of oil a day," said Ford, who is chairman of the Senate Coal Caucus.

'When will these plants ever switch? That will happen only when the federal government tells them

Mexico hikes price

The Midland Reporter-Telegram

TUESDAY, OCTOBER 9, 1979

MEXICO CITY (AP) - Mexico has raised the price of crude oil for export by \$2 a barrel to \$24.60, the government oil monopoly Pemex announced Mondav

Mexico does not sell oil on the spot market and does not belong to the Organization of Petroleum Exporting Countries, but keeps its prices in line with those of OPEC. The international oil cartel's official price range now is \$18.00 to \$23.50.

-Pemex negotiates with each customer on a quarterly basis and the new price is retroactive to Oct. 1.

Mexico's price was \$14.10.a barrel in January, rising to \$17.19 in March and \$\$22.60 in July.

Mexico sells about 440,000 barrels a day to the United States - its main customer out of a total of 530,000 barrels daily in exports. The rest goes to Spain, Israel and some Latin American countries. European and Asian customers will begin receiving shipments next year.

Mexico also will begin exporting 300,000 cubic feet of natural gas daily to the United States next year, at \$3.625 per thousand cubic feet.

President Jose Lopez Portillo announced Sept. 1 that Mexico has 45 billion barrels of proven reserves of oil and natural gas equivalent. Estimates of its potential reserves range up to 200 billion barrels.

Finance committee takes ax to 'winfall profits' bill

By ART PINE **The Washington Post**

WASHINGTON-The Senate Finance Committee has so battered President Carter's promised windfall profits tax that, in its present form, it would recapture less than a third of the \$226.6 billion in extra revenue the oil industry is expected to reap from price decontrol.

Estimates show that the bill the panel is drafting would have an effective tax rate of 29 percent on the "windfall" that the industry would receive over the next 10 years after payment of other taxes.

By contrast, the windfall bill passed by the House, which closely paralleled the president's own proposal, would impose an effective tax rate of 43 percent on the windfall, or almost half again as much as the Finance Committee plan.

Finance Committee Chairman Russell B. Long, D-La., has said the panel will give away at least half the new revenues from its tax in the form of tax credits to spur conservation, leaving only \$35 billion for the other energy uses Carter prefers.

Carter had asked the lawmakers to devote all the proceeds from the new tax to his proposed synthetic fuels development plan and other programs. The House bill would earmark more than \$100 billion for this.

The president's decision to lift price controls on oil is expected to increase oil companies' revenues by as much as \$400 billion over the next 10 years, as domestic oil prices rise to world levels

Of this \$400 billion, the companies are expected to pay about \$173 billion in federal income taxes over the period, reducing the so-called "windfall" for the decade to about \$226.6 billion. The windfall tax approved by the House would take \$104 billion of this, offset by \$7 billion in extra deductions on state taxes. (The windfall tax is an excise tax, and so is deductible.)

That puts the measure's total tax take for the 10-year period at \$97 billion, or 43 percent of the \$226.6 billion. The oil companies would be left with \$129.6 billion.

The Finance Committee's version would trim the 10-year take from the windfall measure to \$70.5 billion. But the net, after the offsetting new deductions on state taxes, would be \$65.5 billion over the 10 years, for an effective tax rate of only 29 percent. Ferris

oil from the windfall tax.

The panel also exempted stripper oil, which some energy experts see as unnecessary. The committee may act this week to exempt Alaskan oil from the windfall tax, at a potentially high cost.

ENERGY

OIL & GAS

STOCKS/CLASSIFIED

The Finance Committee begins work Tuesday on a plan by Long to limit the cutbacks to the current level and put a lid on the tax credits that panel members want to tack onto the bill.

The panel earlier had voted tentatively to approve about \$99 billion in energy tax credits, but Long later announced plans to hold that to about \$35 billion, for fear the committee's proposed tax breaks would outstrip the tax itself.

Carter originally requested a wind-

Qatar plans oil, aid trade

VIENNA, Austria (AP) - A leading Arab member of the international oil cartel raised the possibility of trading guaranteed petroleum supplies for Western aid in economic modernization.

'In the simplest terms, we have finite hydrocarbon resources which we want to exchange for development," said Ali Jaidah, director general of the Qatar General Petroleum Corp. Jaidah spoke at a top-level seminar at the Vienna headquarters of the Organization of Petroleum Exporting Countries.

Ali Attiga, secretary general of the Organization of Arab Petroleum Exporting Countries - Arab members of OPEC - proposed a \$25 billion fund to help meet the energy needs of the Third World, to be provided by both OPEC nations and the industrialized West.

b'Such an investment would be equal to only 25 days of current expenditure on military hardware," Attiga said.

The issue of possibly linking oil and economic aid is timely. OPEC countries are considering decreases in oil production to protect the life span of their reserves and such moves could force industrialized nations to slow their own economic growth. On Wednesday, OPEC President Mana Saeed al Otaiba said the struggle over energy supplies could lead to a third world war.

A

There was no specific proposal of how much oil might be provided in exchange for aid.

Negotiations on oil supplies could take place in a new round of "northsouth" talks between have and havenot countries. Members of the socalled nonaligned nations, meeting in Havana last month, urged that such a dialogue resume.

they have to - or else. We've got to make it mandatory that coal-capable facilities now burning oil and gas convert to coal as quickly as possi-

The conference was sponsored by International Harvester Co., a large supplier of mining equipment, and the Mining and-Reclamation Council of America.

Several participants criticized Congress for passing environmental laws that restrict the use of coal and President Carter for encouraging new sources of energy while allowing coal production to languish.

Gov. John D. Rockefeller IV, D-W. Va., said at the conference: "We can burn coal in compliance with cleanair laws and it will still remain one of the cheapest ways for the country to reduce its imports of oil." Rockefeller, whose great-grandfa-

ther made a family fortune in the oil industry, said solar energy is slated for use by the year 2000 and synthetic fuels in the 1990s, but "coal is now. Replacing oil with coal under boilers in utilites and industry is now"

Rockefeller said many people associate coal with air pollution because in the past government clean-air standards did not exist.

'They don't fully understand that now coal can be burned cleanly that, for example, a new coal-fired power plant is cleaner than most existing oil-fired plants," he said.

One speaker who defended environmentalists was Walter Cronkite of CBS News, who said "We have to guarantee pure air and water to coming generations.

'Humanity can't live without them," Cronkite said.

103 million gallons lost

MEXICO CITY (AP) - Mexico's runaway offshore oil well has pumped 103 million gallons of crude oil into the Bay of Campeche since it erupted out of control four months ago, a government oil company director said Mon-

dav Of that total, said Jose Luis Garcia Luna, 27 percent or 28 million gallons of crude has become anoil slick in the Gulf of Mexico, only partially broken up by chemicals. Fifty percent of the 103 million gallons has burned up, 17 percent has evaporated, and about 5.5 percent has been scooped up, he said.

· Luna, director of petrochemical development, said an average of 5,200 barrels of crude have become ribbons of oil slick. Some of the rust-colored residue has stained beaches as far away as the Texas coast 500 miles from the well, which is 56 miles from the Mexican coast off the shrimping village of Ciudad del Carmen.

"From the beginning of the runaway well (June 3) until yesterday, a total of 2.4 million barrels of oil have been released by the well," Garcia Luna said.

Tax experts are quick to point out that some of the Finance Committee Friends University. Scrap tires may mean oil

SANTA MONICA, Calif. (AP) -Scrap automobile tires have been found to be a new source of oil at a pilot plant operated by a research group, according to an industry journal.

The Energy User News reports that the plant has been operating for some 18 months and company officials say it can produce between 80 and 100 gallons of oil per ton of tires, with the oil usable directly as a fuel in boilers.

By subjecting discarded rubber tires to intense high temperatures, the plant has found yields of oil, carbon char and hydrocarbon gases, the publication said.

Carbon char can be refined into carbon black and used to produce ink and carbon paper, it added. Plans for a commercial facility

with a 20-ton-a-day capacity are on the drawing board at the company, the Energy Research Group of Santa Monica.

Oil search on in Arkansas

LITTLE ROCK, Ark. (AP) - The Arkansas Department of Pollution Control and Ecology is searching for more than 125,000 gallons of crude oil that is reported missing in Southwest Arkansas.

Director Jarrell Southall said Monday only 10 percent of the oil that spilled from a broken pipeline near Dierks, Ark., last Wednesday has been recovered. The break in a Mobil Oil Co. line occurred on Weyerhaeuser company land six miles. southeast of Dierks.

Southall said Weyerhaeuser officials originally estimated the loss at 5,000 gallons, but Mobil said 140,000 gallons spilled.

"The department is attempting to reconcile the significant difference between the amount of crude oil reported lost and the amount of oil collected during the subsequent cleanup efforts," the director said.

Southall said ground water contamination is a major concern. He said nearby landowners should be warned of the possibility of contamination to surface and ground waters.

He added that the department believes the oil is confined to Weyerhaeuser land. Southall said two acres of timberland were affected by spraying oil and from oil floating down the hill.

POLITICAL BRIEFS Florida Democrat jumps Kennedy ship

TALLAHASSEE, Fla. (AP) - The Escambia County chairman of Florida's draft-Kennedy campaign has jumped ship to join President Carter's forces in the final days before Saturday's Democratic county caucuses.

Donald D. Spence said he abandoned the campaign to draft U.S. Sen. Edward M. Kennedy, D-Mass., for the party's presidential nomination because of what he called a late-blooming realization that blacks have fared well in the Carter administration.

"I have no bones to pick with the Kennedy family at all. But Carter has the upper hand to be president again and we certainly need to have black people in the campaign of the man who's president," said the black dentist from Pensacola.

The defection, to which the Carter forces hurriedly alerted the press, began the final week of campaigning before the 67 county caucuses. On Saturday, 879 delegates will be chosen for the mid-November Democratic State Convention in St. Petersburg.

Along with 838 delegates chosen by party leaders and elected officials, the delegates will vote in a nonbinding presidential straw ballot which may have a psychological impact on the White House race

Florida's delegates to the Democratic National Convention will be chosen in the March 11 presidential primary

It was the second time during the caucus battle the Carter forces have succeeded in luring a black Democrat from the Kennedy campaign.

A black delegate candidate backing Kennedy recently abandoned the draft campaign after former United Nations Ambassador Andrew Young called him to push Carter's case.

Kennedy campaign director Sergio Bendixen said Spence's defection was an illustration of the work the Carter campaign has done in Florida's black community with its 400,000 Democrats.

"They've been concentrating on the blacks," Bendixen said. "Their strategy has been to put unbelievable pressure on them either not to run for Kennedy or to switch to Carter."

Spence said that until the last few days he had not reviewed Carter's record in appointing blacks as federal judges and to White House jobs. Within the last few months, Carter has named two black Floridians as federal judges.

Mayor candidates face elections The Associated Press

Mayor's races in Salt Lake City and Birmingham, Ala., topped dozens of races today as voters went to the polls to cast ballots in primary elections in three states

In Massachusetts, six mayors faced challenges in the last of five weeks of preliminary municipal elections. The non-partisan primaries will yield two finalists for the election Nov. 6.

A sparse turnout was expected in Salt Lake City where voters pick nonpartisan opponents in a mayoral and seven council races. The city is switching from a government run by a mayor and four full-time city commissioners to one run by a mayor and seven part-time council members.

Mayor Ted Wilson faces a field of seven challengers in his bid for a second four-year term. His most visible opponent has been developer Doug Bowers

Birmingham voters pick from a field of seven candidates, including incumbent Mayor David Vann. A strong challenge has been mounted by Dr. Richard Arrington, a black leader and one-time al

Vann

-Unless one candidate gets 50 percent of the votes . cast, which is unlikely in the crowded field, the top two vote-getters will face each other in a runoff Oct.

Other candidates were councilmen Larry Langford and John Katapodis, businessman Frank Parsons, Ku Klux Klan leader Don Black and Socialist Workers Party member Muhammed Oliver.

Springfield, Mass., Mayor Theodore E. Dimauro faces bank-teller Winston S. Gaskins and retired railroad worker Wallace D. Hindes in his try for a second two-year term.

And in New Bedford, Mass., Mayor John A. Markey is seeking his fifth two-year term in a rematch with his 1977 opponent, former City Councilor Brian J. Lawlor. Also running are retired building contractor Robert A. Watkins and Cassandra DeMello.

Elsewhere in the state, mayoral primaries are being held in Lawrence, Chicopee, Holyoke and Gloucester.

Baker says he can win

HOUSTON (AP) - Republican Sen. Howard Baker says he has the best chance to beat Jimmy Carter, Ted Kennedy or any other Democrat, in the 1980 presidential election.

Baker said Monday that the major GOP presidential hopefuls have no major ideological differences and therefore the Republican nominee should be the man with the best chance to win. Baker said he has to convince party leadership that "I have the best chance to win.

Baker reaffirmed his belief that Kennedy would enter the race and said Kennedy probably has the advantage among Democrats, but didn't discount Carter.

"Jimmy Carter's not going to roll over and play dead," Baker said. "Ted Kennedy is going to have to fight for every delegate he can get.

A campaign involving Kennedy would center around issues, Baker said, but if Carter gets the nomination, it will be a test of his competence to lead the nation.

Chicago mayor for Carter

CHICAGO (AP) - With first lady Rosalynn Carter standing next-to her, Mayor Jane Byrne said she was planning to endorse President Carter for re-election.

Saying Carter is "doing an excellent job," the mayor_responded "Yes, I am," when a reporter asked her Monday if she was going to endorse Carter in the upcoming 1980 presidential race.

The exchange came at a Monday news conference at O'Hare International Airport, where Mrs. Byrne was greeting Mrs. Carter before the two marched in the annual Columbus Day parade in downtown Chicago.

But when Mrs. Byrne was pressed by reporters, she said the Cook County Democratic Party would caucus next Monday and probably would endorse Carter. She previously had avoided committing herself to supporting any one candidate.

Ex-Dallas mayor won't run

DALLAS (AP) - Former Dallas Mayor Wes Wise ays he has decided not to try to run for the job again in 1980.

Wise, a former television personality in Dallas before becoming mayor in the early 1970s, had been considering the possibility, but announced Monday that he lacks the time to make the race.

He said he decided to announce his plans because you owe it to the people to let them know they should look for someone else.
