Family heritage items accent upcoming pageant

Plan to be in Robert Lee on Friday and Saturday of the last two weekends in July to attend OLE COKE COUNTY. Home of the Rabbit Twisters! On those nights, July 20, 21, and July 27, 28 the best show of the year can be seen at Mountain Creek Amphitheartre, located between the two ball parks on the north end of Austin Street.

The annual production involves more than a hundred citizens from Bronte, Robert Lee, and the surrounding county area, all native Rabbit Twisters or adopted by marriage or a move into the county. Experiences of pioneers and ancestors are portrayed from Chief Sanaco's Comanche camp in 1854 through the coming of the first train into Bronte in 1909.

Much work has gone into improving the theatre on the banks of Mountain Creek, transforming the site to extend the feeling of stepping back in time with weathered wood buildings on Twister Avenue. Family heritage items have been donated to accentuate that feeling, such as the windmill and well donated by Dr. and Mrs. Phil Ray from the Pat Havins place which they bought; the Kathryn Hoots house with its original Seven Sisters Rose bush donated by Mr. and Mrs.

Jimmy Bickley; the concession stand constructed from old buildings in Coke County and donated by Teddy Pitcock and Gary Williams; and the Martin Casey building donated by Jim and Sharon Naico; and the aged outdoor toilet donated by Reba Tabor. All such donations are appre-

The pageant, originally written by Lucile Bryan as a U.S. Bicentennial project, has expanded through the ideas and scripts of younger writers. Every year's production includes such new scenes. The upcoming program includes new scripts written by Lynn Green (Burnt Biskets), Johnny Millican (Pioneer Tall Tale), and Don Fields (Kate's Daughter Visits the Gossips).

Attending rehearsals is more fun this year because of the outstanding sound effects provided by Lenard Horwood of Sterling City. The stampede during Coffee Pot Economy, the "cyclone" during They Came To Stay, and the train in But Bronte Got the Railroad are worth coming to hear. Prepare to feel you are living the experiences with the people portrayed on

Abandoned wells concern directors

The Coke County Underground Water Conservation District Directors held their regular board meeting on July 9, 1990 in Robert Lee.

The bills were reviewed by all present and approved for payment. The Financial Statement was reviewed and accepted as presented.

The Monthly Manager's Report was presented to the Board with the following items emphasized: 1. Water samples were collected from 9 wells; 2. Water quality reports were made on 6 wells; 3. A landowner contacted the district about un-plugging oil wells and an oil pit that is unlined and has a potential of contaminating surface and groundwater aquifers; 4. A landowner contacted the district about a water well with excellent quality water being contaminated with a foreign substance of some kind. Several water analyses will be made to try to determine what is in the water; and 5. Two well drilling permits were approved during the month.

Another concern the district directors have is the problem of open holes or abandoned wells. An open well shall mean any artificial excavation drilled or dug for the purpose of producing water from the underground reservoir which is as much as 10 feet deep and not more than 10 feet in

Murtishaw celebrates 98th birthday

The family of Grace Murtishaw had a 98th birthday party for her at the Senior Citizen Center at Robert Lee on June 23 and 24, 1990. Mrs. Murtishaw was born June 14, 1892 at Bronte to William M. and Hannah E. McCutchen. She moved to Robert Lee at age seven when her father was elected Tax Assessor. For healthy adults, the risk of contracting Salmonellosis from raw or undercooked eggs is extremely small, but others are vulnerable to this

The very young, the elderly, pregnant women and people with weak immune systems due to illness are more susceptible to food-borne illness.

Eggs are perishable and should be properly stored and cooked to prevent the growth of potentially harmful bacteria, such as Salmonella enteritidis.

Always keep eggs refrigerated before preparation. They should not be stored at room temperature or allowed to sit for more than two hours before or after cooking.

People in the high-risk category for food-borne illness should take these special precautions:

· Avoid eating raw eggs and foods containing raw eggs such as home-made ice cream, Ceasar salad and Hollandaise sauce. Home made eggnog and home-made mayonnaise also should be

Final payment made on church minister's home

The Southside Church of Christ, in Robert Lee, made the final payment on their minister's home in June. The house, located at 510 Overland Trail, was purchased from Steve Oleksiuk by the church in the latter part of 1983. At that time, a 15 year mortgage was agreed upon with the Robert Lee State Bank. However, various special contributions by individual members and the congregation as a whole allowed the note to be paid in less than 7 years. The elders of the church have expressed their sincere thanks and gladness to the congregation and to God that this goal has been reached. Those serving as elders include Bill Brown, Bruce Deere, Bill Green, Jerry Horn, and Benny Rogers.

Mt. Creek ABC winners posted

J & B Lumber and Clendennen, Inc. hosted the Saturday, July 7, ABC golf tournament at Mt. Creek golf course in Robert Lee.

The sizzling 61 win on a hot day went to Glenn Jones, Randy Bolf, Lynn Harriet, and Allan Rowoldt. Bill Rowoldt, Randy Smith, and Robert Harris combined for a 66 for #2. A 67 score was third by Jason Herring, George Rodriquez, and Don Scott.

Coming up at the local course this weekend is a 4man-2-day select shot event on July 14 & 15. Tee-off time on both days will be 8:30 and avoided, but commercial forms of these products are safe to serve since they are made with pasteurized eggs. Commercial pasteurization destroys Salmonella bacteria. Cook eggs thoroughly until both the yolk and white are firm, not runny, to kill any bacteria that may be present. There may be some risk in eating eggs lightly cooked -soft-cooked, soft-scrambled,

or sunny-side-up.

 Eating lightly cooked foods containing eggs such as soft custards, meringues and French toast also may be risky for people with weakened immune systems and other high-risk groups.

Don't think you have to give up eating eggs, altogether. Eggs provide a wholesome source of high quality protein, vitamins and minerals and can be used safely in the diet if you follow precautions.

July 3. Undetected for a time due to the masonry construction and tin roof, the structure was lost by the time volunteer firemen arrived. Cause of the blaze was undetermined, possibly faulty wiring, according to firemen. The house, owned by John Delk of San Angelo, was occupied at the time but no one was present at the time of the fire. Ruins of the house, deemed dangerous, were roped off and warning signs posted. 27 volunteers

Twenty-seven people generously volunteered to donate and 18 units were actually collected at the community blood drive held two weeks ago at AmWest Savings in Robert Lee.

Each unit will be separated into several components, and these components in turn will help many patients. In the 21 hospitals served in this area, more than 75 units of blood are needed each day. The community blood program's success depends on the caring actions of volunteers and without them this need would never be met.

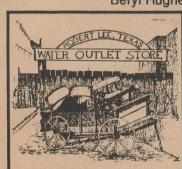

A very special thank you to all the volunteers and also to those who provided refreshments.

Hickman family reunites in San Angelo

by Bill Foreman The family of Ed and Malindy Hickman met for their annual reunion Saturday evening, June 30 and Sunday, July 1, at the Days Inn Motel in San Angelo. Several members of the family who live away spent Saturday night

For many years the family met at the Rec Hall or what is now known as the Robert Lee Senior Center until they outgrew the building. The only year we did not meet was in 1963. We lost our Dad, June 15, 1963 the day before Father's Day. Mom's 90th birthday was there. The building holds alot of memories for us.

Several family members were unable to attend due to illness. Lee Richards had gotten out of the hospital Wednesday night before the reunion, but at this time she is

back in St. John's Hospital. We are hoping for a short stay.

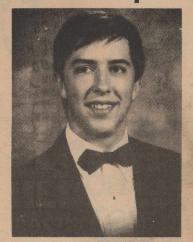

Those attending were: Ruth Sandusky, Willie (Bill) Foreman - Bronte, Lee & Hadley Richards - Robert Lee, Ed & Billie Hickman - Killeen, Johnny & Virginia Hickman -Big Lake, Fred (Pete) & Betty Hickman - Ft. Stockton, Georgia Higginbotham - Robert Lee was unable to attend, W. A. J., Jeremy & Jeffery - Ft. Stockton, Nancy, Bobbie, Davie, Tammy, Monica, & Jason - Ozona, Jerry Mead & Ashley - Mesquite, Bill Holmes & Leeann - Odessa, Finis & Wilbern Millican visited in the evening.

A wonderful day was enjoyed by all and we're looking forward to another reunion next year - 1991.

Night skiing is illegal

What you don't see after sunset could hurt you, say boater education officials of the Texas Parks and Wildlife Department.

"Some people who water ski or operate jet skis or wet bikes may not be aware that it is against the law to pursue those activities at night," said Jack Nasworthy, boater education coordinator.

Nasworthy noted that "personal water craft" such as jet skis may not be operated at any time between one-half

The 4th of July Party and fireworks display at the Bronte Nursing Home was a huge success.

Ice cream and watermelon were served to over 200 people according to Pam Stokes, Nursing Home Administrator. Approximately 250 watched the display of fireworks as they were conducted by Darrell and Rowland Sowell, Bruce Sonnenberg, and Royce Dyess.

Many thanks to those who donated ice cream and watermelons and helped in other ways to make the party a success.

Personal

Bob and Sonja Blackwood have returned from a twoweek trip to Sacramento, California, where they attended a reunion of her father's family.

En route, they saw two big forest/range fires and many orange and vegetable farms

They also saw snow at Emigrant Pass, Utah, and at Lake Tahoe, Nevada.

Violation of these regulations can bring a fine of up to \$500, or worse, cause a fatal accident.

Nasworthy recommends that if you feel it is necessary to operate a boat at night, be sure the craft's running lights are in good working order, wear a personal flotation device, reduce speed and keep a sharp lookout.

For additional information on boating safety or to locate a boater education course in your area, call Nasworthy tollfree at 1-800-792-1112, or (512) 389-4372.

Stenholm explains vote on flag burning

Dear Editor:

On June 21, I cast the toughest vote in my 12 years as the elected representative for the 17th District of Texas. In response to the Supreme Court's ruling that burning the American flag is protected by the First Amendment of the U.S. Constitution, the U.S. House of Representatives decisively voted to respect the court's decision and did not amend the Bill of Rights. I voted for the Bill of Rights and against the constitutional amendment, and would like to take this opportunity to discuss my vote.

The reason this vote was so tough is because it makes me very angry when I see anyone, especially an American, exhibiting disrespect for our great nation. No adjectives are adequate to capture the temperature-raising, bloodpounding rage I feel when I think of a flag being burned.

Regardless of my emotions toward those who would defile the flag, I believe that the U.S. Constitution protects those few individuals who in their demented way must express their contempt for the

government that gives them those rights. Conservative Justice Anthony Kennedy stated it best when he wrote, "It is poignant but fundamental that the flag protects those who hold it in contempt." I know that some people do

not agree with the position I have taken on this issue, and that some will call my position un-American or un-patriotic. I disagree, but I respect their right to that opinion, and to disagree with their elected representative. That is a right which is uniquely American because of the Bill fo Rights.

I deeply respect and am indebted to the thousands of men and women who have sacrificed their lives defending America's gleaming shores from oppression, intolerance and ignorance. Did they die protecting the flag? If they did, was it for a piece of cloth or for what that cloth symbolized to them? Did they not die to ensure that their children and their children's children would live in a free land protected by the Bill of Rights?

This is not an attempt to apologize or make an excuse

for my vote against amending the constitution for the flag. believe that the position have taken is the correct one, and I believe it is the position the majority of my constituents have taken after reflecting on what the flag and, even more importantly, the Bill of Rights means to us all.

> Sincerely yours, Charles W. Stenholm

Bugs gobble up oil spills

Some news reporters laughingly refer to them as the "Texas bugs" that saved the Gulf of Mexico.

But the oil-eating microbes introduced to the world in the wake of the Mega Borg oil tanker incident are no joke. They are serious about gobbling up oil. They eat it like a kid with a sweet tooth going after chocolate pie.

Tests conducted by the Texas General Land Office and Alpha Environmental, an Austin-based firm that developed the microbes, have indicated they can be effective against oil spills that threaten one of Texas' most precious natural resources -- its Gulf Coast beaches.

Land Commissioner Garry Mauro, who manages 20.5 million acres of state-owned and state mineral-right lands, including 4 million offshore acres and the beaches, bays and estuaries, became intrigued by the microbes about a year ago after meeting Dr. Carl Oppenheimer, a University of Texas microbiologist and oceanographer.

Dr. Oppenheimer has toured the world seeking out naturally occurring microbes that seemed to have a particularly voracious appetite for oil. He also developed a process to freeze-dry them into a powder for easy storage and transport. And he has a catalyst that causes them to quickly multiply.

Trillions of them can easily fit into a hand-sized packet. A hundred pounds of them were used in a special test in the Gulf in the wake of the

Mega Borg oil spill.

"Sometimes you have to believe your eyes,' said Mauro. "After a few hours, there was no more oil in the test area."

Mauro cautions that additional scientific analysis is needed. But he is convinced that more emphasis should be put on technology in combatting oil spills, and that the microbes ultimately will become useful tools to keep Texas beaches clear of contamination from spills.

In the meantime, the commissioner wants everyone to know that the "bugs" are otherwise harmless. They will not creep up onto the beach and eat the sun-tan lotion off your back. They metabolize crude oil into fatty acids which are then eaten by marine life, causing no harm to the food chain

The "Texas bugs" could become the basis for a new Texas industry and the state of the art in fighting oil spills.
