KC's Greyhound Stadium Receives New Scoreboard

PROUDLY STANDING BEFORE THE NEW SCOREBOARD AT GREYHOUND STADIUM, Citizens Bank President Greg Clonts is shown here with two workmen from Spectrum Scoreboards in Houston who were in Knox City last Wednesday to install the new scoreboard. Both Citizens Bank and Coca-Cola made the new scoreboard possible, replacing a scoreboard that was manufactured back in the 60's. Featuring a new yards to go display for football games, this new scoreboard can also be used as a timer for track and field events with the home time being the minutes and the visitor time being the seconds. "A woman found a note on the coffee-shop menu: 'We will pay you \$10 if you order a sandwich we can't make.' She ordered an elephant-ears sandwich. After several minutes, the waitress returned and said, 'here's your \$10, ma'am. We can't make that sandwich.'"

"I'm not surprised," answered the woman. "Where would you ever get elephant ears?"

"Oh, it's not the ears," said the waitress. "We're out of those big buns."

The NEWS!

Administrator's Column

By Stephen Kuehler, Knox County Hospital

If nothing else, the healthcare industry continues to grind out new terminology that may affect all our lives. Have you heard the word "capitation" floating around? If you've been anywhere close to a hospital business office lately, you probably have.

"Capitation" is part of the terminology spawned by the managed care system that seems to be the wave of the future. Briefly, in a managed care environment, capitation is a system which pays providers (hospitals and doctors) on a per member, per month basis. That means that the hospital and/or doctor gets paid a certain amount regardless of how much care is provided for any one patient.

Capitation works on the same basic ideas as the DRG (Diagnosis Related Groups) system that the government uses for Medicare. The idea behind both DRGs and capitation is to give rewards to the hospital that provides care in the most efficient manner, and penalize hospitals who are inefficient. For example, if Hospital A can care for a pneumonia patient at a cost of \$1,000, but Hospital B provides the same level of care for \$800, Hospital A will make more money.

The exact opposite of "capitation" is "fee for service", which is the system that has been used for many years. "Fee-for-service" means that the hospital gets paid based on the services rendered.

What does all this mean for Knox County residents? At this point, we're not sure, but we feel

A study presented at an Am. Heart Assoc. meeting found that the cholesterol lowering drug simvastatin can lower the risk of death by 30% among people who have had heart attacks or angina. Currently, about 1/4 of heart patients get cholesterol lowering drugs, but there has been some concern whether they actually do any good. Several heart specialists said the study is a landmark in cardiac medicine and that use of the drug could significantly reduce the need by bypass & angioplasty.
