In event of a nuclear attack, not only would the blast be severe, but lethal radioactivity would fall over a vast area. There is no way to evacuate from deadly radioactive fallout. Current civil defense strategy advises the use of shelters as the only effective survival method.

The Nuclear Dynamics Survival Unit provides safety in the blast area as well as protection from fallout. Installed below the surface of the ground this unit also gives COMPLETE TORNADO PROTECTION.

These recent photographs show construction progress on the new generating station at Oak Creek Lake, and some of the massive equipment to be used in it. Huge size of the equipment can be seen by comparison with the flat cars which transported it.

Any way you look at it, an investment of \$10 million in future growth is evidence that we are convinced this growth is coming.

The new generating station at Oak Creek Lake - costing in excess of that figure - is showing rapid construction progress.

But it is only one phase of WTU's long range expansion plans. Still another such station is on the drawing boards, as well as major additions to our transmission and distribution system.

This is the way we are preparing for coming growth in our service area - from the Red River to the Rio Grande. It is a SYMBOL OF THE FUTURE in the Center of the Southwest.

Democratic Candidate for U.S. SENATOR

Who Runs This Country ---Most of the people or just a few?

Well, you say, in our system it's the majority that decides things, not a mere handful of people. Or is it?

Less than half the people in Texas who could vote actually qualified themselves to do so this year. Of those who did qualify, less than half-only about 41%-actually DID vote in the last statewide election. It has long been true in our general elections that approximatly one-fourth of adult Texas citizens--a distinct minority--make the ballot box decisions that affect all Texans.

Letter To Editor---

"On the 27th of this month we will go to the polls to vote for Senator for this state.

We have two good men who are conservative, which I think is a vital point for everyone who loves the old-time American way of life. One candidate is a Democrat, the other, Republican.

A man just cannot be a true conservative and accept supports from men like Mr. Sam, L. B. J., John Kennedy or anyone else that follows the philosophy of all these Deals and Frontiers invented by FDR and HST.

Mr. Tower told me in person in Abilene on the 13th of this month he is definitely against all these things that these people are doing to your and my freedoms.

Last year a lot of people evidently felt that by electing these fellows that thy would get something given to them. But in less than 90 days a big majority of them have realized what this country is in for. I will support Mr. Tower, knowing this is not the best way to be a leader in your own home town. Hub Cole.

Like the pot of gold at the end of the rainbow, there's a treasure at the end of this electric co-

operative line. The pulsating energy that flows through these lines has made a wonderland of rural areas that were once dark and dreary. Modern conveniences, unheard of a few years ago, are commonplace now in the remote areas of our state. Rural people who borrowed

money at interest are enjoying the fruits of their labors while paying back their loans with

Affiliated with some of the major manufacturers of building materials and the world's largest finance company, The Institute For Essential Housing can actually finance a completely finished house for less than you'd pay per month for a "shell" alone.

FOR AS LITTLE AS \$42.93

PER MONTH

The Institute is the only organization that offers buses in various stages of completion. Typical: the "basic" or "shell" stage; the "basic plus materials package" stage; the "ready-to-live-in" stage and the "finished" stage in which the house is completely finished and decorated. These big homes are built from the ground up by skilled local craftsmen on your own land . . . on farm land, rural site or lake side. And no down payment if you own your own land.
