### **Ratliff's Furniture** Stages Three-Day **Grand Opening**

Ratliff's Furniture, one of the chief sufferers in the disastrous fire that swept the Bushart building here approximately two months ago, will re-open Thursday morning in a new building, constructed especially for its tenancy by Claude Prophet, with a new and larger stock than before, John Albert Ratliff said.

The new building is located on Austin Street, just north of the Western Auto Store.

A feature of the opening will be the art show to be staged by pupils of the Rockport School of Georgia Benningfield, and Joyce ization of the board for the com-Fine Arts, whose canvasses will cover the walls of the new building.

The opening will run for three days, today, Friday and Saturday, and a number of door prizes will be given, Ratliff said. First, of course, is a console model RCA HiFi, and the second is a Whirlpool vacuum cleaner. In addition to these three will be others from time to time, he said.

"We have completely new stock," he said, "and we have added a number of popular lines of fine furniture that we didn't carry before. In addition, we have added a stereo record department. We intended to carry the largest stock of TV and Sterophonic players in the area, as well as HiFis.

"Due to lack of time and loss of equipment in the fire, we do not intend to operate a TV service department at present. However, we will stock, service and install a complete lin eof all sorts of TV antennas."

## TELEPHONE TALK

by Bob Freeman, Manager

#### EVER HAPPEN TO YOU?

Before I came to know a little more about telephones I used to get irritated when I'd dial a number like 7599 and end up getting a wrong number, like 4599. It must be the doggoned phone system, Pd say. I have found out since that most of my trouble was that I failed to wait for the dial tone to come on the line. I'd just pick up the receiver and start in dialing. Now I know that if I dial before the dial tone tells me the equipment is ready, I'll get a wrong number almost every time. It's the little clicks of our dial that get the numbers for us. If we "beat" the dial tone, some of our clicks are lost. So I've learned to listen for the dial tone first, and then dial the number I want.

#### SPRING-A-LING. -- IT'S KITCHEN TELEPHONE TIME

I guess you might ay that Spring and color just go together. The lawns are getting greener, trees and flowers are starting to bloom, and soon there'll be color all around us.

Spring is also a time for housecleaning and remodeling-at least at our house where we always have a project or two on hand. Whether it's housecleaning or remodelng-or both-why not add an extra touch of color like a friend of mine did recently?

His wife was having a new counter-top installed in the kitchen, and called to tell him what a professional job the carpenter was

Figuring that he wouldn't let the carpenter steal his thunder, my friend called the telephone company and ordered a white wall phone for the kitchen.

### SO MANY COLORS!

When he made the big announcement at dinner, my friend admitted he was worried about his choice of color. "They had so many colors," he explained, "I wasn't sure which to choose. They had red, green, beige . . . "

"But white goes best with the new counter-top," his wife interrupted, "just what I needed to perk up the kitchen even more."

The moral of this story is if you want to be a hero, add that extra touch of color by ordering a kitchen telephone for your wife. A kitchen telephone in color will brighten up the room, help her get things done, and let her chat with friends between chores.
