## Indian Booster Club Holds First Meeting

The Indian Booster Club's first meeting of the 1970-71 season was held Monday night. First item of interest was an ice cream supper, served on the bleachers to the boys, parents and fans.

Following this, a tour of the field house was conducted. This allowed the girls and mothers a first hand look at what goes on behind the scene.

The group then made their way to the cafeteria for a business meeting and program brought by the coaches. Coach Everett introduced the coaching staff for the coming year.

Coach Leher talked about the Jr. High and Jr. Varsity schedule.

Coach Ivey showed the equipment given to each boy and stressed how these items protect the boy.

McAdams gave highlights of the insurance program and Pringle closed this portion of the program with remarks concerning athletic injuries and training.

The main decision in the business meeting was a vote to secure a chartered bus for the boys to Eastland for the first game of the season.

The conclusion of an interesting night was the Iowa Park-Haskell scrimmage film, which gave the fans a second look at two great ball clubs.

All interested boosters of the Haskell Indians are urged to attend the Colorado City scrimmage and be on hand next Monday night for the second meeting of the year.

## Rotarians Hear Facts About Social Security

Haskell Rotary Club members and guests met at the City Cafe at noon, Thursday, August 27, for the regular weekly luncheon session with vice-president Brooks Middleton in charge.

Speaker for the day was Wayne Baker of the Social Security Administration Office of Abilene. He was introduced by Rotarian Ira Hester.

Mr. Baker made a most interesting and informative talk on the social securities benefits available to people who qualify to receive them. He stated that at the present time their figures show that for 1970 a total outlay of money received by Haskell County residents from Social Security would be \$1,629,000.00 which totals the sum benefits of 1,650 beneficiaries.

The Social Security Administration now has \$36,000,000,000 in trust funds but that is just enough to last for about one year provided continuous income was not coming in all of the time as there are 27 million Americans now drawing benefits.

Baker turned his talk into a question and answer type of program and numerous questions were asked by those present relative to certain conditions and what benefits were available under them.

Invocation was led by Bill Ratliff and the following guests were introduced by C. A. Thomas, Jr.: Buzz Rehm of Abilene, Novis Ousley, secretary and song leader of the Rule Rotary Club, and Jim Silverman, who is now associated with the Haskell Memorial Hospital.

The singing was led by H. V. Woodard with Gail Barnett at the piano.

## Large Crowd On Hand For Indians-Hawks Scrimmage

Considering the fact they were up against the strong Iowa Park Hawks, last year's State Champions, the Haskell Indians showed up fairly well in scrimmage here last Friday night at Indian Stadium.

The Hawks scored 30 points to the Indians 2. The Hawks hit pay-dirt five times. Four T.D.'s came on running plays, and one via air. The Indians got on the scoreboard with a safety.

The Junior Varsity was topped 30-0 by the Rule Bobcats "A" team, in scrimmage held just prior to the Haskell-Iowa Park tilt.

A large crowd of Haskellites and a "good-size" delegation from Iowa Park viewed the scrimmage.

# Texas Farmers Union SENATE BILL 8: FARM LABOR AND NLRB

By J. I. Naman, Texas State President

Senate bill 8, introduced into the senate early in 1969 by several prominent senators, both Democrat and Republican, would bring farm labor unions within the jurisdiction of the National Labor Relations Act. Presently, farm labor unions are excluded from the provisions of the National Labor Relations Act, and do not have the right of sanction by the National Labor Relations Board that other labor unions have.

The labor baiters including one farm organization has seized upon this legislation to incite the fears of farmers and rural people at what they characterize is the impending danger of the "compulsory unionization of farm labor." Resorting to the use of insidious propaganda, half-truth, and blatant distortions, these merchants of hate are unwittingly or knowingly being used as the handmaidens of those who would turn American agriculture over to the conglomerate corporations.

To show the extremes to which these people will go, in one of their information pamphlets, they imply that if the legislation passes, not only would farm labor be unionized, but it would also result in the unionization of "gins, implement houses, seed dealers, grain storage, and etc.", and, they warn unionization would be "compulsory". It also infers that there is some connection between the legislation and what resulted from the dock strike that occurred last year.

This is, of course, utterly ridiculous, and amounts to the most flagrant kind of demagoguery. Anyone with the least information knows that the employees of farm processing and handling operations, if unionized, already have access to the National Labor Relations Act, and the passage or failure of this legislation has no relationship direct or indirect with this status. The rights of labor unions and their activities in regard to agricultural related businesses is whatever it is under existing law, and the passage of S-8 will have no effect on this one way or the other. ALSO, Senate 8 does not deal directly or indirectly with "compulsory unionization of farm labor."

It is true that organized labor supports the passage of Senate 8. It is equally true that Farmers Union and the National Farmers Organization are also supporting this bill. The critics say that because organized labor is supporting the legislation, it is bad; and, because organizations join in the support, they are bad critics never tell the whole story that without labor's support for federal farm programs, cooperative loans, soil conservation programs, Home Administration credit programs, and the things essential to agriculture, all of these programs be discontinued. It is too bad that the critics choose to drive a wedge between agriculture and support for farm programs to achieve selfish ends.

Of course, Farmers Union supports the passage of S. 8. It would be unconscionable for us to do otherwise. How could we ask Congress to give farmers the authority to bargain for price under the protection of the National Agricultural Bargaining Act, and at the same time insist that it deny farm labor unions the same bargaining power. Secondly, if we mean when we ask for legislative curbs on corporations, then we should certainly recognize the important farm labor unions the right to demand the same from the corporations.

It is pure myth for the critics of Senate 8 to "straw man" burning to provide scare propaganda. The possibility of workers on family farms being organized is not a threat. The senate bill would only apply to organized unions and from a practical standpoint, these do not exist on corporate farms.

It is illogical and unreasonable to believe that organizations have the least interest in organizing on family farms. It would be a virtually impossible and the cost would be exorbitant. There are factories and industries in the cities, with several workers in a single building that are not organized unions. Why would organized labor dissipate its efforts in an effort to organize workers on family farms?

The anti-labor forces, joined with a farm of that is bankrupt of agricultural issues, will find such issues as the controversy on Senate 8 propaganda purposes. With all their efforts, they find fertile ground among thinking farmers and people. The poisonous seeds they sow will not grow among the ignorant and the uninformed.

Many persons may remember the late Calvin Coolidge, a former president of these United States, was not much of a talker, or at least he did very little talking, unless he really had something important to say. One Sunday when Mr. Coolidge returned from church, Mrs. Coolidge asked her famous husband what the preacher had used as his sermon topic. "Sin," replied Mr. Coolidge. "Well, what did the preacher have to say about sin?" Mrs. Coolidge asked... to which the late president replied... "He was agin' it."

**News From Haskell County Mental Health And Retardation Clinic**

There are a lot of people in Haskell and Stonewall Counties that said to themselves, "I wish I had some one to talk to about my problem." Persons have problems because they are persons. Every problem is of, by, and for persons. Only persons are aware of so many values to weigh or possibilities of choice to consider. We are problems to ourselves, because we are so unpredictable that even omniscience would be hard put to know what we are going to do next.

If there is any measure of human freedom, then every issue confronting every person is undecided until he makes up his mind. It is inevitable under such conditions that every person should be beset with problems all the time. The outcome of our human race and civilization is problematic. So many persons are undecided about so many questions that it is unthinkable we shall ever reach a time, this side of complete extinction, when everything is decided.

Therefore, the greatest problems of our planet are personal problems. However, the hard part is to remember we need not walk alone with our problems for the world is made up of other people and like ourselves they, too, were born of women, reared by parents, teased by brothers, consoled by wives, flattered by grandchildren, and buried by persons and priests with the blessings of the church and the tears of those left behind.

It is easier to speak of fate, and destiny, and waves of the future than to consider the ways we determine our own fate. So the Mental Health Clinic offers to you skilled counselors, many of them with ten to twenty years experience in this field, waiting to serve you.

Personal problems are decisive. From them come the strands of desire and aversion that weave the destiny of the whole planet. But the disease of our world is the individual personality surrounded by rivals who threaten but do not understand, in distress, yet not knowing where to turn, on the verge of nervous breakdown, divorce or violence... persons often approach an inward point of secret desperation. Some curse their lot bitterly, others pray earnestly for deliverance, while others seek escape in excitement, alcohol, or sedatives to tide them over until things may take a turn for the better.

Every person is a problem to himself if not to others. He may put up a bold front to make a good impression of stalwart invulnerability but from personal experience we know how the inner life differs from the outward appearance. Feelings of inadequacy, anxieties about what other people think of us, guilt and self-accusation for our mistakes, unwelcome memories, shameful impulses, wishes that attract and repel us, uncertainties and confusions, disgust and despair, plague us all too frequently. Conflicting tendencies and counterforces keep up incessant warfare within us, sapping our energies, blocking

Dues were set and the next meeting will be held in October.

**More Plans For Field Day At SCS Plant Materials Center Announced**

More plans for the field day at the Soil Conservation Service plant materials center at Knox City on September 30 were announced this week by Soil Conservation Service State Conservationist Clyde W. Graham.

Guided tours will be conducted through the 60-acre center which is located on FM 1292, 2 miles north and 2½ miles west of Knox City, Graham said.

Tours will run from 9:00 a. m. to 3:00 p. m. Sandwiches will be on sale by the Knox City FFA Chapter for those who wish to eat lunch at the center.

Grass seed growers, seed dealers, conservation district directors, research workers, sportsmen, and others interested in the search for better plants are invited to attend. The center serves both Texas

and Oklahoma.

Seed or rootstock from plants that show promise for solving specific soil and water conservation problems are collected, then grown and evaluated at the Knox City center. The more promising ones are then grown under field conditions on farms of soil and water conservation district cooperators under a wide variety of conditions. Selections that prove superior to other strains available are then released by conservation districts to commercial seed growers. These producers then grow and sell it to the public.

Some 675 strains of 164 different grasses, forbs, legumes and woody plants are being grown at Knox City. Grass strains proven and put into use by SCS include Selection 75 Kleingrass, El Reno, Uvalde, and Vaughn sidecoats grama; King Ranch bluestem; green sprangletop; and Grenville switchgrass.

SCS plant materials work also developed ways to profitably grow, harvest and plant most of the range grasses now being planted in Texas.

**A Storytelling Workshop Set September 11-12**

A Storytelling Workshop will be held at the Abilene Public Library September 11 and 12.

Miss Laurie Dudley, coordinator of children's services of the Dallas Public Library, will be workshop consultant.

"This is an opportunity for people in your community as volunteers who will join in promoting the storytelling program in your library," said Thelma Andrews, head of the Abilene library. "We have purposely made this a two-day workshop hoping that some will be able to participate both days, but the program is also being planned so that, if you can attend only one day, it will be profitable to you."

"The workshop would be of interest to many associated with organizations in the community, such as Sunday School and kindergarten teachers, and others who work with children, as well as parents and grandparents who enjoy reading to their offspring," Miss Andrews added.

There is no charge for the workshop but there will be a nominal fee for persons having lunch with the group.

### REINSTATE THE OLD MEANING

With the coming of Labor Day, the days of Fall are close behind, and youngsters have reached that "back-to-school day." Parents, for a fleeting moment, recall their own back-to-school days, which, in retrospect, have a far greater appeal than they did in reality. As the back-to-school trek has already begun, many will be struck with wonder at the wide gap that exists between the innocence of a first grader and the ugliness that back-to-school has come to mean at higher educational levels.

This year, there will be more questions than ever before concerning the quality and validity of the educational system. In addition to questions, chances are good that there will be far less permissiveness in the treatment of the minority of destroyers and disrupters on campuses. Higher education may be called upon to fulfill its role as a responsible citizen of the community.

The words "back-to-school" previously denoted a resumption of learning...a reopening of the doors of knowledge. Perhaps if more communities drew attention to the costs of campus disorder...the reopening of school would once again, resume its traditional meaning.

Mrs. Virgil Reynolds visited friends in Wichita Falls this weekend, and was accompanied to this city by Mrs. H. S. Wilson and Gilbert.

Something over thirty boys reported for football practice Monday afternoon. Not only is there quantity in numbers in this year's team, but there is perhaps as much weight as many college teams have. Size and numbers do not count for everything in football and it won't have to be depended on for a winning team this time. There should be power in the veteran team of this year. Eight letter men reported from last year's squad: Wallace Saunders, Rogers Gilstrap, John Clifton and Jo Smith are veteran line men and will be depended on as a nucleus for this year's line. A large number of boys are out to fill the other vacancies and form the reserves for the line. For the backfield there is the most promising material in several years. Four letter men are back from last year's team: Captain Bill Kimbrough looks better than ever and is expected to lead his team through undefeated. Rex Felker, Herman Pittman and Kenneth Sherman are the other backs reporting from last year's squad. New faces and bigger and better material for reserves is a feature of this year's squad. Coaches and townspeople await with anxiety the opening games so they may see in action a team boasting so much size, power and speed.

Mrs. O. P. Liles has recently returned from a month's vacation spent in San Diego, California, where she visited her son, Homer Liles and family in that city.

Miss Johnnye Morgan has returned to Fort Worth, where she is employed by the Lone Star Gas Co.

#### 60 YEARS AGO (September 3, 1910)

Miss Eula Poole returned on Monday evening from Austin, where she attended the University Summer Normal and was successful in securing a first grade certificate. She attended a teachers' meeting at Rule on Thursday, where she will teach this year.

Mrs. B. C. Duke and daughters, Katie and Louise, have returned from Calvert, Kentucky, where they have been visiting relatives and friends for the past three months.

Miss Julia Winn has returned from Dallas where she has been visiting relatives and friends.

Mr. Marshall Pierson, who has been spending the summer in Colorado, has returned home. Dr. M. M. Hart of Weibert was in the city Thursday night.

## Rochester News

By Melba Roberson

Fall is in the air and once again, football is King. The Rochester Steers traveled to Roby Friday and suffered a 36-0 defeat. The Steers have a lot of spirit and can show improvement as the season progresses. The incoming freshmen will add some depth to the determined squad. The head coach is Dickie Sloan and his assistant is Ronny Partain.

After a week of school, the regular schedule is becoming fairly routine. The freshmen feel more at home in high school, the first graders are delighted to be in 'school', and the kindergarten children are slowly learning to be quiet. The band students are marching each day and the 7th graders are a fine addition to the band. Spanish is a new high school subject this year and is taught by James Rollins, the Steer Band director.

#### Kay Newsom to Abilene Sat.

Mrs. Larry Denton and Mrs. Harvey Baker hosted a brunch Saturday at the Sands Motel for the West Texas Fair Sweetheart contestants. Attending from Rochester was Miss Kay Newsom, the Rochester FFA Sweetheart. Miss Newsom has been a cheerleader and is currently the Drum Major of the Steer Band. She is active in FFA and is on the Annual staff. We feel that Kay is an outstanding representative for Rochester.

By ETHEL PHEA

WHAT IT IS, HOW IT WORKS, WHAT IT MEANS TO YOU AND YOUR CITY: The Community Action Program unites public and private re-

sources in an all-out effort to make fruitful living possible for all Americans.

Our Community Action Program is more than a number of projects. It is a quality of spirit, a sharing of common purpose and hope. Mutual trust and respect between all parts of the community are needed to fulfill the promise of this undertaking.

The more you and all citizens join in by volunteering work, attending neighborhood and board meetings, and exchanging useful ideas and suggestions, the better Haskell CAP will be.

THE COMMUNITY ACTION PROGRAM SERVES: The community by improving the economic position of the poor, generally defined as those with a family income of less than \$3400 a year for four persons.

The Unemployed and Underemployed through War on Poverty programs to improve education and teach skills that will qualify participants for regular, better paying jobs.

## Herren, Savings Bonds Chairman, Says New Percent Bonus Real Boon

R. W. Herren, Haskell County Chairman for U. S. Savings Bonds, reports that the 1/2% bonus approved by President Nixon means that Savings Bond owners can realize 5 1/2% annual interest on their holdings.

"The bonus applies both to Bonds purchased on and after June 1, 1970 and those bought

before, and still outstanding. There'll be no need to redeem any Bonds to benefit from the new rate. Now, more than ever before, it pays to buy and hold onto your Bonds." The increase is a real boon," Herren said.

He noted that Bonds are "like good friends of the family to people in Haskell County. They are present at milestone occasions. You'll find them given at births and christenings. Through the Payroll Savings and Bond-A-Month Plans they're accumulated to help pay for events important in family life—educations, new homes and autos, weddings, vacations, and eventually, retirement. Bonds are a friend in need during unexpected family emergencies."

Herren also pointed out that Federal funds for protecting our environment, and for developing recreation areas are bolstered through the purchase of Savings Bonds.

"Savings Bonds are the best way most of us have to help our country, our neighbors and ourselves—all at the same time. The higher interest rate, by making Bonds an even more valuable part of our personal financial security, will encourage more people to buy Bonds or to increase their holdings."

"The rate increase should be a fine inducement to our Future Farmers, 4-H Clubbers and other young people who haven't yet begun to save for their futures with U. S. Savings Bonds," Herren said.
