

All Around the Town
by Mary Ann Sarchet

There will be a meeting of the Dallas Cowboy Booster Club Tuesday, May 2, at the City Hall in Silverton.

Purpose of this meeting is to discuss chartering a bus to attend two Dallas Cowboy football games. One game will be with St. Louis on September 24, and the other will be with Washington on November 23 (Thanksgiving Day).

The charter company has indicated that they would take the group to Dallas on Saturday, September 23, take them to a dinner theater Saturday night, put them up in double occupancy motel rooms Saturday night and take them to the game on Sunday afternoon for about \$60.00 per person. The group would return home as soon as the game was over Sunday and would arrive back in Silverton about midnight or 1:00 a.m.

Less plans have been discussed for the Thanksgiving Day game. If you would be interested in one or both of these games, please come to the meeting Tuesday night.

The Silverton Volunteer Ambulance Service receives many unusual requests, but one of the most unusual came Tuesday morning. Northwest Texas Hospital in Amarillo called to request the loan of a Stokes basket. This is a piece of equipment normally used for jobs like removing injured people from canyons and other rough terrain. In the case of the Northwest request, they had a patient to be transferred to Houston who needed to be moved in a Stokes basket and they couldn't locate one in Amarillo.

How to get it to Amarillo in time for the transfer was the big problem.

When Joe Batson of Amarillo flew in by helicopter that morning with Mrs. John Hill of Austin and her group who were here on behalf of John Hill's candidacy for the democratic nomination for governor, Batson said he would see that the Stokes basket got to the hospital. So when the helicopter flew out of Silverton, it was with the Silverton Volunteer Ambulance Service's Stokes basket securely fastened to its underside.

You see, it takes a lot of dedicated people to handle all the emergencies that arise in the Panhandle EMS system.

Values Of Farmland Emphasized During Soil Stewardship Week

Some five million acres of rural land are lost to non-agricultural use each year in the United States. This is a special concern during this year's celebration of Soil Stewardship Week, April 30 - May 7, notes Earnest Kiker, county agent with the Texas Agricultural Extension Service.

Theme of this year's Soil Stewardship Week, "Compelling Ven-

Mrs. Cleora Watson Buried Last Week

Funeral services for Mrs. Cleora Lee Watson, 75, of 4067 Rose Drive in Amarillo, were conducted at 3:00 p.m. last Thursday in the Pleasant Valley United Methodist Church. Officiating were the Rev. James Futch, pastor, assisted by the Rev. Norman D. Nettleton, pastor of the Vine United Methodist Church in Hoisington, Kansas.

Burial was in Memorial Park Cemetery by Boxwell Brothers Funeral Directors.

Mrs. Watson died Tuesday in an Amarillo hospital where she had undergone surgery twice in recent weeks.

Daughter of the late Mr. and Mrs. S. R. Turner, Mrs. Watson was born in Grayson County in 1902. She married O'Neal Watson in 1953 in Tullia. She had lived in Amarillo for the past forty years. She was secretary-treasurer of the West Texas Barber College, Inc., a member of the Pleasant Valley United Methodist Church and a member of the United Commercial Travelers.

She is survived by her husband; a son, James Watson; a daughter, Mrs. Troyce Mitchell of Melrose, New Mexico; two brothers, Amos Turner of Belen, New Mexico and Orville Turner of Silverton; a sis-

ter, Mrs. Elmer Gilkeyson of Dallas; and six grandchildren.

tures," also stresses the importance of controlling water pollution caused by run-off from unprotected farms, ranches, roadsides and construction sites.

Soil Stewardship Week is a nationwide observance which emphasizes man's responsibility to protect and conserve soil, water and other natural resources. Traditionally, churches and local citizen's groups participate.

Nearly 3,000 conservation districts throughout the U. S. will focus their attention upon conserving and preserving America's best farmlands during this 21st annual observance of Soil Stewardship Week. The U. S. Department of Agriculture estimates that of the five million acres annually lost to agriculture, nearly one million are classed as "prime" land—the best and most productive land we have. These top-quality farmlands should be preserved for farming rather than their indiscriminate use for housing developments, highways, shopping centers and the like.

America's good farmland is one of our greatest gifts, emphasizes Kiker. It should be conserved through proper care of soil and water and preserved for the production of food and fiber so vital to the well-being of all Americans.

Our challenge is to make wiser, better and more responsible use of the lands our Creator has given us. We must respond to God's call to be responsible stewards of the bountiful land He has made for us, Kiker added.

Free Brucellosis Program Launched

Texas cattlemen may now have their heifer calves vaccinated with Strain-19 brucellosis vaccine free of charge, points out Earnest Kiker, county agent with the Texas Agricultural Extension Service.

The vaccination program is voluntary and will be conducted through participating, accredited veterinarians. These veterinarians will be able to obtain the brucellosis vaccine free and will be reimbursed for their services from state and federal funds on completing a vaccination chart.

Only eligible female calves will be vaccinated and will be identified by an ear tag and tattoo. Female calves of dairy breeds from two through six months of age and beef breeds two through ten months are considered eligible.

According to Kiker, all the cattlemen has to do is call his local veterinarian and schedule a time for the vaccination. Of course, the calves should be confined. This new vaccination program does not include vaccinating calves at livestock markets.

There are several benefits from the vaccination program, including these:

1. Properly immunized heifers will be more resistant to the organism causing brucellosis.

2. Officially vaccinated calves should sell for higher prices if purchased for replacements.

3. The more animals that are vaccinated, the quicker the spread of brucellosis can be controlled, thereby minimizing the threat of quarantine.

To reimburse participating veterinarians, some \$450,000 of state and federal monies has been made available for this vaccination program for fiscal year 1978, and additional funds are expected for the fiscal year beginning September 1. Due to the limited funds, interested producers should contact their veterinarians early, adds Kiker.

DOOR OPENERS

Keys and churches are door openers. In both cases, each require you to put forth some effort. The key you must insert in the lock and turn. Our Lord made the way to heaven even easier, for all that you have to do is present yourself and believe.

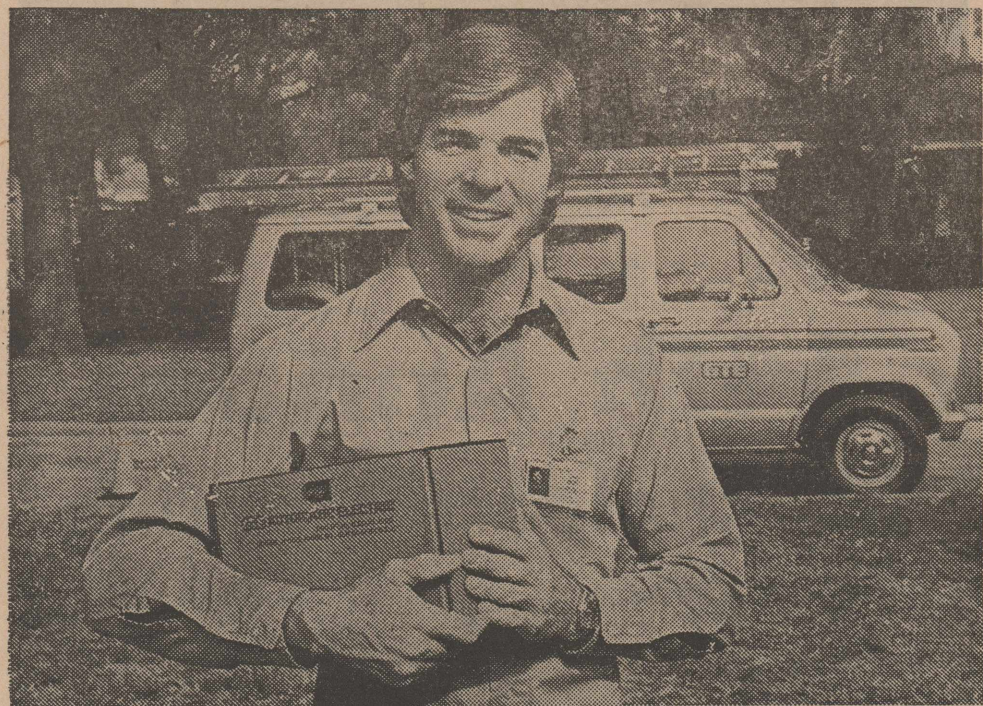

"For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: Not of works lest any man should boast: For we are his workmanship, created in Christ Jesus unto good works, which God hath before ordained that we should walk in them."

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Shows Are Half The Fun At Six Flags Over Texas

Six Flags Over Texas is much more than rides. In fact, many of the park's visitors enjoy a full day of fun without ever dropping from a parachute on the Texas Chute Out or roaring through the two vertical loops on the Shock Wave roller coaster.

Park guests can spend more than five hours just watching the entertainment center's shows. No matter where they may be in the park, visitors are never far from one of the eleven shows.

The variety of entertainment includes puppets, trained animals and some of the most talented young people in America.

The most popular and spectacular of these productions is the musical revue staged in the Southern Palace.

This year's show combines flashy costumes, spectacular stage sets and exciting song and dance to portray the devil-may-care lifestyle of the "Roaring '20s."

Another excellent live performance can be seen just around the corner from the Southern Palace. The Crazy Horse Saloon show, in the Texas section, offers a different type of musical.

Old West dance hall days are relived at the Crazy Horse as three

couples sing and dance to songs like "Hobo Man" and "You're Never Fully Dressed Without a Smile."

Audience members may find themselves part of the show. Pretty girls sing heart-felt solos to individuals in the crowd. Others are called on-stage to help with the shows. And the entire audience joins in such songs as "Those Were the Days."

Singing and dancing is only part of the entertainment at Six Flags. "Kids" of all ages enjoy the puppet shows scattered throughout the theme park.

The Good Time Theater houses a "People, Puppet and Picture" show where guests may "travel around the world" without leaving the Arlington park.

The 1978 show, "Merry Music Go-Round," features music and entertainers from around the globe. The audience can see and hear a puppet Louis Armstrong sing and play "Hello Dolly." Maurice Chevalier sings "Thank Heaven for Little Girls."

One of the nation's most unusual puppet shows is presented on Skull Island. Captain LaFet's Flagship Follies is staged aboard a 30-foot replica of a 16th Century pirate ship.

Antics on the ship include an attack by a giant squid, a near shipwreck and King Tut dancing to "Stayin' Alive."

One puppet in the theme park stars in his own show. Argyle, who claims to be the world's funniest snake, is a hand puppet who

entertains people by making fun of them.

Lounging on a circus wagon stage, Argyle is totally dependent on audience participation. His sarcastic quips to geists have made him a park favorite.

Live entertainment can be found almost everywhere in the park, and this year it can even be found in a ride queue house. Those brave enough to ride the new Shock Wave roller coaster, can see a clown act while waiting in line.

Checkers and Patches will present a magic show, juggling act, performing dogs and puppet shows from a circus wagon located outside the Shock Wave queue house.

The two clowns will also wander through the park entertaining guests.

Two acts help visitors relive Texas history. The gunfighters and Confederate drill team bring past events to life.

Each day, the good guys and bad guys settle their differences in front of the courthouse in the Texas section. Different shows are staged hourly during the day, but in every act, the good guys win.

Civil War days return as thirteen rifle-bearing "soldiers" march down the streets of the Confederate section. The marchers, alias the University of Texas at Arlington Sam Houston Rifles, perform precision military drill several times a day.

Passers-by in Good Time Square have the chance to hear some of their favorite tunes played by the Six Flags Firetruck Five band. The Dixieland group performs atop a restored 1925 American LaFrance pumper firetruck.

Spectators at the Dolphin Show watch trained dolphins and a sea lion display unusual intelligence as they perform. At the trainer's command they jump high in the air, compete in a basketball game and dive through a fiery hoop.

Not far from the Dolphin Show is the Chevy Show where viewers can become part of the action while watching an ultra-wide-screen motion picture. Spectators experience the stomach-turning sensations of piloting a stunt plane, driving a sports car at top speed and riding a roller coaster, without ever leaving their theater seats.

One of the most popular attractions at Six Flags is the Music Mill Theater which hosts approximately 50 of the nation's top entertainers each year. A variety of shows, including comedy, magic, rock 'n roll and country music satisfy all tastes in entertainment.

Past performers have included such names as Crystal Gayle, K. C. and the Sunshine Band, Seals and Croft, and Charlie Rich. Another exciting year of concerts is scheduled for the 1978 season.

The park's general manager Dan Howells commented, "A visit to Six Flags Over Texas just isn't complete unless you see the shows. We've had guests who've been coming here for years without venturing into a theater. When they finally do, they discover the 'other half' of Six Flags."

H. A. Cagles Honeyymoon In Opryland at Nashville

H. A. Cagle of Silverton and Mrs. Josie Johnston of Quitaque were married March 17 and spent that weekend in Santa Fe, New Mexico. They drove to Amarillo April 14 to accompany a tour to Nashville, Tennessee on a delayed honeymoon trip.

On their arrival in Nashville, they toured Opryland, attended the Grand Ole Opry, and enjoyed a steak dinner at the best inn in Nashville that evening.

Saturday they toured Nashville, seeing the beautiful homes of the stars. Sunday they went through the Wax Museum and the Hall of Fame. They report this was the highlight of their trip but that they saw many other things of interest.

They returned to Amarillo Sunday evening about seven o'clock. Mr. and Mrs. Cagle are making their home in Quitaque, where she is tax assessor-collector for the Valley School. Mr. Cagle drives to Silverton every day to operate his auto parts store.

IT'S A FACT

Ecology is benefiting from Air Force research and development projects: Rocket propulsion technology has fostered the charged-droplet scrubber which may one day eliminate solid air pollutants from industrial smokestacks. Positively charged water droplets trap pollutants as they fly upward in the stack, and wash them down the negatively charged walls into a drain.

This is how FOSTER WHALEY and his wife, Lois, farmed over 1,800 acres of farm and ranch land last year by themselves.

"FOSTER WHALEY used this 16 hour day and conservative approach to be recognized as one of the top ten county agricultural agents in the nation in 1967. I knew him when he started from scratch in 1949. He has been the prime mover in the development of our two most important products in Northwest Texas. These two being our youth and our agriculture. He is an achiever in community affairs. He has the experience and background to give us the kind of legislator this area needs," So says Leo Forrest, retired Manager of the Deaf Smith Electric Cooperative, Inc.

Foster and Lois have leased out much of their farming interests; so they can devote the necessary time to the duties of State Representative.

FOSTER WHALEY will use this 16 hour day and conservative approach to become one of Texas' best legislators in representing this District.

GEOGRAPHY TODAY

Modern geography is not all the study of maps and memorization of capitals that old-timers remember from grade-school days, says the chairman of The University of Texas Geography Department.

Dr. George Hoffman says geographers today are addressing such pressing concerns as energy, urban decay, transportation and environmental problems.

And, he adds a happy note: because the role of geographers has become so important, not one professional geographer with a Ph.D. behind his name is unemployed in the U.S. today.

Why Should Dolph Briscoe Be Governor for 10 Years?

There is no good reason!

No other Texas Governor has ever asked for 10 years, much less been elected for 10 years. Dolph Briscoe's record does not merit 10 years in office:

- ★ Yet Briscoe has spent more than \$2 million in this campaign — including \$900,000 his supporters borrowed from 13 banks — to get 10 years in office.
- ★ Property taxes have increased by 1 BILLION DOLLARS since Briscoe was elected; so far, he has done nothing to provide property tax relief.
- ★ Welfare costs have more than doubled under Briscoe, without a fair increase in benefits for those people who really deserve them. The reason is waste. The worst example is Briscoe's own Office of Migrant Affairs, which spends \$8,000 for each person it helps find a new job.
- ★ Utility rates have skyrocketed while Briscoe has been governor, without a single sign of concern by the Governor.

Elect a New Governor

Endorsing John Hill, the Kilgore News Herald said:

"He fought Southwestern Bell all the way to the Supreme Court to stop an unfair rate increase. He appears to have beat the Howard Hughes empire over millions in inheritance taxes. And he cleaned up Duval County."

Endorsing John Hill, Fort Worth Star-Telegram said:

"In two terms as state attorney general, Hill has shown himself to be energetic, articulate and assertive. He can make firm decisions and work persuasively to see them carried out. As governor, he would be an active, accessible chief executive projecting a strong leadership image."

Endorsing John Hill, the Dallas Times-Herald said:

"John Hill has been an outstanding attorney general. He has made impressive progress in making the office what he has always said it should be—the people's law office."

FOR ATTORNEY GENERAL

Texans can't afford to pay any more for energy...

More and more of our electric companies have been forced to sign long term contracts with coal suppliers in Wyoming and Montana.... Now those states want to levy a 30% excise tax on the coal. Mark White believes you should have someone in state government who makes it their business to see that this doesn't happen. As Attorney General he will go to court in your behalf to stop this and other consumer rip-offs. We need an Attorney General who means business.

What Think Ye?

What can be as startling, as disarming, as an unexpected kindness? Amidst the "dog eat dog" madness of this present time, in which everyone seems to be on the defensive, it is no wonder that an unexpected kindness has a jolting

effect. No wonder that by a mere kindness one can "heap coals of fire on the head" of one who expects to be jabbed, or rebuked, or ridiculed.

A heart free from malice toward anyone is a heart free to experience joy beyond measure and a peace that passeth understanding. Kindness is not dependent upon intelligence or position in life nor must it be limited to persons who themselves have been treated kindly. Rather, kindness, compassion, gentleness can be displayed by any person who will determine that he will not injure, that

he will forgive, that he will love. The results can be as startling and beautiful to the kind person as to the one with whom he deals.

Have you been disarmed lately? The horse of a good man strayed into the yard of his neighbor, who took it and put it into the public pound and said to his neighbor, "If I catch it in my yard again I'll do it again." The good man replied, "A week ago I caught your cattle in my field. I drove them home and put them in your pen. If they are in my field again, I will do it again." It struck the man so that he went and took the

Farmers Union Decries Farm Bill Defeat

The Texas Farmers Union is adding its disgust and dismay to the defeat of emergency farm legislation at the hands of the Congress and the Administration. TFU President Jay Naman says the demise "forbodes the continuation of economic instability in agriculture and a roller coaster of farm prices . . . (which are) neither good for farmers nor consumers."

Naman goes on to proclaim the obvious that "farmers are angry at the unresponsiveness of government" and that "their anger will have serious political implications during the elections this year."

While holding nothing back in the condemnation of the Administration's direct attack on the bill and the resounding defeat by the House of Representatives, the state farm leader points optimistically to the lessons gained by farmers and the nominal relief from the USDA brought on through the protest. He specifically points to farm program changes which are expected to add an additional \$625 million in the feed grains producers' pockets, more liberal terms on grazing set-aside acres and increased incentives for cutbacks in wheat and cotton. He urged farmers to comply with the farm program.

Beyond program changes, Naman says "farmers have learned a great deal during their efforts . . . who their political friends are and who their farm organization friends are . . . (and) that they are contributing funds and giving membership support to organizations that are working against them."

The Texas Farmers Union leader added consternation at the misunderstandings about inflation and farm income which the Congressional battle underlined. Said Naman, "(the defeat of the farm bill) will further erode a favorable balance of payments and cause disruptions in agricultural markets around the world. Contrary to the propaganda that the farm bill was inflationary, the fires of inflation are fed by erratic farm prices. When farm prices roller coaster, the persons affecting food costs between the farmer and consumer are free to inflate prices to the consumer without rewarding the producer. A good farm program would have been

horse out of the pound and paid the charges. A deed of kindness is love in work clothes. A mother asked her six-year-old son, "What does loving-kindness mean?" "Well," he said, "When I ask you for some bread and butter and you give it to me, that is kindness, but when you put some jam on it, that's loving-kindness."

Surely there is no such thing as a "Christian" who will snub another. By every definition of the title, such conduct is precluded. "Of Christ" or "Christ-like", which is the definition of "Christian" means we have no alternative but to show kindness and love toward one another. You cannot do a kindness too soon; you never know when it will be too late.

—EARL CANTWELL

anti-inflationary." In its release the Texas Farmers Union reavowed its fight for 100% of parity and urged farmers to become more involved in political and organizational affairs. TFU is, in addition, setting the event of its coming Board of Directors meeting as its date to launch efforts to "organize farmers in Texas as they have never been organized before."

Naman concluded his statement by saying, "Even though farm people suffered demoralizing defeat in the loss of the farm program, there is a new awareness among farmers of where they are going and how they get there. This is something new, and because of this, farmers and the institutions that serve them will never be the same."

Harry Ledbetter's Money Management Program

As a fiscal conservative, I have developed a comprehensive program to effectively manage the \$2 Billion dollars on deposit in the State Treasury. Here are aspects of it:

Rate of Return: The State Treasurer should not play politics with our tax money. I pledge to put the taxpayer's money to work earning the highest interest available.

Cash Flow Forecasting: Using modern management techniques, we can accurately determine how much money the state needs in liquid funds. The state's obligations must be paid on a timely basis at minimum administrative cost.

People all over Texas are responding enthusiastically to my campaign. I appreciate your support. I know that the public trust must be earned, and it is a responsibility I accept. I ask for your vote on May 6th. If you share my concerns, encourage your friends and neighbors to vote for Harry Ledbetter for State Treasurer in the Democratic primary election May 6th.

"Your Business Appreciated"

Glenn Conrad is an effective speaker...

but before he speaks HE LISTENS!

If you've met Glenn during this campaign you noticed that you did most of the talking.

Glenn decided to run for the Statehouse more than a year ago. Since then he has been covering the 66th District to determine if his views are representative of the people. Now he knows that he can represent us with conviction and persuasion.

Glenn Conrad is the kind of man who takes the time to listen, and when he speaks, others listen.

When we select Glenn to represent us in Austin, we'll know that he will listen to us, and speak for us, powerfully and effectively in the Statehouse.

IT'S A FACT
 Medical science is benefitting from Air Force research: Many electrical and mechanical components required for artificial heart and kidney machines were made possible by Air Force projects, including miniaturization of parts to reduce the machines to practical size.
