California fires still burning

50,000 acres, 300 homes destroyed

SAN BERNARDINO, Calif. (AP) - Fires fanned by swirling "devil winds" of 55 mph raced unchecked across suburban Southern California for a third day today, routing hundreds more people in a region that has seen 50,000 acres and about 300 homes and buildings go up in flames.

A devastating brushfire called the Panorama fire just north of this scarred city of 112,000 residents, one of several still burning out of control, jumped Interstate 15E and swooped into the community of Devore. With four people already known dead in the fires that broke out Monday, author itles warned residents of 500 more homes to flee

As three structures burned in Devore, firefighters stood watch in the driveways of nearby houses, trying to protect them, said Bill Johnson of the U.S. Forest Service

One firefighter at Devore suffered second-degree burns, he added. The Panorama fire was the worst of the nine blazes that burned in five

counties today, three of them in San Bernardino County. The weather service had forecast that the Santa Ana winds, the socalled "devil winds" that come down from the mountains, would abate today, offering a ray of hope to thousands of exhausted firefighters trying to head off the outbreak of fires that apparently have destroyed more

homes than any other in Southern California in a decade. But the winds had not died down this morning, and the Panorama fire was threatening the town of Crestline to the north in the San Bernardino Mountains, about 70 miles east of Los Angeles.

Thousands of people have abandoned their homes since the blazes erupted Monday and some 400 were reported injured. Nearly 2,000 firefighters were battling the fires and 90 National Guardsmen

were being sent today to help at the Lakeland fire near Lake Elsinore in Riverside County.

Nearly 300 buildings in San Bernardino either were in ruins or irreparably damaged as the Panorama fire raged. Within city limits alone, damage to 267 buildings - mostly homes worth \$80,000 to \$100,000 - was esti mated at \$25 million. Of those, 180 were completely leveled and the rest

"Most homes seem to have been either totally destroyed or not touched," said U.S. Forest Service spokeswoman Marsha Brown.

About 25 small homes and cabins also were wiped out in the suburbs and foothills, and watershed valued at \$4 million went up in smoke.

Not since September 1970, when the Newhall-Malibu fire destroyed 403 homes and left 10 dead, has there been so destructive a fire in Southern

There was no word on when any of the major blazes might be con-

U.S. ponders Iranian reply

TON (AP) - Algerian intermediaries met today with State Department officials to deliver a new message from Iran on its terms for freeing the 52 American hostages.

A little more then 12 hours

after their arrival in Washington from Algiers, the three emissaries began day-long talks that could determine how far apart the two countries are on negotiating the release of the captives.

They were greeted by Assistant Secretary of State Harold Sauders on arrival at the State Department and went into talks with an American team led by Deputy Secretary Warren Christopher, who had flown to Algiers 16 days ago with the U.S. response to Iran's four conditions for ending the crisis.

Besides Christopher and Saunders, members of the U.S. team were Deputy Treasury Secretary Robert Carswell, State Department legal adviser Roberts Owen and Arnold Raphel, an assistant to Secretary of State Edmund S. Muskie. Muskie also scheduled a luncheon

with the Algerian envoys — Redha Malek, ambassador to the United States; Abdelharim Gheraib, ambassador to Iran; and Mohammad Seghir Mostefai, chairman of the Central Bank of Algeria.

"We are certainly interested in getting the fullest possible response from Iran," State Department spokesman John Trattner said Tuesday. "I think

that's obvious." He said the Algerians probably will remain in Washington several days.

U.S. officials said the United States had received an "informal" idea of the nature of the Iranian message in advance of the arrival of the Algerian mission.

The Nov. 10 American message explained that restrictions on presidential authority prevent the Carter administration from fully meeting two of the demands — cancellation of U.S. financial claims against Iran and confiscation of the scattered wealth of the late Shah Mohammad Reza Pah-

In advance of today's meeting, administration officials said they expected "difficult questions" from Iranian authorities about the U.S. note delivered by the Algerians to Tehran in response to the conditions set by the Iranian Parliament on Nov. 2.

Iranian officials have indicated the explanations were not persuasive and that further clarification is needed. "I would imagine we are going

to have some difficult questions on financial matters and timing," said one U.S. official, who asked not to be identified. Another official said he did not expect the Iranians to demand a yes-or-no response. The two other demands - a pledge

and release of more than \$8 billion in frozen Iranian assets - are not viewed here as major obstacles.

of non-interference in Iranian affairs

The signals from Iran, however, have been conflicting.

Various authorities in Tehran have described the U.S. response as conciliatory and cool.

Brezhnev sending positive' signals

MOSCOW (AP) — President Leonid I. Brezhnev is sending "very positive" signals to President-elect Ronald Reagan and has offered "certain assurances that give hope for the future, hope in Soviet-American relations and hope for the world," Sen. Charles Percy said after a two-hour and 40-minute meeting with the Soviet leader today.

Percy, pegged as the next chairman of the Senate Foreign Relations Committee, said his talks were "by all odds the most satisfactory discussion because we had such a full agenda." The meeting in the Kremlin, also attended by Foreign Minister Andrei Gromyko and U.S. Ambassador Thomas J. Watson Jr., lasted at least an hour longer than scheduled.

Percy, the first U.S. government official to hold talks with Brezhnev in 16 months - and since the Soviet intervention in Afghanistan in December 1979 — declined to give details on the talks. But he said it was "difficult to name a subject we did not

The Illinois Republican also said he scheduled further talks with Defense Minister Dmitry F. Ustinov on Thurs-

day and with Gromyko on Friday "It was a very frank, factual discussion of the basic differences that we have," Percy told newsmen. "We laid them right on the table without equivocation.

'We expressed the hope that we have enough in common to work not only for the good of the Soviet and American people, but for the good of the people of the world."

Percy said that he found Brezhnev in "extremely good, vigorous health." He said the Soviet leader looked better than when he last met him about four years ago.

The senator said Brezhnev took a "constructive attitude" towards future relations with President-elect Ronald Reagan. "It's important for both Brezhnev and Reagan to send signals to one another, and they're doing so in a very positive way through me and in other ways," he

The length of the talk with Brezhnev and the fact that more meetings had been set with Ustinov and Gromyko indicated the seriousness with which the top Kremlin leaders viewed the contact.

Citizens offer housing suggestions

By LANA CUNNINGHAM Staff Writer

Getting comments out of the audience at a public hearing on Community Development Block Grant funds Tuesday night was like pulling chicken's teeth — until the dozen or so citizens got warmed up a bit. And then the suggestions kept coming.

Midland City Council held a second public hearing in City Hall Council Chambers to gain citizen input on how to spend \$1.13 million in federal funds for which the city is applying. The first meeting was held Nov. 4, which was Election Day, and the panel was criticized, with the comments being that residents were more interested in election results.

When boiled down to a few, the suggestions from citizens centered on improving current housing stock and building more housing for low-income people, paving streets in south and east Midland, putting in curbs and gutters and instituting more day care in south and east Midland.

Betty Sheeler with the Midland Housing Association was the first to speak. As director of Midland County's Section 8 rental subsidy program for low-income residents, she said she had come across numerous rental stock that needs rehabilitation. She suggested the council look into a Department of Housing and Urban Development program that would allow the city to rehabilitate rental hous-

Cookie Wetendorf reiterated two stands taken by the Midland League of Women Voters. Those, she said, are to institute a housing assistance plan and to increase housing stock for low to middle income residents.

Then the microphone fell silent while Mayor G. Thane Akins repeatedly asked the audience if anyone wanted to make a comment or ask questions. Councilman Gordon Marcum II threw out an idea from the Parks and Recreation Department to upgrade parks on the south and east side and install more playground

Annie Wright suggested part of the

for street paving. "I've lived at that spot (707, N. Dallas St.) for 27 years

and I've been trying to get paving" but with no success.

Then Tony Carrillo, 207 E. Cuthbert Ave., added his desire for street paving. "And some streets don't have curbs and gutters. When it rains, the drainage washes out the ground on both sides of the street.

He also suggested the city should use some of the money to purchase new garbage trucks and increase salaries of those who work in the sanita-

tion and street departments. Akins replied that the \$1.13 million won't go for salaries, only "one-shot

Dorothy Nash started off her wish list with a request for paving, but she added improved housing, demolishing vacant houses, housing for senior citizens, need for recreation in the south and east parts of Midland with places for the family to go, tennis courts, barbecue pits, adequate lighting, renovating Washington Park swimming and wading pools and building a community activity cen-

Joy Bates doesn't live in south or east Midland, she told the council, but she works in that section for the school district. In her opinion, the council's "highest priority should be housing. I've seen rental properties that are really rough and 12 to 14 people in one place. The need for housing has always been urgent, but

it's getting critical. One reason for such run-down rental housing in south and east Midland is because the owners are no longer capable of repairing it, said Mrs. Sheeler. She pointed out two instances in which the husbands are too ill to do

"One woman said she was ashamed to take the rent, but she couldn't turn down the people," she said.

Mrs. Sheeler suggested the city look into a grant-loan program which would allow some landlords the money to bring the property up to government rental standards. The need for day care centers was

mentioned by Mrs. Wetendorf, and

Mrs. Bates suggested a community

center also serve as a center for Mrs. Nash and Mrs. Wright commented that transportation is difficult for some people to find, and they acknowledged that few residents

Before the meeting concluded, Carrillo told the council, "Thanks for considering the funds this time."

A public hearing will be held Jan. 12 in City Hall to review the program put together by the city staff and council

from this citizen input. Retests ordered by school trustees for students who fail skills exam

By DAVID CAMPBELL Staff Writer

Students are required to retake the Texas Assessment of Basic Skills test each year it is presented if they failed it during their freshman year, school

trustees decided Tuesday. The TABS test, which is given to third, fifth and ninth grade students each year, is designed to test a student's mastery of reading, writing and arithmetic skills.

Students must answer a required number of test questions correctly to prove mastery of the three R's. Under present state law, students

have the opportunity to retake the test, but the law does not make it a requirement. However, the option to make it a requirement is left to the local dis-

Most of Tuesday's meeting was allocated to a discussion of student-to-

teacher classroom ratio. An ideal situation is 20 to 23 students per teacher, noted Garland Chapman, assistant superintendent.

Since the district's elementary enrollment, along with the district's budget, is increasing, trustees wanted to increase the pupil-teacher ratio by one pupil.

Should this be accomplished, the

district could realize a savings of \$550,000, according to Chapman. Overall, the average classroom size for kindergarten students per teacher is about 15 students. First grader ratios show about 19 students per

teacher while the average second

grade pupil-teacher ratio is close to 21 The average third grade classroom has about 22 students, whereas in the cluster system which handles the fourth, fifth and sixth grade students, the pupil-teacher ratio is about 1 to

The total secondary ratio shows about 22 students for every secondary teacher, according to the district's Following Chapman's report, trustees agreed that more study by the

district would be needed before any

policy is established regarding class-

Trustees authorized the district to apply for funds to be used in two bilingual education programs for elementary and secondary students who have limited English language skills.

If approved by the federal government, the elementary bilingual program would be funded to the tune of \$200,000 each year for three years. In the secondary program, the dis-

trict is asking for about \$190,000 for the three-year plan. Board members agreed to pay the district's share to pave streets adjacent to school property in north Midland. About \$23,708 would be taken

from the district's reserve funds to

finance the project. The installation of water and sewer lines on the property in the Skyline Terrace West section of the city would be addressed in a bond issue, trustees

presidium drafted seven demands, and Bujak said a "strike readiness alert" would be called at factories in the Warsaw area unless the government agreed to negotiate by noon

Other union leaders said textile workers in Lodz were holding a sit-in in support of Narozniak, and scientists in Wroclaw had written an open letter to the government demanding

Thursday.

his releasse. Another labor dispute that had been causing the government concern was settled early today, but trouble appeared to be developing in the Sile-

sian coal fields. Transport Minister Mieczyslaw Zajfryd signed an agreement in Wroclaw with representatives of railway workers who for the second day shut down commuter lines for two hours in Warsaw and Gdansk Tuesday. The railwaymen were demanding wagescale revisions and exclusive bargaining rights for Solidarity. Warsaw Radio's announcement of the agree-

ment gave no details.

Meanwhile, miners at nine coal pits in the Katowice area struck for two hours, demanding extra pay for work underground.

In addition to Narozniak's release, Solidarity's seven demands on the government included the release of Piotr Sopela, a printer for the prosecutor's office who was arrested in connection with the case; publication of the names of the authors of the document in the case, release of all persons charged with anti-socialist activity, formation of a special parliamentary commission to investigate the police, security services and the prosecutor's office, investigations of 'crimes against workers' during labor unrest in 1970 and 1976, and reductions in the budgets of the Interior Ministry, which controls the police, and the prosecutor's office.

Bujak told a news conference Solidarity would publish the document, and he asked the government-controlled press to do likewise

Thanksgiving ? service set

A service of Thanksgiving will be held at Midland Lutheran Church, 2705 W. Michigan St., Thursday at 10 a.m.
The service will focus on the singing of hymns, with an informal liturgy.

The Rev. Gary Haaland will speak on "A Sermon of Songs." The public is invited to attend. A nursery will be provided.

TO ALL INTERESTED PERSONS AND PARTIES:

You are hereby notified of the opportunity for written public comment concerning the construction permit application No. 1953 by Cities Service Company to install additional compressors driven by natural gas fueled engine at its Roberts Ranch Gas Processing Plant. The proposed location is Midland County, Texas, approximately 12 miles southeast of Odessa, Texas. The facility proposes to emit the following dir contaminants: nitrogen oxides, carbon monoxide and volatile organic compounds.

A copy of all materials submitted by the applicant is available for public inspection at the Texas Air Control Board Region 6 office at 835 Tower Street, Odessa, Texas 79760 and at the Texas Air Control Board, 6330 Highway 290 East. Austin, Texas 78723.

All interested persons shall have 30 days from the date of this publication to inspect these materials, submit written comments to the Executive Director, and/or request notification of the proposed agency action. All comments received in writing by the above date shall be considered by the Board in making its decision on the application. All comments will be made available for public inspection at the Texas Air Control Board office in Austin.

The shootings have drawn criticism in the Israeli

The daily newspaper Maariy, which usually supports stern measures against troublemakers in the West Bank, urged the Israeli military government 'to act with restraint." It warned that shootings would "not only stir passions and inflame tension, buy a hospital body scanner for surgeons treating but will directly serve the interests of (Palestinian guerrilla leader) Yasser Arafat.

McCormack friends gather to bid last farewell

BOSTON (AP) - John W. McCormack, the powerful House speaker who helped guide the social legislation of the 1960s through Congress, was hon-ored by more than 700 people at a funeral Mass in the neighborhood where he was born.

A generation of Massachusetts politicians owe some part of their success to the blunt Boston Irishman, House Speaker Thomas P. O'Neill Jr., said in a eulogy Tuesday.

"He counseled us, He told us how to speak and how to listen. He even told us how to vote," O'Netll

O'Neill and another of McCormack's successors, Carl Albert, were among the politicians at the

funeral in St. Monica's Church. Some Some 700 people heard Cardinal Humberto Medeiros celebrate Mass inside the South Boston church, and hundreds of others stood outside to catch a glimpse of the flag-covered coffin carried by six

soldiers McCormack, a congressman for 42 years and speaker from 1962 until his retirement in 1970, died

Saturday at age 88 'He was concerned with educating the young, feeding the poor and providing decent housing for the

needy," O'Neill said. McCormack became speaker during President Kennedy's term and served through the administration of President Johnson. He supported civil rights bills, housing laws, labor legislation, federal aid to

education and anti-poverty programs. Among those at the funeral were Vice Presidentelect George Bush, the entire Massachusetts congressional delegation and dozens of other congress-

Rank wildcat staked in Presidio

Union Oil Co. of California announced location for a rank 10,000-foot wildcat in Presidio County, 45 miles ast of Marfa.

The prospector, No. 1 Lykes-State, is to be dug 1,627 feet from south and 1,448 feet from west lines of section 2, block 315, GC&SF survey.

SCHLEICHER WILDCAT

A 5,600-foot wildcat has been staked in Schleicher by R. L. Burns Corp. of Dallas.

Thr project, 20 miles northeast of Eldorado, will be drilled as No. 1-68 McAshan.

Location is 660 feet from south and west lines of section 68, block 25, H&TC survey, abstract 1315. Ground elevation is 2,421 feet.

Test site is one mile west of a 6m030-foot dry hole and miles northeast of the Toe Nail (Strawn and Harkey) field.

IRION EXPLORER

MEG Petroleum Corp. of San Angelo No. 1 Marie loelke Baker is a new 7,800-foot Ellenburger wildcat in Irion County, nine miles southwest of Mertzon.

Drillsite is 9,100 feet from the most southerly south line and 1,850 feet from the most westerly east line of For Green County School Land survey.

It is 3/4 mile southwest of the Mertzon (Wolfcamp) il pool. It is separated from the field by the depleted Wolfcamp discovery well.

TOM GREEN AREA

Trepel Petroleum Exploration & Development Corp. of Moore, Okla., announced location for a 6,300-foot wildcat in Tom Green County, two miles southeast of Christoval.

It is No. 2 J. W. Johnson, 2,500 feet from north and 1,700 feet from the middle west line of Thomas McClure survey No. 1827 1/2. Ground elevation is 2,258 feet.

The drillsite is 1,238 feet east of Trepel No. 1 J. W. Johnson, activewildcat, and 3/4 mile southeast of the three-well Mt. Susan (Strawn sand 5350 oil) pool.

NOLAN WILDCATS

A pair of wildcat operations have been staked in

Seagull International Exploration Inc. of Houston will dig No. 1 J. W. Henry as a 7,200-foot wildcat 12 miles south of Sweetwater.

Location was spotted 1,980 feet from north and 660 feet from west lines of section 37, block X, T&P

It is 11/4 miles northeast of the depleted Feathersonte (Strawn) field and separated from it by a 6,835-foot dry

Leger Production Co. of Hamshire announced location for a7,100-foot Ellenburger wildcat three miles south of Maryneal in Nolan County.

Staked as No. 1 Lance Sears, it is 1,787 feet from north and 1,400 feet from east lines of section 116, block 1-A, H&TC survey and one mile west of the four-well Group, West (Strawn) field which produces at 6,085

LEA COUNTY WORK areas have been staked.

Ike Lovelady, Inc., of Midland spotted two of the Lea explorers.

No. 1 Stinnett is to be drilled to 4,800 feet four miles south of Nadine.

The location is 660 feet from north and west lines of section 15-20s-38e and 11/2 miles southwest of the House (San Andres) field. Ground elevation is 3,593 feet.

Lovelady No. 1 Bateman is a 4,200-foot wildcat five miles east of Monument in Lea County. Operator staked location 1,980 feet from north and east lines of section 30-19s-38e and two miles northeast of the Eumont (San Andres) field.

The third Lea County wildcat is Zinke & Philpy, Inc., of Midland No. 1 Speight nd others.

It is to be drilled 1,980 feet from south and east lines of section 60-18s-39e and six miles northeast of Hobbs. Drillsite is 3/4 mile northwest of the Carter (San Andres) field and 1/2 mile south of a 5,301-foot dry

Contract depth is 6,500 feet, and ground elevation is

ARCO Oil & Gas Co., operating from MidInd, staked its No. 1 Langley-Esmond as a 16,000-foot project in the Langley (Devonian and Ellenburger) field of Lea County, eight miles southwest of Eunice.

Drillsite is 660 feet from north and 2,310 feet from east lines of section 23-22s-36e. Loffland Brothers Co. has the contract.

Getty Oil Co. No. 1-21 Getty-State is to be drilled as a 16,700-foot project in an undesignated Morrow gas area of Lea County

Location is 1,980 feet from south and 1,680 feet from east lines of section 28-24s-33e and 25 miles west of

MARTIN STEPOUT

McCormick Operating Co. of Houston announced location for a 7/7-mile southeast stepout to the lone well in the J.L.M. (Mississippian) field of Martin County, 19 miles northeast of Stanton.

The project, No. 1 D. Riley, is 660 feet from north and west lines of section 62, block A, Bauer & Cockrell

Contract depth is 11,500.

Costa Resources, Inc., of Dallas No. 2 Adams is to be drilled as a northeast offset to the discovery well and lone producer in the Costa (Tubb oil) pool of Crane County, four miles northeast of Imperial.

Location for the 4,500-foot test is 660 feet from northeast and 2,270 feet from northwest lines of section 23, block 3, H&TC survey.

ECTOR LOCATION

Laguna Petroleum Co. of Midland No. 1 Parker Estate is to be drilled as a 6,500-foot project in the Lawson (San Andres oil) pool and the Tom Roberts (Clear Fork oil) field of Ector County, 11 miles southwest of Goldsmith

Location is 550 feet from north and 1,980 feet from west lines of section 8, blck 44, T-2-S, T&P survey

Three wildcats and projects in two Lea County field

U.S. petroleum inventories decline

WASHINGTON D.C. - U.S. peleum inventories (crude oil and oducts) declined about 15 million the month they were still roughly 75 million barrels above normal, the American Petroleum Institute report-

According to the API's Monthly Statistical Report, petroleum inven-tories at the end of Oct. totalled an estimated 1,315,800,000 barrels, a drop of 1.1 percent from the end of Sept., but a 6.3 percent increase over the total for the end of Oct. a year

The report noted that crude oil in-ventories at the end of Oct. were estimarted to be 391.8 million barrels, a 13.7 percent increase over a year earlier, and about 55 million barrels above the upper boundary of the De-partment of Energy's average range of coperating inventories.

Motor gasoline inventories at the end of Oct. were estimated at 248.8 million barrels, a 14.0 percent increase over the same date in 1979, and about 17 million barrels above nor-

Exxon reports tanker plan

HOUSTON — Exxon USA's Marine Department announced plans for a \$100 million program to modify five of

Newport News Shipbuilding in Newport News, Va., will do the work. Modification is expected to be com-pleted by mid 1981.

The five tankers — the Exxon Balti-nore, Exxon Boston, Exxon James-own, Exxon Lexington ad Exxon ashington — range in capacity from 0,000 to 300.000 barrels.

The tankers have been used prinarily to carry crude oil and petrolem products along the Gulf and East casts. After modification, they will be used to move oil from the Homndo eld in the Santa Barbara Channel of California to Exxon's Baytown, l'exas, refinery.

The first of the tankers to be refitthe Exxon Lexington, has arrived at Newport News.

Stocks of distillate fuel (home heating oil and diesel fuel) were estimated at 229.7 million barrels at the end of Oct., a drop of 0.6 percent from a year earlier. The report added: "While this decline is contrary to normal seasonal stock movements, the current level is about normal for this time of year."

The report also gave these estimates for the month of Oct.:

- Deliveries of motor gasoline from primary storage averaged 6.-448,000 barrels per day (bpd), a drop of 8.2 percent from last Oct.

- Deliveries of distillate fuel oil from primary storage averaged 2,-866,000 bpd, a drop of 7.7 percent from

 Total domestic petroleum deliveries from primary storage were 16,795,000 bpd, a drop of 7.6 percent from a year ago.

 Domestic crude oil production averaged 8,614,000 bpd, an increase of 0.5 percent over last Oct.

- Crude oil imports averaged 4,-764,000 bpd, a drop of 30.5 percent compared to last Oct.

- Petroleum product imports averaged 1.578,000 bpd, a drop of 11.6 percent compared to last Oct.

Heating oil prices climb

NEW YORK (AP) - The price of home heating oil is continuing to climb as winter nears.

Standard Oil Co. of California's Chevron USA division said Tuesday it increased wholesale home heating and diesel fuel prices as much as 2 cents a gallon in several sections of the country.

Dealers may pass the wholesale price increases on to consumers. A 2 cents-a-gallon boost would mean an increase of \$22 to \$24 dollars over the heating season for the average homeowner in the Northeast who uses oil for heating, according to National Oil Jobbers Council consumption statistics.

Jerry Martin, a spokesman for the San Francisco-based Chevron, attri-

buted the company's move to "increasing costs of raw materials, primarily crude (oil)," and to "the higher cost of finished products purchased by Chevron to supplement re-

finery production" in the East. The announcement by Chevron, a subsidiary of the nation's fourth-largest oil company, followed increases of as much as 3 cents a gallon by several other major refiners this month

Heating oil prices have been climbing recently, after remaining virtually steady since early spring, amid rising domestic crude oil prices, nervousness over an extended cutoff of Iranian and Iraqi oil production and colder-than-normal weather in the United States.

Operation gets certification

Austin Bureau

AUSTIN - The Railroad Commision of Texas has certified an ARCO Oil and Gas Co. operation in Crane County as Texas' first qualified tertiary oil recovery project under the federal crude oil "windfall profits"

The project is located in the Block 31 (Devonian) field and encompasses 7,840 acres of University of Texas

Under a three-part RRC-approved expansion of ARCO's existing miscible gas displacement program, ultimate oil recoveries from the unit are projected to increase by 10 mill barrels to 43 million.

Production from qualified tertiary projects can be sold at uncontrolled market prices and taxed at a lower rate than oil produced by primary and secondary techniques.

"The proposed expansion of the miscible displacement tertiary recovery process presently being applied at the Block 31 (Devonian) Unit reasonably can be expected to result in more than an insignificant increase in the ultimate oil recovery," the RRC said in its certification order.

The project is expected to recover oil trapped due to poor permeability development and oil in unswept

DRY HOLES
