## SWEET N' SOUR

Happy Fourth of July! To be sure we haven't really gotten all of our Easter eggs colored but, ready or not, here comes that flag waving holiday. And this is going to be flag-wavingest day in history for our own particular Main Street, USA -- Legion Commander C. H. Lunsford's campaign for a flag Lunsford's campaign for a flag for every store in Baird has met with phenominal success. Mer-chants have cooperated in every way and some twenty-five flags are ready to fly on the Fourth. Now if someone will just start a crusade to bring back the Americana to the day, we'll be happy. Why can't we have a band concert on the courthouse lawn, with maybe some local band concert on the courthouse lawn, with maybe some local club taking over the concession of or old fashioned homement for old fashioned homement to be spent at breakneck speeds on the highways and certainly the only spirits that need be mixed into the occasion would be those of the '76 vintage.

Mrs. Onle Abernathy had an especially happy week -- a visit from son William and family of Odessa was the reason.

Mrs. Hubert Ross welcomed summer-time vacationers in her home this week - Mr. and Mrs. Dwight Mayes and children, Gary, Steve and Patty.

Schools out everywhere now, and Cordie Brame welcomed her granddaughter Pattle 'home' for a few weeks. Rea Corn thinks vacation is

the most too - especially when it brings a visit from her cousin Sue Starr of Ft. Worth.

Baird Elementary School is getting 'the new look' -- the entire interior of the building is being redecorated New color schemes have been planned for grades one through eight and the result is going to be for a

more attractive school.

Mr. and Mrs. Dick West and their 'lively ones,' from Washington, D C., are in Texas now ington, D.C., are in Texas now Don Allen, first vice president; on their annual vacation. ## About Your Health .

A person can live three weeks without food, three days with-out water, but only three min-uites without air.

Would you know what to do
if a member of your family or neighbor became unconscious and stopped breathing and there was no doctor around?

In just a few minutes anyone can learn the technique known as mouth to mouth breathing. This method has been known to man since bibli-cal times, but has recently been proven much more popular than any other method of artificial respiration.

This technique may be used to revive all unconscious and non-breathing victims of drowning, electric shock, smoke or gas inhalation, drug or chemical poisoning injuries to head, neck, chest, and abdomen, convul-sions, cardiac arrest and other

Mouth to mouth rescue breathing starts with clearing the mouth of any foreign objects such as tobacco, food, seaweed, toys, loose teeth or other small

objects.

Then, with one hand grasp the victim's chin, placing the other hand on top of the head and with a rotating motion, tilt the head backward. A roll of clothing or blanket placed under the victim's shoulders will help keep the neck in favorable position. position

Insert the thumb of one hand Insert the thumb of one hand between the victim's jaws. Grasp the lower treth and pull the jaw forward. Never let the victim's chin sag or let his head return to normal, relaxed position. Stop air leakage through the nose by pinching the nostrils chosed with the thumb and index finger of the other hand. the other hand.

## It's the Law in TEXAS

Water Attracts Children

Owning a swimming pool is becoming rather common in Texas and it places some legal duties on the owner. Your main duty hinges on the "doctrine of attractive nuisance" under which you became legally responsible to young children who trespass on your land

As a rule you owe no duty to trespassers They must take your property as they find it:

if dangerous, that is their tough luck Not so for children who wander on your land. The attractive nuisance doctrine says that if you have some manmade things on your land which entice youngsters, you have a legal duty to make your land

sate for them A high tension line, an old mineshaft, a railroad turntable, a pool of clear acid may be ir-resistible to children. If they are likely to be attracted and unable to grasp the dangers, you have an "attractive nuisance"; and you must make your pre-

Recently a court held that a swimming pool may be an at-tractive nuisance. In that case a toddler drowned in Jones' pool. Jones and the boy's parents lived across the street from each other. About 30 feet from the other. About 30 feet from the street, the pool was fenced but with openings through which children could enter. On week-ends the Jones were not home, only the Jones' children. Ani-

mals often played near the pool.

The pool and the animals could attract a youngster; he could not grasp the water's dan-ger. The Joneses could have had a locked gate. A jury properly held Jones responsible for the drowning.

How young is the child? Can he appreciate the dangers? How easy is it for the owner to make the place safe for children?

There are times when an older child should appreciate dangers. vices.

An older child playing on a Mr. staffold should appreciate the dangers of height. In another case, a twelve year old boy tried to jump on a train which was moving along a public street. When he fell he could not get damages for his injury. He should have seen his danger. Besides how could one put up a barrier along a public street which could keep out twelve year old boys.

The main factor to remember in using these insecticides is to use them be-for the grubs appear in the backs of animals. If they are used after the grubs appear in the backs, a poisonous reaction can set up in the animal and they become very sick and even die. However, there is no danger of using this material before the grubs appear on beef cattle and dry dairy cows, and it can save you lots of dollars.
