## City Plans Airport Dedication

SUPPORTERS OF DOLPH BRISCOE: A busload of supporters for the Briscoe campaign was met by local people here last week, including Dr. and Mrs. T. W. Williams, and Mrs. Elbert Johnson, right. The campaigners stayed in town only a short time on their statewide tour.

Haskell Mayor and City Councilmen waded through a lengthy session at their regular meeting Tuesday night, when new officials were sworn in, and councilmen were appointed their jobs.

Buster Gholson was elected mayor pro-tem, and Carl Anderson was appointed water superintendent; Loraine Johnson, sewer and garbage; Bill Holden, street commissioner; Buster Gholson, parks commissioner; and Jimmy Browning, Fire, Police and Airport commissioner.

A large delegation of Little League supporters, with Gene Long as their spokesman, met with the Council to tell of their need for help in lighting the Little League field. The Council agreed to assist them with the lighting.

Councilmen also agreed to let Louis Wilson tear down the W. E. Scheets old house for the lumber that is in it; and agreed to sell Johnnie Adkins the Rosalie Briscoe lots 11 and 12, block 6, in Highland, and give him a quit-claim deed. Buster Gholson, parks commissioner, was assigned to work with Dr. T. W. Williams in killing out the cat-tails and other weeds in the creek going through the park.

In other business, the Council reviewed the running of gutter curb and steps on the West side of the square, where the sidewalks are being cut back, and agreed to buy a fogging machine.

Another delegation, consisting of H. O. Abbott, representing the Flying Club, and Doyle

High, representing the Chamber of Commerce Airport committee, met with the Council to plan formal dedication ceremonies of the new City Airport. A tentative date for the event was set at July 15, with an alternate 'rain date' of July 22.

A tentative schedule of events also was presented to the Council, with a fly-in breakfast, amateur contests, aerial contests for amateurs, parachute drop teams, stunt flyers, and antique and confederate plane displays. A giant barbeque dinner is also proposed, and trophies to be given in some of the flying events, and to the first woman who flies in, to the first man, and to the person flying the farthest to attend.

Haskell Flying Club, Jaycees and Chamber of Commerce have all agreed to help defray expenses for the day, and publisher Bill Comedy agreed to donate the publicity leaflets for the event, and furnish areawide publicity, as plans are solidified.

Congressman Omar Burleson has written two of the best columns to come out of Washington, D. C., to my way of thinking, in the past few weeks. They were both printed in the Haskell Free Press.

One—on the United Postal Service—discussed the fact that although they insist that postal rates must be increased to get more efficiency into deliveries, they tell of plans the Postal Service has to become "Sort of like shopping centers, dispensing goods and services for those who want to pay for it", to quote from his column. Control of the Post Office Department has been taken out of the hands of government, and Burleson ended his column by saying, "One must wonder if marriage and divorce may eventually be offered over the postal counter."

The other column discussed a bill that passed the House after only three days of debate, with a price tag of \$24.6 billion for the Environmental Protection Agency, which already has over \$2 billion appropriated to it, and estimates indicate that the cost will soar to \$35 billion before the provisions are fully implemented.

Both Congressman Burleson, and Congressman George Mahon, Chairman of the Appropriations Committee, agree that legislators who claim fiscal responsibility can protect their credibility only by opposing procedures such as this.

With cries of 'preserve our environment', 'water pollution' and 'air pollution' ringing in their ears, our legislature stam- peded, and passed a bill with the vote of 380 for to 14 against that added billions to the already inconceivable deficit of the federal budget. And the Environmental Protection Agency already has over \$2 billion appropriated to it before this bill was passed, but it has yet to really get off the ground.

But you can rest assured that it will—on taxpayer money that could be better spent in an effort to defray the \$22 billion interest on the public debt, in our opinion!

And, what will the \$98 million government subsidy to the Postal Service be spent on? To set up 'extra services' such as selling passports, printing, automobile tags, and print the 'roque's gallery' in full color and blow them up to huge proportions? They're considering all these things, and already are doing some of them, while mail deliveries continue to slow down.

So... before going to the polls, we suggest you review those campaign speeches and that correspondence carefully.

How about voting for the man who promises to SAVE the taxpayer money — not dream up other ways of spending it?

## Little League-It's Great For Boys

(Editor's Note: This is the second of a series of questions and answers published to inform the general public about Little League, and The Haskell Little League's efforts to get new lights for their field.)

Question: Why does Haskell Little League need \$2,500?

Answer: The field needs new lights—the old ones are just worn out.

Question: Couldn't you borrow the money, and pay it back?

Answer: Would you loan money to an organization that changes personnel every year; depends on contributions just to operate; and doesn't try to expand or make a profit?

Question: How long will these new lights last, with proper care?

Answer: Of course this can only be answered assuming no disaster strikes such as a tornado or ice storm—but aside from disaster, they should last 20 to 30 years with normal maintenance. These will be

## April 16-22 Is National Library Week, Proclaims Gov. Preston Smith

"Reading Makes the World Go Round."

That's what Texas librarians will be saying April 16 through 22 when they take part in this year's observance of National Library Week.

Libraries of all kinds are observing the week that calls special attention to libraries as sources of information and recreation. In addition to the state's 380 public libraries, there are also more than 70 college and university libraries as well as libraries in nearly all of the 1,200 school districts.

In his proclamation Governor Preston Smith pointed out that "through organization into systems, libraries look forward to sharing of resources in order to equalize the opportunity for all citizens to have access to the best services."

Since January, ten library systems have been organized under the Texas Library Systems Act passed by the legislature in 1969. The legislation permits public libraries that reach specified levels of local support to enter into agreements with one another and to receive State funds when they are appropriated to carry out cooperative activities.

"The Library Systems Act and the cooperative activities it provides can have a significant impact on library service for all Texans," said Dr. Norman H. Winfrey, director of the Texas State Library, the state agency that administers the legislation. "Although all system members are public libraries, the cooperative programs developed by the systems may also include other kinds of libraries."

## Progressive Study Club Tours WTU's Paint Creek Power Plant

"That's a pretty nice little ole plant you got here," remarked Joe Williams following a tour of the multi-million dollar West Texas Utilities Company power plant at Paint Creek near Haskell. Joe Williams was one of 20 husbands who were special guests of the Progressive Study Club last Thursday night as it met to explore "Progress-in our town."

The 40-member tour party was welcomed at the lake-side power plant by superintendent C. O. Holt and Mrs. Holt. Home-cooked barbecue on buns were served by Mr. and Mrs. Kenneth Lane and Mr. and Mrs. Buck Everett. WTU provided

cold drinks. Mrs. R. C. Couch, Jr. welcomed the club's special guests, and Mrs. Howard Perry, Jr. was program director.

Wayne Peiser and Bobby Poole, operations and plant engineers, assisted Supt. Holt in a briefing on the vital statistics of the four-generator kilowatt-giant. The average monthly natural gas bill is \$150,000; in August of '68 this budget item reached an all-time high of \$200,000. Electric energy consumption increases consistently, Mr. Holt said, and with the operation of the newly completed 105,000 KW, 105 feet high generator, this record is expected to be broken in 1972. 39 people work at the plant, earning an average of \$23,000 a month. That's some "little ole plant" indeed, and mighty progress.

Mrs. Rose Ed and introduced Mrs. Temple Falls.

She spoke to "Man's Religion" to fulfill the teacher's program "Change."

She began a question, "Are you a problem, or the solution to the problem today?"

She spoke of man's existence, said, "man will and God's will and pets bring us for man. He is not a pet world, and he of himself. He has no purpose. This awareness, despair, and she mentions that make up the picture of human nature, society, God, and she developed a standable belief."

The meeting was the annual and the hostess refreshments.

Another sign has been put up on one of our rural roads south of Sagerton and it has been named "Moorewood Trail." The name came from the store that was located about where the gate to the D. W. Counts place is now. It was built about the turn of the century by a Mr.

Wood, and it was thought that the town would spring up there until the railroads were built and Sagerton was built where they crossed. The Moore came from an early Dr. Moore, who was also here at that time.

Mrs. W. E. Johnson of Haskell is, I'm sure she'd tell you, luckier than most people. Why? Because, if it's fun to be a grandmother, and she vows it is, then she has sixty-one reasons to be happy. Yes, she has that many grandchildren, great grandchildren, and great-great grandchildren.

She and her husband had nine children, and now she enjoys having 22 grandchildren, 29 great grandchildren, and 10 great-great grandchildren.

Last weekend, a daughter, Mrs. Mancel Henson, and Mrs. Henson's daughter-in-law, Mrs. Adrian Henson, both of Brownfield, visited with Mrs. Johnson, and brought six of her grandchildren to see her. They were Jeanine, Adri Ann and Nona Sue Henson of Brownfield, daughters of Mrs. Adrian Henson; and Teresa, Melissa and Jill Henson, daughters of Leon Henson of Brownfield.

**Clothes Storage Is Club Program**

The Storage of Seasonal Clothes and Spring Cleaning was the title of the program given Weinert Home Demonstration Club at their regular meeting Wednesday, April 5.

After a short business meeting, Mrs. Elliott gave the basic to the cleaning and storage of clothing. She urged homemakers to take out all clothes, clean, wash or air them, clean closets, floors and walls, then treat closets with Chlordane or moth crystals before storage of clean garments. Tricks to good storage were brought out, such as the folding of some; the hanging of some; and putting tissue in the folds, and rolling belts in cylinders to insure proper storage.

The meeting was attended by four members.

**Evans HD Club Gives Guest A Shower At Meeting**

The Evans Home Demonstration Club met April 6 in their regular meeting. Mrs. Georgia Wade, president, called the meeting to order and welcomed one visitor, Mrs. Lovie Whitaker.

Eight members were present to answer roll call by, "What my closet tells me." Minutes were read and approved and committee reports were given.

The club then gave Mrs. Whitaker a shower. She lost her home several months ago in a fire.

A program on "Storage of Seasonal Clothes" will be given April 25 at 1:30 at the CAP Center by the HD Agent, Mrs. Barbara Elliott.

The bazaar, given by the club in March, was very successful and all members express their thanks to everyone for their patronage. The club raised \$31.

Mrs. Ethel Phea, hostess for the day, served refreshments after the meeting was adjourned.

## R-PEP Sessions For Cotton

With their 1972 planting in mind, cotton growers will be in meetings this month throughout the Rolling Plains.

Three production meetings, all aimed at increasing net profit from cotton, are scheduled as follows:

April 19, in High School Auditorium at Stamford; April 20 in City Auditorium at Childress, and April 25, in Nolan County Coliseum Annex at Sweetwater.

Sponsored by the Rolling Plains Cotton Growers, Inc. and the Rolling Plains Economic Program (R-PEP), all the meetings begin at 1:15 p. m. and end at 4:30.

The advantages of narrow-row cotton production in the Rolling Plains? These, as well as the boll weevil diapause program and other methods of controlling other cotton insects, the value of planting quality seed, a new method of handling seed cotton, and the forward contracting of cotton, will be discussed by specialists whose knowledge is recognized throughout the Cotton Belt.

The R-PEP Task Force for Cotton has scheduled the following speakers at the three meetings: Texas Agricultural Experiment Station cotton breeder Dr. Levon L. Ray, and Texas Agricultural Extension Service agronomist Dr. Robert B. Metzger, economist Marvin O. Cartin and entomologist Emory P. Boring III.

Emcee of the sessions will be Herman A. Propst, president of the Rolling Plains Cotton Growers, Inc., and of the R-PEP Task Force for Cotton.

## Requirements Set For SS Benefits

"Persons who become disabled in 1972 may need more than 5 years of work credit under social security to qualify for disability benefits," R. K. Tuley, Jr., manager of the Haskell social security office announced today.

Tuley explained that anyone who becomes disabled in 1972 and was born before 1930 will have to meet two work requirements. First, as before 1972, most persons must have 20 quarters of coverage during the 40 quarter (or 10 year) period ending when that person becomes disabled. Secondly, and for the first time he must also be fully insured. According to Tuley, this means the person will need a total of at least 21 quarters. "What this means is that in addition to having 20 quarters in the 10 years just before the disability onset a person will also need one more quarter which can be at any time since social security began in 1937," Tuley stressed.

Tuley emphasized that this requirement applied only to people born before 1930 who became disabled in 1972.

"Persons born in 1930 or later will need to have only the 20 quarters during the 10 years before the disability began, or if young enough, even fewer credits than this," Tuley added.

"If a person has enough quarters and is unable to work because of a condition that will last at least one year, he can be paid monthly social security benefits for as long as he is disabled," Tuley said that anyone who has questions about disability benefits should contact their nearest social security office. The Haskell office is located at Amex, City Hall, 305 N. 1st, and is open at 10:00 on Thursdays.

**MARTIN RANDAL.**  
Martin Randal has been named Indian of the Week for his efforts in track this season. Randal placed 4th in the Brady relays in the mile run with 4:54.7 to help the Indians gain 4th place in that meet. Randal also tied for first in the mile run in the Rotan meet with a time of 4:54.7; and ran it in 4:54.7 to place 4th in the Ball-

inger meet. He placed 5th in Brownwood meet's mile relay with a time of 4:57. A new feather in the bonnet for Martin Randal!

Congressman Omar Burleson has formally announced his candidacy for re-election to Congress, subject to the Democratic Primary on May 6 and the General Election in November. The 17th Congressional District, which he represents, is composed of 31 Counties, covering approximately 30,000 square miles. Within this area live about 468,000 people.

Burleson says, "During my tenure of office I have followed two guiding principles: First, to know the views of my constituents and reflect their sentiments to the greatest degree possible in my actions in the Halls of Congress. Second, to inform and advise as closely as I can on those issues which affect our District, our State and our Nation."

Burleson termed his approach to Government as one of "common sense," gained through the years of public service. "I have tried to see that the people's tax money is spent wisely and as judiciously as you would have spent it had you been in my place," he said.

"The record will show that a greater part of the time I have found my self in the minority in opposing the vast spending

"The Federal Government does have specific missions," he said. He gave as examples the conservation of our natural resources, the defense of the Country and its general welfare.

"At the same time," he said, "the Federal Government can not and should not try to take care of everything from Washington. The Federal Government has grown to colossal proportions and centralized power in Washington has increased," Burleson pointed out. "To this, I am opposed and my record is clear in this respect."

Burleson is among the senior members of the U. S. House of Representatives in point of service. He was elected to the 80th Congress from the 17th District and has been re-elected to each succeeding Congress. He is a member of the Ways and Means Committee, considered to be the most powerful and prestigious in the Congress.

Burleson is a former County Attorney and County Judge of Jones County. He was appointed an FBI Agent, and served in a number of assignments over the U. S. He resigned from the FBI to join the Navy in World War II, and saw duty in both the Atlantic and the Pacific.

Burleson ended his formal announcement by saying, "Although not having opposition in this year's election, it is my hope to visit my constituency as opportunity affords. The Congress being in session at this time and expected to be long after the Primary Election, there will be little time to leave duties in Washington. I expect, however, to get back home at short intervals to do the best I can in seeing my friends and to make new ones. I believe it is incumbent upon a Congressman to know people and that they know him, to have the best representation. This is fundamental to our system."

### Haskell Community Action Program Begins New Year, Progress Noted

The Haskell Community Action Program begins its '67 year of operation on May 1.

Organized in Haskell Nov. 30, 1968 with Felipe Arredondo as chairman, the CAP was set up to deal with the problems the poor face because of lack of organization of the neighborhoods into action groups. There has been a turnover of staff workers. Mrs. Mildred Robertson, coordinator for Haskell CAP, and Ethel Phea, Community Developer (aide) remain. Mrs. Augustina Rodela is now with the Mental Health and Retardation Center as a handicraft specialist, working with pre-schoolers and others with various handicaps.

The Community Developer serves as an outreach to the people in the target areas for the purpose of organizing them to determine their anti-poverty needs. The people of the target areas have been informed about programs and services available to them in the Community through which they may find solutions to the problems of sub-standard housing, which is very necessary. Most of the houses in the target areas 1 and 2 are far below standard.

Through the neighborhood clinic and family planning services, inadequate health care has improved. Improvement has been made in low levels of education, unemployment and under employment, etc.

Through CAP, services are given free. Tax income clinic is the first Saturday of each month; adult education classes closed April 6 with three passing their GED tests. Drivers education lessons were instructed by Felipe Arredondo and Pete Amaro and will resume as soon as materials are available.

## Farmers Praised For Increase In Productivity

Agricultural producers should be praised—not blamed—in the current controversy over food prices, Marvin Plemister of Weinert, president of the Haskell County Farm Bureau, said.

"Productivity in agriculture has been increasing about twice as fast as in industry," the local farm leader said. "This amazing efficiency is basic to our high standard of living."

President Plemister said that if consumers paid the same proportion of their take home pay for food today as was the case 20 years ago, the food bill for American consumers would

be about \$50 billion more per year than is actually the case.

"The farmers and ranchers are proud of the fact that, partly as a result of their record performance, the American consumer today has to spend only about 16 percent of his after-tax dollars for food, the smallest proportion of income ever achieved here or anywhere in the world," the local Farm Bureau president said.

President Plemister said that cattle prices are now about what they were 20 years ago, and that farm prices in general have risen only about seven

percent in that period. He pointed out that money paid to wage earners has increased 340 percent and that business and professional income is up 200 percent over that same period.

"The American farmer has been the best hedge against inflation the American consumer has," the Farm leader asserted.

He pointed out that only by increasing both his investment and his efficiency has the farmer been able to stay in business.

## June 1 Deadline For Transfer

AUSTIN — Parents who wish to transfer children from their home school to a nearby district for the 1972-73 academic year must submit their requests to the receiving school district by June 1, 1972, according to an announcement from the Texas Education Agency.

Once approved by the receiving school board of trustees, the request must then be cleared by the Texas Education

Agency. This state approval is a requirement of the order issued by the U. S. District Court in Tyler.

The order, related to the desegregation of schools in Texas, states in part that the Texas Education Agency "shall not permit, make arrangements for or give support of any kind of student transfers, between school districts, when the cumulative effect in either the sending or receiving school or school districts will be to reduce or impede desegregation, or to reinforce, renew, or encourage the continuation of acts and practices resulting in discrim-

inatory treatment of students on the grounds of race, color, or national origin."

Only hardship cases will be considered for transfer approval after June 1, according to Leon R. Graham, Texas Education Agency assistant commissioner for administration. Any late application must state specifically the exact nature of the hardship and why the application was not filed with the receiving school by the June 1 deadline.

"We expect to approve few late transfer requests and those must definitely be hardship cases," Graham added.
