

THE JAYTON CHRONICLE

VOLUME XVI

JAYTON, KENT COUNTY, TEXAS. FRIDAY, AUGUST 28, 1936

NUMBER 35

Roosevelt "Good Neighbor" To Texas

President Roosevelt assuredly has been a "good neighbor" to Texas farmers and ranchers for his administration supplied to them during their direct needs the stupendous sum of \$323,227,304, of which \$136,019,114 was under the Agricultural Adjustment Act and \$187,208,160 under the Farm Credit Act. When the Texas farmers and ranchers would have done, how they could have lived without this helping hand furnishes food for serious thought, with another national campaign in progress.

The above figures were prepared by the National Emergency Council, at Washington, and are indisputable, but the survey recently received reveals a still more important fact: how the administration saved Texas. For the Council's report discloses, for the first time, that under Roosevelt the people of Texas received in all classes of benefits, loans, grants, relief, bonuses, etc., over one billion dollars, this gigantic amount being spread among all groups, keeping up purchasing power and markets. The \$1,000,000,000 was used to purchase groceries, clothing, household supplies, ice, medicines, all forms of other merchandise, oil gasoline, radios and what not and Democratic leaders, including Governor Allred, Vice President Garner, Senators Sheppard and Connally, Myron Blalock and Congressman Bayburn, State Campaign Chairman, and Roy Miller, Director of Organization and Finance, say this saved Texas.

Miller, who served as campaign manager for Roosevelt in this State four years ago, and who is now performing similar service, has this to say:

"It is inconceivable how any man or woman in Texas could vote against Roosevelt in view of the untold benefits he brought to us, for this was help in which every one shared. The little amount Texas is called upon to contribute to the National Campaign to swing doubtful states is only .0025 percent of the amount Roosevelt gave us."

The Washington Administration sent to the people of Texas 4,000 times what Miller and associates are asking for the campaign, only \$250,000.

Hardly had the campaign got under way in this state than a Texas woman, Mrs. Clara Driscoll Sevier, Corpus Christi, opened her purse and put down \$10,000 for the Roosevelt-Garner crusade. But this was not unusual in Mrs. Sevier. It was she who years ago bought the Alamo property when it was about to be turned over to a brewery, saving the Texas cradle of liberty for the people of Texas. Mrs. Sevier is president of one bank, large stockholder in another and owns extensive oil and ranch interests.

She is National Committeewoman from Texas. When the State Democratic convention was held recently in San Antonio other candidates for this post withdrew when it became known she was willing to serve again.

Attorney General McCraw and wife didn't let 24 hours go by. They sent Miller \$250, McCraw adding one of his characteristic statements that "due to the benefits Texas received from the Roosevelt Administration the Republican candidate, Landon, ought not to get a single vote," and he offered to "tote wood and water" and do anything else to help in the campaign.

Under Miller, Blalock and Rayburn the entire State has been organized in precinct, county and district units, whose officials cooperate with state headquarters, and they, in turn, with National headquarters. All contributions will be acknowledged and listed with National Headquarters.

States in the north and east are watching Texas' activity closely for it is known to the entire campaign organization that Texas prestige at Washington is at stake, for Texas leaders in Washington are more at the helm of affairs than those from any other state. Texas interests, activity and contributions will materially help to keep other states in the Democratic column, and thus assure continued Texas leadership, and continued help from the good neighbor, Franklin Roosevelt.

Best as giving more than \$300,000 to Texas farmers and ranchers the Roosevelt Administration saved hundreds, yes thousands of Texas homes. The survey shows that the Home Loans Corporation put to work \$3,068,735 in this state,

Changes In School Faculty Made

Since the last edition of the Chronicle went to press we have had some changes in the faculty. Miss Blanche Zeman has resigned her position in the Jayton School so that she may join forces with the Idalou school in teaching the youngsters. Mrs. Floyd Barfoot who has been teaching in the Spur schools was chosen to fill the place left vacant by Miss Zeman.

We were also surprised to hear that Miss Sybil Hazel is now Mrs. Taylor. She will have charge of the third grade work this year.

Practically the same courses will be offered this year that were offered last year. The most probable changes will be in History 1, and Chemistry. The eighth grade will have its choice of Ancient and Medieval History or Junior Business Training. Text books are not furnished by the state and must be bought by the students while the Ancient and Medieval books are furnished. If there is enough demand for bookkeeping a course can be arranged satisfactorily. The cost for bookkeeping will be approximately \$4.00 for nine months.

Under the schedule as it is arranged we will offer typing three periods which will care for 18 students. Typing fees will be 75c per month or \$3.00 for 4 1-2 months.

A number of students took out books during the summer so please return them when you come to register. Too, several of the students failed to turn in all their books at the end of school so be sure and bring them and clear up your record.

Juniors and seniors are to register next Thursday morning at 9:00 o'clock.

Sophomores and Freshmen are to register Thursday afternoon at 1:00. The fifth, sixth and seventh grade students are to register Friday morning at 9:00 o'clock.

Students in the first four grades are to register Monday morning, September 7.

Three Big Kitchens Feed Cast of "Under Two Flags"

When 20th Century-Fox took thousands of extras out to the Arizona desert to film "Under Two Flags," to be shown at the Palace Saturday night prevue, Sunday and Monday, the studio knew that it would have a problem on its hand in feeding this horde.

As a consequence, the studio hired the Anderson Brothers, the concern that fed the laborers on the Boulder Dam project. They set up three massive kitchens and dining halls where everyone from Ronald Colman, Claudette Colbert, Victor McLaglen and Rosalind Russell down to the horse wranglers were lavishly fed.

Seventy-six days of this kind of work were necessary to bring to the screen the spectacle, surging drama and tender romance of Ouida's famous story.

Miss Patsy Maples of Longview, Texas, who has been visiting her grandparents Mr. and Mrs. C. S. Kennedy for the past few weeks, left Thursday morning for her home. She was accompanied to Sweetwater by her uncle, Harold Kenady.

along with nearly \$5,000,000 for Resettlement, and \$19,000,000 sent here by the Federal Housing Administration. The total sum given Texas by the Federal Emergency Relief Administration was \$171,102,000 coming at the moment of the greatest need. The Reconstruction Finance Corporation sent here \$69,383,000 for all manner of business; Public Works Administration \$112,724,000, which supplied many thousands of jobs. Other items were: Commodity Credit Corporation, \$43,481,000; Civil Works Administration, \$31,695,000; Bureau of Public Roads, \$67,158,000; Emergency Conservation Work, \$38,578,000.

Roosevelt is the Centennial Governor, and showing his great interest in Texas, its people and history, the President visited the Alamo in San Antonio, the San Jacinto battlefield near Houston and the expositions in Fort Worth and Dallas. Roosevelt has been Texas' best friend.

Official Returns Second Primary For Kent County

Railroad Commissioner:
Ernest O. Thompson — 637.
Frank S. Morris — 232.
Commissioner of Agriculture:
George B. Terrell — 454.
J. E. McDonald — 384.
Representative 118 District:
C. L. Harris — 638.
Leonard Westfall — 287.
For District Attorney:
Ben Charlie Chapman — 496.
French M. Robertson — 404.
County Commissioner Precinct No. 1:
Tom Hunnicutt — 309.
J. A. Suits — 277.
County Commissioner, Precinct No. 2:
Edd Fuqua — 72.
J. R. George — 69.
County Commissioner, Precinct No. 3:
A. C. Cargile — 79.
J. B. Durham — 67.
Public Weigher, Claiborne:
Boy Underwood.

Totals on District Attorney's Race

Chapman received the following votes by counties:
Throckmorton County — 923.
Stonewall County — 833.
Kent County — 496.
Haskell County — 2477.
Total for four counties — 4729.
Robertson received the following votes by counties:
Throckmorton County — 724.
Stonewall County — 860.
Kent County — 404.
Haskell County — 1614.
Total for four counties — 3620.
Chapman receive a majority of 1109 votes from the four counties.

J. A. Suits Thanks The Voters and Friends

I want to thank all who voted for me in the runoff election of last Saturday. While I was not re-elected I am glad that I can lose and not feel sore at any one. I have served the people of this county for almost 4 years and I can retire feeling that I have done my duty as I saw it, honestly and faithfully. I have at all times worked for what I believed to be the best interests of my precinct and the county as a whole, and at all times placed the county and precinct welfare above any other consideration, individual or corporate. Any time I can be of assistance to the new commissioners I will be glad to have them confer with me.
Very truly yours,
J. A. SUITS.

To The People of Kent County

It appears from the returns of the second Democratic Primary of last Saturday that I have received the nomination for the office of District Attorney.

I deeply appreciate this expression of confidence in me on the part of the people of the district.

I sincerely thank every person in this county and in the 39th Judicial District for the good vote I received and for the kindness and consideration shown me during the entire campaign.

I shall endeavor to discharge the duties of the office in such a manner that will merit your confidence.
Sincerely Yours,
Ben Charlie Chapman.

Milton Ramsey spent a few days in Jayton this week, enroute to Clayton, N. M. where he will again take up his duties as an Instructor in the Clayton School.

Jayton enjoyed a dust shower from the south Tuesday night at about 9 o'clock. It was some cooler Wednesday morning but boy it was hot, Sunday and Monday and Tuesday.

Verdie Winters and Leonard Browning and families are on a fishing trip to Lake Wichita this week. Grandpa and Grandma Winters are looking after Verdies business for him.

Miss Chloe Daden was a visitor to the Texas Centennial Celebrations at Dallas and Fort Worth this past week.

ROOMS TO RENT For Light House Keeping, furnished. Mrs. O. W. Coats

Palace Inaugurates Bargain Nights

In keeping with present times the Palace, endeavoring to please its many patrons has decided to make Wednesday and Thursday, through September Bargain Nights at 5c and 15c, and have picked the cream of pictures for these days. The first of these special pictures is James Oliver Curwood's famous story "The Country Beyond," featuring the world's and greatest St. Bernard.

Carl Spitz who trains and handles Puck, the screen's new dog star, claims that his charge is the biggest St. Bernard he has ever met in a lifetime of dog handling.

Buck, who is featured in "The Country Beyond," Fox picture which will be shown at the Palace Theatre, is considered by Spitz the mammoth of his breed, which has never produced small dogs.

Not yet full grown, Buck weighs 190 pounds and stands 35 inches from the floor to his shoulder.

In "The Country Beyond," the adaptation of James Oliver Curwood's exciting novel, Buck is the hero dog who helps bring a killer to justice and who cements the romance between Rochelle Hudson and Robert Kent.

Paul Kelly, Alan Hale and Alan Dinehart are other Hollywood actors prominent in the cast of the picture.

1927 Bridge Club

Members and a few invited guests were graciously entertained on last Thursday afternoon with four tables of contract at the home of Mrs. Bill Daniels east of Jayton.

During the refreshment course which consisted of tuna fish sandwiches, potato chips, stuffed olives, congealed fruit salad, vanilla wafers and iced tea, gifts were presented to Mrs. Wade Thornton for high score; Mrs. Glen Huls for low and Mrs. Claude Kelly for high cut.

Members and guest present were: Mesdames Jay, Sandal, Kelly, C. Robinson, Sewalt, B. Robinson, McLauri, Vencil, Huls, Mason, Murdoch, North, Mayer, Mason, Thornton, Misses Mary Robinson, Doris Mae Sewalt and Bess Robinson.

Notice!

The Methodist Sunday school has organized a new class to be known as the "Young Married Women's Class." If you can qualify you have a special invitation to meet with the new organization. We are hoping to be able to accomplish much good and at the same time add interest to our Sunday School social life. Won't you come and be one of us. — Committee

Peacock's School Opening Postponed

We have been requested to announce that the Peacock School opening has been postponed until September 21st. The severity of the drought in Stonewall is given as the reason for the delay in beginning the school work in August as planned.

Daily papers state that the conflict between the federal game laws and the Texas game laws in regard to the opening date of dove season has been eliminated and hunters will be permitted to shoot doves beginning September 1st. Doves are plentiful this year, due no, doubt to the short season last year and the restrictions placed on hunters. Repeating shotguns, hunters are warned, must be plugged up to hold only three shells.

C. O. Fox, who is now living in Snyder, spent the week end in Jayton.

A truck load of mail order catalogues was unloaded at the local postoffice Tuesday morning and the past time of wishing doubtless increased hours in this part of the woods.

Banker W. H. McKinzie and family left Monday for New Mexico's mountains to spend their vacation. Claude is at the bank during his father's absence.

Contractors started to work Wednesday morning at the county court house at Claiborne installing a new gas heating and lighting system.

Jayton Softball Team Loses To Dickens

One of the best soft ball games seen here this season was played on the local diamond Sunday afternoon when Dickens came down to take the local boys to the score of 10-8. The game was fast and clean with no wrangling and full of exciting plays. Bill Alexander pitched a good game, but two costly errors threw the balance in favor of the Dickens boys after they had one pitcher pounded from the boy by the slugging bats of the Jayton hitters. The game, tied 8-8 in the eighth inning was anybody's game until the last ball was thrown. The game, witness by a large enthusiastic crowd is the last but one of the best of the league games scheduled by the Jayton team for the season.

C. L. Harris Thanks Kent County Voters

My gratitude to the people of the 118th Representative District for their wonderful expression of confidence in my ability of the sincerity of my purpose is beyond my command of words to express. I shall while serving you in Austin bend every effort and use all my capabilities to the end that you may if possible be repaid for your giving me his opportunity to make good with my people and my State. Any time that I can be of service to you in any way command me.

Very gratefully yours,
C. L. HARRIS.

Tom Hunnicutt Is Happy and Thankful

To say that I am happy and thankful over the results of the election last Saturday is just a mild way of expressing my feelings. Those voting or working and voting for me I would like to thank personally, but that's rather a hard job as I do not know just who many of you were. When I came into this office the first of January it shall be my sole purpose to so work and conduct myself that you will be pleased with having selected me I here and now ask for your help and advice while serving as your commissioner that all may be benefited equally and alike.

I shall remember that I am the tired hand and that you, the people, are the boss.
TOM HUNNICUTT.

A. C. Cargile Thanks Voters of Precinct No. 3

My Friends: Once again you have been fit to honor me with the office of commissioner of Precinct 3. For his I sincerely thank you. If I have served you reasonably well in the past I shall do all I can to serve you better in the future. I am proud of the cooperation you have given me here-tofore and ask that you continue to work with me that all may be equally rewarded. Again thanking you I am your friend and co-worker.
A. C. (Abb) CARGILE.

A number of men from town responded to the call for help to fight the pasture fire that broke out in the vicinity of the Jayton Golf course Tuesday afternoon, and after a hard fight got the last spreading flames under control. Every effort should be made to prevent these fires from breaking out, because, as dry as the country is, these fires might possibly do untold damage if they got beyond control.

Mrs. Mary Clark is reported seriously ill at her home in Girard.

Reports from Rochester, Minn., where Bert Wallace has gone for treatment, are to the effect that he is doing nicely.

Mrs. John Furr, accompanied by her daughter, Mrs. S. C. Caldwell, and family of Post attended the Ft. Worth and Dallas Centennial and visited relatives in Wood County this week.

E. S. Gallagher, who underwent an appendicitis operation at the Lubbock Sanitarium some time ago is still in the hospital, but it is reported that he is doing nicely and will be home shortly. E. S. is the son of Mr. and Mrs. Coleman Gallagher of Jayton.

Conservation:- A Farmers Problem

Conservation of feed, water, and soil is a problem that has to be solved by each West Texas farmer before he can hope to succeed in his farming operations. Mr. Dickerson of the Spur Experiment Station told a group of Crosby County farmers at a field day gathering near Crosbyton last Friday. Conservation of capital or resources is one of the main principles essential to the success of any business.

One can hardly expect to make a profit from farming in this section when he has to buy feed. His only alternative is to raise enough feed each year to run him the following year. Experience has shown us that we can not expect to grow a good feed crop every year due to weather hazards. In spite of this fact it is possible for each farmer to grow enough feed for his needs if he will store enough during periods of plenty to last through the periods of scarcity. And too even during dry years we could save some of the feed which we are permitting to dry up in the fields. Trench silos have proved a satisfactory storage place for feed. The only cost attached to them is the labor of digging them. Feed stored in them will improve in quality and has been kept as long as twenty-one years without deterioration. There is little waste and no insect or rodent damage. The trench silo seems to be the answer to the conservation of feed in West Texas.

We have on an average approximately nineteen or twenty inches of rainfall annually. This rainfall seldom comes when the crops need it most. It is a sufficient amount to insure us of a good crop provided we can supply it to the plant throughout the growing season. The soil of this section is so constituted that it will hold a large quantity of water from year to year if we can get this water into the ground. If we will terrace our land and run each row as nearly as possible on a water level, the runoff water will be slowed and give the ground an opportunity to absorb it and hold it for the future needs of the plant. Terracing appears to be our method of water conservation.

Many of the farmers of this section have witnessed the damage done to their own farms by wind as well as water erosion. The food materials so essential to plant growth is stored in the top few inches of the soil. When this top soil is washed off our land becomes poor and will not produce a crop under the most favorable conditions. Once the top soil is lost it is a very slow and laborious process to build it back to its former fertility or productiveness. Most of the soil in this county may be held in place if the fields are properly terraced and the rows are run on a water level. Terracing and contouring seems to be our best method of soil conservation. They may be supplemented to a great extent by growing and turning under vegetation.

Sacred Calves Born at Centennial Exposition

The only pair of pure-bred Brahman calves ever born at an exposition are now at the \$25,000,000 Texas Centennial Exposition, where they were born recently.

Dutchess, world's grand champion Brahman cow, is the mother of one, a bull calf, and Koonice, world's reserve champion Brahman cow, is the mother of the other, a heifer.

Both are owned by J. D. Hudgins of Hungerford, Texas, whose 30,000 acre ranch has 3,200 Brahmans of the Guzera type, considered the finest for cross breeding purposes.

Brahmans are odd looking hump-shouldered cattle from India where they are held sacred. They are immune from fever, tick and other illnesses that beset the better known breeds of American cattle and their off-spring inherit this quality in cross breeding.

SUBSCRIPTION PRICE PER YEAR \$1.50

Players Learn With The American Boy

Boys and young men who want to improve their crawl stroke, their basket shooting, their hurdling, their tennis backhand, or their ball carrying, can enlist the aid of the nation's foremost coaches and players by subscribing to THE AMERICAN BOY magazine and following the sports interviews and fiction stories that appear each month.

For the coming year staff writers have gone to two of the greatest football teams in the country—Minnesota and Southern Methodist—for

first hand tips on strategy, blocking, ball carrying, passing, and the fine points of line play. They have written the story of Bobby Wilson, All-American halfback.

They have interviewed famous track coaches like F. L. Moore and Bob Simpson. Have gone to the University of Oklahoma to learn how college champions wrestle, to Notre Dame for the story of the building of a great basket ball team. They have sought out famous baseball players, swimmers, tennis champions and All-American backs, to get their story of how to play the game.

American Boy fiction is jammed with instructive background details telling how to play a better game. And the rest of the magazine is jammed with adventure, exploration, vocational help and articles vital to boys.

Ohio State University's track head, coach of the famous sprinter and low hurdler, Jesse Owens, and himself a former hurdling star, first learned to hurdle from articles in THE AMERICAN BOY. "I used to cut out hurd-

ling pictures and duplicate them in front of a mirror. Then on the track I'd follow that form."

Today thousands of future champions are just as eagerly following The American Boy. Send your subscription to The American Boy, 7430 Second Blvd., Detroit, Mich. Enclose with your name and address \$1 for a year's subscription, \$2 for three years, and add 50 cents if you want the subscription to go to a foreign address. On newsstands, 10 cents a copy.

Freight trains nowadays act like express specials. New freight schedules are so fast, I sometimes wonder if everything has to be delivered day before yesterday.

Many of our passenger trains are running faster schedules, too. Well, one thing is sure. We make faster runs, but the first railroad commandment is still "Safety First." That's one rule they won't change.

Western railroads and allied industries provided jobs for 750,000 workers last year. Some of them live in our town. Good neighbors.

Passenger fares are now the lowest in history with substantial reductions on round trips. And no more surcharge for riding in sleeping cars.

This new Free pick-up-and-delivery of less than carload freight—I heard some traveling salesmen talking about it on the train yesterday. They said it saves shippers a lot of money and centers all responsibility on the railroad. The railroad picks up the freight at shipper's door and delivers to receiver's door. Of course, local delivery men get the haul from door-to-door and car-to-door at both ends. The railroad handles the whole transaction.

When railroads are busy, I notice towns along the railroad are prosperous. The merchants put more ads in the newspapers.

We're proud of railroad achievements, appreciate the public's good will and increased patronage, and pledge continued progress.

BANKING SYSTEM SHOWS PROGRESS

State Bank Resources Grow More Than Three Billion Dollars in a Year

NATIONAL BANKS GAIN

American Bankers Association Gives Details of Banking Institutions and Notes Stronger Condition

NEW YORK.—Continued improvement in the condition of state chartered banking institutions, with an increase of more than three billion dollars in a year in total resources, is shown in a report just issued by the State Bank Division of the American Bankers Association.

The report was prepared by the division's Committee on State Bank Research from data furnished by state banking departments and parallels data issued by the Comptroller of the Currency for national banks which show similar improvements.

"The combined resources of 10,473 state supervised banks were \$35,724,723,000 as of December 31, 1935," the state bank report says. "Total deposits amounted to \$30,526,920,000. Total loans and discounts stood at \$12,430,404,000 and total investments were \$14,170,421,000."

A year previous, tables in the report show, there were 10,644 state supervised banks, with combined resources of \$32,680,203,000, total deposits \$27,297,959,000, loans and discounts \$13,060,033,000 and investments \$12,582,325,000.

Classes of Institutions

Of the reporting state banking institutions on December 31, 1935, 82% were commercial banks, the report states, 9% trust companies, almost 9% stock and mutual savings banks and less than 1% were private banks. The report adds:

"The parallel upward movements of deposits and total invested funds of total state supervised banks during the years 1934 and 1935, after declines in these items in 1932 and 1933, are indications of definite steps toward recovery in banking.

"Based on figures assembled for total state supervised banks on resources and liabilities as of December 31, 1931 to 1935, it is noted: (1) that deposits in 1935 rose approximately 12 per cent over the previous year, as compared with an increase of about 9 per cent in 1934 over the year 1933, and declines of 7 per cent and 12 per cent in 1933 and 1932, respectively, from the preceding years of 1932 and 1931; and (2) that total invested funds increased by approximately 2 per cent in 1935 and also in 1934, while they had decreased by 9 per cent in 1933 and by 11 per cent in 1932."

Analysis Shows Stronger Positions

In a survey and analysis of earnings and expenses of state banks doing a commercial business, it is brought out that in a majority of states they have increased their earning ability during 1935. On the basis of data covering 7,925 banks in 42 states, the report says:

"The most significant fact to be pointed out is that new profits of state banks—after deducting charge-offs on loans, investments, etc., and adding recoveries—were shown in 37 of the 42 states which reported in 1935. In comparison with net profits in only 11 of the 35 states reporting in 1934. Measured in terms of dollars per each \$100 of invested funds, net profits in 1935 ranged between \$2.40 and \$1.10 per \$100, with 19 states showing profits of \$1.00, or over, per \$100; while in 1934 net profits did not exceed \$1.20 per \$100 and only three states showed profits of \$1.00, or over."

The report contains voluminous tables showing the resources and liabilities of all classes of state chartered institutions and detailed analyses of earnings and expenses by states and of insured commercial state banks grouped by size of banks.

Bankers Help Farmers

The conviction that 4-H Club work lays the foundation for sound citizenship and intelligent farming influenced a New York City bank executive to contribute \$500 to the Agricultural Committee of the State Bankers Association, to further 4-H Club activities in the state. "I am convinced that the work is so worthy, and is being so well handled that it should interest those who believe in building sound citizenship, as well as intelligent farming for the future," he said.

Unusual prominence was given this past year to agricultural work by the Tennessee Bankers Association. The Agricultural Committee report reveals hearty cooperation between bankers and extension workers. "Key bankers and county agents have been in closer contact than ever before," it says.

Georgia bankers have given both moral and financial backing to a Marketing Project sponsored by the Extension Service of the College of Agriculture, and activities the past year showed significant results. The phases of the Marketing program emphasized in the year's work are: The retail market; roadside marketing; miscellaneous marketing (suited to the locality); bartering (exchange of commodities or services with neighbors); standardized canned products for sale prepared in homes or eating centers.

This Happened in Kansas

Fresh from the thrill of notifying Alf Landon that he had been chosen as the Republicans' presidential nominee, Representative Bertrand H. Snell forgot political problems long enough to inspect an oil well in Ellsworth county, Kansas, of which he is part owner.

Mr. Snell's local partner assembled a group of oil men, and they properly welcomed the distinguished minority leader of the house of representatives. Through normally a dour fellow, Mr. Snell beamed and expended in the midst of (so he thought) so many Republicans and Landonites. But he noted that a suspicious silence fell over the group when he predicted a Republican sweep that would lodge their fellow-Kansan in the White House and himself in the speaker's chair.

"I imagine that most of us here are for your governor?" ventured Mr. Snell during the silence. There was an uneasy laugh that aroused his suspicions, but he plunged ahead. He proposed that they poll the jury. The vote was 27 for Roosevelt against five for Landon—and two of the five were Mr. Snell and his partner.

Petter got that garden spot in shape to sow a patch of turnips when the rain comes.

The Sequel to "Call of the Wild." Where the law of the wild is the only law, Rochelle Hudson, Paul Kelly and 'BUCK' the fighting dog of "Call of the Wild." Special Prices, Children 5c, Adults 15c

Here is some worth-while advice to motorists: As soon as darkness descends, slow down pronto!

During the day, well over half of all fatal accidents last year occurred at night. Sixty-nine per cent of the victims were pedestrians. And the death rate for the evening rush hours was over 100 per cent greater in winter than in summer, due to darkness.

Unconsciously or otherwise, many motorists chronically "overdrive their headlights"—that is, they could bring their cars to a stop within the illuminated distance before them. And more powerful lights are no cure for this—they produce glare, a potent cause of head-on car crashes, and are justly illegal in most states.

The pedestrian, of course, is not wholly free from blame. It has been extensively publicized that one should always walk on the left side of the highway, facing oncoming traffic, but a great many night-walkers apparently haven't heard the news yet. And many of them also don't seem to realize that to walk on a dark highway wearing dark clothes is an invitation to the coroner. Light refraction is an eccentric thing—and a darkly dressed pedestrian often can't be seen by the motorist until it is too late.

Thus, we need education for the pedestrian as well as for the auto driver. But in the meantime, the driver should take every precaution—and even go to what may seem ridiculous lengths to operate his car safely. After all, he is in command of a potentially lethal vehicle that literally kills more men than does war. Don't take a chance.

HOW THE BANKS AID THE GOVERNMENT

Normal and Emergency Needs Met by Advances of Commercial Banking Credit

NEW BRUNSWICK, N. J. — The American commercial banking credit system is an absolute essential in the financial operations of business and government. Harold G. Moulton, President of the Brookings Institution of Washington, D. C., said here recently in an address before the Graduate School of Banking conducted under the joint auspices of Rutgers University and the American Bankers Association.

If the flexibility and expansibility provided by commercial banking credit were eliminated, Dr. Moulton declared, "it is scarcely too much to say that the economic system itself would shortly be destroyed."

Normally the amount of credit extended by commercial banks to the government is small in amount and for the purpose mainly of financing temporary requirements in anticipation of tax collections or bond sales. But in periods of war and acute depression, when the financial requirements of government expand with great rapidity, the expansion of commercial bank credit is on a tremendous scale. Such is the case at the present time.

How Public Needs Are Financed "The purchase of government securities by individuals and by the commercial banks provides the government with the means by which its manifold activities are financed. The Treasury obtains the funds, with which the Reconstruction Finance Corporation and other government credit agencies finance their operations, through the sale of securities, largely to commercial banks. These funds, in turn, have gone to the assistance of distressed banks and other financial institutions, to aid industrial and agricultural enterprises, to finance new public and private capital construction, and to provide relief to the unemployed."

Dr. Moulton declared that it is not true that the world depression was caused by a breakdown of the American banking system "which did not, in fact, occur until the depression had been under way for more than three years."

He added: "Nor is it true that the world maladjustments existing in 1929 can be explained simply by undue extensions of commercial banking credit in the preceding years. These maladjustments involved world agricultural, industrial, commercial and financial relations."

FARM ACCOUNTING REVEALS LESSONS

Principles of Sound Business Management That Apply to All Farms

An analysis made of detailed records kept by a group of Wisconsin farms revealed several important lessons and the principles of sound business management derived from them apply equally well to other farms, says an article in the Bulletin of the Agricultural Commission of the American Bankers Association. The article says:

"Investment costs, including interest, depreciation, repairs, taxes and insurance, are approximately two-thirds of all farm costs. Furthermore, these costs are largely independent of the production program of the farm."

"This means that if a farmer cuts his production of crops or livestock, he increases his investment costs per unit of product produced, as a smaller number of units must then carry as large an expense load as before. This illustrates the importance, from the standpoint of costs, of operating a farm at or near capacity."

"Investment mistakes are more costly than many others because they cannot easily be corrected. If a farmer pays too much for his farm, his investment costs will be abnormally high as long as he owns it. If he constructs a \$4,000 barn, when a \$2,000 barn would have served his purpose, he will have excessive barn costs, year after year, during the entire service life of the structure."

"This emphasizes the importance of a knowledge of investment values and the specific investment requirements of individual farms."

Determining Real or False Economies "In working for greater economy, it is essential that the farm manager be able to distinguish between a real and a false saving. This can be done only through a careful estimate of the contribution to income, over a period of time, of each item of expenditure. Only if more is saved in expense than will be lost in income, can a contemplated cut in expense be designated as a real saving."

"For example, dropping dairy herd improvement work may result in a yearly expense reduction. The question to decide is what effect the dropping of this work will have on the present and future income from the dairy herd. If the estimated loss in livestock receipts due to a lowered efficiency in feeding and breeding is greater than the original saving, then it would obviously be a false economy."

"Substantial savings can be effected on many farms through the use of more home grown garden produce and farm cured meats. Why pay out money for products of this kind that can be produced much cheaper at home? The money saved from the family food budget can be used for the purchase of many things that will make the farm home a more comfortable and pleasant place to live."

TRADE MAKES FOR PEACE

"The nations of the world will not fight for things they need if they can get these things through the peaceful pursuit of trade. Peace makes for trade—we all know that, and as practical business men we stand united against the threat of destruction and world-wide bankruptcy that war so surely holds. But just as surely, just as inevitably, trade makes for peace, and the average American who seeks a higher standard of living in a peaceful world today will find the answer to his quest in a more generous two-way foreign trade policy."—Edgar W. Smith, Vice-president, General Motors Export Company

H. D. Club News

Products In Pantry Estimated at \$60.

Approximately 258 quarts of fruits and vegetables have been canned this summer by Misses Ola and Bessie Randolph, farm food supply demonstrators for the Polar home demonstration club. They have also about 100 pounds of dried peas and beans in the pantry.

The value of the products in this pantry is estimated at \$60, which

indicates that it does pay to plant a garden and can the surplus vegetables for winter use.

White Pine Cabinet Installed in Kitchen

A built in kitchen cabinet of white pine, which extends across the west wall of the kitchen is being installed by Mrs. H. D. May, cooperator in the Jayton Home Demonstration Club.

The base of the cabinet near the stove will have drawer space of different depths for cooking utensils, small equipment, and flour, sugar

and meal.

A sink is to occupy the center of the built in features with wall cabinets on either side.

The cabinet is sand papered to a smooth finish and will be waxed, leaving the wood in its natural color. The work surface will be treated with hot linseed oil and waxed thoroughly.

Home Demonstration Club Council Meets Saturday

The home demonstration club council will meet Saturday, August 29, at 2:30 at Mrs. W. J. Lane's.

Following the business meeting, the agent will give a demonstration on a one-dish meal.

Council members are urged to be present, and on time.

4-H Club Sponsors To Meet Saturday

There will be a meeting of the 4-H Club Sponsors August 29, at 3:30 at Mrs. W. J. Lane's.

Plans will be made for September club meeting. The agent will give a demonstration on the use of tomatoes. This demonstration is to be given by the sponsors at the first meeting in September.

The Jayton home demonstration club will meet Thursday September 3 with Mrs. John Fulcher. As this is the first meeting since vacation, we would like to have a good attendance.

Sink Added To Demonstrators Kitchen

Mrs. Dick Sampson, kitchen improvement demonstrator for the Durham Club, has added a sink to her kitchen equipment.

Mrs. Sampson plans to add a built in cabinet which will extend the full length of the wall on either side of the sink. The tops of the base cabinets, which will provide the work surface and drain board for the sink, will be covered with a good grade of linoleum which will not scar and is heat resistant.

Right Kind of Food Important To Health

AUSTIN, Texas — That vigorous good health depends not alone upon freedom from disease, but upon proper amounts and kinds of foods eaten is stressed in a statement from Dr.

John W. Brown, State Health Officer.

"The human body," he said, "may be compared to a steam engine burning fuel for the steam, which furnishes power. The food we eat is fuel and when digested and absorbed gives the energy necessary to live and go about our daily activities.

"In considering the proper amount of food for our individual needs, we should take into consideration the kind of work our body will be called upon to do during the days. When more food is taken into the body than is needed to carry on its activities, extra work is thrown on the organs that carry of waste. This is especially true of the kidneys and often results in serious after effects.

"The growing child will need more tissue building food than older people, but must also have the foods which supply heat and energy, and minerals to regulate the body. The foods which contain vitamins, such as fruits, vegetables, and milk are necessary to old and young alike.

"The various kinds of foods needed by the body are:

Tissue building foods, meat, fish, milk, beans and nuts.

Energy and heat giving foods—bread and cereals, fats and all sweets.

Foods containing minerals—vegetables, fruits and whole wheat.

Foods rich in vitamins—milk, vegetables and fruits.

An important thing to remember in our food problem is the fact that it is not necessary to eat until we feel 'filled up'. Take plenty of time eating and do not allow food fads or eat certain things because they agree with some friend who has recommended them to you. If your food does not agree with you, go to your physician and let him find out what is causing the trouble."

Mr. and Mrs. T. E. Nowell of the Oriana community are entertaining a new baby girl in their home.

Nettie Beth Hagins is spending this week visiting Eloise Wilson in Midland, Texas

J. H. Montgomery and son returned the latter part of last week from Rochester, Minn., where they had been to go through the Mayo Bros. Clinic.

Mrs. Eldon Wade and son family are spending this week in Sweetwater with Mrs. Mary Keenan and family.

Mr. Chris Holley, brother of Tom Holley, is here this week visiting his brother and family. Mr. Holley's home is in Hamlin.

Miss Theda Moore is here this week visiting Misses Bess and Audrey Robinson.

One of our friends recalls that it usually rains on the opening day of school and suggests that the school board should have set the date early in August to have done the crops any good.

D. C. Bradley, manager of the local office of the West Texas Utility Co., and family returned this week from their vacation. They visited the Centennial and the Frontier Celebrations during their absence.

of O'Donnell came to Jayton last Friday to Get Mrs. Bates' mother, Mrs. E. E. Holley, who returned to O'Donnell with them Saturday. Mrs. Holley had been visiting her son W. T. Holley and family for the past

After weeks of insufferable heat, Wednesday morning was cool and pleasant.

Supt. W. L. Coons has been busy this week getting things at the school house in shape for the opening of school, Sept. 7.

Unless we get a good rain within the next few days the city will have to go back on the new well at the city lake for its water supply.

Kenneth Arnold, of Bowie, Texas, who has been in Jayton for the past three weeks, returned home Sunday.
