DONALD PERRY SAYS HOUSING LOANS ARE NOW AVAILABLE

Applications for insured housing loans are now being accepted from families in all income groups, Haskell County Supervisor Donald R. Perry of the Farmers Home Administration said today.

Until recently funds were available for families with low and moderate incomes.

Mr. Perry said home financing for families of above-moderate income, can be resumed by the agency under a new allocation of lending authority granted by President Johnson. A Presidential order March 17 authorized the agency to insure \$25 million more in housing loans to families of the upper income group between now and June 30.

Action on new applications from persons in the above-moderate income group had been at a virtual standstill since January. The agency had taken all applications it could meet under the previous \$25 million current fiscal year.

There has been no action of the rural housing program for low and moderate income families, which allocation of \$300 million in 1967.

Mr. Perry said applications from families in all income groups accepted at the Home Administration, 316 North 1st Street in which serves Haskell.

The county supervisor said that insured housing loans to date this year have totaled \$84,000.

Tornado Season Is Here Again

Col. Homer Garrison, Jr., director of the Texas Department of Public Safety, today urged Texans to review tornado safety precautions.

"While tornadoes can occur any time of the year," Garrison said, "April, May and June are the peak months."

U. S. Weather bureau records indicate that Texas leads the nation in total number of tornadoes per year. The annual average of 80.7 is based on a record of 1,210 confirmed tornadoes from 1951 through 1965.

"It is especially important for every school, church, hospital, hotel, business house and industry to establish an emergency plan," Garrison said.

"To know what to do when a tornado is approaching may mean the difference between life and death."

A circular on tornado safety is available from most local Civil Defense offices.

Christian Church, who was the guest speaker for the day.

Mr. Barry's topic was "How To Live A Successful Life." His message was based on the scripture, John 10:10 - "The thief cometh not, but for to steal, and to kill, and to destroy; I am come that they might have life, and that they might have it more abundantly."

The guest speaker pointed out three basic areas to attain better life. First, we must have a faith to live by in which our selfish attitudes are put out of our lives, and the faith of Christ must motivate our lives that we may influence leaders in our community. We must come to the place that we can say with Paul, "For me to live is Christ, and to die is gain."

Second, we must possess a life to live with. We can not escape life by running away from it. We find out how Jonah who tried to run from life got into a snare of a lot of trouble. In order to run with life as did Abraham and Lot, and also Noah, we must face many trials and temptations but yet keep our faith.

Third, we must have a task to live for. The soldier, the doctor, the ditch digger, all must be Christian in their tasks. The main task that God has for your life is to be a fit companion of the Lord Jesus Christ.

In conclusion the speaker said "... If you want to build something, build men for God... that will last for eternity. God has given us a challenge. What are we going to do with it?"

Bill Ratliff read a note from the Red Cross in which they were asking for specific needs to be sent to Vietnam. The club voted to send 12 dozen wash cloths and some pop corn.

President Bob Herren also read a note from the B&PW club thanking Rotarians for the opportunity of sharing with them in bringing Rubinoff and his violin to Haskell.

Missing Account Numbers Slow Payment Of Medicare Claims

Reports from Blue Shield, the carrier, which handles medicare doctor bills claims for the Abilene area, indicate that payment of some claims is being slowed up because medicare identification numbers are not shown on the request for payment form.

"Even though the number may seem like a very simple item, it is very important to the medicare carrier," R. R. Tuley, Jr., district manager of the Social Security Administration in Abilene said. "Without the medicare identification number, it is very difficult for the carrier to find out if you are actually signed up for doctor bill insurance or if you have met your \$50.00 deductible for the year."

Tuley advised beneficiaries to be sure that they copy the number from their red, white and blue medicare card in the blank at the upper right-hand corner of the request for payment form before sending it to P. O. Box 22147, Group Medical and Surgical, MEDICARE - Part B, Dallas, Texas 75222.

"There are a couple of important things for beneficiaries who pay their doctor bills and send in their own request for payment forms to remember," he said. "Be careful to fill in all blanks on the top half of the form and be sure to either have your doctor complete the bottom part of the form or enclose his itemized receipted bill."

Tuley reminded beneficiaries that he was talking only about doctor bill claims where the "payment to the patient" method was used. Under the "assignment" or "payment to the doctor" method, the doctor sends the bill to the medicare carrier and bills the patient only for the part not covered by medicare.

"We are inviting Abilene area beneficiaries who are making a doctor bill claim for the first time, to bring their request for payment forms into our office and let us check them," Tuley said.

Beneficiaries who are unable to come to the office or meet a representative when he is in their vicinity may send their forms to the social security office at Box 3258, Abilene, Texas 79604. They will be contacted if there are any problems, he added.

Announcing Buick's new GS-340.

(The miniprice GS-40.)

If you read the papers, you know how great our new famous GS-400 is. It's the one in the background. And you also know you don't get a GS-400 for peanuts. It's a great car. But it's just a little rich for some people. So we set to work and designed the GS-340. It has a smaller engine (but the wide machine weighs less) its

interior is clean and simple and tasteful. And it has its own ornamentation, just like the rally stripe and hood scoops, and of course, all the 451 safety features. So now you have a car that runs less than the GS-400, but one with its own special brand of excitement. How can you beat that kind of a combination?

Shikawa Has Learned A Bit Of The Heart of America Is Like

Note: Koji Ishikawa of Akita-ken, Japan, is visiting in the home of Mrs. Frank Callender. The following article contains Koji's pleasant visit as written by Mrs. Callender.

KOJI ISHIKAWA

Koji left Haskell April 3rd bound for Birmingham, Alabama and points east. For just less than six weeks Koji saw Texas...at least parts of the North Central area that farmers and ranchers graciously showed him. Some folks might puzzle the 'way' and the 'why' such a young man would be in our community.

Koji was born of Buddhist parents in the northern part of Japan. The local interests of the people focus around those things pertaining to the rice farming of the area. The small community of about twelve hundred is home for Koji, his father and mother, a 17-year-old brother, Junji, a 15-year-old sister, Masae, and a childless uncle and aunt who are grandpapa and grandmama to the Ishikawa children. Koji's father is a manager in a co-op farm bank but the beloved uncle grandpapa is a farmer. With his uncle, Koji learned to farm at an early age and he likes farming.

After Koji was graduated from high school, he went "over the mountain" to Tokyo where he attended Tokyo University School of Agriculture. As many college students do, Koji paid

part of his way by tutoring grade school boys during his four college years.

In 1963 Koji found someone who changed his life... he found Jesus Christ as his own personal Lord and Saviour. Koji's interest in farming seemed to deepen and broaden as life took on new perspective through Christianity. How well he knows the needs of his people! (Over 11,000,000 people in the city of Tokyo... the equivalent of all the people within the state of Texas in that one city.) He feels that Japan must look for better means of feeding her millions of people. The mountain riddled islands have only 65 per cent of tillable land and there are millions of people on much of that. It is a mammoth problem.

Koji's degree in farming is from Tokyo's University of Agricultural School in hydroponics... (the raising of crops in solutions with nutrients added.)

As a Christian student, Koji's life was changed. Changed to dedication and purpose through deep devotion, consecration and study. To be one of the small per cent of Japanese Christians does not seem to discourage Koji. Of the 5,000 students in the Agriculture School, there were four who began prayer service and study. In a year's time the number increased to 13.

During the last three years Koji was in college, he became more sure the Lord would use him to help his people through agriculture and livestock raising. As an eager young farmer he felt the urgent need to come study farming and livestock methods in the United States of America.

Last summer, Koji was graduated in Tokyo and on July 25 he sailed by Jet to San Francisco. He arrived over two hours before he left home! Almost a year had passed since Koji's missionary friends, Ralph Cox and his family, had come back to the U. S. on leave, but they had found for Koji a welcome place with Ralph's brother in Lander, Wyoming and they took Koji to several churches in Wyoming before they sailed for Japan in August.

Just how Koji made all the contacts for places he has visited and plans to visit is necessarily communicated, yet, the simple truth appears to be that along the way Christians who have met him appreciated his witness and sincere quest for knowledge. We Americans do seem to like to share what we know with others!

Whether in Colorado, Nebraska, Wyoming or Texas, Koji says that the world which is most representative of the American farmer is VISION. Farmers in the "U.S.A." look to and plan for improvement and greater production.

While here in our community, we hope Koji felt a bit of what the heart of America is like. We know what joy he received from worshipping with fellow Christians (even when he understood little, if anything, that was said), and our appreciation for the privilege of worship becomes keener. We heard how well he learned our language and read its words in song; he has learned a new hymn each month since becoming a Christian... both Japanese and English words... and our desire to better understand other lands and peoples has been redefeated. We "broke bread" together and feasted on the richness of God's word and graces. Koji left with our prayers for his well-being. We know we are brothers and will be forever.

Haskell County History

30 YEARS AGO
 (April 9, 1937)

Despite a small amount of election-day flurry of interest which attracted 188 voters in the usually quiet school election, three members of the board were re-elected Saturday with comfortable margins. The names of A. H. Wair and Mrs. K. H. Thornton appeared on the ballot in addition to the three trustees up for re-election. Re-elected were T. J. Arbuckle, Marvin H. Post and H. S. Leon. Individual totals for candidates were Arbuckle 170, Post 137, Leon 157. Mrs. Wair 47, Mrs. Thornton 41. Other members of the Board of Trustees are D. H. Persons, Lynn Pace, W. M. Cass and R. L. Burton. R. E. Sherrill was presiding judge for the election, and was assisted by Mrs. Reynolds Wilson and Mrs. R. H. Darnell, clerks.

60 YEARS AGO
 (April 6, 1907)

Mr. R. B. Williams was in Thursday from his farm on Wildhorse and said that farm work was well advanced on the prairie.

Sheriff M. E. Park made an official visit to Rule Wednesday. Mr. J. N. McFatter visited in Abilene this week on business for the Haskell Brick Company. J. M. Westbrook and Bro. shipped a car of scrap iron to St. Louis this week.

Mr. S. S. Cummings has sold his place in the south part of town to Mr. N. C. Smith.

Dr. David L. Cummings, late of Sparta, Bell County, has located in Haskell and will do a general medical practice. Miss Susan Houston entertained a few friends at forty-two on Wednesday.

Capt. Bartlett, former government scout and Indian fighter, but now representing the Peters Cartridge Company, will give a free shooting exhibition here on the 10th. Capt. Bartlett is one of the most expert crackshots in the United States.

Judge H. G. McConnell went to Abilene Monday to try the Lester Power murder case, which was transferred from this county in which he is leading attorney for the defense. Others who went were Judge H. B. Jones, J. W. Collins, J. W. Meadors, J. E. Wilting, Dr. A. G. Neathery and quite a number of witnesses from Carney, the place of the tragedy.

Judge Peter Helton left Tuesday to attend the county and district courts in Comanche and will be absent two or three weeks.

Capt. T. P. Boyd of Fort Worth, who purchased property in Haskell 15 years ago, was here Wednesday looking after his interests. Capt. Boyd says that he is confident that the Rock Island and the Weatherford, Mineral Wells & Northwestern railroads or one of them at least, will build in Haskell.

10 YEARS AGO
 (April 7, 1927)

J. B. Post and G. B. Fields were re-elected as Aldermen in the city election held Tuesday. Only two Aldermen were to be elected this year, and Messrs. Post and Fields had no opposition. Only 126 votes were polled in the election. The two gentlemen are now serving as aldermen and their re-election retains the same city council for another year, which is composed of J. B. Post, G. B. Fields, A. H. Wair, N. L. McCollum and M. F. Spurlock.

E. Siegel of the Haskell Bargain Store spent several days in Dallas this week on business. The annual meeting of the Board of City Development was held in the new City Hall Tuesday night, at which time officers and directors for the ensuing year were elected as follows: R. C. Couch, president; Leo Southern, secretary. The board of directors elected were: C. V. Payne, R. C. Couch, Hollis Atkinson, F. T. Sanders, L. J. Isham, H. M. Smith, Jno. W. Pace, J. A. Couch, T. C. Cahill, E. Siegel, Jesse Foster, H. C. Kimz and J. L. Southern.

Work was started this week by D. Scott, local contractor, on a one-story brick building on the south side of the square, between the V. W. Meadors building and the "M" System store.

Election of school trustees for the Haskell Independent School District was held Saturday with three trustees to be elected. A

side of the front entrance. A long flower bed covered with violets runs along the north wall. An oblong brick encircled flower bed was blanketed in thrift. Roses gave promise of color throughout the summer.

Blooming peaches, redbuds and red cedar add color to the south yard. But the best yard was where I lost my heart completely. Huge oak, towering toward the sky, cast their shadow on a green carpet of St. Augustine grass. Several trees are circled with beds of oxalis and vinca.

Red honeysuckle twines its tendrils up the 6-foot chain link fence that encloses the back yard. A brick planter box edges the native flag stone patio. Rustic redwood table and benches makes the patio perfect for barbecues and picnics. One can sit and watch the birds bathe in the bird bath that nestles beneath a large pecan tree.

Strawberry plants were loaded with small, half-ripe berries, canna, chrysanthemums, Fall asters and other flower-filled beds that run the full length of the backyard. All this pretty picture is reflected in two mirrored back doors. A large picture window in the den overlooks the beautiful panorama of the backyard and the lovely ranch land where a winding pean-lined creek meanders on to a larger stream somewhere near.

The soil is sandy loam enriched with oak leaf mold. All plants were a dark, rich green. How my fingers itched to dig in that rich soil.

Haskell Garden Club members do not forget our pilgrimage to Weatherford April 8th, to see the Chandler Gardens.

IN THE PUBLIC INTEREST

The Texas Legislature is being asked to declare legal the practice of optometry under trade or assumed names and in multiple offices, if the practice is owned by a licensed optometrist, and it should do so.

The effect would be to restore what was the law until the State Board of Optometry adopted a ruling prohibiting the practice, and the Texas Supreme Court, reserving the Dallas Court of Civil Appeals, held that the board was within its authority in promulgating the rule.

Five of the six members of the board are members of the Texas Optometric Association which tried unsuccessfully in 1939 and 1953 to get the Legislature to forbid the practice of optometry under a trade name.

A rehearing is being sought before the Supreme Court, but if the recent ruling stands, as seems likely, it is quite possible that the cost of eye care and glasses for Texans will increase substantially. Advocates of the pending legislation, House Bill 933 and Senate Bill 423, contend that the increase would be anywhere from 30 per cent to 50 per cent, without any improvement in optometric care to the public.

There is no doubt at all that permitting licensed optometrists to practice under trade or assumed names and in multiple offices has had the effect of keeping down the cost of eye care and glasses to the people of Texas, and there is no evidence that it has been contrary to the public interest in any way.

The Free Press believes that the rule of the State Board of Optometry is not in the public interest and that the Legislature should, by enacting specific legislation, declare to be legal what has been permitted in the past.

The Price of Inflation

Statistics and reality have a way of parting company when it comes to measuring the impact of inflation. Some authorities minimize inflation by pointing to total personal income in the United States last year of nearly \$600 billion ... up some 8 per cent over the year before. This, they point out, compares favorably with the rise in consumer goods prices which was less than 4 per cent.

The term personal income, as used by the government, includes a variety of payments to individuals ... wages, net rents to landlords, dividends and interest received by individuals, net income of the self-employed and "transfer payments," mostly social security and veterans benefits.

The total income figure is meaningless in determining how all these different groups of individuals fared. Much of the rise in total personal income is accounted for by the fact that more people are at work than ever before.

Statistics notwithstanding, there is but one way to keep ahead of inflation and that is for government to live within the taxpaying ability of the people. As deficits mount, the value of the dollar declines. As of January, 1967, it was worth about 87 cents of the 1957-59 dollar. This means, in spite of impressive statistics of total personal income, that millions of individuals are worse off now than they were a few years ago. This is the price of inflation.

The Good Earth
 By Mrs. B. F. Cobb

We went to Ranger last Sunday to the home of my niece and her husband. All the children of Mr. and Mrs. James W. Kennedy, who live in Texas, except Weldon, were there for a family reunion. My sister, Edna, and her husband, Don St. Clair, and their children, were there also. Sandra and Bill Herrod own the "Eleven Oaks" ranch just out of Ranger.

A circular drive-way winds around eleven large oak trees, hence the name. A tall gas light with an extension arm where a black iron horse stands guard over the sign "Eleven Oaks" and an oblong flower bed centers the front drive. Iris beds wind around the drive. The spacious brick house nestles in more large oak trees.

What people are saying about...

A CLEAN BREAK WITH THE PAST

"I would have nothing but an electric Gold Medallion home," says Mrs. Bob Corkins of Alpine, Texas. "I like the low operating cost," says Mr. Corkins who thinks the electric bill a good value. Kathy, age 5, and Greg, age 10 months, smile contentedly, and that means they like the comfort of total-electric living.

The Corkins' Early American style home has 7 rooms, 2 baths, and a covered patio—2,000 square feet of living space. The only fuel used for all purposes is electricity. It operates a 4-ton heat pump with 15 KW Auxiliary Strip heating, 4-ton refrigerated air conditioner, electric range, washer, dryer, disposal, dishwasher, refrigerator, freezer, two 1.3 KW bath heaters, and Medallion light for living, yet operating cost averages only \$38.03 per month—22.8¢ per square foot per year!

The Corkins have been living better electrically since 1959 and are well pleased with it all. "I love electric cooking," Mrs. Corkins says. "It's much better, faster and cleaner." The Corkins especially like the even heat throughout the house, and let the temperature stay at 70° year-round.

Would you like to live in total-electric comfort? Then see your electric contractor or visit WTU.

means not only the positive command but also "as ye go" or "while going."

Are you like myself, finding it easier to go across town to witness than to witness to my own neighbors? Perhaps it is even more difficult to witness within one's own home.

Jesus also meant for us to "go" into every area of life, economically, socially, racially and educationally. Also, we should go in God's power for He said: "All authority—power—has been given me."

Also we do not go alone. "I am with you to the close of the age."

Our Father, help us to use the faith that you have already given. Help us to "go" in Jesus Name. Amen. (Matt. 28:18-20) (Amp. N. T.)

TAX MAN SAM SEZ:
Since Internal Revenue Service processes all the income tax forms through the computer they have to match the name, address and social security number with last year's information in the computer tape. This makes it very important for taxpayers to use the pre-addressed tax forms they receive in the mail from Internal Revenue Service. If you cannot use the form you receive in the mail, take off the piggyback la-

bel and use it on your return so Internal Revenue can identify you. Don't "get lost" by sending in a different name or social security number.

This is the "Go" generation all systems are "go." Whether we call it the "in" group or the "Pepsi" generation, we mean the same thing.

Experts tell us that our difficulty in reaching the moon is not the "hardware" but the man. Man's environment must be controlled. The limitation is man, whether it be space travel, social acceptance or spiritual progress.

Jesus commanded His disciples (and the church) to "go." "Go then and make disciples." Our invitation has been to "come and hear" rather as He commanded "go and tell."
