

# THE JAYTON CHRONICLE

JAYTON, KENT COUNTY, TEXAS, FRIDAY, SEPTEMBER 20, 1935

NUMBER 38

## For Jess Mitchell For State Senator

Mitchell, editor at Muleshoe, county, announces his candidacy as State Senator for this district, to succeed Hon. Arthur P. Duggan, recent death left office called by an election called by the board for September 28.

Mitchell, in making his announcement, says he is entirely mindful of the opportunity for service the grave responsibility this office is a sacred trust. "I believe," he said, "that aside from the duties of the Church, there are more serious and more important duties of State.

He has no pretensions whatever as a skilled politician; has no public office and am not in politics par se; but I am intensely interested in the welfare of this great area of West Texas, in years past, as a citizen bear able to do many favorable things for the section, and confidently believe that as an official I can accomplish more and greater results.

For 55 years of age, virtually in the prime of business life, strong, alert mentally and sound in body, I am a college and university graduate. While I am now and for several years past a newspaper editor, I am also a farming three farms embracing several hundred acres, one of them irrigated farm near Muleshoe which myself and family was born on a farm, have actual dirt farmer and am acquainted with the farmer's life.

As a soldier in the Spanish-American war, served in the secret service during the world war, I was at one time United States Commissioner at Columbus, under appointment of President Woodrow Wilson.

As citizens of this State have in a large majority favoring the abolition of the officer fee. As your senator, it would be my privilege and pleasure to do my power to enforce these laws by passing such laws as are to the needy aged this income and to arrange for them; to pass such laws as regulate the sale of liquor to the advantage of the State, as for the protection of those not favoring it, and to use my influence toward the passage of amendments as to the citizenry.

I am glad to discuss in public the other phases of government with citizens, many of whom will be taken up in public discussion.

My desire is to give conscientious and constructive service to the State in general and to this district in West Texas, looking toward eventually this area the best part of the Lone Star Empire. My plan is to keep in step with the progress of this district, to work with them and to eventually share with them the blessings of a good fight—we have faith.

There are innumerable benefits this area is entitled, ought to have with proper attention at Austin. Strong, as now, men of ability and successful business experience and for such conquests as are being made. It will

## Farmers Hold Canned Feed Demonstration

The Trench Silo Demonstration conducted by Mr. E. R. Eudaley, O. G. Tumlinson and county agent D. F. Bredthauer on the farm of Mr. Jack Overholt Monday September 16th proved to be a high success. Boasting attendance and interest was shown by the farmers.

Mr. Eudaley brought out facts that kept farmers spell bound, showed them the solution of proper care of excess feed in West Texas. Facts were cited where feed had been put down in this manner thirteen years ago and on reopening a few months ago was found to be in first class condition. Feed put down in a Trench Silo is a guarantee insurance against rats, weevils, fire, rain and storms. A trench large enough to take care of fifteen or twenty acres of feed can easily be dug in one day in the average Kent county soil.

Mr. Eudaley also stressed the value of good silo feed. When feed is stacked in the open or in barns it becomes dry and is wasteful to handle and does not have the food value as compared with good silage. Feed that is mature and when the leaves have begun to burn somewhat makes the best silage for cows, horses, hogs and poultry, all livestock relish good silage. Workstock can be fed this feed under heavy working conditions and it is also proven that horses fed all the silage that they can eat have never been found to be bothered with the colic. When the pasture has burned up and no green feed is available you will always notice that your milk production falls off but when this occurs by starting to feed silage your milk production will at once begin to increase.

With the present conditions existing in West Texas very few farmers are able to repair their barns and build new ones. We all know that this abundance feed crop should be saved as much as possible, we also know that silage will keep over a period of years and as history repeats itself we will again have droughts in West Texas so why not build a Trench Silo and save the feed when we know it will be worth three or four times its present price during drought stricken seasons.

Texas has learned and profited many things in regard to silos in the past ten or fifteen years. We have come from the stave, brick and concrete type which costs hundreds of dollars to operate to one which cost much less and more economical our present Trench Silo. We have also learned that feed somewhat beginning to fire makes better silage than feed too green, this usually causes silage to be acid. The best incilage comes from feed which is mature and leaves can be in a very dry state as they will take up a good bit of moisture when water is applied in the trench.

The meeting was enjoyed by all who attended and from reports made at the meeting some fifteen or twenty silos will be put in sometime during the fall in this community.

Following are the names of farmers who attended the meeting: C. W. Fincher, Q. W. Branch, Bill Daniels, Joe Hunnicutt, J. M. Johnson, T. L. King, M. S. Sandell, A. C. Carlile, Ed Fuqua, C. H. Cade, J. W. Patterson, C. E. Hatfield, W. C. Fincher, E. S. Griffith, W. J. Sherrock, J. B. Earnest, J. A. Suits, and Jack Overholt, the demonstrator.

Several thousand people are expected to be in Jayton the 4th Sunday in this month. It is the occasion of the gathering of the singers of the three counties. But the singers that will be here will come not only from three counties in the Tri-County organization but from many other counties. It will be the great day and the cooks are already killing chickens and making pies and cakes.

The weather is perfect. Eleven bales of cotton were received by the Jayton Yard Tuesday.

The Lyles Store is looking better. A little paint did the act.

Any stuffed shirt can win a medal if you give him all the breaks. BUT IT TAKES AN EAGLE TO RIDE THE STORM ON A BROKEN WING. Elsie Robinson

It is my supreme pleasure to become the champion of the needs and rights of the citizens of this Senatorial district.

## Congressman Mahon Here Saturday Eve

Congressman George Mahon was in Jayton for a short while Saturday afternoon. He was looking fine and was wearing that same happy, friendly smile he wore before going to Washington. He told us that while he was at home in Colorado, he maintains an office in Washington and is always ready to do any thing for any of the folks within his congressional district. Mr. Mahon delivered an address at the dedication of Spur's new football and athletic field, Friday night. It was his intention to spend all of Saturday afternoon in Jayton, but was detained in Spur until late in the afternoon. He hopes to be in Jayton again this fall.

## Ten Thousand Future Farmers of America

Ten thousand Texas farm boys, members of the Future Farmers of America, will stage the most comprehensive junior farm exhibition in the history of the Southwest at the Texas Centennial Exposition next year.

The 435 chapters of the Future Farmers in Texas are already organizing for a seven day special show under the direction of Paul G. Haynes of Austin, State Director of Vocational Agriculture. County and sectional shows to select the best products for the Dallas Exposition will be held.

Dairy and beef cattle, horses and mules, sheep, goats and swine, all pedigreed animals raised by the junior farmers, will constitute the livestock exhibit. Scientific feeding of livestock will be demonstrated. The agricultural show will display the results of scientific farming. There will be milking contests in the dairy department and egg laying competition in the poultry section.

The farm boys will converge on Dallas in special trains, buses and automobiles. They will be housed in dormitories built for their benefit. A two hundred piece band, composed of young farmers, will provide music.

Future Farmers Week at the Exposition, which opens June 6, has been tentatively set from November 21 to 28. It will be one of the closing features of the \$15,000,000 show.

## Power and Cookies

In a recent radio address, United States Representative Samuel B. Pettigill of Indiana, dramatically demonstrated the absurdity of the argument that cheaper electricity is a vital need of the American people. He said: "The cold fact is that the increase in the cost of food alone—not the cost but the increase in cost—in the past two years has been five times the total cost of power and light in the American home." That would bring the power cost down near the cost of cookies in the average family grocery bill.

This should throw a bombshell into the camp of the anti-power politicians. Power is usually the smallest item in the average budget—and it is an item which is constantly dwindling in size, an increase use of electricity and discoveries making possible more efficient generation, transmission and application automatically lower rate levels.

Few dollars we spend bring us as much as the electric dollar, in happier, more comfortable living, and in the elimination of drudgery. No dollar buys us more. It would be an excellent idea if the boys who are whooping it up about the cost of power, turned talents in other directions—practically in the direction of the outrageous and unnecessary cost of government, national, state and local.

Mrs. L. H. Mason and daughter Mozelle arrived home the first of this week from Stamford, where Mozelle has been in the Sanitarium for the past two weeks under the physicians care. We are glad she is able to come home and hope for the speedy recovery of her usual good health.

Jack Brannen of Littlefield, Texas was seeing old friends and relatives in Kent and Stonewall counties, Wednesday of this week.

Miss Edna Davis left Monday of this week for Lubbock where she will attend Texas Tech.

## A "Hidden" Cause Of Accidents

The more traffic experts study the accident toll, the more they become convinced that there is an important "hidden" cause of many automobile accidents. This lurking agent of death and injury is carbon monoxide poisoning.

Carbon monoxide gas develops when any fuel—coal, wood, gasoline, or illuminating gas—does not burn properly or completely. It cannot be seen, smelled or tasted. Its only warnings are headache and drowsiness. Yet it is in the air wherever there is motor traffic. The exhaust of a car, even one in good running condition, contains a concentration of a fifteen per cent of it. As little as two per cent in the air will poison and four per cent will kill.

Statistics show, according to the National Bureau of Casualty and Surety Underwriters, that carbon monoxide from auto exhaust gases is the direct cause given in at least 700 deaths annually. No one knows nor can guess how many lives are lost indirectly through its influence. For example, there is no telling how often that common driving occurrence, "sleep at the wheel," has been induced by carbon monoxide.

All motorists are familiar with the headache and lassitude which often comes upon them while driving. These signs, coupled with the odors of exhaust fumes in a moving vehicle, are final warnings that carbon monoxide is present in lethal quantities. They should be more than sufficient notice to take the necessary measures against carbon monoxide poisoning. This means regular checking of the exhaust mechanism and the carburetor action, keeping the vehicle well ventilated when driving, eliminating any leaks or holes which allow seepage from the motor or exhaust to the body of the car.

Householders should also consider that carbon monoxide poisoning is a possibility when a gas stove, furnace and oil burner appliances can give advice on precautions that will afford safety from this invisible death.

## Palace to Have Old Time Fiddlers Contest

The Palace Theatre is sponsoring an Old Time Fiddlers Contest Wednesday, September 25. It is whispered that a number of the boys are doing some tall practicing to meet the keen competition that is expected.

It has always been customary at this time of the year when the old green holls are bursting into white fleecy balls, to give the old fiddler his chance to take on all comers in open competition. A fete equally enjoyable to both young and old.

All contestants will be admitted free and prizes for the winners. Five dollars will be the first prize, and in honor of the old guitar which is always important at the 'square dance' a prize of three dollars for the best guitar player.

As a special added attraction the management has secured the "One Man Circus" at considerably expense. The "One Man Circus" Mr. Grady Robinson, formerly of the "Cleo Players" and a familiar figure in the United States and Mexico will direct the contestants. A real bargain with no advance in prices.

On the screen Jack Holt in "The Unwelcome Stranger."

Mack Myers, who was taken to the Stamford Sanitarium last week, is back home again and able to be down town Thursday P. M. Mack says he thought for a time his Mrs. was going to collect his insurance, but says he is feeling fine again now.

Dell Sewalt, who was operated on at the Lubbock Sanitarium the first of the week for appendicitis and for a time was in a very serious condition, is reported doing nicely, much to the relief of her Jayton friends.

Latest news from Jo Robinson, who is attending McMurry informs us that she is placed in the honor class as a result of her preliminary examinations.

Mrs. L. F. Wade was very sick the first of this week but is now able to be up some.

## Tri-County Singers To Hold Convention

Alright folks lets get set for our Fourth Annual Tri-County Singing Convention to meet at Jayton next Saturday night and all day Sunday. The Saturday night session will be held at the Presbyterian Church, be sure and attend that session as all business coming before the Convention will be attended to at that time, also lots of singing Saturday night. We will begin the Saturday night meeting at 8:30 o'clock.

The Sunday Convention will be held at the Methodist Tabernacle—beginning at 10:30 o'clock—dome and bring a well filled basket of eats. We are expecting some of the best singing talent of Western Texas to be present. Don't miss it. Bring your song books—lets make this the best meeting of all.

R. E. Beaver, Pres.

## Do Your Part

Fire Prevention Week is to be observed from October 6 to 12. And here is a thought worth considering in the meantime:

Friendly fire—fire under control—is one of man's greatest boons. It keeps us warm, cooks our foods, motivates our industries, and serves us in countless other ways.

Unfriendly fire—fire out of control—is one of man's greatest enemies. It destroys property—causing irreparable economic loss. It menaces life. It hampers progress. It threatens community development, and industrial activity and employment.

A building for example, represents something besides money. It represents energy, achievement, labor. If it is a factory building, it represents creative, productive wealth. When fire destroys that building, insurance will give back part of the money it cost, but nothing can give back the energy that was wasted. Nothing can make up for the work lost, the finished products, the lost time.

The indirect cost of fire—costs which cannot be put into a balance sheet—are the real measure of our national fire waste. Those indirect cost are many times the direct cost.

Somewhere, as you read this, a home is being burned to the ground. A factory building is a smoldering ruin. A man is screaming in pain from a burn that will prove fatal. All this is the result of someone's oversight, someone's carelessness, someone's stupidity. Are you willing to do your part to minimize such happenings in the near future.

## Parking Rules

We desire to thank the folks who took so kindly to the parking rules as enforced last Saturday for the first time in years. We assure everyone that we only had the good of the town and the lives of the people in mind when we decided to put the laws in effect. We had no thought of discriminating against anyone.

Again let us caution everyone that speed within the city limits is all uncalculated. Twenty miles the hour is all that is necessary and this law must be observed. Parking around the sign boards three deep and parking left handed is all wrong. Please try and cooperate with us and make things as pleasant as possible. Folks willfully and deliberately and intentionally violating the city laws on speed and parking will certainly have to be delt with and when we fail to do our sworn duty we hope we will have the manhood to resign.

The City Commission  
J. M. Hall, City Marshal

Business interests in Jayton are giving away two fine new automobiles this fall. This should stimulate business considerably. The Jayton Chronicle is giving away one and Robinsons, Mayer Auto Service and Jones Drug are giving away another. It will pay you to do your business in Jayton.

Black Motor Company reports the sale of one truck and two cars this week. Basil Cairns getting the truck, Earl Harrison and Buster Winters getting the cars.

Med Wade left out Monday morning for Muleshoe, Texas where he will be employed for two weeks in The Journal Office.

## Pill Rollers Win Soft Ball Championship

In the play off series between the Prune Diggers and the Pill Rollers the Pill Rollers finally nosed out the Diggers by winning three out of five of the championship series. The series closed Sunday afternoon when the two teams played a double bill.

The losing teams or clubs now plan to give the winners a Chicken Barbecue. Everyone that has played and umpired a game will be invited to the occasion. The arrangements for the barbecue are being left up to the managers of the three teams that lost.

For those that don't like barbecued Chicken there is a special dish planned by Edgar Johnson and the writer of this article gets it from rumors that there will be something special for the umpires in the form of rat poison of a carbolic acid delicatessen.

Managers for the teams were: Hi-way, Sewalt; Oil Mill, Little; Prune Diggers, Jones and Harrison; Pill Rollers, Jones and Worthen. Med Wade hung up the record for strike outs during the season as he struck out at an average of three out of five times to the bat. Coleman Gallagher was considered the heaviest batter. Dallas Kenady was considered as the poop up king. Cobb Wade and Earl Harrison as the shut out pitchers and James McCormick as the Santa Claus of Soft Ball. John Jones and Dallas Kenady were known as the authorities on rules and regulations. H. J. Whatley and Grover Little were known for their brilliant base running and fielding exhibits.

After all it was a lot of fun and plenty of exercise for the business men with no other means of getting exercise, and it will be the source of many jokes and much conversation for a good while to come.

Why not let the teams organize basket ball teams and continue the fun thru the winter and have some more of the hot games and arguments.

## Current Business

The principal indexes, adjusted for seasonal variations, continue to climb to new highs for the year.

Currency circulation, best arbiter of retail trade, has made strong gains. Car loading are well up, with increased agricultural shipments. Electric power production leads the field—it is expected that production will soon reach a new all-time high. However, many companies are not showing satisfactory net earnings. Construction is well ahead of forecasts for this season. Residential building is about 125 per cent ahead of last year. Motors are star performers in the business parade—since the first seven months of this year, car production was greater than the entire year of 1934.

Most industries show better employment figures than past summers would have indicated, especially those which benefit from building activity.

Payrolls naturally follow employment and are higher than was anticipated.

## The Culture Club Has Opening Meeting

The Culture Club met for the opening meeting of the 1935-36 term. They met in the home of Mrs. R. L. Alexander. Mrs. William Alexander newly elected President, presiding. Mrs. C. J. Robinson gave an interesting history of the club. It was organized in 1920. Four of the charter members being present. Namely Mrs. C. J. Robinson, Mrs. Baker Robinson, Mrs. Thos Fowler, Mrs. N. E. Porter. The Club plans to study "Texas" as 1936 is the centennial year.

The next lesson will be "Early Texas." The Roll call will be answered with "Interesting events Before 1836."

At the business session Mrs. Wm. Alexander offered her resignation and Mrs. Eldon Wade was elected President.

A social hour of 42 was enjoyed by fourteen members. After which delightful refreshments were served by the hostesses, Mrs. R. L. Alexander, Wm. Alexander, Baker Robinson and C. J. Robinson. The Club will meet Sept. 27 in the home of Mrs. C. J. Robinson.

Sketter and Joe Dick Lewis came in from Austin Monday of this week to spend a few days at home.

**H. D. Club News**

**TRAINING SCHOOL ON "THE COVERED DISH LUNCHEON"**

"The covered dish luncheon offers an opportunity to have variety in meals, to include the family in acquiring a taste for foods which are otherwise disliked, to serve leftovers attractively, and a time saver for the home-maker." Miss Jones the C. H. D. A. told a group of home demonstration club women at a training school conducted on "The Covered Dish Luncheon."

New England Luncheon in Caserole was the dish prepared as representative of covered dishes. A pear salad served with this dish added luster to the appetizing feature of the luncheon.

Recipes for preparing covered dishes with foods available in this section were given to those present.

Recipe and bulletin files made from cigar boxes were displayed by the agent. Advantages of every housewife having well organized recipe and bulletin files were demonstrated. A plan for organization was given.

**PREFERS TINS TO GLASS FOR CANNING**

"We use tins altogether for the canning of corn, and meats; and for most of our other canning, especially shelled peas. We prefer the flavor of most products canned in tin to those canned in glass. This is probably because the tins can be quickly cooled when removed from the cooker which prevents an over-cooked product," said Mrs. W. L. Sellers of Polart.

There isn't a better piece of paying equipment on the farm than our cooker and sealer. It is an investment that actually pays big dividends. Recently one hundred and forty No. 2 cans of corn have been added to our farm food supply by our having our own canning equipment, she said.

**PRESERVING PEARS**

"Pouring sugar over pears and let stand overnight is just the thing not to do if you want good pear preserves," says Mrs. W. H. Lane, cooperator of the Jayton H. D. Club.

"Begin the preserving process of pears by combining sugar and water and let boil for about fifteen minutes, then add pears to this syrup. Cook rapidly until pears are clear. Pour the syrup over the pears and let stand overnight. Finish cooking. Cook until the fruit is clear, tender and a transparent amber. The syrup should be the consistency of honey. When fruit is done remove from syrup and allow to cool. If syrup isn't proper consistency boil until it is. Picking the pears cold and pouring the boiling syrup over the packed fruit gives a better color and flavor," reports Mrs. Lane.

Preserving as directed by Mrs. Lane will result in a preserve in which the fruit is clear, tender, plump, and remains whole; a syrup which is thick and transparent.

If hard pears, such as Keifers, are used, cook them in water until tender. Use the water in which the pears are cooked for making the syrup.

**FOR SALE:**—Model A Ford Sport Roadster. \$75. cash. Worth much more. Kenneth Ward

H. J. Whatley was called to Lawton Oklahoma Tuesday to be with his sister who underwent an operation for appendicitis.

**BUMPER PANTRY FOR 1935**

"We will have the best filled pantry we have ever had," Mrs. Bill Daniels, of Pursley told the home agent as she reported the canning of 140 quarts of snap wax beans in one day; the canning of 50 quarts of shelled and snap peas another day.

"We cover our beans with boiling water and let boil until thoroughly heated. This exhausts the air and results in a better and fuller pack, decreases the number of bacteria, therefore lessening spoilage," she said.

She uses the water in which the beans have been blanched to cover the packed beans. This prevents the loss of vitamins in promoting growth and health.

**JESS MITCHELL, SENATORIAL CANDIDATE VISITS KENT AND STNOEWALL COUNTIES**

With the election called for the 28th of this month, which is only one week from Saturday, the candidates for the office of State Senator from this the 30th Senatorial district are moving about on wings. Jess Mitchell, of Muleshoe, Bailey County, who is one of the most aggressive candidates, tho he got in the running a few days late, was in this part of the district this week. He spent Tuesday in Dickens county where he received flattering encouragement, and made Kent and Stone-wall, Wednesday. He was in Girard and Jayton, Wednesday morning and made as close a canvas of the two towns as possible under the handicap, limited time. Both the towns will no doubt give him a splendid vote as the punch he is putting into his campaigning seemed to appeal to their desires for an aggressive representative in Austin who is not only qualified for the job but has the power, punch and personality to hold his own with the best of the senators from other parts of Texas.

West Texas has been manhandled by the other sections of Texas ever since the state was organized. One half of the western part of the state was first divided out to the railroad companies for the building of roads in the East, South and Central Texas. Three millions acres of West Texas was handed to the Capitol syndicate for the building of the State Capitol. For years the Tax payers of West Texas have been paying for one half the cost of the public schools in other parts of the state. West Texas has been kept out of her just number of senators and representatives, by the unethical attitude of the senators and representatives from East South and the Central political divisions of the state. We have had some mighty good men to represent us in Austin. The late Arthur P. Duggan was one of the best if not the best of them, and while he was there made a wonderful fight for West Texas. But he is no more and it is up to the voters of this district to choose a man to take up the work where he left off and carry on.

The candidacy of Jess Mitchell of Muleshoe, Bailey county offers us the opportunity we are needing. He is a scrapper from the word go. He has the mental and physical ability and the spirit of West Texas is demonstrated in his every action.

Dynamic, aggressive, yet courteous as an old style southerner, he can hold his own with the best of them in any game they choose to play. He should carry the district over all opponents by a big majority and we believe he will.

Douglas Davis and Merle Rose left Monday morning to attend Texas Tech at Lubbock.

**PUBLIC CONFIDENCE CONTINUES TO GAIN**

**Bankers Report Nation-Wide Improvement in Attitude Toward Banks—Educational Campaigns Play a Part**

NEW YORK.—Ninety-six per cent of over 300 reporting clearinghouses throughout the United States find concrete evidence of favorable turns in public opinion regarding banks, it is shown in the results of a survey made by "Banking," the monthly publication of the American Bankers Association. City and country districts in every state are represented. It is pointed out:

"The outstanding conclusion is that there has been a genuine nation-wide improvement the last few months in the attitude of the public toward its banking institutions," the publication says. Statistical evidence on which the bankers base their conclusions which warrant this statement is as follows:

**The Evidence**

"How do bankers know there has been an improvement in the public attitude? They have certain statistical evidence. They have seen their deposits increase substantially in nearly all the cases reported, and tremendously in some cases. Many letters tell of increases of 100 to 300 per cent from the low point of the panic.

"For another thing, they know that fewer people are using safe deposit boxes as a repository for their savings, and that, in many instances at least, postal savings are declining.

"However, many express the view that they could throw out the statistical evidence and still realize that the public is in a better mood where the banks are concerned than before. The best evidence offered on this point, numerous bankers say, is to be found in the acceptance by the public of the newly instituted service charges and the reduced deposit interest rates."

**A Summary of the Returns**

The statement presents the following summary of the survey:

"We find on breaking up the general classifications of replies to the poll that the 65 per cent of those answering with an unqualified 'yes' represent only a partial measure of the optimistic feeling. Adding the favorable replies included in other groups, (i. e. 'yes' with qualifications, 'no change,' and 'mixed') we find that the vote shows a definitely healthy situation in 84 per cent of the localities reporting; at least some signs of improvement in another 12 per cent; a continuance of unfavorable conditions in 2 per cent, and a change for the worse in another 2 per cent. It is not too much to say that this is substantially 96 per cent favorable."

**Reasons for Changed Public Opinion**

As to reasons for the changes in public opinion regarding banks reported by the clearinghouses "more than one organization has a word to say about the American Bankers Association advertising and educational material," the magazine says.

It mentions in addition the benefits of the Federal Deposit Insurance Corporation in the emergency, improvement in the general business situation, the weeding out of weak banks and the banking moratorium.

"The response to the survey can be put down as encouraging and informative," the magazine concludes. "It holds out the definite hope that with a continuance of a cooperative, educational attitude on the part of the bankers the rest of the journey back to normal may well be completed in the not too distant future."

**BANKERS ACTIVE IN SOIL SAVING MOVE**

**Issue Book Describing Causes, Ravages and Means of Prevention of Erosion**

MADISON, Wisc.—Under the title "Protecting Investment Values in Land," the American Bankers Association Agricultural Commission has published a booklet dealing with the conservation of soil resources as a pressing national problem.

"Careful estimates indicate that 750,000,000 tons of soil, suspended and dissolved, are carried off to the sea each year by running water," the commission's book declares. "An equal amount removed from its source is left en route. This means a total of 1,500,000,000 tons, equal to approximately one ton for each acre of land in this country. The Soil Conservation Service estimates that 25,000,000 acres have been ruined. "There are 125,000,000 more acres that have lost the valuable topsoil, and it is estimated that still another 100 million acres are being converted into marginal or sub-marginal land, bringing disaster to those trying to eek out a living from erosion entangled soil, and threatening ruin to the next generation, since these destructive forces are going on at an increasing rate."

In a chapter devoted to control and preventive measures for soil losses it describes terracing, strip cropping, wind erosion control, gully control and the control of losses from leaching.

Other chapters are devoted to soil resources, the toll exacted by soil erosion, methods for keeping soils productive, state and national uses for non-agricultural land, forestry in a soil conservation program and wild life in a land use program. The booklet describes in detail the marshalling of many forces which is being brought about under the leadership of the Soil Erosion Service to meet this national problem.

**DEDICATED**

The dedication of the gym was very successfully last Friday. The program was very interesting composed of a dedication by Prof. G. A. Lowrey, a group of boys and girls, a football game between Peas and Jayton Girls, a game between the Peacock boys and the boys.

The girls won their first game season by a score of 25-8 with our team playing one-half game. The boys were defeated in their hard fought battle by a score of 20-22. The game was as exciting as any game ever played in Jayton. At times Jayton was leading by more points but in the last quarter Peacock scored the winning

point. The pep squad made a good show. We know they will be a help to us this year. Everyone is excited over our new gym and we expect to have the best year we ever had in athletics. We appreciate the cooperation of the Jayton people, too, and want to see you at all the ball games.

**PROGRAM**

"Beginning" was the topic of the talk given by Mr. Coons in Monday morning.

Mr. Coons encouraged the students to study and make good grades. He said that the studies begin right after the exam and not put it off until examination time. He had some good and valuable thoughts which were included in the speech and all of us need to do is to take heed of Mr. Coons' suggestions.

Mr. Fuller led the group for the singing of the new school songs. Every person needs to learn these songs and yell to help the pep at the basketball games.

**SENIOR CLASS NEWS**

A series of interviews will appear in the Senior class news. This is the first interview.

The senior class members have the highest of ambitions. Their reporter is going to whisper a bug in your ear each week and tell you what some of their highest ambitions, their likes and dislikes. Being a close observer of human nature, I have sounded out or learned by studying their characters what their different aims in life are. This week I have interviewed our class president, Loyall Harrison.

"Mr. Harrison," I said, "I would like an interview with you." I was truly astounded at the look on his

face. It was one of mingled fear and amusement.

"Well," he said, "Just what do you want to know?"

"Hmm, now let me see," I mused. "Your favorite food, and amusement, your greatest weakness, your hope, your ideal, your hobby, your greatest delight, etc." and will you believe me, he laughed right in my face? Yes Sir! But as an experienced person in this line of business, I never let such trivial things as that discourage me.

"Please, Mr. Harrison," I urged. "I am truly serious."

"Well, what has to be, has to be," he finally concluded. "So here goes: my favorite food—spinach, because Popeye eats it. My favorite study—

English because Miss Yarbrough teaches it. My favorite amusement—basket ball, just because it is. My weakness—girls. Don't ask me why. My hope—to be an English Teacher. My ideal—Miss Yarbrough. My hobby—translating the Canterbury Tales. My greatest delight—getting by the teachers."

"Boy! Oh Boy!" I cried when he had finally finished, "I didn't really think you would tell me all of that. I am simply over-joyed. I hope I have not detained you from your English study long, Mr. Harrison," and after many thanks and apologies, I took my leave. Watch next week for an interview with our class Vice-President, Miss Jo Dell Cade.

**THIRD GRADE NEWS**

Miss Patton reports a group of three perfect spellers in her room for this week. They are George A. Lowrey Jr., Eugene Vandiver, and Clarine Darden.

**THE WORK OF CREDIT**

**Bank Shows How It Gives Needed Aid to All Classes of Prudent Borrowers**

How a bank loan portfolio presents a graphic cross section picture of the business of its community is disclosed by the description which a midwestern bank recently gave of its loans to customers. It revealed also how closely interwoven with its neighbors' varied lives are the threads of the bank's financial helpfulness.

This description showed that the bank had made a loan of \$100,000 to a local shoe manufacturer to purchase materials, discount bills and meet current requirements.

To a wholesale grocer \$95,000 had been advanced for the purchase of inventory, the loan to be repaid over a period in accordance with specified terms set forth in the loan agreement.

**Assistance in Personal Matters**

Another loan had been made to a home owner to the amount of \$200 for painting and repairing. This was made in cooperation with the Federal Housing Administration and was being repaid in twenty-four monthly installments of \$8.33 each.

A dentist had been loaned \$300 to purchase new equipment. He was paying off the debt out of his professional earnings as they came in.

To a large domestic refrigerator distributor \$30,000 had been granted on warehouse receipts to finance dealer shipments.

A home owner had been granted \$3,000 mortgage money for a new house in three years.

One thousand dollars had been advanced to an office worker on the cash surrender value of his insurance policy to aid him in meeting an emergency.

**The National Total**

If each of these various examples were multiplied many times the result would represent the total volume of credit cooperation which the bank was extending to its neighbors in its community, for aggregate loans to all its customers amounted to more than twelve million dollars.

If the typical examples here given were multiplied by many millions of times the result would represent the total economic cooperation which the banking system of the country as a whole is extending to aid the innumerable personal, professional, industrial and commercial activities which make up the whole business life of the nation. The nationwide total of such loans is in excess of 20 billion dollars.

While cotton ginning is just getting under way in this territory, some business improvement is already noted.

The Grand Jury was again in session the first part of this week.

A. J. Lafoor, who is in the Mesquite CCC Camp has landed a job as a mechanic and is making good much to the satisfaction of his father and sister in Jayton.

**Smallpox And Diphtheria Warning**

Austin, Sept. 12. —The beginning of another school year is near at hand. The weeks have provided for mental rest and relaxation; they likewise made for physical growth and development. Thousands of boys and girls will advance to a higher grade as they turn toward the schoolhouse. In addition, a new group of children, escorted by parents or older children, will be entering school for the first time.

The years spent in school represent training for life work. Such training accomplishes most when administered to pupils and students with clear minds and sound bodies. Moreover, this training must go on without serious interruption. Other things being equal, the school with a fine record for attendance is more apt to approach a high standard of education than the school with poor enrollment due to avoidable disease, declared Dr. John W. Brown, State Health Officer.

It is unfortunate from any standpoint when children are kept away from school because of illness; doubly so when sickness is due to preventable causes. No school need have its attendance record shattered because of an outbreak of smallpox or diphtheria. Parents in increasing number are having their children safeguard against these diseases in the first year of life. Likewise, through child health conferences, for pre-school children, more and more attention is being given to work of immunization against preventable diseases and to the correction of dental and other remedial physical defects. Such measures will go far toward assuring good health and regular attendance throughout the period of school life. See your physician about diphtheria and smallpox immunization.

Bro. Lair, the Baptist pastor filled his regular appointment Sunday morning and Sunday evening. His theme was tithing or giving unto the Lord that which is rightfully his.

The splendid rains we have received lately have made things assume a very different appearance. Late feed and cotton have benefited a great deal.

Clairemont has been a very busy place the past week as court has been in session.

Miss Brant spent the week end visiting home folks in Post.

The Demonstration Club is to meet Wednesday afternoon with Mrs. Pink Stewart as hostess. The subject for the afternoon is "America Must Choose," led by Miss Jones. All members are requested to be present and help to make our work profitable and interesting.

Miss Evelyn Sowell spent the week end visiting home folks in Lubbock.

**Culinary Jingles**  
by Marcia Camp

Oh, the social whirl  
Is a snap for the girl  
Who cooks the modern way,  
Who has learned to freeze  
With the greatest of ease  
Desserts that are stamped "O. K."

ARE YOU perhaps looking for a new, extra-special dessert that will make your guests exclaim over it while they eat and beg for the recipe when they are through? In the entire lexicon of American cookery there is no more special dessert than ice cream, and the most special of all ice

guests for dinner and you at bridge!  
it's easy with marshmallows and low ice cream

cream is the one you make yourself with the magical marshmallow as a base.

The marshmallow is magical as a base for ice cream, because it makes failure impossible. No danger of setting a product crunchy with ice crystals before your guests when you make it with marshmallows. The very name "marlow" means not just an ice cream, but a creamy ice cream. Marlows are always made with marshmallows, so they always have to be creamy! The secret is actually something more portentous than keep-

ing a package of marshmallows always on your pantry shelf!

Marlows are really extraordinary enough in themselves. Try adding strawberries to an ice cream which does not require stirring or any other attention all the while it freezes, whether you use a mechanical refrigerator, or an ice cream freezer, or simply a mold in an ice-salt pack. The mold must have a well-fitting cover, sealed with adhesive tape.

**STRAWBERRY MARLOW**

- 1 cup crushed fresh strawberries
- 1 tablespoon orange juice
- 1 tablespoon sugar
- 20 marshmallows
- 1/4 cup water
- 1/2 pint cream, stiffly beaten

Wash, hull and crush the berries. Mix them with the orange juice and sugar, and let them stand for 30 minutes. Meanwhile steam the marshmallows with the water until they are liquid and smoothly blended. Add to berry mixture and cool. When quite cold and beginning to stiffen, combine with the stiffly-beaten cream. Pour into refrigerator trays and freeze without stirring.

If strawberries are not available at the moment, you need not suffer through inability to try the recipe! Use crushed pineapple instead, with these differences:

**PINEAPPLE MARLOW**

- 16 marshmallows
- 1 cup canned crushed pineapple
- 1/2 pint cream, stiffly beaten

Steam marshmallows over hot water with the pineapple until they are liquefied. Cool the mixture. When it is cold and slightly stiffened, combine with the whipped cream. Pour into containers and freeze without stirring.

ther in Abilene, Sunday. Mrs. R. P. Fuller and daughters, Lucille and Renell visited Mrs. Fuller mother in Rotan Sunday.

Buster McCombs formerly of Clairemont is in the Lubbock Sanitarium where he has just under gone an operation for appendicitis. We are glad to report he is doing fairly well at present.

Bro. Lair visited Mr. and Mrs. Ivy McCombs, Sunday.

**SCHOOL NEWS**

School has been in session for two weeks and every thing is progressing smoothly. A new bus has been added. This of course has increased the number of students. A school project has been applied for to get some playground equipment built, grounds cleaned and building repaired. We are surely in hopes this project will be granted.

A chapel program had its beginning Monday morning. Everyone seemed to be ready to help push this forward.

The boys are planning to beat the outside boys this week in a game of playground ball.

C. J. Robinson and sons Johnnie and Harvey, and L. F. Wade made a trip to Lamesa, Sunday.—Crops along the entire route looked good, and that part of the plains from Post to Lamesa certainly has a bumper feed crop of all kinds.

The farmer was showing a girl boarder from the city around the farm. Suddenly she spied a group of calves in a field and she exclaimed: "Oh, look at the little cowlets!" The farmer grinned and remarked: "Them is bullets."

Mrs. Addie Hancock is attending Texas Tech at Lubbock this term.

S. W. Elerbee and wife are at home in Jayton after spending two weeks with their daughter at Hamlin, Texas.

Wilson Garrett left last Sunday for Austin, Texas, where he will attend The Texas University.

Nurses Training School at the Stamford Sanitarium at Stamford visited with friends and parents in Girard Sunday.

It would make you feel terrible should you be driving a car and run over a little child. Or by parking your car on a blind corner cause some one else to run over one. Lets play safe, rather than be sorry—and all observe the driving and parking laws of the state and town.

Burns Oil

**SUPERFEX**  
Oil Burning HEATERS

**DIRECTS RADIANT HEAT WHERE YOU WANT IT**

**YES, stove-heating can be convenient.** With a new Superfex Heat-Director in your home you can enjoy the constant comfort of modern, flexible oil heating. No more ashes and fuel scuttles in the living room! No more extremes of temperature. Responding instantly to a turn of the handy control dial, the Heat-Director gives a volume of heat when you want it, yet is easily regulated for milder weather.

Radiant heat that warms every surface it touches can be directed toward the floor or out into the room by means of the patented shutter-like heat projectors on three sides of the Heat-Director. The removable fuel tank holds enough oil for as many as forty-six hours of cozy warmth. The tank can be filled outside while the fire burns undisturbed. Connections for outside storage are also available.

The Heat-Director requires no elaborate installation. Set it up and connect with a flue as you would an ordinary stove. Draft regulation is automatic.

There are seven Superfex Heaters—three Heat-Directors and four Radiating heaters, offering a choice of sizes, prices and heating capacities for every heating need... Handsome Burl Walnut finish in porcelain enamel.

For one-room chilly spots, get a portable Perfection oil burning room heater.

Come in and see these fine new SUPERFEX HEATERS, A PRODUCT OF PERFECTION STOVE COMPANY.

Diagram shows the Superfex Heat-Director's superior burner, removable fuel tank and patented heat projectors that direct radiant heat toward floor or other surface as you choose.

Everything From The Cradle To The Grave

County Agent's Notes

A. He may make application for such payment but cannot be certified to and receive payment until he has executed a 1935 Cotton Adjustment contract and complied therewith.

3. Q. Who makes application for Cotton Price Adjustment Payments?

A. The person(s) who made the 1935 Bankhead application or his successor in interest will execute Form No. C. A. P. 2.

4. Q. Can an application for Cotton Price Adjustment Payments be made if no cotton has been sold?

A. No.

5. Q. How will Cotton Price Adjustment Payments be divided among individual producers on a farm who are entitled to share therein?

A. One check covering each application will be made to the person making the application for the farm and this person as trustee will pay to those entitled to share in this payment their proper share thereof.

6. Q. What will be the rate of payment?

A. The rate of payment will be the amount per pound by which the official average base price of cotton on the ten designated spot cotton markets is below 12 cents on the day the cotton was sold. This rate cannot exceed 2 cents per pound.

7. Q. Can a producer whose total production was less than his 1935 Bankhead allotment secure Cotton Price Adjustment Payments on the full amount of his Bankhead allotment?

A. If the total production of a producer is less than his Bankhead allotment he will be entitled to receive the Cotton Price Adjustment Payment on his total production only.

8. Q. How will a producer furnish acceptable evidence to show the date upon which he sold cotton and the amount sold as a basis for securing Cotton Price Adjustments Payments?

A. The seller will secure from the buyer a Cotton Sale Certificate on form No. C. A. P. 1, which certificate will show the date of sale, amount of cotton sold, seller's name, buyer's name, and the Bankhead Application Serial Number for the farm on which the cotton was produced.

9. Q. Where should a producer make his application for Cotton Price Adjustment Payments?

A. At the office of the County Agent in the county in which the 1935 Bankhead application was made.

10. Q. Is a producer who secures a 1935 Government 10-cent loan on his cotton eligible to participate in Cotton Price Adjustment Payments?

A. Yes, provided this cotton is sold prior to August 1, 1936.

11. Q. Can a producer, who prior to announcement of the Government 10-cent loan sold cotton produced in 1935, secure Cotton Price Adjustment Payments on this cotton?

A. Yes, provided he will secure acceptable Certificates of Sale for this cotton and makes his application not later than August 15, 1936.

12. Q. What provision has been made to get Cotton Price Adjustment Payments into the producers hands at an early date?

A. Arrangements have been made for handling and auditing applications in each State office and for issuing checks from field disbursing offices so producers may receive checks promptly.

13. Q. On what date will payment to a producer who delivers cotton on cooperative marketing association be based?

A. If the cotton is delivered to the annual pool or valuation the payments will be based on the date of delivery. If the cotton is delivered to the call pool or immediate fixation pool the payment will be based on the date the price is fixed.

Old Age Pensions

"Old-age pensions could cost Texas taxpayers as much as \$56,073,402 yearly if each of the 283,199 people 65 years of age and over received the full \$15 monthly allotment provided for in the recent Constitutional Amendment," State Auditor Orville S. Carpenter said today.

At the request of Governor Allred Carpenter and R. B. Anderson, State Tax Commissioner, prepared the report "Cost and General Plan for Old Age Pensions." Upon the Governor's suggestion it was mailed to members of the Legislature September 19.

"Experiences of other states has shown that have attempted at first to take care of only those actually in need of assistance. Requirements made of applicants have been with a view of eliminating those who, although of eligible age, did not actually need assistance. In this way other states have greatly reduced the costs from the amount necessary to pay if all persons of the required age had been included," Carpenter said.

"As there are 41,787 persons 65 years of age and over on the Texas Relief Rolls, this apparently is the minimum number able to qualify for old age pensions. At \$15 a month and with 10 per cent administrative cost added, this would be \$8,273,826 yearly," Carpenter explained.

Carpenter believed the figure 62,933 most nearly represented the actual number who probably would receive old-age pensions in Texas. He determined this figure by considering the experiences of other states. If 62,933 people in Texas 65 years of age and over were to receive this full \$15 a month, the yearly cost to the tax payers would be \$12,460,734, Carpenter calculated. In this he included 10 per cent administrative expenses.

"The Federal Government, if funds are available, will provide an amount equal to that spent by the State plus 5 per cent for expenses. This depends upon approval of the Texas plan by the Social Security Board in Washington. The Texas Legislature will formulate a plan for distribution, and it will decide whether or not the full \$15 maximum will be used," Carpenter concluded.

Heart and Mouth

"Heart disease ranks first in the list of killers today. During the past thirty years it has been steadily increasing. Few people ever associate impairment of this vital organ with diseased mouth conditions. Yet in a very real manner the health of the heart and its consequent ability to do its work properly can be definitely affected by an unhealthy mouth," states Dr. John W. Brown, State Health Officer.

"While, of course, there are many other causes for heart impairments than diseased teeth, gums, or tonsils, there certainly is every good reason to establish and maintain daily and periodical prophylactic measures so far as the mouth and teeth are concerned. Not to do so is merely adding another menace to the heart already beset with disease potentialities that seem to be a part of the present-day life.

"If the individual will assume his responsibility by consuming a nourishing diet, keeping his mouth clean through daily brushing, and have a regular inspection by his dentist and physician, undoubtedly a fair proportion of heart disease, not to mention many other minor diseases, could be eliminated that have their origin in diseased mouth conditions.

"Unlike public health control measures, dental supervision is a highly personal matter. There is no legislation covering the situation, nor is there any enforcement officer to keep one in line. Therefore, common sense and reasonable concern for one's heart should prompt interest in teeth, mouth, and throat.

"As an authority tersely puts it, 'Keep your heart out of your mouth and your mouth germs out of your heart.'"

Remember the Folks Here in Our Town

We have no desire to but in where we have no business, but it appears to us that the thing for the people of this part of "Gods Footstool" to do is to look after the home folks first. The cotton picking season is with us. Already the Mexicans are coming in here from South Texas as thick as flies after a dead dog. They bring there cotton sacks and while here will buy no more supplies than they absolutely have to have. After picking out the cream of the crop, they will either return home or move on. They leave their families there, and have nothing in kind with them. What are we going to do about it? We suggest that the farmers in as far as possible use home labor, it will take longer to gather their crops, but by so doing the money will remain here, and employment will be supplied for the home folks all thru the long winter months.

Every man to his own notion, but we are for the home people, first, last and all the time. We believe the funds should be made up and big signs made and placed on the highways heading into Kent county — MEXICAN LABORERS NOT NEEDED IN KENT COUNTY Keep on driving

# THE JAYTON CHRONICLE

JAYTON, KENT COUNTY, TEXAS, FRIDAY, SEPTEMBER 20, 1935

NUMBER 38

## Farmers Hold Canned Feed Demonstration

The Trench Silo Demonstration conducted by Mr. E. R. Eudaley, O. G. Tumlinson and county agent D. F. Bredthauer on the farm of Mr. Jack Overfelt Monday September 16th proved to be a huge success. Boasting attendance and interest was shown by the farmers.

Mr. Eudaley brought out facts that kept farmers spell bound, showed them the solution of proper care of excess feed in West Texas. Facts were cited where feed had been put down in this manner thirteen years ago and on reopening a few months ago was found to be in first class condition. Feed put down in a Trench Silo is a guarantee insurance against rats, weevils, fire, rain and storms. A trench large enough to take care of fifteen or twenty acres of feed can easily be dug in one day in the average Kent county soil.

Mr. Eudaley also stressed the value of good silo feed. When feed is stacked in the open or in barns it becomes dry and is wasteful to handle and does not have the food value as compared with good silage. Feed that is mature and when the leaves have begun to burn somewhat makes the best silage for cows, horses, hogs and poultry, all livestock relish good silage. Workstock can be fed this feed under heavy working conditions and it is also proven that horses fed all the silage that they can eat have never been found to be bothered with the colic. When the pasture has burned up and no green feed is available you will always notice that your milk production falls off but when this occurs by starting to feed silage your milk production will at once begin to increase.

With the present conditions existing in West Texas very few farmers are able to repair their barns and build new ones. We all know that this abundance feed crop should be saved as much as possible, we also know that silage will keep over a period of years and as history repeats itself we will again have droughts in West Texas so why not build a Trench Silo and save the feed when we know it will be worth three or four times its present price during drought stricken seasons.

Texas has learned and profited many things in regard to silos in the past ten or fifteen years. We have come from the stave, brick and concrete type which costs hundreds of dollars to operate to one which cost much less and more economical our present Trench Silo. We have also learned that feed somewhat beginning to fire makes better silage than feed too green, this usually causes silage to be acid. The best incilage comes from feed which is mature and leaves can be in a very dry state as they will take up a good bit of moisture when water is applied in the trench.

The meeting was enjoyed by all who attended and from reports made at the meeting some fifteen or twenty silos will be put in sometime during the fall in this community.

Following are the names of farmers who attended the meeting: C. W. Fincher, Q. W. Branch, Bill Daniels, Joe Hunnicutt, J. M. Johnson, T. L. King, M. S. Sandell, A. C. Carille, Ed Fuqua, C. H. Cade, J. W. Patterson, C. E. Hatfield, W. C. Fincher, E. S. Griffith, W. J. Sherrick, J. B. Earnest, J. A. Suits, and Jack Overfelt, the demonstrator.

Several thousand people are expected to be in Jayton the 4th Sunday in this month. It is the occasion of the gathering of the singers of the three counties. But the singers that will be here will come not only from three counties in the Tri-County organization but from many other counties. It will be the great day and the cooks are already killing chickens and making pies and cakes.

The weather is perfect. Eleven bales of cotton were received by the Jayton Yard Tuesday.

The Lyles Store is looking better. A little paint did the act.

Any stuffed shirt can win a medal if you give him all the breaks. BUT IT TAKES AN EAGLE TO RIDE THE STORM ON A BROKEN WING. Elsie Robinson

It is my supreme pleasure to become the champion of the needs and rights of the citizens of this Senatorial district.

## Congressman Mahon Here Saturday Eve

Congressman George Mahon was in Jayton for a short while Saturday afternoon. He was looking fine and was wearing that same happy, friendly smile he wore before going to Washington. He told us that while he was at home in Colorado, he maintains an office in Washington and is always ready to do any thing for any of the folks within his congressional district. Mr. Mahon delivered an address at the dedication of Spur's new football and athletic field, Friday night. It was his intention to spend all of Saturday afternoon in Jayton, but was detained in Spur until late in the afternoon. He hopes to be in Jayton again this fall.

## Ten Thousand Future Farmers of America

Ten thousand Texas farm boys, members of the Future Farmers of America, will stage the most comprehensive junior farm exhibition in the history of the Southwest at the Texas Centennial Exposition next year.

The 435 chapters of the Future Farmers in Texas are already organizing for a seven day special show under the direction of Paul G. Haynes of Austin, State Director of Vocational Agriculture. County and sectional shows to select the best products for the Dallas Exposition will be held.

Dairy and beef cattle, horses and mules, sheep, goats and swine, all pedigreed animals raised by the junior farmers, will constitute the livestock exhibit. Scientific feeding of livestock will be demonstrated. The agricultural show will display the results of scientific farming. There will be milking contests in the dairy department and egg laying competition in the poultry section.

The farm boys will converge on Dallas in special trains, buses and automobiles. They will be housed in dormitories built for their benefit. A two hundred piece band, composed of young farmers, will provide music.

Future Farmers Week at the Exposition, which opens June 6, has been tentatively set from November 21 to 28. It will be one of the closing features of the \$15,000,000 show.

## Power and Cookies

In a recent radio address, United States Representative Samuel B. Pettigill of Indiana, dramatically demonstrated the absurdity of the argument that cheaper electricity is a vital need of the American people. He said: "The cold fact is that the increase in the cost of food alone—not the cost but the increase in cost—in the past two years has been five times the total cost of power and light in the American home." That would bring the power cost down near the cost of cookies in the average family grocery bill.

This should throw a bombshell into the camp of the anti-power politicians. Power is usually the smallest item in the average budget—and it is an item which is constantly dwindling in size, an increase use of electricity and discoveries making possible more efficient generation, transmission and application automatically lower rate levels.

Few dollars we spend bring us as much as the electric dollar, in happier, more comfortable living, and in the elimination of drudgery. No dollar buys us more. It would be an excellent idea if the boys who are whooping it up about the cost of power, turned talents in other directions—particularly in the direction of the outrageous and unnecessary cost of government, national, state and local.

Mrs. L. H. Mason and daughter Mozelle arrived home the first of this week from Stamford, where Mozelle has been in the Sanitarium for the past two weeks under the physicians care. We are glad she is able to come home and hope for the speedy recovery of her usual good health.

Jack Brannen of Littlefield, Texas was seeing old friends and relatives in Kent and Stonewall counties, Wednesday of this week.

Miss Edna Davis left Monday of this week for Lubbock where she will attend Texas Tech.

## A "Hidden" Cause Of Accidents

The more traffic experts study the accident toll, the more they become convinced that there is an important "hidden" cause of many automobile accidents. This lurking agent of death and injury is carbon monoxide poisoning.

Carbon monoxide gas develops when any fuel—coal, wood, gasoline, or illuminating gas—does not burn properly or completely. It cannot be seen, smelled or tasted. Its only warnings are headache and drowsiness. Yet it is in the air wherever there is motor traffic. The exhaust of a car, even one in good running condition, contains a concentration of a fifteen per cent of it. As little as two per cent in the air will poison and four per cent will kill.

Statistics show, according to the National Bureau of Casualty and Surety Underwriters, that carbon monoxide from auto exhaust gasses is the direct cause given in at least 700 deaths annually. No one knows not can guess how many lives are lost indirectly through its influence. For example, there is no telling how often that common driving occurrence, "sleep at the wheel," has been induced by carbon monoxide.

All motorist are familiar with the headache and lassitude which often comes upon them while driving. These signs, coupled with the odors of exhaust fumes in a moving vehicle, are final warnings that carbon monoxide is present in lethal quantities. They should be more than sufficient notice to take the necessary measures against carbon monoxide poisoning. This means regular checking of the exhaust mechanism and the carburetor action, keeping the vehicle well ventilated when driving, eliminating any leaks or holes which allow seepage from the motor or exhaust to the body of the car.

Householders should also consider that carbon monoxide poisoning is a possibility whenever fuel is burned in the home. Coal, gas, stove, furnace and oil burner companies can give advice on precautions that will afford safety from this invisible death.

## Palace to Have Old Time Fiddlers Contest

The Palace Theatre is sponsoring an Old Time Fiddlers Contest Wednesday, September 25. It is whispered that a number of the boys are doing some tall practicing to meet the keen competition that is expected.

It has always been customary at this time of the year when the old green balls are bursting into white fleecy balls, to give the old fiddler his chance to take on all comers in open competition. A fete equally enjoyable to both young and old.

All contestants will be admitted free and prizes for the winners. Five dollars will be the first prize, and in honor of the old guitar which is always important at the 'square dance' a prize of three dollars for the best guitar player.

As a special added attraction the management has secured the "One Man Circus" at considerably expense. The "One Man Circus" Mr. Grady Robinson, formerly of the "Cleo Players" and a familiar figure in the United States and Mexico will direct the contestants. A real bargain with no advance in prices.

On the screen Jack Holt in "The Unwelcome Stranger."

Mack Myers, who was taken to the Stamford Sanitarium last week, is back home again and able to be down town Thursday P. M. Mack says he thought for a time his Mrs. was going to collect his insurance, but says he is feeling fine again now.

Dell Sewalt, who was operated on at the Lubbock Sanitarium the first of the week for appendicitis and for a time was in a very serious condition, is reported doing nicely, much to the relief of her Jayton friends.

Latest news from Jo Robinson, who is attending McMurry informs us that she is placed in the honor class as a result of her preliminary examinations.

Mrs. L. F. Wade was very sick the first of this week but is now able to be up some.

## Tri-County Singers To Hold Convention

Alright folks lets get set for our Fourth Annual Tri-County Singing Convention to meet at Jayton next Saturday night and all day Sunday. The Saturday night session will be held at the Presbyterian Church, be sure and attend that session as all business coming before the Convention will be attended to at that time, also lots of singing Saturday night. We will begin the Saturday night meeting at 8:30 o'clock.

The Sunday Convention will be held at the Methodist Tabernacle—beginning at 10:30 o'clock—dome and bring a well filled basket of eats.

We are expecting some of the best singing talent of Western Texas to be present. Don't miss it. Bring your song books—lets make this the best meeting of all.

R. E. Beaver, Pres.

## Do Your Part

Fire Prevention Week is to be observed from October 6 to 12. And here is a thought worth considering in the meantime:

Friendly fire—fire under control—is one of man's greatest boons. It keeps us warm, cooks our foods, motivates our industries, and serves us in countless other ways.

Unfriendly fire—fire out of control—is one of man's greatest enemies. It destroys property—causing irreparable economic loss. It menaces life. It hampers progress. It threatens community development, and industrial activity and employment.

A building for example, represents something besides money. It represents energy, achievement, labor. If it is a factory building, it represents creative, productive wealth. When fire destroys that building, insurance will give back part of the money it cost, but nothing can give back the energy that was wasted. Nothing can make up for the work lost, the jobs destroyed, the diminished purchasing power the fire caused. The indirect cost of fire—costs which cannot be put into a balance sheet are the real measure of our national fire waste. Those indirect cost are many times the direct cost.

Somewhere, as you read this, a home is being burned to the ground. A factory building is a smoldering ruin. A man is screaming in pain from a burn that will prove fatal. All this is the result of someone's oversight, someone's carelessness, someone's stupidity. Are you willing to do your part to minimize such happenings in the near future.

## Parking Rules

We desire to thank the folks who took so kindly to the parking rules as enforced last Saturday for the first time in years. We assure everyone that we only had the good of the town and the lives of the people in mind when we decided to put the laws in effect. We had no thought of discriminating against anyone.

Again let us caution everyone that speed within the city limits is all uncalled for. Twenty miles the hour is all that is necessary and this law must be observed. Parking around the sign boards three deep and parking left handed is all wrong. Please try and cooperate with us and make things as pleasant as possible. Folks willfully and deliberately and intentionally violating the city laws on speed and parking will certainly have to be dealt with and when we fail to do our sworn duty we hope we will have the manhood to resign.

The City Commission  
J. M. Hall, City Marshall

Business interests in Jayton are giving away two fine new automobiles this fall. This should stimulate business considerably. The Jayton Chronicle is giving away one and Robinsons, Mayer Auto Service and Jones Drug are giving away another. It will pay you to do your business in Jayton.

Black Motor Company reports the sale of one truck and two cars this week. Basil Cairns getting the truck, Earl Harrison and Buster Winters getting the cars.

Med Wade left out Monday morning for Muleshoe, Texas where he will be employed for two weeks in The Journal Office.

## Pill Rollers Win Soft Ball Championship

In the play off series between the Prune Diggers and the Pill Rollers the Pill Rollers finally nosed out the Diggers by winning three out of five of the championship series. The series closed Sunday afternoon when the two teams played a double bill.

The losing teams or clubs now plan to give the winners a Chicken Barbecue. Everyone that has played and umpired a game will be invited to this occasion. The arrangements for the barbecue are being left up to the managers of the three teams that lost.

For those that don't like barbecued Chicken there is a special dish planned by Edgar Johnson and the writer of this article gets it from rumors that there will be something special for the umpires in the form of rat poison of a carbolic acid delicatessen.

Managers for the teams were: Hi-way, Sewalt; Oil Mill, Little; Prune Diggers, Jones and Harrison; Pill Rollers, Jones and Worthen. Med Wade hung up the record for strike outs during the season as he struck out at an average of three out of five times to the bat. Coleman Gallagher was considered the heaviest batter. Dallas Kenady was considered as the poop up king. Cobb Wade and Earl Harrison as the shut out pitchers and James McCormick as the Santa Claus of Soft Ball. John Jones and Dallas Kenady were known as the authorities on rules and regulations. H. J. Whatley and Grover Little were known for their brilliant base running and fielding exhibits.

After all it was a lot of fun and plenty of exercise for the business men with no other means of getting exercise, and it will be the source of many jokes and much conversation for a good while to come.

Why not let the teams organize basket ball teams and continue the fun thru the winter and have some more of the hot games and arguments.

## Current Business

The principal indexes, adjusted for seasonal variations, continue to climb to new highs for the year.

Currency circulation, best arbiter of retail trade, has made strong gains. Car loading are well up, with increased agricultural shipments. Electric power production leads the field—it is expected that production will soon reach a new all-time high. However, many companies are not showing satisfactory net earnings. Construction is well ahead of forecasts for this season. Residential building is about 125 per cent ahead of last year. Motors are star performers in the business parade—in the first seven months of this year, car production was greater than the entire year of 1934.

Most industries show better employment figures than past summers would have indicated, especially those which benefit from building activity.

Payrolls naturally follow employment and are higher than was anticipated.

## The Culture Club Has Opening Meeting

The Culture Club met for the opening meeting of the 1935-36 term. They met in the home of Mrs. R. L. Alexander. Mrs. William Alexander newly elected President, presiding. Mrs. C. J. Robinson gave an interesting history of the club. It was organized in 1920. Four of the charter members being present. Namely Mrs. C. J. Robinson, Mrs. Baker Robinson, Mrs. Thos Fowler, Mrs. N. E. Porter. The Club plans to study "Texas" as 1936 is the centennial year.

The next lesson will be "Early Texas." The Roll call will be answered with "Interesting events Before 1836."

At the business session Mrs. Wm. Alexander offered her resignation and Mrs. Eldon Wade was elected President.

A social hour of 42 was enjoyed by fourteen members. After which delightful refreshments were served by the hostesses, Mrs. R. L. Alexander, Wm. Alexander, Baker Robinson and C. J. Robinson. The Club will meet Sept. 25 in the home of Mrs. C. J. Robinson.

Sketter and Joe Dick Lewis came in from Austin, Monday of this week to spend a few days at home.

Jess Mitchell

## For State Senator

Jess Mitchell, editor at Muleshoe, county, announces his candidacy for State Senator for this Senatorial District, to succeed Hon. Arthur P. Dugran, recent death left that office vacant in an election called by the Legislature for September 28.

Mitchell, in making his announcement, says he is entirely mindful of the opportunity for service to the people and the grave responsibility that will be placed upon him should he be elected. He considers holding office a sacred trust. "I believe," he said, "that aside from the duties of the Church, there are no more serious and more important duties of State.

He has no pretensions whatever as a skilled politician; he has no public office and am not interested in politics per se; but I am intensely interested in the welfare of the great area of West Texas. In years past, as a citizen I have been able to do many favorable things for the community, and confidently believe as an official I can accomplish more and greater results, and confidently believe that I will accomplish even greater results.

At 55 years of age, virtually in the prime of business life, strong, alert, mentally and sound, I am a college and university graduate. While I am now and in for several years past a newspaper editor, I am also a farming three farms embracing hundreds of acres, one of them irrigated farm near Muleshoe, which myself and family was born on a farm, have actual dirt farmer and am acquainted with the farmer's life.

As a soldier in the Spanish war, serving in the secret department during the world war was at the time United States Commissioner at Columbus, under approval of President Woodrow Wilson.

As a citizen of this State have in a large majority favoring the abolition of the officer fee. As your senator, it would be a privilege and pleasure to do as my power to enforce these laws by passing such laws as will benefit the needy aged this income and to arrange for the sale of liquor to the advantage of the State, as for the protection of those not favoring it, and to use my influence toward ending the fee amendment as a burden on the citizenry.

It is my glad to discuss in public the other phases of government matters with citizens, many will be taken up in public. My desire is to give conscientious and constructive to the State in general and to my district in West Texas. I am looking toward eventually this area the best part of my life to keep in step with the progress of this district, to work in with them and to eventually share with them the blessings of a good fight—we have a faith.

My many years of ability and business experience have won me such conquests at such odds. It will be my supreme pleasure to become the champion of the needs and rights of the citizens of this Senatorial district."

**H. D. Club News**

**TRAINING SCHOOL ON "THE COVERED DISH LUNCHEON"**

"The covered dish luncheon offers an opportunity to have variety in meals, to include the family in acquiring a taste for foods which are otherwise disliked, to serve leftovers attractively, and a time saver for the home-maker." Miss Jones the C. H. D. A. told a group of home demonstration club women at a training school conducted on "The Covered Dish Luncheon."

New England Luncheon in Casse-rolle was the dish prepared as representative of covered dishes. A pear salad served with this dish added further to the appetizing feature of the luncheon.

Recipes for preparing covered dishes with foods available in this section were given to those present.

Recipe and bulletin files made from cigar boxes were displayed by the agent. Advantages of every housewife having well organized recipe and bulletin files were demonstrated. A plan for organization was given.

**PREFERS TINS TO GLASS FOR CANNING**

"We use tins altogether for the canning of corn, and meats; and for most of our other canning, especially shelled peas. We prefer the flavor of most products canned in tin to those canned in glass. This is probably because the tins can be quickly cooled when removed from the cooker which prevents an over-cooked product," said Mrs. W. L. Sellers of Polaris.

There isn't a better piece of paying equipment on the farm than our cooker and sealer. It is an investment that actually pays big dividends. Recently one hundred and forty No. 2 cans of corn have been added to our farm food supply by our having our own canning equipment, she said.

**PRESERVING PEARS**

"Pouring sugar over pears and let stand overnight is just the thing not to do if you want good pear preserves," says Mrs. W. H. Lane, cooperator of the Jayton H. D. Club.

"Begin the preserving process of pears by combining sugar and water and let boil for about fifteen minutes, then add pears to this syrup. Cook rapidly until pears are clear. Cease cooking and allow the pears to stand immersed in the syrup overnight. Finish cooking. Cook until the fruit is clear, tender and a transparent amber. The syrup should be the consistency of honey. When fruit is done remove from syrup and allow to cool. If syrup isn't proper consistency boil until it is. Picking the pears cold and pouring the boiling syrup over the packed fruit gives a better color and flavor," reports Mrs. Lane.

Preserving as directed by Mrs. Lane will result in a preserve in which the fruit is clear, tender, plump, and remains whole; a syrup which is thick and transparent.

If hard pears, such as Keifers, are used, cook them in water until tender. Use the water in which the pears are cooked for making the syrup.

**FOR SALE:**—Model A Ford Sport Roadster. \$75. cash. Worth much more. Kenneth Ward

H. J. Whatley was called to Lawton Oklahoma Tuesday to be with his sister who underwent an operation for appendicitis.

**BUMPER PANTRY FOR 1935**

"We will have the best filled pantry we have ever had," Mrs. Bill Daniels, of Pursley told the home agent as she reported the canning of 140 quarts of snap wax beans in one day; the canning of 50 quarts of shelled and snap peas another day.

"We cover our beans with boiling water and let boil until thoroughly heated. This exhausts the air and results in a better and fuller pack, decreases the number of bacteria, therefore lessening spoilage," she said.

She uses the water in which the beans have been blanched to cover the packed beans. This prevents the loss of vitamins in promoting growth and health.

**JESS MITCHELL, SENATORIAL CANDIDATE VISITS KENT AND STNOEWALL COUNTIES**

With the election called for the 28th of this month, which is only one week from Saturday, the candidates for the office of State Senator from this the 30th Senatorial district are moving about on wings. Jess Mitchell, of Muleshoe, Bailey County, who is one of the most aggressive candidates, tho he got in the running a few days late, was in this part of the district this week. He spent Tuesday in Dickens county where he received flattering encouragement, and made Kent and Stone-wall, Wednesday. He was in Girard and Jayton, Wednesday morning and made as close a canvas of the two towns as possible under the handicap, limited time. Both the towns will no doubt give him a splendid vote as the punch he is putting into his campaigning seemed to appeal to their desires for an aggressive representative in Austin who is not only qualified for the job but has the power, punch and personality to hold his own with the best of the senators from other parts of Texas.

West Texas has been manhandled by the other sections of Texas ever since the state was organized. One half of the western part of the state was first dished out to the railroad companies for the building of roads in the East, South and Central Texas. Three millions acres of West Texas was handed to the Capitol syndicate for the building of the State Capitol. For years the Tax payers of West Texas have been paying for one half the cost of the public schools in other parts of the state. West Texas has been kept out of her just number of senators and representatives, by the unethical attitude of the senators and representatives from East South and the Central political divisions of the state. We have had some mighty good men to represent us in Austin. The late Arthur P. Duggan was one of the best if not the best of them, and while he was there made a wonderful fight for West Texas. But he is no more and it is up to the voters of this district to choose a man to take up the work where he left off and carry on.

The candidacy of Jess Mitchell of Muleshoe, Bailey county offers us the opportunity we are needing. He is a scrapper from the word go. He has the mental and physical ability and the spirit of West Texas is demonstrated in his every action.

Dynamic, aggressive, yet courteous as an old style southerner, he can hold his own with the best of them in any game they choose to play. He should carry the district over all opponents by a big majority and we believe he will.

Douglas Davis and Merle Rose left Monday morning to attend Texas Tech at Lubbock.

**PUBLIC CONFIDENCE CONTINUES TO GAIN**

**Bankers Report Nation-Wide Improvement in Attitude Toward Banks—Educational Campaigns Play a Part**

NEW YORK.—Ninety-six per cent of over 300 reporting clearinghouses throughout the United States find concrete evidence of favorable turns in public opinion regarding banks. It is shown in the results of a survey made by "Banking," the monthly publication of the American Bankers Association. City and country districts in every state are represented. It is pointed out.

"The outstanding conclusion is that there has been a genuine nation-wide improvement the last few months in the attitude of the public toward its banking institutions," the publication says. Statistical evidence on which the bankers base their conclusions which warrant this statement is as follows:

**The Evidence**

"How do bankers know there has been an improvement in the public attitude? They have certain statistical evidence. They have seen their deposits increase substantially in nearly all the cases reported, and tremendously in some cases. Many letters tell of increases of 100 to 300 per cent from the low point of the panic.

"For another thing, they know that fewer people are using safe deposit boxes as a repository for their savings, and that, in many instances at least, postal savings are declining.

"However, many express the view that they could throw out the statistical evidence and still realize that the public is in a better mood where the banks are concerned than before. The best evidence offered on this point, numerous bankers say, is to be found in the acceptance by the public of the newly instituted service charges and the reduced deposit interest rates."

**A Summary of the Returns**

The statement presents the following summary of the survey:

"We find on breaking up the general classifications of replies to the poll that the 65 per cent of those answering with an unqualified 'yes' represent only a partial measure of the optimistic feeling. Adding the favorable replies included in other groups, (i. e. 'yes' with qualifications, 'no change,' and 'mixed') we find that the vote shows a definitely healthy situation in 84 per cent of the localities reporting; at least some signs of improvement in another 12 per cent; a continuance of unfavorable conditions in 2 per cent, and a change for the worse in another 2 per cent. It is not too much to say that this is substantially 96 per cent favorable."

**Reasons for Changed Public Opinion**

As to reasons for the changes in public opinion regarding banks reported by the clearinghouses "more than one organization has a word to say about the American Bankers Association advertising and educational material," the magazine says.

It mentions in addition the benefits of the Federal Deposit Insurance Corporation in the emergency, improvement in the general business situation, the weeding out of weak banks and the banking moratorium.

"The response to the survey can be put down as encouraging and informative," the magazine concludes. "It holds out the definite hope that with a continuance of a cooperative, educational attitude on the part of the bankers the rest of the journey back to normal may well be completed in the not too distant future."

**BANKERS ACTIVE IN SOIL SAVING MOVE**

**Issue Book Describing Causes, Ravages and Means of Prevention of Erosion**

MADISON, Wisc.—Under the title "Protecting Investment Values in Land," the American Bankers Association Agricultural Commission has published a booklet dealing with the conservation of soil resources as a pressing national problem.

"Careful estimates indicate that 750,000,000 tons of soil, suspended and dissolved, are carried off to the sea each year by running water," the commission's book declares. "An equal amount removed from its source is left en route. This means a total of 1,500,000,000 tons, equal to approximately one ton for each acre of land in this country. The Soil Conservation Service estimates that 35,000,000 acres have been ruined."

"There are 125,000,000 more acres that have lost the valuable topsoil, and it is estimated that still another 100 million acres are being converted into marginal or sub-marginal land, bringing disaster to those trying to eek out a living from erosion enfeebled soil, and threatening ruin to the next generation, since these destructive forces are going on at an increasing rate."

In a chapter devoted to control and preventive measures for soil losses it describes terracing, strip cropping, wind erosion control, gully control and the control of losses from leaching.

Other chapters are devoted to soil resources, the toll exacted by soil erosion, methods for keeping soils productive, state and national uses for non-agricultural land, forestry in a soil conservation program and wild life in a land use program. The booklet describes in detail the marshalling of many forces which is being brought about under the leadership of the Soil Erosion Service to meet this national problem.

## School News

**DEDICATED**  
Dedication of the gym was successfully last Friday. The program was very interesting composed of a dedication by Prof. G. A. Lowrey, a group of boys and girls, ball game between Peas and Jayton Girls, a game between the Peacock boys and the girls.  
The boys won their first game by a score of 25-8 with the team playing one-half hour. The boys were defeated in a hard fought battle by a 20-22. The game was as any game ever played in Jayton. Jayton was leading more points but in the last second scored the winning point.

The squad made a good show. We know they will be a help this year. Everyone is over our new gym and to have the best year we had in athletics. We appreciate the cooperation of the Jayton boys and want to see them all the ball games.

**PROGRAM**  
"Beginning" was the topic given by Mr. Coons in the day morning. The boys encouraged the students and make good grades. Let the studying begin right at put it off until examination.

and valuable thoughts led in the speech and all need to do is to take heed of suggestions.  
The group for the new school songs every person needs to learn and yell to help the pep in the basketball games.

## SENIOR CLASS NEWS

A series of interviews will appear in the Senior class news. This is the first interview.  
The senior class members have the highest of ambitions. Their reporter is going to whisper a bug in your ear each week and tell you what some of their highest ambitions, their likes and dislikes. Being a close observer of human nature, I have sounded out or learned by studying their characters what their different aims in life are. This week I have interviewed our class president, Loy-al Harrison.  
"Mr. Harrison," I said, "I would like an interview with you." I was truly astounded at the look on his

face. It was one of mingled fear and amusement.  
"Well," he said, "Just what do you want to know?"  
"Hmm, now let me see," I mused. "Your favorite food, and amusement, your greatest weakness, your hope, your ideal, your hobby, your greatest delight, etc." and will you believe me, he laughed right in my face? Yes Sir! But as an experienced person in this line of business, I never let such trivial things as that discourage me.  
"Please, Mr. Harrison," I urged, "I am truly serious."  
"Well, what has to be, has to be," he finally concluded, "So here goes: my favorite food—spinach, because Popeye eats it. My favorite study—

English because Miss Yarbrough teaches it. My favorite amusement—basket ball, just because it is. My weakness—girls. Don't ask me why. My hope—to be an English Teacher. My ideal—Miss Yarbrough. My hobby—translating the Canterbury Tales. My greatest delight—getting by the teachers."  
"Boy! Oh Boy!" I cried when he had finally finished. "I didn't really think you would tell me all of that. I am simply over-joyed. I hope I have not detained you from your English study long, Mr. Harrison," and after many thanks and apologies, I took my leave. Watch next week for an interview with our class Vice-President, Miss Jo Dell Cade.

## THIRD GRADE NEWS

Miss Patton reports a group of three perfect spellers in her room for this week. They are George A. Dowrey Jr., Eugene Vandiver, and Clarine Darden.

## THE WORK OF CREDIT

### Bank Shows How It Gives Needed Aid to All Classes of Prudent Borrowers

How a bank loan portfolio presents a graphic cross section picture of the business of its community is disclosed by the description which a midwestern bank recently gave of its loans to customers. It revealed also how closely interwoven with its neighbors' varied lives are the threads of the bank's financial helpfulness.

This description showed that the bank had made a loan of \$100,000 to a local shoe manufacturer to purchase materials, discount bills and meet current requirements.

To a wholesale grocer \$95,000 had been advanced for the purchase of inventory, the loan to be repaid over a period in accordance with specified terms set forth in the loan agreement.

### Assistance in Personal Matters

Another loan had been made to a home owner to the amount of \$200 for painting and repairing. This was made in cooperation with the Federal Housing Administration and was being repaid in twenty-four monthly installments of \$8.33 each.

A dentist had been loaned \$300 to purchase new equipment. He was paying off the debt out of his professional earnings as they came in.

To a large domestic refrigerator distributor \$30,000 had been granted on warehouse receipts to finance dealer shipments.

A home owner had been granted a \$3,000 mortgage loan to be repaid in three years.

One thousand dollars had been advanced to an office worker on the cash surrender value of his insurance policy to aid him in meeting an emergency.

### The National Total

If each of these various examples were multiplied many times the result would represent the total volume of credit cooperation which the bank was extending to its neighbors in its community, for aggregate loans to all its customers amounted to more than twelve million dollars.

If the typical examples here given were multiplied by many millions of times the result would represent the total economic cooperation which the banking system of the country as a whole is extending to aid the innumerable personal, professional, industrial and commercial activities which make up the whole business life of the nation. The nationwide total of such loans is in excess of 20 billion dollars.

While cotton ginning is just getting under way in this territory, some business improvement is already noted.

The Grand Jury was again in session the first part of this week.

A. J. Lafoon, who is in the Lamesa CCC Camp has landed a job as a mechanic and is making good much to the satisfaction of his father and sister in Jayton.

**Smallpox And Diphtheria Warning**

Austin, Sept. 12. —The beginning of another school year is near at hand. The weeks have provided for school children the opportunity for mental rest and relaxation; they likewise made for physical growth and development. Thousands of boys and girls will advance to a higher grade as they turn toward the schoolhouse. In addition, a new group of children, escorted by parents or older children, will be entering school for the first time.

The years spent in school represent training for life work. Such training accomplishes most when administered to pupils and students with clear minds and sound bodies. Moreover, this training must go on without serious interruption. Other things being equal, the school with a fine record for attendance is more apt to approach a high standard of education than the school with poor enrollment due to avoidable disease, declared Dr. John W. Brown, State Health Officer.

It is unfortunate from any standpoint when children are kept away from school because of illness; doubly so when sickness is due to preventable causes. No school need have its attendance record shattered because of an outbreak of smallpox or diphtheria. Parents in increasing number are having their children safeguard against these diseases in the first year of life. Likewise, through child health conferences, for pre-school children, more and more attention is being given to work of immunization against preventable diseases and to the correction of dental and other remediable physical defects. Such measures will go far toward assuring good health and regular attendance throughout the period of school life. See your physician about diphtheria and smallpox immunization.

Bro. Lair, the Baptist pastor filled his regular appointment Sunday morning and Sunday evening. His theme was tithing or giving unto the Lord that which is rightfully his.

The splendid rains we have received lately have made things assume a very different appearance. Late feed and cotton have been benefited a great deal.

Clairemont has been a very busy place the past week as court has been in session.

day with Miss McGriffin.

Miss Evelyn Sowell spent the week end visiting home folks in Lubbock.

**Culinary Jingles**  
by Marcia Camp

Oh, the social whirl  
Is a snap for the girl  
Who cooks the modern way,  
Who has learned to freeze  
With the greatest of ease  
Desserts that are stamped "O. K."

ARE YOU perhaps looking for a new, extra-special dessert that will make your guests exclaim over it while they eat and beg for the recipe when they are through? In the entire lexicon of American cookery there is no more special dessert than ice cream, and the most special of all ice

creams is the one you make yourself with the magical marshmallow as a base.

The marshmallow is magical as a base for ice cream, because it makes failure impossible. No danger of setting a product crunchy with ice crystals before your guests when you make it with marshmallows. The very name "marlow" means not just an ice cream, but a creamy ice cream. Marlows are always made with marshmallows, so they always have to be creamy! The secret is actually nothing more portentous than keep-

ing a package of marshmallows always on your pantry shelf! Marlows are really extraordinary enough in themselves. Try adding strawberries to an ice cream which does not require stirring or any other attention all the while it freezes, whether you use a mechanical refrigerator, or an ice cream freezer, or simply a mold in an ice-salt pack. The mold must have a well-fitting cover, sealed with adhesive tape.

**STRAWBERRY MARLOW**  
1 cup crushed 20 marshmallows  
fresh strawberries 1/4 cup water  
1 tablespoon orange juice 1/2 pint cream,  
1 tablespoon sugar stiffly beaten

Wash, hull and crush the berries. Mix them with the orange juice and sugar, and let them stand for 30 minutes. Meanwhile steam the marshmallows with the water until they are liquid and smoothly blended. Add to berry mixture and cool. When quite cold and beginning to stiffen, combine with the stiffly-beaten cream. Pour into refrigerator trays and freeze without stirring.

If strawberries are not available at the moment, you need not suffer through inability to try the recipe! Use crushed pineapple instead, with these differences:

**PINEAPPLE MARLOW**  
16 marshmallows 1/2 pint cream,  
1 cup canned crushed stiffly beaten  
pineapple

Steam marshmallows over hot water with the pineapple until they are liquefied. Cool the mixture. When it is cold and slightly stiffened, combine with the whipped cream. Pour into containers and freeze without stirring.

ther in Abilene, Sunday. Mrs. R. P. Fuller and daughters, Lucille and Renell visited Mrs. Fuller mother in Rotan Sunday.

Buster McCombs formerly of Clairemont is in the Lubbock Sanitarium where he has just under gone an operation for appendicitis. We are glad to report he is doing fairly well at present.

Bro. Lair visited Mr. and Mrs. Ivy McCombs, Sunday.

**SCHOOL NEWS**

School has been in session for two weeks and every thing is progressing smoothly. A new bus has been added. This of course has increased the number of students. A school project has been applied for to get some playground equipment built, grounds cleaned and building repaired. We are surely in hopes this project will be granted.

A chapel program had its beginning Monday morning. Everyone seemed to be ready to help push this forward.

The boys are planning to beat the outside boys this week in a game of playground ball.

C. J. Robinson and sons Johnnie and Harvey, and L. F. Wade made a trip to Lamesa, Sunday.—Crops along the entire route looked good, and that part of the plains from Post to Lamesa certainly has a bumper feed crop of all kinds.

The farmer was showing a girl boarder from the city around the farm. Suddenly she spied a group of calves in a field and she exclaimed: "Oh, look at the little cowlets!"

The farmer grinned and remarked: "Them is bullets."

Mrs. Addie Hancock is attending Texas Tech at Lubbock this term.

S. W. Elerbee and wife are at home in Jayton after spending two weeks with their daughter at Hamlin, Texas.

Wilson Garrett left last Sunday for Austin, Texas, where he will attend The Texas University.

Nurses Training School at the Stamford Sanitarium at Stamford visited with friends and parents in Girard Sunday.

It would make you feel terrible should you be driving a car and run over a little child. Or by parking your car on a blind corner cause some one else to run over one. Lets play safe, rather than be sorry—and all observe the driving and parking laws of the state and town.

**NEW HEAT-DIRECTOR**  
gives **CONVENIENT HEAT**  
*Burns Oil*

**SUPERFEX**  
*Oil Burning* **HEATERS**

**DIRECTS RADIANT HEAT WHERE YOU WANT IT**

**YES,** stove-heating can be convenient. With a new Superfex Heat-Director in your home you can enjoy the constant comfort of modern, flexible oil heating. No more ashes and fuel scuttles in the living room! No more extremes of temperature. Responding instantly to a turn of the handy control dial, the Heat-Director gives a volume of heat when you want it, yet is easily regulated for milder weather.

Radiant heat that warms every surface it touches can be directed toward the floor or out into the room by means of the patented shutter-like heat projectors on three sides of the Heat-Director.

The removable fuel tank holds enough oil for as many as forty-six hours of cozy warmth. The tank can be filled outside while the fire burns undisturbed. Connections for outside storage are also available.

The Heat-Director requires no elaborate installation. Set it up and connect with a flue as you would an ordinary stove. Draft regulation is automatic.

There are seven Superfex Heaters—three Heat-Directors and four Radiating heaters, offering a choice of sizes, prices and heating capacities for every heating need... Handsome Burl Walnut finish in porcelain enamel.

For one-room chilly spots, get a portable Perfection oil burning room heater.

Come in and see these fine new SUPERFEX HEATERS. A PRODUCT OF PERFECTION STOVE COMPANY.

Diagram shows the Superfex Heat-Director's vaporizing burner, removable fuel tank and patented heat projectors that direct radiant heat toward floor or other surfaces as you choose.

Old Age Pensions

"Old-age pensions could cost Texas taxpayers as much as \$56,073,402 yearly if each of the 283,199 people 65 years of age and over received the full \$15 monthly allotment provided for in the recent Constitutional Amendment," State Auditor Orville S. Carpenter said today.

At the request of Governor Allred Carpenter and R. B. Anderson, State Tax Commissioner, prepared the report "Cost and General Plan for Old Age Pensions." Upon the Govern- or's suggestion it was mailed to members of the Legislature September 19.

"Experiences of other states has shown that have attempted at first to take care of only those actually in need of assistance. Requirements made of applicants have been with a view of eliminating those who, although of eligible age, did not actually need assistance. In this way other states have greatly reduced the costs from the amount necessary to pay if all persons of the required age had been included," Carpenter said.

"As there are 41,787 persons 65 years of age and over on the Texas Relief Rolls, this apparently is the minimum number able to qualify for old age pensions. At \$15. a month and with 10 per cent administrative cost added, this would be \$8, 273,826 yearly," Carpenter explained.

Carpenter believed the figure 62, 933 most nearly represented the actual number who probably would receive old-age pensions in Texas. He determined this figure by considering the experiences of other states. If 62,933 people in Texas 65 years of age and over were to receive the full \$15 a month, the yearly cost to the tax payers would be \$12,460,734, Carpenter calculated. In this he included 10 per cent administrative expenses.

"The Federal Government, if funds are available, will provide an amount equal to that spent by the State plus 5 per cent for expenses. This depends upon approval of the Texas plan by the Social Security Board in Washington. The Texas Legislature will formulate a plan for distribution, and it will decide whether or not the full \$15 maximum will be used," Carpenter concluded.

"If the individual will assume his responsibility by consuming a nourishing diet, keeping his mouth clean through daily brushing, and have a regular inspection by his dentist and physician, undoubtedly a fair proportion of heart disease, not to mention many other minor diseases, could be eliminated that have their origin in diseased mouth conditions.

Remember the Folks Here in Our Town

We have no desire to but in where we have no business, but it appears to us that the thing for the people of this part of "Gods Footstool" to do is to look after the home folks first. The cotton picking season is with us. Already the mexicans are coming in here from South Texas as thick as flies after a dead dog.

Every man to his own notion, but we are for the home people, first, last and all the time. We believe the funds should be made up and big signs made and placed on the highways heading into Kent county - MEXICAN LABORERS NOT NEEDED IN KENT COUNTY Keep on driving
