GRASS ROOTS OPINION

SHELBY, MONT. PROMOTER: "There are probably child TV viewers who believe that the human head is divided into 3 rooms. 1 with a hammer pounding away and another shooting sparks; that the human stomach is made of glass with a long crooked tube leading into it; that the stomach has a cute little trap door that lets the good 'B' out and keeps the 'bad aspirins in.'"

WINNEMUCCA, NEV., HUMBOLDT STAR: "Nothing serves so strikingly as a symbol of a man's intent and purpose as his attitude toward a free press. He who must silence his critics, he who must equate their complaints with treason, has become a dictator, no matter how much he may deny it. Castro is approaching that important border line. If he snuffs out a free press in Cuba, the last illusions about his libertarian idealism will go crashing in the dust."

NORWALK, CONN. HOUR: "Since the first sputnik went sputtering into the wild blue yonder, there has been a great vogue for following the example of Soviet Russia in matter related to science, on the theory that the Communists have the last word. Dr. Atkinson, was a delegate to the International Federation for Documentation, held in Warsaw, Poland, last September. He found the Russians were copying the American system and were decentralizing the moment our scientists were urging that the Soviet method be followed. If we aren't careful well meet ourselves coming back."

CHEWELAH, WN., INDEPENDENT: "Legislation is being drafted to regulate all actions of the petroleum industry in the State of Washington. As contemplated, the board would regulate production, refining, transportation, distribution and sale. Passing another lag, licensing the gasoline dealers and forcing a price control on gasoline, is not in the best public interest. If this can be done with gasoline, who, or what product will be next on the list of government control?"

Soviet spokesman have pooh-poohed an American home which is part of our Moscow exhibition, saying it could be possessed only by the well to do. The fact is that the home, with land, is for sale in a Long Island community for \$14,490. This means that more than half the families in America can afford to purchase it—for government figures show that the average American workman today purchases a \$14,207 home and pays for it at the rate of \$96 a month.

Self-Employed Should Also File Social Security

A self employed person has an obligation to file a yearly tax return and pay the social security tax on his net earnings. He also has the obligation to himself and his family to build the protection that correct and regular reporting affords.

Erton F. Tate, district manager of the Wichita Falls Social Security Office, makes this statement as a reminder to all people who work for themselves of the importance of filing their 1959 tax returns on or before April 15th, 1960.

Many people, he said, do not realize that failure to make a yearly report is a violation of the law and can result in penalties and interest charges on unpaid social security taxes. Many more do not understand that delay in filing can cause loss of valuable social security credit and so cut down their old age, survivors and disability insurance protection. His office, and every social security office in the country, he said, can cite examples where failure to report has resulted in the wiping out of the social security insurance protection altogether.

As an example, he gives the case of a self employed farmer. Farm operators, and certain other self-employed people first came under social security at the beginning of 1950. With the filing of their 1959 tax returns they will have five years of work credit under the law. To get disability protection under social security, five years of work out of the 10 years before disability begins are necessary. A farmer who has filed a tax return every year beginning with 1955 now has that protection.

The farmer he had in mind recently became totally disabled. A friend advised him to apply for social security benefits as he is over 50 and, as his friend declared, "has been in work covered by social security 5 out of the last 10 years." He applied, but he was in for a shock. The reason? He had neglected to file a return and pay the social security tax for 1955. The law says that your earnings must get on the record within three years, 3 months and 15 days after the taxable year in which they were earned. For the year 1955, that time was April 15, 1959.

This man's earnings for 1955 can never be credited to his social security account. As he is too disabled for further substantial gainful work, another year of earnings can never be credited to his social security account. He remains one year short of the work requirement of the law. He and his dependent wife and minor children have lost the protection his compliance with law would have given them.

If you are a self employed person, Mr. Tate said, guard against the possibility of this happening to you. Report your net earnings correctly and regularly year after year. For information about reporting, get in touch with the District Director of Internal Revenue; for information about old age, survivors and disability insurance, what it is, who it protects, and what it pays—come to the Wichita Falls social security office, Erton Tate advises.

Census Takers Tracking Down 'Floaters' Apr. 8

Squads of picked crew leaders and census takers will fan out over this area on the night of April 8 in a special 1960 Census drive to count persons who do not have a fixed address, District Supervisor Herbert S. Gray said today.

The census takers will visit missions, all night theatres, and city parks in this special effort to make sure that all residents of the area are counted. Persons who do not have a fixed address are included in the population of the place in which they are located by the census takers.

The district supervisor pointed out that under Census law, all persons 18 years old and over are required to answer official Census questions. The same law specifies that personal information collected by Census takers must be kept confidential.

The person who willfully refuses to answer the official Census questions is subject to a maximum fine of \$100 or 60 days in jail or both. The Census taker who reveals information about individuals to anyone other than a sworn employee of the Census Bureau is subject to a fine of \$1,000 or two years in jail, or both.

Amos L. Prince of Ft. Worth is visiting this week in the home of Mr. and Mrs. Homer Chambers, west of town. Mr. Prince strolled into Roy Magers office Saturday and gave a fictitious name, but Roy immediately recognized him as being his first school teacher in Alford, Tex., some 42 years ago. Saturday, April 16, is D-Day for Burkburnett telephone customers. At Midnight Saturday, April 16, you will be able to dial over 42,000 Wichita Falls customers direct as well as over 2,000 Burkburnett telephones simply by dialing the listed number. This step to enlarged customer dialing service has been awaited by Burkburnett telephone users and represents another step forward in our program to bring you the best possible telephone service for your needs.

APRIL — PICK-A-PHONE TIME

Pick-A-Phone in Burkburnett means color telephones for all locations in your home and business. It means Spring—with flowers—gardens—color—freshness and beauty—symbolized by color telephones where you need them. Come by our Business Office and see our attractive display, or call JO 9-2291 today and pick your phones in your favorite colors.

SPIRIT OF SERVICE IN ACTION

Every now and again I hear a warm, human story about people that makes me feel pretty good. I think this one will make you feel good, too.

Here's what happened: A man and his wife had come to court to adopt a little girl—a German orphan. But one of the officials told the man (dressed in a suit and sport shirt) that it was the local custom for a man to wear a tie when appearing before the judge in court.

Protesting, the tieless man said if he were not allowed in court now, the adoption would be postponed, perhaps for months.

At this point, Jerry Sharp, a veteran installation foreman for Southwestern Bell who happened to overhear the conversation, removed his own tie and, handing it to the man, said, "Here, take mine."

Well, a few minutes later, the adoption proceedings were underway and the little girl had a new family. So often it's the "little" extra things you do that help the most.

BRIGHT IDEA FOR SPRING

Driving around Burkburnett the other day, I suddenly realized that Spring is with us again.

Everywhere I went—from East Third to Sunset Drive—I saw the drab signs of winter being replaced by fresh new colors. Color seems to be the talk of Spring.

Perhaps you've seen our magazine ads suggesting that you "Pick-a-phone from a garden of colors." It's a timely reminder that a color extension phone is an easy, inexpensive way to add a dash of color, and time-saving convenience, to any room. Nine beautiful colors to choose from! You can order yours by calling the telephone business office.

Call by number. It's twice as fast.

As a result of plans made by the Wichita County Home Improvement Committee, some 40 homemakers have refinished furniture in a recent workshop. The workshop was held to teach leaders who will teach other homemakers. Home Improvement chairman is Mrs. Gale Lowrance and Mrs. J. L. Graham who served as chairman, when plans were made.

Workshop participants removed old finishes, sanded, filled wood stained if needed and finished with oil sealers or varnish.

A special problem of care for leather upholstery did arise. For this, use pure castile soap or saddle soap to clean leather uphol-

tery or leather surfaces on table advises Thelma Wirges, county HD agent.

Dip a cloth or sponge in warm water. Squeeze out excess water and rub leather briskly with the soapy sponge. Follow immediately with another moist cloth or sponge dipped in clear water. Rub dry with a clean soft cloth. Any gloss which disappears will be restored by friction of the last rubbing.

Avoid using furniture polishes, oils and varnishes on leather. These materials frequently contain solvents which cause leather to become sticky. If leather appears to be drying out, apply a small amount of a leather dressing with the fingertips and palm of the hand.

The dressing recommended by the agent is 60% pure neat's foot oil and 40% pure anhydrous lanolin, obtainable at a drugstore. Warm the lanolin gently in a double boiler until melted. Add neat's foot oil and stir until uniformly blended. Apply a small amount & rub into the leather until it is completely absorbed.

Mrs. Jack Marshall had a marble top for a lovely old chest, which was dull. To polish it, Miss Wirges gave suggestions for doing the job. These were:

First wash the surface of your marble with suds of warm water and a mild soap. Rinse well and wipe the surface dry with a chamois to prevent spotting and streaking.

When dry, smooth with a fine abrasive finishing paper, such as 500-A or 600-A silicon carbide. The agent says this is sold under various trade names, but you will recognize its steel gray color. Or you can use grit size 8-0 to 10-0 of any finishing paper. Wrap this around a smoothing block.

Remove the dust and wet the marble surface. Sprinkle lightly with tin oxide powder. Tin oxide powder is also called putty powder. You can buy it at a drug store. Get about four ounces. A little goes a long way.

Dampen a coarse cloth, fold it and rub. Keep the cloth and

the surface damp as you rub it to prevent spotting. A few drops of detergent may be added to the water with which you dampen the surface and cloth. This helps to distribute the tin oxide powder evenly. Wipe surface with clean cloth and dry with chamois.

To freshen Rattan furniture if the finish on your rattan, bamboo or wicker furniture is beginning to look a bit sad, there's still time to freshen it before hot weather really gets underway. Miss Thelma Wirges gives some helpful suggestions for doing the job.

First, remove dust from the weave crevices with the dusting attachment of your vacuum cleaner. If the furniture needs a really good cleaning, you can use a garden hose and brush to do the job. Work fast to avoid soaking the furniture and place pieces where they will dry quickly.

If the furniture has a dried out look, it can be revived by a scrubbing with a boiled linseed oil and gum turpentine mixture.

The mixture is easy to prepare. Buy linseed oil that is labeled "boiled." Mix three parts of the boiled linseed oil with one part gum turpentine. Shake and pour a thin film on top of a cup of hot water. Dip a brush into the thin film of oil and turpentine and apply to the furniture.

Wring another cloth out of hot water and wipe off excess mixture. Dip a brush into the hot water and scrub surface. As the oil solution cools, discard it and make up a new hot cupful.

To refinish worn rattan, bamboo or wicker furniture you can apply a coat of thin type penetrating wood sealer to the dry surface with a brush. After it has been thoroughly cleaned. Or, if you prefer paint the surface.

**U. S. TREASURY
DEPARTMENT
INFORMATION**

"Each taxpayer is entitled to at least one personal exemption of \$600 in filing his Federal income tax return for 1959," Henry R. Hall, Administrative officer of Internal Revenue Service, Wichita Falls said today.

He added that a taxpayer who was 65 or older, or who was blind at the end of '59 is entitled to an extra \$600 exemption. If both conditions existed, the taxpayer gets two extra exemptions of \$600 each. Identical exemptions for the same conditions apply to his wife when a joint return is filed.

If your husband or wife died during 1959," Mr. Hall said, the number of his or her exemptions is determined as of the date of death. Be sure to check the appropriate blocks on your return.

Mr. Hall said that taxpayers with questionnaires about personal exemptions, may get a free copy of Document No. 5013, Personal Exemptions and Dependents," by calling 322-3165 in Wichita Falls, or writing Internal Revenue at Box 456, in Wichita Falls.

Special Taxpayer Assistance Day at the IRS office is every Monday from 8:30 a. m. to 5:00 p. m.

The fellow who boasts about what he's going to do tomorrow usually is quiet about what he did yesterday.

**Profit On Home
Sale Taxable?**

If you sold or bought a home during 1959, you will be interested in what Mr. Henry R. Hall of Internal Revenue Service, Wichita Falls, has to say.

"Profit on a home sale is the difference between what you paid for the home, plus your expense on it for permanent improvements and your sale price."

"However," Mr. Hall added, "if you use up the profit in buying another home within a year, or building a new home, occupied with 18 months after you sold the old one, your profit is not taxable."

The Revenue representative explained that the new home cost must at least equal the adjusted sale price of the old home, if none of your profit is to be taxable.

"By 'adjusted sale price' is meant the full sale price, minus commissions and the expense of decorating within 90 days before the date of your sale contract," Mr. Hall said.

Taxpayers with questions on this subject may get Document No. 5017, "Selling Your Home," by phoning 322-3165 in Wichita Falls or by contacting the IRS office at Post Office Building, 1000 Lamar St., Wichita Falls.

Texas leads all other states in the building of new interstate highways since the beginning of the program four years ago.

To date, 562 miles have been completed in Texas, says State Highway Engineer DeWitt C. Greer, and 355 more miles are under construction. Cost so far: \$460,400,000. Target for the State is to have 3,030 miles in this main, heavy-duty truck system. These roads, Greer points out, have built in safety features and are three times as safe as ordinary highways.

Features that enable these roads to cut the traffic toll by one death a year for each 10 miles of length are:

1. Dividing of traffic to eliminate head on collisions.
2. Grade separations to cut out intersection accidents.
3. Wide lanes with surfaced shoulders to provide ample room for passing.
4. Controlled access entrances and exits to ease cars on and off highway.

But the super roads are only a fraction of the program in the state with more miles of public roads than any other in the country. For the less elaborate divided highways not in the interstate system, Greer says the state now has 1,029 miles of divided highways, with a goal of at least 2,700 miles by 1975.

New Industry Seeking
Reorganized Texas Industrial Commission is setting out toward some tall goals with a short stick.

Commission, with a staff of one man plus a secretary, is after a Texas-sized share of new industries for the state. Its appropriations for the year is only \$23,750. Other agencies of government have assisted, however with research. Questionnaires already have been sent to Texas cities to build up a permanent file of data on potential sites.

No Wide Open Spaces—
As Texas prairie gives way to subdivisions, more and more Texans are getting in each other's way. Problems growing out of the population explosion and rapid urbanization of Texas were the subject of a two day Austin conference for newspapermen, civic leaders and planners.

Texas newspapers were commended by Steve Matthews, executive director of the Texas Municipal League, for their efforts in keeping the reading public informed on complete & changing city problems.

Conferees pondered how to plan orderly, pleasant communities for the two million additional residents expected to be added to Texas cities in the next 10 years. Also how to correct the all too prevalent bane of acres of hot asphalt and cold stone, congested streets and the grotesque suburban sprawl.

One Word Makes Difference—
Because of a slip of the tongue or typewriter in Potter County, Court of Criminal Appeals dismissed appeals in three cases mistakenly addressed to the Court of Civil Appeals.

A court order from the district court in Amarillo said the defendants had given notice of appeal to the Court of Civil Appeals, Austin. Since the cases were criminal cases — driving while intoxicated, contributing to the delinquency of a minor, the civil court could not handle them. And since they were appealed to the civil court, the criminal court could not handle them.

Trinity Permit Granted—
After the longest and probably most patience straining hearing in State Water Board history, Trinity River Authority and the City of Houston were granted permission to build a \$40,000,000 dam at Livingston. Also authorized was a \$5,000,000 salt water barrier at nearby Wallisville.

Conclusion of the matter was a near miracle of compromise and appeasement. Initially Houston alone had sought the permit with stiff opposition from the Trinity people. They got together and agreed on a joint project with a 70-30 split on costs and water use, with Houston taking the larger portion.

But when the hearing came before the Water Board, the San Jacinto River Authority, North Texas Municipal Water District and affected landowners protested.

SJRA dropped its opposition when Houston agreed to use Trinity water for industry only and to step up buying of San Jacinto water for domestic use. Water Board order provided that the rights of upstream users in North Texas should not be cut into by the new dam. That left only the landowners to satisfy, probably in court.

Home Held Up—
Highly controversial \$100,000 plus home for the Sam Houston State College president will not be built unless the governor and legislative budget board give the green light.

Henry Sears, chairman of the board of regents for teachers' colleges, made this promise to the Senate cost of government committee. If budget board opinion follows that of many legislators' recent comments, it will take a dim view of the project. Senator told Sears they were irked with the teachers' college board for what they regarded as a complete breach of faith and an apparent by-passing of legislative intent to keep a check rein on college building programs.

Tourist Revenue Falls—
Texas had a \$100,000,000 slip in tourist spending between 1957 and 1959. State Highway Dept's 1959. Tourist Industry report shows for 1957 10,300,000 visitors, \$531,000,000 spent; for 1959, 9,600,000 visitors, \$431,000,000 spent.

Highway Commission Chairman Herbert C. Petry, Jr., said competition for tourists is strenuous. He said he hoped the new state advertising program, due to begin soon would help to expand the crop.

The poor man worries over his next meal, the rich man, over his last.

News From The Congress

By Congressman Frank Ikard

It becomes more and more apparent that there has been a change in pace in Russia's diplomatic policy. They continue to flirt and court the erratic Castro in Cuba with the hope that they can establish a firm beachhead for Communist activities in the Western Hemisphere. Castro reacts by his near hysterical ranting against the United States and by arresting our citizens on the slightest pretense and confiscating American property in Cuba.

The result has been that our relationships with Cuba have steadily deteriorated since the Castro Regime, and all indications are that this will continue with the little Cuban Dictator apparently trying to see just how far he can push before we break off relationships altogether.

In the meantime, on the other fronts, the Russians make pious proposals with respect to suspending atomic tests and speak of the urgent need for world disarmament obviously hopeful that we will be lulled into a false sense of security by their pious pronouncements. All of this indicates that the Russians have reached a conclusion that they are strong enough politically and economically to challenge us on all fronts in the world.

More and more we will see attempts at economic and political penetration into the Western Hemisphere for the Russians know that we have been preoccupied with Europe and Asia and have to a degree forgotten about our traditional friends south of the border. We should be able to overcome the Russians in any economic and political conflict, but to win takes imagination, determination, energy and leadership. If it develops that Castro does succumb to the Communist influence in Cuba, we will have suffered a major defeat.

POLITICS AND POLITICIANS

DEAR ALTON:

I read your letter of last week, and of course I am glad to know you are running good in your race for Tax Assessor and Collector of Wichita County. One of the reasons that you are running GOOD is because you have remembered my advice that I gave you in my last letter. This advice was that Politics resembled a bucket of Sorghum Syrup, that was GOOD at all times. But I also warned you that if either you or any of the other candidates ever turned it over that it could become very messy. I was glad to notice in your letter that you spoke of ideas and principles of GOV'T., which is GOOD. You will REMEMBER that George Washington warned the people that by keeping any one man or group of men in office TOO LONG that the people might lose the FREEDOM FOR WHICH WE HAD FOUGHT, AND PAID SO DEARLY TO OBTAIN. A one man rule or rule by the same group is not GOOD for the people, at any time. Therefore, I feel sure that the people will ELECT Alton Hanes as Tax Assessor and Collector of Wichita County. I am NINETY years old, and I think that especially the old people of your county will remember that we had GOOD GOV'T. in our days. But in those days candidates didn't even ASK FOR OFFICE FOR MORE THAN TWO TERMS, and ninety-five per cent of the time when they asked for a THIRD term they were DEFEATED. KEEP HUSTLING AND LET ME HEAR FROM YOU.

Your Dad, R. O. HANES, Commerce, Texas, Pol. Adv. Paid for by Alton Hanes
