

Daily Rains Soak Region

Daily rains over the territory have turned this section of the high plains into a paradise of green foliage. The rains usually falling as local showers, have ranged from a few hundredths to as much as one and one-half inches in several localities.

In Stratford the July rainfall has been 1.96 inches. .95 of that amount fell during the past week.

Farmers who have their row crops planted are jubilant over the situation.

Others like Jake Meyers, who has been unable to get into his wet fields to plant, isn't complaining but believes this to be as wet a July as he has experienced on the high plains.

C. T. Watson, with stubble fields too wet to plow, says that his neighbors tell him that between 18 and 20 inches of rain have fallen on this field this year. He says he can remember when an entire year passed when there was not enough rain to register in the rain gauge on this same field.

High plains temperature has been exceptionally pleasant. During the nights the temperatures have fallen into the 57 and 58 degree cycle. In the day time, the temperatures have remained in the 70's or the middle 80's.

The cool refreshing climate has but one disadvantage for the ladies who spend much of their time in growing flowers in their yards. They say it is just so cool and damp that flowers which normally flourish in this section during the month of July seem to be retarded in growth.

July rainfall measurements in Stratford have been: July 2, 1.01; July 7, .05; July 8, .03; July 9, .20; July 11, .53; July 12, .14.

Annual Traffic Deaths Surpass Titanic Loss

J. O. Musick, general manager of the Texas Safety Association and Coordinator for the Annual Slow Down and Live Program, makes this comparison:

John Jacob Astor donned his formal evening clothes — the 8 piece band swung into the strains of "Autumn" . . . the stars shown down on a quiet ocean. Then, the giant "unsinkable" liner, lights suddenly extinguished, sank beneath the water. With her went 1,517 men, women and children. The rich and famous Mr. Astor, the foreign born little known Mauritz Adahl, the loving, elderly Mr. and Mrs. Isidor Straus (she had refused rescue to stay with her husband) . . . the children, the parents and the newlyweds. The Titanic, then the largest, most luxurious and "safest" ship afloat, was down in the ice-filled Atlantic, taking with here 1,517 souls.

The world rocked with recriminations, hearings, accusations and almost universal grief. Maritime laws were changed. Famous men committed suicide. Widows, widowers and orphans filled the newspapers with poignant pictures and stories of their irreparable loss. The Titanic sinking was one of three of the greatest "natural" disasters ever experienced by United States Citizens.

Yet a greater, ever-recurring and ever-growing disaster strikes this country every year. Ironically it goes without notice, with no national gnashing of teeth, no headlines, no remedial laws. Each summer month, June, July and August, for the past 5 years we have killed more than twice as many people as died on the Titanic. They die not from "natural" disasters, but through man-made mistakes and carelessness on our streets and highways, crushed beneath the wheels of trucks, trapped in flaming cars, mangled by searing, suddenly accordion-pleated metal. Traffic accidents in the United States in June, July and August of 1958 too the identical number of lives attributed to three of our most dreadful disasters, the Titanic, the Galveston tidal wave, and the Johnstown flood. 9,726 men, women and children lost their lives in traffic accidents in those months. 9,726 men, women and children perished in the three "natural" disasters.

Governor Daniel and local officials and enforcement agencies and citizens have joined hands in support of an international traffic safety campaign, Slow Down and Live. It is the duty of every motorist, of every pedestrian to join in this effort. Speed is our number one killer.

Now is the time to work on hobbies and collectors items for the Stratford Jamboree and County Fair September 7, 8 and 9, says Mrs. H. H. Caraway, superintendent of this division of the fair.

A new division has been added to the hobbies department. Last fall there were so many wall plaques entered that a special section has been added for them. It is hoped that many entries will appear in this division as well as in the divisions shown in previous years.

Hobby collections will include leathercraft, wood craft, model craft, doll clothes, color, black and white portrait photographs, color and black and white scenes, wall plaques and any others.

There will also be divisions for dolls, coins, stamps, shells and other entries chosen by collectors.

Five prizes of \$1.00, 75¢, 50¢, and two 25¢ prizes are being offered in the youth division. Adults will compete for prizes of \$1.00, 75¢ and 50¢.

Sonja DeBord On Wayland Honor Roll

Making the scholastic honor roll at Wayland Baptist College in the spring were 116 students, including Sonja Jean DeBord of Stratford. Of the 116, some 10 students made an "A" average.

Miss DeBord, a sophomore business major at Wayland last spring, is the daughter of Mr. and Mrs. L. S. DeBord. A 1959 graduate of Stratford high school, Miss DeBord maintained a 2.0 or "B" average for the semester.

Legislators To Try To Solve Tax Problem

(By Vern Sanford) Texas legislators, like students who failed to complete their work in the long term and have to come back to summer school, return to Austin this week to "get it over with".

Goal is the passage of a two-year appropriations bill expected to run around \$2,600,000,000. To pay for it, they will need to find some \$350,000,000 more in tax money than now provided on the law books.

But if money is short, advice is not.

At least three committees have a word or two for the lawmakers. Two are unofficial. They are the Citizens for a Sales Tax, whose name explains its purpose, and the Citizens for Fair Taxation, which is pushing Gov. Price Daniel's plan for additional selective sales taxes, plus more business taxes, higher taxes on alcoholic beverages and others.

A third committee, appointed by the Governor, avoided a single, specific recommendation but pinpointed some sort of retail sales tax as the most likely source for the amount of money needed. This committee is composed mainly of the chairmen of governing boards of state welfare and educational agencies.

Committee suggested that with either the retail sales tax passed by the Senate last session (a "general" sales tax with exemptions for food, farm supplies, medicine) or a "Pennsylvania-type" tax which affects (Continued on Page 6)

Your Citizenship

"I am a man which am a Jew of Tarsus, a city in Cilicia, a citizen of no mean city." — Acts 21:39

Religion... ITS LESSONS FOR MODERN LIVING

HOW many of us are proud to say we are a citizen of a certain community?

From the above passage it is obvious that St. Paul was proud of the fact that he was a citizen, and we know that he worked overtime at being a good one.

According to the National Municipal League the seven ills of government are: popular apathy and ignorance, undemocratic methods of elections, spoils and corruption, wasteful and antiquated systems, overlapping services, hand-to-mouth planning and financing, unnecessary centralization and bureaucracy.

How many of these ills prevail in this community?

The answer to such ills is in each of us. They will not exist if we exercise our citizenship wisely and with resolution.

Summer Range Practices Are Outlined

Summer management practices used on a ranch tend to carry over into fall and winter, and eventually determine whe-

ther or not a year was as profitable as it could have been. G. O. Hoffman, extension range specialist, says there are several practices that should be carried out this summer, but which will provide benefits for the rest of the year.

One of the recommended practices is deferred grazing. On a pasture that has just received a rain, deferring allows native grasses to make rapid growth. Grasses can make seed in 4 to 6 weeks, but best results are obtained when the pasture is deferred all summer. It is also profitable to defer a pasture that has not had any rain. Native grasses need a rest once ev-

ONE OF THE BRIGHTEST GEMS IN THE PHILLIES TREASURY OF PROMISING YOUNG PITCHERS IS ART MAHAFFEY

22 YEAR OLD ART POSTED A 7-8 RECORD IN 1960 WHILE APPEARING IN 14 GAMES. HIS ERA WAS A FLOOZY

HE STRUCK OUT 17 CUBS BATTERS IN ONE GAME ON APRIL 23

The WORLD OUTDOORS

NOT long after the last shot had echoed, two Mississippians left the National Crow Shoot at Frankfort, Kentucky with a raft of trophies, proud holders of a double events record that crow callers will most likely aim at for some time to come.

Joe Duff and O. L. Green, Hattiesburg, Mississippi, established a new national record in this unusual competition by registering a total of 71 birds.

To the uninitiated, let it be said that crow shooting is not to be compared to shooting clay pigeons or sitting ducks. It is an art that takes plenty of skill and practice. The crow is known far and wide as a cagey old bird, and he's not easily fooled. His eyes are sharp, and so is his wits. He has a canny instinct for smelling trouble and, once he senses danger, has no hesitation about spreading the word for miles around.

In competition, crow shooters dress in an assortment of camouflage clothing and many of them blacken their faces or smear the visible parts of their body with green ink; all of this to help them blend into the scenery.

Concealment is but one factor. The shooter must still be able to call the crows to his hiding place. The crow is inquisitive but, if he answers a "call" that doesn't sound just right, he'll come over a mile high, or set down in a tree some distance away and look the situation over carefully.

Duff and Green are two of the best crow callers in the country, and have proved it. Duff was named National Crow Calling Champion in 1960; Green earned the same title in the 1961 competition.

Their total of 71 birds came during two hours of competition. This amounts to one bird for every two minutes of calling.

The honeymoon is over when she stops dropping her eyes and starts raising her voice.

ery 4 years in order to increase their vigor and re-establish their root system.

Another excellent way to relieve grazing pressure on permanent pastures is to use temporary pastures. Ranchers in the drier area of the state should also plan to reduce the stocking rate by culling unproductive animals, Hoffman continues. Livestock numbers should be balanced with the amount of grass on the pasture.

Water is necessary for good grass production, but in some areas of the state moisture is not too plentiful. It is therefore wise to make profitable use of every bit of moisture available. One way to do this is to construct diversion terraces, known as "throw-outs", to divert the run-off water from roadside ditches onto the pasture. The added water will grow lots of grass, says the specialist. Another way is to control brush growing in the draws, creek bottoms and overflow areas. These productive range sites will produce good grass when the brush is taken off.

Something else to watch for this summer is poisonous plants. These pests should be controlled so as to keep livestock losses to

a minimum. Hoffman says that under present conditions, ranchmen should carry out only those range practices which require very little cash outlay. He also recommends using the cost-sharing programs to help carry out the ranch improvement program.

Club Ladies Favor Flags On Parade Floats

Home Demonstration Club ladies of Sherman County met Friday and during the meeting it was suggested that every float entered in the Stratford Jamboree parade display the United States flag. It was further suggested that some merchant furnish the flags for the floats. The ladies believe that the flags would add color as well as show the loyalty of the territory to the country.

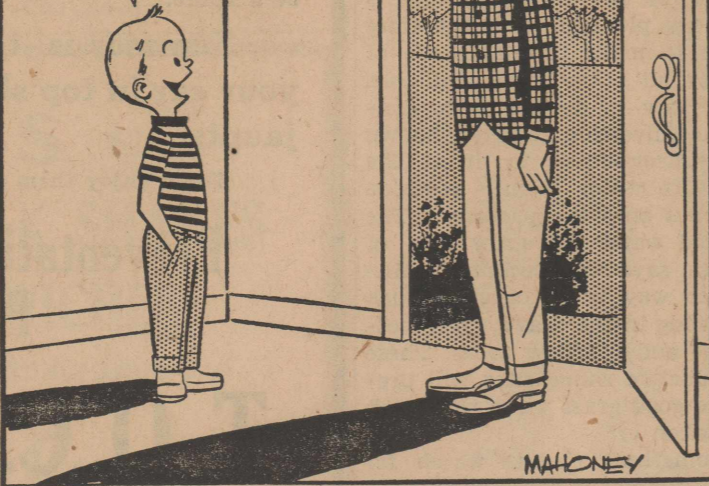

Beauty Spot Of The Week

There are a number of yards in which there are a few pretty flowers, but due to the two recent hail storms and the continued rains, the flower club committee has had difficulty in finding an outstanding array of flowers. The spot selected this week includes the bouncing bet, perennial phlox and petunias at the home of Mr. and Mrs. Oma Ellison.

FIELD DAY . . . High ranking government and military officials of the Republic of Korea become symbolic "farmers for a day" as they plant rice sprouts near Seoul.

Reasons given for the rate raise include:
 1. More people than expected qualified for the 20 per cent premium cut allowed under the Safe Driving Plan for drivers with no accidents or violations. This caused a decline in premium income.
 2. Higher cost of repairing to-

day's wrap-around windshield, wrap-around fender cars.
 3. Generous jury awards for injury and damage claims.
 4. Drop in the number of new cars sold last year.
 5. Apparent dropping of insurance by some motorists who had previously carried it.

Auto Insurance Raised
 Beginning August 1, Texas motorists will pay higher premiums for automobile insurance. How high the premium goes will depend on the county in which the motorist lives and its accident record. In general, the big city counties have higher accident rates and insurance premiums than rural counties. In Travis County (Austin), the increase on a typical policy would be 15 per cent; in Dallas County, about 17 per cent.
 This is the first increase in the base rate for auto insurance ordered by the State Board of Insurance since 1958. Reductions or increases for traffic accidents and violations under the Safe Driving Plan will continue as before.
