Of Human Hearts

Starring Walter Huston and James Stewart

This is a super-picture starring Walter Huston and James Stewart. Says the Motion Picture Herald: "Every once in a while a motion picture plays on Broadway and leaves before the general public learns of its greatness."

"It is gratifying that already before it has opened 'Of Human Hearts' has won the widest advance praise of any picture within recent years. Not since 'Captains Courageous' has there been such a picture of love, laughter, humanity."

Also Short Subjects
Admission 10c and 25c

Thursday - Friday
March 24 - 25

Carole Lombard and Frederick March in

Nothing Sacred

This is Another Super Picture, One of the Best Filmed in Recent Years.

These are "knock-out" features and you can't afford to miss either of them.

At The Methodist Church
Sunday school at 10 o'clock, morning services at 11 o'clock. There will be no evening preaching service as you are invited to attend the revival meeting at the Baptist church.

Sufferers of STOMACH ULCERS HYPERACIDITY

DEFINITE RELIEF OR MONEY BACK
THE WILLARD TREATMENT has brought prompt, definite relief to thousands of cases of Stomach and Duodenal Ulcers, due to Hyperacidity, and other forms of Stomach Distress due to Excess Acid. SOLD ON 15 DAYS TRIAL. For complete information, read "Willard's Message of Relief." Ask for it—free—at Pioneer Drug Store

R. E. DOUGLAS
(Re-election)
KELTZ GARRISON

For County Judge:
W. COFFEE, JR.
(Re-election)

For County Treasurer:
MISS LIZZIE GREGG
(Re-election)
MRS AGNES (Donnell) TURNER

For Commissioner Precinct 2:
L. E. GRAHAM
(Re-election)

PRESERVATION OF FOOD BY REFRIGERATION BEGAN EARLY

When the mercury starts climbing, both men and beast hunt a shady spot. They've been doing it for many centuries.

Rumor hath it that the caveman went so far as to douse perishable foods in cool streams of water in an attempt to preserve his next meal from the ravages of Old Sol.

Which leads up to the fact that modern electric refrigeration is a far cry from the first recorded cooling system, tried out by the ancient Greeks and Egyptians before the birth of Christ.

According to Grady Starkey, local manager for the West Texas Utilities Company, the first refrigeration was accomplished by filling shallow earthen dishes with water and covering them with sugar cane. This crude apparatus was then placed on a roof, where, exposed to the air currents or fanned by slaves, some of the water was evaporated during the night and with it went some of the heat. Loss of the heat left the remaining water considerably cooler. The chilled water was then placed around bottles of wine to cool them. Clever eh?

Nero—he who fiddled while Rome burned—is given credit for discovering the preservative powers of snow. Hundreds of his slaves brought bales of snow from the Apennine Mountains down to the emperor's courtyard where it was buried in deep trenches insulated with sod and straw. It kept for weeks and was used for cooling wines, fruits, and fish that formed part of the Roman feasts.

In the 16th century, a Venetian, Sanct Sanctorious, concocted a mixture of one-third salt and two-thirds snow by which he produced a temperature cold enough to freeze water.

It is said that Lord Francis Bacon contracted the pneumonia of which he died while stuffing a fowl with snow to study the effects of such treatment. His last question was: "Does the fowl still keep?" Thus developed the science of food preservation in its cruder stages.

"Nature herself took a hand", Starkey says, "by supplying cooler temperatures in springs, wells and cellars. These were used for a great many years and even today in some cases. However, the temperature is rarely below the 50-degree danger line which now is known to be necessary for safe food preservation."

The use of natural ice, he recalled, preceded development of the mechanical ice plant and electric refrigeration.

"The old-fashioned ice box went a long way toward making people more conscious of the need for food preservation", he opines. "It performed a real service in the past."

In 1880 a Chicago packing plant installed the first mechanical refrigeration equipment used by that industry, revolutionizing the whole system of feeding the people of this nation.

Electrical refrigeration for the household followed.

"Do you remember how crude the old family bus of a decade or so ago looks today?" Starkey asks. "It cost three or four times as much to operate the old models as it does the streamlined machine nowadays. Well, the same is true of the old model refrigerators. But the new electric ones! Shucks, man! They give the women-folks year-round temperatures of 40 or 50 degrees for what it costs to smoke threecigarettes a day!"

F L Sherman visited his mother, Mrs E H Sherman over the week end.

GASOLINE NEWS

ETHEL CARTER

A play "Ten Nights in a Barroom" is to be presented at the Gasoline community auditorium Thursday evening, March 24. Everyone come.

Misses Frances and Hazel Dorsey of Lubbock spent Sunday with home folks.

Mr and Mrs Gus Taylor of Phoenix, Ariz., came Friday to visit his grandmother, Mrs L A Taylor and uncle, Charles Taylor and family.

Mr and Mrs Jesse Couch and sons of Sunray spent the week end with relatives.

Bill King of Tyler is visiting at home for a few days.

Attending the Mother-in-Law Day celebration at Amarillo were Mrs L J Bedwell, Aunt Matt Chandler in company with Mr and Mrs Joe Bedwell of Turkey.

Eugene Chandler set out a row of elm trees in front of the community house Saturday.

Mr and Mrs W M King left for Mineral Wells Tuesday. Mrs L J Bedwell accompanied them.

Mr and Mrs E P Lewis visited a nephew at Wellington who underwent an appendicitis operation March 12. Mr Lewis was also called to the bedside of his father who was very ill in the Brownfield hospital. He was resting better Sunday evening and Mr Lewis returned home.

The Rest of (Continued from Page One)

tional conventions have attracted thousands of delegates from over the nation who have become so enthusiastic that conventions of other national associations have been booked for years ahead in Texas cities.

Last week the representative of a

prominent motion picture studio visited my office, told me of plans for the filming of the Life of Sam Houston, and said that the industry planned other films based on Texas history. Already on location in Texas at the time was another company filming a Texas picture. During the week, representatives of three national magazines visited in Austin on assignment for stories of Texas.

More recently, the Mother-in-Law Day Celebration in Amarillo held the eyes and ears of the nation toward Texas. This unique celebration was honored by the presence of Mrs. Eleanor Roosevelt, wife of the President, and the governors of four neighboring states. Thousands of visitors from other states accompanied them while a national radio hook-up carried the mental pictures of the mammoth celebration to an interested nation. News stories, news reels, and magazine articles told the story of Mother-in-Law Day and while doing it, reflected favorable national attention upon Texas.

It is timely then for us to observe National Resources Week and reflect upon the invaluable publicity for Texas which has focused the eyes of the nation upon our present and future development. We certainly have something to sell and the buyers of the nation certainly will hear of it through continued publicity.

The meat produced in the state of Texas in a single year would fill

a solid train of refrigerator cars 233 miles in length, according to Howard H White of the National Live Stock and Meat Board of Chicago in a statement made recently.

SICKNESS takes a Holiday!

Their Health is Protected by Electric Refrigeration

Hospital Obstetrics Supervisor Says: "It's Safest"

Economy in operation and safety from food spoilage are as important in your home as in any hospital! Therefore, it seems amazingly significant that most all hospitals, including Hendrick Memorial Hospital in Abilene (see photos), depend largely on Electric Refrigeration for these two necessary performances. Miss Vera Smith, obstetrics supervisor, says: "We now have eight Fridigaires in use, one of which is in the maternity ward. I know of no better method than electric refrigeration as a means of providing one of many safeguards for the health of these babies." So when buying a refrigerator, please bear in mind that responsible persons, qualified to exert expert choice, everywhere are choosing *Electric Refrigeration*. Especially is this true in West Texas, where torrid summer heat makes it impossible for other types to maintain 40- to 45-degree temperatures—necessary for complete food protection. Electric service for refrigeration costs as little as 2 3/4 cents a day!

IN THE PICTURES
Snoozing peacefully are these youngsters, undisturbed by the electric refrigerator which protects their liquids. One yawns, another blinks big, blue eyes as Nurse Vera Smith makes a routine inspection. Below: Miss Smith stands at the Fridigaire, whose silent operation is essential; in foreground beyond the baby cribs is the hospital's new "incubator."
