of residences on collection dates as collectors are not supposed to enter a person's property and search all over the yard to locate the garbage can.

By better cooperation on the part of all, better service can be given.

Officials also wish to remind persons desiring to haul their own garbage to the dumping site, that they are welcome to do so. They do not have to obtain a permit to haul their own garbage and trash. Persons wishing to haul on a commercial basis must first obtain a permit from the city.

It has been brought to the attention of city officials that residents of Rockport are hauling their garbage to the dumping

ground at Fulton under the impression that they are not allowed to haul their garbage to the city dumping ground. This is in error and Rockport residents are requested to use the site provided for them.

INTERESTING FACTS ABOUT TEXAS

EXPRESS HIGHWAY

The year 1953 marks the 36th anniversary of the Texas Highway Department. Today, the vast network of paved Texas roads totals over 40,000 miles and represents more than a billion dollar investment. Modern highways offer built-in safety features, such as in the above scene of the Dallas Central Expressway. Modern transportation also requires extra conveniences that increase the safety, comfort and pleasure of the travelling public. The Texas Highway Department has met these needs with 854 Roadside Parks, better highway signs and markings, and Travel Iinformation Bureaus located at the major Texas entry points.
