The East High School All-Stars last Saturday night in the Amarillo Civic Center continued their domination of the West by taking their fifth win in a row in the annual classic which is held just before the championship of the NWIT tournament. The East now leads the series 7-2. Last year the East won when Valley's Sherice Price fired in the winning bucket as the final buzzer sounded. **MOTORISTS SHOULD CHECK REGISTRATION**

Texas motorists should check their motor vehicle registration plates to determine if they will expire in March.

Bob Townsley, director of the Motor Vehicle Division, State Department of Highways and Public

Transportation, said today that about two million vehicle registrations will expire this month.

"When Texas went to the staggered registration system two years ago only passenger vehicles and light (pickup) trucks were included in the monthly registration program.

"Other vehicles will all have registrations expiring in March," he said.

Among those vehicles for which new registrations must be obtained prior to April 1 are heavier trucks, travel trailers,

Motorists with March 1979 registrations may drive their vehicles through March 31, but they must have new validation stickers if used April 1 or thereafter. Many county tax assessor-collector offices will be closed Saturday, March 31, making March 30 the last day to obtain new registrations.

"Undoubtedly there will be But he urged motorists to get their new registrations as soon as possible to avoid possibility of fines and a 20 percent penalty on cost of registrations.

**WEIGHT CONTROL SERIES**  
Been looking at spring fashions and wondering if your winter figure will fit the styles? Get your body in shape by enrolling in a free "Nutrition Today—Weight Control Tomorrow" letter series offered by the County Extension Office.

Thirty million Americans are overweight and 15 million are obese to a degree that actually shortens their lives. There is significant correlation between obesity and ill health including cardiovascular disease, hypertension, diabetes and arthritis.

Many people turn to fad diets or pills to take off unwanted pounds. These efforts may lead to poor nutrition, bad health and wasted money.

It takes a steady balanced diet and regular exercise to take weight off and keep it off.

The purpose of this series is to help people analyze their eating behavior; learn how to determine overweight, normal and underweight; how to plan nutritional adequate meals with low calories; and learn why people overeat and how to change eating behavior to lose weight and maintain normal weight.

As with all weight control efforts you should have a physical examination before attempting any diet or exercise program.

The "Nutrition Today—Weight Control Tomorrow" series will be mailed every two weeks to the first 50 to enroll. Call the Extension Office, 823-2343, or come by and put your name on the list. There is no cost for this series and it is available to county residents regardless of socioeconomic level, race, color, sex, religion or national origin.

The Office of Continuing Education at Texas Tech University is conducting a program "Weight Control—Fads—Facts and Fallacies" on March 31, in the home economics building at Tech. Registration is \$2.00 if sent in before March 26. If you are interested in this, call the Extension Office for details.

Becky is a water baby—one part mermaid, three parts fish. We took her to the lake this summer, and she splashed and tumbled in the water joyously. I had to watch her every minute. I finally had to take her out by force—much to her consternation and objection. It took some doing to distract her.

Actually, it's relatively simple to comfort a small child whose wishes have been thwarted. A toy, a cookie, sometimes a loving hug will turn the trick.

But how about grown-up frustrations? When sick with disappointment, heartbroken or dejected by a bad turn of events, where can an adult turn for consolation and support?

God's Church is the mainstay to every situation. Radiating God's goodness, it offers reassurance and relief to the baffled and the hopeless. Men turning toward its promise find new confidence and faith and hope recovered.

# HURRY UP and RELAX

Highways, superhighways, turapikes, freeways, expressways—they crisscross America, leading in every imaginable direction. And, they get you there so fast, you are past the right exit before you know it. We live in such a speed-oriented world that, when we are not working, we feel we must "hurry up and relax." At times we even feel guilty when we are not busy about something.

We don't really like our foolish pace. We speak longingly of peace of mind and quietude, and we take tranquilizers by the ton. We search frantically... on vacations, on "rest weekends" or "fun activities"... but tranquility is hard to find.

Perhaps we are seeking too hard. Perhaps tranquility is not to be sought. Rather, isn't it what happens when you are at peace with yourself, no matter the circumstances?

You can be at peace with yourself only when you are at peace with God. He is the very center of your being, and His peace is freely given when you accept it.

Accept this great gift of God in the very best place of all—His Church.

## Collect Soil Samples Now

Winter and early spring are good times for collecting soil samples, says Buddy C. Logsdon, county agent with the Texas Agricultural Extension Service.

At present, Extension Service laboratories are processing samples as soon as they arrive, and reports are mailed within one week.

Prompt service is an important requirement for an effective soil testing service, says Logsdon. However, waiting until the planting season can cause delays and results may not get back to producers in time.

Sampling well in advance of planting offers the advantage of allowing time to obtain needed fertilizers. Early sampling is also advised to avoid wet soil later in the season. If soils are muddy and sticky, it is difficult to obtain a good sample. And, excess moisture adds to shipping costs. To reduce shipping weight, samples can be air-dried for a day or two. Heating should be avoided, however, since it fixes potassium in some soils so it cannot be removed by laboratory procedures for testing.

One of the keys to a good soil test is collecting a representative soil sample of a field. From 10 to 15 samples should be collected from an area as large as 40 acres. These should then be mixed together for a composite sample. Also, the area tested should be divided according to soil type as well as past and future cropping practices.

Take time to collect representative soil samples and carefully complete the information sheet that must accompany each sample, advises Logsdon.

Collection and mailing instructions, mailing cartons and information sheets are available at the County Extension Office.

Farmers Union Delegates Adopt National Policy

Mr. and Mrs. Virgil Blakney of Turkey, Mrs. Ike Reed, Mrs. Jay Gowan and E. G. Reed of Quitaque were among 1,500 delegates and visitors at the 77th annual National Farmers Union Convention in Kansas City, Missouri, where the organization's policy for 1979 was adopted.

Farmers income dominated the policy discussions, as delegates wrestled with methods of improving economic health of rural America.

The organization went on record as strongly endorsing the concept of initiating wheat price agreements between the four major exporting nations, as an alternative to the unsuccessful Geneva Wheat Talks.

The policy adopted in this section read in part, "Farmers Union urgently requests the Congress and the Administration to appoint a Commission to reach an agreement with Canada, Australia and Argentina on the World Market share of wheat for each country and on a minimum price. This price must be high enough to return to farmers a reasonable profit above the cost of production."

Agriculture Secretary Bob Bergland told the convention audience Monday night that government farm programs actually benefit large producers more than family farmers, and said he failed to support government guaranteed parity prices for this reason.

The convention delegates responded by adopting a policy reading that farm program benefits must be graduated to benefit family farmers.

Other speakers at the convention addressed cooperative and marketing challenges facing agriculture.

Rep. Neal Smith (D-Iowa) told the agriculture audience that the livestock and grain marketing companies have been using inside and misleading information to gain an advantage over farmers in the marketplace.

After a Tuesday afternoon program dedicated to cooperative marketing, the delegates adopted a program to fight anti-coop legislation now being considered in Washington. Such legislation would alter current anti-trust laws, and weaken the cooperative marketing strength of farmers and ranchers.

In other policy action the delegates supported gasohol production and marketing, revision of tax laws pertaining to agriculture, and called for immediate changes in government cotton policies.

AAM MEETING HELD IN QUITAQUE LAST WEEK

The American Agriculture Movement met in Quitaque AAM building last week. The meeting was opened with a prayer led by Prof Patrick, and Grady Tyler led the Pledge of Allegiance to the United States Flag.

Items of business discussed included sending telegrams to Washington, D. C. in regard to the Farm Bill that is pending. The local AAM received a letter from Congressman Kent Hance's office stating they have his cooperation in helping the farmers to know where to send the telegrams. The local AAM is to call him back, and if you need information, call the office in Quitaque.

Mrs. Jack Pigg received a letter of thanks from a lady whom the farmers helped by pulling her vehicle out of a snow drift in Washington. She is attending college and she wrote a theme on the farmers' plight and received a grade of A for it. (The professor seemed to think she might be a little prejudiced concerning the farmers. This proves

McCracken, Tulla, and Freddie, Bonnie and Steven Davidson, Amarillo. Freddie and the two children came Friday and stayed through Sunday. Miss Laura Fuston of Turkey was also a guest for lunch.

Mary Ollie Persons, Quitaque, and Sue Berry, Tulla, visited at Lake Travis and San Antonio last week. They visited their sis-

ter and her husband, Lucille and Winston Savage, at Lake Travis, and Mr. and Mrs. Charlie Redditt and family in San Antonio. Mrs. Redditt is the former Carol Berry. Mrs. N. D. Witcher of Las Vegas, Nevada called her sister-in-law, Mrs. Buddy Morris of Quitaque, twice last week. Mrs. Bill Helms visited at the Lockney Convalescent Home and had lunch there with friends Sunday. Later, she visited Mrs. Edna Cox. She states that Mrs. Cox, a former Quitaque resident, is well.
