PROPOSITION NO. 1 ON THE BALLOT

House Joint Resolution

91 proposes a constitution-

al amendment which re-

quires a county with a pop-

ulation of 30,000 or more to be divided into not less than four nor more than eight justice of the peace precincts. A county with a population of 18,000 or more but less than than 30,000 shall be divided into not less than two nor more than five justice of the peace precincts. A county with a population of less than 18,000 shall be designated as a single justice of the peace precinct or, upon a finding of necessity by the commissioners court, shall be divided into more than one justice of the peace precinct but not more than four. The amendment provides further, that in any precinct in which there is a city with a population of-18,000 or more, two justices of the peace shall be elected. The amendment allows a justice of the peace, constable or commissioner to continue in office until the expiration of his term, although a change in precinct boundaries results in the officer no longer being a resident of the precinct for which he was elected or appointed and allows a justice of the peace or constable to continue in office until the expiration of his term even though a change in precinct boundaries results in the abolishment of the precinct or more than one justice of the peace or constable serving the precinct. Vacancies in the office of justice of the peace or constable that result from a precinct boundary change shall be filled by the commissioners court until the next general election. The amendment would take effect on January 1, 1984, and counties with populations of less than 30,000 and with more than four justice of the peace and constable precincts would have until January 1, 1987 to comply with the amendment.

One yardstick used to measure the nation's growth and health is called the Gross National Product, or GNP. The GNP is the combination of all the goods and services, plus government expenditures, and is computed on a quarterly basis.

At the end of 1975, the GNP stood at nearly 1.5 trillion dollars. While there have been some quarter to quarter declines in the GNP. particulary in periods during the past 18 months, it has shown a steady growth pattern, indicating a basically healthy economy.

You may not realize it but the GNP affects our daily lives. If our GNP drops off sharply, this will lead to unemployment. If the GNP expands too rapidly, this can lead to inflation, and inflation to higher prices. So, you see, the entire growth pattern of the country affects you also.

We want you to know more about our business!!!
