

# Traditionally TEXAS TECH

## Tech's seven-building beginning inspires numerous traditions

In its rustic beginning Texas Tech stood in a dusty pasture and had only seven buildings, including a dairy barn and a silo.

Officials spoke from a cotton bale instead of a podium, and the first basketball games were played in a barn instead of a gymnasium.

In the 72 years since Texas Technological College first opened its doors to students, thousands of people from all walks of life have traveled in and out of those doors with only the common bond of being a Red Raider.

"The Tech tradition is basically to succeed and to do your best," said Sonnet Cato, a freshman theatre arts major from Brownfield.

"I just want to be an example of what Tech's all really about." Cato said one of the reasons she chose Tech was to carry on a

family tradition.

"My dad went here, so I pretty much grew up around it," Cato said.

Dean of Students Michael Shonrock said Tech students must first have a sense of belonging to the school to appreciate Tech's rich background and traditions.

"We want students to have a sense of belonging," Shonrock said. "We want to recognize they are part of the Tech Tradition, and the best way is to understand part of the history."

In 1923, Gov. Pat Neff signed the bill which created Texas Technological College. Construction began in 1924, and students did not pay tuition. They paid only a \$1.75 medical fee, a \$1 library fee and a \$15 registration fee.

Tech is a relatively young university. Bill Dean, executive vice president of the Ex-Students Association, said Tech is not a land grant school and that has forced it to be more resourceful.

"For a university that opened its doors in 1925, we have come a long way," Dean said.

"We have developed a first class university out here making the best of our resources. That's something to be proud of."

Well-known traditions at Tech such as the wrapping of the Will Rogers statue, the victory bells or the Carol of Lights leave long lasting memories for Tech students.

Although traditions help mold students into the people they will become, other traditions are meant to be broken.

Alycia McCormick, a freshman pre-med major from Sugar Land, said her whole family went to Texas A&M, and the tradition had to be broken.

"I visited one time and I fell in love with Tech," McCormick said. "Being a part of Tech is going to make me into the adult I'm going to be."

Story by Laura Hensley

Masked Rider

File Photo/The University Daily

## Did You Know the Masked Rider...

Also known as The Red Raider, this is a dramatic mascot and one with a strong tradition. Early Tech students started the tradition on Sept. 26, 1936. Called Ghost Riders because no one knew their identity, the rider wearing a scarlet satin cape and mounted on a palomino stallion, would appear mysteriously during home football games, circle the field at breakneck speed, and disappear for the remainder of the game. Years later, George Tate, a member of the class of 1937, owned up to being the first Ghost Rider. — Tech Traditions/Marsha Gustafson

Will Rogers and Raider Red

File Photo/The University Daily

## Did You Know That Will Rogers...

Will Rogers, a humorist in the 1920s and 1930s, donated \$200 for the Tech band to play at the football game against TCU on Oct. 20, 1926. He wanted people in Fort Worth to hear a "real band." During this trip, Rogers was encouraged by his long-time friend Amon G. Carter to put up \$1,500 to buy the band new uniforms. Carter matched the contribution. In 1948, the Amon G. Carter Foundation presented to Tech a statue of Rogers and his horse, Soapsuds, titled "Riding Into The Sunset." Executed by Electra Waggoner Biggs, who was only 18 at the time, the statue is one of four like it in the United States. The statue was physically erected on what was known as Soapsuds Pavilion east of Memorial Circle and offset 23 degrees north from west in order to face the rear of the horse toward Texas A&M. — Tech Traditions/Marsha Gustafson

## Did You Know the Saddle Tramps...

Formed by Tech student Arch Lamb in 1936, this all-male booster organization supports men's athletics at Texas Tech. The Midnight Raiders "Paint the campus red" with crepe paper before big home games. Tramps ring Bangin' Bertha, a large bell donated by the Santa Fe Railroad, participate in parades and other campus events. Bertha is the bell on a trailer carried to all Tech football games and home basketball games by the Saddle Tramps. It was donated by Santa Fe Railroad and is considered a spirit-raiser and tradition at Tech. Bertha was designed in 1959 by Saddle Tramp Joe Winegar. — Tech Traditions/Marsha Gustafson

## Going Greek

### Rush provides insight into fraternity, sorority life

BY CAREN CARNEFIX  
The University Daily

For the Greek community, Rush is the most important activity of the year, said Scott Hudson, a senior construction technology engineering major from Houston who serves as rush director for the Interfraternity Council.

"It sets the tone for how an organization will be for the year," Hudson said.

Rush is a week-long process that gives students not involved in the Greek community a chance to visit and learn more about Greek organizations.

As rushees become familiar with fraternities and sororities, they decide which ones can offer the most to them.

As sorority and fraternity members meet the rushees, they decide which rushees can offer the most to the in-

dividual organizations' needs.

"It's a selection process, and it comes down to a mutual agreement," Hudson said.

Texas Tech's Rush is formal and offers rushees the chance to look at all of the Greek organizations.

At other universities that do not offer a formal rush, such as the University of Texas, students rush sororities and fraternities based on people they already know in the organizations.

There is not an opportunity to visit and learn about each organization like there is at Tech, Hudson said.

"This way everyone knows someone," Hudson said.

Rush also offers the opportunity to meet new people.

"...it comes down to a mutual agreement."

Scott Hudson, IFC Rush director

"Some freshmen don't know anybody," said Stefani Williams, a Panhellenic officer and junior public relations major from Carrollton. "They get to meet people in rush even if they do not pledge."

She said being a part of a sorority or fraternity provides members with staying power.

"You've got something you belong to and are likely to come back the next year," she said.

There are 800 young women and 650 to 700 young men rushing this fall, according to the offices' data.

Wes Underwood/The University Daily

**Prospective Pledges:** Fall rush participants visit the Phi Delta Theta Lodge during the Interfraternity Council's Rush Week activities. Rush parties gave members and rushees the opportunity to meet each other and learn more about the Greek system.

For sororities, the numbers have increased by 25 percent since last year, despite a decrease in numbers across the nation, Williams said.

Although freshman enrollment is down this year, the number of fraternity rushees is the same as last year. In previous years, sorority mem-

bers and pledges have decorated their car windshields with shoe polish.

The Panhellenic Council voted this year to prohibit the decorations.

## Replica plane practices flight in Texas, will retire in Hong Kong

ZUEHL (AP) — With a gentle breeze and a pair of sunglasses, Roger Freeman took flight recently over Zuehl in a replica of an airplane designed in 1910.

Built with more wood than steel, the boxy plane shakes and sways in the wind over Guadalupe County east of San Antonio.

A wicker seat serves as the cockpit.

A leather aviator's cap is the only thing protecting Freeman's head from wind and bugs.

"I have always loved airplanes," Freeman said.

Freeman was hired by the Hong

Kong Historical Aviation Association to build a replica of the first airplane to fly over Hong Kong.

Freeman will fly the plane over the city's new Chek Lap Kok International Airport Nov. 15 at its opening ceremony.

After the ceremony, the plane will be suspended from the airport lobby ceiling and displayed permanently for visitors.

The original Boxkite airplane, designed in 1910 by French engineer Henry Farman, flew over Hong Kong March 18, 1911.

The plane had no commercial purpose, Freeman said.

"It's real purpose was to get one man, maybe two, off the ground," Freeman said.

Freeman is owner of Vintage Aviation Services Inc., a Marion business that builds and restores old airplanes.

He and a crew of about six mechanics and woodworkers used wood, steel, cloth and glue to replicate the plane.

Freeman said this airplane design is just a step more advanced than the design used by the Wright Brothers in their first successful 1903 flight.

Although safe during flight, the airplane sways and shakes at every gust of wind.

"You can see the way it teeters when the wind blows," Freeman said. "Compared to today's airplane, its right on the edge

(of safety standards)."

Larry Ross, who constructed most of the wooden parts, said he has been playing with airplanes since he was a child. Ross, who served in the Navy on an aircraft carrier's flight deck, said he used to fly remote-control airplanes and gliders made of balsa wood.

"I've always been interested in aircraft," Ross said, adding that he loved working on the plane. "The day goes by before you know it, and you get paid. It's a great feeling to be part of an accomplishment."

The aircraft now taking test flights over Marion is not a perfect replica

of the 1910 model. Freeman and his crew, with only general knowledge of the materials used in the early 1900s, based their work on old photographs of the original.

The plane's frame is built from specially carved pieces of pine, fir, ash and birch wood.

Aluminum hinges are used instead of cast iron in the original.

This bird also has a modern engine, which is safer than the kind used in aviation's early history.

This crew covered the wings with Dacron, a synthetic material that is more durable than the shellacked cotton cloth used in the original.

Freeman did not reveal how much he charged to make the plane, but said it cost "over \$200,000 to build."

The crew completed construction on the boxkite last month.

Freeman, the only pilot so far to fly the plane, has been conducting test flights for about a month.

"You can see the way it teeters when the wind blows."

Roger Freeman, Texas pilot

## SGA strengthens communication with Tech students

BY CAREN CARNEFIX

The University Daily

Keeping tabs on the promises made by administration regarding construction of the United Spirit Arena is one of the Student Government Association's top priorities.

"Our job is to make sure that students are aware of the situation, know those options and that we, as student government officials, make sure that

the administration keeps those promises that were made," said SGA President Russell Thomasson.

There is a written agreement between Texas Tech and the SGA promising students

would have a say in the uses of the arena and students would not suffer a loss in parking, said Blythe Clayton, SGA External Vice President.

However, Robert Ewalt, Vice President for Student Affairs, said although these promises have been discussed, there is no written agreement.

The SGA forms committees such as the Arena Advisory Board to ensure the students' voices are heard in decisions regarding the arena.

The SGA and Citibus are working together to ease parking problems for students as construction of the arena progresses.

One alternative implemented is an additional bus route which provides off-campus service and transportation

to students living in apartments located off of Fourth Street.

"We're trying to provide more parking alternatives for the time being and provide an easier way for students to do their routine," Thomasson said.

"I think for the future, for the benefits that Tech will experience down the road, it's a small, small price to pay."

The off-campus shuttle will help those students who do not like driving to school and also provide extra parking spaces for the students utilizing the commuter lots, Clayton said.

"The benefits are two-fold, but you never know if it's going to work until you try it," she said.

Last year, the SGA focused primarily on the arena and getting things started.

"I think that last year they (SGA) had a big thing to do with the arena," Clayton said. "This year we will be able to do a lot more things, not just one project."

Other goals for the year are to improve the Homecoming experience, the financial aid process and student involvement in community relations.

They also are working to form a chancellor's round table.

"...Student government officials, make sure that the administration keeps those promises that were made."

SGA President Russell Thomasson

**Rah, Rah Red Raiders:** The Texas Tech cheerleading squad shows its school pride. The squad is preparing for the 1997-1998 sports season.

The cheerleaders entertain crowds and raise Red Raider spirit at events such as football games, basketball games and Raider Alley.

## UT takes Gutenberg bible, 'Gone With Wind' gowns

AUSTIN (AP) — The University of Texas is about to share a few things with the world: a copy of the Gutenberg Bible; the green and blue gowns Vivian Leigh wore in "Gone With the Wind;" the skull of an alligator Mississippiensis, North America's menacing 19-footer.

These and many other scientific, cultural and historical treasures are

headed for a global debut as photographs, animations and 3-D videos on the Internet.

"It's a great challenge to figure out how to turn the things into digital representations," said Tim Rowe, a geology professor. "Some of the stuff will be non-flashy and quite mundane. We have 2000, 000 catalogued specimens, at least."

The Virtual Museum project Rowe is leading is one of 18 interdisciplinary efforts with a variety of computer and Internet aims that will benefit from \$6 million worth of desktop computers and other equipment for technology projects in only the first round of the computer giant's \$85 million Technology for Education 2000 program.

The Virtual Museum might be an early crowd-pleaser, as its 3-D videos of artifacts begin to show up as solo exhibits in the halls of such UT campus museums as the Huntington Art Gallery and the Texas Memorial Museum and on a variety of Web sites. Eventually, the Web exhibits may be pulled together with links on a single home site.

## Thompson Hall offers variety of services at Tech

BY DANIEL KERR  
The University Daily

Many Texas Tech students may wake up one morning and find themselves congested or invaded by a pesky cold. Help is just around the corner.

Students enrolled in four or more class hours at Tech already have paid a \$49 medical service fee. This fee, which entitles students to individualized health care from professional physicians at Student Health Services in Thompson Hall, is included in tuition. Several services including immunizations, contraceptive counseling, dermatology and orthopedic clinics are available for student use.

Ricky Rasura, a senior music performance major from El Paso, has

used Student Health Services eight times for reasons ranging from the common cold to back problems.

"It benefits me because usually throughout the school year I get sick at least two times," he said. "Instead of having to shell out \$70 to \$100, I can find out what the problem is for no money up front."

The exceptional bedside manner of the physicians is another reason Rasura is thankful for such a service.

"Everybody is really nice," he said. "They treat you good. It's not like going to any doctor—you aren't just a person on a list."

There is a full service pharmacy where students can purchase prescriptions and over-the-counter medications at a discounted rate.

"We are more than just a place to

get a shot," said Michelle Pettus, a health educator at Student Health Services. "We plan events to create recognition and positive change in students."

The health educators try to develop an open relationship with students, she said.

"Our purpose isn't to preach—it's to increase awareness and trust students to make decisions based on the knowledge we share," Pettus said.

Medical services are not the only reasons students may find Student Health Services invaluable. Health educators are available for presentations on more than 100 topics students are confronted with including alcohol and other drugs, sexual health, mental health and sexual assault.

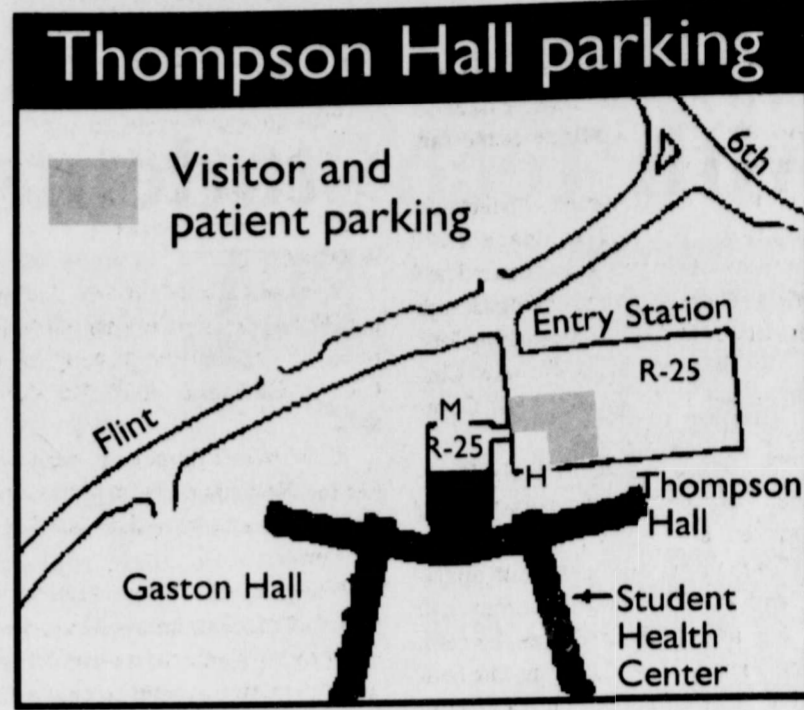

Students can get involved at Stu-

dent Health Services as peer educators and promote healthy lifestyles by joining Impact Tech, a student organization that informs other students about health issues, she said.

Chad Simmons, a senior environmental engineering major from Denton, was surprised at the many services available at Student Health Services.

"My last visit was for the removal of a planter's wart," Simmons said. "I thought I would have to go outside (off campus) to get it taken care of."

Students can call 743-2848 to make an appointment at Student Health Services. A Tech identification card and a red card, which will be issued at the first visit, is needed for every appointment. Patients should arrive 10 minutes early.

## Scientists search for solutions to smelly problem

PEORIA, Ill. (AP)—How do you take the stink out of hog manure? That's a question researchers at the University of Illinois and elsewhere are trying to answer.

Scientists at the National Center for Agricultural Utilization Research, located in Peoria, soon might join other researchers in trying to solve the problem. Rep. Ray LaHood, R-Ill., said last week he would ask Congress for \$1 million in federal money to pay for the research.

Mega-scale hog farms usually store the abundant waste the animals

produce in large lagoons, and the resulting unpleasant odor is one of the main problems associated with the livestock operations. The farms are also controversial because environmentalists and others say the large collections of manure pollute the air and threaten groundwater.

Dr. Peter B. Johnsen, director of the National Center for Agricultural Utilization Research, a division of the U.S. Agriculture Department, said removing the smell from hog waste is not easy.

But, he added, "It's not a bizarrely

difficult, intractable problem."

Yuanhui Zhang, a professor in the department of agricultural engineering at the University of Illinois, is researching thermochemical conversion of livestock waste. That means trying to convert manure into other products, such as fuel oil, that would not smell like hog manure.

"If we reduce dust concentrations, we get a good chunk of the odors," Zhang said.

Some of the microorganisms responsible for hog manure odor already have been identified, Johnsen

said. It is unclear whether hogs create an environment where the microorganisms can grow, or whether the microorganisms are inside the hogs.

Edith Galloway, a rural Carthage woman who lives about a mile from the Little Timber L.L.C. hog-raising facility, said removing the bad smell from manure would not necessarily eliminate the problems created by large-scale livestock operations.

"If you could perfume it up, you could have a silent nuisance," said Galloway, adding that such research is a waste of money.

## Gardening tips ensure quality vegetable season

PHOENIX (AP)—The most space-efficient vegetables include beets, broccoli, beans, cabbage, carrots, leaf lettuce, onions, radishes and tomatoes.

Superior taste is the main reason for home-grown vegetables. Unfortunately, however, the same varieties ripen around the same time if planted at the same time.

You can get around this problem by spacing the plantings over several weeks. This ensures top quality over the longest possible period.

To determine such plant-succession it will be necessary to determine the days needed for maturing. Fortunately, there are general

guidelines for each vegetable.

Beets usually take between 60-80 days, cauliflower 90-100 days, carrots 60-100 days, eggplant 70-120 days, peppers 90-120 days.

A reference book will list these general times.

Some varieties of the same vegetable are genetically ready to eat earlier or later than others. While seed sellers take this into account, they also tend to be quite optimistic.

So it's wise to routinely add a week or so to the catalog/packet estimate.

Then allow for some plants of the same variety to mature later or before others.

## Campus construction enables residence halls' facelifts

BY JONATHAN CARROLL

The University Daily

Construction and renovations were made on the Texas Tech residence halls, and many continue as the fall semester begins.

Construction continues on the new Carpenter/Wells Residence Hall Complex, Gaston Residence Hall parking lots and Stangel/Murdough Residence Hall Complex parking lots.

"The big project is the new Carpenter/Wells (Residence Hall Complex)," Burkhalter said.

The old Carpenter/Wells Residence Hall was torn down last spring to make way for the new facility.

Three and four bedroom apartments for both men and women will be available in the complex, he said. Each apartment will offer private bedrooms, two baths, a kitchen and a living room. The new Carpenter/Wells Residence Hall Complex's apartments will be completed by the middle of next summer.

The addition of this facility will more than double the number of apartments on campus, Burkhalter said.

The building of the new Carpenter/Wells Residence Hall Complex caused changes in parking lots of Stangel/Murdough Residence Halls and Gaston Residence Hall.

"We were basically adding some parking, were also replacing the parking taken up by the new building," Burkhalter said.

A portion of the lot was used for the new Carpenter/Wells Residence Hall Complex, and the remaining part of the lot was reconstructed.

"We are slightly behind and expect to finish the latter part of this week," said Gene Bals, assistant director of Tech's Facilities Planning and Construction.

The building of the new Carpenter/Wells Residence Hall Complex reduced some of the parking for the Gaston Residence Hall, Burkhalter said.

Commuter parking near the Gaston Residence Hall was converted in order to accommodate the Gaston residents.

Renovations around campus consisted of modernization of elevators, installment of ethernet connection and general improvements to the Gaston Residence Hall.

The elevators were modernized in Chitwood Residence Hall and Hulen/Clement Residence Hall Complex, Burkhalter said.

Total renovations of these elevators were made including control panels, power and cab.

"Each student will have a data outlet," Burkhalter said about the addition of ethernet connections in each room.

The addition of ethernet connections will enable students to access the Internet 20 times faster than any modern connection can. The connects will be completed in December.

Additional telephones also are being installed into the residence halls. Each student in the residence halls will have their own telephone, Burkhalter said. The phone lines will be completed by December.

The Gaston Apartments were renovated during the summer, Burkhalter said.

The hall and apartments were painted and recarpeted.

Also, new furniture, beds, chairs and mattresses were in put in the apartments. In addition, some of the furniture was refinished.

Wes Underwood/The University Daily

**Men at Work:** Construction continues at the future site of Tech's Carpenter/Wells Residence Hall Complex. The structure was torn down in the spring, but the residence hall is expected to be occupied by summer 1998.

Texas Tech library releases new school year schedule

Texas Tech library officials have established the operating schedule for the 1997-1998 school year.

Regular library hours are from 7:45 a.m. to midnight Monday through Thursday, 7:45 a.m. to 9 p.m. Friday, 10 a.m. to 9 p.m. Saturday and 1 p.m. to midnight Sunday.

Special closings and exceptions are as follows:

- Fall Semester 1997
  - Nov. 26 7:45 a.m. - 5 p.m.
  - Nov. 27 Closed for Thanksgiving
  - Nov. 28 Closed
  - Dec. 11 7:45 a.m. - 2 a.m.
  - Dec. 12 7:45 a.m. - 2 a.m.
  - Dec. 13 10 a.m. - 2 a.m.
  - Dec. 14 1 p.m. - 2 a.m.
  - Dec. 15 7:45 p.m. - 2 a.m.
  - Dec. 16 7:45 p.m. - 2 a.m.
  - Dec. 17 7:45 a.m. - 9 p.m.
  - Dec. 18 8 a.m. - 6 p.m.
  - Dec. 19 8 a.m. - 6 p.m.
  - Dec. 20 Closed
  - Dec. 21 Closed
  - Dec. 22 8 a.m. - 6 p.m.
  - Dec. 23 8 a.m. - 6 p.m.
  - Dec. 24 Closed
  - Dec. 25 Closed for Christmas
  - Dec. 26 Closed
  - Dec. 27 Closed
  - Dec. 28 Closed

## YEAR

# The hunt for the Big XII championship

"I think it's

going to be a great year. We've had success the last three seasons; I don't see why that wouldn't continue. Our goal is to win a championship this season."

### -Tech quarterback Zebbie Lethridge

without them, and if any of them make it onto the team, that will be great. But we're going to play the games with or without them."

The games Dykes is referring to is another challenging schedule for the Red Raiders, starting with the season opener at No. 5 Tennessee, against Heisman Trophy candidate Peyton Manning and close to 107,000 Volunteer fans.

The Big 12 Conference season starts for Tech Oct. 4 at Baylor, where Tech is 1-4 under Dykes.

Trips to Nebraska, Oct. 18, and Texas, Nov. 8, figure to be tough obstacles for Tech as well. In all, the Red Raiders play three road games against teams ranked in the top ten in at least one preseason poll.

The Red Raiders battle other opponents including Southwest Louisiana Sept. 13 in Lubbock. Tech then plays North Texas Sept. 20, before gearing up for the heart of the Big 12 schedule.

Other than the conference powerhouses, Tech faces Kansas on Homecoming Oct. 11 and Texas A&M on Oct. 25. The Red Raiders conclude their regular season schedule with South Division rival Oklahoma on Nov. 22 in Lubbock.

"The schedule is very demanding," Dykes admitted.

"But I think that is a good thing. Playing at Tennessee will tell us a lot about where we are at, and it will prepare us for the trips to Austin and Nebraska. It's challenging, but I think our kids have gotten used to that sort of schedule."

Before the game at Tennessee, Dykes remained unsure of his starter at running back.

Three redshirt freshmen and true freshman Ricky Williams of Duncanville all figure to see ample game time this season.

Williams seems to be the favorite, but Anthony Malbrough, James Easterling and Ricky Hunter will see time as well.

Redshirt freshman Harland Hill of Cedar Hill figures to start the season in place of Morris at fullback.

"I would say that we will play four tailbacks and three fullbacks," Dykes said. "That is just to see how they do when the lights come on. Strange things happen when the lights come on."

The uncertainty will force more of the offensive burden onto quarterback Zebbie Lethridge, a senior from Lubbock, who started the last three seasons, and led Tech to three bowl appearances.

"I would say for sure that we will throw more this year than we did last season," Dykes said.

"Zebbie is a good quarterback, he has made a lot of nice plays for us. He is a good passer, and he has good mobility."

Lethridge is a three-year team captain, a feat equaled only by All-Ameri-

BY HEATH ROBINSON

The University Daily

A math major would never agree to the statement that four equals one, but the first goal of Texas Tech coaches this season is to try and squeeze four bodies into the No. 4 jersey left behind by 1996 star Byron Hanspard.

Last season, Hanspard finished sixth in the Heisman Trophy balloting, and posted the fifth best NCAA single-season rushing total ever with 2,084 yards.

The running back spot is the void receiving the most attention but for the Red Raiders is just one of many question marks.

Tech also must replace fullback Sammy Morris, who was declared academically ineligible during the summer.

The eligibility of seasoned veterans such as receivers Sheldon Bass, Stacy Mitchell and cornerback Corey Turner also remain in question.

Turner started all 11 games last season for Tech's pass defense, which ranked 18th nationally in pass efficiency defense. Collectively, Turner, Bass and Mitchell combined to start 34 games during their careers.

"I don't know if those guys will be with us or not," Tech head coach Spike Dykes said.

"We're preparing for the season without them, and if any of them make it onto the team, that will be great. But we're going to play the games with or without them."

can linebacker Zach Thomas, now of the Miami Dolphins.

Lethridge is excited about his turn to shine.

"I think it's going to be a great year," he said. "We've had success the last three seasons; I don't see why that wouldn't continue. Our goal is to win a championship this season."

Receivers and the offensive line may be the strong point of Tech's offense.

Donnie Hart and Malcolm McKenzie will be Lethridge's favorite targets, and returning starters Chris Whitney at guard and Jay Pugh at center should give Lethridge time to throw.

Defense figures to be Tech's strong point.

Seniors Corey Chandler and Cody McGuire return as starters at defensive tackles, along with junior Montae Reagor, a two-year starter at defensive end.

Sophomore Taurus Rucker saw a lot of playing time last season at defensive end and will attempt to fill the shoes of the departed Tony Daniels.

"I think you have to start with the people we have up front," Dykes said.

"We have a good nucleus. Tony Daniels was a big loss up front, but everybody else is back. Those guys have some experience."

Eric Butler returns as the starting middle linebacker for Tech, after recording 68 tackles last season, good for sixth on the team.

Dykes calls Butler his bellcow on defense.

With Cory Turner out as starter, Tech will use at least two new faces in the secondary, and maybe more by the end of the season.

Senior Tony Darden returns as starting left cornerback, and Dane Johnson returns as the starting free safety.

Junior Darwin Brown takes Turner's spot, and Robby Cartwright replaces Jody Brown as the raider back.

But the story of the season may be Tech's true freshmen in the secondary.

Antwan Alexander at right cornerback and John Norman at free safety, both of Midland Lee High School, are already second string on the depth chart, and both could be starting at some point during the year.

"There are some high expectations placed on us," Alexander said.

"But our goals are just to work hard and help the team any way we can. If we just do what we are taught, we'll be fine."

Though Tech is not the favorite in the Big 12 South Division, they certainly will not be taken lightly by conference foes.

"The Big 12 is business every week," Dykes said.

"That's the way it is in all the good conferences. We are no different than anybody else."

"There are a lot of good teams in all of the conferences."

Wade Kennedy/The University Daily  
Ready to Rumble: Freshman running back Ricky Williams shows his soft hands at a Red Raider practice.

## Tech looks to freshmen to fill void left by star running back Hanspard

BY KRISTIE RIEKEN  
The University Daily

The four members of Texas Tech's football team splitting time at running back this season are different, but they have at least two important things in common.

Redshirt freshmen James Easterling and Rickey Hunter, true freshman Ricky Williams and redshirt sophomore Anthony Malbrough all rushed for more than 1,000 yards in their senior year in high school, yet none have carried the ball in a college game.

Tech coach Spike Dykes has not named a starter and instead said all of the four will play and contribute this season.

"We have some good young

backs and they all have done well so far," Dykes said.

"I don't know who will start, but they are all going to play and if you throw them all in there they are all going to have a chance to be good."

Easterling, who rushed for 1,031 yards his last year at Crowley High School, is listed at 5-11 and 190 pounds.

The freshman said he has gained about 15 pounds and his strength as a runner should be power since he is the biggest of the group.

"I think I'm more powerful with the added weight, and that will help if the coach needs someone to get the extra couple of yards," he said.

"Really this is a team thing, and I am ready to do whatever coach needs me to do."

The other redshirt freshman up for the running back position is Hunter who was recruited as a defensive back and practiced all last season at that position.

Hunter was the District 10-5A Defensive Player of the Year at Dallas's Kimball High School, but he said he prefers offense to defense and gained 1,683 yards rushing that season.

"I like offense better, it makes me work harder," Hunter said.

"I had to remember some of the little things about playing offense, and I just have to be patient and whenever it is my time I want to be ready."

The 167 pound Hunter also was a member of state champion sprint relay and mile relay team as a senior. Cornerback Tony Darden who for-

merly played quarterback and wide receiver at Tech has often said that playing offense has helped him as a defender, and Hunter said the reverse is true as well.

"It is really good having played both (offense and defense). That way I know where the linebackers are at all times," Hunter said.

"I also know better which way they are going to go or which way to cut off if they make a blitz."

Malbrough was highly recruited out of West Brook High School in Beaumont in 1995 after gaining 1,347 yards rushing but was forced to sit out that season due to questions regarding his eligibility. Last season the 195-pound

## Tech golf vies for improvement in 1997

The Texas Tech men's and women's golf teams are hoping for a better season after the women finished sixth in the Big 12 Tournament and the men posted a last place finish in the Big 12 Tournament.

The women will be led by junior Brooke Lowrance who finished ninth individually at the Big 12 Tournament with a score of 235.

She had a low round of 73 and an average of 78.3.

Lowrance's best finish was second place, and she finished in the top 20 five times and the top 10 three times last season.

The women are coached by Jeff Mitchell, who is entering his eighth season as coach of the team.

Other key players returning include Beth Covington, Kristin Kight and Amy Marsh.

Covington had an 80 average last

season with a low round of 74. The junior from Sonora finished in the top 10 one time and the top 20 twice.

Covington posted her best finish of the year in the Chip n' Club Invitational where she finished in a tie for second which helped the team to a first place finish.

Kight, a senior, maintained an 80.5 average in 1996-97 and had a low round of 75. She finished in the top 10 one time and the top 20 three times last season.

Marsh had an 80.9 average last season and finished in the top 20 one time and the top 10 once with a low round of 76.

In the NCAA West Regional Championship in Tucson, Ariz., the team finished eighth out of 20 teams with a score of 918.

The season begins for the Red Raiders on Sept. 15 when the team

competes in the McHaney Memorial in Lubbock.

Tech doesn't compete again until the squad plays in the Big 12 Fall Preview Oct. 6-7 in Columbia, Mo.

After the preview of the conference competition, only two more tournaments remain in the fall season for the team.

The Red Raiders play in the Stanford Women's Invitational in Stanford, Calif.

After the California trip, the Diet Coke Roadrunner in Las Cruces, N. M. is the final tournament of the fall for the women.

Although two of the top players from last year's men's squad completed their eligibility last season, one strong player remains.

Philip Tate, a junior, had an average of 77.2 last season to lead all returnees.

He finished in the top ten one time, and his lowest score was 72.

Alex Armstrong had an 80.1 average last season with a low score for the year of 76.

Another returnee, Tom Baldwin, had a 77.3 average last season with a low score of 71.

Other returning players include sophomore Chris Burns, junior Ronny Gailey, junior Sean Mulherin, senior Laird Sparks and Travis Pope.

The men's coach is Tommy Wilson, who is entering his 11th year at Tech.

Like the women, the men play in a variety of tournaments in the fall season before the Big 12 season tees off in the spring.

The year starts off Sept. 22 with the Kansas Invitational in Lawrence, Kan.

Oct. 10-11 the Red Raiders compete in the Wimberly/Coca-Cola in Las Cruces, N.M.

To wrap up the year, Tech travels to Laurel, Miss. Nov. 3-4 to play in the Deep South Intersectional.

## Backs

continued from page 1

tailback redshirted, and after being out of actual game situations for two years he said he is ready for his chance to make an impact on the team.

"It took me a while to get back into the groove, but I think I caught on alright," Malbrough said.

"I'm not really nervous. I'm just anxious to get out there and see how it is."

These four players are vying for the position that was left vacant by the departure of All-American selection and Doak Walker Award winner Byron Hanspard who is now playing in the National Football League for the Atlanta Falcons.

Malbrough said that although Hanspard was a great player, teams are always losing great players and he and the other running backs have got to look ahead and do they best they can.

"I am really confident," he said.

"Good players come and go, but hopefully me and the rest of the guys can just come in and do what Byron did and help the team win."

Williams rushed for 1,669 yards last year at Duncanville High School. He said that the chance to start as a freshman was one of the reasons he chose Tech and although he is a little nervous he is excited to have this opportunity.

"Them telling me that I would have an early chance to play helped me choose Texas Tech," Williams said.

"It is great and something I want, and when my chance comes I want to give it the best I can and do well and make a name for myself."

At 5-9 and only 175 pounds, Williams is the smallest of the four running backs but said that in his mind, size is not a factor.

"The players (in college) are much bigger, taller, faster and stronger than high school but as long as you do what you got to do size doesn't matter," Williams said.

## Cross country teams seek championships

BY HEATH ROBINSON  
The University Daily

Entering its second season in the Big 12, the Texas Tech cross country program will be riding the backs of a star returner on the women's side and two newcomers for the men.

Sophomore Leigh Daniel returns after posting the most successful season ever by a freshman

cross country runner at Tech. Daniel qualified for the national championships as a freshman, a first time accomplishment at Tech.

"Leigh had a great season as a freshman," Tech cross country coach Greg Sholars said. "We expect her to continue on in her development as a runner."

Daniel's trip to nationals last season also is having an impact on the entire women's team.

"I think Leigh's going to national qualifying has definitely motivated all the girls on the team," Sholars said. "They think that if she could go as a freshman, then they can go also as individuals and as a team."

The women's team faces an uphill climb to make it to nationals because, as Sholars said, their district is one of the toughest in the nation, led by Colorado and Stanford.

"It's extremely competitive in our district," Sholars said. "But I think we're real confident that we can compete and improve on last season."

Sophomore Kristen Koppes, a freshman from Redding, Calif., and senior Lori Knowles also will

lead the women's team into battle.

Last season, Koppes started the season as the leading runner on the team as a first-year runner.

Koppes said seeing Daniel make nationals has not changed her goals.

"When Leigh made it last year, I was really happy for her," Koppes said.

"When I saw her there, I knew that I belonged there as well. I

want to make nationals also, but seeing Leigh there is not why I have that goal."

While the women's team is expecting great things this season, the men's squad is hoping for any kind of improvement, finishing last season near the bottom of their district standings.

Sholars said the additions of newcomers Samson Ngetich and Michael Kariuki should help the team get on its feet.

"Those two will lead us," Sholars said.

"They should also be two of the top runners in the conference. Those are two newcomers who we feel like can bring a lot of push and drive to our other runners."

Sholars said the new additions, coupled with the returners, lead to more optimism.

"We will definitely make strides this season," he said. "I think we're making the proper strides to get us up off of the bottom."

Both the Tech men and women's teams begin their seasons Saturday at Mae Simmons Park in Lubbock, hosting the Red Raider Invitational.

**"We will definitely make strides this season."**

**Cross country coach Greg Sholars**

## Tech spikers expect strong season

BY CHARLES RAPIER  
The University Daily

The Red Raider volleyball team looks forward to beginning the 1997 season for multiple reasons.

Despite a young squad, and the loss of three, four year starters, the ambitions of this year's volleyball team are powerful.

With the combined leadership of team captains Lisa Hilgers and Kristen Holmes and senior Brande Browne, the Red Raiders will have more than the necessary ingredients to compete for the second year in the elite Big 12.

Tech finished 25-9 overall last season while sporting a 12-8 in the first year of the Big 12.

Ambition is what all teams in sports need to possess in order to locate a specific goal, Nelson said.

By re-evaluating goals weekly, coach Jeff Nelson has been doing just that, gearing his team up for this year's challenging season.

Nelson said his team is physically prepared, has the competitive spirit to meet the program's expectations and return back to the NCAA Tournament in December.

"This year we had good recruitment which leads to our ability to go eleven players deep without changing our level of play," Nelson said.

"The experience in our two captains Lisa Hilgers and Kristen Holmes will help the younger more inexperienced players."

Nelson said he knows he has to be patient while breaking in a young team, but the real work lies with the captains and the teams only starting senior.

Captains Hilgers and Holmes both have high expectations for this year's team.

"We had a team meeting this last Sunday, and decided on our goals this year," Hilgers said.

"We decided to try and return to the NCAA Tournament and to win our first four tournaments."

The teams only senior Brande Browne also will take part in leading the Red Raiders this season.

Since this is her last year of eligibility, Browne is looking for more than just a successful season.

"I'm looking to get everything out of volleyball that I can here at Texas Tech," Browne said.

"Knowing that my career as a Red Raider is coming to a close makes me want to try my best to achieve all that I can."

Texas Tech will begin its 1997 season at No. 36 in the USA Today/AVCA Volleyball Coaches poll.

The Red Raiders are among six schools from the Big 12 that received national ranking.

Other schools ranked were Nebraska at No. 3, Texas No. 9, Texas A&M No. 13, Colorado No. 23 and Kansas St. at No. 31.

Texas Tech started its 1997 volleyball season by hosting the first ever Sheraton Shootout last weekend. Au-

## Tennis ready for action with returning players

BY CHARLES RAPIER  
The University Daily

September has arrived, and that means Director of Tennis Tim Siegel has to prepare the Texas Tech men's tennis team for the 1997 season.

Siegel is looking forward to this year's season for many reasons.

Siegel did not lose any of his top six players and recruited four new players who will strengthen the teams depth and allow Tech to compete in all spots of the lineup.

After finishing fifth in the Big 12 last year, and being ranked high as 39th, Siegel said the Red Raiders are ready to go even further.

"I have never been more excited before," Siegel said. "This is the most talented team that I have ever had, but what separates a good team from a great one is the leadership and absolute focus of every player on the team."

Siegel is most excited about two foreign players, Borut Martincevic from Slovenia, and Australian Wojtek Stasiak.

Martincevic is one of Europe's best, while Wojtek ranked fourth in all of Australia.

Both players will bring our program to another level and, with leadership and focus, will make us a top 20 team, Siegel said.

Arizona State transfer Carey Bjorkman also will offer more depth for the team, Siegel said.

File Photo

"I hope to see us be in the top 30 and do well in the Big 12," said Bjorkman.

Other players to look for are junior Petar Danolic, who was injured last spring but has returned strong.

Seniors Tylir Jimenez, Doug Lacey and Adam Baranowski will offer leadership and an experienced example to the team.

Steve Wood from England and Ryan Shupe should strengthen the depth of the team, while freshman Thomas Will, who last year was among the 10 best high school players in Texas, will finish off another year of excellent recruiting.

This year the men's and women's teams will start practice Sept. 8.

The first tournament of the year will be the Sept. 23 National Clay Court Tournament.

## Longhorn's Butcher man of many talents

AUSTIN (AP) — This summer, Texas cornerback Chris Butcher did what he had to do to someday make it big. He worked at his skills, met and picked the brains of as many people who can play as well as he'd like to play.

One guy, one of the best at what he does, made an impression on him. Butcher saw how calm he was before playing and how he lit up with fire and emotion when he stepped out into the lights.

"You talk about a guy with form," Butcher said, his eyes lighting up with unabashed enthusiasm. "When he gets out there he's like James Brown."

As quarterbacks go, Brown does have a certain performer's flair.

"No, like James Brown the singer. Once Malford's on stage, he gives people what they want."

Malford is not Malford the football player, but Malford Milligan, lead singer of soulful rock band Storyville. Butcher met him this summer, as well as Jimmie Vaughn and members of Hot Buttered Rhythm and MC Overload. Butcher, you see, thinks it would be great to play in the NFL, but you get the idea he'd be even more juiced to have a career in music production/writing; maybe be the next Babyface.

As a cornerback, Butcher might be a year or two away from making big contributions to the Longhorns. As a musician, he could be much closer than that.

This summer he hooked up with musician Daman Howard. Howard wrote the lyrics, Butcher helped out

Butcher

with the music and they cut a demo tape, which is being shopped to record producers.

If it sells, Butcher can have a step up on his fellow cornerbacks. He can receive royalties.

(That's fine with the NCAA, by the way, because Butcher did the work during the summer, when he's allowed to have a job. During the school year he can't be paid, which means he is thinking about doing some gigs gratis in the spring).

"It's going great," Butcher said of the music career. "If we get a record deal, it will get me out there."

Don't ask Butcher how he spent his summer, unless you have considerable time. Most college football players will talk about how they ran, lifted, ate and maybe worked at the local lumber yard. End of conversation.

This is Butcher's summer:

To make money to buy a \$1,500 computerized music work station, he often worked from 8 p.m. to 8 a.m. as a security guard (Fridays were his favorite, because he worked guarding parking lots near Sixth Street, which allowed him to sample some of the best music the city has to offer during his breaks). He took six hours of class, including algebra, and when he was done, he'd come home, shoehorn in a few hours sleep, and then get up in time to head to the Neuhaus-Royal weight room for a 2 1/2-hour workout.

Presumably at some point he ate.

In his free time (free time?) he wrote songs, mingled with musicians and producers at Carl Thiel Music, practiced on the saxophone and piano, listened to rock, blues, hip-hop, be-bop jazz, Latin jazz, cool jazz, Afro-Caribbean jazz (he is majoring in jazz composition), soul, even the occasional classical cut.

Just because football started didn't mean the music stopped. In his dorm room is that new computer, the one with 2,000 synthesized sounds, ranging from chords to monkeys howling and birds chirping.

"If I turn it up loud enough," he said with a grin, "I can scare some people."

Behind the songwriter, jazz saxophonist, security guard and computer prankster is still Chris Butcher the cornerback, and at some point we need to say how he's doing.

Recruited as a speedy halfback out of Longview in 1995, Butcher had trouble adjusting his running style to the college game and was switched last spring to cornerback. He was not happy, but the deeply religious 20-year-old decided this wasn't his call.

"I've come to grips with it,"

Butcher said of the move. "It's not my will, but His will be done."

Getting the technical aspects down is the hardest part for someone who since his sophomore year in high school has been running forward, not backpedaling. As the talented group of freshmen learn the system, Butcher has been running some with the second team, but he faces a battle to stay there.

"He's better now than at the end of spring, but he still has a way to go," said secondary coach Steve Bernstein. "It's like you've never played the piano and all of sudden you're going to learn."

"It's getting to the point where it's starting to be fun," Butcher said.

Maybe there's a lesson in this for Butcher, something to take from Malford Milligan. Something about how to change when the lights come on.

"I just have to work on the go-ahead, get 'em, mean mentality," Butcher said.

"I'm getting better. I jammed a guy and knocked him off his feet, so it's coming back."

Chris Butcher laughed. He's jammin'. If only it could be so easy.

# Out ALL Night

## Hub City offers variety of nightlife venues

People may feel there is never anything to do in Lubbock, but with a few dollars in hand they can find entertainment every night.

Lubbock may not be noted for its nightlife but between clubs, bars and bands, there is always something to do for those who like to get out of the house.

The foremost place to find entertainment in a central location is the Depot District. The District contains the Cactus Theater, Tom's Daiquiri Place, Kyle's 88 Key Cafe, Clousseau's Coffee and Cigar Bar, Hub City Brewery, Palladian "Live," Beergarden, Bleacher's Sports Cafe, Stubb's Bar-B-Q and Roadhouse Ruby's.

Between all of the venues, there is drinking, dancing, drama, music and fun for just about everyone.

"You will not find an area that will beat us in entertainment," said Larry Simmons, a business owner in the district.

"This is what it is. Lubbock is the extraordinary capital of entertainment in West Texas."

Simmons owns the Palladian "Live" and the Beergarden. Both are live music venues.

"The Palladian is a great place to see a show," he said. "It is the best concert hall in town."

The Palladian was a dance club before thousands of dollars renovated it into a live music venue.

The Palladian and the former 19th St. Warehouse have housed many bands such as Collective Soul, the Nixons, the Toadies, RATT, Foghat, Iron Maiden, Tesla and Candlebox.

On tap at Palladian is Jackyl Sept. 9, Cory Stevens Sept. 13 and Soak Sept. 17.

The Beergarden, located across the street from Palladian, has been a part of the Lubbock music scene since 1979.

"It is the finest outdoor facility in the city," he said. "There is always good music."

A lot of musicians who are popular today started as solo acts in the Beergarden, Simmons said.

Robert Earl Keen and Jack Ingram

both used to play frequently at the Beergarden before they became popular, Simmons said.

"The Beergarden has offered good music in a good atmosphere for a long time," he said.

Both venues offer the experience of promoter Lane Arnold, Simmons said. Arnold is an independent promoter who books shows for the Depot District, including Stubb's, the Beergarden and the Palladian.

"A big part of the shows we book are the importance of Lane's contacts," Simmons said. "He has a good head on his shoulders for the shows he books."

The district only had three businesses four years ago and continues to grow larger every year.

"There is a good buzz on Buddy Holly St.," Simmons said. "I expect even more growth over the next couple of years."

Clousseau's, Tom's and Bleacher's are all new additions to the district this year.

Bleacher's is a hot new sports bar in Lubbock and adds variety to the district with Sumo Wrestling every Thursday night.

Hub City Brewery offers a varied menu and a selection of specialty brews they make themselves.

Roadhouse Ruby's, voted favorite club in *The University Daily* readers poll, offers dancing and music to students every night.

"We offer good service, good drinks, good music and good crowds," said assistant manager Darren Peek.

They offer live music every Wednesday and Sunday night and drink specials throughout the week.

"We provide a classier, upscale dance club with 90's light, sound and entertainment," he said.

"The District is a great thing for Lubbock for entertainment and food," Peek said. "It brings a lot to the community and to Lubbock as well."

Many clubs and bars located throughout Lubbock are frequented by Tech students.

Bash Riprock's is located across the street from campus at 2419 Main St. and is a regular stop for many students.

"We love Bash's," said Elizabeth Goldston, a junior public relations major from Lubbock. "There are always people. Everyone's friendly and there are cheap drinks."

Those interested in music with a little more twang can visit Cowpokes or Midnight Rodeo. Thursday night is college night at Cowpokes, located at 1708 4th St.

Midnight Rodeo, South Loop 289 and University Avenue, sometimes hosts live bands but always offers drinks and dancing. The Piranha Room inside of the Midnight Rodeo offers rock and dance music for those not interested in country music.

Many local bands frequent area clubs and bars.

One of the most popular bands in the area, Aaron Avenue Records band Spilling Poetry, often displays their alternative style of original music in the Hub City.

Touch, another band popular among Tech college students, just released an album during the summer.

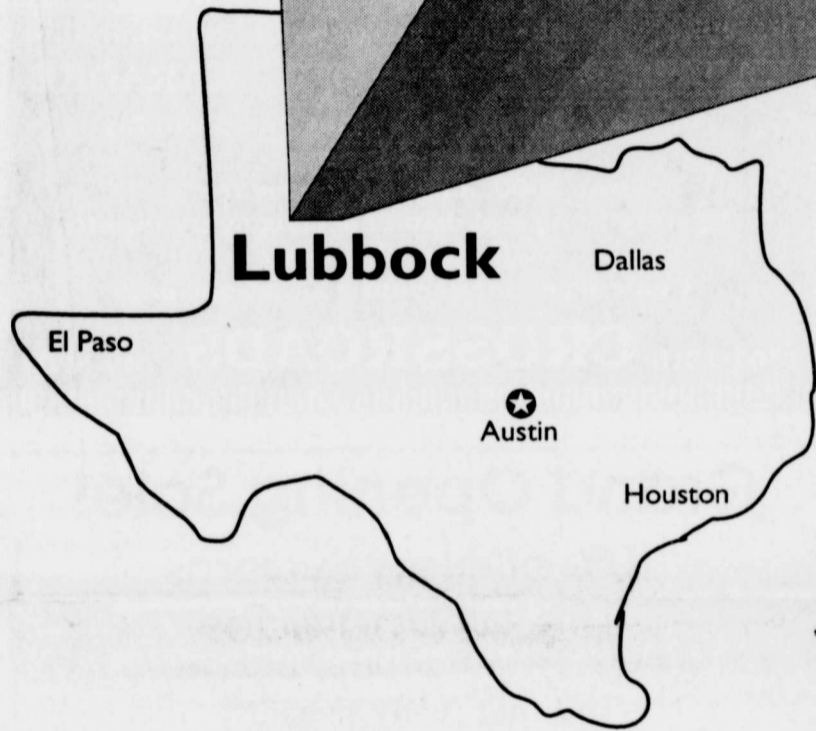

Rhythm and blues and funk bands are popular and include the likes of Mojo Hand, Charlie's Backyard Planet and the Buddy Simmons Band.

Bad Opie features several employees of a local radio station. They cover 1990's rock and alternative music.

Former Tech students Pat Green and Cory Morrow bring country music to the clubs and venues of Lubbock.

The bands, the drinks and the clubs offer a variety of entertainment for students to enjoy on nights when they are not studying or sleeping.

story by Sebastian Kitchen

▲ **Streakin':** The Depot District, located at Interstate Highway 27 and 19th Street, features well-known clubs and bars for those who like to take a break from classes and the rut of everyday life in Lubbock. Drinking, dining and dancing are but a few of the activities students will find.

# Magazine to feature only natural-breasted women

LOS ANGELES (AP) — The world of synthetic, sexual fantasy is getting a dose of reality.

Sort of. *Perfect 10*, which hit newsstands this month, features topless women who have NOT had breast implants.

"We're going to educate the readers of the world what real breasts look like, because they've forgotten," said publisher and multimillionaire Norm Zadeh, 47.

"They think when a woman lays down, her breasts are supposed to stand straight up."

Zadeh (pronounced ZAY-duh) said implants have had a negative impact on the mental well-being of women.

Experts in the publishing industry said *Perfect 10* is the first magazine

of its kind, but it is premiering in a market saturated with about 200 erotic female magazines.

What's more, they said, Zadeh is assuming that consumers base their purchasing decision on whether or not the models have had cosmetic breast surgery.

"If he's going for the puritan at heart, he's wrong. The puritans aren't going to be looking at a naked woman in the first place," said Samir Husni, who is a

journalism professor at University of Mississippi in Oxford and author of guides on new magazines.

He added: "If it's a fantasy magazine why do I want to look at something real?"

Martin Walker of Walker Communications, a magazine publishing consulting firm in New York, said Zadeh is a first-

time publisher with very little idea of the financial challenges in the publishing industry.

"Playboy is the only one that has managed to attract big advertisers for a publication that has... straddled pornography and legitimate journalism," he said.

Zadeh insists *Perfect 10* can do that, and in fact, wants his models to write some of their own articles.

Printed on heavy, glossy paper, *Perfect 10's* first cover features a blonde in a yellow skirt and blue halter top standing in the desert, a silver Airstream trailer behind her against a deep blue sky.

All 15 of the models inside the first issue are topless and nearly all wear panties.

Most were photographed in daylight against a backdrop of beaches, country homes and the desert.

Natasha Bell, the blonde Miss Michigan USA 1996, is featured in a "bed frolicking" photo layout accompanied by a two-page interview in which she reveals the traumas of growing into her 6-foot-frame.

A man who estimates his personal wealth at the "double digit millions," Zadeh will not accept advertising money for the first two issues.

The magazine, to be published internationally six times a year, will sell for \$6.95 per issue.

"Look, if I lose \$500,000 a year on *Perfect 10*, I'll be happy. In two bad days (on Wall Street) I can lose \$500,000. It's not about that," he said.

"I'd like to put out something that raises the standards."

In promoting his own moral standard through the magazine, Zadeh won't accept advertising money from tobacco companies.

A former visiting professor of business and math at Stanford University, Columbia University and UCLA, Zadeh said *Perfect 10* recaptures the "classy days" of *Playboy* Magazine that has become "implanted and raunchy."

*Playboy* founder, Hugh Hefner, responded with a prepared statement faxed to *The Associated Press*.

"We would certainly never disqualify a beautiful model because she had made the decision to enhance her figure," part of the statement read.

Zadeh predicts a backlash against surgically enhanced bodies.

But according to the American Society of Plastic and Reconstructive Surgeons, to which 97 percent of the board certified plastic surgeons in the country belong, the implant trend is gaining momentum.

In 1992, the society reported that 32,607 women underwent breast augmentation.

Last year, 87,704 women underwent the procedure.

Zadeh said *Perfect 10* could liberate women from the unattainable standards of beauty.

It might also educate men, he said. "I've been to strip joints and fallen in love."

"And then you realize they're not real, and it's heartbreaking."

**“ Perfect 10 could liberate women from the unattainable standards of beauty. It might also educate men. ”**

# What's your mustache?

## Sodas are top drink during college years, milk fizzes out

BY LAURA HENSLEY  
The University Daily

While moo juice seems to get pushed to the back of many college students' refrigerators these days, many seem to thirst for something else such as soda and coffee. According to the National Fluid Milk Processor Promotion Board, 30 percent of college-age men and women report drinking milk regularly, and sodas and coffee are replacing many of their beverage must-haves. Students still may pour milk over their favorite cereals or dip Oreos in it, but the trend of replacing milk with

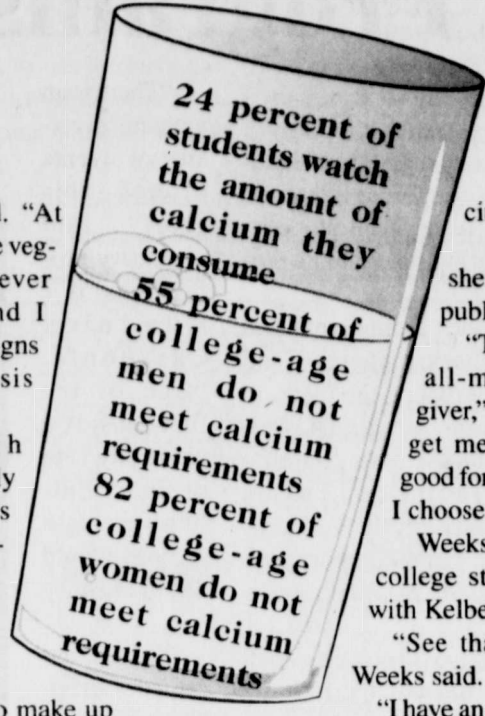

other beverages is on the rise. "I never drink milk," said Marissa Kelberlau, a freshman business major from McAllen. "I don't like it. I don't drink it because it's baby food, and I'm not a baby anymore. I get calcium from other sources, like broccoli." According to Texas Tech Housing and Dining Services, Tech dining halls roughly distribute 37,000 gallons of milk each year. Four varieties of milk are offered in the residence halls. Chocolate, skim, whole and low fat milks are some of the 10 beverages offered in the cafeterias. "I usually drink milk if I have

cookies. I have to have milk with them," said Mandy Weeks a freshman industrial engineering major from Wichita Falls. "I don't drink it like during the middle of the day unless I'm eating something it tastes good with." Many college students are drinking sodas on a regular basis. This trend of choosing soda over milk is disturbing to some health experts who believe students should still be aware of what they eat and drink. College students need 1,200 to 1,500 milligrams of calcium each day, according to the National Fluid Milk Processor Promotion Board. This would be like drinking three

eight-ounce glasses of milk per day. Instead, students drink, on average, more than a glass of soda each day. Although soda and coffee provide students with an instant caffeine jolt, milk provides the body with nutrients such as protein and calcium. "I'm a Mountain Dew freak," Kelberlau said. "Like in the morning I'll grab a Dr Pepper or something. I need to stop but I don't want to go through it. It's like withdrawals from a drug." The habit of drinking milk starts at an early age and may follow college students throughout their lives. "I remember I used to give my milk away at lunch when I was little,"

Kelberlau said. "At my house we are vegetarians. I never drink milk and I don't see any signs of osteoporosis yet." Although Kelberlau rarely drinks or eats any dairy products, she said she makes up for it in other ways. "You need to make up for it with substitute foods," Kelberlau said. "A lot of green foods have cal-

cium." Kelberlau said she thinks milk is too publicized. "They say it is the all-mighty calcium giver," she said. "Don't get me wrong, milk is good for some people, but I choose not to drink it." Weeks, a milk drinking college student, disagrees with Kelberlau. "See that's sad to me," Weeks said. "I have an ice chest with my milk and orange juice in it right now in my room."

## Do's and don't's college life for the Tech freshman

WAYNE HODGKIN

I would like to take this opportunity to welcome all students back to Texas Tech. For the freshmen and new students, welcome to new classes, new friends and a real social life. For the returning students, welcome back to not having a parking space (for those of you who did find a parking space in the commuter lots this morning — get a life, because I know you were here at 7 a.m.). I am writing this column for the newcomers out there, but I am sure it will also come in handy for those students who have been here for five or six years and still have not caught on to the ways of college life. So, welcome back to the university that is full of student-hating Greeks and Greek-hating, gay-bashing, Christian-bashing, atheist-bashing and dumb-jock-bashing students. Since freshmen are the new addition to Tech, I would like to share a few pointers I have picked up from three years of experience in this place we so affectionately refer to as Raider Land. So without further ado — the do's

and don't's of college life. **DO:** • Make name for yourself on your dorm floor. This does not mean getting a bucket of red and black paint and splattering your name all over the floors of your dorm but making friends with your floormates. The best way would be to get a group of your floormates together and penny lock your RA's door (make sure your RA is in the room first). Slip a list of demands for the year under their door and insist they agree to at least half of it. If your RA does not live up to their end of the bargain, kidnap them, take them to the lobby and strip them down to their scivies. • Aggravate your roommate. Make your roommate think you're a nut case by doing weird and crazy things like talking to inanimate objects — like an imaginary cat. Talk to it, play with it and feed it real cat food. One day leave the window open and when your roommate walks in start yelling out the window "here kitty kitty," then turn around and cuss them out for leaving the window open and losing your cat. Then, never mention the matter again. **DON'T:** • Eat non-labeled food in the dining hall, especially when you cannot identify its contents. If you do eat the Red Raider Surprise casserole and experience stom-

ach discomforts or dizziness, don't worry. This is normal, but if it continues, go to the nearest emergency room or call the Poison Control Center at 1-800-764-7661. Of course, when you move off campus, the dining hall food is quite tempting compared to the redundancy of Ramen noodles or Mac and Cheese. • Pull the fire alarm. Although this prank may be funny to the few drunks coming in from a party at 3 a.m. it is not funny to those students sleeping at the time. I guarantee you, though, when it does happen there will be at least one student running outside the dorm with nothing but their underwear on. Some other hints I have picked up on are: • Buy scantrons in bulk and keep them in a safe place. • Don't even think about driving on campus without the correct parking sticker, you will get a ticket every time, that is IF you get through the cop-in-the-box. • Keep a copy of your undergraduate catalog handy. This will be your "bible" throughout your undergraduate career at Tech. • See your adviser at least once a semester. Get to know them — they might be able to get you into that important to get into class. • Get involved.

There is an organization or activity on campus that is right for you, and it is the best way to meet new people, have fun and really get in with the college crowd. • Don't walk near the street in rainy weather. More than likely you will get splashed by an oncoming car every time, no thanks to the incessant flooding problem in Lubbock. Take it from an experienced person. • Be prepared for all types of weather — scorching heat, bitter cold, drenching rain — we get it all. Don't even get me started on the wind. Everyone has heard the expression "if you don't like West Texas weather, wait five minutes and it will change" — it originated in Lubbock. These are only a few of the hints I've come across and have learned throughout my undergraduate years, and I hope they will live up yours and help you out along the way. Before long you'll be bleeding red and black, cheering those Red Raiders down the field and across the gym floor. As for the skills you will learn at this wonderful institution, I have no advice on how to apply them toward getting a job after graduation, but that is an entirely different subject. Wayne Hodgkin is a senior journalism and English major from Haskell.

“ Make a name for yourself on your dorm floor. ”

## Riders begin attempt to break covered wagon distance record

COLORADO CITY (AP) — A covered wagon moved ploddingly along one recent afternoon going east on the access road of Interstate 20. It was pulled by two hot mules. Beside the wagon a man rode on horseback. Printed in ink on the wagon's canvas were the words, "Ride for Life," and under those words were a few more, "They say it ... " and there the sentence ends. "Well, we just ran out of ink," said Harley Maples as he held the reins in his hands and laughed. "You could say our finances are limited. It's supposed to say, "They say it can't be done." The man on the horse, Billy Pearson, said, "They said it can't be done, but we're going to do it. But need sponsors real bad. This thing is going to make history and tell those good cooks in Abilene to come out and meet us with some of that good home cooking." Pearson, 40, and Maples, 57, both of Odessa, say they intend to set a new distance record for a covered wagon ride by going around the perimeter of the entire continental United States. The distance is 8,018 miles (Pearson's figure) and probably about 5,000 miles farther than anyone else has ever gone, Pearson said, figuring that the pioneers might have gone 3,000 miles if they rode from coast to coast.

Pearson said that covering anywhere from 15 to 25 miles a day, depending on how well the mules do, the entire trip would probably take 18 months. Their first real stop is in Baton Rouge, La. There the mules, Boy and Girl, will be replaced with fresh mules and Pearson and Maples will be joined by two other wagons. From Florida, the pair will travel north to Maine. Then they will go across the southern part of Canada to Seattle, a trek that is planned for spring and early summer. The next leg is south to Los Angeles. The final leg is east, back to Odessa. Both men are divorced, giving them time for the journey. They brought a stove, but it didn't work, so they eat straight from their stock of canned foods. Some potatoes, they say, they will cook by burying them and covering them with coals. They do not eat in restaurants. They do not sleep in motels, but instead they sleep in the back of the wagon where they have placed two narrow beds. The wagon journey was the idea of Pearson, an auctioneer. Five years ago, he made a 2,000 mile covered wagon trip to raise money for AIDS. This trip, though, has no charitable cause, Pearson said.

## Insects make "Mimic" top notch movie

BY CHRIS SEARIGHT

The University Daily  
Running Time: 104 min.  
Rated R (for terror/violence and language)

For thousands of years, man has been evolution's greatest creation...until now. Sound familiar? This is the tagline for Dimension Films's latest suspense movie, "Mimic." Besides the thousands of insects swarming around Manhattan, Mira Sorvino (Mighty Aphrodite), Jeremy Northam, Charles S. Dutton and Josh Brolin star in this buggy suspense film.

The film opens with reports of a deadly plague that spreads throughout Manhattan taking the lives of

young children.

The virus is spread by cockroaches, and Susan Tyler (Mira Sorvino) must come up with a way to destroy the disgusting little creatures. Susan and some of her colleagues genetically create the perfect designer bug called the "Judas Breed." The Judas Breed, half-mantis, half-termite, is a bug that can mimic the deadly cockroaches and then kill them. Shortly after the Judas Breed is released, the plague ends, but something unexpected is going on. When the bugs were designed, they were supposed to die off, but three years later, these sterile crea-

tures have kept on evolving.

Now the story might sound a little lame or even

a little over done, but what really makes this movie tick is the "elements" that director Guillermo Del Toro (Cronos) uses in this film. The special effects and makeup in "Mimic" are also top notch.

The insects are winged mutants that look like a mix between a praying mantis and a cockroach the size of a human. As far as the soundtrack goes, clanks, whooshes and buzzing were all in the right places and never over used throughout the film. Dark

scenes and rainy nights are used effectively as well.

"Funny Shoes" spoon boy, who clicks spoons together, "mimics" the sound the big bugs make and anything else with feet. This is a set up for a suspenseful scene which occurs later in the film. The movie's scenes like this are what make "Mimic" an excellent suspense movie.

All in all, "Mimic" was an excellent movie. The acting was excellent, especially from Mira Sorvino, but the real stars were the creepy insects.

Movies that attempt to make audiences scream, squirm and shriek come out every once and awhile. But movies that actually succeed with these elements are rare. "Mimic" does all of that and more.

## Wildflower garden dedicated to Lady Bird Johnson

STONEWALL (AP) — The U.S. secretary of transportation has dedicated a native wildflower garden near the LBJ Ranch to honor former first lady Lady Bird Johnson.

As first lady from 1963 to 1969, Johnson promoted efforts to enhance

the environment, including the Highway Beautification Act of 1965, which helped improve landscaping, remove billboards and screen roadside junk along the nation's highways.

"As first lady, Mrs. Johnson cham-

pioned the faith that America is beautiful, and that we must leave the country looking better than we found it," said Transportation Secretary Rodney Slater.

The roadside garden is located at the Church Park rest area on U.S. 290

near the LBJ Ranch.

Open to the public, the garden includes flowers and plants native to central Texas, including desert wildflowers, Texas redbuds, mountain laurels, Texas sages and black-eyed Susans.

## Cartoons help bring kids to stamp collecting

WACO (AP) — The "Wascally Wabbit" of Saturday morning cartoons is now invading your local post office, and his friends will soon join him.

The Bugs Bunny stamp has been on the market for about a month and demand has skyrocketed, said Alicia Aguilar, Highway 6 Post Office window clerk.

**WEEKLY HOROSCOPES**

**Weekly Tip:** Getting organized is a top priority. Spend time cleaning house. Don't waste money on frivolities.

**Aries (March 21-April 19).** You'll want to work, even if you don't have to. An argument with an attractive person could lead to romance. Pay off an overdue bill.

**Taurus (April 20-May 20).** Make plans with your true love, then start putting them into action. Let a partner inspire you and lure you into an adventure.

**Gemini (May 21-June 21).** Stick close to home. Provide comfort to your sweetheart. Help friends see eye to eye by acting as translator and a mess will clear up.

**Cancer (June 22-July 22).** Review an old subject rather than starting a new one. You're fascinated by what's going on at home.

**Leo (July 23-Aug. 22).** Your emphasis is on money. More's coming in, so learn how to take care of it.

**Virgo (Aug. 23-Sept. 22).** You are incredible this time of year. Get everybody around you organized. They all need your helpful advice.

**Libra (Sept. 23-Oct. 23).** If you can't remember making a promise, don't worry. Somebody will remind you. You'll be power-

ful, confident and good looking.

**Scorpio (Oct. 24-Nov. 21).** It's about friends and group activities. Assist your committee in finishing a goal they've set. Don't take on any new projects. You're under pressure.

**Sagittarius (Nov. 22-Dec. 21).** Figure out what needs to happen so you can do it. Finish an old project — don't start a new one yet.

**Capricorn (Dec. 22-Jan. 19).** Pay attention to your career. Make points with your supervisor by listening and doing what you're told. Not an easy job.

**Aquarius (Jan. 20-Feb. 18).** These days are about other people's money, getting your affairs in order and finishing the details that were requested. Fill out the paperwork and turn it in.

**Pisces (Feb. 19-March 20).** Get everything hashed out so you and your partner know where you stand. Now that you've got a good partnership, start spending money together.

**If your having a birthday this week:** You can do whatever you want, once you decide what that is. You're powerful and well organized.

Linda Black, © 1997, TMS

**Dreadlocked duo 'demented'**

BY SEBASTIAN KITCHEN  
The University Daily

Two white rappers, with dreadlocks dressed as clowns and a record released by a company owned by Disney - people should have known it would never work.

The Insane Clown Posse received more free publicity than they ever could ask for when the duo's album, "The Great Milenko," was taken off the shelves by Hollywood Records.

The album was in stores for six hours before being pulled off of the shelves.

The Detroit band rose from relative obscurity after the event was featured on many television shows and in magazine and newspaper articles. They even were interviewed on MTV.

They had previously released three albums and an EP that had a combined sales of more than 300,000 records.

All three contained their dark and twisted lyrics.

Hollywood Records, owned by parent company Disney, released the rights to the album after weeks of intense negotiation. Their tour had been canceled, and they were left with nothing after their June 24 release was dropped.

The Posse was being courted by

12 record labels before deciding on Island Records.

"The Great Milenko" was re-released Aug. 12 and stayed on the shelves.

The album is selling well all over the country but not because of the duo's talent.

They are selling off of the hype from their outrageous outfits and the publicity of being dropped by their former label.

A lot of people would not like the album, but by rap records standards it is good. It is not the strongest album released in the industry this year, but has received the most hype and publicity.

The album is strong with an intro by fellow shock-rocker Alice Cooper and appearances by Steve Jones of the Sex Pistols and former Guns N' Roses guitarist Slash.

The rappers are two angry young men and that is portrayed in their music. They sing about hate, horror and death. People buying their music know what they're getting - a demented album by a duo raised in the

Insane Clown Posse

Courtesy Photo

tougher streets of inner-city Detroit. There is nothing pretty or positive about the album, but Disney might have left the record on shelves if the two had worn mouse ears instead of dressed like clowns.

BROADWAY & UNIVERSITY      741-0150

**Northwest Houston sinking faster than coastal areas**

HOUSTON (AP) — Residents on Houston's northwest side are feeling a little low right now, but that sinking feeling has nothing to do with an emotional downswing.

New data shows northwest Houston is now the fastest sinking land in the coastal area. Between 1987 and 1995, some areas have dropped some 1.98 feet.

Houston's had a subsidence, or sinking problem, for years.

But officials had been more concerned about the southeast side of

Harris County and Galveston.

This new trend affecting the northwest side, revealed in a National Geodetic Survey, is important but not surprising, according to those who track sinking land for the Houston area.

"It's not new information," Ron Neighbors, general manager of the Harris-Galveston Coastal Subsidence District, said Wednesday.

But it does mean a fine-tuning of the agency's subsidence plan. The plan sets a timetable by which areas must convert from groundwater,

which comes from underground sources, to surface water obtained from lakes or rivers.

And that worries some northwest-area residents, who say they can't convert to surface water under the existing timetable and aren't excited about seeing their water bills go up. Surface water costs more to deliver than groundwater.

"We're not convinced that there is a problem in North Harris to the extent the plan suggests," Floyd Mechler, president of the North Har-

ris County Water Users Association, told the Houston Chronicle.

Taking the new information into account, Neighbors' agency has until next year to submit a new updated plan to the state for the surface water conversion in northwest Harris County.

The existing plan calls for east Harris County to convert to using 80 percent surface water by 2005, central-north Harris County by 2002, west and northwest Harris by 2010 and the far northwest by 2020.

# Fayed Away

Princess Diana's Dodi lived like a prince, skipped out like a pauper

BEVERLY HILLS, Calif. (AP) — When he was producing movies, Dodi Fayed held court in a series of urban palaces where he gave memorable parties for the Hollywood glitterati.

One problem: he didn't always pay the rent.

Now that he is squiring Princess Diana, the Egyptian playboy's trail of lawsuits over unpaid bills is setting tongues wagging in his former haunts. "I don't think Princess Diana will marry him," said one former acquaintance who did not want to be identified. "It's not because of his womanizing but because of his financial problems."

Most of those problems resulted from his high style of living and entertaining.

Court records show that Fayed invited 21 guests to a banquet at New York's 21 Club in 1990 with flowers, food, wine and cigars provided at a cost of \$5,355. According to the records, Fayed never paid the bill, and litigation has stretched over seven years. With interest and lawyers' fees, his debt is close to \$10,000.

Yet Fayed's publicist Pat Kingsley says that someone impersonating her client ran up bills in his name and that Fayed didn't pay the 21 Club tab because "it's not his."

Kingsley acknowledges, however, that Fayed and not an impostor bounced checks and failed to pay rent on several luxury homes in Southern California.

In Beverly Hills, he leased a series of mansions for prices ranging from \$20,000 a month to \$35,000 a

month and was sued repeatedly for leaving landlords in the lurch.

Either his checks bounced or he didn't pay the rent at all, according to lawsuits filed by the landlords. Two homes were severely damaged, the landlords claimed, citing pet urine stains on carpets and furniture, cigarette burns and, in one case, massive water damage when he refused repairmen entry to fix a leaking roof.

Kingsley said all of the lawsuits and judgments against Fayed have been settled.

Fayed doesn't run afoul of all his landlords. Celebrity realtor Elaine Young said she leased a home to him when he was producing "Chariots of Fire" and said he was a model tenant.

"He was very sweet and he left the house in perfect condition," she said. Fayed's father, self-made billionaire Mohammed Fayed, owns London's famed Harrod's department store, is a part owner of the Hotel Ritz in London and has 11 homes around the world. In a touch of irony, he also has a leasehold on the Paris home of another controversial couple of royal lineage — the Duke and Duchess of Windsor. He is auctioning the home's contents at Sotheby's next month.

The mansions Dodi Fayed occupied were "amazing," according to

**“ I don't think Princess Diana will marry him. ”**

**Dodi Fayed's former acquaintance**

one frequent party guest who spoke on the condition of anonymity.

"He had a party at one of these places, and it had a full bowling alley," said the guest. "There was a band and he

showed movies in a screening room."

Celebrities were entertained regularly by Fayed, the source said. "It seemed like he wanted to be a Hugh Hefner type, always entertaining at his home."

Some of his party guests included actors Tony Curtis, Ryan O'Neal, Farrah Fawcett, Brooke Shields and Robert Downey Jr., the source said.

"He was actually very quiet. I don't know if he was aloof or shy," the source said.

"He just collected celebrities. He would invite them over for dinner and just sit back and listen. He didn't say much. And he was always with very pretty women."

One of his pretty women, model Kelly Fisher, has sued him for breach of contract, claiming she was his fiancée and gave up a lucrative career at his insistence only to be dumped when he took up with Princess Diana. She claims he owes her \$440,000.

But Fisher, who hired celebrity lawyer Gloria Allred, quickly capitalized on her role as a spurned woman, selling interviews to the British tab-

loids for a reported \$300,000 and depicting her ex-boyfriend as a dud in the bedroom.

This led his ex-wife, American model Suzanne Gregard, to enter the fray, suggesting to a London newspaper that Fisher's scorned woman pose was bunk. Gregard was quoted by *The Independent* as saying she encountered Fisher a few weeks back at a Sunset Boulevard watering hole and they talked.

"She said, 'I broke up with him. I've had enough,'" Gregard recalled. "But she also said: 'I've kept the ring — I'm no idiot.'"

The ring in question is a \$230,000 sapphire surrounded by diamonds that bears a striking resemblance to Diana's engagement ring from Prince Charles.

The British press has had a field day with the Diana-Dodi romance, now shorthanded as D&D.

The tabloids have charted their travels aboard his father's \$32 million yacht and royal watchers have begun speculating on the political implications of an Egyptian becoming the stepfather to the future King of England.

In Hollywood, where he financed a number of movies including "Hook" and "The Scarlet Letter," he was well known and well liked.

"He's a nice guy," said one social acquaintance who wished to remain anonymous.

"He's like a spoiled rich kid who's totally controlled by his father. He has sweetness and kindness and, unfortunately, he bounces checks."

## Borrowed bovines allow children to compete at fair

TIMONIUM, Md. (AP) — Sarah Sroka may seem like a typical teen, but don't look for her hanging out at the mall after school.

The Millersville, Md., girl is more likely to be found grooming the 1,100-pound steer she leases from the U.S. Naval Academy dairy farm and enters in competitions at state and county fairs.

"My boyfriend thinks it's kind of weird," says Sarah, 16, smiling through braces. "He's like, 'You have a cow?' But I like it a lot."

She is one of about 25 kids who pay \$1 a month to rent cows, bulls and calves from the academy's 865-acre dairy farm in Gambrills, Md.

Statewide, a few dozen private farmers also lease animals to urban and suburban children looking for a taste of farm life.

Many of the borrowed bovines could be found last week at the Maryland State Fair, parading in front of a judge.

"You have to hold their head up and walk them slowly and clockwise in the ring," said Emily Yeiser, 12, of Arnold, who leases four cows. "And washing them up good is important, too."

Children, parents and 4-H leaders say the program is a unique opportunity to learn about animals, farms and, perhaps more impor-

tantly, responsibility and dedication. The Naval Academy, which began leasing its cows in 1992, pays for the animals' food, barn and equipment.

Participants ages 8 to 18 are required to spend at least four hours a week at the barn, grooming, feeding and cleaning. But many go every day, doting on the cows as if they were the family dog or cat.

"They're oversized pets," said Emily, who at 5 feet, is shorter than her largest Holstein, "Coco."

Parents say the farm is a safe, tranquil place where children develop friendships, knowledge and goals. Emily is already considering a career as a veterinarian or farm owner.

"It's an oasis, a world apart," said Martha Boynton of Annapolis, whose daughter, Margaret, is a member of the Anne Arundel County 4-H Dairy Leasing Club.

But a cloud looms over the future of the academy's dairy farm, which was established in 1911 to provide students with safe milk after an outbreak of typhoid fever was traced to commercial suppliers.

Academy leaders have asked permission from Congress to close the farm, saying it costs more to produce the milk than to buy it from a commercial dairy. Congress has been reluctant to go along, and 4-H members and others are fighting to keep it open.

Nearly twice as many women as men lose the TV remote in their bed; twice as many men as women lose the remote in the refrigerator.

## Surprise, Surprise . . . A Season of Surprise

Nightlife Series Offers Students Unexpected Entertainment

Ted, a Tech student, had never attended a cultural event before. He had never been particularly interested in dance, instrumental music, or plays. And now, as he walked into the theatre to see his first orchestra performance, he wasn't quite sure that he was going to enjoy himself. In fact, he was only going to extra credit in one of his classes.

But when Ted left the theatre, there was just one way he could describe his first Nightlife experience... "a very big surprise." He called it "totally amazing" and he "would not pass up another chance" to see something like this again.

Ted and 2,377 students just like

him were surprised by last year's Nightlife Series, and the events on this year's Nightlife series just may surprise you too. Headlined by names like **James Earl Jones**,

**Mary Matalin**, **James Carville**, and **Ramsey Lewis**,

this year's Nightlife Series offers students inexpensive opportunities to see some of America's best entertainers and lecturers right here on campus. From Native American and African music, dance and

storytelling to jazz piano and medieval dance music, Nightlife 1997-98 offers more than a few surprises.

OK, you get great shows, but you also get low student ticket prices...

never more than \$9.00. This makes every event more affordable than a football game, a Broadway

show, or a concert in the Depot District. And students can even get discounts off of their student prices if they purchase a Nightlife Series or a Nightlife Gold Card.

So find out what events are coming to Tech this year. You wouldn't want to miss out on the biggest event of the year because you waited too long to buy tickets!

For a full schedule of Nightlife events, or for further information, stop by the University Center Ticket Booth on the second floor of the University Center or call 742-3610. You can also check out Nightlife's new web page at [www.ttu.edu/uc/nightlife](http://www.ttu.edu/uc/nightlife) for more information about events, and an opportunity to win a couple of free Nightlife tickets to any event you choose.

## What the UC has to offer!

On behalf of the staff and students of the University Center, Welcome Back! The University Center is an integral part of the educational and campus service program of Texas Tech University. As the center of the campus community, it serves many needs outside the classroom related to personal and organizational services and programs. Raider Express, Food Service facilities, lounges, meeting rooms, Activities Office, Student Organizational Services, Games Room, American State Bank, High Tech Computer Store, Check Cashing, Cox Cable,

Post Tech, UC Catering, the Allen Theatre and Tech Express fulfill the daily needs for thousands of students, faculty, staff and guests. Remember, registered student organizations can utilize UC Meeting rooms free of charge! The combination of facilities, services, programs, and people results in a University Center that is much more than a physical structure. We exist for the purpose of serving the campus community. So come on in, have something to eat, get a drink or a bag a chips., Whatever your needs may be, Let us serve you!!!

## UCP - Not your ordinary student organization

What if there was an organization that provided you the opportunity to work with people like: Steve Martin, Eddie Murphy, Tina Turner, Robin Williams, Maya Angelou, Harry Connick, Jr., or David Copperfield? Would you pass up this incredible opportunity? If you don't belong to UC Programs, you already have!

UC Programs, a student organization based in the University Center, is dedicated to providing the best in quality entertainment and educational programs. Com-

posed of five diverse committees, Fine Arts, Ideas and Issues, Cultural Exchange, Concerts, and Films, UC Programs is one of the major cultural presenters in the South Plains region.

How can University Center Programs benefit YOU?

UC Programs gives you the opportunity to meet people, make friends, enhance your skills and gain valuable experience that will prove invaluable when you go to land that big job in the real world (and it's fun!). Employers are looking for applicants with "hands on experience" in professionalism, creativity, communication skills and experience in management, not just a degree. We're looking for students from all ma-

jors with a desire for experience and willingness to learn. A match? We think so. Come to one of the recruitment parties and see if UC Programs will work for you!

Recruitment Parties will give you an opportunity to meet current UCP members and learn about the different committee's you can be involved in. **The parties will be Tuesday, September 9, from 4 to 5 pm and Wednesday, September 10, 6 to 7 pm in the UC, Room 228.**

## CAN Takes Lead for Social Change

The Community Action Network (CAN) at Texas Tech strives to provide students, staff, faculty and community members with programs aimed at helping our community and increasing awareness of social needs.

CAN's Community Service Fair will take place on September 8 from 9am to 2pm in the University Center Courtyard. Fifty agencies will provide information about volunteer opportunities.

CAN will once again be spon-

soring the Tech Tutors and Mentors Program this fall. This program matches Texas Tech student volunteers with K-12 students who are in need of friendship and academic assistance. Applications are available in the UC Activities Office, Room 228.

The 'Spirit of Sharing' program, will once again include a number of aspects such as the Angel Tree, Toys for Tots, Food Drive, and Toys for Boys.

For further information please contact UC Activities at 742-3621.

## Homecoming 1997

While the idea of Homecoming eludes to scenes of alumni returning to their alma mater to relive their college days, the Homecoming Coordinating Committee is busy planning a variety of events during the week-long festivities for current students and the community. This year's homecoming theme "A Techsan Tradition" is an opportunity to highlight Tech traditions and to develop new ones. "I want people to get excited", said Christin Cummings, Homecoming Committee Coordinator. "Our goal this year is to increase student involvement and support at the events."

Students and organizations can participate in Techsan Traditions by sponsoring a Homecoming Queen Candidate, entering a float in the Homecoming Parade and participating in the "El Fuego" activities on Friday night which include the Snake Dance, and Homecoming Pep Rally and

Bonfire. Fans can also participate in new traditions, like entering the spirit banner contest or attending the Homecoming Concert at the Coliseum.

For information on all homecoming events and to get a copy of the Homecoming Events Book, call Student Organizations Services at 742-3621 or drop by 210 University Center.

## Officer Training Conference

Student Organizations Services, in conjunction with Leadership Tech, is sponsoring a free Officer Training conference for all officers of registered student organizations. It is designed to provide officers with information and resources to be effective student organization leaders.

"At least one officer from every registered student organization is expected to attend", said Leann Elkins, Assistant Coordinator of

OCTOBER 11, 1997

Student Activities. "Student leaders need to know the benefits and privileges of being registered to be effective in their role."

Officer Training is scheduled for Saturday, September 27 from 9:00 am - 4:30 pm in the University Center. For more information and to get a registration form, call Student Organizations Services at 742-3621 or drop by 210 University Center.

## New UCP Films Committee

UC Programs is offering a new student committee to get involved in - The Films Committee! This group has put together a year of films that will appeal to any cinematic taste. Each movie is offered as part of a series that covers international films, independent films and films that follow a particular theme or genre.

Bringing cinema from France,

Spain, Australia and Sweden, the *International Film Series* contains six of the most entertaining and significant international films from the '90's.

The *Independent Film Series* includes films that have rarely or never made an appearance in Lubbock and are guaranteed to make you think and feel like you never have before!

The Films Committee will also present several films in a unique coffeehouse setting. Admission will include coffee and desserts.

The committee will also present 2 different film festivals. So, whatever your taste in cinema or if your looking for a student organization, UC Programs has a film and a committee for you!

## Dates to remember

## Mastering the Future

■ Campus vision moves closer to becoming reality

BY GINGER POPE

The University Daily

Proposed English/Philosophy/Education Complex

Even though it is not set in stone, Texas Tech officials are one step closer to finalizing Tech's Campus Master Plan.

Tech's Board of Regents approved the office of Chancellor John Montford to submit the Facilities Construction and Deferred Maintenance Master Plan, otherwise known as the Five-Year Campus Master Plan, to the Texas Higher Education Coordinating Board Oct. 15.

Regents also gave authorization for Tech administrators to take plans for a new English/Philosophy/Education Complex to the coordinating board.

Theresa Drowell, director of the Department of Facilities, Planning and Construction, said even though these plans are going to the coordinating board, the Campus Master Plan is reviewed every year and is always subject to change.

"What many do not realize is that the Master Plan is just that — a plan, and if we go along and decide it will not work, we can adjust it," she said.

With construction of the United Spirit Arena underway, the main project administrators would like to start building is the English/Philosophy/Education Complex.

The Master Plan also includes three parking structures, rerouting Indiana Avenue and creating a better loop system within Tech.

Montford said with the arena project on its way to completion, the English/Philosophy/Education Complex is his new focus.

The arena was scheduled to be completed by the beginning of 1999, but officials hope for it to be finished by graduation ceremonies in the spring of 1999.

The total cost for the arena is \$51.7 million, up from \$47 million.

"The arena project is on schedule except for some rain delays," he said. "I feel like the arena is up and going. I think the English/Philosophy/Education Complex is on the front burner now."

The English/Philosophy/Education Complex is expected to be about 211,000 square feet and cost about \$40 million using HEAF bonds, according

to officials estimates. The complex, if approved, will be located south of the Tech Library and west of the Hulen/Clement Residence Complex.

Plans also include three parking structures, not including the parking structure to be built adjacent to the United Spirit Arena. Possible locations include between the Wall/Gates and Hulen/Clement Residence Hall Complexes and across from the University Center in the vicinity of the Tech Bookstore and Development offices. Another location could be by Dan Law Field.

Even though the master plan has faced much opposition from some Lubbock residents, Drowell is hopeful about plans to reroute Indiana Avenue so it would travel south of the Texas Tech University Health Sciences

Center and University Medical Center.

Drowell said other plans include creating a better flowing loop system within the campus.

"The streets are there; we just need to connect them so there would be a better flow," she said. "We'd like to give it all one name too — the Drive of Champions."

Drowell also said Tech has a Colorado marketing group surveying the research land, used by Tech's College of Agricultural Sciences, to determine whether a golf course would be a viable option in the master plan's future.

The future use of this land has stirred much debate from members of the College of Agricultural Science and Natural Resources.

## Tech expects inquiry letter from NCAA

BY GINGER POPE

The University Daily

Some Texas Tech officials expect and look forward to receiving an official letter of inquiry concerning the NCAA's 18-month investigation of Tech's Athletic Department soon.

Pat Campbell, Tech general counsel, said he expects the NCAA will serve Tech with an official letter of inquiry, a list of charges, within the coming months, and he believes any hearing of charges would take place after Jan. 1, 1998.

"Several months ago, we had hopes of receiving the official inquiry so that if there is any hearing we could have had one in September," he said. "As facts unfold, it has taken longer."

The NCAA began its investigation of Tech athletics in February of 1996. Much of the investigation has surrounded issues of ineligibility of student-athletes and violations of NCAA extra benefits such as long distance phone calls. Most problems have occurred within the football and basketball programs.

Tech officials publicly addressed problems Feb. 26 after Stephen Gaines, a former Tech defensive tackle from Electra, filed a lawsuit against Tech and some athletic personnel.

Officials also addressed the fall semester 0.0 GPAs of two former Red Raiders, Casey Jones and Byron Hanspard, and Tech's withdrawal from the NCAA men's basketball tournament after two Tech players, Frederick Jones and Gracen Averil, were found ineligible in March.

See NCAA, page 2

## Regents approve construction of complex, garage

BY JASON BERNSTEIN

The University Daily

The Texas Tech Board of Regents approved items pertaining to the construction of an English/Philosophy/Education Complex and a two-deck commuter parking structure during their Aug. 22 meeting.

Other items of discussion included the passing of the largest operating budget in Tech history.

The Facilities Committee discussed several building projects scheduled for future consideration at Tech. The next step is reviewing prospective bids to award a contract for the construction of the project. Structural drawings of the approved projects have been provided by the HOK firm based in Tulsa, Okla.

The proposed commuter parking structure would be located at Hartford Avenue and Main Avenue. It would provide spaces for approximately 700 cars and be a key element to the United Spirit Arena parking plan. The proposal was approved and is headed to the Coordinating Board for a final vote Oct. 15.

John Opperman, vice chancellor for administration and finance, said "this was the final step before construction and was planned all along."

He said the parking structure would be for commuter parking only and would only be off-limits during special

See REGENTS, page 7

## Actions taken to alleviate parking problems

■ Additional BY CAREN CARNEFIX

lots may ease situation, officials say

The University Daily

Due to construction of the United Spirit Arena on the site of the previous C-4 commuter lot, Texas Tech is providing parking alternatives for commuters and Student Recreation Center users.

"We want to make sure we have an efficient way for students to park," said Margaret Lutherer, director of News and Publications.

During the first weeks of school, about 10,000 commuter parking permit holders will be searching for the fewer than 6,000 parking spaces available to them, said Gail Wolfe, Tech traffic and parking manager.

"What people don't understand is that not all the students are here at the same time," Wolfe said.

of Indiana Avenue.

"It'll be worth the money if it all works the way we mean it to," Wolfe said.

The University paid \$8,000 to lease two parking lots for the fall semester. One lot was leased from the Godbold Cultural Center and the other from Tech graduate Dub Rushing. Parking in these lots, located on 19th Street between Boston and University Avenues, requires a valid commuter permit. Users of these lots are strongly encouraged to use designated cross-

walks when crossing 19th Street.

Tech leased the two lots for one semester because officials predict the need for these lots will be gone after construction of the new law school and C-4 lots are completed Oct. 15, said John Opperman, vice chancellor for administration and finance.

"We will be in much better shape in October when the lots are complete," Opperman said.

The new C-4 lot will be located directly across from the Student Recreation Center and should reduce the use of commuter parking by the center's users.

The new law school lot will have 350 spaces, and the C-4 lot will have 200 spaces.

Two new commuter lots have been built west and south of television sta-

## Volunteers crush Red Raiders in season opener

BY HEATH ROBINSON

The University Daily

Texas Tech opened the 1997 football season in one of the nation's most hostile environments, at No. 5 Tennessee in Knoxville.

The Volunteers, led by Heisman Trophy favorite and senior quarterback Peyton Manning, took full advantage of Tech mistakes, beating the Red Raiders 52-17 in front of 106,285 fans in Tech's worst opening game loss in school history.

After a sluggish first quarter, Tennessee led 7-0. The Red Raiders (0-1 overall, 0-0 Big 12) missed several chances to take the first lead of the

game, not capitalizing on a first quarter interception of Manning by junior raiderback Robby Cartwright and a missed 32-yard field goal attempt by junior All-Big 12 candidate Jaret Greaser.

Greaser closed the gap late in the second quarter with a 37-yard field goal to make it 10-3 Tennessee.

Tech began to unravel in the last minute of the second quarter. After Manning hit Marcus Nash for his second touchdown toss of the game, sophomore Tim Winn fumbled the ensuing kickoff for Tech, giving Ten-

nessee the ball back with just over 20 seconds remaining.

On the next play, Manning found Nash again on a completion to the one yard line. Mark Levine plunged in from one yard out on the next play to give the Vols a 24-3 lead going into the half.

Tech's defense, minus starting linebacker Eric Butler and starting cornerback Tony Darden, both seniors and returning starters, could no longer contain Manning, who continued his streak into the second half.

At one point, Manning led Tennessee to five consecutive touchdown drives in stretching the Volunteer lead to 45-3. Tennessee amassed 528 yards,

compared to 293 for the Red Raiders.

Four different receivers caught touchdowns from Manning. Nash caught two, junior Peerless Price caught one, Copeland caught one, and senior Andy McCullough caught another.

Tech quarterbacks accounted for the final score, as quarterback Zebbie Lethridge ran in one score to make it 45-10, and sophomore backup Rob Peters sneaked in from the one to make the final 52-17. In the first and fourth quarters, Tech played Tennessee to a 14-14 tie. But in the crucial second and third quarters, where Manning did most of his damage, the Volunteers outscored Tech 38-3.

## Diana's driver intoxicated at time of fatal accident

Editor's note: The Dodi Al Fayed story in the Arts & Entertainment section page 7 was published before his death.

LONDON (AP) — Princess Diana's driver had a blood-alcohol level three times the legal limit, and the speedometer of the car he crashed stopped at a reading of 120 miles per hour, French police and judicial sources said Monday.

Buckingham Palace, meanwhile, prepared for a funeral Saturday that would benefit the princess'

status as the mother of Britain's future king.

In Paris, French prosecutors said only the driver's blood-alcohol level was "illegal." However, a judicial source speaking on the condition of anonymity later said it was 1.75 grams per liter of blood — three times the limit.

Under French law, exceeding 0.5 grams — about two glasses of wine — is a misdemeanor, while a 0.8 grams level is considered a criminal offense.

## Raised to \$5.15

### Minimum wage increase impacts workers, managers

BY JAMES WALKER  
The University Daily

Students augmenting their income with a part-time job had something to celebrate this Labor Day. As of Sept. 1, the minimum wage is \$5.15 per hour. The increase is the second installment of a plan that raised the minimum wage from \$4.25 to \$4.75 last October. Reaction among students who were working Monday ranged from happiness to skepticism to downright confusion. "It's a wonderful thing," said Bethan Tibbetts, a student assistant at Sneed/Bledsoe Residence Complex and a junior psychology major from Spring. Several employees in the Sneed Residence Hall office did not realize minimum wage had increased and

had not been notified of their new salaries. "As of today, I don't know what I'm making," Tibbetts said. Others were less optimistic about the change. "We're still not making that much money," said Scott Sproat, a junior public relations major from Dallas. He works at Double T Bookstore on University Avenue. "My father gives me so much, but I have to pay all my bills. Forty cents won't make that much of a difference." Lance Hughes said he has been

against the minimum wage hike from the beginning. Hughes recently graduated from Texas Tech with a general business degree and works at The Spirit Shop as an assistant manager. "I was opposed to it, even though I was making minimum at the time as well," Hughes said. "It's just government trying to tell people how much to pay their employees." The Spirit Shop should not have to cut back on employees because they are owned by a large national company, but smaller companies may

have a hard time paying the increased wage, Hughes said. The increase should affect most of the university's student assistant employees, said Pat Young, a human resource specialist in Tech's payroll department. "I doubt (there will be less positions available)," Young said. "If they need them (employees) at \$4.75 an hour, they'll need them at \$5.15 an hour." Tech's computers were programmed to change everyone's salary automatically, saving time and paperwork for the employees, she said. Not everyone was so lucky. When asked about the effects of the minimum wage hike, David LeRoy's first response was "more paperwork." LeRoy is manager of the Tech bookstore.

"The labor market is already so tight, we're already paying \$5 an hour for skilled, competent people," he said. The biggest problem is that increasing the minimum wage pushes the whole wage scale up, LeRoy said. He said workers who have been around longer need to make more than minimum wage to separate them from new employees. "We're not cutting back this semester, but in subsequent semesters we may have to hire a few less people," he said. The bookstore currently employs 35 full and part-time students, LeRoy said. After the fall rush is over, the store will begin cutting back until it reaches an adequate number of employees to handle the store's traffic. According to information from the U.S. Department of Labor's Internet

site, 9.7 million Americans received a pay increase Monday. The law maintains exceptions for "tipped employees" like waitstaff. Employers are required to pay these employees at least \$2.13 per hour, and make up any difference between their wages and tips and the \$5.15 minimum. There also will be a \$4.25 "opportunity wage" for employees 19 and younger that only applies for their first six months on the job. Intended to help businesses supply summer jobs for young people, the law prohibits firing employees to hire young workers at the subminimum wage. The minimum wage was first established June 25, 1938, by President Franklin Roosevelt as part of the New Deal. The last increase was signed by President George Bush in 1989.

“Forty cents won't make that much of a difference.”  
— Scott Sproat, Tech junior

The UD is funded primarily through advertising revenues generated by the student sales staff with free campus distribution resulting from student service fees. Subscriptions: \$90 annually; single issues: 25 cents.

#### Parking

continued from page 1  
tion KTX. Although the lot west of the television station will be substantially complete by the first day of class, the lot south of the building will not be completed until four to six weeks after the beginning of the fall semester. Sheri Boekhout, a senior recreational therapy major from Harlingen, walked from the furthest point in the lot west of KTX to the steps of Holden Hall. Walking briskly, Boekhout timed the walk at 21 minutes and 22 seconds. Citibus also contributed efforts to alleviate parking problems by adding two off-campus shuttles to

service apartment residents living on north Indiana Avenue and west Fourth Street. Student Government Association President Russell Thomasson predicts this service as being convenient for students. "Not only will it serve the students who live in those apartment areas better, but it will also serve students who need to park on campus and sometimes can't find a parking space," Thomasson said. Highway programmable signs set up for commuters to read before reaching campus will show parking lot updates and direct students to available lots. Internet users can monitor the situation at: <http://www.ttu.edu/newspubs/parking/index.html>.

#### NCAA

continued from page 1  
Gaines' lawsuit against Tech was dismissed by District Judge Sidney A. Fitzwater June 2. Gaines could pursue actions against football coach Spike Dykes, Rhudy Maskew, running back and kicking coach, and Ronn Reeger, a former athletic administrator, but not in their official capacity. Because Tech is in a joint confidential investigation with the NCAA, Campbell said he could not comment about the lawsuit, investigation or those involved. "The inability to comment has been frustrating," he said. "I would like to address articles and things reported to be fact and true. It was not my decision to make, but in hindsight I would want to look closely before considering a joint investigation again. I'm not saying the same decision wouldn't be made again, but it has just been so frustrating." Campbell is not sure what elements would have been involved without the joint confidential investigation, but each party would have been made aware of any vio-

lations soon after they were discovered. Dirk Taitt, director of NCAA enforcement, said he would not dispute Campbell's expectations for the official letter of inquiry to be served to Tech soon. Taitt said he could not comment on any aspects of the investigation for confidential reasons. Once Tech receives the official inquiry of both self or NCAA reported infractions, they have the opportunity to prepare and submit a written response for a pre-hearing conference, Taitt said. At the pre-hearing conference, both parties will discuss charges and clarify whether they have merit, he said. After the pre-hearing, the charges will go before the NCAA Committee on Infractions. Before Saturday's football game against the University of Tennessee, two Tech players, Tony Darden and Eric Butler, were suspended for violating NCAA long distance phone call privileges. Tech Athletic Director Gerald Myers said audits of players is ongoing, but at this point in time he does not expect more players to be suspended this season.

## Paparazzi holds blame in Di's death

AMY OSMULSKI/EDITOR

Earlier this year, "Primetime Live" did a story on the paparazzi that included a section on Princess Diana.

The princess approached the paparazzi while on a ski trip and asked them to respect the vacation time she was trying to spend with her children.

They never left her alone, and Sunday morning a world was left in mourning at the news of her death

while being pursued by the paparazzi.

Evidence has surfaced that the driver of the car had a high blood alcohol level and was speeding at the time of the accident, but many people say blame still lays with the paparazzi.

The global anger at the press is evident, with rumors of pictures of a wounded Princess Diana and her companion Dodi Al Fayed in the Mercedes that crashed against a Paris tunnel wall circulating.

The *National Enquirer* has made a strong statement in boycotting the pictures that are going for an asking price of \$250,000. But not everyone will boycott the pictures.

Somebody, somewhere will buy them and they will be published in a paper — a paper that probably will sell record number of that edition to the public.

So the question is who holds the blame in Princess Diana's death? As a young member of the profession being blamed for her death, there is no doubt in my mind the paparazzi should pay for their involvement. They followed her relentlessly from the time she was 15.

And as the fairy tale crumbled down around the Royal Family, the paparazzi just worked harder for "the picture."

"The picture" so eagerly sought after by the paparazzi, which is not comprised of what most journalists would consider part of their family, could bring prices into the millions.

But the paparazzi could be any two-bit criminal with a camera who just needs money.

This is where the line between responsibility to the public and harassment is shaky.

When I first began reporting for *The University Daily*, I was asked many times, "Why are you doing this?" and "Why do you keep bothering me?"

*The University Daily* has a responsibility to the Texas Tech campus to report what matters to students.

Whether that be a banquet honoring a new dean or NCAA allegations against the football team, news is news. Members of Tech's administration or athletic department may call these late-night calls from *UD* reporters harassment, but I guarantee you it's nothing like what Princess Diana and many other public figures go through daily.

Public figures and celebrities do give up some rights, but anything that ends in their death is nothing but wrong.

Only weeks before her death, Princess Diana told a French newspaper that "The press is ferocious... they pardon nothing. I think that in my place any sane person would have left Britain long ago, but I cannot. I have my two boys."

Two boys now without a mother.

A world now without a princess.

## EDITORIAL Add-drop period should be for students

One of the greatest things about registration is the coveted add-drop period.

This time allows students to change their minds, get into the class that was full during pre-registration or get out of a class where the professor is not up to par.

Thanks to a new law, which some are calling the "slacker law," students who find reassurance in the add-drop period may find themselves paying out-of-state tuition.

The law was set up to cut off state funding for "career students," who cannot seem to graduate.

The only problem is that the law affects those who have "attempted" more than 170 hours without receiving a degree.

The good news is that dual majors and students will certain degree plans which require extra hours are exempt from this.

The bad news is that too much add-drop may push some students who actually are trying to get a degree in a reasonable period of time over the 170-hour mark.

The Texas Higher Education Coordinating Board has yet to clarify the word "attempted" in regards to hours that will count, but the option for schools to use this law to cut down on add-drops is there.

It seems the add-drop period, like many other things — including decisions on where student fees should go, is being taken away from the students.

The students who pay tuition to keep universities going.

The students who universities are created for.

The students who pay money to take classes they should be allowed to add or drop.

The University Daily Editorial Board voted 6-0.

## Proposed Indiana Avenue closure under fire

BY APRIL CASTRO  
The University Daily

One Lubbock City Council member is up in arms about the proposed closure of a portion of Indiana Avenue through campus.

Victor Hernandez said the closure will have a significant negative impact on the city economy as well as a major portion of Lubbock's Hispanic population near Indiana Avenue.

The proposal is part of Texas Tech's Master Plan, expected to be approved by the Board of Regents Nov. 7.

Hernandez said although the measure has not been approved, it is necessary for the council to take a stand.

"I am a supporter of Tech, but I was elected by the city and I have to put that first, and I think the closure

is not in the best interest of the city," Hernandez said.

The closure of Indiana Avenue will stymie traffic of 25 percent of the entire Hispanic population that live west of Indiana Avenue, north of the proposed closure, he said.

Hernandez stands alone among the council with his opinion of the situation.

"The city council has not taken a

**“**I am a supporter of Tech, but I was elected by the city and I have put that first, and I think the closure is not in the best interest of the city.**”**

**Victor Hernandez, city councilman**

Councilman Ty Cooke said the plan for Indiana Avenue will be positive for the city and for Tech.

position yet, but I don't think they'll see anything wrong with it," said City Manager Bob Cass. "As we, the city staff have looked at it, we didn't see any problems. Right now, it's in the hands of Texas Tech and the Board of Regents. Until Tech adopts the final alignment, there's not anything to oppose."

"I think it's a great plan, and I think it's good for the whole community," Cooke said.

"It has the potential to be a nice gateway into the community, and good for Texas Tech as well."

The plan to move what has become a major freeway for some Tech students, will ease much of the traffic on 19th Street, Cooke said.

"I think there will be more traffic from 19th Street going north, than there is now going through on Indiana (Avenue)," Cooke said. "There is a lot of traffic heading toward the loop (289), so I think it will take traffic off Quaker (Avenue) and off 19th (Street). I like what I've seen of the concept so far."

### Rerouting?

• The proposal to close and reroute part of Indiana Avenue is part of Texas Tech's Master Plan, expected to be approved by the Board of Regents Nov. 7.

## Plans made for destruction of UPD, construction of pavilion

BY APRIL CASTRO  
The University Daily

Plans to raze the Texas Tech University Police Department in favor of building an open-air pavilion for Raider Alley and other functions may result in the construction of temporary facilities for the UPD.

The temporary location of the department as well as plans for more modern and technologically advanced permanent facilities remain unknown, said John Opperman, Tech Deputy Chancellor.

The transition comes on the heels of the reorganization of the UPD and the Texas Tech Health Sciences Center Police Department to form one organization effective this week. The permanent location will facilitate both groups.

One prospect for the permanent facility is the area near KTXT-TV, Opperman said.

The demolition of the current building on the corner of Red Raider Avenue and Drive of Champions is being planned for the 1997-98 winter break, Opperman said.

The department could be housed in temporary facilities for up to two years before plans are made for the permanent building, he said.

The department, however, is in need of new facilities, said Sergeant Dan Hale, public information officer for the UPD.

"Our current facilities are woefully inadequate," Hale said.

"Any new location is desperately needed."

University Police Chief Jay Parchman said he wants to ensure that students have easy access to the police department, wherever it may be.

"My only concern is that there is a place on campus where the students can find us if they need us or can voice their concerns if they have a problem," Parchman said.

The pavilion, to be built upon demolition of the UPD, is being constructed by the Ex-Students Association, using donations from Tech alumni.

The pavilion will be built in the prominent Spanish Renaissance Architectural style already on campus, said Bill Dean, director of the Ex-Students Association.

Expected cost for the pavilion is \$750,000.

Although construction plans for the structure are not yet completed, preliminary plans allow a large assembly room, a stage, a catering kitchen, restrooms, an area for storage and a permanent office for the Saddle Tramps organization. The building is expected to take up about 9,100 square feet.

Student organizations will be able to use the pavilion upon agreement with the Ex-Students Association, Dean said.

Jennifer Galvan/The University Daily

**Bye, bye UPD:** The University Police Department located at the corner of Red Raider Avenue and the Drive of Champions will soon be demolished, and the construction of a pavilion to house Red Raider Alley activities and the Saddle Tramps will be constructed in its place. A temporary relocation of the UPD has not yet been determined.

## Regents

continued from page 1  
events that would take place at the arena.

Among the topics discussed at the Finance and Administration Committee meeting was the approval of Tech's Operating Budget for Fiscal Year 1998. The bud-

get, topping off at more than \$310 million, was not only a 12 percent increase over last year's budget, but it was also the largest operating budget in Tech history. The budget increases will be applied in a number of different areas including academic computing and computer science.

The committee also approved an operating budget for Texas Tech Uni-

versity Health Sciences Center that exceeded the \$300 million mark. At \$304.4 million, the HSC budget increased 9.6 percent over last year's budget that totaled \$277.8 million.

The Regents also discussed Tech's image.

"An image of equality is of importance to Texas Tech," said Tech President Donald Haragan. "Our research

programs, graduate programs and undergraduate programs all hold positive images."

Additionally, Tech's overall academic progress was discussed.

"We need to be tougher on academic standards in order to advance our university," Tech Chancellor John Montford said.

"We don't want to be second to

anyone for we are a 'can-do university.'"

The Regents Committee on Admission Standards was created in May of 1997 and was charged "to review and make recommendations for admission standards for Texas Tech University." The committee reports that the university's entering class of undergraduates for the 1991-92 academic year had a 35 percent graduation rate within a five-year span.

The committee's primary focus is to "improve the overall academic quality of the university."

A key component of the report on Admission Standards is that more scholarship offerings should be made available to the student body.

The next Texas Tech Board of Regents meeting will be held on Sept. 15.

## Commissioner approves lower monthly insurance payments

AUSTIN (AP) — Texans who make monthly installment payments on car insurance will get lower down payments and more time to pay balances under a rule approved by Insurance Commissioner Elton Bomer.

Bomer said expensive down payments and sizable monthly payments contribute to the problem of too many uninsured drivers.

"Working people who live from paycheck to paycheck often must spread their car insurance premiums to fit their budgets," Bomer said.

The rule means that for a \$600, six-month policy, the maximum initial down payment would drop to \$200 from \$240.

"We're thinking for some families this has been a major hurdle and we're making it easier for them," said David Durden, deputy insurance director for property and casualty liens.

The insurance department could not provide figures showing how many people chose monthly payments over single payment options.

Consumer advocates and insur-

ance company representatives criticized the rule as ineffective because it could allow for abuse by drivers who buy short-term policies with no intention of paying the balance.

Under the rule that takes effect Jan. 1, insurers may require down payments of up to 16.67 percent of the annual premium for a 12-month policy, and 33.33 percent for a six-month policy.

They currently can set the down payments at up to 40 percent on a six-month policy and 25 percent on 12-month policies.

The new rule also requires insurers to spread balances over at least four months for six-month plans and 10 months for yearlong policies.

That does not include an additional payment in the last month for renewal.

Balances currently can be collected in three months for six-month policies and eight months for 12-month policies.

Insurance companies will not have to adjust their billing if their installment plans were a better deal than the insurance department's new plan.

## Lab will break ground in plant research

BY JONATHAN CARROLL  
The University Daily

Lubbock's unique climate has enabled Texas Tech to build the nation's first Plant Stress and Water Conservation Laboratory.

The construction of the 64,000-square-foot lab began June 18. The lab is scheduled for completion in December 1998.

"The world's food supply demands this research," said Dick Auld, chairman of Tech's plant and soil science department.

"This is the only national lab dedicated to abiotic stress."

Abiotic stress is stress caused by cold, heat and drought, Auld said.

The extremes in temperature and drought are what make this area stressful to plants, he said.

"It isn't some kind of psychological experiment gone bizarre," Auld said.

The purpose of the laboratory is to develop ways to reduce the impact of drought and extreme temperatures on crop yields and product quality. The \$13.6 million lab is a joint project of Tech and the U.S. Department of Agriculture.

"(The purpose of the lab) is to basically do what we can do to reduce the impact of water and temperature stress on plant growth and develop-

ment," said Jerry Quisenberry, director of the Plant Stress and Water Conservation Laboratory.

The laboratory will employ 10 federal workers and 10 Tech faculty, Auld said.

"Twenty scientists will be based at the lab and they will collaborate on research projects and hopefully bring Tech hefty grants," Auld said.

The lab will bring in \$6 million to \$8 million per year in grants and will employ 20 to 30 undergraduate students and 10 to 15 graduate students, he said.

"This is the best thing since flipping hamburgers that has happened to student employment," Auld said.

Tech officials began discussing the possibility of a lab in 1975.

Three years later, Congress appropriated \$100,000 for a feasibility study, and in 1979 the government began giving Tech funds for research.

Congress then appropriated \$800,000 for the project and continued to fund the program for the next 17 years.

The construction of the plant stress laboratory was signed into law in 1988 which authorized the laboratory in Lubbock.

Auld said the laboratory's future was uncertain even after being signed into law.

In 1996, Congress finally appro-

**Dig dug:** Texas Tech graduate Tim Zuber of Idalou shovels between cotton rows for irrigation. Tech's new plant stress laboratory will aid in the development of plants that do not require a large amount of water.

riated the remaining \$8.1 million in order to build the laboratory.

The laboratory brought national headlines three years ago when Jay Leno joked about the plant "stress" lab on the "Tonight Show."

Auld said the national headlines actually brought the laboratory attention and helped make it a reality.

"The quality of the faculty and students have brought it back and allowed it to happen," Auld said.

## Chancellor's first year finds progress, debate

BY JASON BERNSTEIN  
The University Daily

The 1996-97 school year brought many new changes to Texas Tech, one of the most publicized changes was the appointment of the first Tech chancellor, John Montford.

"This was one of the most active years of my career," Montford said. "One of my biggest challenges for this year is to provide more scholarships for students and to stimulate the best academic environment possible."

Montford is proud of the increase in graduate fellowships from four to 100 in only a year.

Montford did experience his share of controversy in his first year. The United Spirit Arena project became an issue when a portion of the student use fees were to be delegated to the project instead of being used for the advancement of academics.

Other problems the chancellor

facied included the ongoing NCAA investigation regarding the Tech athletic department.

Montford said he is convinced these mishaps are in the past and the university must focus on leading Tech into a new era.

"Our students want to succeed," Montford said. "They are hard working and they want to have fun at the same time."

Montford's peers are pleased with his accomplishments.

"He has done an excellent job and has made a nice transition from senator to the university system," said Tech President Donald Haragan.

Haragan also is pleased with Montford's efforts in leading Tech's lobbying efforts in Austin and Washington. Tech recently received its highest appropriation from the state.

Bernard Harris, vice chairman of the Board of Regents, has been more than satisfied with Montford's efforts in his first year.

## Citibus offers new shuttle service

BY CAREN CARNEFIX  
The University Daily

Citibus has added two off-campus shuttle routes to help alleviate parking problems on the Texas Tech campus.

Citibus officials first proposed the idea of an off-campus shuttle in April 1997.

The Student Government Association decided at that time there was not enough funding for the project, said John Opperman, Tech Vice Chancellor for Administration and Finance.

"They were very helpful to us in working something out here because we could not afford to do a complete shuttle to these areas," Opperman said.

The Citibus marketing department conducted a survey of the apartments located on north Indiana Avenue, west Fourth Street and Frankfurt Avenue. The survey revealed 98 percent of the 1,000 responses to be in favor of an off-campus shuttle.

Citibus offered to pay 75 percent of the cost of the new shuttle system.

"We decided to help fund this for the first year as a demonstration

project," said Scott Mitchell, Citibus marketing director. "We think it's going to be very successful."

There are two off-campus shuttle routes designed to service students living in apartments. Two buses run on each route from 7:30 a.m. to 5:30 p.m. The Indiana Avenue route will have a frequency of 15 minutes and the Fourth Street route will have a frequency of 20 minutes. Both routes will make three campus stops — Holden Hall, the business administration building and the University Center.

Students also have the option to park and ride with the off-campus shuttle. Students can leave their cars in the vacant Wal-Mart parking lot, located at Fourth Street and Slide Road and ride the shuttle to campus.

The constant student flow will help stop those wanting to harm students or their cars, said Blythe

### WEST FOURTH STREET ROUTE

1. Whisperwood
2. Park & Ride
3. Highgate
4. Wal-Mart
5. Fairway Villas

2. Intern
3. Indiana Village
4. Shangri-La
5. Heritage
6. Savoy
7. Sierra Crossing

Clayton, SGA External Vice president.

"Without incurring more cost, students just have to realize that might happen," Clayton said.

The Lubbock Police Department officers assigned to the area added the Wal-Mart parking lot to other lots included in their patrol, said Michael Sommermeyer, assistant director of University News and Publications.

"I wonder how much security you really need," said John Wilson, general manager of Citibus. "I think the security issue has been blown out of proportion."

Citibus supervisors have been assigned to the off-campus lot to assist students for the first weeks of school, Wilson said. The Citibus supervisors will periodically monitor Citibus' service throughout the semester.

## New law gives college students carrot, stick

### ■ 'Slackers' may pay out-of-state tuition rates

BY JAMES WALKER  
The University Daily

In the near future, students who frequently participate in the add-drop period at the beginning of each semester could risk having to pay out-of-state tuition.

As part of a new law, which some are calling the "slacker law," state officials are offering a carrot-and-stick approach to discouraging career students.

The "stick" will cut off state funding for students who have attempted more than 170 credit hours without

receiving a degree.

Schools will have the option of charging these students out-of-state tuition rates to make up for the difference.

The key word is attempted, said Martha Brown, Tech's associate vice president for governmental affairs. That word could be interpreted to mean any course a student registers for, including those failed or dropped in the early weeks.

It will be up to the Texas Higher Education Coordinating Board to clarify the meaning, Brown said.

The law would affect state funding for fall semester of 2000, after the next round of funding appropriations, which happens in 1999.

Tech Provost John Burns said administrators found 40 students on campus who currently have more than

170 hours and have not received an undergraduate degree.

"We didn't take (add-drop figures) into account," Burns said. "Certainly the figure would be higher, but how much higher I don't know."

Tech administrators are planning a meeting to discuss the issue Wednesday, he said.

There are exemptions in the law for students with more than one major and certain degree plans which re-

quire extra hours. The plan also provides for a \$1,000 bonus for any student who completes a degree within three credit hours of the number called for in their degree plan.

“This is supposedly the giant carrot to get undergraduates to matriculate more quickly through the process.”

Martha Brown, Tech's associate vice president for governmental affairs

Brown said.

Not many students are likely to qualify for the bonus, Burns said.

The law requires that students pass

every class they take, and only take classes which fulfill degree requirements, he said.

Another part of the law, called the "truth in tuition" provision, requires that the general use fee be reclassified as part of tuition.

The general use fee is a fee of \$34 per credit hour, which is the same amount as tuition, and is charged to all students.

The university plans to rename the

general use fee as "institutional tuition," and continue to keep it separate from what is currently called tuition, Brown said.

"So long as it's called tuition, that's the general intent of Sen. (Teel) Bivins (the sponsor of the legislation)," she said.

Burns said so far the resignation has only been discussed informally and also will be discussed at the meeting Wednesday.

### Cleaning Up Career Students

- The general use fee reclassified as tuition.
- Students with more than 170 credit hours and no degree may be charged out-of-state tuition.
- Students who graduate within 3 hours of the requirements for their major receive a \$1,000 bonus.
