Interest Rate On CCC Loans To Be Applied Monthly

A recent change in the Commodity Credit Corporation's interest rate policy could result in lower interest rates on crop and storage facility loans.

Effective January 1, 1982 the CCC interest rate will be based on the monthly rate established by the U.S. Treasury as the cost of borrowing money.

The initial interest rate on 1981 and subsequent crop commodity loans disbursed on or after January 1, 1982, will be the interest rate charged CCC by the U. S. Treasury during the month the loan is disbursed. Previously, CCC interest rates were set semiannually on April 1 and October

The interest rate on crop and storage facility loans disbursed since April 1, 1981 will be adjusted on January 1, 1982. These loans, which currently have a 14.5 percent interest rate, will be based on the CCC cost of borrowing money from the Treasury during January.

The interest rate paid by the CCC declined from a peak of 16.75 percent in October to 13.625 in December. Farmers should benefit from this downward trend in interest rates.

Monthly CCC interest rates will be announced to State ASCS offices as soon as the Treasury notifies the CCC.

Triana thought the United States was beautiful, with so many things to make life easier for people, such as the dishwasher, which fascinated him.

He was impressed with the well organized school system in Silverton, the good behavior and friendliness of the pupils. The Christmas trees in each room were beautiful to him. He expressed the thought that the football field is much bigger than it looks on television. The soccer fields are laid out on a smaller scale. He watched much of the basketball tournament on Thursday, and enjoyed the game which was new to him.

Dear Editor:

We're told a nuclear waste disposal site in our area would include dumping from other nations. We don't have a nuclear power plant in operation in our area and we sure wouldn't like to have our land used for nuclear waste for foreign nations. This refers to purchase of about 400 surface acres and restriction of an additional possible 12,000 acres. This restriction would stop any mineral exploration and extraction and underground water

Even if this disposal was completely safe—it's not a proven fact, and those who are supposed to know disagree—we would still feel the pain of being uprooted from our homes and in some cases our heritage. Many would have to give up their homes in the restricted areas.

Swisher citizens have grouped to resist a nuclear waste disposal site in our area. We feel now is the time to resist and the more involved in our letter writing, educating, etc., the more chance for success. We've been dubbed Serious Texans Against Nuclear Dumping (STAND).

We would appreciate any way you can help.

Sincerely. Mrs. Kenneth Littlefield

Mrs. Onar Cornett was taken to High Plains Baptist Hospital in Amarillo last Thursday by the Silverton Volunteer Ambulance Service. She has continued to receive treatment this week.

Mrs. Rosalie Chitty has been a patient at Northwest Texas Hospital in Amarillo. She was undergoing tests.
