

How Should Reese Spend \$9,261?

U. S. Air Force — Aerospace Power for Peace

THE ROUNDUP

The ROUNDUP is an unofficial newspaper published weekly in the interest of personnel at Reese Air Force Base of Air Training Command. It is published by Craftsman Printers, Inc., a private concern, which is in no way connected with the Department of the Air Force. Publisher's mailing address: P. O. Box 263, Lubbock, Texas. Opinions expressed by publishers and writers are their own and are not to be considered an official expression by the Department of the Air Force. The appearance of advertisements in this publication does not constitute an endorsement by the Department of the Air Force of the products or services advertised.

Number 8

Reese Given High Rating By Inspectors

Reese activities, in the opinion of a USAF inspection team, are being operated in a highly satisfactory manner, a field memorandum report on the Feb. 19-25 visit discloses.

Inspectors noted that the appearance of the base was clean, neat and orderly and that personnel were sharp, well disciplined, well oriented on their mission and approached their jobs in a professional manner.

The visitors from USAF also commented on exceptionally high morale among all troops. They commented that equipment was clean and well cared-for, and supervision and conduct of flying training was highly effective and instructors highly motivated.

The report mentioned officer and academic training, stating they were well conducted and supervised. Aircraft maintenance activities also were rated as effective and economical, excellently supporting requirements of the pilot training program.

Activities in base supply, the comptroller's section, and engineering also received a high rating, while the flying safety program was found effective. Everyone with whom the inspectors talked were safety conscious. Inspectors gave special mention to emphasis by Col. James A. Gunn III, Reese commander, to safety programs.

Civilians To Get Quality Increase

WASHINGTON (AFNS) — The United States Civil Service Commission has issued regulations under which federal agencies will establish procedures for granting quality pay increases to employees whose job performance substantially exceeds normal requirements.

The quality increase is one of two major pay reforms aimed at increasing productivity of the federal work force.

Under the quality pay increase regulation, agencies may grant additional within-grade increases in recognition of high quality performance above that ordinarily found in the type of position concerned. Only one quality increase may be granted to an employee in any 52-week period.

The regulation also states that incentive awards will be used where the condition for a quality increase are met but the quality increase is not considered a sufficient reward.

The new regulations on quality pay increases apply only to Classification Act employees and carry out provisions of the Federal Salary Refrom Act of 1962.

LEADER VISITS

WASHINGTON (AFNS) — Maj. Gen. Alex Louis Cox, Royal Netherlands Air Force tactical air commander, was a recent visitor to United States military bases.

INAUGURATION—As Reese was hooked to the world with a fast, accurate automatic communications system — DATACOM — Wednesday, key men in the Air Force Communications System detachment at Reese were interviewed and photographed by KCBD-TV, Lubbock. Here Joe Gibson, KCBD ace photographer and reporter, talks with Capt. William Suiter, TSgt. Jack Ferguson and Maj. Theodore Smith in the base communications room.

Reese Linked With World In Highly Accurate, Fast Automatic Communications

Reese was linked with the rest of the world in the fastest and most accurate communications system Wednesday as the final link of the Data Communications Network became operative at Andrews AFB, Md.

Called Air Force DATACOM, the new network linked upward of 300 Air Force, Department of Defense and defense industry users into a common system for the rapid interchange of vital information. The system is the first increment of the DOD worldwide automatic digital network called AUTODIN.

Operated by the Air Force Communications Service, as a component of the Defense Communications System, the network represents an entirely new concept in communications handling which provides major management benefits, not only to the Air Force, but for the entire DOD as well.

The heart of the DATACOM network consists of five automatic electronic switching or message relay centers at Norton and McClellan AFB's, Calif., Tinker AFB, Okla., Gentile AFS, Ohio, and Andrews AFB. Reese is a tributary station, sending to and receiving from McClellan.

Reese sends and receives messages through use of IBM punch cards.

Incoming messages are recorded on the cards and are fed into a machine which transcribes on message forms with the printed letter. Outgoing messages are punched on IBM cards at base supply or statistical services. The cards are placed in a special machine which transmits.

Within a short time card punching will be done at the transmitting station. Some messages are placed on tape, instead of cards, at other stations. The system permits interchange of tape and cards in sending and receiving. That is, messages sent by card may be received on tape,

PUBLIC INVITED

Reese parents are invited to visit the Reese Elementary School and other units of the Frenship School District next week during observance of National Education Week. J. Weldon Bennett, Frenship superintendent, asked parents to visit when they wished and stay as long as desired.

or vice versa.

Teletype devices at Reese and elsewhere use speeds ranging from 100 to 3,000 words per minute. No more than one erroneous character in 10 million can pass undetected.

Reese has been linked with McClellan AFB for about two months and has found speed of sending messages has been cut materially. Opening of the Andrews AFB station completed the network.

Inspection, Safety Functions Merged

NORTON AFB, Calif. (AFNS) — Air Force worldwide inspection and safety functions here have been reorganized and consolidated under a single head.

The move is expected to provide operational economy and efficiency and permit personnel reductions.

Offices for the Deputy Inspections and Deputy for Safety were combined into a single office designated as deputy, the inspector general, USAF. Maj. Gen. Charles W. Schott, former deputy for inspection, heads the new function. Maj. Gen. Perry B. Griffith, previous Deputy for Safety, has been reassigned to London. Gen. Schott, who planned to retire on Jan. 31, will be replaced by Brig. Gen. Bertram C. Harrison, formerly director of Systems Inspection.

Other effects of the reorganization are consolidation of the directorates of systems inspection, support services inspection, and procurement inspection, into the Directorate of Inspection.

Ideas Sought On Best Use For Ground Safety Prize

Reese has won \$9,261 for its best 1962 ground safety record. How will the money be used?

A big suggestion drive open to everyone on the base starts Monday and will continue for two weeks. Its purpose is to find the top ideas for the best use of the money. Generally, suggestions should deal with something of a permanent lasting nature which will benefit the most people — perhaps some type of structure or facility.

How would you spend the money? Make your suggestion! Fill out the coupon on Page 2. If there isn't enough room on the coupon for your ideas, then affix another sheet of paper to the coupon.

There are few rules and little to guide suggestors. The whole story is that Reese won the money and should use it in the best way possible. The money could go for recreation, for installation of equipment which could be used for the most people, for most any purpose or combination of purposes.

Key Reese officials want the ideas of everyone on the subject before decision is reached. A committee named by Col. James A. Gunn III, wing commander, will study and evaluate each suggestion submitted.

A suggestion box will be placed in the post office lobby. Suggestions should be dropped in the box. The drive opens Monday and closes March 18. Just as quickly as possible thereafter, top suggestions will be announced.

Suggestions may be short or long — of any length. Each one should suggest a means of spending the \$9,261 and outline why the suggestion is worthy. Families might talk it over and come up with a good idea from papa, mama or the kids.

Reese won the Air Training Command ground safety award by leading all undergraduate pilot training bases in overall improvement for 1962. Not only did Reese lead ATC, but it went way out in front.

Records showed that Reese had an overall improvement rate of 38.76 per cent; far better than any other UPT base.

In Group B no participant improved the 1961 records, while in Group C Lackland and Chanute AFB's had improvement and in Group D the 3625th Technical Training Group bettered its record.

Greatest improvement at Reese came in the cost per capita. There was a 68.72 per cent improvement, while the military injury rate dropped 18.49 per cent in 1962, as compared with 1961.

Congratulations to all Reese personnel were sent by letter to Col. James A. Gunn III, Reese commander, by Lt. Gen. James E. Briggs, ATC commander.

"The achievement made in 1962 in reducing accident losses within your command is very gratifying and was a major contribution to the continued favorable Air Training Command rates," the general wrote.

Colonel Gunn was highly pleased by the award.

"This award is not only helpful to Reese people, but also signifies that we are leading the way in ground safety activities," he commented. "The reduction in accidents shows that everyone is giving deep thought to proper actions which will avert injury. Through the safety program we were able to save lives and injuries which would have hurt us all deeply. I congratulate everyone on the effort expended to bring new credit to Reese."

BOARD TO MEET

WASHINGTON (AFNS) — A board to select and recommend officers for promotion to the grade of colonel in the Air Force Reserve will be convened at the Air Reserve Records Center on May 6.

All Reserve lieutenant colonels in an active Reserve status with a promotion service date prior to July 1, 1958, will be considered by the board.

POL Airmen Map 50-Mile Saturday Walk For Record

The 50-mile hike craze has hit Reese Air Force Base and seven airmen Saturday will attempt the long walk ending at the base entrance. The seven are out to better the best mark to date, that of 13½ hours set by a group of U. S. Marines.

(See Picture, Page 6)

The hike will start at 4 a.m. Saturday two miles west of Morton with the walkers planning to follow Route 116 all the way. The seven members of the Petroleum and Oil Lubrication section who are out to set a new mark are A2C David S. Cole of Hillsdale, Ill., A2C Edward P. Toth of McKeesport, Pa.; A2C Walter A. Trask Jr. of Boston, Mass., A2C Robert C. Kirkland of San Bernardino, Calif.; A3C Weston A. Negley of North Platte, Neb.; A3C Patrick W. Stowers of Wisconsin Dells, Wis.; and A3C Raymond K. Shanklin of Butte, Mont.

"If the Marines could walk 50 miles in 13½ hours, then we can do it in less; maybe not much less, but a few minutes," said Stowers, the walk organizer.

The seven plan to wear Air Force fatigues and parachute jump boots, or brogans, which they feel will be most comfortable and appropriate. They will be taken to the starting point west of Morton by private automobile and the car will travel with them, carrying water and sandwiches.

"We won't need it to bring any of us back to the base, because none of us will drop out," suggested Airman Toth.

The young men plan to keep moving and to travel five miles an hour or close to that speed. They don't want to stop and rest because they fear muscles might tighten-up while they rest. None of the seven has walked farther than 20 miles up to this time "but if we didn't think we could go 50 miles, we'd never start."

They hope to be back at the base by 5 p.m. Saturday.

Military Tests Pre-Fab Houses

EGLIN AFB, Fla. (AFNS) — The Air Force is testing two experimental dwellings in its Climatic Laboratory here to see if they can withstand the weather extremes encountered by Air Force families living in many parts of the world.

The dwellings, a single family unit and a duplex, are prefabricated and transportable. They are designed to meet dependent housing shortages, both in the United States and overseas.

During the first test phase, the houses will be exposed to 25 degrees below zero temperatures. Later, the temperatures will be lowered to minus 65 degrees. Other phases call for subjecting the houses to extreme heat, winds up to 125 mph, and a three-inch rainfall.

Air Force Said 'In Highest State Of Readiness'

WASHINGTON (AFNS) — Speaking before the House committee on Armed Services, Secretary of the Air Force Eugene M. Zuckert outlined for the Congressmen his observations on the current and immediate future status of the Air Force.

In listing his views as to the current and future posture he said, "the Air Force is in the highest state of peace-time readiness in its history."

"The range and effectiveness of our capabilities for rapid response is greater than ever in terms of our ability to meet the kinds of emergencies most likely to be encountered.

"Our ability to meet the requirements of both combat and logistical support of the Army is keeping pace with expanding needs of ground warfare.

"The strategic force of bombers and missiles is the protective

cover which makes it possible to apply military force in geographically defined situations.

"This force is at the highest peak of effectiveness since the nation adopted the posture of strategic deterrence.

"The Air Force has a program of peace-oriented research and development work which provides a foundation upon which we can build to meet requirements in space.

"Beyond the immediate future, the picture is not as clear as we would like it to be. The natural uncertainties inherent are complicated by such imponderable factors as the life expectancy of today's manned strategic bombing systems; the complications in the planning and employment of an all-missile strategic system; the question of an appropriate defense structure and the uncertainties as to the

nature of development of military activities in space."

Mr. Zuckert said the aerospace defense must be modernized and research must be continued and expanded. He said work is being done on a low altitude supersonic vehicle and promise is given that by the late 1960's operational use will be made of vehicles with vertical takeoff and landing ability, other than helicopters.

Commander's Comments . . .

By COL. JAMES A. GUNN III
Wing Commander

The massive USAF inspection team has now departed and left behind its pleasing report. The team members conducted a thorough inspection, and except for a few small items, the outcome of the inspection was most gratifying.

In particular, the inspectors lauded the high morale, mission consciousness and professionalism of everyone they met. After going over every aspect of our mission and many support areas with the proverbial fine toothed comb, they were highly pleased and impressed with our method of operation.

I extend personal congratulations and thanks to every member of the command for such a fine showing. We are good and we know it. However, we must not regard this report as a signal for complacency; for we are facing an extremely difficult time which offers an extra challenge to our professionalism.

This challenge of course, lies in our transition to the T-38 aircraft. While continuing our primary mission of pilot training without letup, we must also absorb the new aircraft, phase-out the T-33's and train everyone involved with the T-38 program during a most critical period.

The task is already proving difficult. But overcoming it is the true mark of the professional.

Career Field Tests Being Revised

LACKLAND AFB, Tex. (AFNS) — Thirty-three senior non-commissioned officers have arrived here to begin rewriting Specialty Knowledge Tests (SKTS) in 10 career fields.

The career fields are: photographic technician and still photographer, weather observer and technician, outside wire and antenna systems installation and maintenance supervisor repairman, and central office equipment technician specialist.

Also, fire protection supervisor specialist, inventory management supervisor / specialist,

supply inspection technician/specialist, information technician specialist, and personal equipment supervisor specialist.

Some of the revised tests will be ready for use in the field on July 1 and others a month later.

NOTICE!

Because of the ATC squadron level volleyball tournament, March 12 through 14, all gym lockers must be vacated. Those having locks on lockers are requested to remove them no later than March 8.

\$9,261!!

Here's what Reese AFB should do with it to further morale and welfare:

Name _____ Rank _____ Unit _____

Bench and Gavel

(From office of Staff Judge Advocate)

There are unfounded rumors making the rounds of military installations that a person discharged with a dishonorable, bad conduct, or undesirable discharge must wait only a few months after separation and upon application to the Board for Correction of Military Records of the Discharge Review Board he will receive a change for the better in his form of discharge. (For example, an honorable or general discharge.)

This misinformation is harmful in that many military persons believe it and are encouraged thereby to violate orders and discipline. During 1957 the Air Force Board for Correction of Military Records received 386 cases involving discharges from the Air Force. Of these, 235 involved administrative discharges (for example, undesirable discharges), and 151 punitive discharges (dishonorable or bad conduct). During the same year, the Board granted relief in the form of change of discharge in 37 cases involving administrative discharges and two cases involving punitive discharges.

During the period from July 1, 1956, to June 30, 1958, applicants before the Discharge Review Board who had received an Undesirable Discharge from the services were granted a better type of discharge in 5.0 percent of the cases, and applicants with a Bad Conduct Discharge were granted a better type of discharge in 1.3 percent or 7 out of 500 of the cases.

It is obvious from the foregoing statistics that the percentage of cases in which punitive discharges and administrative discharges have been changed is extremely low. Figures from the Army and Navy are not available, but they are understood to be generally the same.

(Taken from "The Judge Speaks" a series of articles on legal matters prepared by the Staff Judge Advocate of Sandia Base, New Mexico).

Parson-to-Person

Chaplain Fearful People Too Often Are 'Not So Big'

By Chaplain Wayne L. Stork

When our children were small, we used to ask them, "How big are you?" Immediately a wide gummy smile would spread across their faces and then little arms would reach as high as they could as a more than satisfactory answer to the question asked.

As we grow older, the answers we can give to such a question may become very difficult. And in the light of some of our behavior we are compelled to bring in the verdict, "Not so big!"

No matter what else we may say about a man, he is no bigger than his motives — the hidden things that really have him. The "why" is more important than the "what". We should remember that even a sin may wear the cloak of righteousness.

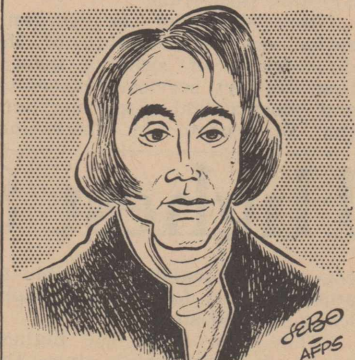

No man is bigger than his interests and his sympathies. "Bless me and my wife, my son John and his wife, us four, and no more" is a little prayer that swings a circle around a small person. We can be no bigger than the far reach of our deepest desires. We need to remember, no man's work is greater than his soul.

"How big are we?" Only as big as we make ourselves, as we become involved in the rush-hour traffic of life, and as we are able to keep our ideas above the tarnish of temptation.

Employment Offices List Military Jobs

WASHINGTON (AFNS) — Employment offices affiliated with the United States Employment Service will include the armed forces in its placement service available to job seekers, under terms of an agreement reached recently between the Departments of Defense and Labor. The agreement calls for local recruiting stations to furnish employment offices with pamphlets, brochures and other recruiting literature. Applicants seeking positions with specific job and training opportunities will be counseled on military openings just as they will on other business and industrial concerns.

OPEN HOUSE—Upward of 350 people, including Lubbock residents, attended the Reese Girl Scout open house last Friday at the Girl Scout House. Here a few move by for refreshments. Left to right are: Susan Williams, Theresa

Ciha, Mary Steele, Mrs. Lillian Montgomery, troop consultant, Patricia Montgomery, Debbie Zoerlein, Theresa Ohler and Cathy Say. Girl Scouts and leaders expressed appreciation to those who made the open house successful.

Officer Promotion Policy Announced

WASHINGTON (AFNS) — The Air Force has programmed promotions for 21,806 of its officers during fiscal year 1964, but for all those moving to lieutenant colonel and most of those going to major, the hike will not be effective until FY '65. In its annual Officer Grade Structure Report to Congress, the Air Force said it planned to promote 33 to brigadier general, 729 to colonel, 1,900 to lieutenant colonel, 4,200 to major, 5,200 to captain, and 9,724 to first lieutenant.

All 1,900 of those promoted to lieutenant colonel will have to wait until the next fiscal year before donning the new insignia, and only 282 of the new majors can assume the rank immediately. There is no carryover for other grades, which means promotions may become effective during the year in which they are made.

Air Force Bomber Remains In Picture

WASHINGTON (AFNS) — Department of Defense officials said during a briefing on the fiscal year 1964 defense budget that manned bombers will continue to play an important part in the Air Force mission.

At the same time, officials said that the Department of Defense is planning to procure toward a 21 tactical wing program. That compares with the 16 wings of 1961.

Also, that plans call for continuing the program to treble the airlift capacity with the result that the airlift procurement budget for fiscal year 1964 is being increased about 20 per cent above that for fiscal 1963.

Speaking of the manned bomber force, the Defense spokesman said: "Manned bombers will continue in our inventory indefinitely. Certainly through the five years that are covered by

our five year program; that is to say, through 1968. We have said to Congress before and would repeat now that we see no reason to consider that the manned bombers will be eliminated from our inventory during this decade."

In spelling out the highlights of the Defense budget, the spokesman said his department had several objectives in mind in requesting funds for the fiscal 1964 operation of the military program.

One of these called for the procurement of 150 additional Minuteman missiles, which would

bring the funded total of this weapon system to 950 missiles.

Another calls for the continuation of the development of the airframe, engine and selected components of the RS-70 system, including the procurement of three test aircraft. The program was estimated to cost \$1.3 billion in total, to which was added \$50 million last December for special sensors development.

The Defense spokesman said his department is continuing to fund toward the objective of \$1.3 billion with additional funding requests of \$81 million for fiscal 1964.

Plan To Replace Filing Cabinets

The age-old search for the most perfect filing system has ended. Computers will replace bulky filing cabinets at many Air Training Command agencies in the future.

Lt. Gen. James E. Briggs, ATC Commander, has announced a 10-year plan to modernize management control systems in ATC with a phased increase in the use of automatic data processing equipment.

Management control areas that will initially be affected by the program include materiel, personnel, accounting and finance, technical training, flying training, recruiting, and training management. Programs have been drafted for the introduction of computers to handle accounting systems in these areas; some are now undergoing extensive tests throughout the command.

The ATC commander said use of automatic data processing systems will release military personnel now assigned to the maintenance of files and accounting procedures for more important operational duties.

(AFNS)—Before the days of instrument flying, when pilots navigated visually, a qualifying examination for a pilot required him to name "all the hamlets, rivers, mountains and Indian villages" on his route.

Secretary Zuckert Much 'Impressed' By Air Force Job In Pacific Area

WASHINGTON (AFNS) — Air Force Secretary Eugene M. Zuckert, in a report on his special visit to Air Force installations in the Pacific during December, said he was "tremendously impressed with the job being done by Air Force units" there.

The Air Force Secretary said the Air Force mission in South Vietnam is "making progress in helping the Vietnam Air Force

help itself."

Air commandos, he said, are proving effective in the Vietnam operation.

He said Air Force troops there are instructing the Vietnamese in various specialized tactics. He emphasized that where these tactics have been employed there has been no encroachment by Viet Cong forces.

Questioned about the type of action in Vietnam, the Air Force Secretary pointed out that the conflict in that country cannot be described as either a ground war or an air war.

"Ground and air are coordinating in the conduct of operations there," he said, "and this coordination is vital due to the strangeness of the struggle."

The Secretary pointed out that he had observed much improvement in our operations in the Southeast Asia regions and that further improvement can be expected.

As to some talk that the Air Force and Army missions overlap in the area, the Secretary said: "In an operation of this nature, you are bound to have competition of ideas. This is good, as the best of each idea will be worked out. The Army and Air Force complement each other there," he said, "and there is a definite role for each of the services."

Secretary Zuckert left the United States early in December and visited many of the Air Force bases in the Pacific area.

His trip started at Strategic Air Command headquarters, where he went with President Kennedy for presentation of awards to SAC units that took part in the Cuban emergency. From there, he went to Alaska and then visited Air Force installations in Japan, Korea, Taiwan, South Vietnam, The Philippines, Guam, Okinawa and Hawaii.

The Secretary said that the Air Force of the Republic of Korea is a well-trained force. He had equal respect for the Air Force of Nationalist China.

"The pilots of both air forces," he said, "are expert flyers and show great capability."

(AFNS)—The space suits of Project Mercury astronauts carry instruments to record the amount of radiation to which the space pilots are subjected. Readings from these instruments are entered on each astronaut's record so the total of all radiation received may be known.

OWC Will Elect Slate Of Officers At Thursday Meet

New officers of the Reese Officers Wives Club will be elected at the annual election business session of the club next Thursday in the Officers' Club.

A nominating committee selected Ernestine Davis and Joanne Shiderly as candidates for president. Mrs. Shiderly's husband, Maj. Daniel Shiderly, has just been reassigned to Europe and another candidate will be nominated by the committee or from the floor.

Nominated for first vice president are Coe Castle and Carol Robinson, while candidates for second vice president are Dorothy LaHood and Kay Haug.

Other candidates include: Donna Terry and Cookie Muller, corresponding secretary; Mae-Hart Hertel and Betty Simunac, recording secretary; DeMaris Wheeler and Dorothy Claassen, treasurer; and Margaret Sherman and Pat Hall, assistant treasurer.

CLUBS

Youth Club

Pre-Teens will ice skate at Iceland tonight. The bus will leave the Youth Club at 7:15 p.m. and will return at 10:30 p.m. A 75 cent charge will be paid by each child who skates.

Saturday from 7 to 11 p.m. the Junior and Senior Teens will skate with charges \$1 per child.

Thirty-six people attended the successful basketball banquet, with tribute paid 1st Lt. Art Draut for his coaching.

The History of the Air Force, a motion picture, will be shown at 2 p.m. Saturday in the Youth Club.

A shell jewelry class will start, following the film.

Club officers will meet at 2 p.m. Saturday in the club.

Free judo classes for boys from 12 to 16 start at 6 p.m. Wednesday in the base gymnasium.

The Little League Council meets at 10 a.m. Monday.

The Youth Advisory Council meets at 9 a.m. Wednesday.

Brownies and Girl Scouts and their mothers will be guests of Aileen Gunn at a coke and cookie party at 4 p.m. Tuesday at the Youth Club.

Brownies will sell cookies on the base and in Reese Village from March 7 through 21.

The Junior Toastmistresses meet at 7 p.m. Monday in the Youth Club.

Three disc jockeys will aid with the DJ Dance Night from 7 to 11 p.m., March 16. Junior and Senior Teens will attend.

NCO Club

"The Ad Libs" will play for dancing from 9 p.m. until 1 a.m. today at the NCO Club, with "The Royals" providing a variety of music from favorite waltzes to twists the same hours Saturday. New dinners, games and special bands will be featured during March.

Special Kiddie Games start at 2 p.m. each Sunday.

WINNER—Maj. Joseph A. Simunac, right, Student Squadron commander, receives the first place trophy in Intramural League basketball for his unit. Presentation is by 2nd Lt. Norman Spier, team captain and high scorer.

District Volleyball Meet Set March 12-14 At Reese

Reese will host the District A squadron level volleyball tournament of Air Training Command March 12 through 14 in the base gymnasium, with indications that six teams will compete.

For the past several years Reese has had a strong contender for district honors, with the Students finishing second in the competition and also in the ATC tournament. A tournament ending Thursday night was to decide which team will represent this base. The Students were leading the tourney, but had to win their game Thursday. The competition was one of three teams — M&S, Civil Engineers or the 3500th PTS.

District A is composed of eight bases which are eligible to send squadron teams for the March 12 tournament. Expected to be on hand are representatives from Amarillo, Sheppard, Lowry, Mather, Reese and Stead AFB's. Vance and Williams will not send teams.

A volleyball league will start here Monday with seven teams

entered. Tournament winners last week were Students over Air Base Group No. 1 and Engineers, 3500th PTS over MATS and ABG Team 2, and M&S over Students No. 2 and ABG No. 1.

BOWLING

Officers League

The Raindancers moved from second to first place in the Officers Bowling League Wednesday night on a 24 win-8 loss record. Dropping to second spot was Flight 6 with 23-9, while the Throttle Jocks also have the same mark. The Wing Winners moved up a notch to fourth place.

Captain James Ward hit a 224 high game, Capt. Richard Grorud 216. High individual series was rolled by 1st Lt. Ralph Beekman, with Capt. Fred Hiebert at 550.

The Dustdevils hit a 907 game and 2,599 series. Stan Board rolled a 1,045 handicap game and the Wing Winners a 3,040 handicap series.

FARES REDUCED

WASHINGTON (AFNS) — If the Civil Aeronautics Board gives its approval, American Airlines will put into effect a half-fare plan for United States military personnel on leave or furlough. The only requirements are that persons accepting the decreased fare be in uniform and present a copy of leave or furlough papers at the time of ticket purchase. Effective date of the plan is Mar. 17.

New Training Technique Being Tested

The newest staff agency in Air Training Command, the office of the Assistant Chief of Staff for Training Development (ATCTD), began work in January toward publication of an Air Force manual on programmed instruction.

Lt. Col. Gabriel D. Ofiesh, Director of the Training Methods Division, ATCTD, said the manual will be designed to guide instructors in remaking their training courses to conform with procedures of this revolutionary new educational concept.

Programmed instruction is now undergoing feasibility testing in ATC classrooms, and preliminary results indicate the concept will be determined applicable to Command training programs. Colonel Ofiesh said plans are to have the "how-to-do-it" publication ready for use when tests are completed and the new technique is ready to be applied to ATC programs. Navigational training is being tested in pro-

grammed instruction at Reese. The Training Methods Director said initial work on the manual dealt with defining the three established techniques — linear, branching, and mathematical.

He said the methods concern the preparation of programmed instruction texts.

Educational leaders, who were consulted in the first step toward writing the manual, defined each of the presentation techniques for future Air Force programmers and told them how to go about planning their courses.

Dr. David Klaus, Pittsburgh, Pa., concerned his advice with the linear method, in which the programmer guides his student carefully through small blocks of data, questioning him on each. The individual writing the linear text strives to arrange material and construct questions in such a manner that the student is always correct in marking his answer, but if he does make a mistake he is immediately aware

of the fact and can easily see the correct answer.

This technique of constant review and testing is designed to firmly plant the data in the student's mind.

Dr. Joseph A. Tucker, New York, N. Y., formulated initial guidance for the branching method, which presents a greater amount of information to the student at one time than does the linear technique. In this technique multiple choice answers are listed for questions, thus enabling the programmer to write in proper guidance for review, research, or further progress depending upon the answer chosen by the student.

The mathematical approach received the attention of its originator, Dr. Thomas T. Gilbert, Tuscaloosa, Ala. Dr. Gilbert was assisted by 2nd Lt. Paul L. Roberson, Sheppard AFB, Tex., who is one of ATC's leading students in programmed instruction techniques.

The mathematical system is defined as an approach to programmed instruction rather than a method, since various techniques may be employed in its application.

It is a process of finding the best way of arranging materials for learning. After the student's learning patterns and capabilities have been determined by his responses to preliminary material in the text, he is led along a linear or branching path of completion of the course.

Colonel Ofiesh said other experts will be consulted in further development of the programmed instruction manual.

COMMAND PROFILE

Air Training Command's Staff Judge Advocate, Brig. Gen. Frank P. Corbin Jr., can boast several outstanding chapters in his personal record.

He became a lawyer because the Army sent him to law school as a directed duty; he directed prosecution of German war criminals following World War II.

In 1939 he was one of four Army officers selected to attend law school, the selection coming eight years after he had been graduated from the U. S. Military Academy at West Point.

In 1942, he completed the Columbia Law School with a bachelor of laws degree and then served as Staff Judge Advocate with the Office of the Judge Advocate General, Washington.

He was Staff Judge Advocate of Army units in Europe, and later was Staff Judge Advocate of the Third U. S. Army.

In April, 1946, General Corbin was named officer-in-charge of the War Crimes Branch, Dachau, Germany. In this position he was responsible for the war crimes trials of the Malmedy massacre, Flossenburg concentration camp, Mauthausen concentration camp, and numerous individual atrocity cases.

Returning to the states the same year, General Corbin was assigned as legal adviser to the Under Secretary of War.

General Corbin transferred to the Air Force in 1947 in the position of executive to the Air Judge Advocate. In 1948 he was assigned to the Office of Secretary of Defense to assist the Hook Commission on pay revision. He later served as the Air Force representative on the Career Compensation Act of 1949.

General Corbin became Staff Judge Advocate of the Tactical Air Command in 1952, and three years later he was dispatched to the Department of Defense on temporary duty as an Air Force Representative on the 1955 Pay Incentive Act, and in 1958 was again called to advise on pay changes.

The general was named Staff Judge Advocate of the Far East Air Force in 1956. He served in this position until he assumed his present position as Air Training Command Staff Judge Advocate in July, 1961.

School Lunches

Menus planned for next week at Reese Elementary School are:

MONDAY—Ham chunks, pinto beans, buttered greens, corn-bread, fruit cobbler, milk.

TUESDAY — Meat loaf, baked potatoes, asparagus, hot bread, peanut butter cake, milk.

WEDNESDAY — Hamburgers, French fries, fruit cobbler, milk.

THURSDAY — Fried chicken, green beans, mashed potatoes, muffins, milk.

FRIDAY—No school.

Airman Education Regulation Revised

WASHINGTON (AFNS) — The Air Force has announced that the regulation pertaining to the Airman Education and Commissioning Program (AECPP) will be rewritten so that greater emphasis for selection of airmen to study under the program will be placed on young airmen who show promise of continuing their Air Force careers.

Under the amendment and effective with airmen selected for entry into college in fiscal year 1964, a minimum active duty period of one year prior to start of study will be required.

BRIG. GEN. FRANK CORBIN Staff Judge Advocate, ATC

Decreased Civilian Total 'In The Mill'

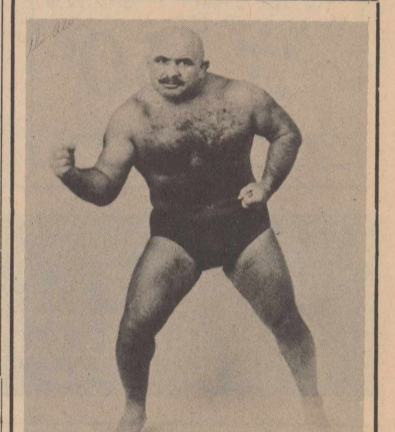

The Air Force has announced that it is planning to decrease the number of direct hire civilians on its payroll to coincide with the Department of Defense directives that civilian spaces throughout the Air Force be cut about two per cent.

For Fiscal Year 1964 budget, DOD reduced the Air Force direct hire civilian employment objectives from 311,162 to 299,845. A June 1963, ceiling goal was set.

Most Air Force bases, including Reese, will meet its new ceiling by permitting vacancies through resignation and retirement to remain unfilled.

Contenders Sought For Track Team

Although still early in the season, Reese is beginning to form a base track team. Track coach Paul Buccola has several outstanding trackmen in training and is planning a dual met with Lubbock Christian College. All interested personnel may sign up at the base gymnasium.

Cubs Given Awards, Advancements At Annual Blue And Gold Banquet

Fifty-six advancements and awards were made Monday night at the annual Blue and Gold banquet of the Reese Cub Scouts in the NCO Club. Colonel James A. Gunn III, head of Pack

548 charter institution, was guest speaker, stressing benefits of scouting and praising members of the pack for their enthusiasm.

Advanced to Wolf Cub were Lloyd Stoker, Gordon Utsler, Calvin Howard, Ronald Matthews, Stanley Hill, Mike Steele, John Vissotzky, Mike Nelson, Roger Goldsberry and Alan Heck; to Bear Cub, Mike Kelly, Billy Macklin, Jimmy Evans, Gary Wakefield and George Roberts; to Lion Cub, Roger LeClerc, Robin Goldsberry, Dean Roberts, John Say and Robin Shanks.

Arrow Point awards went to Calvin Howard, John Vissotzky, Mike Nelson, Roger Goldsberry, Alan Heck, Mike Guy, Mark Prestjohn, Mike Lobinski, Ricky Kumpf, Tommy Trusk, John West, David Hamilton, Mike Kelly, Mike Zaremba, Gary Wakefield, George Roberts, Perry Hamilton, Roger LeClerc, Robin Goldsberry, Teddy Guy and Ray Zaremba.

Denner stripes were awarded Chris Hall, Richard Dooley and Ray Zaremba, with assistant denner stripes to Mike Lobinski, Calvin Howard and Chris Rypkema.

Service stripes went to Ricky Kumpf, John West, Roger LeClerc, Dean Roberts, Robin Shanks and Lucian Ferguson. TSgt. Perry Hamilton, advancements committee chairman, and Capt. Floyd Longwell, Cubmaster, presented awards.

The Webelos den for senior Cub Scouts inducted Tres Longwell, Roger LeClerc and Chris Rypkema as new members. The three and Teddy Guy and Ray Zaremba, charter members, were given patches for their uniforms and Boy Scout handbooks. Handbooks also went to Dean Roberts, John Say, Robin Goldsberry, Rob Shanks and Lucian Ferguson, upgraded to full membership. Webelos work toward the highest rank in Cub Scouting to qualify as a tenderfoot Boy Scout. MSgt. Robert Goldsberry is Webelos den leader.

Pack 548 inducted into the unit as Bobcats Tony Blue, Timmy Kelly, Allen Lockhart, Donald Lockhart, Harold Raines and Mike Fleming.

Den 3, directed by Mrs. Mildred Wakefield and Mrs. Sue Guy, conducted the opening ceremony of placing candles on ceremonial stands to denote the five ranks of Cub Scouting.

Den 5, directed by Mrs. Ida Kelly, presented a program describing character traits which scouting aims to build. It constructed a "Ladder of Good Citizenship" with sportsmanship, friendship, teamwork, initiative,

dependability, honesty, loyalty, good will and responsibility as rungs.

Guests also included Chaplain Neil Daley, who gave the invocation, and Leonard Maranto, the pack's institutional representative.

Banquet chairman was MSgt. Howard Say, assisted by his wife, Mrs. Doris Say, denmother of Den 2. First Lt. Bill Shanks was program chairman and master of ceremonies. Mrs. Lucille Utsler and Den 1 put up decorations and Den 4, Mrs. Norma Shanks denmother, conducted the closing ceremony.

WE'RE READY—Five Reese Air Force Base airmen who plan to walk 50 miles in record time Saturday make sure their shoe-strings are intact before they start. Left to right are A2C Edward Toth, A3C Weston Negley, A3C Pat Stowers and A2C David Cole.

Secretary Seeking Changes In ROTC

WASHINGTON (AFNS) — Defense Secretary Robert S. McNamara this week called for radical changes in the Reserve Officers Training Corps (ROTC) program during his testimony before the House Armed Services Committee.

He called the present program one which "has in recent years given rise to increasing dissatisfaction on the part of both the military services and university administrators."

"The program has produced an inadequate number of officers with a particularly marked deficiency in the category of officers with technical qualifications," he said. "In addition, the program has been wasteful in terms of both regular military personnel and classroom facilities," he stated.

Water Safety Class Open To Reeseites

Reese people have been invited to enroll in the water safety instructor course offered by the Lubbock County Red Cross chapter, starting March 18 at the Lubbock ABC Boys Club.

The course is open to all persons 18 years of age or older who hold a senior lifesaving and water safety certificate and who plan to teach swimming.

James McNally, Texas Tech swim coach, will be one of the teachers.

Services Cooperate In Paying Military

All military personnel on TDY, leave or PCS are entitled to be paid at Air Force, Army or Navy accounting and finance offices.

Reese personnel may learn of procedures before leaving by inquiring at the base accounting and finance office. Payments may be made on any day of the month, but heavy workloads in some offices may delay payment a few days.

'STARFIGHTERS' FILMED

GEORGE AFB, Calif. (AFNS) —The Tactical Air Command will be presented to the nation's movie-goers in the next couple of months when the motion picture, "The Starfighters," is released.

It's A . . .

BOY:

Douglas Bryan, to A1C and Mrs. Gilbert R. Peters, Feb. 9.

James Duncan, to 2nd Lt. and Mrs. Warren H. Cheatham, Feb. 10.

Mark Alan, to Capt. and Mrs. Fred L. Michel, Feb. 14.

William Donald, to A1C and Mrs. William D. Brown, Feb. 14.

Brent Alan, to 2nd Lt. and Mrs. Ira S. Rager, Feb. 14.

GIRL:

Catherine Adele, to 2nd Lt. and Mrs. Thomas F. Hutchinson, Feb. 8.

Nita Denise, to SSgt. and Mrs. Henry T. Hudson, Feb. 11.

Pamela Dawn, to A3C and Mrs. Charles Elder, Feb. 12.

Pamela Kay, to A1C and Mrs. Howard J. Dutton, Feb. 14.

Air Force Attempts Collection Of Debts

Air Force accounting and finance officers attempt to collect debts from separatees, Maj. Robert Body, Reese accounting and finance officer, said Thursday.

He said that unsuccessful attempts are followed by referral of the debts to the claims division of the general accounting office and then are referred to the Department of Justice, where legal expenses may be added to the debt.

The major asked all persons processing separations to keep these facts in mind.

Reese is an important base in Air Training Command, which has the motto: "Prepare the Man."
