Farm News

By W. M. FREE
Field Editor

Friday March the 21st.

This date finds us on Rochester Route One beginning our work near Jud and going toward the city of Haskell on this Route. The people who live in this section are principally home owners, who are contented and happy.

B. E. Karr,

One of the best contented men we ran across during our entire trip was B. E. Karr who is one of the best known men in the Jud community. He has lived there many years and at one time was in the mercantile business at Jud. But now he is farming. He has recently erected a new stucco home with plenty of rooms to make his abode comfortable. He has plenty of water from good wells for all house purposes and he is planning to irrigate his gardens and truck patches. In his tanks he has gold and cat fish. He has plenty of chickens and turkeys, hogs and cows for domestic purposes. He has a good sandy land farm from which he grows a bountiful living. He gave us some fine sweet potatoes from the cellar which he raised last year. He sold quite a lot of potatoes and kept plenty for his home use and seed for this year. He has more than enough maize in his barn to last him two years. He made some cotton but he is not farming so much cotton, but is making a living from his farm which gives to him his cotton crop as a surplus for a cash crop. He also has a nice young grape vineyard and young orchard coming in to add to his blessings in life. Besman gave us the price for the Free Press for 8 months and will be an enthusiastic reader of the home paper while he enjoys the fruits of his labor on the farm.

T. D. Duffey.

It is a joy to own a farm from which a living can be grown at home. The man who thus lives is one of the most independent characters in all the world. We found on a visit to the home of T. D. Duffey a man who is eating the fruits of his labor and selling the surplus to the less fortunate beings, who earn only to buy their living. Mr. Duffey was away from home when we called at his farm, but Mrs. Duffey told us the things we shall mention herein. Mr. Duffey owns a sandyland farm near Jud from which he has grown a bountiful maize crop for all purposes and the harder is full from hogs grown by him for meat. He is selling about \$5.00 worth of cream per week from two cows besides the milk and butter for the family. Mrs. Duffey has about 125 Red and White Leghorn hens from which she sells lots of eggs. They are best living at home from the things grown on the farm. We are sorry to mention that about two years ago their home was destroyed by fire which was a serious loss, but have rebuilt on the same ground and will add to the swans as they need more room.

J. P. Caldwell.

We are always glad to learn of the success of our friends and glad to learn of any advancement of those among whom we have made our abode these many years. Among the first people we met after coming to Haskell County and taking up our work here were Mr. and Mrs. J. P. Caldwell who were living on a rented farm working hard and looking forward when they might own a home and be independent. On this trip we stopped at their farm which they have purchased and have almost paid out. This farm is located in the sandy section near Jud and is real good land which is very productive and sure for various crops as any land in the country. Mr. Caldwell was helping a neighbor wind up his cotton crop and we failed to see him, but Mrs. Caldwell stated that they were working hard and saving to get their home paid for and they are going to do it. She has quite a lot of hens, they also have their meat and lard in the smoke house and from their orchard Mrs. Caldwell has put up more than 200 jars of fruit. They believe in making their living at home. They are readers of the Free Press and like the home paper.

C. W. Williams.

Just like many of our citizens who have made good, C. W. Williams moved to Haskell county from other parts a few years ago and began as a tenant farmer. He has lived on the farm where he now resides for two years and has made good crops. We failed to

see Mr. Williams as he was busy in the field but Mrs. Williams gave out the statement that they were milking 3 good cows and that they made a bountiful feed crop and they have a fine flock of White Leghorns and are striving to make a living at home. This kind of farming with a few good crop years will give to this family the means to own a home just like the thousands of others who have come to Haskell county and made a success.

C. M. Manley.

That determination and grit will succeed in Haskell county has been proven so many times that it is now a reality beyond question and we are predicting that C. M. Manley who came from Hill county last year and made his first crop west of Rochester on Route one out of that city will go over the top in a few years and become a happy and contented land owner in Haskell county. He is at this time a tenant farmer, but he is massing the things around him that will bring results. That is he is increasing his flock of White Leghorns. He has some fine shoats for his meat. Last year he made a fair crop with plenty of feed for his stock to enable him to make this year's crop without buying feed. He is a good worker and was busy with his affairs when we called. He likes Haskell county and says there is an opportunity for him here.

T. E. (Ed) Howard.

Working on a farm is joy that many appreciate, because it is the most independent occupation in all the world. Living from the fruits of your labor is a happy state. With the younger folks it is a great joy to look forward to the time when the fields they cultivate shall be their own. When no man shall have the right to dictate to them their manner of working and living. Ed Howard a young farmer who is working a good farm as a tenant today but is making plans like many others have done to own a home which he can call his own and enjoy the comforts which satisfaction brings in making the effort of his life. Mr. Howard was very busy with his farm work and we failed to make his acquaintance on this trip, but Mrs. Howard was at the home, and told us that they made plenty of feed from last year's crop for their needs this year. She has 60 large and beautiful Red hens which were laying nicely. They have plenty of meat and lard in the smoke house for this year and hogs for next year's supply. They are milking a good cow and living happily.

C. L. Spicer.

There is a crown for those that labor honestly and wisely. To wear the crown that you have won is a joy unspeakable. When you plan and work and your efforts are crowned with success who would not be happy under these conditions. It is a fact the man who labors with his brain will not be compelled to work his hands so incessantly. This is an old story, but will bear repeating. As a man thinks so is he. A man seldom succeeds in life beyond his plans. Therefore it is best to think much and plan soberly and wisely if we hope to be happy and make life worth living. C. L. Spicer is one man living in the Rochester community who is exercising his brain capacity, thinking out carefully the things best for him to do and makes his hand up from wise thoughts and

P. D. Sanders; Haskell, Texas

plans which he knows beyond a doubt to be workable and his success is outstanding when you look around his premises and see the results which wisdom in farm life has brought to him. He has lived 9 years in Haskell county coming here from Taylor county and purchased the 104 acres of land which he owns and farms. He has an up-to-the-minute farm home recently erected with plenty of room for the comforts of the family. He has never borrowed any money from the banks, but helps out his banker by keeping deposits there for the bank to lend to his neighbors who need assistance. He is conservative in his actions, and he makes the things he undertakes pay. He rotates the crops on his farm. He usually plants about 25 of his farm to cotton and the other to feed crops. He advocates early deep breaking for the sandy soil and says it pays. It is an inspiration to go to his place and see what he is accomplishing. You would never dream of starvation because you failed to plant all your crop in cotton if you could get the idea of his great plans of making the farm pay.

W. L. Harrow.

We were getting hungry and had just about decided we would miss the noon meal entirely when we arrived at the home of our long time friend W. L. Harrow. Mrs. Harrow gave us a good lunch and we sure did enjoy this kind favor. Mr. Harrow owns the farm upon which in early days the old town of Marcy was located before the rail road came to Rochester and the town was moved away. He just owns 120 acres, but the soil is very productive and he knows how to cultivate it for best results. He has just completed a new stucco residence with 5 rooms and a bath and inside this house they have many modern conveniences which makes the home very cozy and comfortable. He is putting pailings around almost an acre of ground which he expects to be his garden to produce vegetables for the family. Mrs. Harrow has a fine flock of Plymouth Rocks and Red Chickens which are helping pay the expenses of the family with egg productions and fryers. Mr. Harrow has his barns full of fine maize and by the way he has three mule colts which is the greatest number of colts we have seen on our rounds this season. He is milking some good cows and ships a can of cream every week. He too advocates deep breaking of his sandy land for best results. He is plowing about 12 inches deep in breaking his ground. Turning the heavier soil to the surface prevents the blowing which is the big feature in holding a stand of early planting. He also has a nice orchard of bearing fruit trees which is a profitable asset to the farm home. He came to Haskell county in the year of 1906 and he is not planning on going elsewhere, because he is happy and contented. He is an enthusiastic reader of the Free Press.

J. H. Wolf.

The association of good friends is one of the greatest pleasures in life. Just to know that we have friends is a great satisfaction, but when we are permitted to visit them in their homes and find that cordial welcome which we know is sincere our happiness is doubled and

we should enjoy these blessings much more than we really do. It was our pleasure to visit the home of J. H. Wolf near the city of Rochester. But we were made sad to find that Mr. and Mrs. Wolf had both been suffering with the flu and Mrs. Wolf was still confined to the bed, but was not suffering very much. John had just completed a shave with a dull razor, all but his mustache and he decided to let them grow rather than tackle the part of his face which was sure to bring tears. He owns a good farm makes his living from the ground he cultivates. His barns were filled with feed and he spoke of selling quite a lot of maize if the rains continue which they are doing. He keeps lots of hogs, cows and chickens and loves the environment of the farm above any thing else and is contented to remain on the farm in independence, asking no man for an existence under the sun. Just think of this happy state and what it means to be in this condition to owe no one, and the means of a living at hand. Oh boy.

CARD OF THANKS

We want to thank our friends and neighbors for their kindness to us during the recent illness of our son. We thank Dr. Gentry and Gose, and the I. O. O. P. and Rebekah Lodges for their faithful services.

Yet, the symptoms are the same as in children, loss of appetite and weight, grinding of teeth and restless sleep, itching of the nose and anus and abdominal pains. **Greater than ever with
Straight Eight Power!**

Studebaker's famous
COMMANDER

AS AN EIGHT AS A SIX
\$1495 - \$1350
at the factory

COMMANDER EIGHT CONVERTIBLE CABRIOLET, \$1645. With six-cylinder motor, \$1495. Six wire wheels and trunk rack standard equipment.
COMMANDER EIGHT COUPE, \$1495. COMMANDER SIX COUPE, \$1350. Prices at the factory. Bumpers and spare tires extra.

THE fine and final touch of modern motoring—straight eight power—now lends its liquid fluency to Studebaker's famous Commander!

The new Commander, now available as either an eight or a six, worthily succeeds to the renown of its illustrious predecessor, which sped 25,000 miles in 22,968 minutes.

The Commander's potent appeal of tireless speed is admirably matched by youthful, vivid style. Lines are lower and longer because of Studebaker's costly double-drop frame. Even in repose, you sense The Commander's fleetness, and its power, and its brilliant deportment.

A cozy coupe or a racy roadster—quickly and at will.

Restful riding, such as motoring never knew until Studebaker introduced ball bearing spring shackles, is still further enhanced by hydraulic shock absorbers. The sum of the new Commander's qualities, make it now, more than ever, "the greatest motor car ever built and sold at its low One-Price price."

Would You Want to Go Back to the Old Methods?

Way back in 1700, when people first commenced to understand the rudiments of sanitation, housewives assembled in large crowds at the lake or river and did the family washing.

Then came crude tubs made from barrels sawed in two and huge iron caldrons for boiling—an improvement—but still crude.

Next came the washboard, wringer and the copper wash-boiler and people thought that the ultimate in laundering refinement had been reached, but progress and the steadily increasing demand for greater sanitation and less health destroying effort found new ways, until today the washday problem has been reduced to simply picking up the phone and calling 182.

All talk of Plymouth revolves on Quality

PLYMOUTH can match price with other cars in the lowest-priced field, but there all similarity ends—for no other car priced around it can begin to match Plymouth's size, quality, beauty and power. Therein the full-size Plymouth enjoys a unique distinction.

You think instantly of style when a Plymouth glides by. Thoughts of comfort are inevitable when you contrast the Plymouth's full-size roominess with the cramped quarters of the miniature cars of today.

You thrill at the wheel when you feel the smoothness of Plymouth's big high-compression engine of Chrysler "Silver-Dome" type. You enjoy absolute safety from the full-size Chrysler weather-proof internal-expanding 4-wheel hydraulic brakes.

The full-size Plymouth brings you real fine-car advantages with utmost economy in first cost as well as in general maintenance. In creating the Plymouth, Chrysler Motors has changed the whole complexion of the field of lowest-priced cars.

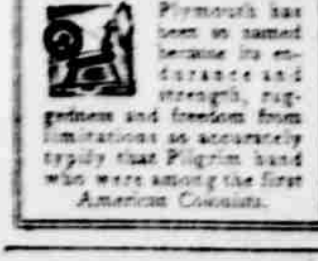

Comp. \$225 Roadster (with rumble seat), \$475 4-Door Sedan, \$575 Touring, \$675 De Luxe Coupe (with rumble seat), \$775 4-Door Sedan, \$895 All Body 4-Door Sedan. Plymouth dealers are in a position to extend the convenience of easy payments.

CITY WATER TANK BEING REPAIRED

The city water tank is undergoing extensive repairs this week, following the letting of a contract by the City Council last week to Pyle Bros. Iron Preserver Company of San Antonio, one of the largest firms of its kind in the United States. Work was started on the tank Saturday, and it is expected that the work will be finished by the last of this week.

The entire tank and tower will be painted inside and out, with three coats of graphite as a preservative on the interior of the tank. The crew of men are working night and day cleaning the tank, using electric brushes to remove the scale on the inside of the tank, and compressed air spray for all crevices and joints. A sanitary flush valve will also be installed in the bottom of the tank, a device which has the approval of the state board of health and which is being made a compulsory feature on tanks in a number of states. This device will make possible the cleaning of the tank completely at any time without workmen entering the inside of reservoir.

With the completion of this work, the tank will be in as good shape as ever, and the contract with the firm doing the work provides for servicing and periodic inspection of the tank for a period of six years.

The firm doing the work here, have recently completed two similar contracts for the state, the water tanks at the Abilene Epileptic Colony and a water supply tank at the State Teachers College at Canyon. Twenty other municipal tanks in this section have been repaired by this firm since the first of the year, according to Mr. Pyle.

Old Letters Bring Fortune to Pioneer Haskell County Man

The following article was taken from an Eastland paper and will be of interest to Haskell pioneer folk. "Letters written 90 years ago brought \$280,000 to 37 Texans. On April 2nd, 1928, William R. Meredith, Indiana millionaire, died at the age of 82. In his will he bequeathed \$1,250,000 to cousins, since he had no closer relatives. Each first cousin was to get \$14,000 and each second cousin, \$7,000. Carl Springer, Eastland attorney, read in newspapers of Meredith's death. From stories told him by his father, A. W. Springer of Aspermont, Texas, he was convinced that he and his relatives should share in the fortune. Meanwhile, paternal cousins of Meredith contested the will on the ground that that Meredith had not intended to include maternal descendants. Their contentions were overruled, and the Texas cousins made eligible for bequests. In establishing the relationship of the Texas clan to Meredith, Carl Springer introduced letters that Edward Fayette Springer had received from his sister, Emily Carolina Springer Meredith, mother of William R. Meredith. In one of them she said she had named a son Edward Fayette in honor of her brother. Some of the letters were written in 1840. Under the court ruling allowing maternal cousins to inherit, A. WAKE UP! RAKE UP! CLEAN UP!

March the 27th, 28th, and 29th have been designated by the Mayor and City Council as Clean-Up Days in Haskell.

You are requested by them to rake up and burn all trash and weeds, collect your tin cans and other rubbish and put them in sacks or piles, so they can be easily reached with the wagons.

We want to make this the biggest and best clean up Haskell has ever had and so we are asking the churches, womens clubs, the school children and boy scouts to co-operate with us and render all the assistance possible.

The City is hauling off the rubbish and cans free of charge, so we ask that you pile cans so we can complete this work in the three days.

M. F. SPURLOCK,
Sanitary Commissioner.
