Their View

Sex education deserves priority in public schools

Megan Clark/ed itor

It seems there are some people in California who ought to be living in Lubbock, one of the most conservative areas I have ever lived in.

And, no, there's nothing wrong with being conservative, but some beliefs are OK only to an extent.

You see, in Thermal, Calif., a 15year-old high school student won first place: in her school district's science fair for a project that tested condom

reliability. That's right. Shari Lo tested which condoms are better than others and safer to use. She wasn't promotin g promiscuity or encouraging her fellow students to run out to the local drug; store and buy a multi-pack of Trojans.

She simply put six different brands of condoms through strength, endurance and temperatures tests. Don't worry, there was no sexual experimentation involved. Lo couldn't tell you which condoms enhance pleasure or anything like that. This was simply her science project focusing on an issue that is important for people of all ages to know about.

Lo said she conducted the study be cause she is concerned about AIDS and teen pregnancy.

Although Lo did bring home the first place: trophy from her school district fair, she was refused entry to the regional fair because of a sex education policy promoting abstinence as the only solution to fighting sexually transmitted diseases and pregnancy.

District officials claim they promote abstinence because condom use promotes sex, even if it is safe.

Please.

When are people going to wake up and realize that teen-age sex is going to happen and that ignoring the situation is not going to help. However, if people are educated about the responsibilities and issues that go along with sex, they will be able to make better choices for themsel ves.

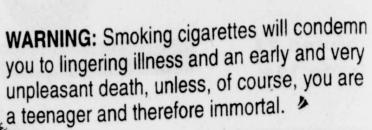

Sex education belongs in family homes and in public schools. Education, in any form, needs to start within the family unit. But as families change and grow, so should school districts' policies tow/ard sex. There are too many teenagers, and children in some instances, transmitting STDs and becoming pregnant because they are not properly educated about health-related issues.

Public schools should not be a baby-sitter in any sense of the word. That's not fair to teachers or school administrators, but someone has got to pick up the slack. If students are not being properly informed about abstinence, birth control and STDs at home, they should be in school.

And one day set aside during a high school health class is not enough. AIDS and pregnancy are reality for too r nany across this nation, and regardless of religious or social values, people need to realize that.

Austin American-Statesman on

Having gotten a large bite of the apple in the 1995 legislative session, tort "reformers" are back for another. But the Legislature ought to wait and see if consumers finally start getting their full slice of the apple - benefits they were supposed to reap for having the number and size of lawsuits curtailed.

so-called tort reform:

Texans for Lawsuit Reform put up a passel of bills this session alleged to "maximize the benefits of all Texans sion. business professionals,trade groups and consumers alike," the group stated in a cover letter to an analysis of its new agenda. The letter also promised that the group was "performing indepth background research as well, to insure that each initiative has a solid foundation in both the law and common sense."

But despite all that effort, at least one of the initiatives contained an enormous loophole that would have enabled nursing home owners to escape liability for the criminal acts of employees who hurt patients. ...

Maybe the savings will increase down the road, if fewer lawsuits result in more savings to corporations

unless consumers see more dramatic

Fort Worth Star-Telegram on allocation of high-definition TV chan-

There are plusses and minuses if the federal government gives broadcasters the TV channels needed for high-definition digital television signals - the next generation of televi-

Broadcasters feel they were promised the airwaves free, and plead that they have spent a lot of money developing the higher-quality TV technology. Also, the government would have more leverage over use of the "public airwaves" than it would if those airwaves are sold. Those are among the reasons for giving away the channels.

On the other hand, selling these frequencies to the broadcasters - who will then make fabulous profits from them, not only for standard TV but also for data transmission and other commercial uses - could raise somebillion for the public good.

We tend to agree with former Sen.

and insurers. But lawmakers ought to Bob Dole and the public interest group hold off on more "reform" until and Common Cause — an unusual combination — that it is in the taxpayers' interest for the frequencies to be sold, and that a giveaway would be perceived by many as a rip-off.

At the very least, the decision should be delayed and Federal Communications Commission ground rules firmly established for use of the new channels, because this is a matter of immense public importance.

The Dallas Morning News on the and the Economy. State Board of Education:

One thing can be said for certain. State Board of Education meetings are no longer dull.

The usually calm sessions have been turned upside down by heated charges that a national public education conspiracy is about to infiltrate the

Texas schools. Six board members, supported by Christian conservatives, are fighting a new curriculum plan on the basis that it will tie this state's schools to "liberal" national education standards.

The six also claim technical courses where between \$11 billion and \$70 recommended for the curriculum are an attempt by industry to have available cheap labor.

The Texas Business and education Coalition, a group of educators and top business executives, is infuriated by the charges. And rightly so. The coalition sup-

ports courses that help high school students prepare to enter the work force. But the organization also strongly supports greater math, education and science requirements.

Another false claim is that the new curriculum can be linked to one source - the National Center on Education

The center was retained to help develop the curriculum standards. But dozens of committees and scores of educators and private citizens spent months drafting the document.

The conspiracy theorists are jeopardizing the board's most important assignment in years.

Nothing is more critical to public education than clear guidelines, outlining what students are expected to

The board will take up the first section of the Texas Essential Knowledge and Skills plan on April 9.

The State Education Board should use this meeting to get back on track. The new curriculum deserves to be adopted. .

Junction Center registration today

Campus near San Antonio offers hands-on experience, summer retreats

by Tomi Rodgers/UD

Students interested in taking an intensive summer session to gain firsthand experience can register beginning today for classes offered through Texas Tech at a campus in Junction.

Registration for the intersession, which runs from May 8 through May 22, will occur from 9 a.m. to 2 p.m. today in the west foyer of the University Center. The Junction campus also offers a summer session from June 8 through Aug. 1

Tech's Center at Junction's intersession provides students with the opportunity to finish a class in 14 days, while providing hands-on experience not always accessible in the normal classroom setting, said Betty Street, assistant director of the Junc-

tion campus, which is located 120 miles northeast of San Antonio.

Students must receive permission from the instructor to enroll in a Junction class, even if they are not registered Tech students.

The Junction campus is used throughout the year for various activities, including retreats and seminars. The campus primarily is used in the summer months by Tech and the Texas Tech University Health Sciences Center for classes designed to allow students do class work outside and in a less structured environment.

"The classes give a more intensive study," Street said. "It gives students the chance to do actual field work."

Courses offered during the intersession include mammalogy,

physical geography, photography, omithology, herpetology, field ecology and community studies.

The summer session offers a greater variety of classes, including courses in biology, health planning, a golf workshop and several art classes, ranging from papermaking and waterbase screenprinting to kite and jewelry design. The concentrated courses meet seven days a week.

The courses offered at Junction give students a more intensive chance to learn the aspects of a course that most students miss in the average classroom, said some professors.

Tech biology professor Kent Rylander previously has taught omithology at the Junction campus and will continue to this summer.

Rylander said it is an exciting way to teach biology because students are exposed to the field conditions and out with the wild animals

"In omithology we're out in the field for many hours and can concentrate on bird songs and other aspects of their behavior that we can't cover as well in the classroom," Rylander

"It's an ideal way of teaching natural history because you have so many animals in their habitat that can be studied."

The campus also provides graduate courses in science and art, as well as opportunities for noncredit learning, such as a spring art retreat April 18 through April 20 and an international kite retreat May 23 through 26.

Student organizations receive leadership tips

Students and student organizations interested in receiving information about the new registration renewal process for their organizations are encouraged to attend Leadership Tech from 6 p.m. to 9 p.m. today in the University Center Allen Theatre.

The event will provide student leaders and advisers with the opportunity to learn the benefits of being a registered student organization, as well as learning about ways to improve organization communication.

Award packets also will be available for Tech's annual leadership award. Students can pick up the packets to nominate outstanding student organization, leader of fun," DiAndreth-Elkins said

the year and outstanding student organization adviser.

Leann DiAndreth-Elkins, assistant coordinator of student activities, said the event will offer students and advisers the opportunity to learn about the new direction student organizations are moving toward.

"The event is most important for student organizations and students interested in forming an organization to attend," DiAndreth-Elkins said.

The event will feature a keynote speaker and give-aways of gift certificates, T-shirts and pizza at the end of the evening.

"It will be informative, but also

Hub City crowns new Miss Lubbock

by Laura Hensley/UD

When Amanda Little was 13, she entered her first beauty pageant. Today, she describes her young beautyqueen efforts as a miserable failure. Although Little was devastated, her competitive nature would not let her give up — she was hooked on beauty pageants.

"I don't think of myself as a pretty person," said Little, selected Miss Texas USA 1997. "I'm just me."

This blonde, blue-eyed Dallas resident has spent a whirlwind year touring Texas and stopped in Lubbock this weekend at the Holiday Inn Civic Center, 408 O Ave., to crown Miss Lubbock from 11 participants.

Anissa Craven, the 21-year-old daughter of Sandra Craven and the late Frank Craven, was named the winner. She will participate in the Miss Texas USA pageant at South Padre Island in June.

Craven also will receive a prize package worth more than \$4,000, including a \$1,000 scholarship.

TechLife

Craven graduated with a degree in criminal justice from South Plains College, where she currently is pursuing a degree in telecommunications.

Jefferys Texas Tech student Mandy Jefferys, a sophomore interior design major from Midland, was named first runner up and received an individual swimsuit and congeniality award. She also will participate in the Miss Texas USA Pageant in June.

"I think pageants are very impor-

tant," Jefferys said. "They are not the and to have new adventures," stereotypical things people think they are. They are very character building and are great scholarship opportuni-

Jefferys has been involved in pageants for several years and has received enough scholarships to fund her college career.

"Pageant girls aren't the stereotypical dingy girls everyone thinks," Jefferys said. "They are some of the most intelligent girls you'll find at

Seven women from Tech com-

peted in the Miss Lubbock Pageant. Some were experienced pageant veterans, and for others, it was their first try at pageantry.

Kimberley Brownlee, a freshman theatre arts major from Jayton who was third runner-up, enjoyed her first experience in a pageant.

"I am a person that likes challenges

Brownlee said. "I have never done a pageant, so I tried to do one. It's been a very positive experience. It's nothing like I expected. I thought there would be more pressure and, actually, it was pretty laid back."

Brownlee, as well as the other competitors, has received free training from K & M Glamour, the company that directed the show.

"The directors are super," Brownlee said. "They deserve all the

Kathy Bouldin, executive director of the pageant, has been involved in pageants as both a director and a mother of a competitor.

"The pageant is a chance to make girls feel as beautiful as they should feel," Bouldin said. "Every girl here has a heart of gold.

"If I could give everyone of them a crown here tonight, I would."

Demolition crew believes spirit lurks in old store

Unexplained slamming doors, disappearing tools and misplaced voices and footsteps on the fourth floor of a 94-year-old building are giving a demolition crew the creeps.

After six weeks of spooky reports, D.J. Demo President Ralph Unis is considering hiring a psychic to come to the former Troutman department store this week. Rumors of an old suicide or murder on the fourth floor also are circulating.

"It's scary, this fourth floor," Unis

Unis' Braddock-based company is

CONNELLSVILLE, Pa. (AP) — scheduled to finish knocking down the six-story, brick building in downtown Connellsville by the end of April. The fourth floor is the next to

> Since work began in February, several workers have reported doors slamming and a cold spot at the entranceway to the fourth floor.

> In one case, employees were unable to open the unlockable door to the fourth floor. After retrieving tools to pry it open, they returned to find the door wide open, Unis said.

> Employee Harold Palinski said he once dropped a sledgehammer on the

fourth floor, but couldn't find it when he went to pick it up. Other workers have reported tools missing and later found them in unlikely spots, he said.

Nobody on the crew could recall being on the fourth floor when several boards were tossed from it, nearly hitting workers outside, Unis said.

Add to that the report of a night watchman who, according to Unis, said he heard voices and footsteps, but found no intruders.

Unis calls the spirit "the man on the fourth floor.'

University of Pittsburgh psychology professor Donald McBurney calls

Monday - Friday We're right across from Texas Tech 2419 Broadway 763-1159

HOURS:

Friday

7am-7pm

it nothing more than a collection of convenient tall tales.

People often feel compelled to come up with supernatural reasons for out-of-the ordinary events that have no explanations, McBurney said.

Fingering a poltergeist is an easy explanation when employees forget they moved their tools or tossed some boards. And the entrance to the fourth floor may be cold simply because it is poorly insulated, McBurney said.

McBurney is not the only skeptic. City historians, librarians, government officials and former Troutman's employees are unable to recall previous spirit sightings or even deaths in the building.

"I've been here all my life, and I don't know everything, but when there are spooky places, you definitely hear about them," said Bill Balsley, 81-year-old founder of the Connellsville Historical Society.

Tech softball team drops first Big 12 games

by Christy Apple/UD

The Texas Tech softball team realized this weekend that it is going to have to learn to play with the big girls in order to win the Big 12 Conference. Tech dropped its first four conference games to Missouri and Kansas.

The Red Raiders entered league play on a five-game winning streak, but they dropped two games to Missouri Saturday, 10-0 and 10-4.

Junior center fielder Denise Jackson said Tech was ready for the Big 12 but did not expect what happened.

"It hurt the whole team because it was a different caliber of teams," Jackson said. "We just need to grow up from here."

Jackson was one of two players to. hit a home run in the first Big 12

Sophomore designated hitter Lora DeLashmutt also hit a home run as Jackson and DeLashmutt were the only two Red Raiders with RBIs in the second game against Missouri.

"She was a big leader this weekend," Jackson said of DeLashmutt. "She showed it in both defense and offense."

Tech struggled Sunday in the second day of conference against Kansas with 7-0 and 7-4 losses.

The Red Raiders got a bittersweet taste of the type of teams that make up the Big 12.

Freshman third baseman Tamara Harrington said the Red Raiders realized they need to work on defense and playing the whole game mentally.

"It was an awakening for us," Harrington said.

"We found out a lot of stuff we

need to work on - defense mainly." In both doubleheaders, Tech never quit hitting even though it was down,

Jackson said.

Tech's ability to score eased the disappointment of the conference losses, she said.

"This shows that we kept trying to fight back as much as we could," Jackson said.

"I think it showed a lot of pride

because we want to be able to come

Sports

Harrington said the Red Raiders have had a hard time playing at home

Harrington also said that since they do play the next six games on the road, she hopes the Red Raiders' luck on the road stays the same.

Harrington said the team believes that even though it was frustrating losing at home, it will turn into a motivating force.

"We never had played real well at home," Harrington said.

"It is a little discouraging. These losses will motivate us more when we get on the road."

Track fact: Texas Tech men's track coach Greg Sholars has a history of success on the track that dates back to his high school days in Fort

In 1984, he was the nation's top sprinter and clocked a 9.9 second finish in the 100 meters, which is currently a Texas state record.

At Texas Christian University, Sholars was a four-year letterman in track and was a seven-time all-American sprinter as a member of TCU's record-setting 4 x 100 meter relay that was clocked at 38.23.

Track teams run past opponents in home outdoor meet by Christy Apple/UD

Taking a breath of fresh air seems to push the Texas Tech track teams to a new level of running.

The Tech women competed in a dual meet against Stephen F. Austin this weekend at the R.P. Fuller Track Stadium, winning the meet, 108-63.

The Red Raiders set a school record in the 4 X 100 meter relay,

46.75 set in 1980. Senior Jennifer Wright, junior Kaneshia Polk, sophomore Cory Weathers and junior Ami Peters took the honors with a time of

"We were pretty surprised because we had a triple jumper, hurdler, 100meter runner and a 800-meter runner all running," Peters said. "We really had not worked that much on handoffs

Senior Alexia Jones also set a school record in the hammer throw with a toss of 136-1.

Tech coach Liz Parke said she was pleased at the way her team competed in the Red Raiders' first home out-

"It just lets us know that we are doing some really good stuff," Parke said. "We are just reaping some benefits of our hard work."

The Tech men finished in first place after running against Abilene Christian and South Plains. Tech took honors in all of the sprinting events and had a solid finish in the relay

The men's domination of the sprint events came with Pap Howard finishing first in the 100 meter with a time of 10.26, and Howard winning the 200 meter with a time of 20.91.

breaking the long standing record of either, so it was real exciting." Men's golf team continues

season-long struggles on links

The Texas Tech men's golf team spent its Easter break in Pottsboro, battling 19 other collegiate teams in the Dr Pepper Intercollegiate.

Competing teams played 54 holes, 36 Saturday and 18 Sunday, at the par-72, 6,993-yard Tanglewood Resort in Lake Texoma.

As has been the case in almost all the previous tournaments for the Red Raiders this spring, they struggled in comparison with the rest of the field, this time to a 16th-place finish.

Southern Methodist, which played host to the tournament, took home the team title by 27 strokes over Northwestern and 61 strokes ahead of the Red Raiders. It was the second consecutive victory in the tournament for the Mustangs, who shot a tournamentrecord 863 as a team. The total also Tom Baldwin and Sean Mulherin.

marked a school record for the Mus-

Tech has three tournaments remaining before the NCAA Central Regionals, May 15-16. Before the Dr Pepper Intercollegiate, men's coach Tommy Wilson said the Red Raiders' hopes to qualify for the regionals are

"Last season, we lost a lot of scoring punch when Bryan Novoa and Chris Mathis left," Wilson said. "This year, we are having problems getting consistent scoring from the No. 2 and No. 3 spots on our team."

Senior Patrick Barley entered the tournament as the No. 1 scorer for the Red Raiders, and he finished 17 over par, in a tie for 59th place.

Barley was outdone by teammates

Raider baseball team passes test against Oklahoma State

Oklahoma State's second baseman attempts to flag down the errant throw.

Slip and slide: Tech junior Jason Landreth slides into second base as

by Charles Melton/UD

The No. 7 Texas Tech Red Raider baseball team battled injuries and a tough Oklahoma State team in winning a key Big 12 Conference series this weekend at Dan Law Field.

"You can't be anything but proud of these guys for the adversity that they dealt with this series," said Tech coach Larry Hays.

Tech had great efforts from several players who played with injuries, Hays said.

The Red Raiders (25-6 overall, 9-3 in the Big 12) kept themselves in first place in the Big 12 standings with Sunday's 7-6 win.

Tech jumped ahead of Oklahoma State in the first inning on a three-run blast by freshman catcher Josh Bard that made the score 3-1. Monday,

Bard was named the Big 12's Player of the Week for his efforts last week.

The Red Raiders added a run in the third on a RBI double by senior first baseman Joe Dillon. Tech scored three more runs in the fourth on a two-run double by junior left fielder Shane Langen and an RBI ground out by Dillon to make the score 7-3.

Then the Cowboys rallied to score two runs in the sixth as reliever Elvis Nina shut down the Red Raiders' offense for the last four innings of the game.

Tech sophomore right-hander Brad Ralston, who allowed one run on five hits, appeared to be in trouble in the top of the ninth inning.

After allowing a single to start the inning, Ralston struck out Oklahoma State's Eric Nelson and gave up another single to Billy Gasparino putting runners on the first and third with one out.

Ralston struck out Josh Holliday before giving up an RBI single to Rusty McNamara making the score

Ralston then struck out Jeff Guiel to preserve the victory for Tech.

After the game, Ralston said he wasn't too worried in the ninth inning because the Cowboys weren't hitting the ball too well.

"It feels pretty good to take 2-out-of-3 from a good team to get the lead in the conference," Ralston said.

In Friday's 6-4 loss, the Red Raiders' senior left-hander Jason Gooding gave up four runs on seven hits in 5 1/3 innings in a losing cause.

Oklahoma State starter Scott Williamson pitched eight innings giving up four runs on seven hits.

Tech reliever Brad Ralston gave up one run on two hits in two innings to take the loss. Bard led Tech offensively, going 3-for-4 with two RBIs.

Tech won Saturday's slugfest against the Cowboys 12-10 in dramatic fashion.

The Red Raiders trailed 10-9 going into the bottom of the eighth inning when Dillon hit a three-run home run with two outs, putting Tech ahead 12-10 after eight.

In the ninth inning, sophomore reliever Zach Stewart retired the first two batters he faced before giving up a single to Ryan Folmar. Tech junior shortstop Jess Olivares then went into the hole to throw out Oklahoma State's Holliday at first to end the game.

end the game.

Dillon, who moved to first base after Friday's game because of injuries to senior Chris Shuffield and jun-

ior Carter Ayers, said playing first

He added that the series win against Oklahoma State should provide a lift for the Red Raiders as they continue league play.

"It (winning the series) gives us a lot of momentum," Dillon said. "Oklahoma State is a good team, and I think every series is going to be big for us."

Dillon said hopefully the Red Raiders will get some time off to nurse some injuries before taking on Big 12 foe Missouri Friday, Saturday and Sunday.

Hays echoed Dillon's sentiments and said clutch plays on offense and defense were the difference in the series.

"We need the rest, but we're about in as good of shape as we could be at this time," Hays said.

Men's tennis wins consolation bracket

SANTA BARBARA, Calif. (Special) — After losing in the first round of the California-Santa Barbara Invitational Collegiate Tennis Classic, the Texas Tech men's tennis team won three straight matches to capture 9th

Thursday, the Red Raiders (8-9) were pummeled by host team UCSB, 4-0. After being swept in the doubles side of the match, Tech gave up three straight singles matches to No. 30 UCSB, despite leading in three singles matches that were stopped.

But after the loss, the Red Raiders came storming back to defeat Pacific 6-1 Friday. Tech's only loss against Pacific was in singles.

Continuing with their winning ways, the Red Raiders defeated No. 59 Southwestern Louisiana 4-3 Saturday. Tech swept the doubles but had to hold off a Ragin' Cajun comeback that saw USL win three of the six singles matches.

The Red Raiders captured the consolation bracket championship by defeating New Mexico State 4-2 Sunday. Tech won all the doubles matches and three of six singles matches for the victory.

Tech gets back into Big 12 Conference action this weekend against Texas A&M Friday in College Station and Texas Saturday in Austin.

Arizona ends Cinderella run with first title

INDIANAPOLIS (AP) — Now there's only one No. 1 left for the Arizona Wildcats — themselves.

Arizona, the team that was supposed to be a year away, just needed an extra five minutes to win its first

NCAA basketball championship.

Led by the backcourt of junior Miles Simon and freshman Mike Bibby, Arizona kept Kentucky from repeating as national champion with an 84-79 overtime victory Monday

With three juniors, a sophomore and a freshman in the starting lineup, next year was supposed to be the one for Arizona. Instead, the Wildcats (25-9) made their first championship appearance a thrilling one in a game featuring 20 ties and 18 lead changes.

Fourth-seeded Arizona became the first team in tournament history to knock off three No. 1 seeds — Kansas, North Carolina and now Kentucky, the winningest programs in college basketball history.

"We just wanted it more than them," said Simon, the game's MVP. "Their legs were dragging, they were in foul trouble. We just wanted it more."

Kentucky was trying to become the second repeat champion since UCLA's stretch of seven straight titles ended in 1973. Duke repeated as champion in 1992.

"It's been the most fun I've ever had as a coach," Kentucky's Rick Pitino said. "I walked off the court feeling very proud."

Simon, who missed the first 11 games of the season because of academic problems, finished with 30 points. Bibby, the son of former UCLA star Henry Bibby, who won three college championships himself as a player, had 14 of his 19 points in the second half of Arizona's win.

SUMMER SCHOOL FOR PEOPLE ON THEIR WAY TO THE TOP.

If you didn't sign up for ROTC as a freshman or sophomore, you can still catch up to your classmates by attending Army ROTC Camp Challenge, a paid six-week summer course in leadership training. By the time you graduate from college, you'll have the credentials of an Army officer. You'll also have the self-confidence and discipline it takes to succeed in college and beyond.

Contact Captain Steve Vrooman, BA 303, 742-2141.

ARMY ROTC

Have you ever had a burning desire to be the top dog, the head honcho, the boss, the decision maker, the person who has a cool office.

Yes, yes, what is it?

UD SUMMER EDITOR

Does it sound like a rush? Well it is, at least twice a week. But if you have had the journalism class requirements, experience and meet the criteria, you could be the next "Top Dog" in the newsroom. Pick up and return your application in 103 Journalism Building by 4 p.m. Thursday, April 3.

INTERVIEW WITH STUDENT PUBLICATIONS COMMITTEE: THURSDAY, APRIL 10
