WEST TEXAS SUNDAY

Also today V IN THE NEWS: New task Tax cut plan open to negotiation

WASHINGTON (AP) — The Reagan administration is open to negotiation with Congress on some parts of its plan to reduce income tax rates but is insisting on a three-year package of cuts, budget director David A. Stockman says

A one-year tax cut, which some congressional leaders prefer, "won't help (the economy) a lot," Stockman told The Associated Press in an interview. However, there is flexibility as to the exact size of the annual tax reductions, he said.

Stockman raised the possibility of compromise on the tax plan Friday only two days after President Reagan proposed to a joint session of Congress that individual tax rates be slashed 10 percent a year for three years, starting July 1.

'I don't say there's any magic about 10-10-10 (percent), but that's a good benchmark, that's the range of what we ought to be doing," he said.

What the precise numerical specifications are in the years and the percentages per year, I think that's something that has flexibility," he said, then quickly added: "But were not even going to start talking about that yet until we get into the legislative process.

The budget director also said further cuts in farm subsidy programs will be announced next month, when the administration fully details its plan to reduce federal spending by \$41.4 billion in fiscal 1982.

In his economic address to Congress last Wednesday, Reagan disclosed some \$34 billion worth of proposed cuts, including a reduction in dairy price supports. The remaining \$7 billion in savings have yet to be assembled, and details will not be announced until March 10.

Congressional sources said the administration also intends to recommend in its final budget package that cuts be made in all nuclear energy programs except for the controversial Clinch River, Tenn., breeder reactor project, which the Carter administration had opposed. Reagan wants to restore funds for that project, according to the sources.

Stockman declined to comment on the administration's nucle ar budget plans.

Several key congressional leaders have expressed reservations about approving a multi-year tax cut, especially before Congress commits itself to significant cuts in the budget.

Stockman however, insisted that "you've got to have a multiyear effort to reduce tax rates."

'One year tax cuts do not generate the kind of permanent economic response that we're looking for. People can't make

long term plans on the basis of only one year," he said. "The essence of it (tax plan) is multiple-year reductions in marginal income tax rates."

Stockman refused to provide details of the upcoming budget cuts, but he said the administration "will have a whole set of proposals dealing with the farm commodity programs."

'My basic objective is to keep the loan levels at a minimum so they become kind of a rock bottom floor in the market so if there's a real bad year - one out of 20 - you offer some

protection to the producers," he said. The 34-year-old budget director also said Reagan stands "a good prospect" of winning congressional approval for most of his package of sweeping budget and tax cuts, which are intended to reduce inflation and revitalize the economy.

"I don't think there's ever been a president who proposed a sweeping, comprehensive, integrated proposal like this who got 99 out of 100 items he wanted passed," Stockman said.

'But I think in substantial dimension we have a good prospect of getting it through, mainly because people are very worried about the economy. And they know the kind of gradualism and tinkering and seasonal revision of economic policy that we've had in the last few years has been a total failure."

Reagan wraps his package

By WILLIAM RANDOLPH HEARST JR.

NEW YORK — The 40th President of the United States is trying to do something that has not been successfully accomplished for 50 years: Cut taxes and control the budget in order to halt the spiraling rate of inflation.

After only a single month in office Ronald Reagan has let it be known he wants to match, or outperform, Franklin Roosevelt's historic "First 100 Days" as a period of dramatic action. The Wednesday speech was a

well-prepared, convincingly deli vered battle plan, full of specifics, and complete with outlines of further details when the time comes to an

Impounded at the County Barn, this 1970 Dodge Coronet was owned by 17-year-old Karen Rickey. Authorities believe it's the

vehicle used to run over the girl sometime Tuesday night in a field seven miles east of Midland. A 19-year-old California man is being

held in the county jail, charged with murder in the case. (Staff Photo by Paul Gilbert)

Karen Rickey 'wasn't the type...

Teen-ager's brutal death still unexplained

By RICHARD ORR Staff Writer

Karen Rickey called her boyfriend early Tuesday night and said she was on her way to his house for supper. She never showed up. It was 6: 30 p.m. when she made the

call Earlier that day, the 17-year-old

junior at Midland High School applied for part-time work with Kelly Girl having recently quit her job as a cosmetics clerk for Dunlap's Department Store - and ate lunch with her mother at Furr's Cafeteria on Cuthbert Street.

It was the last time her mother would see her alive.

Just before 8 a.m. Wednesday, Karen's battered body was discovered lying in a field of gray mesquite and scrub grass along a county road seven miles east of Midland.

She had been run over by her own car and bludgeoned to death with a large, blood-soaked rock that lav nearby. She would never laugh or play baseball again.

Shortly after noon Wednesday, plainclothes sheriff's department investigators Pat Fuller and Benny Fishback, accompanied by Texas Ranger David Byrnes, approached a 19-year-old Vacaville, Calif., man in a hallway at Midland Park Mall and quietly asked if he was Stephen Wayne Morse.

When the man said yes, he was placed under arrest so unobtrusively that mall strollers and people eating lunch in a nearby restaurant were oblivious to what was going on.

Morse's arrest and incarceration under \$100,000 bond followed four hours of probably the most intensive murder investigation ever carried out by the Midland County Sheriff's Department.

Virtually every available officer and piece of equipment the department has was turned loose in an effort to find out who killed the popular, vivacious school girl who apparently

had done nothing to warrant such a brutal death.

'She didn't deserve it,'' said softspoken David Squires, a 21-year-old welder who was renting a house from Karen's parents and who had been dating her for more than a year.

"She wasn't the type...," Squires started to say before his voice trailed off Squires met Karen through her two

brothers, 22-year-old Glen and 24year-old Steve. The couple planned to get married

as soon as she finished school. She wanted to be an interior decorator and had decorated Squires' rent house.

Karen may have been only an average student, her father said Friday morning from the family's comfortable brick home on the near west side, but she excelled in sports and popularity.

William Rickey works for Exxon Oil Co. and was on a drilling site in the

Karen Rickey

ounce them.

Seldom if ever have I seen a presidential address so speculated about in advance, or so thoroughly dissected afterwards. Some may look at this

Editor's Report

as overkill by the press, but if ever there was a time for extra-careful examination of the goals of a newlyinaugurated President, this was it. The speech affects every American and just about every citizen, friendly or not, the world over.

Achieving the Reagan goals will not be easy. The man who outlined them before the joint session of Congress on Wednesday knows this better than

anyone. The President does, however, have a number of things going for him, besides his meticulous and courageous approach. For one, the voters gave him an overwhelming mandate to go ahead along these lines on Nov. 4. For another, the Senate has a Republican majority for the first time in 25 years, a fact that says much about the mood of the electorate

It wasn't as if the President sprung something new on the nation last week. He simply started to reinforce with concrete the fiscal structure which he has been talking about for months, and which the public ap-proved of in principle in the voting booths.

The President did not open his campaign for frugality with insensitivity toward human needs and suffering. Instead, he excluded from budget-slashing seven programs that bring the most help to the needlest. These "untouchables" include aid to the aged and the sick, the disabled

Hearing near on cancer machine

By SUE FAHLGREN Staff Writer

Midland and Odessa are gearing up for what will probably be the clinching battle over its cancer machines when Medical Center Hospital - as well as its opposition — goes before the Texas Health Facilities Commission (THFC) in Austin Wednesday and Thursday to give testimony on its application for a 6MEV linear accelerator.

A three-year-old war between the cities, getting the cancer machine in Odessa may be as difficult as finding a cure for the disease.

The fighting began in 1979 when Midland Memorial Hospital orginally sought permission from the Health Systems Agency 12 and THFC to build the Allison Permian Basin Cancer Therapy Center.

Medical Center Hospital opposed

proposed Center's 6 Million Electron Volt linear accelerator was an "exact duplication" of the services provided by MCH's cobalt machine. MMH later added additional equipment and plans to the certificate of need application and MCH withdrew its opposition

IN NOVEMBER 1980, MCH applied to HSA-12 and the THFC to get its own linear accelerator as "the natural replacement" for its 10-year-old AECL Teratron-80 cobalt radiation therapy unit.

The Projects Review Committee of HSA-12 recommended denial of the application Dec. 13; however, the full HSA-12 board overturned the committee's recommendation on Dec. 15 and is currently suggesting the THFC adopt Odessa's application.

But just as the 52 American hostages in Iran rallied American pride, tion boosted the opposing spirits in Midlanders.

MMH originally filed its opposition to the application on the grounds that such a machine was not only an "exact duplication" of the one to be installed next week in the Allison Center, but also on the grounds the operation of the machine in Odessa would steal essential revenues from the fledgling Midland cancer center.

SINCE NOVEMBER, additional Midland forces have joined the battle, including the Chamber of Commerce, the City Council, the County Commissioners, Parkview Hospital, Hospice of Midland and two independent Midlanders - Reagan Legg and Charles Aldrige - who filed a third-party opposition to the application with HSA-12.

Members of all the Midland sup-

(Son HEARING. Page 4A)

Bab Dillo

Robert Austin "Bob" Dillon, a sports writer for The Midland Reporter-Telegram for the last 12 years, was killed early Saturday morning in a one-car rollover on Holiday Hill Road, some 200 feet from Andrews Highway.

According to police reports, the accident occurred about 1:50 a.m. Saturday as Dillon, 45, was driving north on Holiday Hill Road. He apparently ran off the road to the east and then tried to correct the vehicle, crossing the road to the northwest. Dillon's car left the road and continued into an open field where the vehicle began to skid.

The left tires of the car, a blue 1978 Dodge Challenger, dug into the ground and caused the vehicle to roll over several times, according to police.

Dillon was thrown from the vehicle when it left the road, and was found a few feet from the wreckage. Suffering a broken neck and head lacerations, Dillon was pronounced dead at the scene by Justice of the Peace Robert H. Pine.

Funeral services for Dillon, of 4201 Andrews Highway No. 76, will be at 10 a.m. Monday in the Newnie W. Ellis Funeral Home chapel with the Rev. Mark Dorff of Odessa officiating. Burial will follow in Fairview Cemetery.

Dillon was born Jan. 31, 1936, in Denver, Colo. He graduated from high school in Roswell, N.M. He attended McMurry College in Abilene and UCLA. He moved to Midland 19

Pope mobbed by joyful refugees

By EDITH M. LEDERER **Associated Press Writer**

MORONG, Philippines (AP) — Joyful Indochinese refugees mobbed Pope John Paul II Saturday as he toured a refugee camp, calling the plight of the world's displaced peoples perhaps the greatest "of all the human tragedies of our day."

The 60-year-old pontiff spent the fifth hectic day of his six-day Philippines visit in prayer, speech-making and touring before going on to Guam and Japan on Sunday.

He made a plea for interfaith dialogue, delivered an appeal for Christian unity, met with children afflicted with leprosy and blessed all veterans of World War II. He delivered that blessinger as he helicoptered over a 30-story-high cross on a mountain in the historic Bataan peninsula, where thousands of American and Filipino troops died during the war.

Hundreds of the refugees, many in colorful traditional dress, pushed to get close to the Polish-born pontiff when his tight security cordon broke down at the U.N. refugee center for 15,000 in the Bataan peninsula, some 110 miles west of Manila.

Bishop Paul C. Marcinkus, the pope's bodyguard, pushed and shoved to keep some breathing space as the pontiff worked his way around a fence before going to a nearby bamboo stage to address the assembled crowd of 15,000 people, about half of whom were Filipinos from the area around the center.

In an emotional speech at the first refugee camp he has ever visited, the pope said his trip was symbolic of the visit he would like to make to "every camp or settlement of refugees in the world." He said it was also symbolic of "the church's solidarity with all refugees."

Noting "with alarm" the growing number of people being forced to abandon their homelands, the pontiff appealed on behalf of refugees to all nations for increased aid to strengthen the refugees' bodies and compassion to nourish their souls.

"In this part of Asia, the number of natural disasters and human catastrophes has been many... but of all the human tragedies of our day, perhaps

the greatest is that of refugees," the pope said. The pontiff heard a 60-member Catholic choir composed almost entirely of Vietnamese refugees sing a song in their native tongue which urges "trust in the love of God."

Vietnamese refugees presented the pontiff with an orange-painted model of a boat similar to the ones the Vietnamese "boat people" used to flee their homeland, while the Cambodians gave him a statue of an ancient dancer. Laotian refugees gave the pontiff flowers, a painting of the pope with a refugee child and an ivory elephant.

En route back to Manila by helicopter, John Paul and Filipino soldiers died. fulfilled a request for the blessing of World War II veterans, made by Philippines President Ferdinand E. Marcos, as the pontiff flew over the 30-story cross on Mount Samat.

The cross commemorates the Allies' final stand against the Japanese in early 1942 and the Bataan death march in which more than 30,000 American

The pontiff called for dialogue among Christians, Buddhists, Moslems and Hindus in a shortwave radio broadcast, beamed across Asia from Manila's Catholic-run Radio Veritas, in what Vatican sources described as the most far-reaching call for interfaith dialogue ever made by a pontiff.

Thursday: Chicken fried steak, potatoes ad gravy, hot rolls, soup, salad, sandwiches. Friday: Hamburgers on buns with chips, soup, salad, sandwiches.

tween Money Market Certicates and Certificates of Deposit. "Money Market" is a nickname. The certificates, as regulated by the government, specify that the six month deposit have \$10,000, and the two and one-half year certificates have \$500.

With regard to using your savings account fund to purchase an appliance or obtain a loan from the bank, it is suggested, what with the high interest rates at the banks, it would be advisable now to use savings' funds

The spokeman also said a note at the bank usually is a good credit reference.

In the Sunday Woman magazine of Feb. 1, 1981, Marguerite Brunner had an article about how to turn house cleaning into dollars.

I have tried to find the address because I have some real old beaded dresses, and, also, men's suits, and would like to find out where and who buys old clothing.

She stated in the article she had sold some. Do you happen to know her address? - A.A. P.S. I read your Answer Line.

ANSWER: Any questions or comments for Sunday Woman may be addressed to Reader Feedback, Sunday Woman, 235 E. 45th St., New York, N.Y. 10017

You may have had this in your paper. What is the reason, or what's the answer to this?

I've been driving back and forth on Illinois Street for the past 26 years. I live in West Midland. My friend and I work together and have beem car pooling all these years. We can't understand why there are cars parked in front of the hospital? There are signs that say No Parking At Anytime.

We have counted many times as many as six to 10 cars, every day. We have yet to see a policeman giving tickets.

What would happen if an ambulance or fire truck tried to get by at the busy hour? There is no way we could pull to the curb and stop. I hope it doesn't happen, but it could. - E.E.R.

ANSWER: The Traffic Division of the Midland Police Department reports the department issues about 20 tickets a day to cars parked in the no parking zones

These tickets are issued by the patrol officers whenever they have the opportunity to check the hospital. The zones are not checked by the downtown area police officers, but by the patrolmen.

Can you tell me who sponsored the recent Midland Cubs' Sports Banquet held at Green Tree Country Club?

I understand there were about 700 persons attending at \$35 per "head." - S.C.

ANSWER: The annual banquet, which is the kickoff event for the Cubs' season, is sponsored by the Midland Cubs organization.

Any money received from the event is used to pay the athletes who appear at the banquet, and the remainder is placed in a fund for the next year's banquet.

THIS WEEK IN GOVERNMENT

Tall City Cable TV Co. to meet with Midland City Council Tuesday

Tall City Cable TV Co. will be called in on the carpet before the Midland City Council when the city panel meets at 10 a.m. Tuesday in City Hall Council Chambers.

The meeting will serve a dual purpose - City Council will question the company's leaders about local service and those people in charge will relate an update on the type of service coming this year.

The local cable company is a part of the Times-Mirror Corporation, which holds a chain of cable television firms. Mayor G. Thane Akins said those showing up at the Tuesday meeting should be the local manager, Tom Mixon; some regional chairmen and possibly someone from the main office in Los Angeles.

When the council first requested last fall the company appear at a meeting to hear problems concerning local service, the corporation was in the middle of drawing up the budget. Final outcome of that budget should affect what type of cable television service Midland will be getting in the future, said Akins.

The session with the council should come before the panel adjourns at 10: 40 a.m. to attend a press conference at Midland Regional Airport. Nature of that conference is unknown.

When the council gets back to City Hall, it will consider a proposal to employ Ed Reed & Associates to study Midland Draw. The draw that starts north of the town and runs south through the county has watered the ire of some county residents near it. Water has been flowing in the draw for months.

While some county residents claim the water is effluent from the city's sewage treatment plant, city officials say it is ground water from the rising aquifer in the area.

The study should determine from whence the liquid comes

The council next will focus on Midland Regional Airport and a consideration to hire the engineering firm of Parkhill, Smith and Cooper, Inc., for several new projects at the facility.

Another agenda item calls for extending that company's contract to include repairing roads at the airport. Meanwhile, a representative of the firm will give a report on the Air Park Limited Master Plan.

The council will study amending the City Codes to authorize removal of abandoned vehicles on city-owned parking facilities and to provide for the disposition of disabled or damaged aircraft at Regional Airport or Air Park.

Al McGuire will ask the council to let him construct hangars and operate a fuel service facility at Midland Air Park.

The council will consider a resolution awarding a bid for relocating the Operations Building. Certificates of Obligation will be sold to finance the project. The Operations Building is located over an old landfill, which is sinking and causing the building to crack.

A proposal for new telephone service at City Hall and other municipal buildings will be studied. The council has been looking at the project for more than a year.

Final decisions on what to do with more than \$600,000 in Revenue Sharing funds will come during a 5 p.m. public hearing. This will be followed at 5: 30 p.m. with a session on the proposed budget for more than \$1 million in Community Development Block Grant funds.

Joining the Midland Independent School District in hiring a firm to design an elementary school and neighborhood park site will be reviewed. The council also will hear a report from the Visual Improvements Program of the Chamber of Commerce on landscaping portions of Scharbauer Draw.

The final figures on how the city operated during fiscal year 1979-80 will be released by a representative of the accounting firm of Main, Hurdeman and Cranstoun.

County Commissioners

A discussion of the proposed Law Enforcement Academy at Midland Regional Air Terminal will be among the items on the agenda of the Commissioners' Court in its regular session Monday at 10 a.m. in the Midland County Courthouse.

The propposed law academy would include the Midland County Sheriff's Office, the Midland Police Department, Ector County Sheriff's Office and Odessa Police Department.

Other items to be considered by the commissioners include:

-Discussion of County parking lot at Baird and Texas streets.

-Consider paying a bill from J.W. Dolly Dompnay for rebinding and canvassing jackets on old volumes in County Clerk's Office.

-Bids for road materials, automobiles for the sheriff's office, hand-held radio for constable's office and fertilizer.

-Opening of bids for County Depository. -Consider request for funds for insecticides for vector

control. -Consider additional jail cells for County Jail.

-Discussion of Petty-Ray Geophysical for a geophysical permit starting at intersection of CR 1160S and CR 190E and ending 11 miles south along CR 1160S.

-Assignments of county commissioners for 1981.

-Consider authorizing the county auditor to advertise for bids for an intercom system for the Culver Youth Home.

-Announcement of names of Ad Hoc Committee members by commissioners and chairman by county judge.

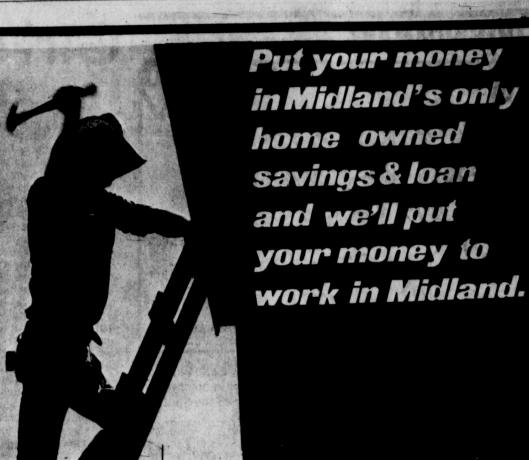

-Discuss pipeline adjustment of Fina pipeline crossing FM

The commissioners also will have an executive session to discuss personnel matters, possible land purchase and pending or prospective litigation.

School Trustees

The results of a recent survey on the use of drugs and alcohol by students in Midland's public schools will be disclosed at the school board meeting Tuesday afternoon, promising to spark an otherwise routine agenda.

Other agenda items include approval of a course in com-puter mathematics, consideration of a bond election for two new schools, presentation of the Objectives for Midland High School, various reports and a closed door executive session pertaining to possible real estate, personnel and legal matters," according to the agenda.

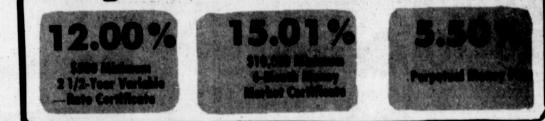

It's a good feeling, knowing you have some money set aside. And it's good to know that your savings are helping Midland grow. Citizens Savings offers a variety of savings plans designed to help meet your financial goals.

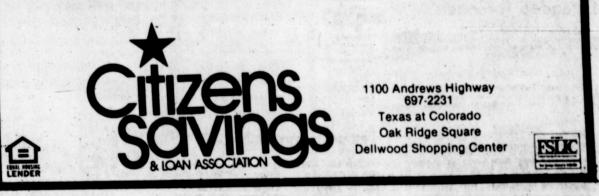

Citizens Savings is also helping build a better Midland. We've helped thousands of families become homeowners, and financed local construction. We're looking to the future with our Meadowpark and Northgate housing developments, providing both prestige and moderately priced homes.

You select the savings plan and we'll put your money to work, making Midland a better place to live. After all, we're Midland's only home owned savings & loan. Stop by. There's a Citizens Savings branch near you.

44 new permits **NIR** Posture Rest Elite

issued last week

Forty-four building permits representing a total of almost \$2.2 million in new construction were issued by the city last week, bringing the year's total to date to \$35.2 million.

Topping the list of new permits issued last week was new residential construction totaling nearly \$1.5 million. Those permits included those issued to:

Contemporay Homes, 3107 Elm, \$60,000; Hailco, 4604 Neely, \$60,000; Hailco, 4606 Neely, \$60,000; DOH Construction, 4608 Neely, \$60,000; Contemporary Homes, 4610 Neely, \$60,000;

Ramcon, 5102 Ric, \$47,000; Ramcon, 5102 Ric, \$46,000; Ramcon, 5105 Ric, \$45,950; Ramcon, 5107 Ric, \$46,000; Ramcon, 5109 Ric, \$46,350; Bill Hague, 3902 Placid Ct., \$60,000; Reeder Construction, 1904 North D, \$70,000;

Owen Cosgrove, 1217 Century, \$36,000; Plainsman Homes, 4505 Watson Ct., \$44,765; Plainsman Homes, 4507 Watson Ct., \$41,965; Plainsman Homes, 4509 Watson Ct., \$41,965;

Ramcon, 4501 Crenshaw, \$70,319; Ramcon, 4507 Crenshaw, \$70,900; Ramcon, 4513 Crenshaw, \$69,000; Ramcon, 4525 Crenshaw, \$68,748; Russell J. Hansen Jr., 3407 Wedgewood St., \$90,000; Russell Hansen Jr., 3409 Wedgewood, \$95,000; Russell Hansen Jr., 3411 Wedgewood, \$90,000; and Russell Hansen Jr., 3413 Wedgewood, \$88,000.

No new commercial activity was listed, but \$709,-700 in alteration and remodeling permits were issued to:

James Ratliff, 3005 Meadowbrook, a \$16,000 swimming pool; Miguel Orepass, 1608 E. Walnut Lane, add bathroom, \$2,000; Parkview Hospital, 3201 Sage, add portable building, \$7,000;

Arnold Newmark, 109 W. Fla., enclose garage, \$5,000; Fidel Ramez, 422 W. Dengar, move in garage, \$700; Holiday Inn, 4300 W. Wall, add wall sign, \$2,000; John Burns, 4403 Dengar, cover patio, \$2,000; Allen Construction Co., swimming pool at 3806 Crestgate, \$12,000;

David Adams, 4303 Valley, swimming pool, \$15,-000; Wesley Smith, 3305 Douglas, water well, no value listed; Louis Ceniceros, 904 Whitaker, add storage building, \$1,000; Alpha-Simon Co., construction shack at 2305 N. Big Spring St., \$2,000; W.A. Adams Jr., 330 Cloud Ave., move residence, \$30,-000

CHW Investment, Inc., 414 Pecan St., repair house, \$40,000; Walter McCoy 3905 Gaston, add bathroom and bedroom, \$8,000; Tubescope, Inc., add tower, \$22,000; La Bodega Restaurant, 2700 N. Big Spring St., remodeling, \$60,000; San Miguel Sg., 3303 N. Midkiff, remodel shopping center, \$135,000; Roger Canter, 2304 Maxwell, add carport, bedroom

and bathroom, \$100,000; Milton Nickel, 3200 N. Big Spring, remodel service station, \$150,000; and D.H. Messen, 3419 W. La., add storage building.

Auto show picketed

CHICAGO (AP) — About 20 people waved signs and chanted slogans Saturday at the Chicago Auto Show to protest the exclusion of a car designed by a minority-owned business.

The electric-powered car, Exar-1, was barred because of financial and legal problems surrounding its manufacturer, Amectron, Inc. of Dallas, according to the auto show's sponsors.

However, a spokesman for the demonstrators, the Rev. Hosea L. Williams, said the vehicle was excluded because it was designed by a minority-owned business, and because auto and oil companies want to discourage development of electric cars.

Amectron filed for bankruptcy in May.

Premium Quality Bedding Custom Made for Knorrs

INTRODUCTORY SALE

Quality Comfortable, Luxurious Bedding. made for Custom Knorrs by America's Leading Manufacture.

Premium Quality Features include triple border wires that prevent border breakdown by locking in perimeter coils. Special engineered stell grid to distribute body weight evenly.

Electronically tempered carbon steel coils for full support and firmness.

Firm insulating pads, and resilient foam cushioning layers. And covered in high quality puff quilted damask. Solid longterm guarantee, the posture rest elite exclusively at Knorr Furniture Co. at introductory savings.

Girl's death remains unexplained

(Continued from Page 1A)

Arctic Ocean when word of his daughter's death came. He had last seen her Feb. 9, the day

he left for Alaska. Did Karen know Stephen Wayne Morse, a man who worked for a Pasadena, Calif., geophysical survey firm doing work in Midland County for the

past six weeks or so? "I don't think so - at least she never mentioned him," said Rickey, a large man whose eyes welled with tears as he talked about the girl for whom he had purchased a 1970 Dodge Coronet six months before.

"I bought it so she could get back and forth to school and her job. But she paid me weekly payments on it and paid for her own insurance. I did the boys the same way.

"They all three had to pay their own repairs, too. I thought they needed to know the value of a dollar.'

The Rickey house is full of the medals, ribbons and certificates Karen had earned playing basketball, volleyball and baseball.

"She played third base and was the only girl on a boys' little league team," her father said with a note of pride in his voice. "There weren't many boys who could beat her.

"She had many, many friends. Calls have been coming in from all over the country. Over 400 people

have called or come by the house. 'She knew everybody. I tried talking her into becoming an airline stewardess because she liked people and loved to travel and talk. But all she

talked about for the past two years was interior decorating. "She had a dynamic personality and the only problem we had with her was coming in late on school nights. Every kid does that. We tried to keep an eye on her. She'd complain that we were tighter on her than the boys.

"No, she never talked about any-body from California. This whole thing is a complete mystery to us. We've got a lot of questions.

Despite the fact Karen never talked about Morse to her parents, two or three persons have placed her in his company Tuesday night and her boyfriend haltingly admits Morse was not a total stranger to her:

"Yes, she had met him. She/knew him a little. But she didn't talk about him.'

When Karen called Squires Tuesday night, she indicated she was calling from a particular girlfriend's house. But the girlfriend has said she hadn't seen Karen in two or three weeks. And Squires has told Karen's parents he heard music in the background during the call.

Wary about damaging their case, sheriff's investigators are tightlipped about it. This much is known, however:

Karen apparently died of massive head injuries sometime between 6:30 p.m. and midnight Tuesday: She had been run over by her car and beaten with a rock.

Evidence at the scene (County Road 1110, a half-mile south of State Highway 158) took officers to the Desert Inn Motel in Midland. From there, the trail led to Midland Park Mall and Morse's arrest.

Her car was found parked Wednesday morning at a lounge on Highway 158. Its radio antenna and right windshield wiper were broken off, its exte-rior stained with blood. Easiest, quickest, su

WANT ADS reach thousands daily, WORK FAST. Dial 682-6222

That's all the sheriff's department will say about the matter. Period.

As investigators awaited her autopsy report, Karen Rickey was buried in Resthaven Memorial Park Saturday afternoon. And the flag at Midland High stood at half-staff.

Karen Rickey as a junior high school cheerleader. The Rickey house is full of the medals, ribbons and certificates Karen had earned playing basketball, volleyball and baseball.

Midland High School's flag flies at half-staff following the death of 17-year-old junior Karen Rickey. (Staff Photo by Paul Gilbert)

Hearing near on cancer machine

(Continued from Page 1A)

port groups - including lawyers for MMH — will appear in Austin along-side the hospital officials and particiants from the testimonies to the THFC.

Cappadonna, who has worked on many certificates of need for MMH, said solemnly, "This will be the

toughest one ... blocking another person's application." sed the ap

cate those of its competitor unless community need warrants additional hospitals to have those capabilities. This point was used by Odessa during the first battle in opposing the Mid-land cancer center; now Midland is using it to oppose Odessa's application In the case of the 6MEV - expected to provide 80 percent of the Allison Center's therapy - an additional 6,-000 treatments on cancer patients would warrant the purchase of a second machine in the area. The 6,000 treatment figure came from the certificate of need approved for the Allison Center which showed the population to be served by the Center at a level to require 6,000 treatments on some 240 patients a year in the 17-county HSA-12 area.

ages. MCH officials say they must replace the machine for more efficient use.

The 6MEV linear accelerator, on the other hand, is the "state of the art" in radiation equipment. An ex-

Editor's Report

(Continued from Page 1A)

and the poor.

Reagan freely admitted that everyone would have to make sacrifices. But the point he was trying to get across is that if we in this generation are willing to hurt a little, our children can be helped a lot.

That was the mood of his Wednesday speech, and the essence of his long-range hopes. To fulfill those hopes, he needs the cooperation of his countrymen.

It was only two weeks ago that the President, shortly after his Inaugural, explained directly to the country that we face an economic calamity of great proportions unless money matters are reshaped. At the time, he went over the heads of legislators and all special interest groups to tell. the people that we could no longer afford to simply run up staggering deficits to be inherited by a succeedng generation.

The Defense Department was the one exception to the President's budget-cutting, but in making that exception the President surely had the safety of future generations in mind. In thinking of the Pentagon's budgetary needs, and striking a balance between spending and saving, Reagan must have remembered the views of the late, great Sir Winston Churchill: "The soundest defense is a sound economy." To that end, everyone must make sacrifices. Criticism of the Reagan economic

Forecast calling for continued wind

The gusty, dusty conditions that prevailed throughout the Permian Basin Saturday will probably continue today, according to the National Weather Service at Midland Regional

Airport. The forecast is calling for sunny and mild conditions today, becoming fair tonight and Monday, but the wind will continue to blow from the north at 15 to 25 mph with occasional gusts to kick up the dust.

Today's high is predicted to reach the mid-50s, with the low tonight dip-ping to a chilly upper 20s. High Mon-day is expected to be in the low 60s. Saturday's high of 62 was more than

20 degrees shy of the record for the date of 85 set in 1972. Saturday morning's low of 49 likewise didn't threaten the record - 19 set in 1966.

North winds generally were 15 to 25 mph but gusted to near 50 mph at Tempie Saturday afternoon as thunder-storms swept through the Central Texas area. Temperatures see-sawed from the 30s over the Pan-handle to in the 80s in parts of South Texas. Scattered thunderstorms continued Saturday evening over the east and northeast, where a tornado watch was Skies were expected to be month to the saturday and the saturday and the saturday be and the

Skies were expected to be mostly fair Sunday, with oler temperatures statewide

program - on which the President

was swept into office in a landslide

last November - already began be-

fore he unfolded details to the nation.

That's to be expected in a two-party

system. I did note with interest,

however, that much of the criti-

cism was either muted or left to

As a prelude to unveiling his de-

tailed program for economic revitali-

zation, President Reagan told Con-

gress what he meant in the way

he would be asking fellow Americans to "sacrifice." He withdrew the 16.8

percent pay increases that former

President Carter proposed for Congressmen, top White House aides and

Cabinet members. Their minimum salaries are in the \$60,000-plus range.

The average citizen won't complain

about that kind of slash, which may

be a drop in the bucket with the broad

package the President wants, but

No matter how specialists, crit-

ics and the ordinary folks try to

examine this vast economic package,

it adds up to the largest tax cut ever in

our history and probably the big-

gest anywhere in the world. The

President's spending cuts are around

half as big as the \$13 billion promised

in his election campaign. His admin-

istration won't show a surplus in the

budget until fiscal 1984. Even then,

it will amount to \$500 million. Con-

sidering the economic mess he in-

herited, that date is pretty good

In a nutshell, President Reagan

hopes to cut government spending in the area of \$50 billion and slash taxes

by about the same amount. It's a bold

and highly imaginative plan to first unseat and then get rid of the eco-nomic monkey on the nation's back. But a busted nation would leave the

poor as the first victims in a harsh

world looking after its own interests.

President Reagan has repeatedly laid their fears to rest and did so again in

his televised message. They will not suffer, he emphasized, as he appealed

for their support, which they gave

him generously and massively. It is time that the President proposes

and the Congress disposes. But the

major arbiter is you, the elector-ate, which is clearly on President

arms as a four-point program for eco-nomic recovery. I would suggest that he made a fifth point that was the most important of all, with the chal-

lenge to all Americans in the inspiring

phrase, "It is within our power to

Reagan referred to his call to

Reagan's side.

change this picture."

every little bit helps.

going.

future review.

Texas summary

Mickey Cappadonna, a MMH trustee who also is president of the Regional Advisory Council for the 17county area expected to feed patients to the Allison Center, said this public hearing may not be the last straw.

According to Cappadonna, the Austin hearing will be "similar to a court proceeding," with a hearing officer taking testimonies from both sides. The officer and his committee will review the testimonies and present a recommendation to the three Commissioners, who will not be present for all of the hearing.

THE COMMISSIONERS, Cappadonna explained, then have the final say on whether the application is approved or denied. That final ruling should come within two to three weeks after the hearings.

After the final ruling is announced, it also can be appealed in district court, Cappadonna pointed out at a recent board of trustees meeting.

plication on one of Midland's most popular defenses: increased taxes for Midlanders.

Legg and Aldrige

Because the Allison Center will be subsidized by the hospital district taxpayers, residents fear the Odessa machine will rob the Center of income necessary for its future financial stability.

FOR EXAMPLE, the income of the Allison Center's new medical director Dr. (Alvin) Lee Schlichtemeier will be subsidized through the first year as the medical oncologist from Dallas helps set up the Center's activities before beginning his own practice here.

If patients who were cited to be in the "need area" of the Allison Center go to Odessa for treatment during the Center's crucial financial beginnings, the Center could lose much of its proposed clientele.

According to THFC standards, no hospital may add services or equipment which will significantly dupli-

Burglaries keep police busy during weekend

Several burglaries of businesses and residences filled the police logs at the Midland Police Department this weekend.

H.G. Goodson of 3322 Baumann Ave. reported the burglary of his 1974 Chevy Cheyenne pickup. Goodson told police someone removed the passenger door and mirror of the vehicle, valued at \$1,500 during the night. According to police reports, entry was gained to the vehicle by knocking out the left vent window and unlocking the door.

Radio Shack at No. 2 Plaza Center reported early Saturday morning the overnight theft of a Realistic brand AM/FM receiver, valued at \$599.95. William Conner, of the firm, notified police that someone have broken all the glass out of the front door with a metal pipe found at the scene, ac-

Police Roundup

cording to police reports. The suspect removed the receiver and left through the front door. Police reports indicate the alarm system may have been tampered with.

Best Western Motel at 1000 W. Interstate 20 reported that someone apparently using keys made off with a 19-inch Sylvania color television set-AM/FM radio valued at \$450. According to police reports, there was no sign of forced entry into the room, nor was there damage to a lock system on the television.

John Vinton Amos of 1202 W. Kentucky Ave. reported the burglary occurring sometime between 2 and 4 p.m. Thursday. Taken from his home was some \$350 in cash.

Late Friday night, Debra Thetford of 1300 S. Cottonflat Road reported the theft of a \$300, 18-inch Curtis Mathis color television set.

In other police news, Harold Campbell of 2600 N. Loop 250 reported he was assaulted by two males and a female driving a red 1970 Chevrolet Impala after 1 a.m. Saturday.

Arthur Graves of Big Spring reported the loss of a yellow gold wedding set with seven diamonds, valued at \$1,000, at Midland Regional Air-

port. Jim Pringle of 2613 N. Midland Drive told police someone had shot out the back window of his 1968 Ford with a BB gun Friday evening. The window is valued at \$200.

ODESSA ARGUES it is not competing with the Allison Center, but rather updating its current equipment.

The cobalt machine in use at MCH since 1971 is less accurate than the 6MEV, and the energy source - the cobalt block in the center of the machine - must be replaced as it is expendable in five to seven years. As the source becomes spent, MCH officials argue, radiation time must be increased to allow for the same dos-

tremely sensitive machine, the 6MEV works similar to a laser beam in terms of accuracy in radiation penetration. The advance machine has the precision to pinpoint the rays to destroy cancerous cells, while disturbing only a limited amount of healthy

The Varian company which makes the 6MEV says the machine is so sensitive, the company only manufactures them as orders come in because the machines are difficult to store. Orders for machines, therefore, take about a year to fill.

Special rooms have to be built with six- to seven-feet thick walls to maintain "environmentally clean" surroundings for the delicate piece of machinery. In addition, the machine must be moved totally assembled including into the building or room where it will be used. In fact, the Allison Center contractors allowed for the equipment's arrival with collapsable wall sections which later will be made secure.

Midland man remains critical

A Midland man remained in very critical condition in the intensive care unit of Midland Memorial Hospital late Saturday night after a Thursday night auto accident that killed another Midland man.

Cleo Knight, 41, of Midland, underwent surgery for head and internal injuries at the hospital Thursday night and Friday morning after the accident which occurred 14 miles west of Garden City at 9:45 p.m. Thursday.

The two-vehicle collision left 30-year-old Midlander Roger Graham dead at the scene

Knight had been in very critical condition since late Friday.

One killed, one burned in Odessa industrial accident

ODESSA - An Odessa man was killed late Friday night and his partner severely injured when the cherrypicker in which they were riding bumped into a power line.

Welden Ross Harbison, 51, of Odessa, was pronounced dead at the scene by Ector County Justice of the Peace Jimmy Harris at the Holloman Construction Co. yard. Harbison was electrocuted instantly when he received a high voltage shock from the wire.

James Payne, 61, of Odessa, was thrown from the cab of the cherrypicker during the accident and remained in stable condition Saturday in the coronary care unit of Medical Center Hospital.

Payne was in the cockpit of the 12-ton hydraulic crane in the yard at 7500 West University Boulevard Friday about 9 p.m., while Harbison was outside guiding a bucket cabled to the vehicle's arm, according to an Ector County Sheriff's office spokesman.

While Payne was manuevering the bucket, it bumped a power line about 17 feet above, sending an electric volt Payne suffered burns to his feet and hands and a severe jolt to his heart. Harbison's body was taken to the

through the metal machinery.

Hubbard-Kelly Funeral Home.

Harbison was killed instantly and

Hospital creates new board

Parkview Hospital Administrator Steve Wallach has announced the formation of a Community Advisory Board to assist the private community hospital with its growth and development plans in the Midland area.

Named to the nine-member board were Giffert F. Alstrin president of Western State Bank; Bill Clanton, director of purchasing at Midland College; Russell F. Craddick, local businessman; Bill Dillard, vice president of Core Laboratories; Louis F. Hochman, proprietor of Luigi's Restaurant; Ron Lynch, director of sales and marketing for HBF Corporation; Dr. Martha Madsen, pathologist and member of Parkview's medical staff; and Reagan H. Legg, local attorney.

The board held its initial meeting Thursday at the hospital for a briefing on the hospital operations, development programs and other upcoming programs at Parkview.

In his opening remarks to the board, Wallach extended the thanks of hospital owners American Medical Centers, Inc., as well as the hospital staff, to the new board members for their willingness to serve and assist Parkview in its growth.

"We are extremely pleased that each of our board members has chosen to work with us in seeing Parkview become a viable health care entity in our community.

The hospital also began a streamlined admitting procedure last week. At a meeting at the Midland Hilton with representatives of physicians' offices, the program was detailed in a presentation by Merrie Cox, RN, patient care coordinator and director of admitting services for the hospital.

The new program, Ms. Cox said, would allow physicians to schedule patient admissions more easily whether for inpatient or outpatient surgeries, with reduced waiting times and pre-admissions for patients in many cases.

In addition, a second phase of the program, soon to be introduced, will provide a program for outpatient surgery which would lower the costs of such surgery.

Wallach also announced a few personnel changes that have retaken place recently at Parkview.

Judy Bartley, RN, director of nursing, has been promoted to nursing administrator. In this new role, Mrs. Bartley will have increased administrative responsibilities not only in nursing, but also in other administrative programs.

Mrs. Bartley, who has been with the hospital eight months, came from another proprietary hospital in Houston where she was director of nursing.

Merrie Cox, RN, has joined the staff)s patient care coordinator and director of admitting services. Ms. Cox, who was previously with the MHMR program here, joined the staff two months ago and began developing the hospital's admitting and patients relation program.

Patricia Coleman, RN and CCRN, was recently hired as nursing supervisor of the hospital's critical care program. Ms. Coleman, who came to Parkview from the Los Angeles area, is a certified critical care nurse with extensive background in developing and managing critical care units. Currently, she is working with Parkview's medical staff to rewrite many of the critical care programs.

Deborah Knabe has been appointed administrative assistant for the hospital. Coming to Parkview from Denton where she had similar responsibilites, Ms. Knabe will be directly responsible for administrative office management, personnel management and certain public relation functions.

In other hospital news, Wallach announced Parkview's support of the Hospice of Midland's application to the Texas Health Facilities Commission for a certificate of need for the program. Sharon Holman, director of the support group for terminally ill patients and their families, received a letter from Wallach offering the hospital's support.

In his letter, Wallach indicated Parkview would commit a minimum of three of its 60 beds to any Hospice patient in need of short-term hospitalization.

emocrats blast Clements

AUSTIN, Texas (AP) - The State Democratic Executive Committee took several swipes Saturday at Gov. Bill Clements. criticizing his regional primary plan and charging he is misusing his power to help a Republican candidate in a senate race.

Committee members also complained Clements has played politics with his appointments to state boards. Sue Cox of Dallas, chairperson of the SDEC watchdog committee, said Clements told an appointee he would get another term if his wife would resign from her Democratic Part, post.

Mrs. Cox did not identify the appointee. She said Clements promised reappointment if the man's wife "pledged not to be active in political activity for 'x' number of years." State Democratic Chairman Bob Slagle said the woman has not resigned her party position.

In other action Saturday the executive committee selected Lowell Lebermann of Austin as its new state treasurer.

The slaps at Clements included a resolution by Lena Guerrero of Austin, charging Clements and Secretary of State George Strake showed "insensitivity" to Rio Grande Valley voters in setting a runoff election in a special senate race.

Republican Ricardo Hinojosa of McAllen and Rep. Hector Uribe, D-Brownsville, meet in the runoff Tuesday. Miss Guer-rero's resolution, approved unanimously, said Clements and Strake "used the power of their offices to disenfranchise" voters

by allowing only one day for absentee balloting, and barring mail-in absentee ballots in the runoff.

Clements is campaigning for Hinojosa. The SDEC approved a resolution supporting Uribe. Mrs. Cox said the watchdog committee was preparing a report on Clements' "misuse of power" in the senate race.

Committee members also called for the Legislature to set an election on a constitutional amendment to allow the election of the secretary of state, who is now appointed by the governor.

The committee also approved a resolution against Clements' idea for a regional presidential primary. Clements has said the primary, including Texas and surrounding states, could give the region more clout in national politics. The governor wants a March primary - with only the presidential race on the ballot. Other races would be on a May ballot.

Mrs. Cox's motion said the Democrats oppose "split day" primaries. Texas Democrats feel there is a stronger turnout for their primaries if all races are on one ballot, rather than separate days, because there usually are more contested races in Democratic primary races than on the GOP ballot.

The committee unanimously selected Austin businessman Lebermann as its new state treasurer. He replaces Jack Martin of Houston, who resigned to take a post on Sen. Lloyd Bentsen's staff. Lebermann, an Austin beer distributor, was treasurer of John Hill's unsuccessful gubernatorial campaign.

Ecuador, Peru begin ceasefire

LIMA, Peru (AP) - Peru and Ecuador re-established a cease-fire along their disputed common border after skirmishes that killed a Peruvian soldier and wounded 13 others, Peruvian officials said Saturday.

An government spokesman in Quito, Ecua-dor's capital, said the Foreign Ministry there was "analyzing" the possiblity of a break in diplomatic relations with Peru.

The cease-fire originally went into effect Feb. 2 after the two Andean neighbors ended a fiveday territorial conflict.

Military observers from neighboring South American countries said there had been no new attacks since Friday when, according to a Peruvian military communique, a confrontation erupted after ground forces shot down a Peruvian helicopter on "a routine patrol mission" along the Ecuador border. The attack killed the helicopter co-pilot and injured 12 other troopers, it said.

Ecuador issued no report on casualties.

The Peruvian communique said said Peru responded by dispatching helicopter gunships to the area and wiped out the resistance. It never mentioned Ecuador by name.

Ecuador's government claimed Peru violated the cease-fire first, bombarding the jungle outposts of Machinaza and Mayaycu. Ecuador's national information minister, Augusto Alvarado, said the gunships dropped 100 Peruvian paratroopers on the two outposts.

Peru calls Machinaza "PV4" and and Mayaycu "Mallaico." It claims both garrisons and a third outpost in the area, Paquisha, all lie in Peruvian territory, but Ecuador disputes the claim.

The disputed border lies on the eastern slope of the Cordillera of the Condor, a mountain range some 800 miles north of Lima on the western edge of the Amazon jungle. Alvarado told reporters in Quito Saturday that

the Ecuadorean Foreign Ministry "is analyzing the possibility of breaking diplomatic relations with Peru." There was no reaction from the Peruvian Foreign Ministry.

Peru said on Feb. 1 it had regained control of all three garrisons.

Foreign Minister Alfonso Barrera of Ecuador said early last week that Paquisha was in Peruvian hands, but there was a dangerous stand-off between the two countries' forces at the other two outposts.

Foreign reporters flown to the three outposts by Peruvian helicopters since the Feb. 2 ceasefire have said they were occupied by Peruvian forces.

of Brownwood officiating. Burial will be in Engelwood Cemetery under the direction of Englunds of Slaton.

Mrs. Schmidt died Thursday night in a Slaton hospital after a lengthy illness.

Active in church, school and cultural affairs, she was honored as Slaton's Woman of the Year in 1963. A native of Newlin, she graduated from West Texas State University and was a school principal in Amarillo before marrying Schmidt in 1920 and moving to Slaton where he was a civil engineer with the Santa Fe Railway. He died in 1977. She was a member member of the United Daughters of the Confederacy and the Order of Eastern Star and served as an elder of the First Presbyterian Church and coordinator for Slaton's 50th Birthday celebration.

Other survivors include a daughter, a son, 12 grandchildren and four great-grandchildren.

J.M. Altom

FORT WORTH - J.M. Altom, 97, of Fort Worth, father of Mrs. Gene Byford Barbee of Fort Worth and formerly of Midland, died Friday in Fort Worth.

Services will be Monday at Shannon Funeral Home in Fort Worth.

Other survivors include his wife and a number of grandchildren and great-grandchildren.

K.T. Hudson Jr.

DENVER, Colo. - Services for K.T. Hudson Jr., of Denver, and formerly of Midland, Texas, are pending at a Denver funeral home. Hudson died Tuesday in a Denver

hospital following a brief illness.

He was born May 27, 1939, in Roby and married Norma Burge in July 1978. He moved to Denver from Midland about 10 years ago and was a bartender.

Survivors include his mother and stepfather, Mr. and Mrs. Howard Moore of Midland; three sisters, Paula Gill and Clarieca Tabors of Midland and Barbara Harris of San Angelo; and one brother, Clarence Gipson of Midland.

H.O. Allen

H.O. Allen, 1306 North A St., died Saturday afternoon in Keller. Services are pending at Newnie W. Ellis Funeral Home.

Reagan ponders Social Security

tem.'

Social Security.

SANTA BARBARA, Calif. (AP) - President Reagan "wonders if there is a possibility" that participation in Social Security could be made voluntary for some Americans but has no plans to try to change the system, a White House spokesman said Saturday.

The spokesman also said Reagan supports federal action to tighten the growth of money and credit in 1981 even though that could keep interest rates at what he once said were absurd levels.

Questions about Reagan's Social Security stand, which have dogged him over the years, were raised

Bomb blast wounds eight

MUNICH, West Germany (AP) - A powerful bomb exploded late Saturday at the Munich headquarters of U.S.-financed Radio Free Europe and Radio Liberty, wounding eight people and causing extensive damage, authorities reported.

Police said the bomb went off shortly after 10 p.m. when there were not too many people in the building. They said five of the injured were treated at a nearby hospital and released but one woman was in critical condition and two other victims were in serious condition.

White House Deputy Press Secretary Larry Speakes said he could not confirm the newspaper's story and added, "The president remains fully committed to the integrity of the Social Security sys-COMMERCIAL BANK-

blunders in Greek town

U.S. apologizes for Army

ATHENS, Greece (AP) - Greece protested to the United States on Saturday over an unauthorized military exercise in which 20 U.S. Army personnel wearing gas masks and protective clothing marched along public highways and into a town in northern Greece.

Foreign Minister Constantine Mitsotakis summoned U.S. Ambassador Robert McCloskey to his Athens office to deliver the protest despite an apology and explanation of the incident issued Friday by the U.S. Embassy

The exercise, part of a regular training program, was carried out by the detachment on Thursday in Drama, 70 miles northeast of Greece's northern city of Thessalonika.

The Army personnel, stationed just outside Drama, were dressed in clothing designed for use in cases where chemicals might be employed. They marched along the highways and into the town center, creating anxiety among local townspeople

Friday's statement from the U.S. Embassy said the march occurred outside a normal training area, was unauthorized and that those responsible were reprimanded.

The incident came at a sensitive point in U.S.-Greek negotiations over the continued operation of U.S. military bases in this NATO country. There are four major U.S. bases in Greece and several minor installations, including the one outside Drama.

Socialist and communist reaction to the incident was scathing, with the leader of the Panhellenic Socialist Movement, Andreas Papandreou, reiterating his long-stated contention that U.S. military forces consider Greece "their protectorate and an open field."

Papandreou, who seeks Greece's withdrawal from NATO and the closing of the U.S. bases, is running against Premier George Rallis, leader of the New Democracy Party, in elections scheduled later this year.

Following his meeting with McCloskey, Foreign Minister Mitsotakis announced that "the incident was due to the violation by a small detachment of Americans under a junior officer of clear and specific agreements and rules."

The announcement added that U.S. forces which are in Greece under existing agreements "should never carry out exercises outside their barracks except in cases of joint training with Greek units to which they are attached, and following special permission."

U.S. support for junta may destroy democracy

WASHINGTON (AP) - U.S. support for El Salvador's civilian-military junta is "a diplomatic mistake and a misreading of Salvadoran history" that could contribute to defeat of the democratic cause in that Central American country,

according to a report prepared for the State Department. The report details El Salvador's political changes over the past 130 years and presents an indirect challenge to the Reagan administration's depiction of El Salvador's left-wing insurgency as largely Soviet- or Cuban-inspired.

Not once in the 132-page document do the authors mention Soviet or Cuban involvement. Rather, they trace the roots of the civil conflict to more than a

century of economic inequality and generations of repressive rule. The document, written two months ago by three University of North Carolina professors under contract to the State Department, is part of a series entitled: "Democracy In Latin America: Prospects and Implications." A draft version was obtained by The Associated Press.

The report is criticized by some government officials, who asked for anonymity. They said there are disagreements over the document's neglect of external involvement and its view of what constitutes a legitimate democra-

The Salvadoran government - which succeeded the military-dominated regime of Carlos Romero in 1979 - consists of centrist Christian Democrats and conservative military officers. U.S. officials say American support for the junta is based partly on the belief that it the best hope for a moderate solution to El Salvador's problems, and partly on the need to block communist inroads

The Reagan administration is now lobbying Congress and U.S. allies for an increase in aid to El Salavador. Plans to step up economic and military assistance would include the dispatch of U.S. military advisers to the tiny Central American nation.

Last week, a State Department memorandum charged that Salvadoran civil strife had become "a textbook case of indirect armed aggression by Communist powers."

Rankin to honor **Dr. James Gossett**

RANKIN - The city of Rankin will say thank you to one of its very special citizens today when it honors Dr. James D. Gossett in a special appre-ciation celebration at the Rankin High School Auditorium beginning at 3 p.m.

Gossett is being honored for 29 years of medical and civic service to Rankin and Upton County.

Gossett moved to Rankin to begin his medical practice July 1, 1952. In the early 1950s he was designated assistant chief of staff for the Upton **County Medical Association.**

Among his many civic duties include county chairman of the Republican party, member of the Rankin school board for 19 years (president for 16 years), football team doctor and sometime cheerleader, charter member of Lions Club and a member of the Methodist Church, having served as a trustee and chairman of the finance committee.

Gossett was born Sept. 16, 1924, in Post, the youngest of nine children. He and his wife, Pauline, have six children.

Mistress of ceremonies at today's festivities will be Judge Peggy Garner. Speakers at Gossett's "roast" will be A.C. Copeland, Eddie Hyatt, A.E. Ivy, Bryan Gossett, Tom Craddick, Tommy Owens, Dr. Nunally, Tom Gossett and Ruben Peterson.

Janice Hyatt will present a biographical sketch of Gossett, while Mike Phillips and Lerii Fithugh will provide the music.

There will be a reception immediately following the program.

Federal judge tentatively approves TMI settlement

HARRISBURG, Pa. (AP) - A federal judge has tentatively approved a \$25 million settlement for the economic claims of people living around the Three Mile Island nuclear plant, site of the worst accident in the history of U.S. commercial nuclear power.

The settlement, still to be made final, would compensate people who lived, worked or operated businesses within 25 miles of the nuclear plant during or after the March 28, 1979, accident.

Ken McKee of General Public Utilities Corp., a spokesman for Three Mile Island's owner, said Saturday that the pact was reached Friday among attorneys for the accident victims and two nuclear insurance pools.

U.S. District Judge Sylvia Rambo gave tentative approval, calling the settlement "reasonable and appropriate."

Bush announces new task force on killings

were buried Saturday, Vice President George Bush announced formation of a special task force to coordinate federal aid to Atlanta authorities investigating the deaths or disappearances of 20 black children.

Former Gov. Lester Maddox, meanwhile, placed an advertisement in an Atlanta newspaper urging the killer to "please surrender quickly" to him. Maddox said he would share any reward with the killer, for legal expenses.

"Please don't cause any more death, grief, fear and tragedy for Atlanta's children, their families and Atlanta," his appeal said. "You are gaining nothing for yourself, while destroying or ruining the lives of many."

The federal team will be headed by Charles Rinkevich of the Law Enforcement Assistance Administration, Bush said in an announcement made in Washington, D.C. It will combine support services from the departments of Justice, Health and Human Services and Education, but "will not impinge on the police investigation," he said.

Bush did not specify what new services would be available, but said he would spell them out sometime this week

Maddox said his telephone began ringing at 7 a.m. Saturday after his ad appeared in the combined editions of the Atlanta Journal and Constitution. The callers were either reporters or individuals who 'offered suggestions, different ideas on who they think it is," he said.

The advertisement said that if the person responsible surrenders to Maddox and the former governor receives the \$100,000 reward money, Maddox would give \$10,000 to the suspect to "assist with your legal

ATLANTA (AP) — As two 11-year-old victims defense." The remaining \$90,000 would be divided among the families of the children, the ad said. Friends and family of two of the child victims mourned their dead Saturday at funeral services in Atlanta and Louisiana.

NOTHING ELSE works like WANT ADS. Dial 682-6222

Jeffery Lamar Mathis, 11, was buried in Atlanta, while services were held in Arnaudville, La., for 11-year-old Patrick Baltazar. Both boys' bodies were found Feb. 13.

Baltazar's body was found in north Atlanta about a week after he disappeared. Like several other victims, he had been asphyxiated. Baltazar was living in Atlanta with his father, but was returned to Louisiana, where his mother lives, for burial.

Mathis's remains were discovered on the south side of Atlanta. He had been missing since March 1980, and a cause of death could not be determined, medical examiners said.

On Saturday, about 250 volunteers searched the area south of the city where Mathis' body was found.

Another 50 volunteers concentrated on the Bowen Homes housing project to the north, where Curtis Walker, who disappeared Thursday, lived. Walker, one of two children added Friday to the special police task force investigation, was last seen at a nearby shopping center.

Walker was added to the list after an intensive 24-hour search by police and volunteers failed to locate him, Public Safety Commissioner Lee Brown

Authorities also added the death of Aaron Darnell Wyche, 10, to the task force investigation Friday. His body was found June 24 under a railroad trestle in DeKalb County inside the Atlanta city limits.

Forming trade unions cuts down on vodka consumption

Hearst Special News Service

SECTION B

ZBROSZA-DUZA, POLAND — The consumption of vodka in this poor farming community has dropped by at least a third since Poland's crisis started last summer.

The falling off in drinking grew especially noticeable after Polish peasants began their own movement to form a trade union, "Rural Solidarity," to defend their interests against the pressures of the communist regime.

"Before the strikes, the peasants were inclined to keep to themselves and spent a lot of their time in hard drinking," the parish priest, Czeslaw Sadlowski, said. "If I upbraided them for it, they replied that there was no

Yd.

e

on

point in doing anything else. Now, they are ashamed to get drunk because they are aware that the countryside has come awake and that there may be a chance to do something about their poverty." Rural Solidarity, with its symbol of

Rural Solidarity, with its symbol of a ripening husk of corn, is stalled. Poland's high court ruled earlier this month that the peasantry could form an "association," which is subject to government regulation and cannot order strikes, but not a union. The farmers, strongly backed by the Catholic Church, have not abandoned the struggle. The ultimate fate of Rural Solidarity remains one of Polnd's key unanswered questions. If Zbrosza-Duza's inhabitants found

solace in alcohol, that did not mean

they were wholly sunk in lethargic despair. Long before last August's industrial strikes touched off a nationwide crisis, this region, about 60 miles south of Warsaw, showed clear signs of restiveness. As long ago as 1978, dairy farmers here went on strike and refused to deliver milk to state depots at officially decreed prices. A year later, it was the turn of fruit farmers to do the same.

"For us," Pavel Minchik, a young local farmer and Rural Solidarity leader, explained, "dueling with the administration is a way of life. Our economic laws are so completely weighted against us that there is nothing else for us to do."

Unlike any other communist country, 75 percent of Poland's land is owned by private farmers who till an average of 15 to 25 acres each. But, ever since the Communist Party was compelled immediately after World War II to accept private farming on a large scale, it has labored incessantly to undercut the peasant "capitalists," most of whom earn less than \$4,000 a year.

"Ideological obsessions have worked against the national good," Father Sadlowski said. "It would have been better to encourage the farmers to produce more and to better their own conditions. But the authorities could not bring themselves to do this since their ideological training forbade it. Instead, they tried to threaten and wheedle the farmers into producing more. Of course, they failed because the farmers knew that they personally would be no better off than before and possibly even worse off. So the result has been almost constant food shortages."

The rural areas also were neglected by communist dogmatists who had little interest in the welfare of "uncollectivized" peasants. The streets of Zbrosza-Duza, like those of other farm villages throughout Poland, remain unpaved footpaths into which one is liable to sink ankle-deep during seven or eight months of the year. The houses, mostly still of unpainted wood, are ramshackle and primitive. Even a few newer ones made of brick seem prematurely decrepit. Electricity in the villages breaks down frequently, visitors are told. There is one bare little village store -- with almost nothing on its shelves to sell except a few rusted tins of sardines.

few rusted tins of sardines. Minchik and his wife, Veronica, built their three-room house with their own hands soon after they married seven years ago. Each has their prized possession. For Veronica, it is a refrigerator. Her husband's is his plow horse which cost the equivalent of two-thirds of his average annual income.

They had laid the foundations to add rooms — they have three children — but the work is temporarily at a standstill. "When I went to the state cooperative to buy cement, they told me there was none available," Minchik said. "I was told to buy it on the 'free' market."

Second Free Enterprise Day near

Insurance executive to keynote conference

William H. Seay, chairman and chief executive officer of Southwestern Life Insurance Company of Dallas, will be the keynote speaker at the second annual Free Enterprise Day at Midland College.

More than 300 selected high school and Midland College students are scheduled to attend the event in Chaparral Center on Thursday, Feb. 26.

Also featured on the program will be George R. McVay, vice president, real estate, Hunt Oil Company, Dallas.

A panel discussion on free enterprise and oppor-tunities for young people will be moderated by Charles D. Fraser, chairman of the board and members of the First National Bank of Midland. Members of the panel include Tony Martin, chair-man of the board of Midland National Bank; Juanita Bryant, district manager, business service center, Southwestern Bell Telephone Compnay, Lubbock; and Dr. Bernard List, vice president, Texas Instruments, Inc., Midland.

THE PROGRAM OPENS at 9:30 a.m. Thursday with a welcome by Dr. Al G. Langford, president of Midland College. Harry W. Clark, senior vice president, First National Bank of Midland, will introduce the theme speaker, George R. McVay, whose topic will be "Do Yellow Ducks Carry Green Umbrellas?

Following the panel discussion, visiting high school students will be given tours of the MC camgus, led by members of the Midland College Student Senate.

During lunch, music will be provided by members of the Midland College Stage Band, directed by Dr. Don Grant.

J. Woodford Sale, Southwestern Life Insurance agent in Midland, is to introduce Seay, whose keynote address will be on "Free Enterprise."

Dr. Raymond Yell, dean of instruction at Midland College, will make closing remarks. Adjournment is cheduled for 2:30 p.m.

SEAY, A GRADUATE of Woodrow Wilson High School in Dallas, worked for Westinghouse Corporation in 1936, then entered The University of Texas

at Austin. He lettered in track three years and was a member of the UT sprint relay team that set a world record. He received his degree in business administration in 1941 and served during World War II in the U.S. Army as an infantry captain.

He was a partner in a Dallas investment banking firm for nine years before joining Universal Life and Accident Insurance Company of Dallas as vice president in 1957. He was named president in 1961.

Seay When Universal was acquired by Southwestern Life in 1958, Seay was named executive vice president and director. Four months later he was elevated to president of Southwestern Life, which has grown during its 77 years into one of the nation's largest stock life insurance companies.

Seay is past chairman of the Life Insurers Conference, past president of the Texas Life Insurance Association, former executive committee member of the American Life Insurance Association, and past director of the Institute of Life Insurance and the Huebner Foundation.

HE SERVES AS a member of the Board of Directors of First International Bancshares, National Gypsum Company, A.H. Belo Corp. (Dallas Morning Texas Rangers Baseball Club, Texas Uti-

ral resources, energy and environment committee of the Dallas Chamber of Commerce, member of the Richardson Chamber of Commerce transporation committee, associate member of the Society of Industrial Realtors, member of the Greater Dallas Board of Realtors, member of the board of directors of the Richardson Bank & Trust, and ruling elder of the First United Presbyterian Church of Richard-

PANEL MODERATOR Charles Fraser received his bachelor's and master's degrees in petroleum engineering from The University of Texas at Aus-

He was employed by Mobil Oil Corporation for seven years and was an independent petroleum consultant for two years. He had been affiliated with First National Bank of Midland since December, 1966.

Fraser serves on the executive committee of the Permian Basin Petroleum Association, director of the Midland Chamber of Commerce, president of Eagle Comput-Fraser ing Corporation and director of the

Independent Petroleum Association of America. Juanita Bryant was educated in England and, as the daughter of a British naval officer and wife of a U.S. Air Force officer, has lived in England, France, Canada, South Africa and Gibral-

Mrs. Bryant became the first woman manager for Southwestern Bell Telephone Compny in Austin in 1969. She became division commercial supervisor in Lubbock in 1975 and district manager in Midland in 1978. While in Midland she was a member of the board of directors of the Midland Chamber of Commerce.

She now serves as district man-Bryant ager of Southwestern Bell's Business Service Center in Lubbock, which serves all businss customers in West Texas from north of Amarillo to Fort Stockton and west of Abilene. Mrs. Bryant is active in the Zonta International Club for executive and professional women, on the budget committee of United Way and the board of the Lubbock Civic Ballet.

DR. BERNARD List, vice president, division manager, for Texas Instruments in Midland, received his bachelor's and doctoral degress in electrical engineering from Johns Hopkins University

He served as chief of the electrical engineering division of Battelle Memorial Institute from 1951 to 1957. He joined Texas Instruments in 1957 and was named a vice president in 1976. He is responsible for development of speech processing and custom microfunctions for TI. List is a senior member of IEEE, member of Sigma Xi and a registered professional engineer in Ohio and Texas.

Tony Martin came to Midland in 1967 to assume the presidency of the Bank of the Southwest. The following year the Bank of the Southwest merged with Midland National Bank and Martin was named president of MNB. Last month he was named chairman of the board and chief executive officer of MNB.

List

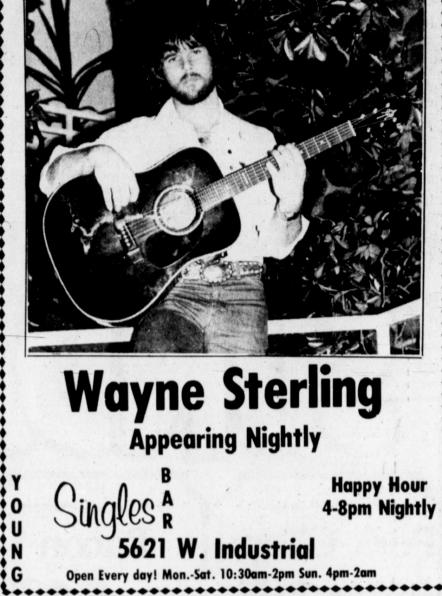

Martin has served the community in the past as president of United Way of Midland, president of the Martin Midland Petroleum Club, vice president of the Midland Chamber of Commerce, director of the Industrial Foundation of Midland and director of the Midland Country Club.

He currently is a member of the Society of Fellows of the Aspen Institute for Humanistic Studies, director of the Texas Council for Economic Education, member of the executive committee of the Texas Research League and member of the advisory committee of Objectives for Midland.

Cargo plane intercepted

ANCHORAGE, Alaska (AP) - A Soviet cargo plane was intercepted over international waters near Nome on Thursday, the U.S. Air Force says. The aircraft was of the type generally used for routine ice patrols in the Bering Sea, the Air Force said Friday.

Many roaches expected

DALLAS (AP) — The drought that kept Texas' rainfall well below average in the past year did wonders for the state's cockroach population.

And if the dry, warm weather continues through spring, a bumper crop of the bugs can be expected, says Richard W. Fullington, a specialist in inverte-brate ecology at the Dallas Museum of Natural History

Cockroaches are controlled naturally by fungi, bacteria and other diseases that thrive in moisture, Fullington said. During dry periods, the microscopic predators that normally prey on roach larvae become dormant, however.

Fullington said the museum is receiving many more calls than usual about the household pests.

And spokesmen for several local exterminating companies say they believe Dallas' cockroach population is booming.

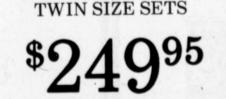

Bob Beaman of Miss Phoebe's Pest Control Co. said the lack of extremely cold winter weather has helped increase the number of roaches in the city. Aside from professional control, Fullington said the best way to get rid of roaches is to remove their food source by keeping kitchens fastidiously clean. He said few over-the-counter roach killers are effective, but suggested two methods to exterminate the insects

A solution of water and Diazinon, a poison available at hardware and garden stores, should be poured in a thin line along baseboards, he said. Because roaches breathe through the hair on their feet, they will absorb the poison when they cross the line. One treatment should last about six months, he said.

Another method Fullington recommended is a mixture of boric acid crystals and flour.

THE MIDLAND REPORTER-TELEGRAM, SUN., FEBRUARY 22, 1981

As Ortloff 'takes off' one job, he takes on another

Iy LANA CUNNINGHAM Staff Writer

His oots reach down into the moist soil of the Oklahoma and Missouri hills. Jut the city that nurtures him is arid Nidland.

Like a plant that gives back to the soil part of what it takes out, William Ortlof is returning part of the good forture that Midland has given him by inserting himself into civic work.

Just as he takes off the hat and cloak hat he wore as chairman of the 1980 United Way fund drive, he picks up the trappings that belong to the president of the Midland Chamber of Commerce.

One of the five founders of The Ortlof Corporation, a subsidiary of the Ecor Corporation, Ortloff recently was tugged into taking the top chamber position. His year with the United Way just ended, Ortloff also is a member of the advisory board of Juniar Achievement and on the board of the Petroleum Club.

"IT'S REWARDING to work with people in betterment of the community. I guess that's why I take on this civic work. It's catching," he said in comparing it to a communicable disease.

A former World War II pilot officer who served in Europe, Ortloff laughingly attributes his new chamber job

Midlander in Profile

as a result of people "calling in their markers. They appeal to your ego and make you think you're the only one who can do it, although that's not true."

But Ortloff didn't come into the new position without some ideas as to where he wanted to go with the job. For his one-year term, he has pinpointed three projects. -Resolving the downtown parking problem.

-Furthering the Objectives priority of improving south and east Midland.

—Studying the feasibility of moving Midland Air Park.

"It's embarrassing for customers to come to Midland and be late for appointments because they couldn't find a parking space. And then they wind up with a ticket," he said. "It leaves a bad taste in their mouths."

MIDLAND MAY be much smaller than metropolitan areas such as Dallas, Houston or San Antonio, he noted. But the city "could wind up with office areas moving to the outskirts. This is due in large part to the parking problem."

The executive committee of the chamber felt the problem has become severe enough to take on the job of coming up with some solutions, he said. With Joe Kloesel at the helm, the committee is obtaining proposals from parking consultants.

Whatever solution the committee draws up, it will be taken to the Midland City Council for what Ortloff hopes will be some action. "The council has indicated a keen interest in the subject," he noted.

The Objectives for the Eighties program last year, sponsored by the chamber, keyed its top priority to improving the dying south and east sectors of Midland. Ortloff doesn't expect to see a marked improvement in only one year, but he does plan to see some projects get off the ground during his term.

"I think it's a tremendous project," he said of the objective. "There's no. starting place, no small steps" that can be taken.

This will be a longterm project. "There's not an overnight solution, nor will just a Band-aid work."

Ortloff admits his last personal project is controversial, and that is the relocation of Midland Air Park. That project, too, was defined in the Objectives program, and later by an

William Ortloff

Urban Land Institute panel which studied the proposal.

THE INSTITUTE SAID relocating the inner-city airport was feasible. Ortloff said a chamber committee also is looking at the feasibility and will obtain input from other consultants. The committee also will seek the best method for accomplishing the move.

"We will look at how best it could be done to satisfy most of the concerns of all "the people and still provide a quality facility. Air Park is used by a lot of small aircraft, and that is part of the problem," said Ortloff.

A soft-spoken man who talks at a measured pace, Ortloff explained the city has grown up around the airport in the north part of Midland.

"It lies directly in the path of the natural growth area. And when the Loop 250 is done, I imagine the growth out there will be accelerated."

As it is, he added, "There's not much comfort in a plane taking off over a grade school (Hillander) and a college (Midland College)." croaching city out as much as the law allows, according to Ortloff."

He foresees complications from the Federal Aviation Administration concerning restrictions dealing with funds generated from the sale of Air Park land.

Ortloff, however, used the two-letter word, "if" throughout his perusal of Air Park. "If we're able to find a way to practically move the facility," he said of future plans.

But if there is a possible way to move Air Park, then "I'm confident the people involved with the chamber will find that way."

THAT ATTITUDE of always "finding a way" is Midland's identifying trait, according to the professional engineer who heads up the engineering-construction firm.

"That's an amazing part of this city; they haven't learned it can't be done and I hope they never do." Ortloff has observed Midland's ups

and downs after moving here in January 1962. Even during its "down" times, he said, Midlanders still had an optimistic attitude.

"People were trying to do something about it. That's when the chamber started the Industrial Foundation...to try and attract other industries to offset the petroleum industry cycles.

"In both good and bad times, people feel like it can be done. I've seen other communities and they give up when they have a little adversity."

Ortloff said he's traveled throughout the country, and it's Midland he prefers, "although I would prefer to have a few lakes and trees and mountains around it," he jested.

And the chamber is doing something about the lack of trees through its Visual Improvement Program, he added.

In a joking manner Ortloff mentioned the "lake" in Wadley-Barron Park, referring to the rising ground water. "When I moved here, people told me the annual rainfall was about 12 inches and 'you ought to be here the day it comes." **REPEATING WHAT** others often have said about the Tall City, Ortloff believes that "Midland is a unique city. It's amazing to see what's happened to the skyline in the last five years. It's exploded," he said in reference to the numerous high-rise office buildings.

"And it's overwhelming to see the amount of office space under construction or planned...1½ million square feet," he said, shaking his head. The fears voiced by some that one day these buildings will stand vacant were heard 10 to 15 years ago, too.

PAGE 3B

"The fears were voiced in 1965 and again in 1972. I can't say it won't happen," he said. But he views Midland's future "with a prosperous economy, almost independent of what happens with the national economy."

And throughout that growth, he added, the chamber will be involved in supporting local government bodies in their programs.

El Salvador would rather have money

SAN SALVADOR, El Salvador (AP) - The president of El Salvador's ruling junta, Jose Napolean Duarte, Saturday announced the arrest of a former junta member who was the most liberal voice in the government until his removal. Duarte also told The Associated Press that his country needs

economic assistance from the United States more than military help and could do without American arms if guerrilla weapons allegedly coming from Nicaragua were cut off.

His statement comes as the United States is considering stepped up arms aid to help the junta put down the guerrillas. Duarte said Col. Adolfo Arnoldo Majano, ousted in a power

play last December, was captured in the capital and was in custody of the Defense Ministry. He would not disclose the reason for the arrest.

A Panama City radio station monitored in Washington said Duarte told the station Majano was on active status in the army and will be court martialled.

Majano dropped out of sight after he left the junta and ignored demands by the five-man junta's other military member, Col. Jaime Abdul Gutierrez, that he "turn himself in.

The reports of the arrest threaten to increase tensions between the right and left here, which have been engaged in a violent power struggle that has resulted in nearly 15,000 deaths in the past 14 months.

Majano was the most liberal member of the junta and the prime mover behind land and social reforms that are opposed by paramilitary rightist assassination squads.

There were unconfirmed rumors in the capital that leftists, who want to establish a Marxist state, were planning a large-scale attack Sunday and again March 10.

Duarte told The Associated Press on Saturday that there are arms storehouses in Nicaragua intended to back the guerrillas and if the arms stay in Nicaragua "El Salvador would only have to face economic problems."

"If we can keep nations such as Cuba, East Germany, Ethiopia, North Korea, Vietnam, Libya, Angola, and other communist nations who are using Nicaragua, from sending arms to the guerrillas," El Salvador could seek a political solution to its problems, Duarte said. "If these arms were stopped, El Salvador would not need arms," he said.

He said El Salvador's industry runs the risk of being paralyzed by a lack of international, private credit.

'For this reason, right now economic aid is much more important than military aid," he told the AP.

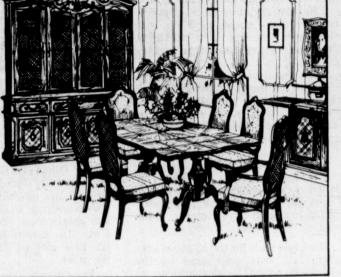

The guerrillas in the past month have stepped up a campaign to undermine the country's fragile economic base, reportedly blowing up transportation and communications links, attacking public works construction crews and burning cotton fields.

In an interview with The New York Times, Duarte said his nation needs \$300 million in credits to replace foreign investment lost because of civil violence and political instability.

While repeating his claim that Nicaragua is a staging ground for weapons bound for Salvadoran guerrillas, he said Nic-aragua is not El Salvador's enemy and suggested bilateral talks on the grounds that neither economy can afford confrontation

Claims that Nicaragua is a transfer point for weapons shipments to El Salvador surfaced in January during an abortive "final offensive" launched by guerrillas.

Honduran authorities arrest 30

TEGUCIGALPA, Honduras (AP) - Police arrested at least 30 people as suspects in two bombings here, authorities said Saturday. They said the people were seized as they tried to leave this Central American capital "with a certain quantity of subversive material.

The arrests came over a 24-hour period ending Saturday morning, police said, and followed the bomb explosions Friday in a plastics plant and in the offices of the government banana corporation. Police said the explosions caused heavy damages but no injuries.

An anonymous woman caller to a radio station said "In this form we publicly protest the great errors of the Honduran military.

The call and the bombs apparently had to do with an army decision to militarize an agricultural project in the north of the country, where last week workers deposed directors of a cooperative after accusing them of misusing funds.

The moderate military government of Gen. Policarpo Paz Garcia is investing an estimated \$300 million in the region.

Missionary to speak

MIDKIFF - Ted Savage, who has been a missionary to Zambia, will begin a week of revival services today at Midkiff First Baptist Church.

The Reporter-Telegram incorrectly reported Saturday that the re-vival would be held at the Midkiff First Church of Christ.

Savage will begin the series of meetings during the 10:50 a.m. worship hour today. Evening meetings will be at 7 p.m. through Friday.

SAVE \$300.00

scape'' by Edward The winner of this competition will take its play to Ardmore, Okla., for the regional festival this spring. The regional winner then competes in the national festival in Kalamazoo, Mich., later

As of press time Saturday night, there were two more productions to come out of the 11 scheduled. The final results will not be announced until the noon brunch today.

The festival is being hosted by Denton Community Theatre and Texas Woman's Univer-

sity. The competition is quite stiff and the adjudicators - Jerome Lawrence, Edward Wright and Mona Toehling - have a difficult time ahead of them.

All are eminently qualified to be judging the competition.

Lawrence, playwright, lecturer and educator, is originally from Dallas where his play "Inherit the Wind," that he coauthored with Robert Lee, was first produced. Other plays by the two include "Auntie Mame," "Mame," "The Night Thoreau Spent in Jail," and "First Monday in October," which MCT performed this past spring.

Lawrence said the quality of the plays presented at this competition "is fantastic. I think the community theatre is a great, great movement in the country and particularly in the Southwest. The festivals are a great exercise.'

Lawrence was especially pleased that sever-al of the companies were presenting new plays instead of "Broadway retreads.

Wright, an educator, actor and author, is now professor emeritus at the **Uuniversity of California** at Long Beach. His most recent book, "Understanding Today's Theatre," is used as a textbook by 250 universities. Miss Poehling, actress and director and community theatre administrator, is the former executive director of the Oklahoma Community Theatre Association. Currently, she is on the national American **Community** Theatre board and serves as a theatre consultant for community theatres.

So far, it would appear that of the nine productions that had performed by late Saturday night, four are in the running

Hearst Corporation acquires Morrow publishing company

The Hearst Corporation has signed an agreement through which it will acquire all of the outstanding stock of William Morrow & Company Inc., the distinguished New York-based trade book publishing company. The anoun-cement was made jointly today by Frank A. Bennack, Jr., president and chief executive officer and president of SFN Companies, Inc., the Chicagobased difersified publishing company. The purchase price is \$25,250,000. Morrow, founded in 1926, is engaged principally in the publication of ficfor adults and children as well as publishing its own paperbacks. In recent years Morrow has had a string of national best sellers which have included The Third Wave by Alvin Toffler, Shelley by Shelly Winters, The Book of Lists by David Wallenchinsky and other members of the Wallace family, A Walk Across America by Peter Jenkins, The Formula by Steve Shagan as well as Rage of Angels by Sidney Sheldon and The Key To Rebecca by Ken Follett, both of which are currently on national fiction best seller lists. Commenting on the potential for Hearst, Bennack said: "We are fortunate to acquire such a quality trade book publishing house with its fine editorial staff and management team headed by its presi-dent, Lawrence Hughes." Morrow,

with approximately 200 employees, operates from New York City and West Caldwell, New Jersey.

Hughes will report to Gordon Jones, vice president ofHearst Books/Business Publishing Group. "Our other book activities, Avon, Arbor House and Hearst Books will continue to operate as they have in the past as separate divisions of Hearst and as part of the Books/Business Publishing Group", Bennack said. Avon is a mass market paperback publisher; Arbor House is a hardcover publisher and Hearst Books publish "how to

Shuckworm damaging pecan trees

By CHARLES W. GREEN Midland County Extension Agent — Agriculture

The hickory shuckworm, often called merely "shuckworm" has caused damage to pecan trees in Midland County for the past several years. Number of this insect pest has been on an increase, especially in home yard trees.

Shuckworms feed in the shucks of developing pecans from August through October. Feeding activity results in poorly filled kernels, in delay of nut maturity and in harvest difficulties (failure of the nut to come out of the shuck).

Shuckworms overwinter as fullgrown worms in pecan shucks on the tree or on the ground. Inspection of pecan shucks on home yard trees in the West Texas area in the past week revealed a range of 1 to 6 overwintering shuckworms per pecan shuck on infested trees. The removal and destruction of shucks will greatly aid in reducing the number of overwibtering shuckworms in individual yards or orchards, and thus lessen the problem for the coming season.

Shucks should be raked up from the ground and knocked from the branches (using a bamboo pole) and disposed of on home yard trees. Larger orchards should be plowed to control overwintering shuckworms. Overwintering worms are unable to mature in decaying shucks and adult moths are unable to emerge from the soil. Plowing depth must be regulated to preent root damage to the trees. Failure of the shucks to shed from the tree does not automatically indicate that shuckworms are present. One can check by cutting into a number of shucks and inspecting for tunnels and small (3/8 inch) white larva (worms) with a light brown head.

Commercial pecan planting has been on the increase in Midland County and surrounding areas since 1963. We get continuing inquiries from persons concerning the establishment of commercial orchards (ranging from a few acres to 40 or more).

Anyone interested in getting into the pecan business must take a close look at required investments and the outlook for profit in the years ahead. While pecans are still a good money crop and prices have been up, profits have dropped during the past four years due to sharply rising production costs.

Using a 50-acre orchard as an example, here are some estimated costs: \$350 to \$400 per acre establishment costs, \$300 per acre each year to develop the orchard for the first seven years, \$600 per acre each year thereafter when the orchard is in production, and equipment costs of about \$40,000. These production costs are based on

These production costs are based on a prescribed management program including fertility, insect and disease control, weed control, irrigation and other necessary operations for successful peca production. These expenditures are essential for a productive orchard and any cutback could jeopardize the entire operation.

Due to only limited pecan production during the first seven years of the orchard, there will be about \$300 deficit per acre each of these years. Pecan production and income can be expected to increase after that time so that some profit can be realized by the end of the thirteenth year, possibly \$200 to \$250 per acre.

Pecan production over the U.S. has generaly been stable during recent years, with an average of 230 million pounds per yer the past four years. Also, prices to producers have been relatively high. U.S. production totaled some 200 million pounds lst year and overall prices to the grower averaged 74 cents a pound. In Texas improved varieties of pecans averaged 90 cents a pount compared to 69 cents for natives.

homeowners may reduce the use of fertilizer if they leave grass clippings

on their lawn instead of catching them.In some test work, clippings were removed from some areas, while on others, the clippings were left. Grass was greener and growth more vigorous where the clippings were not removed.

The researchers found that the clippings could return over 50 percent of the nitrogen that was added as fertilizer. They also found that nitrogen from the clippings began to appear in new growth of grass within a week of cutting.

The secret is in frequent mowing. When the grass is not excessively fertilized and no more than ½ inch of grass is clipped at each mowing, clippings do not add to the thatch problem as has been supposed by many persons.

Senate OKs bill making theft of oil field equipment felony

AUSTIN, Texas (AP) — The Senate approved and sent to the House on Thursday a bill making the theft of any equipment used in oil and gas exploration a second-degree felony, regardless of the value of the equipment.

A second-degree felony is punishable by two to 20 years in prison and or a \$10,000 fine.

Sen. Bob Glasgow, D-Stephenville, sponsosed the measure.

Present law sets different degrees

of punishment, depending on the value of the equipment. Glasgow said in a committee hearing earlier in the week that proving value is difficult, and this makes it hard to prosecute oil field thieves.

Crime victims helped

AUSTIN, Texas (AP) — The Senate approved a bill Thursday that is supposed to pump about \$5 million a year into Texas' fund for paying lost wages and medical and funeral expenses of crime victims.

Sen. Lloyd Doggett's bill was sent to the House on a 30-0 vote.

The measure requires people convicted of minor misdemeanors, including traffic offenses, to pay a \$2.50 court cost that would go into the fund.

'ho's the best? Sampson or Johnson

By JOHN NELSON AP Sports Writer

They tower above men of normal height. Dark glasses and false mustaches can't disguise their uniqueness in this society of chest-high peers.

They stoop to make it through doorways. Strangers invariably ask them how the weather is, way up there. When they sit down to breakfast on the road, they're still taller than most waitresses.

Wherever they are, basketball's big men find themselves the center of attention.

There is nothing more gratifying to a debater of basketball than persuading his best friend that Mr. X or Mr. Y was the best center in college in any given year.

THERE MAY be dissension, for

NCAA record clip of 75.9 percent to 59.8 percent for Sampson. Johnson set the NCAA field goal percentage record of 71.0 percent last year.

At 210 pounds or so, Sampson appears to lack the strength to be dominating rebounder, while Johnson looks more the part, weighing a burly 235. The reverse is the case, however. Sampson averages 12.6 rebounds per game, Johnson 8.1.

"I may not look strong," Sampson says, "but I'm definitely stronger than last year, and I'm going to get stronger.

Part of the reason for Sampson's rebounding advantage - and also one of the reasons Johnson does not score more than Sampson - is that Sampson averages about five minutes more playing time per game. Sampson played 632 minutes in 20 games, an statistic to compare is the big game. Sampson's two best performances of the year came in an 89-73 victory over Ohio State when he scored 40 points and grabbed 16 rebounds, and in an 80-79 overtime victory over North Carolina in Atlantic Coast Conference play when he scored 32 points and had 13 rebounds.

Johnson excelled in a pair of Pacific

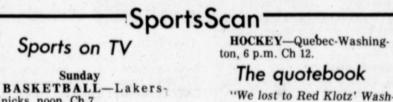

10 Conference games, a 61-49 victory over Arizona in which he scored 32 points and had 12 rebounds and a 97-91 overtime victory over Washington in which he scored 38 points and grabbed 11 rebounds.

"I won't make any comparisons," Johnson says, "but I will say this. We're both undefeated."

ington Generals in Martin.

Aggies demolish 'Horns, 108-79

By The Associated Press

Texas A&M coach Shelby Metcalf called his team's 108-79 victory over Texas Saturday a "once-in-a-lifetime thing in this conference."

Senior forwards Vernon Smith and Rynn Wright combined for 43 points in recapturing some personal lost glory in breaking a seventh-place with Texas in the Southwest Conference. Smith tossed in 25 points and Wright 18.

"We played well. We shot well and we passed well. Today takes a lot of pain out of the season," Metcalf said.

The victory was A&M's sixth in the conference against eight losses.

Coach Abe Lemons of Texas said, "I think everybody in the world knows who our best player is and who we should get the ball to - everybody, that is, except my team. It was my game plan to get the ball to LaSalle (Thompson). The players had other ideas. All I'm thinking about now is next year.'

Lemons added, "At least now when I do some recruiting, I think I'll show the recruit a picture of LaSalle so at least he'll know who our best player is.

The victory moved the Aggies into a tie for sixth with Texas Christian, and the two teams will play Tuesday night at Fort Worth. Sixth place is important in the nine-team league because it gives the school a home-court advantage in the first round of post-season playoffs.

Freshman Reggie Roberts scored 17 points and sub Roy Jones, a former Austin high school star, had 16 as A&M grabbed an early 8-0 lead and never trailed. The Aggies led 20-4 midway through the first half and had a 43-29 halftime advantage.

Texas, with an emotional crowd yelling in the regionally televised game, made only two threatening moves to catch up with the Aggies. Jones hit two lefthanded shots from the outside to thwart Texas' first attempt to get back into the game with just under seven minutes remaining in the first half.

With the crowd even louder, Texas pulled to 48-39, but Wright and Smith each pumped in three field goals and the Longhorns never had a chance afterward.

Smith and Wright entered the 1980-81 season with all-star credentials, but Smith was averaging only 14 points and Wright 12 points prior to the Texas game.

A&M's margin of victory was amazing in that Texas defeated the Aggies 67-63 in overtime at College Station on Jan. 26.

Ken Montgomery led Texas with 26 points, and Fred Carson had 12 all in the second half.

A&M raised its season record to 13-10 and Texas fell to 10-14.

Baylor's Terry Teagle scored 27 points, including a jump shot with 27 seconds to play Saturday night, that edged the Bears to a 70-68 Southwest Conference victory over the error-prone Houston Cougars who lost their third straight game.

The loss dropped Houston to a 9-5 SWC record, still good enough for second place, while Baylor now is 9-6, one game behind Houston.

Pint-sized Baylor guard Ronnie Blake and senior forward Mike Battle played key roles in the victory. Battle came off the bench to score 19 points and Blake kept the Bears offense moving in the tense second half. Houston tied the game at 68-68 with 43 seconds left. But Teagle followed

moments later with a jump shot that provided the final points.

Houston's Eric Davis missed a chance to tie it with 13 seconds to play when he missed the front end of a 1-1. Teagle and Blake missed free throws for Baylor with 10 seconds and four seconds to play and Davis narrowly missed a shot from mid-court that would have forced an overtime as the final buzzer sounded

Houston's Rob Williams, the SWC's leading scorer, hit only 15 points and was held to two points in the second half. Larry Michaux led the Cougars with 23 points and freshman forward Michael Young added 14.

Baylor now is 14-11 for the year and Houston dropped to 18-7. Arkansas 75, Rice 59

Scott Hastings scored 25 points as the University of Arkansas defeated Rice. 75-59 to clinch at least a tie for its fourth Southwest Conference basketball championship in five years.

Arkansas is 20-6 overall, giving Coach Eddie Sutton his fifth consecutive

that is the nature of debate. But this year, the choice seems narrowed to two men; Ralph Sampson, a 7-foot-4 sophomore from Virginia, and Steve Johnson, a 6-10½ senior from Oregon State?

Neither man will offer an assessment of his own relative merits, so the decision, as strongly as we might resist, falls to those of us who digest our basketball in front of the tube or from the seats.

Sampson is one of the tallest men ever to play the game, and as a sophomore, he has grown out of some of the coltishness that marked his play last season. He moves well around the basket and has added a 10-foot turnaround jumper to his repetoire of effective scoring techniques. Past 10 or 12 feet, he is ineffective as a scorer, but he seldom shoots from the outside.

Johnson is an inexperienced senior. He played only one year of prep ball because his high school, San Gorgonio in San Bernadino, Calif., did not offer the sport until his senior year. He was a good pupil under Oregon State Coach Ralph Miller, however, and has become a veritable scoring machine. Around the basket, he moves with explosive quickness, but his range is limited to 8-10 feet.

THROUGH THEIR first 20 games this season, both men average about 20 points a game, but Johnson's efficiency is much greater, shooting at an average of about 311/2 minutes. Johnson played 505 minutes, an average of about 25 minutes, because he has a tendency to get into foul trouble.

Through 20 games, Johnson fouled out four times, Sampson once. Johnson committed 76 personal fouls, Sampson 52. Johnson has fouled out of 47 games in his 3½ years at Oregon State, including 18 in his freshman year. Sampson fouled out of five games as a freshman.

"WHETHER I foul or not, I put myself in a situation where a foul can be called," Johnson says in his own defense. "With a reputation as a fouler, I have to stay out of those situations. I've been trying to shake the reputation as a fouler since my freshman year.'

On the other side of the whistle, Johnson had a significantly better record from the foul line than Sampson. Sampson was 77 of 131 for 58.8 percent as a foul shooter. Johnson hit 81 of 122 for 66.4 percent.

Johnson also likes to point out that he has improved as a passer, a requirement for any player on a Millercoached team. The statistics bear him out. In 30 games as a junior, he had 47 assists. In 20 games this season, he had 41. Sampson had 39, but he had a worse assist-to-turnover ratio, giving up the ball 58 times to 45 for Johnson.

Bando believes agreement possible

MILWAUKEE (AP) - Milwaukee Brewers third baseman Sal Bando, one of four members of the study committee named last year to develop a proposal on baseball's free agent compensation controversy, said Friday he believed an agreement was still possible.

"Now's the time to sit down and negotiate, let cooler heads prevail," he said. "We have to somehow meet their (the owners') needs without burdening the players.

Bando serves on the labor-management committee on the matter with Philadelphia cather Bob Boone, Brewers General Manager Harry Dalton and New York Mets General Manager Frank Cashen.

Bando said the other members of the panel "probably would all agree there are ways" to reach a compromise, but he declined to be more specific.

The Players Association executive board is scheduled to meet Wednesday in Tampa, Fla., to discuss a possible strike.

The owners, after failing to reach an agreement through the study committee, implemented their own proposal Thursday. It calls for an unprotected player on a 40-man roster to be transferred to a club losing a free agent who the owners term a "ranking player." Such a player was defined as a hitter who ranks in the top half in his league in plate appearances and a pitcher who ranks in the top half in games pitched.

'You don't judge a players' performance and worth on his at-bats or the number of games he appears in," Bando said.

The Brewer player also questioned the owners' definition of a ranking player as one who has been drafted by at least eight teams.

20-victory season at Arkansas.

Rice fell to 12-12 overall and 7-7 in the conference. Hastings' effort nearly offset that of Ricky Pierce, who was a one-man gang

for the Owls with 29 points. Arkansas broke open a tight game by outscoring the Owls 15-4 during an eight-minute stretch after Rice had pulled to within one point at 37-36.

U.S. Reed hit a free throw and Hastings scored on a 16-foot jumper, then converted a three-point play on a short turnaround to expand Arkansas' lead to 43-36.

After the Owls climbed back to within five, Hastings hit another jumper, Darrell Walker nailed two free throws, Tony Brown swished a 17-footer and Hastings hit a free throw to make it 52-40 with 6:56 remaining.

Hastings ravaged Rice's defense, hitting eight of 10 from the field and drilling nine of his 12 free throws. He was equally effective inside the zone and from the perimeter.

Pierce hit 13 of 19 from the floor and also led all rebounders with 11.

The victory, coupled with Houston's loss to Baylor, gave Arkansas a two-game edge over Houston with two games left. Arkansas is 11-3 in the league while Houston is 9-5.

Texas Tech 51, SMU 48

Senior center Ralph Brewster's two free throws with eight seconds to play following Clarence Swannegan's vital last basket - rallied Texas Tech to a 51-48 Southwest Conference victory Saturday night over the Southern Methodist Mustangs.

The Red Raiders, gaining a measure of revenge for an SMU win at Lubbock that dealt them their only home court loss this season, improved their league record to 8-6.

The victory kept Tech's hopes alive for a third-place SWC finish, good for a bye in the league's post-season tournament. The win virtually clinched a home court advantage in the playoffs even should the Raiders not get the bye.

The Mustangs led 36-27 at halftime, but went ice cold in the second half, scoring only 12 points and watching their SWC record dip to 3-12. SMU is 7-18 for the season while Tech is 14-10.

SMU had a chance to win the game in the final eight seconds after its guard, Dave Gadis, missed the second free throw on a 1-and-1 situation. Center Johnnie James rebounded the ball, but missed a layup that would have given the Ponies a 50-49 lead, and Brewster came away with James' misfire and was immediately fouled.

Free agency has created a 'New Baseball' revolution

An AP Sports Analysis By HAL BOCK **AP Sports Writer**

The baseball revolution started quietly, fueled only by the determination of two veteran pitchers to challenge a 100-year-old reserve system. The pitchers were Andy Messersmith and Dave McNally, both long gone from the game. They left baseball's economic system upside down in their wake.

In 1975, Messersmith and McNally decided to go through an entire baseball season without signing a contract. Baseball didn't object terribly at the time. The feeling was that the players' previous contracts would simply be renewed, an option management believed could continue in perpetuity. The game's attorneys felt the reserve clause and baseball's immunity from antitrust legislation, upheld by the Supreme Court in the Curt Flood suit only three years earlier, made the game safe from contract attack.

How wrong they were

Messersmith and McNally were declared free agents by arbitrator Peter Seitz, who one year earlier had freed Catfish Hunter from Oakland in another contract violation case. Two federal courts upheld Seitz' opinion, ushering in a new age for baseball.

Thus, The New Baseball. Players with six years of major league service - a compromise figure reached mn negotiations between management and the players' union - are free to walk away from their clubs, declaring themselves free agents, eligible to play for the highest bidder

What the players never anticipated is how high the bidding would

The lid blew off in 1976 - the first year of wholesale free agency Among the eligible players that year was relief titcher Bill Campbell,

who had won 17 games and saved 20 others for Minnesota the year before. Boston, which seems always to have had pitching problems, selected Campbell and one day after the draft, signed him to a contract. Larue Harcourt, Campbell's agent, said it was a \$1 million deal. The club claimed it was closer to \$600,000. Regardless, the numbers far exceeded anything the players thought possible.

For the longest time, \$100,000 was a contract ceiling, reserved only for superstars. It stood as testimony that a player had reached the top of his craft and only rarely did even the game's top stars go beyond that figure. Now, five years after free agency, \$100,000 is almost a poverty wage in major league baseball, where the average salary last season was close to \$150,000 and is expected to reach about \$180,000 for 1981. That, of course, does not include substantial fringe benefits.

The New Baseball also provides certain rights for the players. A player with 10 years in the major leagues, the last five with the same team, has the right to veto a trade. They are known as 5-and-10 players, but it has nothing to do with nickels and dimes. It took a contract sweetener of between \$750,000 and \$1 million to get catcher Ted Simmons' approval of a deal which sent him from St. Louis to Milwaukee last December.

Another clause in the contract gives players with two full major league seasons the right to request salary arbitration. That, for all intents and purposes, eliminated holdouts and the lively contract debates that used to spice the off-season.

Now there is no public debate. When a player and his club disagree on salary terms, the dispute usually winds up in the arbitrator's lap. The two sides present their figures and arguments, and the arbitrator picks one or the other. There is no middle ground in this procedure.

Last year, the Chicago Cubs offered Cy Young Award winner Bruce Sutter a raise to \$350,000. He demanded \$700,000 and the arbitrator agreed with his argument. This year, Sutter will pitch for St. Louis.

Mike Norris, who earned about \$34,000 last year when he was 22-9 and

the Cy Young runner-up for Oakland, demanded \$450,000 for 1981. The A's stood firm at \$300,000, and the arbitrator supported the club position. Norris lost his case but still received a raise of \$266,000.

Baseball has not exactly suffered since free agency arrived. Attendance has soared to record proportions with more than 40 million fans in each of the last three seasons. Television revenue and ratings continue to climb

With all this going for both sides, why does the game face the very real possibility of a player strike?

Simply because the players don't want any tinkering with The New Baseball. And that includes management's plan to impose compensation in the form of a replacement player for a club losing a "premier" free agent

The owners implemented that plan last week, triggering the latest labor crisis for the sport, which barely avoided a strike last May.

The players view compensation as a direct attack on the free agent system they fought so hard to get. They fear it will restrict the market, leaving them with a free agent system which is all but invisible, like the one in the National Football League.

To combat that, they almost certainly will set a strike date next Wednesday when their executive board meets in Tampa, Fla. Then the countdown will begin with an interruption in the championship season a distinct possibility.

The history of unionism in America is crammed full of workers making demands on management, demands which are often resisted. The baseball situaton is the exact opposite. The players want nothing right now. No changes. A status quo.

The owners, wandering through a contract wonderland of their own creation, are the ones seeking relief. They view compensation as the road to reality but for the players, management's reality represents the dark ages before Messersmith, McNally and The New Baseball.

Chaps face Wranglers Monday in homecoming

Midland College makes its final Chaparral Center appearance Monday when they host the Odessa College in homecoming at 8 p.m. A victory would give MC the Western Junior College Conference title outright. The Chaps clinched a tie when it came from nine points back to beat Frank Phillips College, 57-55, at Borger.

It was the ninth straight win for MC since a couple of two-point losses in January

MC Athletic Director Delnor Poss said it also will be High School Student night with a number of area high school students invited to the game as guests of the team.

At halftime, the MC Student Senate will present the homecomng queen, athletic team sweethearts and announce the queen. Nominees include Jeni Jaso, Baptist Student Union; Karen McCague, Student Senate; Brenda Heath, Phi Theta Kappa; Cyndye Camarillo, Foreign Language Club; Sharon Wright, Delta Beta Chi; Deborah Kennear, American Chemical Society, and Tami Jones, Phi Theta Eta.

Free tickets to the game are available at Zale's, Dillard's, Sears, The Cutting Edge and Linz, who have contributed gift certificates to the night's festivities.

A homecoming dance will follow the game.

Principals ban hockey fans

AUBURN, Mass. (AP) - School They don't care if they miss the principals banned all fans from Saturday's Wachusett-Auburn hockey game, forcing parents to stand in the backs of pickup trucks and on bike racks to watch their sons play the last game of the season.

The ban came because of fights in Chaps are fourth the stands at a Jan. 7 game between the two teams.

While 800 fans attended that game, Saturday night the parents could only congregate outside the rink to protest. Only players and cheerleaders were allowed inside the rink.

Eight Auburn police officers, two state troopers and the town's police dog provided security. Wachusett won 4-2.

LSC tournament narrows to four

HUNTSVILLE, Texas (AP) - Willie Whittenberg scored 25 points as Sam Houston State downed stubborn East Texas State 78-66 Saturday night and moved into the semifinals of the Lone Star Conference basketball tournament.

Sam Houston will meet surprising Abilene Christian in a 4 p.m. game Sunday following a 2 p.m. semifinal bout between Howard Payne and Texas A&I. The winners will meet at 7 p.m. Monday for the tournament title.

In Saturday's other quarterfinal games, Abilene Christian rallied late to beat Stephen F. Austin 54-48, Howard Payne made five free throws in the final minute to beat Angelo State 88-82, and Texas A&I rode the 18 points of Felix Dean to a 72-67 victory over Southwest Texas State.

Sam Houston State raised its record to 20-7, the same record as regular season champ Howard Payne, but trailed East Texas until midway through the second half.

Whittenberg's 11-of-14 performance at the free throw line brought Sam Houston back. Senior Billy Roberson scored 15 points to lead the Lions, who fell to 12-15.

Anthony Carroll finished with 19 points and Tony Massey 11 for the Bearkats, while Aubrey Langley and Frank Lewis had 10 each for East Texas. The Lions led at the half, 31-30.

Howard Payne advances to the NAIA District 4 playoffs automatically by virtue of its 10-5 conference record.

Angelo State, 11-16, made a bid for an upset, taking the lead five times, but Howard Payne went ahead to stay with 6:41 left in the game on Ken Wallace's layup for a 67-66 advantage. The Yellow Jackets held off a

final rally by sinking five of seven free throws in the last minute.

Gary Hopkins scored 22 points and Darwyn Bradford 20 for Howard Payne, while Al Stillman paced Angelo State with 16 points and 9 rebounds.

A&I raised its record to 14-11 with its win over SWT, 17-10. Dean was backed by the 13 points, 11 rebounds and 6 assists of Ed Turner, the tournament's MVP a year ago.

Southwest Texas led by as much as nine points on three occasions in the first half, but trailed 30-28 at intermission. The Bobcats moved ahead 35-34 early in the second half before Darrell Fields' jumper put the Javelinas ahead to stay with 16:26 left in the game.

Texas A&I led by as much as 10 points in the final minute.

Harold Howard scored 18 for Southwest Texas, while Charles Spurlin added 17 points and 13 rebounds for the losers.

Abilene Christian raised its record to 10-16 with its win over Stephen F. Austin, which fell to 15-12.

Center Craig Williams and two freshmen forwards, Brad Kerley and Mike Davis, led the ACU scoring attack. Williams had 13 points and Kerley and Davis each had 12, with Kerley leading all rebounders with 10.

Stephen F. Austin led 28-22 at halftime and was ahead 41-35 with 6:41 to play on a 15-foot jumper by Alden Wren. But the Wildcats outscored Stephen F. Austin 18-7 in the final minutes to take the victory.

Sherman Kossie led the Lumberjacks with 14 points and seven rebounds.

DePaul survives Marguette

CHICAGO (AP) - All-American Mark Aguirre scored 24 points, 16 of them in the second half, and Terry Cummings had 21 points, 17 in the first half, to lead third-ranked DePaul to a 78-71 college basketball victory Saturday night over Marquette.

The victory was the 10th straight and 23rd of the season for the Blue Demons, whose only loss was to Old Dominion.

Marquette suffered its third straight setback and slipped to 16-9 for the season, although the Warriors were in the running throughout the contest.

Rallying from a 41-36 deficit early in the second half behind the play of Oliver Lee and freshman Glenn Rivers, Marquette came back to take a 64-53 lead midway through the period

Aguirre then twice put DePaul ahead before Rivers converted a three-point play to draw the Warriors into a 59-59 tie.

DePaul then scored the next seven points to move into a comfortable lead, but couldn't put the game away because of the play of Lee and Rivers. Lee finished with 26 points while Rivers finished with 23 points, 17 of them in the second half.

DePaul led most of the first half until Lee put Marquette ahead 26-25. The lead then see-sawed with the Warriors grabbing a 36-32 edge before DePaul scored the final seven points of the half, including a three-point play by Cummings.

Paxton has watched his sons play hockey. Saturday night, he waited outside in frustration. Wilde, said he has coached children in the Pee Wee League for 15 years and has never missed watching his sons play hock-

ey. "This is the first time I've ever been "Wilde said. locked out of a game," Wilde said. "The kids raise hell and don'tycare.

can't pass Miller that extends 7.022 yards

Miller only missed two greens and made putts ranging up to 12 feet, the latter at the third hole after he bogeyed the second hole. Generally, his game was straight and down the mid-

"I'm feeling good about myself and my game," Miller said. "After 54 holes, and 11 under par, I feel pretty proud and pleased that I'm playing as well as I am.

Deadlocked at 203, a stroke off the pace, were Gil Morgan and Ben Crenshaw at 203. Morgan, the first-round leader, had a 69 and Crenshaw a 66.

Tom Weiskopf and Miller Barber, the second-round leader, were at 204 with 68 and 71, respectively. Bruce Lietzke, winner of two tournaments this season, wasn't far off the pace at 205 with a 69 third-round score.

Tied with Ed Siori and Craig Stadler at 206 were Nick Saldo, Bob Gilder and leading amateur Ron Commans from the University of Southern California.

Jack Nicklaus, Tom Watson and Lee Trevino weren't doing well going into the fourth and final round with its \$54,000 winner's purse. Nicklaus had 208, Watson and Trevino were at 209.

THE MIDLAND REPORTER-TELEGRAM, SUN., FEBRUARY 22, 1981

Girls gear for playoffs

District champions have already been decided in most area district girls' basketball races and now the girls are getting ready for bi-district clashes that open Tuesday.

Greenwood, which claimed the District 14-A title, takes its 27-3 season mark to the Dorothy **Garrett Coliseum on the Howard** College campus in Big Spring Tuesday to face Robert Lee.

Coach Dean Foshee's Greenwood club has been led by Missy Duke, 5-6 senior point guard, and Renuy Evans, 5-10 sophomore post, this year. Added support comes form Lisa Mobley, 5-7 junior pivot, and Nancy Ortiz, 5-7½ junior pivot. Other members of the Greenwood team are: Greta Black, senior; Neri Duke, senior; Rita Garcia, senior; Elizabeth Busic, junior; Rainie Turnbow, junior; and Sandra Ellis, junior. Last year Greenwood finished with a 26-6 record.

Robert Lee, which defeated Bronte for the 13-A title, has won five straight district titles and will carry a 19-5 season ledger in the fray.

In another girls bi-district battle Tuesday night District 6-AA champ McCamey, 20-6, will host 5-AA winner Forsan, 24-3, in the McCamey High School gym.

Richard endures 21/2 hour workout

COCOA, Fla. (AP) - Houston Astros pitcher J.R. Richard, recovering from a life-threatening stroke, shocked Astros officials Saturday by putting himself through a strenuous 21/2-hour workout at the team's training facilities here.

Although Richard has declined to put a time schedule on his comeback attempt, Astros General Manager Al Rosen said "We hope to have him ready to pitch the first game of the World Championship Series." Richard, who collapsed during a

workout in the Astrodome July 30, said it felt like a normal spring training to him. "It is just a matter of time, I don't know how much, before I pitch

again," Richard said. "I am not totally where I was a year ago but actually, my arm is ahead of the rest of my body.

Astros officials were surprised at Richard's endurance.

'He really amazed all of us," Astros publicist Ed Wade said. "We had just planned a picture session out on the field and then he was going inside for his regular rehabilitation work.

"But it was such a nice day he went outside and worked a good 2½ hours. He ran a mile and took some ground balls. If you didn't know he'd suffered a stroke, you wouldn't have known anything had been wrong."

Richard said he threw at about halfspeed in Saturday's first workout. Asked to compare the start of this spring with 10 years ago, Richard said. "Ten years ago is in the past and that means going back. I want to go forward.'

Richard's problems first surfaced last June when he complained of a

"tired arm." He continued to pitch but was unable to complete games. Fans and some players grumbled that Richard might not be giving 100-percent effort

"I have no reason to be bitter," Richard said. "We all make mistakes

Shepherd takes

Richmond pole

RICHMOND, Va. (AP) - Morgan Shepherd, who took last year's late model sportsman divison title, pulled off a coup Saturday by winning the pole position for the **Richmond 400 Grand Na**tional stock car race.

Shepherd, from Hickory, N.C., drove a newly prepared Pontiac Grand Prix to the pole position with a quick lap of 92.821 mph around Richmond Fairgrounds Raceway's tight .542-mile oval.

That speed was just enough to hold off the veteran trio of Harry Gant, Richard Petty and Benny Parsons, who will start today's 400-lap race second, third and fourth,

respectively. Gant's Buick Regal turned the short track at 92.746 mph, while Petty's Buick was clocked at 92.426 and Parsons' Ford Thunderbird came in at 92.133.

but the team is glad to see me back."

Gene Coleman, the Astros' director of physical conditioning, said "I was impressed. I hadn't seen him since October and he really looked good. It's just like "J" said, it's going to take time."

No. 4 LSU Tigers nip No. 8 Vols

KNOXVILLE, Tenn. (AP) — Fourth-ranked Louisiana State, holding off three second-half rallies, used forward Leonard Mitchell's two free throws with seven seconds left to squeeze past No. 8 Tennessee 66-65 Saturday. "Thank goodness we made our clutch free throws when we had to," a

jubilant Coach Dale Brown said after winning his second regular season Southeastern Conference championship in nine years and taking his eighth straight victory over the Volunteers.

"These kids have given me a whole new outlook on coaching," he said. "It's just been a fine year." The Vols, behind by 11 points at the half, had pulled to within one at 64-63

on a followup shot by Dale Ellis when Tennessee guard Tyrone Beamon was called for a foul on Mitchell on the following inbounds play. Guard Mi-chael Brooks put the Vols back to within one five seconds later by making a 15-footer and the Tigers were able to get the ball inbounds and eat up the final tick of the clock.

'It was a pretty miserable effort on our part," said Tennessee Coach Don DeVoe after his team hit only five of 14 free throws. "We threw the ball away way too many times and missed too many free throws, and LSU took advantage of every mistake we made."

Brown said both teams' defenses turned the game into a classic confrontation.

got an NCAA berth sewed up. It's too bad this game was not on national TV." "Tennessee played very, very hard," Brown said. "They've surely

Illinois 82, Michigan State 62 — Craig Tucker scored 21 points and Perry Range added 15 to lead No. 15 Illinois to an 82-62 win Saturday over Michigan State in Big Ten basketball action.

Michigan State jumped off to a 15-11 lead with 11:52 left in the opening half, but it turned out to be the Spartans' final lead of the contest.

Illinois ran off 10 straight points - the last four by Range - to take a 21-15 lead almost three minutes latey and never looked back.

Wisconsin 77, Ohio State 63 - Wisconsin, led by center Larry Petty's careertying high of 25 points, jumped to a 15-point first half lead and coasted to a 77-63 Big Ten college basketball victory over Ohio State Saturday.

The victory, which snapped a seven-game losing streak for Wiscon-sin, all but dashed the hopes of Coach Eldon Miller's Buckeyes for a shot at the Big Ten title.

Ohio State slipped to 7-7 in the Big Ten and 12-11 overall. Wisconsin is 3-11 in the conference and 9-13 for the season.

Brigham Young 78, New Mexico 72 - Danny Ainge and Fred Roberts each scored 19 points as 17th-ranked Brigham Young held off New Mexico 78-72 Saturday in a regionally televised Western Athletic Conference college basketball game.

Roberts, who was named player of the game, also added 10 rebounds.

BYU led by as many as 12 points in the contest, but could never break away from the pesky Lobos enroute to their 20th victory this season against 5 losses. The Cougars are 10-3 in the WAC. New Mexico dropped to 10-12 overall and 5-8 in the conference.

North Carolina 75, Clemson 61 - Senior forward Al Wood, playing in his last home game for North Carolina, scored 23 points to lead the 13th-ranked Tar Heels to a 75-61 victory over Clemson in an Atlantic Coast Conference basketball game Saturday. The Tigers dropped to 18-9 and 5-8. Maryland 94, Wake Forest 80 — Seniors Albert King and Greg Manning,

playing their last home game in Maryland, combined for 34 secondhalf points and led the 20th-ranked Terps to a 94-80 Atlantic Coast Confer-ence victory over fifth-ranked Wake Forest Saturday.

King, who finished with 28 points, scored 10 during a 19-3 streak that gave Maryland a 71-52 lead with 6:14 left. Manning scored eight of his 16 points during the same span after being held scoreless in the first half.

Maryland, last year's ACC regular-season champions, has a 7-5 league record and is 17-7 overall. Wake Forest is 8-4 in ACC play.

Indiana 74, Minnesota 63 — Ray Tolbert scored 19 points and Landon Turner celebrated his return to Indiana's starting lineup with 12 first-half points as the 16th-rated Hoosiers defeated Minnesota 74-63 in Big Ten basketball Satur-

day. Tolbert had four of his points during an eight-point Indiana streak that broke the game open in the closing minutes as Minnesota went scoreless for more than four minutes.

Indiana moved to 17-9 overall and 10-4 in the conference, while Minnesota fell to 15-8 and 7-7.

Missouri 55, Nebraska 45 — Curtis Berry's three-point play with 2:40 left sparked Missouri to a 55-45 victory over Nebraska in Big Eight Conference basketball Saturday.

The win upped Missouri's conference record to 8-4 and moved the Tigers into a first-place tie with the Cornhuskers, also 8-4. Berry, a 6-foot-8-inch senior, keyed a Missouri spurt in which the Tigers scored 11 unanswered points during the last 5: 57 of the game. Georgetown 68, Villanova 60 — Mike Frazier scored 20 points and Eric Floyd added 16 Saturday as Georgetown defeated Big East rival Villanova 68-60 in college basketball at the Palestra. A jumpshot by Aaron Howard with 55 seconds remaining brought Villanova to within 59-57, but a spectacular layup by Floyd resulted in a three-point play and insured the Georgetown victory. Georgetown is now 17-10, 7-5 in the league and Villanova is now 15-9, 7-6 in the league.

Cooper wins golf tournament

INVESTMENT OPPORTUNITY FOR THE

SPORTS MINDED

If you enjoy sports, are recreation minded and would like to enter a billion dollar per year industry, we of-fer what we believe is the most lucrative opportunity. This will require a minimum of approx. 6 to 8 hours per week on a part-time basis or 20 to 30 hours per week on a full time basis.

INVESTMENT RANGE

\$6,500 to \$100,000 Before either one of us makes a decision to become involved, you will be supplied with names and phone numbers of people who have become involved in our program and are now making an extremely high return on their investment. It is not uncommon for a part timer to earn \$500 to \$800 per week and if you

Buying a used car is no joke.

There have probably been more jokes told about used cars and used-car salesmen than practically any other subject. But when you buy a used car, it's no joke!

Used cars are a very important part of our business. We maintain an excellent selection of hand-picked used cars. Then we price each one competitively. Finally, our reputation for service comes with every car at no extra cost. Here are some examples:

In fact, it's serious business!

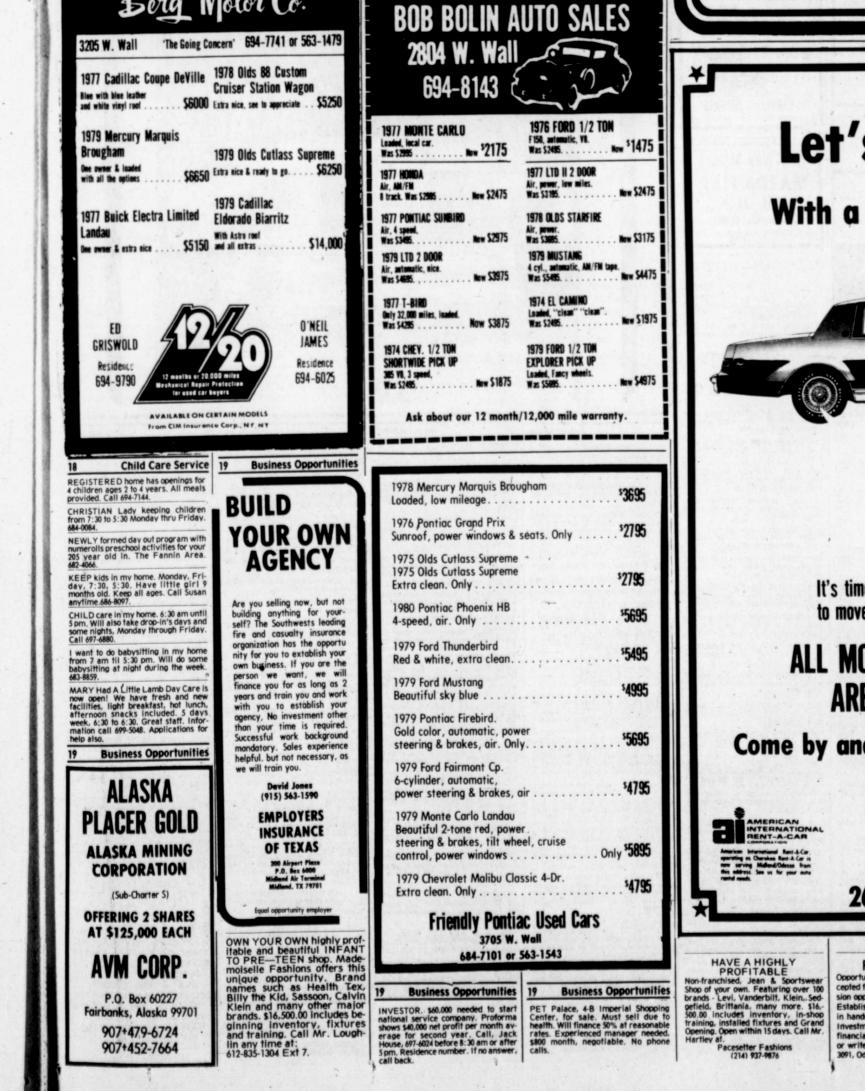

SPECIAL MANAGER GRADUATION SALE On Cameros, Camero LT's, Camero Z28's and Firebirds.

1979 Chevrolet Camero Rally Sport-Turquiose. Stock no. 5807B	\$6666

Houses for Sale

Houses for Sale 80

This Weeken

See how Capp Homes beats the high cost of housing.

Come see an open house that's totally unique...a Capp Homes Open House. What makes this open house so unusual? The house isn't even finished yet. The exterior is erected, but the interior is not yet complete. Why? Because we want you to see for yourself all the benefits of the "Finish-It-Yourself House" program.

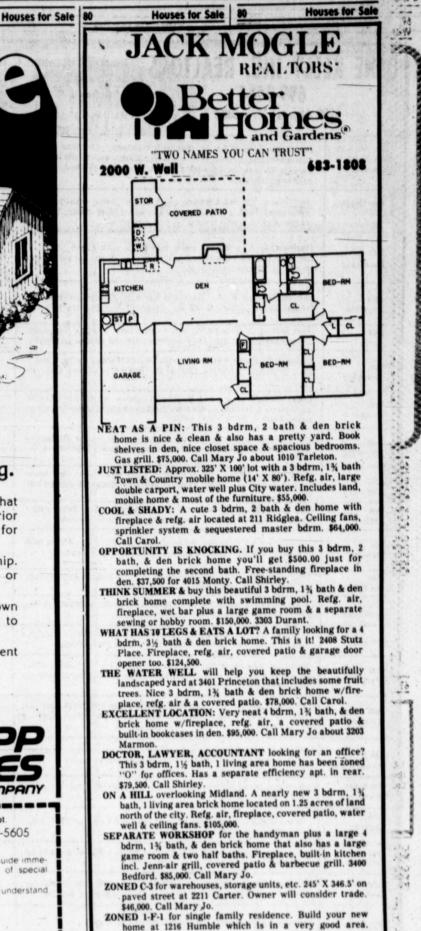

You'll see the excellent quality of Capp construction materials and workmanship. Capp Homes are custom built from your plans or ours. Nothing is pre-fab or modular

At the open house, you'll learn that by finishing it yourself, or by acting as your own general contractor, you'll save a bundle - thousands of dollars, compared to having an ordinary builder construct the same house on your lot.

And Capp has financing available...both construction loans and permanent mortgages for new gualified home buyers.

Find out more this weekend. Come to the Open House...rain or shine.

You can keep your teeth a lifetime

By WANDA MOUTON **Lifestyle Editor**

February is Children's Dental Health Month and a good time for re-education about proper nutrition and oral hygiene to prevent tooth decay

The Permian Basin Dental Hygienists' group has sponsored activities throughout the month. "We are available to talk to any organization interested in pesenting a program on dental health," said Jeanne Stone, group representative. She can be contacted at 697-3816.

"We hope to make the public aware of the importance of proper brushing, flossing, good nutrition and early diagnosis of oral health problems," she added.

Preventive dentistry is emphasized as much as maintenance.

The Permian Basin Dental Society is also working on dental health emphasis during this month.

In conjunction with other activities, an exhibit will be shown beginning Feb. 28 at Midland Park Mall. The Dental Hygienists' will also be speaking to the fourth grade students in the public schools and to day care centers.

Dr. Mark Urbach, a children's dentist (pedodontist) and assistant clinical professor at The University of Texas Dental Branch, is chairman of a Texas branch for Children's Dental Health Month. "Though heredity is certainly one determinant of a child's dental health, parents can control the other factorenvironment—by providing a proper diet and teach-ing oral hygiene from birth," he said.

One particular area of concern to him is the prevalence of what is caled "bottle caries syndrome.

"Often, parents will put their child to bed with a bottle," the dentist explained. "The milk and its sugar stays on the teeth all night. If this practice continues, the child's front teeth, which are the first to come'in, start to decay," Urbach said. "This is happening to children six to 11 months old."

Urbach added that many parents don't seem to realize the importance of maintaining thee primary (baby) teeth. Primary teeth serve as "space savers' for the permanent teeth, he said. If the primary teeth are allowed to decay, the future permanent teeth may not come in correctly.

'Parents need to clean out their infant's mouth after every feeding, even before the first tooth comes in," said Gail Scharff, dental hygienist in community dentistry at the Dental Branch.

A damp washcloth is recommended to wipe out the mouth. This procedure will also allow the infant to become accustomed to the feel of a clean mouth after every feeding.

When that first tooth comes in, brush it, is her advice. "You don't necessarily have to use toothpaste, but a thorough brushing at least once a day should begin with the first tooth."

Flossing is as much a part of oral hygiene as is brushing. Parents also should floss their child's teeth once a day

By the age of two and a half, a child should have a full set of primary teeth, and then should begin regular (twice a year) visits to a pedodontist.

Question: My two sons are very active youngsters. I worry about the possibility that they might lose their teeth in accidents. Is there any thing I can do if this happens?

Answer: If a child should lose a tooth in an accident, there is hope for saving the tooth. Dentists say there is a good chance of saving the tooth if it is put back in its original socket as soon as possible. Time is the most important element in determining whether the tooth will be successfully replanted or if resorption-dissolving of root fibers-will occur. Research has shown that when a tooth is replaced in the socket within half an hour, there is excellent chance of success.

Dentists recommend that a knocked-out tooth be retained in the mouth between the teeth and lower cheek while the patient is being rushed to the dentist. If this is not possible, put the tooth in a wet cloth or glass of water, but do not try to clean it.

Question: At what age should I take my son to a dentist for his first checkup? What can I do to make

it a pleasant experience?

Answer: It's a good idea to take your son to a dentist when most of his primary teeth have appeared, usually between two and three years. A visit to a dentist at this early stage in his life can help establish good dental care habits that last a lifetime.

Should any dental problems exist, such as decay or malocclusion, early detection is advantageous. The care of your son's primary teeth is very important. The first teeth help hold space to assure proper room for the permanent teeth.

You can help make your son's first visit to a dentist one that is pleasant and anxiety-free by carefully explaining beforehand what to expect. Talk about the upcoming visit to the dentist with the same positive attitude that you have about other new experiences. You will want to tell him that the dentist will look at his mouth and may take x-ray pictures to find out how his teeth are growing. Point out that the dentist or his hygienist will teach him how to clean his teeth and gums so that they remain healthy.

At the time of your son's initial visit, your dentist will suggest a time for his next checkup. This will be determined by the condition of his teeth and whether or not fluoridated water is available to you. When you make careful plans for a child's first visit to a dentist, chances are it will be a pleasant experience for him and that he will be happy about future visits.

PAGE 1E

Question: How early should dental care start?

Answer: It's recommended that parents start children on good dental care long before their first visit to a dentist-in fact, as soon as teeth appear in the mouth. It's important to take gauze and wipe the new teeth as well as the gum pads clean. Early neglect or early loss of the primary teeth can bring problems later on, including the need for braces. Parents should become accustomed to checking their children's mouths, the number of teeth, the condition of cleanliness and later on to help them with brushing and flossing. Until children are able to master good brushing and flossing techniques by themselves, parents should assume responsibility for their children's dental hygiene and establish a behavior pattern that will carry them through

Question: What is plaque and how does it affect teeth?

Answer: Plaque is the primary villain in dental disease. It is a sticky, colorless film of bacteria that continually forms on teeth. The harm comes when plaque combines with sugars in foods to form acid which attacks tooth enamel and causes decay. Plaque also attacks the gums, and when allowed to accumulate, it is a major cause of peridontal (gum) disease. An individual can protect his teeth and gums from dental disease caused by plaque by a regular routine of brushing and flossing to thoroughly remove plaque.

Question: As long as my dentures are comfortable, is it necessary to go to a dentist for checkups?

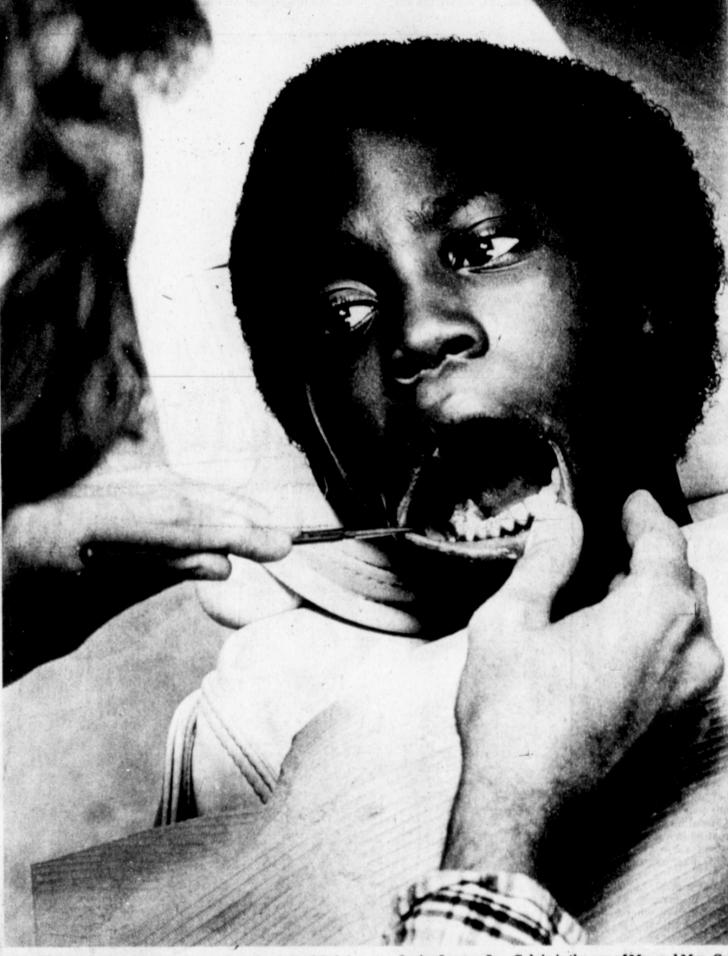

Answer: Regular visits to your dentist are as important for you as they are for people with natural teeth.

A denture intimately interacts with bone, muscle and soft tissues of the mouth to enable the wearer to function without natural teeth. The tissues of your mouth are constantly changing and a dentist will be on the alert for conditions in your mouth that might cause serious oral and general health problems.

You may not be aware of changes in the condition of your mouth that could indicate potential health problems oten discernible only by a dentist who is trained and experienced in total oral health care.

Question: What can I do if I have a dental problem that needs immediate attention while I'm in an infamiliar city on vacation?

Answer: There are a number of resources you can use to locate a dentist when you need emergency treatment away from home.

dentist at an early age and without prejudice from the parents will insure trust between the child and the dentist. This trust will make future dental encounters less traumatic, even when unpleasant.

Another method used to gain the faith of young patients is the use of non-threatening terms such as sleepy juice, tooth tickler and both instead of shot, dental drill and hurt.

As with poor oral hygiene, poor nutrition can compound hereditary dental problems. Some people are more prone to a "susceptible tooth" than are other people and need to be especially fastidious regarding oral hygiene and nutrition.

A balanced diet should always be maintained as the timing and frequency of sweets is of prime concern to prevent tooth decay.

Sucrose (cane maple or brown sugar) is the tooth's worst enemy and should be avoided as a snack.

Foods recommended as snacks are popcorn, fruits and vegetables without added sugar, meats, nuts, peanut butter without added sugar, milk, cheeses, plain yogurt and dill or sour pickles.

Mentioned as unsuitable for snacks were sugared gums, candies, mints and soft drinks, jellies, sweet pickles, gelatin products with added sugar, chips and honey.

Although 45 percent of Americans lose their teeth after age 65, it is possible to keep your teeth for a lifetime by using the latest preventive dentistry techniques to avoid the major cause of tooth loss-gum disease.

The Permian Basin Dental Hygienists' Society has facts you should know about dental health.

Dr. Phil Everett examines the teeth and gums of Calvin Jackson III at the Dental Clinic sponsored by the Midland

Junior League Inc. Calvin is the son of Mr. and Mrs. Calvin Jackson II. (Staff photo by Bruce Partan)

First, if you have friends or relatives in the unfamiliar area, contact them for recommendations. Since many dentists have full appointment books, you might be wise to obtain several names. Ask the manager of your hotel for the name of a dentist who is "on call." If a physician only is

available, he or she might be a source for a referral.

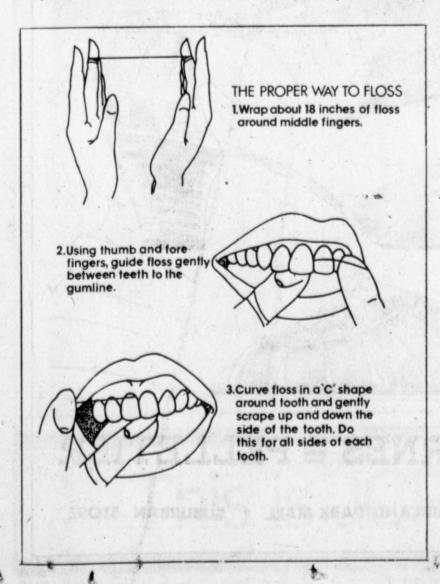

Another way to get help is by contacting the nearest dental society for names of dentists who could treat you. Usually you can find the society's number listed in the yellow pages for the telephone directory. Local dental societies oten have emergency referral services. Large city hospitals often have dental servies. This could be of help in your situa-

It almost goes without saying that no one wants to spend precious vacation time in agony because of dental pain. Regular dental checkups can probably help avoid dental emergencies on vacation.

Question: With the unstable prices of gold and silver, are there any alternatives to these metals available for use in dental work?

Answer: It is important to remember that differ-ent types of dental problems call for different types of restorative materials, depending on variable factors such as location and size of restoration, cost, esthetics, time available and so on.

The American Dental Association continues to research suitable alternatives for crown and bridge work. Although an acceptable alternative for the silver amalgam used in most fillings has not yet been found, research is constantly under way in that area.

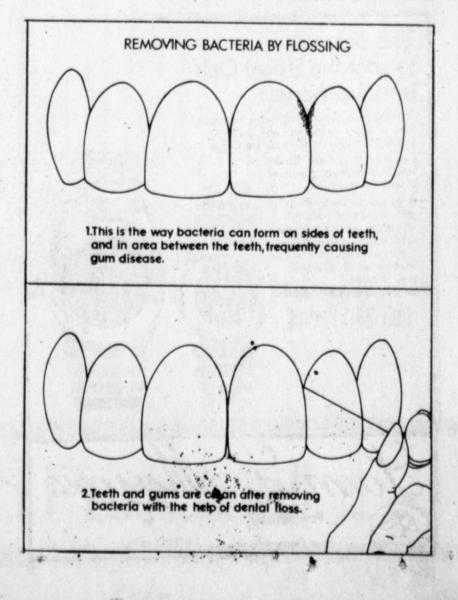

A reminder to parents

- Good oral hygiene begins at birth
- Read all food labels, for proper nutrition begins at home.
- Children up to eight years old should use a fluoride rinse or gel, even if the water supply is fluoridated.

 Dental visits should begin at age two and a half.

 Never put children to bed with bottles of anything other than water.

 Perform or supervise a thorough brushing and flossing of your child's teeth at least once a day.

Mexican-American legends, folklore being collected

THE MIDLAND REPORTER-TELEGRAM, SUN., FEBRUARY 22, 1981

Pan American University professor preventing tales from becoming lost

By SUSAN STOLER Associated Press Writer

EDINBURG, Texas (AP) — The man in the moon was one of two companions who quarreled over an ax one night when the moon was full. The moon ate them for fighting.

That's one of the Mexican-American legends that has been collected by Mark Glazer, a native of Turkey who probably knows more tales and anecdotes of Mexican-American folklore than most Hispanics in the Lower Rio Grande Valley.

Glazer, an associate professor of anthropology at Pan American University, started interviewing residents of the valley four years ago to record the sayings and stories that he felt were being lost with each passing generation.

He enlisted help from students to establish the Rio Grande Folklore Archive on campus, and he plans to publish an anthology of stories, jokes, recipes, legends and other items.

Every other Saturday, a determined group of Midlanders meets at

the north entrance to Midland Park

Mall not to shop, but to do a "little"

The group's name is the Midland

Roadrunners Club, and next "fun

run" is set for Saturday at 9 a.m.

According to a club representative,

"We run for fun and fellowship north of 868. We try to run a mile or two at

the pace of the slowest runners and

then each individual goes his own pace for the distance he pleases."

When the first runner is finished

with his "fun run," the group often

has drawings for prizes, and meets for juice, coffee or breakfast, and

The group is open to all interested

persons, regardless of age or experi-

Other "fun runs" are set for March

14, March 28 and April 11. A race is

The local chapter is part of the a-

tional organization of Road Runners

of America. There are currently about 40 members. Fun and fitness is stressed. The newest of runners are

welcomed, said a group spokesman.

running.

"RICH IS ALMOST an understatement about the culture here," Glazer said in an interview. "When I came to the Valley, it was obvious there was a need for this type work." The Istanbul native became in-

The Istanbul native became interested in folklore studies while a doctoral candidate at Northwestern University in Illinois. He accepted a teaching position here because of the wealth of local lore waiting to be recorded.

Stories, for example, about dancing devils and pretty women. Such stories often are linked to cultural taboos about certain activities on Good Friday.

One story is about a young girl who goes dancing against her mother's wishes on Good Friday and meets a handsome man. As the pair are dancing, she notices that instead of shoes, he has one hoof and one chicken's foot.

He burns her skin when he touches her, then disappears, leaving a smell of sulphur.

THE DANCING DEVIL story cir-

of races, including the Boston Mara-

mation can call Andra Chamberlin,

president, at 683-0922 during the day;

Get set for Roadrunners 'fun run' Saturday

thon, she added.

culated in 1979 after the handsome man reportedly appeared at a discotheque in McAllen. Police and reporters investigated the incident before dismissing it as nonsense.

Another Good Friday taboo apparently spawned from the oft-repeated tale of a girl who turns into a mermaid after disobeying her mother to go swimming. While many tales are used to disci-

pline children or reinforce traditions, others evolved to explain things, Glazer said.

For example, rattling dishes and other household noises are made by duendes, or elves. They often play according to legend — with toys, and are said to be the ghosts of unbaptized children.

Glazer said the same elves appear in the folklore of Spain and Portugal and apparently were imported by the Spanish conquistadors.

GHOST STORIES AND tales common in other American folklore also are found in Mexican-American oral

or Melinda Cherryhomes at 683-6226

tary; and Rick Green, treasurer.

tradition, he said. Alloing diese is the story of the hitchhiker picked up on a rainy night who vanishes, leaving a puddle of water on the seat. Mexican-Americans make up 78 percent of the population in the fourcounty region that borders Mexico.

re used to disciorce traditions, xplain things,

ty are Roman Catholic, beliefs often are tinged with folk religion and prac-

tradition, he said. Among these is the

tices not part of official church teaching.

Place WANT

Changing lifestyles threaten to halt forever the transmission of folklore to suceeding generations, Glazer said.

"The older generations do pass them on, but some things are dying out based on linguistic changes in the Valley," he said. "The language is changing from Spanish to Tex-Mex, which in an anthropological view is a legitimate language. Things like riddles and proverbs lose something in the translation."

Persons interested in joining the Society should call Gayloe Dodson, Senior Socity president, at 682-3376. Members and their guests are invited to attend the meeting...

...EMERSON ELEMENTARY PTA will meet at 7 p.m. Tuesday in the school cafeteria. The evening's program will be presented by the first grade classes.

Emerson PTA Executive Board hosted a cluster PTA luncheon on Wednesday. PTA members and principals from Henderson and Pease joined Emerson members in hearing Dr. Joseph Baressi, assistant superintendent of schools, discuss school attendance policies, the gifted and talented student program and the upcoming school bond election...

..."BRUNCH BY DESIGN," a spring special by the Midland Woman's Club, will be presented March 6 at the Woman's Club in Hogan Park.

Virginia Rachal of Midland will give a program on flower sculpture and custom designs for home and entertaining.

Demonstration one will be from 10 to 11: 30 a.m.; brunch from 11: 45 a.m. to 1 p.m.; and demonstration two from 1 p.m. to 2: 30 p.m. Admission is \$8 a person and is open to the public. Limited seating is available...

Lamesa High School and attended North Texas State University. She is employed by Richard B. Duniven and Company, Inc.

Miller is a 1972 graduate of Seminole High School and attended New Mexico Junior College in Hobbs, and Midland College. He is self-employed with Miller Logging Company.

Too-short sleeves no problem to fix By BETTY W. KINSER **Copley News Service**

Occasionally we will show off with something like, "In sewing nothing is impossible - some things just take a little longer."

Well, as impressive as that may sound, there will come a time when something is impossible. But this isn't

Dear Betty: I had a jacket made for me from a dark brown double knit. The dressmaker cut the sleeves too short and I cannot find anymore of the fabric. The jacket has patch pockets and a front band rather than collar and lapels. Is there any possible way of saving my jacket? - Roz

Dear Roz: All is not lost. There are at least two possibilities for making your jacket wearable. The first - and easiest - is to make the sleeves even shorter than they are - that's right. Turn up the hem of the sleeves to make a wide, wide facing. Turn back half of this width to form a cuff. You now have three-quarter sleeves that will look very nice.

Honor attendants were Monica Lee Sale and Leslie Crystal Sale, daughters of the bride, and Foy Midkiff, brother of the bridegroom.

Following a wedding trip to Mexico, the couple will reside in Martin Coun-

Or — with a little more work — you can make the sleeves longer. Select a co-ordinating fabric (such as pseudo suede, corduroy, etc.) in a color to match or contrast with your knit. Add enough to the sleeves to make a turnback cuff. Remove pockets. Add a strip of the fabric across the top of the pocketas trim. Restitch pockets in place. Remove front band, recut from coordinating fabric and stitch in place.

With the right blouse and skirt combination to bring all the colors and textures together, you will have a very fashionable outfit.

Now...healthier looking hair and skin with the magic of Jojoba Oi'l.

People who have tried Queen Helene Jojoba Oil Sh ampoo keep coming back for more. Why? Because Jojoba Oil is a natural beauty aid that has more than lived up to its promise of cleaner, healthier hair care. Jojoba Skin Conditioning Lo-tion and 100% Pure Jojoba Oil are also ideal skin conditioners and moisturizers for both men and women.

Nature's way to keep your hair and scalp truly clean.

Queen Helene Jojoba Oil Shampoo gives your he in new life, new sheen, new beauty. That's because it gets to the roots of many scalp problems. It flushes away dirt and du st accumula-tions. It effectively fights sebum scale (dandruff) buildup and helps hair roots to breathe so hair can flourish.

Nature's way to keep your skin properly moisturized.

Jojoba Skin Conditioning Lo-tion goes to work instantly... on contact. It absorbs deep into the skin and leaves no greasy or sticky trace — only a light, fresh fragrance that is pleasing to both men and women. Its moisturizing effect will last for hours after exposure to wind or hours after exposure to wind or other skin-drying conditions.

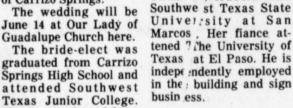

Queen Helene Jojoba Oil is 100% pure. Nothing is added. Ideal for softening those tense lines under the eyes. Its sooth-ing, skin conditioning action does wonders for any part of does wonders for any part of the body. Can also be used full-strength for chronic dandruff problems, Just rub it in. Let it it, then shampoo thoroughly and rinse

Incidentally, when you say Jojo-ba, it's pronounced "ho-ho-ba". ba, it's pro

Cathy Murphy seeks Jaycee-Ette presidency PAGE CE

Cathy Murphy, U.S. Jaycee-Ette "Today's Woman program manag-er," is currently seeking the office of president of the Texas Jaycee-Ettes. Locally, Mrs. Murphy has served in various capacities of the Midland or-ganization, including president. Under her leadership, the Midland Jaycee-Ettes were awarded outstanding chapter in the state in 1978, and she was recognized as the outstanding president for that administrative year.

Other awards that she has received locally include Rook-Ette of the Year, 1975; Jaycee-Ette of the Year, 1976; Outstanding Officer of the Year, 1977; and Outstanding Project Chairwoman in 1979 and again in 1980.

On the state level, Mrs. Murphy has received the Iris Stone Memorial Award as the state's outstanding public speaker; Outstanding Program Manager in 1980 and Outstanding Of-

Revolution presented her with its first

Americanism Medal "in recognition of the many contributions she has

Mrs. Rejebian is the author of

made as a naturalized citizen."

Aurora Press.

ficer in 1980. She was also presented an honorary life membership in the Texas Jaycee-Ettes at the 1980 state convention in Austin for her continued service and dedication to the organization.

Mrs. Murphy was named to the list of Outstanding Young Women in America in 1980

If elected, Mrs. Murphy will travel extensively throughout the state promoting the Jaycee-Ette movement. She will also have the opportunity to visit Washington, D.C., and meet with President Reagan.

Mrs. Murphy says that she is not only excited about the opportunities she will have to promote the Jaycee-Ette cause, but that she is also looking forward to promoting Midland.

"The Texas Jaycee-Ettes have not been privileged to have a Midland president since Mrs. Jackie Ford served in 1952 and Mrs. Billie Johnson

served in 1955," sive said. "After 25 years, it's time Tex ans were re-intro-duced to Midland. W ith a great deal of pride and enthusiasm, I'd like to

make those introductions" Mrs. Murphy will be campaigning in Galveston, New Br. aunfels, Del Rio and Port Arthur, and will culminate her campaign in San .Antonio, where elections will be held cluring the Jaycee/Jaycee-Ette state convention in May.

'The Female' to be reviewed

Ermance Rejebian of Dallas will give a book review of "The Female," a story of Theodora by Paul S. Rellman at Friday's meeting of the Ladies Association of Midland Country Club.

Cathy Murphy

The group meets at 11:30 a.m. for the social hour. Luncheon is at noon. Reliman is also author of "Iron Mistress" and "Comancheros."

For 45 years, Mrs. Rejebian has been contributing to the cultural life of Dallas and the entire Southwest through her oral book reviews and lectures. Born in Bursa, Turkey, of Armenian parents, Mrs. Rejebian lived as a child through the tragic days of World War I, survived the holocaust visited upon her people, and when the war was over, at the age of 14, came to the United States after a brief stay in England. She attended the Los Angeles public

schools, UCLA, taught in Beverly Hills and upon her marriage came to Texas, living first in Houston and later in Dallas.

In 1951, Mrs. Rejebian was honored as one of nine oustanding women of the Southwest by reason of "her accomplishments in civic, social and economic fields, which identify her as a leader.

In 1959, the Jane Douglas Chapter of the Daughters of the American

Decor score: Elegance on a budget

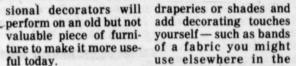

I DO O UN LA UL UV UUB

By BARBARA HARTUNG **Copley News Service** Q. I am adding a fami-

ly room on to our small existing home and want the room to serve many purposes including a place to entertain our adult friends and those of our teen-agers. I want the room to be comfortable and yet practical. Because construction costs are so high I have already spent my decorating budget on the room costs so I am too strapped to buy lots of

expensive furniture. Please suggest some ideas for decorating that will help me stretch my meager funds. - R.B. A. Your dilemma is common so take heart

that you're not alone. New upholstered pieces of furniture will eat up any budget in a hurry. Instead of a sofa consider constructing a simple long bench across one wall. The supports can be simple plywood boxes and the bench can be lengths of plywood attached and covered first with foam sheeting and then a suede or leatherlike vinyl fabric. The fabric is easily wiped up and the bench can function for seating for dining. Add some fat, cushiony pillows for floor

Vasectomies can be reversed successfully

NEW ORLEANS — Vasectomies, the surgical procdures which result in male sterilization, are being successfully reversed, although physicians still regard the initial operation as "permanent" and offer no guarantees.

"This form of birth control is beoming more frequently used than the tubal ligation procedure (tying the fallopian tubes to prevent pregnancies) for the female. It is inevitable that circumstances will cause some men to change their minds,' says Dr. Harold A. Fuselier Jr., a urologist at the Ochsner Clinic in New Orleans.

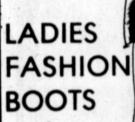

Although the procedure which renders a man sterile can be done in 20 minutes in a doctor's office, reversing the affect is much more complicated. "Vasovasostomy, which is what the reverse procedure is called, involves at least an overnight stay in a hospital, a general anesthetic and the surgery itself can sometimes take as long as three hours," Fuselier added.

A report on 21 such cases done in the past four years at the Ochsner Medical Institutions was presented by Fuselier at the annual meeting of the Southeastern Section of the America Urologicla Association in Puerto Rico and later published in the Journal of the Louisiana State Medical So-

ciety. "When the operation to reverse the vasectomy was performed within five years after the original surgery, the re-establishment of male fertility was 100 percent and the resultant pregnancy rate was 87.5 percent," Fuselier reports.

TAKEN \$29%

TO

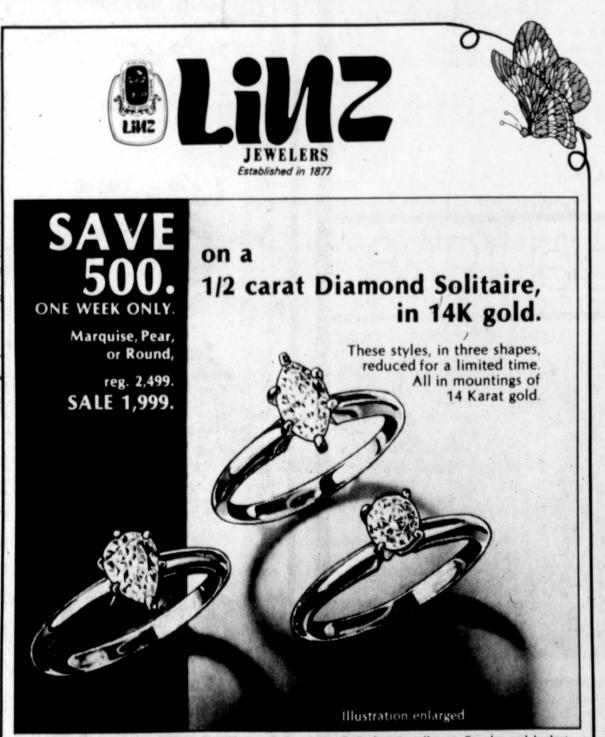

FINAL MARK DOWN HAS BEEN

Decorating sewing rooms

In patients with more than five years since the vasectomy, the pregnancy fell to 45 percent. This drop substantiates the view that prolonged obstruction of the vas deferens, the tube through which male sperm must pass unimpeded, has a dampening effect on the effort to reestablish male fertility.

Fuselier pointed out that the current success of these reverse vasectomies was largely due to improved technology in the surgical procedure.

Keep your home up and help keep electric bills down.

A large part of saving energy -and money - is simply a matter of cutting waste. In these days of "scarce" energy and inflation it's important to all of us to conserve. You can start by maintaining your own home.

Seal cracks around doors and windows with caulking and weatherstripping to stop heating and cooling leaks.

Check to ensure that ductwork is well insulated and sealed. If this is not done right, much of the heating and cooling escapes into your attic.

For the full story on saving energy — and energy dollars — get our Unhandy Person's Guides. Just call Texas Electric or ask for them on

the comments section of your next electric bill. They'll help even the most unhandy person tighten up his home.

At Texas Electric, we want to help you keep your electric bill down.

the start and the start and the second start and

By ERMA BOMBECK

If the American Family is becoming an endangered species, you can bet one of things that killed it is the dinner

When it was conceived, the dinner hour was to be a gathering of every member of the family who would sit around and exchange pleasantries and news of what each had done that day.

Egyptian pillows

Copley News Service

"Shadow-quilting" is version of "trapunto," variation of quilting from Italy. These pillows, however, owe their inspiration to another part of the world. They are classic Egyptian designs. One is a "scarab," the other "a falcon."

As exotic as the designs and techniques may sound, making shadow-quilted pillows is simple. All you need is a basic knowlege of sewing. Directions below show how to copy the Egyptian designs with

When you copy a design using the grid meth-od shown below, your results may surprise you. No matter how complex the original design may be (or how limited your artistic skills), you'll end up with an excellent copy. The proportions, if not every tiny detail, will e accurate.

Whether or not details are accurate is unimportant, anyway. If your proportions are right, your pillows will be pro-fessional looking.

The designs for today's pillows date back to ancient Egypt. Ever since the tomb of Tutankamon was uncovered in the 1920s people have been fascinated by Egyptian artworks.

trils, what pureed peas remind you of when you I know that's the way it's supposed to be belook at them from a discause I saw it once on the Donna Reed Show.

drilling to 13,000 feet, was assembled in the compa-

Cash outlay for record 1980 drilling was \$19.5 billion

By MAX B. SKELTON **AP Oil Writer**

HOUSTON (AP) - The total cost for drilling and completing a record 62,704 oil and gas wells and dry holes in 1980 was \$19.5 billion.

That estimate is 41.3 percent above the 1979 total of \$13.5 billion for 49,101 wells and compares with \$11.6 billion for the 48,709 whells drilled in 1978.

The average cost for drilling one foot of hole last year was \$67.78, up from \$58.29 a year earlier. The 1977 average was \$44.07.

Texas showed the largest net increase in drilling completion costs, up almost \$1.7 billion or 35.7 percent. Operations in the state cost \$6.3 billion last year, compared with \$4.6 billion in 1979.

Oklahoma had the largest percentage increase, however, with expenditures estimated at \$2.7 billion or 54.3 percent above the \$1.7 billion estimate a year earlier.

In the only other billion-dollar-plus states, Louisiana moved from \$2.7 billion to \$3.4 billion and Wyoming moved from \$757 million to \$1 billion.

The new cost figures have been compiled by Petroleum Information Corp., a Denver-basec! data and data analysis firm serving the petroleum and related industries.

Petroleum Information's annual review of oil and gas activities also lists average costs for drilling one foot of hole in the various exploration and development categories.

Compared with the ovescall average of \$67.78 a foot, the ramge is from \$58.67 for all oil wells to \$245.60 for new field wildcats in previously unexplored areas.

Other averages were \$6.2.81 for de-velopment wells, \$65.24 for dry holes, \$77.75 for other exploratory, and \$83.64 for all gas wells.

Operations in 10 leading: geologic provinces accounted for \$14 billion or 72 percent of the overall esstimated 1980 expendigures.

The leading province was the Gulf Coast Basin at \$4.2 billion. The deep gas Anadarko Basin of the Textas and Oklahoma followed at \$2.4 billion.

Other leaders were the Permian Basin of West Texas at \$2 billion, Louisiana Offshore at \$1.2 billion, Appalachian Basin at \$1 billion, Williston Basin of Montana and the Dalkotas \$657 million, East Texas Basin \$653 the basin last year were said to have led to 65 new field discoveries.

Petroleum Information said approximately half of the townships in the Williston Basin have yet to be drilled, leading some observers to describe the province as statistically unexplored.

The percentages of success and production levels were said to be underlying the strong surge in Williston activity the past three years.

The basin's 1980 success ratio of 23.4 percent was said to stand well above the typical wildcat rate for the Rocky Mountain region, 17.2 percent.

And the average gauge on wildcat oil discoveries in 1980 was said to be 200.5 barrels a day compared with a national average wildcat gauge of only 97.6 barrels a day.

Petroleum Information said the strong increase in drilling has been accompanied by an intense scram tile for leases in the basin.

The total bonus money at 23 corn-petitive lease sales in 1980 in Monta ria and both Dakotas was said to have approximated \$128.2 million, an aventage of \$57.64 an acre for the 2.2 millic in acres offered by government agencies.

Montana and North Dakota wer e said to have set new one-sale bonus records with bids reaching a high of \$3,025 an acre for one Montana tract.

Petroleum Information, saying Williston activity continued into 1981 at an even stronger rate, said estimates for undiscovered reserves in the basin range from 1.5 to as high as 5 billion barrels.

Three firms announce contributions to museum

Three companies will contribute a total of more than \$70,000 toward the cost of displays in the Permian Basin Petroleum Museum, Midland.

The companies, according to a museum announcement, are: Gearhart-Owen Industries, Fort Worth; Halliburton Services, a Halliburton Co., Duncan, Okla.; and Schlumberger Well Services, Houston, a division of Schlumberger Technology Corp.

The three exhibits sponsored by the firms are to be installed in a \$1.5 million expansion to the museum scheduled for opening in the spring or early summer of this year.

Gearhart-Owen will sponsor a display dealing with perforating. The exhibit will show how holes are made in casing and cement to admit well fluids or for other purposes. It will be part of a larger unit on well completions.

Halliburton will fund a display demonstrating placing of casing and cement in wells. It will make use of cutaways, polarized light, and other devices to explain these steps in the drilling and production processes. Schlumberger Well Services will

Stevens joins Williams

Thomas G. Stevens, former

contribute funds for construction of an exhibit relating to testing and logging of wells. The exhibit will show how modern methods reveal the productivity of new wells and the characteristics of formations through which wells are being drilled.

The museum previously announced Cameron Iron Works, Dowell, and Sivalls, Inc., as being sponsors of exhibits. Mobil Foundation, Inc. is sponsoring part of the cost of an exhibit in the new wing.

Exhibits for the museum expansion are being designed and built by Universal Exhibits, South El Monte, Calif., on a contract with the museum. Chosen displays among the large number were offered for sponsorship on a first-come, first-served basis.

A number of the planned displays were not considered suitable for corporate sponsorship and are being funded by gifts from individuals, foundations, and companies.

The Midland museum was opened in 1975 and makes heavy use of animated, "hands-on" exhibits. It is already the largest museum centered around the petroleum industry.

christianed Rig No. 5, the latest addition to its fleet of rigs. This unit is on location in Borden County, three miles east of Ackerly. The rig, capable of

ny's Odessa yard. A sister rig will be completed in April.

Commission OKs field rules

AUSTIN — The Railroad Commission has granted Chevron U.S.A., Inc., an exception to field rules that is expected to lead to the recovery of an additional 40 million barrels of oil from the SACROC Unit of the Kelley-Snyder field in Scurry County.

The exception, granted by Chairman Jim Nugent and Commissioners Mack Wallace and Buddy Temple, will permit Cheron to locate further oil well sites anywhere within the unit area that is no nearer than 467 feet to unit boundary lines. Approval of Cheron's application was recommended by Senior Staff Geologist Bill E. Watson, who conducted a public hearing on the request Dec. 5.

The SACROC Unit of 49,900 acres accounts for 98 percent of the acreage within the Kelley-Snyder field. The field was discovered in November 1948 and has produced more than 1.06 billion barrels of oil. More than 1.04 billion barrels of the field's cumulative output has come from the SACOC Unit.

Today, the field has 1,432 producing wells, including 1,360 within the unit.

At the December hearing, a Chevron witness testified that the operator expects to drill 351 oil tests and injection wells during the next five years and that Chevron "expects to recover approximately 40 million barrels of oil in this program"

The Kelley-Snyder field was unitized in 1953 and a year later a water injection project was initiated to enhance oil recovery. A commission-approved carbon-dioxide injection program was initiated in 1972. In granting Chevron an exception to

the density and spacing requirements in the Kelley-Snyder field, the commission also allowed each application filed under the exception be approved by the Oil and Gas Division's Rule 37 Department.

Dow buys assets

HOUSTON - Galveston-Houston Co. announced the sale of substantially all of the operating assets of its fluid services division to the Dow Chemical Co., for approximately \$46 million in cash.

These assets consist principally of the company's operating facilities and equipment in Louisiana and Texas but do not include the barite producing properties, mine and barite plants located in Missouri.

million, and the Arctic Slope Etasin \$567 million.

Williston is a newcomer amon,g' the leaders. Compared with only nine active drilling rigs as recently as 1972, Pe-troleum Information said an estin 1 ated 160 rigs were working the Willis t on Basin at the end of 1980.

The 291 new field wildcats drilled in

PED, MGF file with SEC

AUSTIN - Two oil and gas drilling partnerships from Midland have applied to register securities for sale in Texas with the State Securities Board

MGF 81, Ltd., filed to sell \$6.25 million in securities.

PED, Inc. 1981 Programs Series B filed to sell \$375,000. Overall, 22 applications to register

\$25.53 million in securities were filed the first week of February. The board now must approve the applications before the securities may be sold.

vice president and manager of the Energy Department of First City National Bank in Houston, has joined the Clayton W. Williams Jr. companies of Midland as vice president in charge of acquisitions.

He will continue to reside in Houston where he has opened an office for Williams.

Stevens had been with First City National 18 years, the last four as manager of the Energy Department. He is a graduate of Texas A&M University with a B.S. degree in Petroleum Engineering. He also completed the Stanford University Executive Program.

Before going with First City National, Stevens had worked for Chevron U.S.A., Inc., as a petroleum engineer in Houston and Gainesville, and with Chase Manhattan Bank in New York as a petroleum engineer.

The new Williams vice president is a member of the Independent Petroleum Association of America, the American Petroleum Institute, and is a former member of the board of directors of Sage Energy Co. of Midl and.

Thomas G. Stevens

Stevens recently was named to the board of directors of First City National Bank - North Belt.

His mother, Mrs. Louise Stevens, is a resident of Lubbock.

Reed survey lists 8-rig increase in drilling work

Reed Rock Bit Co's weekly survey reported 389 rigs in operation in West Texas and Southeastern New Mexico. This report reflects an increase of eight units over last week's count and an increase of 83 rigs as reported for this time last year, thus indicating an increase of activity for the Permisin Basin region.

Lea a) 1d Eddy Counties, New Mexico continue as the leaders of activity for this area. Lea County reports 45 rotaries in operation, an increase of four as meported on January 4 of this year. H'ddy County continues in second place with a report of 31 rotaries, but with a decline of one as

reported on January 4. Pecos County continues as the leader for Wesht Texas activity, reporting 23 rigs run ning. This also is a de-cline from the 26 rigs reported at the first of this year. Next are Andrews and Ward w, ith a count of 16 each, followed by Cinockett and Loving with a count of 15 en ach.

Other court ties with 10 or more rotaries working are as follows: Ector, 11; Hockley, 12; Howard, 13; Irion, 10; Martin, 10; and Upton, 11. Coun-

DALLAS - Texas Oil & Gas Corp., headquartered in Dallas, has announced the addition of two persons to the company, the promotion of one employee and the transfer of an-

Kenneth J. Pfeil joined the compacas an engineer in the Gulf Coast rict office in Corpus Christi. He is secent graduate of Texas A&M University with a B.S. degree in Petrole-Engineering.

he company added Stephen L. Paisch to its Gulf Coast District fice as area engineer. He previously was drilling supervisor for Mobil Oil drp. at Freer and Pawnee.

Larry H. Carpenter has been named vice president for the North Louisian District at Shreveport, La.

He previously served as staff dengineer with the company's whollyowned subsidiary, Delhi Gas Pipeline

Corp. The company transferred David alter to the Mid-Continent District as district land manager. He previously as district land manager for the Kansas District. He has been with exas Oil & Gas cince 1976.

NEW ORLEANS - Robert C. nields, vice president in charge of Producing Department-East of exaco U.S.A. announced that Texab has acquired an oil and gas exoration lease on approximately 47, **po** gross acres from Gulf States aper Corp. of Tuscaloosa, Ala. The acreage is in Greene, Pickens d Tuscaloosa counties, Alabamaa, nd is in the geological province of the

astern Black Warrior Basin.

HOUSTON - Richard S. Morris, mecutive vice president and general counsel of The El Paso Co., has been lected a director of the company. He oined El Paso as assistant general counsel in 1973 after being in private law practice in Santa Fe, N.M. He was named vice president and associate general counsel of El Paso Natural Gas Co. in 1976 and vice president and associate general counsel of the El Paso Co. in 1978. He became executive vice president in May 1980.

THE WOODLANDS - Dan J. Hartcnerg Corp. as vice president and general manager of the Rocky Mountain He is headquartered in Denver. Hartman formerly was associated with Amoco Production Co., most recently as the company's division geologist in Denver.

Inc., the company's domestic petroleum operation

The firm also announced that Bill M. Van Meter has moved to Natomas Energy's San Francisco headquarters as executive vice president. He had been president of Natomas North America since the company was formed in March 1978.

DENVER, Colo. - Griffin Petroleum Corp. has a new field discovery in Adams Couny, Colo., near two fields discovered by thre Denver company in recent months.

The new discovery well, No. 1-24 Mary, establishes the Fencepost field south of Griffin's Baseline field and west of the company's Bromley field.

The No. 1-24 Mary has been production tested at 52 barrels of oil and 125,000 cubic feet of gas per day.

James E. White, a senior geophysicist in the Amarillo District office of Pioneer Production Corp., has been promoted to the newly-created position of manager of geophysics.

He now has responsiblilty for geophysical activities in the company's five distict offices, including offshore.

White has been with the company since 1976. ****

CORPUS CHRISTI - Forest Oil Corp.'s South Texas Division manager in Corpus Christi, John F. Dorn, announced that Steven D. Daniel has been promoted from senior petroleun engineer in the Louisiana/OCS Division in Lafayetteto division engineer in the South Dexas Division's Drilling & Production Department. He has been with the firm since 1976.

DALLAS - The Hrubeyz Oil Co., Inc., of Dallas has announced three key appointments.

Robert E. Bailey has been named vice president - Finance. He previously was vice president - Administration for Alamo Petroleum in Dallas.

A. Wayne Breeland has been named vice president and general counsel. He joins Hrubets from the Tulsa, Okla., law firm of Rogers & Bell. Prior to joining that firm, he was employed by Sinclair Petroleum and Amerada Petroleum Corp.

Wayne V. Selvig has been selected manager of contracts and lease records. Prior to going with Hrubetz Oil, he was employed eight years as contract and land coordinator by Texas Pacific Oil Co., Inc., in Dallas.

HOUSTON - Cotton Petroleum Corp. reported it achieved record producion during 1980 and has budgeted \$160 million for exploration, development and acreage acquisition in 1981. The figure for 1980 was \$132 million.

Cotton's 1980 production was 997,000 barrels of oil and 19.2 billion cubic feet gas John G ton's president, said. ****

Live Oak County, and extend to a point on Valley's existing Live Oak

County pipeline system. The line initially will stransport 8 million cubic feet of gas per day, but has a design capacity of 20 million cubic feet per day.

HOUSTON - Houston Oil Equipment recently opened new office, research and manufacturing facilities in Houston for use in staging and storage.

The company also announced the appointment of Dick Ogden to marketing manager. He was with NL Rig Equipment four years before joining Houston Oil Equipment.

HOUSTON - Grant Geophysical Corp. announced that David G. Shave has joined the company as vice president - Instrumentation. He formerly was associated with a major geophy-ing.

NEW ORLEANS - Tidewater Inc. announced that a newly-organized subsidiary of its oil and gas expooration and production company, Hil-liard Oil & Gas, Inc., will file a registration statement with the Securities and Exchange Commission relating to the reorganization of Hilliard and certain limited partnerships organized by Hilliard as general partner from 1970 to 1979. The new subsidiary is Tide Oil,

Inc.

**** DENVER, Colo. - Energy Minerals Corp. of Denver has announced that its common stock has been admitted to trading on the American Stock Exchange.

The ticker symbol is "EM." ****

DALLAS - Dorchester Gas Corp. announced that William H. Aikman has resigned as senior vice president and director of the company in order to pursue personal business interest. Dorchester Gas also announced that Robert K. Taylor has joined the company as senior vice president and president of Dorchester Exploration,

Taylor formerly was chief geologist with Amoco Production Co. He was associated with the firm 20 years.

Taylor also has served as vice president - Exploration for Aztec Oil & Gas Co. and has been an independent geologist. ****

DALLAS - H. J. Gruy and Associates, Inc., announced that Terence Elliott has been named chief geophysicist of the Firm. He has been senior geophysicist since 1975. HOUSTON - Geosource Inc. an-

nounced it has entered into a letter of intent to acquire Crosby Valve & Gage Co. of Wrentham, Mass. The acquisition will involve an ex-

Higher oil prices may come out of top secret meeting

GENEVA, Switzerland (AP) -New oil price increases and substantial production cutbacks may be in store for Western nations following a secret, two-day meeting of OPEC oil ministers, industry sources say.

There was no official word from the **Organization of Petroleum Exporting** Countries, but sources in Europe and the Unitd States sai Saudi Arabia the world's largest oil producer and the supplier of 8 percent of U.S. oil needs - may be planning a substantial cut in output and a \$2-a-barrel price increase to \$34 a barrel.

OPEC Secretary-General Rene Ortiz said the meeting, which ended Friday, took up "long-term strategy" matters, including prices and rela-tions with the Third World. He refused to say whether the 13-nation cartel's prices or production policies had been reviewed

Sheik Ahmed Zaki Yamani, the Saudi oil minister, said that "so far, no change" has been decided on his country's daily production level of 10.3 million barrels. On prices, "nothing yet" had been decided, he said.

Industry sources said the OPEC meeting included Yamani, ministers and other officals from Venezuela, Indonesia, Algeria, Kuwait and the United Arab Emirates.

The meeting came amid continued growth of the world oil surplus and a resulting decline in prices on the spot market, due to drops in oil consumption and increases in production by Mexico, Britain and other non-OPEC members.

Non-communist world oil use fell nearly 5 percent last year and is expected to fall 1 percent to 2 percent more in 1981 following a more than 150 percent jump in OPEC prices since late 1978. OPEC's daily production of 24.5 million barrels accounts for half of the oil needs of the non-communist world.

Because a seasonal drop of 4.5 million barrels a day in Western oil demand is expected as winter ends, oil supplies will be ample "to meet current consumption requirements as well as build up normal inventory levels," said Gary Ross, an economist at the Petroleum Industry Research

Foundation in New York.

Faced with the surplus and spotmarket price drop, some oil industry sources said the Saudis may be planning to reduce their oil output to as little as 8 million or 8.5 million barrels daily. Kuwait and Libya also were reported to be considering output cuts.

OPEC last raised official prices in late December and early January, pushing the average price of the cartel's oil up \$3, to \$35 a barrel. Saudi Arabia, however, set its minimum oil price at \$32 a barrel, \$4 below OPEC's current suggested base price.

Last week, the Saudis informed buyers they would have to pay \$36 a barre on 600,000 barrels a day of "emergency" supplies provided to help make up for the loss of oil shipments from Iran and Iraq, due to the war between the two neighbors.

Industry analysts said a \$2-a-barrel increase on all of Saudi Arabia's oil could boost average U.S. gasoline or heating oil prices less than a half-cent a gallon but could result in larger increases if other OPEC members follow suit.

Oil royalty checks could come later

COLLEGE STATION - Landowners who are drooling over the prospect of receiving fat royalty checks from property over the Austin Chalk oil formation need to relax, says a Texas A&M University petroleum engineer.

Because the land is in the Austin Chalk zone doesn't automatically mean wells will be drilled immediately.

Temperature variations are the reason, says Dr. Stephen Holditch, who added that marginal oproduction

One of the most active developing areas in the nation, the Austin chalk between Giddings and College Station and rock with which oilmen are experienced. Vertical fractures that are not interconnected occur across the stratum. It dips from 5,000 feet deep near Caldwell to 12,000 feet in Bren-

grees Fahrenheit, the oil has a low specivic gravity and contains 300 standard cubic feet (SCF) of gas per barrel of oil. This makes it a heavy, thick, 'dead' oil that does not flow easily and is less attractive to refineries," Holditch explained.

On the south margin, the oil is at 275

the light oil is easier to produce and more productive to refine, when it is found

Since gas prices are controlled by government regulations, the hydrocarbon products from the deeper zones is not as profitable

Drilling in the Austin chalk is not as simple as in the big field discoveries in East and West texas. When a good well was found in those areas, oil investors used "closeology" (as compared to geology) to drill on nearby leases.

In the chalk, they've discovered, closeology at just a few hundred yards interval can result in a dry hole. Seismic data is therefore required for just about every well drilled. Holditch said.

But the chalk has tradeoff advantages, he said. Shallow depths in the Burleson County area involve about a

Holditch said temperature varies with the depth of the oil-bearing for-mation which outcrops north of Aus-tin. "Around Caldwell, well logs show the chalk temperature to be 155 de-grees Fahrenheit, the oil has a low ON 6-MONTH CERTIFICATES.

\$400,000 per well drilling investment. To go down 9,000 feet around Giddings costs abouth \$750,000 per hole. In Washington County a finished hole costs more than \$1 million. "With more gas, the oil has more

energy to flow. In the north Austin chalk, pump jacks must be put on wells almost immediately which increases cost of recovering the oil," Holditch said.

In the mid-chalk area, wells will flow several years before pumping units are required. Therefore, economic conditions currently favor mid-chalk to south activity, but it could change. Holditch believes changes in the windfall profits tax and the deregulation of gas could eventually make it more profitable to drill and produce the shallower Burleson County chalk and deeper chalk in Washington County.

degrees with 20,000 SCF per barrel

AUSTIN - A master of arts degree energy and mineral resources at The University of Texas at Austin has received approval from the UT System Board of Regents. The degree plan will be submitted

to the Coordinating Board, Texas College and University System, for final action.

No other college or university in Texas offers such a degree.

The program would include interdisciplinary studies in geological sciences, petroleum engineering, economics, resource management, government and policy stuy.

DALLAS - ARCO Oil & Gas Co. has

named Joe W. Jackson vice president and chief geologist.

He succeeds Harrison C. Jamison who earlier was appointed vice president and manager of the company's Western District in Denver, Colo.

Jackson joined ARCO Oil and Gas in 1949 as a geophysicist in Denver. His assignments have included a stint in Midland as district exploration manager.

HOUSTON - Eastman Whipstock has named David Fournier division operations manger for the North-Europe Division. He is based in Aberdeen, Scotland.

He has been with Eastman Whipstock since 1972 ****

OKLAHOMA CITY - Drilling Mud, Inc., headquartered in Oklahoma City, announced expansion of the firm into the South Texas area, with the opening of division headquarters in Houston.

Six stockpoints, already in operation, will report to the Houston office. They are in Hebbronville, Mathis, Sealy, Countze and Bryan.

Bill Givens has been named manager of the South Texas Division. Michie Robinson is division sales manager.

Drilling Mud also announced the opening of an office in Lafayette, La., with Jim Cordell as manager.

The company also announced the addition of Jack Bryant as a salesman. He will work outof the DMI office in Shreveport, La.

In another move, Drilling Mud has acquired Pacific Mud, a Californiabased drilling fluids company with headquarters in Bakersfield. With the acquisition, DMI gained locations at Bakersfield, Ventura, Rio Vista, Woodlan, Santa Maria and Long Beach, all California cities.

SAN FRANCISCO, Calif. - Natomas Company recently announced that John M. Seidl has been named president of Natomas North America,

WICHITA, Kan. - Tomlinson Oil Co. announced the appointment of veteral petroleum industry executive Joe W. Walters as Kansas Division Land manager.

His previous company affiliations were with Phillips Petroleum, Skelly Oil, Lion Oil and Monsanto Co. His most recent activity was as director of mineral development for the Federal Land Bank of Wichita. Tomlinson also announced the

narnming of John P. Trueblood of Los Angeles to the board of directors, and the election of Vernon L. Johnson vice president - Acquisitions.

Trueblood is first vice president of Bateman Eichler, Hill Richards, Inc. F'or the last three years, Johnson has been Gulf Coast exploration manager for Tomlinson.

TULSA, Okla. - The Bovaird Supply Co. has promoted Troy Allison to manager of general products sales in Tulsa. He previously was the company's manager of California sales and was headquartered in Long Beach.

Allison replaces Keith Smith who has been named manager of rotary products sales.

DALLAS - Summit Energy, Inc., announced that Dr. Steven M. Flory has joined the company as vice president - Administration. Since 1977, he has served on the faculty of Texas A&:M University, and prior to that he was associated with Arthur Andersen & Company in Atlanta, Ga.

TULSA, Okla. - Wayne L. Yeckley has joined Burkhart Petroleum Corp. in Tulsa as manager of Production. He started his oil industry career in 1969 with Exxon Co., U.S.A. in the Production Department, with assign-

ments in South Texas and Louisana. In 1977, he was named regional engineer for Mapco Production Co.'s Mid-Continent Region where he was ernployed until joining Burkhart Petroleum.

HOUSTON - Blocker Energy Corp. announced it has budgeted \$60 million for capital expenditures during 1981.

Of the total, \$35 million will be used for expansion of the company's contract drilling operations, including the purchase of six new drilling rigs. The remaining \$25 million will be used for oil and gas exploration, company officials said. ****

HOUSTON - John I. Whiteley has been named president of Weatherby Engineering Co. which is active in the Fermian Basin of West Texas and southeast New Mexico.

He will direct operations of the company from headquarters in Houston.

HOUSTON - Valley Gas Transmission, Inc., announced that its new Live Oak County pipeline project has entered the construction phase. The line will begin in Fant field in

change of cash for stock. Crosby is a developer and producer

of high technolgy specialty pressure relief valves used in the petroleum industry.

and half the specivic gravity of the 5,000-foot-deep variety, Holditch said.

"These are moe gas wells than oil wells," explained the engineer, "and

Nation of illiterates?

Any 6-year-old can tell you that structure, horse is supposed to pull the wwagon. Not vice-versa. Unfortunately, getting our horses and has been a problem in more ways than one in recent times.

Take the subject of federal aid on to-education, for example. That's engi real can of worms. For all the and deral money pumped into the reducational system, learning has The pot shown many signs of improvement.

foie In fact, the achievement of stuboard tests - continues to decline wedespite the fact that federal spending almost quadrupled beween 1960 and 1976-77.

the Looking at the educational syssomem realistically, we think it's sa futile to continue to pour taxpayer

money down this drain until our Tot priorities are back in order.

a to It used to be that youngsters natwent to school because they felt

they had to in order to get ahead

this old world and, probably, partly because of the fear of papa's razor strap. And they were appreciative of the facilities and the curriculum.

of d Today, though, we're playing a sototally different ballgame. The iscold rules don't apply and, someoditimes, it seems, the new rules don't work either.

Stamp of atonement

Maybe that's because the wagon has somehow managed to work its way around the horse until now the horse is "pushing" the wagon.

In straight talk, we've been operating for the past few years on the principle that money alone can solve all of education's problems and help our schools graduate better-educated young people who'll one day lead this nation of ours. That isn't the way it really is, though.

Money alone cannot make a young person accept knowledge; that student has to "want" to learn before he will. Until he or she actually wants to learn, all the money in the world can be poured into our schools, making them the best facilities available and bestequipped to teach our young people — and it will all be in vain.

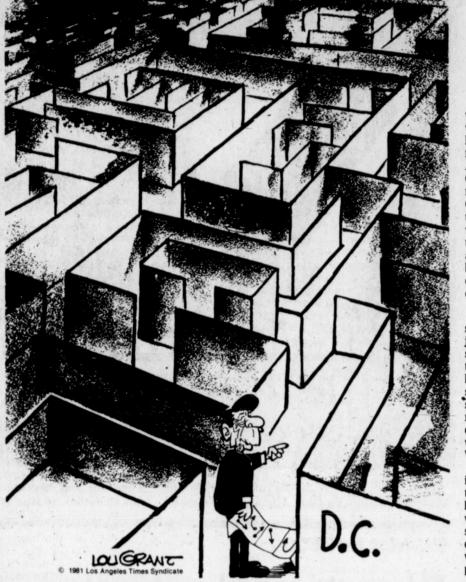

What is needed, rather, is for parents to resume exerting authority and to instill in their children a desire to learn. The home is where the reconstruction project for the nation's school system must begin.

Unless that project is started soon, we face the disheartening possibility of turning out some of the most poorly-educated students from some of the finest educational facilities in the world. We must not become a nation of

illiterates.

"FOLLOW THE LEADER"

WASHINGTON MERRY-GO-ROUND Guatemala: Trouble ahead for Reagan?

WASHINGTON - Turmoil between left and right in Central America is nothing new. Its latest manifestation has been the murderous violence in El Salvador, where right-wing assassination squads and leftist guerrillas have been simultaneously undermining the shaky centrist government of military men and civilians.

The next Central American hotspot, according to my intelligence and diplomatic sources, will be Guatemala. It will be a test of the Reagan administration's new "pragmatic" policy in the region, which is designed to rescue the United States from the difficulties brought on by Jimmy Carter's emphasis on human rights.

Reagan and his advisers have tried to soft-pedal the Carter human rights policy - not by repudiating it outright, but by suggesting that the United States should ally itself with anticommunist regimes and try gentle persuasion to wean them away from their repressive practices.

recently have been concentrated on the exploding situation in El Salvador, little information has been coming in on the potential Guatemalan tinderbox. But the violent confrontation between right and left is only slightly less serious there.

There are four active left-wing guerrilla groups operating in Guatemala. They have been involved in the assassinations of important government officials and members of the right-wing business community that

ART BUCHWALD

Bloom's dastardly deed threatens the bureaucracy

Somebody did a terrible thing last week. His name is Paul Bloom; he was a Carter appointee who, on his last day in office, gave \$4 million to four major charities: the Salvation Army, the National Council of Churches Charities, the National Conference of Catholic Charities, and the **Council of Jewish Federations, to help** the poor pay their heating bills this winter. What made it such a terrible thing is that the \$4 million came from a \$100 million fine that an oil company had to pay to the Department of Energy for ripping off the public by overcharging them for gasoline.

Mr. Bloom, without consulting his superiors, decided the money would just be sitting in DOE's account until somebody figured out whom to give it to, which could take years. Whether he had the authority to do this or not is still in question. But the fact he did it strikes at the very heart of the bureaucratic system. Mr. Bloom made a decision, and he implemented it. which isn't the way things are done in Washington

What Mr. Bloom should have done is type up a proposal and submit it to the Secretary of Energy, who would have then ordered a study to see if it was feasible. The study would then be sent to a consulting firm to make certain that the people at DOE knew what they were doing. When the report from the consultant came back,

Right-wing Guatemalan leaders have openly boasted of their "close

Guatemalan presidency in 1982.

distasteful to them.

EDITORIAL

it would be reviewed and then sent back to the particular agency responsible for disbursing fines from oil companies, and then be sent back to the secretary for further action. The poor wouldn't have gotten any money to pay their heating bills, but at the same time the system would not have been endangered.

The new Reagan people in the Department of Energy immediately took the only action they had at their disposal. They demanded that the four charities return the \$4 million immediately to the DOE, because you just don't hand out that kind of money to the poor (even if it comes from the oil companies for cheating the public). They explained to the charity executives that they had no right to the funds.

The charity people said that the money had already been given to the poor people, or promised to them, and that there was some question whether they would return it or not.

This was an outrageous response, which got Reagan's Secretary of Energy angry, and he threatened to take them to court.

Through his counsel, he also hinted that Mr. Bloom might be prosecuted for overstepping his authority. Mr. Bloom claims that he had the authority to dispense the money and that he figured the funds would do a lot more good helping people pay their oil bills than sitting in the bank.

Bloom's gesture was an unforgivable action by a public servant, and against everything this government stands for. The charities in question have an obligation to send back the money and even try to collect from the poor what has already been spent

What every official fears is that the Bloom action could set a precedent for other Washington bureaucrats. Instead of dealing with paper, they will start dealing with people, and pretty soon everyone here will have to begin making decisions.

As long as the oil company fine money stayed in the bank, no one had

History has been unfair to a compassionate and dedicated doctor.

Congressional approval of Traxler's proposal would be a small measure of atonement.

TODAY IN HISTORY

Today is Sunday, Feb. 22, the 53rd day of 1981. There are 312 days left in the year.

Today's highlight in history: On Feb. 22, 1732, George Washing-

ton was born at his parents' plantation near Fredericksburg, Va. On this date: In 1973, the United States and China

agreed to establish liaison offices in each others' capitals.

Jimmy Carter, in line with his human rights advocacy, cut off all aid to the right-wing rulers of El Salvador and Guatemala. When the centrist junta replaced the rightists in El Salvador a year and a half ago, Carter resumed economic aid. Then, after much soul-searching, he resumed military aid to the junta early this year, despite public outcry over the slaying of four American women and two U.S. labor officials.

The cutoff of aid to Guatemala has not been rescinded. But my sources say that President Reagan has decided that the Guatemalan military regime, however deplorable its record on human rights, should get U.S. help to prevent a takeover by leftist elements.

It's a decision the administration should weigh very carefully.

While most U.S. intelligence efforts

supports the ruling party. Sources told my associate Bob Sherman that the leftist rebel groups do not now enjoy widespread support among the Guatemalan people. But increased violence from the right, directed at labor leaders, university professors and workers - many of whom have been murdered or simply disappeared - has not only radicalized the leftist elements but gained them sympathy among the general population.

But the rightist regime is still firmly in the saddle. And it is digging its spurs into the population with barely restrained vigor.

The Guatemalan rulers were elated by Ronald Reagan's election. They confidently expect renewed U.S. economic and military aid, without the embarrassing harping on human rights that made Jimmy Carter so

discussed what they both considered to be good news for their mutual interests: Reagan's takeover of the White House.

They had good reason to celebrate. The right wing in Guatemala has ties to Reagan intimates that give them understandably high hopes for Yanqui dollars in the new administration.

A few weeks after the election, a reception and closed-door briefing for selected members of Congress with a Guatemalan lobbying group was arranged by the Los Angeles public relations firm of Deaver and Hannaford. Michael Deaver, a longtime Reagan adviser, owned 43.5 percent of the firm at a time when the Guatemalans were paying it \$10,850 a month. Deaver, who is now on the White House staff, has disassociated himself from the firm.

On Inauguration Day, Sandoval, the 1982 Guatemalan presidential hopeful, announced that he had met with Reagan defense and foreign policy advisers before the election, and indicated that the Guatemalan rightists expect Reagan will honor "verbal agreements" to resume military aid to Guatemala and put an end to criticism of the regime's human rights record.

Whether any such agreements were actually made is almost beside the point. The perception that they were could put the Reagan administration in an embarrassing position. It could lead the people of Latin America and the world - to believe that the United States is reverting once more to the old days when Uncle Sam gave unquestioning support to military dictators in the name of anti-communism and protection of American business interests.

And lest there be any doubt about the kind of people the Reagan administration is thinking of doing business with, let me quote a radio broadcast last year by an official spokesman of Mario Sandoval Alarcon's National Liberation Movement: "I admit," he said. "that the MLN is the party of organized violence. Organized violence is vigor, just as organized color is scenery and organized sound is harmony. There is nothing wrong with organized violence; it is vigor, and the MLN is a vigorous movement."

to decide what to do with it. But as soon as it was given to organizations to help the poor, everyone was forced to take some action.

As we all know, \$4 million is a drop in the bucket to help poor people pay their fuel bills, so we're not talking about money, we're talking about principle.

If Bloom gets away with this dastardly deed, the millions of dollars stashed away in the DOE could be lost to the poor forever. We all know the department has far better uses for the money than the Salvation Army.

MARK RUSSELL SAYS

The target of heavy criticism lately is that fellow in the Carter administration who, on his last day on the job, gave away \$4 million to the poor. He may be sentenced to five years in Sherwood Forest with a band of merry men.

The culprit, Mr. Paul Bloom, who was in the Department of Energy, will be charged with unfashionable sensitivity toward the needs of others.

Other charges include: unbureaucratic avoiding of red tape, gross negligence of unnecessary paperwork and failure to observe traditional foot-dragging.

THE BIBLE CAN YOU QUOTE IT?

4. Is it true that the Bible names "the apple" as being the forbidden fruit? Genesis 3 5. What three persons are first men-

tioned in the Gospel of Saint Mattew? Matthew 1:1

Four correct ... excellent Three ... good.

Reagan's economic proposals have to overcome skeptics

:01 %8 WASHINGTON - As the Reagan administration pursues its Holy Graile - substantial tax and budget structs - it should be noted that the federal budget's great swelling, its bursting of seams, happened during 12 the Nixon years.

Now, this is not a column taking one more whack at the former president. Let him live his new life in New York 051 City. But the Nixon budget under-Ost. scores how misunderstood he was.

The conventional wisdom is that Nixon was severe with domestic pro-18% grams, slashing them, and sending

liberals into hiding. The record shows, however, that in 1968, just before Nixon took office, 45 cents of

the budget dollar went to defense, and 32 cents to human resources programs. When Nixon proudly an-

nounced his 1973 budget, those figures had been exactly reversed - with human resources out front to stay.

Indeed, during the Nixon years,

non-defense spending doubled, and there were quantom leaps in "payments for individuals" (Social Securiy, Medicaid, unemployment, welfare). Moreover, the Nixon adminisfration, overall, marked up record budget deficit, his biggest one, fiscal 1975, hitting \$45 billion.

4.15 Nixon was born to struggle, and he struggled with the Vietnam War and Great Society programs - both left to 818 him by Democratic administrations. 215 But early in his administration, Nixon ot so involved in the Vietnam War that his domestic policies amounted o.a continuation, even an expansion, abon of Democratic social programs.

By January, 1971, one of Nixon's idea spinners was upset enough over

117

"programmatic liberalism" that he wrote an in-house memo declaring that "the president is no longer a credible custodian of the conservative political tradition of the GOP."

In 1971, with an election year coming up, Nixon was not about to risk a recession or inflation. He increased the personal tax exemption, ordered a 10 percent surcharge on imports, devalued the dollar, imposed wage and price controls (including those on oil, thus planting the seed for a Department of Energy), took off the excise tax on cars and declared himself a "Keynesian in economics."

Most Americans felt prosperous in 1971, and the Democrats produced George McGovern for the presidency. Dr. Arthur Burns, chairman of the Federal Reserve Board, was happy Nixon was re-elected, but greatly displeased with his economic policies.

That 1973 federal budget, announced by Nixon Jan. 24, 1972, would have pleased any reasonable Demo-crat, provided he didn't hate Nixon.

To create "new prosperity," Nixon called for: a \$39 billion budget deficit (it wound up as only \$15 billion); indexing of Social Security so recipients wouldn't suffer from inflation; increased Medicare benefits; hikes in

health spending; \$7.5 billion for a new revenue sharing program. Nixon boasted that aid to the aged

had increased \$16 billion during his presidency; that school lunches for needy children had tripled, with foodstamp payments increasing 900 percent; and that federal contracts for minority businessmen had been boosted from \$8 million in 1969 to \$242 million by 1972.

The record also shows that the Nixon administration established the Legal Services Corporation for the poor, hiked the budgets for the National Endowment for the Arts and Humanities from \$17 million in 1970 to \$165 million by 1975, and created the Comprehensive Employment and Training Administration (CETA).

After winning his 1972 landslide, Nixon vowed to reform the bureaucracy, vigorously cut away wasteful programs and slash federal spending. He put Caspar Weinberger, then director of the Office of Management and the Budget, and John Ehrlichman, head of domestic programs, to work on this project.

But something called Watergate intervened, the heavens fell in, and Nixon was forced to leave office 20 months later. One irony is that Nixon's effort to impound funds for useless programs (he was a piker compared to Presidents Kennedy and Johnson on this score), angered the Democratic Congress to the extent that in 1974 it created its first budget committees

Their original purpose was to free up the impounded monies and establish a say-so in the budget process. But the Democratic chairmen of

and the second of the second o

these committees wound up years later angrily disciplining their liberal colleagues on spending proposals.

President Gerald Ford had a pass at the urgent reform of our government (he set a record deficit of \$66 billion), and Jimmy Carter wrestled with the problem during his entire presidency.

Now there is no Vietnam War, no Richard Nixon, no Watergate, no Jimmy Carter giving uncertain signals. There is President Ronald Reagan, OMB Director David Stockman, a good-natured top economic adviser named Murray Weidenbaum, a conservative, Republican Senate, and a House tilting toward conservatism. Indeed, many of the programs being cut originated with the last elected Republican president, Richard Nixon.

There is no more opportune time than now for the Reagan economic reform plan to work. But this town is still full of skeptics.

AUSTIN NOTEBOOK

Jones' cross-filing bill desig ned to cross up increasing partisanship

By BILL KIDD **Austin Bureau**

AUSTIN - Gov. Bill Clements is not, insists Sen. Grant Jones with some sharpness, the first Republican gubernatroial nominee to be elected in Texas in 105 years.

Rather, the pipe-smoking Abilene Democrat insists (correctly), that it was Allen Shivers.

Shivers accomplished that feat by cross-filing in Democratic and Republican primaries - something that was later prohibited by a largely Democratic Legislature to preserve party purity.

Jones has proposed a change in the law to permit cross-filing once again, and has come in for some criticism for Democratic Party officials, including chairman Bob Slagle of Sherman.

But Jones indicates he doesn't see why there's such a flap over his legislation

"It's not," he comments, "a new concept in Texas." Why has Jones proposed allowing cross-filing?

"I feel like one of the reaons Texas has had an exceptionally fine government in the past has been that we've not been involved in partisan politics as a one-party state," he explains. "If we evolve into a two-party state, the question of partisanship, rather than issues, could cloud the process "

"I think that with Texas' open primary system, we have had a greater interchange of philosophy than most states with a two-party system." His bill, Jones argues, would "help prevent party issues from becoming so strong as they have the potent.en-

He is the Legislature become more part isan? R egarding that, Jones says, he

**W! ouldn't care to comment."

sut there has been comment, both side and outside the Legislature, to ins e effect that partisanship is inci teasing, as the number of Republic ans has grown.

Many have seen the House action in deciding the election contest in San Antonio between Democrat Al Brown and Republican Alan Schoolcraft in favor of the incumbent Brown as a clearly partisan action.

It was, clearly enough, partisan on behalf of the Republicans, who stuck with Schoolcraft; Democrats divided their votes, so presumable, on that basis, it could be argued that they were less partisan than the Republicans.

The election contests, however,

wasn't - despite all the talk about it - a clearly partisan issue in party terms.

Brown had served with many of the members to whom he appealed on a question which had, at the very least, some validity.

Secretary of State George Stake and Republican State Chairman Chet Upham were clearly partisan in their attacks on Bexar County officials, whom they accused of being clearly

partisan in supporting Brown. Partisanship, like beauty, may be in the eye of the beholder — but the Schoolcraft episode, if it shows nothing else, shows that Jones' point about the potential partisan battles in the Legislature isn't just a guess.

Jones' colleagues in the Senate have demonstrated some partisan feeling as well, however, although not in as spectacular or noisy fashion.

Law Enforcement Agencies Assistance program, under the governor's office. Finally, after first threatening to veto the measure if it wasn't written the way he wanted it, Clements

agreed to a "compromise" version to share control over the fund with the lieutenant governor and comptroller of public accounts.

Senators and the governor hassled

at some length over legislation to create a state-funded criminal justice

grant system, replacing the Federal

Democrats had proposed the attor-ney general instead of the comptroller — but Clements refused.

He told reporters later that his refusal had nothing to do with the fact that Attorney General Mark White is a Democrat and potential gubernatorial candidate; it was just that he wanted to avoid any possible conflict

of interest the attorney general might have in acting on grants for law enforcement agencies.

And, on passage of the bill, the Senate Republicans voted against it. Was there some partisanship there? A case could be made that there was.

Still, it's difficult to see that crossfiling would particularly add to or detract from partisanship in the Legislature.

It might provide a little insurance for some members in areas where Republican strength is growing, in cases where straight-ticket voting is heavy.

But the Legislature hasn't needed, in the past, two parties to provide grounds for bickering and argument, and that has come after the election. 430

LETTERS TO THE EDITOR

A sweet story

To The Editor:

This is a Friday the 13th story that turned into a Valentine story. On Friday I ran out of gas on Main and Dengar. I walked two blocks to Big Spring and on the corner found Baldwin Motor Co. in a converted gas station.

I asked the man working there if he had any gas. He didn't. But at that point he interrupted his work, found a two gallon can, took me in his pick-up to a gas station to get some gas, returned to my car, put the gas in the tank and started the car when it wouldn't start at first.

Too often we hear how people do not want to get involved. Clyde Baldwin went out of his way to get involved and would not take any payment for his trouble. I want to publicly thank this nice man for his help and express my gratitude to him.

It's no contest To The Editor:

OK, Midland, you have my attention and you have made me mad! How can Midland Memorial Hospital object to Odessa's Medical Center Hospital trying to update their cancer treatment unit? You say MCH's competing with you. The cobalt unit at MCH has been in operation for 11 years and Midland's is not even completed yet! Apparently Midland

there to go on hold until they open for business

A lady's auxiliary of MCH has agreed to give the hospital the \$347,-000 they need to purchase the equipment they need. In fact, the entire cobalt unit at MCH was constructed, equipped, and furnished by the lady's auxiliary. The only tax dollar that has been needed is for the treatment of indigent patients. By the way, you needy cancer patients will have to go on hold for good - Midland has stated they cannot afford to take care of anyone that cannot pay.

The only thing that MCH is trying to do is update an 11 year old unit. MCH is not trying to compete with anyone! I wonder if Mr. Cappadonna drives an

11-year old car?

Misjudged lives

To The Editor:

Once in a while, august people whose opinions are widely respected make a goof. It happened to the Su-preme Court in 1857 with the Dred Scott decision in which the court declared the slave to be only 34 of a person and legalized slavery. It made it lawful to buy, sell or even kill at the owner's discretion any slave.

It happened in 1973 when the Supreme Court declared that a baby in utero (in the womb) not to be a full person — Roe vs. Wade. Thus the baby in the womb would be denied the protection to life guaranteed to him the minute he changed his place of residence from the womb to the outside world by the 14th amendment.

Base your life on the 'law of supply'

By NORMAN VINCENT PEALE

The first Henry Ford, inventive genius extraordinary and founder of a gigantic motor company, was a rather whimsical character who had curious ways of doing things.

Some years ago one of his early associates, D.W. Flint, told me that Ford asked him one day what his chief ambition in life was. "To make a million dollars and then to take life easy," was the quick response. "That is my big objective in this world dollars and more dollars."

A few days later Ford walked into Flint's office and laid a package on his desk. "It's for you. Open it," he said. The package contained a pair of rimmed eye glasses from which the lenses had been removed and two round silver dollars substituted. "Put

wants all of you cancer patients out

A young woman secretary in a New York business office heard this law of supply described and became fascinated with it. Out of a relatively small salary she developed generosity in giving to others, to the church, to the community fund and to other charitable enterprises. It proved to be the turning point in her life. "The more I give, the more my purse fills up," she exclaimed wonderingly. But that wasn't all. Her entire life filled up too, and a few years later she wrote me that she had a "wonderful husband and two equally wonderful boys. And it's all due to that amazing law of supply," she declared.

It is a fact, an undeniable fact, that the world is chock full of values, but they can be blocked off by negative and impoverished mental attitudes. A man who worked his way out of poverty to become one of the most creative possessors of wealth I have ever known once told me: "There is a deep relationship between the words, 'scarcity' and 'scare.' " You can actually scare prosperity away by having a scarce attitude toward life. This is not at all to minimize the problem of poverty, but it may also be said that many people could extricate themselves from that condition by practicing the law of supply and thus stop scaring values away.

An inspiring friend, A.B. Fuller, was born into a very poor Southern share-cropper family. His father, a good man, accepted his lot in life as one of "God's poor." But his mother didn't go for that. She insisted God doesn't want anybody to be poor, else why did he fill the world so full of so many wonderful things? Her strong faith activated the boy. He started out selling soap from house to house. He had what it took - courage, perseverance, personality and boundless faith.

Today he owns seven big cosmetic companies and is involved in other enterprises as well. And on his way up he took along a lot of people, both black and white, who shared in his prosperity. He demonstrated the law of supply - an amazing law available to anyone and everyone. Granted this man may be an exception, one who was endowed with great native ability, but it still remains that many of us are supinely content to live on a fragment of life's abundance when so many more values could be activated if we had a positive rather than a negative attitude. The law of supply will go to work for any person who will go to work with it.

1928 characterized the ill-starred Dred Scott decision as a "self-inflicted wound on the reputation of the court." What would Hughes say today about Roe vs. Wade?

The Supreme Court decision to legalize the act of killing has opened a Pandora's box and presents us with an ominous future. Wherever and whenever the respect for human life is cheapened, there is an educational effect upon that culture and society. This has happened in America. In just 10 years we have witnessed a ten-toone increase in the rate of abortion. In some major American cities abortions now exceed live births.

It took a Civil War to erase the Dred Scott decision!

What will it take to rid ouselves of Roe vs. Wade? **Connie Coxe Brooks**

Midland A precious gift

To The Editor:

Because of the need to protect my children's right to privacy concerning their adoption, please do not use my name with the following letter.

I continue to read in the news of cases of child abuse. Each time I read one of these horrible stories, I thank God for two wonderful couples, somewhere, who loved their babies enough to give the child the greatest gift a child can have, loving parents, parents who will love them, be patient in their baby ways, guide them through the childhood years and love them as a teenager.

I have only the greatest respect for people who give up their children, many times they are giving this child its very life.

If more couples could understand parenthood is not for everyone, many lives would be blessed, that of a childless couple, a frustrated unwilling parent and most of all, God's greatest creation....a precious child.

Better his day...

To The Editor:

This is in reply to Craig Hubbard's letter dated Jan. 20, 1981, and printed in your paper Feb. 15, 1981, criticizing the release of our hostages just as he was enjoying the inauguration of Ronald Reagan.

I believe that ruining one day for Craig was much better than turning Iran into a parking lot, and our hostages returned home in boxes draped with flags along with probably thousands of our sons, brothers, husbands and fathers, just so we could show world power through strength.

Thank God for men like Jimmy Carter.

Ida Hazlewood Midland

Mrs. N.P. Wilson (letter, February 8) regarding "a woman's role" obviously is confused as to what the women's movement or what I prefer to call the human rights movement is all about.

Psychologists have long observed the psychological damage that is caused by forcing persons into "roles," male or female. To determine a persons purpose in life strictly by sex leaves little room to develop the potential in all of us.

Traditionally, there have been few options for women in our society. To decide what is masculine or feminine by traditional stereotypes has become dysfunctional in today's society. One would have to feigh an ostrich position to accuse society has not changed.

There are many factors which have contributed to the steady increase in the number of women employed outside the house. These include:

1 - transger of home responsibilities to industry

2 - mechanization of household tasks

3 - reduced birth rate

4 - economic pressures on one-income families

5 - increase in number of fémaleheaded families

6 - the growtn of the feminist movement which has encouraged women to explore alternatives to the traditional role of full-time wife/mother/homemaker

There is no question that this is a time of transition for women who are adding new roles to their lives and hopefully males will grow from these changes by adding new roles of par-enting, division of household chores and a more complete view of women as total humans.

DR. NEIL SOLOMON

Information, facts about DMSO

ar Dr. Solomon: There is considerable public est about the substance dimethyl sulfoxide, there is also much confusion and controversy there is also much confusion and controversy but the real facts surrounding DMSO. As a result, Americans — particularly the nation's 31 in arthritis patients — are being exploited daily by sensational testimonials, unscrupulous promoters and unsafe products. The Arthritis Foundation, which for the past 30

ears has been sponsoring much of the research in cumatic diseases, believes that: (1) DMSO should t be available for sale until research has determined its safety and effectiveness in treating such ses as arthritis, (2) the FDA has been unjustly of dragging its feet in approving the drug, (3) the attention created for DMSO has obwhat is the most effective weapon against

builts: research. Builtse of the intense need for proper consumer antion about DMSO, the Arthritis Foundation ped an extensive editorial statement by Arederic C. McDuffle, senior vice president for cal affairs and former director of research at he Maye clinic. We think this information is particutimely and significant for your readers. It larig timely and significant for your readers. It is the definitive opinion of the only national organization concerned with seeking the cause, cure and proper treatment of arthritis. — Peter C. Mathon, Vice President/Arthritis Foundation, Atlanta, Geor-

The following are Dr. Frederic C. McDuffie's comments about DMSO.

DURING RECENT months, the drug dimethyl lfoxide -- commonly known as DMSO -- has been center of public confusion and controversy. A large part of the debate stems from two segments on CBS-TV's "60 Minutes" which made "wonder drug" claims for the substance appear true. These television shows and subsequent congressional hearings in Washington have dramatically - and sometimes sensationally — publicized DMSO, giving false hopes to millions who are in pain. DMSO has been halled as a miracle treatment for

arditions ranging from sprains, to arthritis, to black eyes, but there is no adequate scientific evidence that the substance has any effect beyond being a mild pain reliever. Amid all the claims made DMSO are these facts: (1) DMSO has not been nately tested by scientific methods and is very possibly dangerous, and (2) many Americans, par-ticularly the nation's 31 million arthritis patients, re being exploited daily by sensational testimonials unscrupulous promoters and unsafe products. Let us examine the facts about DMSO and the ns needed, according to the Arthritis Foundation, for providing the public with research an-

HISTORY OF DMSO

DMSO is a byproduct of the paper manufacturing process, and has long been used as an industrial solvent. In 1963, it was patented as a drug by Crown-Zellerback Corporation of San Francisco. The same year, the University of Oregon School of Medicine reported that DMSO, when applied to the skin, was rapidly absorbed and circulated throughout the body, and that it quickly reduced pain and inflammation. Soon thousands of people were using DMSO for painful conditions in a haphazard

These forms of DMSO are not intended for human use and as such often contain contaminants which may be harmful. Because DMSO is a "carrier chemical," it can carry into the bloodstream any impurities which may be present in the DMSO or on the skin to which it is applied. Other side effects must also be considered, including nausea, headaches, skin rash and the possibility of eye damage as suggested in the earlier animal studies.

"People are taking a risk whenever they use a substance of unknown quality and effect," says FDA Commissioner Dr. Jere E. Goyan. "FDA is eager for researchers to test DMSO to determine whether it is safe and effective for conditions besides interstitial cystitis. In the meantime, it is risky business to drink, inject or apply to the skin any substance not intended for that purpose." Misconception: DMSO is a "miracle drug" for a

variety of medical ailments.

Fact: Much of the enthusiasm for DMSO comes from testimonials, not from scientific data. This is a pattern physicians and researchers have come to expect whenever new "miracle" pain relievers are announced, and it is why even quack remedies can enjoy brief periods of public attention. It is correct to remain skeptical of claims which are not based on careful measurements made by objective scientific observers.

THE LARGEST GROUP of patients caught up in the DMSO controversy are America's 31 million arthritis victims. The drug is being openly promoted at inflated prices by unscrupuious individuals as a remedy for arthritis, despite the fact that there have been no well-controlled studies documenting the effectiveness of DMSO in treating either of two major types of arthritis, rheumatoid arthritis or osteoarthritis.

One of the greatest dangers in the indiscriminate use of DMSO is that patients will neglect proven forms of treatment, and neglect can lead directly to needless pain and crippling. Although arthritis cannot be cured with drugs, modern treatment methods including medication, therapy and surgery - are highly effective in controlling pain, in preventing damage to the joints and in enabling arthritis pa-

tients to live happy, productive lives. Misconception: DMSO is approved and widely used in certain states, as well as in numerous foreign countries.

Fact: DMSO for medical use beyond that approved by FDA is legal in two states (Oregon and Florida), but it is not widely used there. Nor has DMSO become a major sales product abroad in countries where it is approved, such as in Canada where it is marketed for a little-known rheumatic disease caled scleroderma. Critics of the FDA make it appear as if DMSO is a medical panacea throughout the world which is being unjustly withheld from the American people. That simply is not true.

Some clinics in Mexico claim to use DMSO for arthritis, and thousands of Americans travel there each year seeking relief. They often get relief, but not from DMSO. Many of those clinics are actually dispensing phenylbutazone, steroids and tranquilizers, which are available in the U.S. but which require close medical supervision to avoid serious side effects. In some cases, patients have been given dipyrone, a drug capable of causing a blood disorder and death.

CURRENT STATUS

The FDA currently has over 30 applications from drug companies and physicians to conduct studies of DMSO in the treatment of several painful conditions, including osteoarthritis. Most of the initial studies will be done on acute injuries such as sprains and dislocations, which will require only short periods of treatment and will thus keep the risk of side effects low. If these studies prove encouraging, DMSO will subsequently be evaluated in chronic conditions such as rheumatoid arthritis.

In the meantime, a group of major arthritis centers have agreed to conduct a cooperative study of DMSO's effect on finger ulcers in scleroderma. This study is scheduled to begin soon and is sponsored by the National Institute of Arthritis, Metabolism and Digestive Diseases, a division of the National Institutes of Health (NIH).

Snelson bill would establish schools for mentally retarded

Austin Bureau

AUSTIN - State Sen. W.E. "Pete" Snelson, D-Midland, has introduced legislation that would authorize the Texas Department of Mental Health and Mental Retardation to establish public schools at state facilities for the mentally retarded and mentally ill.

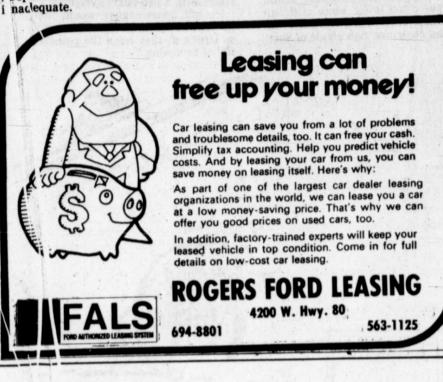

Senate Bill 278, sponsored by Senlson, would authorize the department to establish public free schools at any state school for the mentally retard-ed, state hospital for the mentally ill or state center for human development.

The Board of Mental Health and Mental Retardation would act as the board of trustees for such schools, and al residents of a facility where a school is established would be eligible to attend if they are 21 years of age or younger and are not high school graduates.

SB 279, also sponsored by Snelson, would place such schools under the

vrovisions of the Texas Education Code. If passed, the schools created under SB 278 would be eligible for funding

fr om the Foundation School Program. Bringing the schools under the Foundation School Program would help the department comply with federal law, and address criticism by the u.S. Department of Education that services at the department's facilities are

For all new drugs, the Food and Drug Administra-tion (FDA) requires controlled scientific testing and results before it can approve the substance for neral public use. However, in 1965 the FDA sunded testing of DMSO because the drug was ound to cause cataracts in the eyes of rats. Possible eye damage in humans still remains an unanswered consequence of using this drug. No serious side effects in humans have yet been

eported, so the FDA has over the years gradually lifted its ban on DMSO testing and has allowed it to be scientifically evaluated for certain limited applications. At present, human use of DMSO is only pproved for treatment of interstitial cystitis, a rare and painful bladder condition. Yet DMSO is sold to over 100,000 Americans each year, usually illegally and often in forms not intended for human use.

COMMON DMSO MISCONCEPTIONS

Claims and testimonials for DMSO abound, yet nost discussions of the drug overlook certain critical formation. For example

lisconception: All DMSO is the same.

Fact: DMSO can be obtained in at least four strengths - 50 percent, 70 percent, 90 percent and 100 percent. The 50 percent version is used for treating the bladder condition in humans, and is not considered strong enough to be potentially helpful in dealing with the pain of arthritis, sprains, bursitis and the like. The later ailments are being treated with the 70 percent version, a concentration that is not widely manufactured and is generally not avail-able except to doctors who are conducting approved test with it.

The 90 percent version of DMSO is used for terinary applications on horses and dogs; the 100 rcent version is neither a medicine nor a drug ut rather an industrial solvent. Unfortunately, se are the two types of DMSO that people most on use to treat athletic injuries such as sprains chronic pain conditions such as arthritis.

Pioneers gather, reminisce

SAN ANTONIO, Texas (AP) -Seven of the original civilian pioneers who came from Dallas 60 years ago to establish the first maintenance depot on what is now Kelly Air Force Base gathered Friday to look at the changes and reminisce.

On Feb. 21, 1921, a handful of mechanics came from the Aviation Repair Depot at Dallas' Love Field to set up the San Antonio Intermediate Depot at Duncan Field, now part of Kelly and one of the lrgest industrial complexes in the Southwest.

During six decades of aviation

progress since then, the linen-covered Jennies of the 1920s have given way to the giant C-5 and B-52 jets of today, but Kelly remains a focal point in the logistical support of the Air Force.

The maintenance pioneers planning to attend the reunion Friday afternoon are C.M. "Pappy" Knight, Her-bert L. Clancy, Walter "Spud" Gul-lette, A.D. Lattimer Sr., Edgard Nevels, Cecil "Duck" Woodyard and Howard V. Woodyard. All are residents of San Antonio.

Knight, 92, is president of the Kelly Civilian Retirees Club. He retired in 1953

THE CRYSTAL OF CHERBOURG. AND INTEREST ON CHECKING N.O.W. ACCOUNTS.

SUNDAY, MONDAY & TUESDAY ONLY

TWO REMARKABLE NEW OFFERS FROM MIDLAND NATIONAL BANK.

First, let us offer you, as an elegant addition to your home, fine French leaded crystal.

THE CHERBOURG CRYSTAL COLLECTION.

Formed of 24% lead crystal, each piece of this glassware shimmers with exceptional clarity and brilliance.

From now until February 27, 1981, if you put \$250 or more into any Midland National savings account, you'll receive, at no cost, a matching pair of this elegant crystal. Even better, you can receive two matched pairs with a deposit of \$5,000 or more. And until May 29, 1981, each deposit of \$50 or more in any savings account will enable you to buy another pair of crystal for only \$6.95 (plus sales tax).

You will also receive this fine Cherbourg crystal when you open your new Interest On Checking account.

THE INTEREST ON CHECKING N.O.W. ACCOUNT.

The money you might normally use for checking can earn 51/4% interest compounded daily and paid monthly, in an Interest On Checking account at Midland National Bank.

Effective December 31, 1980, Interest On Checking accounts will allow you to earn interest on all the money you keep on deposit, with all the conveniences of regular checking. And, if you keep an average of \$500 in your checking or savings account, you will not be assessed a service charge. .

OUR COMBINED OFFER.

Remember then, that from now until February 27, your \$250 deposit in a Midland National Interest On Checking account or savings account will entitle you to a free pair of French leaded crystal. And that with subsequent deposits to your savings account, you will be able to purchase more of this fine crystal at a greatly reduced price.

We invite you to come to Midland National Bank. Because once you've seen the Cherbourg crystal collection and discussed the benefits of our new Interest On Checking account, the reasons for banking at Midland National will be crystal clear.

THE MIDLAND NATIONAL BANK Member FDIC

The Midland National Bank reserves the right to extend or withdraw this offer at any time without notice. Purchase crystal through May 29, 1981. Free crystal offer expires February 27, 1981 Limit one free gift per household. ©

Polluted creek seen as symbol of state problem

By BEN FUNK **For The Associated Press**

KISSIMMEE, Fla. (AP) - Shingle Creek, a puny sliver of water that sloshes through the teeming developments of Orange and Osceola counties, is sick infected with phosphorous, nitrogen and other damaging wastes it is fed by man

Environmentalists call the ill-fated creek a symbol of statewide malaise, a "growth at any cost" mentality common among developers and politicians. The torrent of sewage pouring into Shingle Creek, which feeds Lake Tohopekaliga, the magnificent, fish-rich body of water known as Toho, has prompted the Florida Environmental Regulation Commission to warn cities and counties that such pollution can lead to state-ordered restrictions on growth.

Moratoriums on hookups to overtaxed sewage treatment plants have already caused long delays in development of housing and tourist attractions.

"Nobody ever dreams that something like this can happen until the moratorium hits them," said Bill Frederick, chairman of the Florida Department of Environmental Regulation.

THE FLORIDA LEAGUE of Anglers, a statewide group claiming some 10,000 members, has chosen Shingle Creek as "a horrible example" on which to concentrate its fight to halt growth that ignores environmental concerns. "There are many Shingle Creeks in Florida," group founder Lyman Rogers of Ocala said. "But this was the most highly identifiable, in the heart of Florida

Troops complete readiness test

SAN ANTONIO, Texas (AP) - More than 650 troops of the Army's famed 101st Airborne Division completed an Emergency Deployment Readiness Exercise Thursday at Camp Bullis, northwest of here.

The so-called "Screaming Eagles" unit was composed of an infantry rifle company and support troops from Fort Campbell, Ky.

During the exercise, the airborne assault troops used eight of the Army's new UH-60A 'Black Hawk" helicopters.

The Black Hawk is the first Army aircraft designed specifically to carry an infantry squad of 11 fully equipped soldiers and a crew of three. With its twin T-700 turbo-shaft engines, the helicopter also can transport up to four tons of sling-loaded equipment.

100 GOOD REA\$ON\$ FOR IN\$TALLING GA\$ AIR CONDITIONING . . . NOW!

Install Gas Air Conditioning now, and you'll not only be cool the first day this spring ... you'll save a cool \$100! Buy before May 1st and you'll receive a \$100 rebate direct from the factory ... plus you can defer monthly payments until May, too. But \$100 and deferred payments are not the only reasons for installing Gas Air Conditioning.

Gas Air Conditioning Systems are very energy efficient. They now use less gas energy because the constantly burning gas pilot has been replaced with a new pilotless ignition system. Pilotless ignition saves gas, and saving gas will save you money.

Gas Air Conditioning is also very dependable. It's built to last and last with no loss of cooling capacity. Hand-crafted of sturdy stainless steel components, Gas Air Conditioning has fewer moving parts and no compressor to wear out or break down. That means less wear and lower maintenance costs. And to prove its dependability, Gas Air Conditioning gives you the longest warranty — the 10-year "No Sweat" limited warranty** twice as long as all others.

Gas Air Conditioning. It's energy efficient. It's designed to lower maintenance costs, to lower operating costs. Gas Air Conditioning will save energy and that will save you money. And when you combine Gas Air Conditioning with adequate conservation measures, like caulking, insulation, storm doors and windows, you'll save even more.

But don't wait too long. The \$100 rebate ends May 1, 1981. Call now for a free home cooling survey and cost estimate. There's no obligation.

"Manufacturer's limited warranty covers all de fects in material and workmanship on the sealed refrigeration unit for ten years from date of installation of the air conditioner when it is installed in a single-family residence. All other parts are warranted for one year from date of

PIONEER NATURAL GAS COMPANY

and at the headwaters of the Kissimmee-Okeechobee basin

"We cannot expect to get anything done at the bottom of the system if we have state agencies allowing that degree of pollutants to be put at the top," he said

Shingle Creek once rose from a swampy, southwestern corner of Orlando, meandered into Osceola County, entered its historical channel and, just before emptying into Toho, became a small stream filled with fish.

But the swamps that nurtured it were drained and bulldozed. Upland canals were dredged so runoff water from the new residential areas could drain into the creek.

From a gentle, winding stream, Shingle Creek became a straight-line ditch filled with sewage wastes which nurture plants but poison fish and other aquatic life

Hydrilla, an exotic weed, and water hyacinths feed on the pollution and form dense mats on the lake bottom, blocking sunlight and threatening the aquatic food chain. Blue-green algae blooms choke fish breeding areas. Trophy-sized bass could eventually give way to tough trash fish such as gar and shad. Environmentalists point to nearby Lake Apopka in warning

The 51,000-acre lake once proclaimed "Bass Fishing Capital of the World" is now tainted by years of mucky farm runoff, sewage treatment discharge and citrus processing wastes. Lake Toho is 27 percent smaller than Lake Apopka in surface acreage, but receives twice the amount of phosphorous.

As long ago as 1969, the Florida Pollution Control Commission ordered the Orange County Commission to cease pollution of Shingle Creek.

The U.S. Environmental Protection Agency stepped in with a 1977 order banning discharges by county sewage plants into surface waters.

But negotiations led to an eventual agreement that gave Orange County until 1984 to reduce the level of phosphorous and until 1988 to stop discharges into Shingle Creek.

THE AGREEMENT cleared the way for construction of a new Western Electric Co. plant and revival of other building projects stymied until then by the state-ordered sewer hookup moratorium.

"Everything was tried and nothing succeeded," Rogers complained. "It was a matter of governments backing down and allowing a county to continue to break the law going into a second decade."

In 1971, the Florida Game and Freshwater Commission "drew down" Lake Toho, lowering the water level to expose the lake bottom to air and sunlight. The process dries up and oxidizes bottom mud and re-establishes natural vegetation, said biologist Vince Williams.

Toho's fish population doubled by 1974.

Pollution mandated a second drawdown in 1979, and the fish population is still working to come back.

But Williams said the process is a treatment, not a cure.

"We are at the point where we would have to draw down so frequently the fish opulation would have no chance to come back. The possibility of a massive fish kill during drawdown is now very real. The lake might never recover at all. So we've decided not to chance it again unless the water quality is improved.

"If it isn't, the lake has 10 years at most and then it's not going to be worth anything for fishing.

Jim Swan, a Toho fishing guide, has taken the lead among local residents battling to preserve their fishing paradise.

IN 1978, WHEN lakeside property owners filed for permits to dredge channels into deep water, for boat usage, Swan fired off letters to the Army Corps of Engineers and took out newspaper ads. His customers and concerned residents began a letter-writing campaign.

The Corps denied the permits.

Now Swan's group, Save Our Lakes Inc., wants to save Shingle Creek.

"We've learned a lesson. Only when the people acquire knowledge and get involved will the government respond," he said. "These are issues I don't think the politicians have a right to decide."

survived.

lives.

"It was not easy to reach him to confirm what had happened, but he came to the United States and told of what he saw," Benavidez said.

Benavidez said he does not blame the Army for the long delay in receiving the award for his actions against North Vietnamese troops near Loc Ninh on May 2, 1968.

"I am glad it is all over," he said, "and it took some time. Must you must understand that the Army must have confirmation. They must fit all the blocks together before awarding the medal. This they

The former master sergeant said, "I just want to teach kids that quitters never win, and winners never quit.

Benavidez never quit during that jungle encounter.

The Medal of Honor citation states that Benavidez volunteered to fly from the relative safety of his forward headquarters to help evacuate a 12-man Green Beret team that had sustained heavy casualities in a clash with North Vietnamese.

Reagan agrees to delay cutting off TVA's federal borrowing

KNOXVILLE, Tenn. (AP) - The Reagan administration, bowing to congressional pressure, has agreed to delay cutting off the Tennessee Valley Authority's use of federal borrowings

both Republican and Democratic members of Congress from the seven southern states in which the agency operates.

TVA itself, in an "administratively

Sears Delivery not included

to finance nuclear power plant construction, two Congressmen say.

TVA officials had estimated the proposal by President Reagan's budget director, David Stockman, would cost its nearly three million customers \$2.5 billion in higher electric bills by 1995.

Senate Majority Leader Howard Baker and Rep. John Duncan, both Tennessee Republicans, announced here Thursday that Stockman has agreed pending further study to let TVA continue borrowing \$2 billiong a year from the Federal Financing Bank.

The announcement followed an intensive campaign on TVA's behalf by

Cuts in store for Amtrak's budget

WASHINGTON (AP) Amtrak's proposed budget shows cuts are in store for service on the Inter-American through Texas because the train fails to meet congressional use-and-cost requirements

Under the proposed budget, Amtrak President Alan Boyd said the Inter-American will continue to make daily runs between Chicago and St. Louis.

Its service between St. Louis and San Antonio, Texas, however, would be reduced to three times a week and daily service between San Antonio and Laredo and between Temple, Texas, and Houston would be eliminated.

Boyd said Thursday he had asked Congress for a new budget totaling \$970 million despite Reagan's proposal that Amtrak be allocated only \$613 million

Boyd said he expected Congress to ultimately approve an amount somewhere in between, meaning cuts other than those already envisioned in his proposed budget.

The restructuring of the Inter-American, which will save \$12 million a year, is being made because the daily service is not expected to meet the congressional criteria.

A little winter dip

Reagan's favorite word now seems to be 'they'

By JAMES GERSTENZANG **Associated Press Writer**

WASHINGTON (AP) - One of t'ne favorife words in Ronald Reagan's vocabulary seems to be "they."

It is used morning, noon and night, usually in conjunction with s uch phrases as: "they tell me I have to " or "they say it's time to. ...'

Maybe "they," whoever they are, could tell him that he is presider it and doesn't have to listen to what ' 'they'' are always telling him to do.

His predilection for the word became particularly apparent when NBC News cameras follow/ed him through his paces one day, as he had breakfast with labor lead ers, met with Cabinet officials, and a ttended a

"I'll enjoy this more than a lot of the things they put on my desk."

And when David Brinkley, interviewing the president, remarked on the crowded schedule and asked whether it had been a long day, Reagan said, "It isn't over yet. I've got to go to the ballet.'

The Reagan White House has been set up so three men - Edwin Meese III, the counselor to the president; James A. Baker III, the chief of staff, and Michael K. Deaver, Baker's deputy - are a triumverate overseeing a variety of subordinate offices.

They are three who have access to the Oval Office without an appointment. And they, more often than not, are the "they" to whom the president most often refers.

Takin'Care Of It All

they were seen at the start NBC program discussing the White House activities of the week, while the president was seen attending one of the meetings that had been set up for him

And they are the first people - and often the last — Reagan sees each day in the Oval Office.

Days after taking office, Reagan made a slip of the tongue that said something about his concept of the presidency. He referred to a Cabinet meeting as a "board meeting." That accidental comment seemed to reflect a view that the president is chairman of the board and his senior staff members are his corporate executives.

The Reagan staff has been particularly sensitive to portray the president as the man in charge and not the actor simply following their directions.

CONSUMER TIPS

Majority of donation

goes to fund raiser

THE MIDLAND REPORTER-TELEGRAM, SUN., FEBRUARY 22, 1981

By LINDA TRUITT Better Business Bureau of the Permian Basin, Inc.

Last Sunday many of you may have seen the CBS 60 Minutes program concerning police promotions. Because the staff at the BBB is constantly monitoring the activities of professional solicitors, including police causes, facts presented in that program need to be repeated.

facts presented in that program need to be repeated. There are various reasons people contribute to solicitations associated with the word "police" or law enforcement." A few feel that they are helping to promote law and order within their community. Most of us want law and order so desperately we will contribute to any cause that will legitimately help reduce crime.

Many people contribute because they are told when contacted by telephone that the money will go to help the widows and orphans of policemen killed on duty, or the money will be used for scholarships. Many times it is implied that certain "favors" will be granted to supporters of the police department.

Whatever the sales pitch, it is usually implied that the caller is a representative of the police department. The fact is, the caller is a salesman working for a professional fund raiser hired by a police union, not the police department.

It is becoming more prevalent for police unions to hire professional solicitors to help them raise money. Usually the fund raisers will contract with a police union or association to put on a variety show and/or to publish a magazine or yearbook. Advertising space is sold to businesses and, if applicable, tickets to the show (which also are sold to the general public).

What is not stated on the telephone is that usually 70 to 90 percent of the donation will' go to the professional hired by the police group. Regardless of what is im plied on the telephone, the vast majority of the money goes to a profit-making organization.

Rental vacancy? Fill it fast with a WANT AD. Dial 682-6222

Of the money that does reach the police union's treasury, the majority will go toward lobbying in the State Legislature. And, contributions are not tax deductible.

Also, tickets are sold for a gospel music festival or country-western show. Many businesses will buy a number of tickets after being told the tickets will be donated to underpriviledged children. Often the tickets are either not delivered or so many are received by an agency designed to help children that they are wasted.

Although Texas do es not have a solicitation control act, the Texas Deceptive Trade Practicies and Consumer Protection Act makes it unlawful for a salesman to cause "confusion or misunderstanding as to the source, sponsorship, approval or certification of goods or services."

If you are approached to purchase advertising or tickets for a policesponsored event and live in Odessa, Jack Tomlin, chief of police, suggests you call him before contributing. Otherwise, call your Better Business Bureau at 563-1880. Bal

purchased at the sale price whenever available, or will sell you a comparable quality item at a comparable reduction in price. Gibson's policy is to give our customers complete satisfaction.

RAVENNA, OHIO (AP) - Ravenna, home of the Oak Rubber Co., prides itself on being a "balloon capital" of sorts. But a balloon of another kind — the town's self image as a quiet community of friendly neighbors - appears ready to burst.

Today, after a week clouded by picketing, arrests of teachers and scuffles at a school board meeting, a strike by 160 members of the Ravenna Education Association went into its 55th day, breaking a record for the longest U.S. teachers' walkout, ac-cording to the National Education Association.

Last spring a strike in Antonio, Colo., lasted 54 school days. Few leaders in this northeastern

Ohio town of 12,000 believe the contempt and divisiveness created by the strike will fade anytime soon.

"The bitterness came from the tactics used in this strike. They just don't fit with the tenor of this community," said Portage County Common Pleas Court Judge Joseph Kainrad.

"This has pitted friend against friend, sometimes inter-family squabbles, and a lot of tension," said Ma yor Paul Jones.

JONES LEADS A community that normally awakens to the rumble of cars carrying workers to nearby rub-ber, auto and steel plants. But a different rumble also has been heard for almost two months, that of teachers walking picket lines at the town's nine schools.

"It's an old established community with about 25 percent of the residents living on fixed incomes. Most others are blue-collar workers. They're confused by all the attention, and there are a lot of rumors and misinformation. There's never been a strike like

this here," Jones said.

The strike has not shut down the schools - most of the system's 3,700 students have attended classes taught by substitutes and non-strikers - but the strikers are clearly pleased they have attracted national attention.

Still, like Kainrad, Jones and ministers of 13 local churches, the teachers are apprehensive about what comes next.

One strike leader, Alan Balog, an economics teacher, claims the Ravenna City School Board wants to destroy the teachers union.

But the six-member school board says it would go broke if it caved in to teachers' demands for base salaries of \$12,000, or \$700 more than is currently paid. The old base salary was \$11,000. When the union rejected the school board's early offer of an \$11,300 base, the board enacted it anyway.

The tension caused by the strike, which began Nov. 12, boiled to the surface last Tuesday at a school board meeting attended by 500 people. The pro-teacher and pro-school board factions shouted at each other during the meeting and afterwards started a shoving match, accompanied by a few punches. Five people were slightly injured.

THE NEXT DAY, Kainrad said teachers and the school board must compromise.

Some people think the court can order people to agree to something. But ... the court cannot force them. It should encourage them and interest them in an agreement," the judge said.

In an effort to diffuse the situation, Kainrad then allowed 17 teachers and a union negotiator to be released on reduced bond after they were jailed four days for obstructing school

driveways. For a time, the teachers' release seemed to pave the way for renewed

talks on the issues in dispute -wages, dismissal policy and contract longevity. Both sides accepted Jones' invitation to meet with him and discuss his proposed three-point plan:

-Teachers go back to work. -The school board agrees not to fire teachers.

-An independent firm audits school funds. A bipartisan commission then suggests either salary increases from current funds or a new tax levy

But at the appointed meeting time Thursday, only the school board showed up. Union representatives said they stayed away because they see no need for an audit. They did, however, propose a direct meeting with the school board to resume talks. No date was set.

A SMALL NUMBER of parents supporting the strikers have taken their children out of schools to teach them at home. Said one, who asked not to be identified, "My husband doesn't agree with me about the strike, but he lets me do what I feel is right."

Under Ohio law the school board could fire the strikers, but "the legal entanglements in firing teachers are enormous and so costly that most boards don't want to go in that direct-ion," said William Martin, spokesman for the Ohio Education Association

After the heated Tuesday night board meeting, school Superintendent James Coll said he would shun pressure by some citizens groups to sack the strikers. He said pastors of Ravenna's churches should have time to help mediate.

"I feel the two sides are really very, very close and that if calm heads prevail, there could be a settlement very soon," said the Rev. George Taylor of the First Congregational Church.

GTE forms fleet of electric trucks

electricity a step beyond communications equipment.

By the end of the month, a fleet of 15 small pickups that run on electricity will cruise GTE service areas cents a mile cheaper to operate than gasolinein the suburb of Irving and at Dallas-Fort Worth Airport.

Five of the trucks already are in use at the airport by maintenance and repair personnel.

"For years, we've been looking for a solution to the energy problem," said GTE fleet service director John Riordan. "In recent years, we've been downsizing our fleet vehicles from vans to small pickups. This is just another step."

Each truck is powered by 20 batteries and has a vehicles," Bales said. range of up to 50 miles, at speeds of up to 50 mph, before recharging is needed.

station, Riordan said.

"We were kind of selective about where we put these trucks," Riordan said. "We put them in Irving and D-FW because those areas only will require them to be run 18 to 22 miles per day.

The trucks will provide maintenance and repair tation for GTE.

DALLAS (AP) - General Telephone Co. has taken service transportation for the northern area of General Telephone Co. of the Southwest; a part of General Telephone & Electronics.

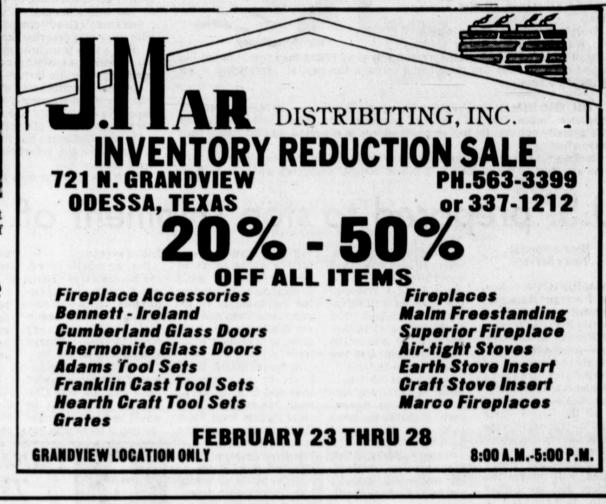

Officials estimate the trucks will be 7 cents to 10 powered vehicles.

The trucks were converted from gasoline-powered vehicles by Jet Industries Inc. of Austin. GTE approached the company in 1979 to do the conversions, said Bill Bales, Jet's vice president for operations.

"This gives them a base for comparing the operating costs of electric vehicles with their regular

The trucks will be operated as part of the electric But GTE plans to run the trucks about 25 miles a and hybrid vehicle demonstration program conductday and recharge them at night - a process that ed by the Energy Department. GTE will maintain takes six to eight hours - at an airport recharging records on the vehicles and provide quarterly reports to the government.

> "By the end of the quarter, we hope to have 170 electric vehicles in use in different areas of the country," said Lowell Newman, director of transpor-

versity's economics department pointed out, When a system fails to deliver, as ours has done, individuals will always come along to fill in the gaps. It is not always a question of black marketeering. Sometimes, it is just a matter of providing the flexibility that the system lacks."

Another of the gap-fillers is Henryk Lubinski not his real name - who carries on a prosperous private business selling foreign replacement parts for Polish-made cars and buses. Strictly speaking, what he does is against the law since, by his own admission, most of the automotive parts and other machinery he deals in finds its way into the country without the usual bureaucratic formalities. In other words, it is smuggled or customs officers are bribed. But that does not keep him from counting official state enterprises and even governmental bodies among his satisfied customers.

Not long ago, I arranged the sale of a large quantity of French-made disc brakes for municipal buses in a big city in southwestern Poland, he confided. "These buses were manufactured under license by the French bus builder, Berliet. But it's the old story. The Polish-built version may look like a Berliet, but most of the components are inferior. For example, the brakes wear out rapidly. Officials in that city wanted better quality material and they weren't too particular how they got it because, in the end, it would mean big savings and a lot less public dissatisfaction over buses that were breaking down or proving dangerous. So they came to me.'

Lubinski is among a surprisingly large group of entrepreneurs who have waxed fat on Poland's marginal, but ever-present free enterprise system. Their success, erected on the debris of official Marxism, has sparked resentment. That, in turn, helped to create the popular mood of rebellion that led to Poland's present crisis. This is especially so be-

'Deep Cut' PAGE 19G Stockman, 'The Budget King', calls himself

By ANN BLACKMAN **Associated Press Writer**

WASHINGTON (AP) - Ronald Reagan tells the story himself: They were back in California, sitting in the president-elect's Pacific Palisades home, choosing Cabinet officers for the new administration. It came time to tap a director for the Office of Management and Budget.

Everyone's first choice for the job was David Stockman, a relatively-unknown, two-term congressman from southwestern Michigan who had helped rehearse Reagan for the crucial presidential debates by playing stand-in for independent John Anderson and President Jimmy Carter

Reagan sat back in his chair and told his inner circle of advisers:

"Everybody knows that I won the debate against Anderson. Most people concede that I won the debate against Jimmy Carter. But what nobody knows is that I lost them both to David Stockman."

Stockman's performance so impressed Reagan that he rewarded him with the job of his dreams some say "schemes" - Budget King, the nation's newest and suddenly pre-eminent financial strategist.

David Stockman, David Stockman.

Everybody who's anybody in political Washington is talking about

Reagan's whiz kid, the intense, prematurely-gray young man whose bullet-like budget cut proposals are ricocheting through the capital, terrorizing some, delighting others.

"YOU SEE HIM IN a meeting and he seems to vibrate with energy," said E. Pendleton James, Reagan's chief of personnel who helped select Stockman. "He actually quivers. He has so much energy in his mind that his whole body shakes.

Stockman, 34, is the youngest person to hold Cabinet rank in 150 years. As architect of the nation's \$739 billion budget, Stockman wants to reshape

America's economic policy. He has declared war on federal regulations, pointed his gun at vast numbers of congressional sacred cows and helped convince Reagan that the prescription to the nation's economic ills lies in sharp tax cuts

Stockman's code name, he jokes, is "Deep Cut." While most of Reagan's other Cabinet officers are still putting their staffs together, Stockman has been shuttling between the White House and Capitol Hill, trying to mobilize support for his dramatc proposals with influential lobbyists and congressional leaders.

"He always does his homework, and he rarely makes errors," said Rep. Carroll A. Campbell Jr., R-S.C.

Yet even Stockman's supporters concede that his style is far from polished, that his workaholic ways show him to be more at ease with statistics than small talk

"He wasn't like the rest of us who get together once in a while for dinner with our families," Campbell continued. "He's not the kind of guy you'd get to know on weekends.

Fred Davis, who was Stockman's congressional press seretary, described his old boss as a shy man who was uncomfortable at kaffee-klatch politics, a politician more interested in policy than politics.

"His existance is to be totally emersed in the issues," Davis said. "Given a choice of reading Penthouse, Esquire, Time, Newsweek or the Oil and Gas Journal, he'd pick the oil journal.'

DAVIS SAID STOCKMAN usually operated on four to five hours sleep. "He usually got to the office by 7 a.m., left for dinner at 8 p.m. and often came back to read until midnight. He's not the kind of guy I'd like to go drinking with." Stockman's steady companion for the last 21/2 years, Jennifer Blei, takes issue

with those who describe Stockman as all work and no play.

"He's a very thoughtful man," said Ms. Blei, 26, a saleswoman for IMB who is as charming as Stockman is intense. "He just loves to work. Pressure exhilirates him. He thrives on it."

Ms. Blei said Stockman also loves fine food and that before he took the OMB job, they dined frequently at Tiberio's, one of the capital's most popular and expensive restaurants. She said Stockman took up tennis a few summers ago -"in the summer we play all the time," — and that they often go hiking.

She says Stockman has little interest in clothes and when she tried to spruce him up with a new velvet blazer and a double breasted tweed suit, he refused to wear them.

His political image may be more important.

Some say Stockman, who grew up on a small, family fruit farm in Scottsdale, Mich., is an impressionable man who sways with the political winds. They cite his high school days of 1964 when, as student government president and captain of the football team, he worked for Barry Goldwater's presidential bid. Four years later, he was a campus radical at Michigan State University where he led a summer-long protest against the Vietnam war.

Some suspect Stockman enrolled as a graduate student at Harvard Divinity School as a way to avoid being sent to Vietnam, that he campaigned for a job as babysitter for the children of then-professor Daniel Patrick Moynihan as a way of ingratiating himself with political insiders.

Whatever the case, he abandoned his studies when congressman John B. Anderson, a friend of Moynihan, offered Stockman a job in Washington.

STOCKMAN WORKED FOR Anderson for eighteen months and then Anderson apoointed him director of the House Republican Conference. Stockman held the job for three years. He quit in 1975 to run for Congress.

Today, Anderson won't talk about Stockman. Aides say because Stockman did not support Anderson's presidential bid, Anderson feels anything he might say about Stockman would be interpreted as sour grapes.

But Bob Walker, who was Anderson's chief domestic advisor during the presidential campaign, says he - Walker - has severe doubts about Stockman's ability to reshape the economy. "He has no formal economic background," Walker said. "There's no question

he's very intelligent, but he lacks common sense. He sees the fine details but not the big picture. If it's a question that can come out of a computer, Stockman can give you an answer. But if you're talking about how the economy really works, you can't put those things into a computer."

Other critics say that Stockman can't see through the maze of computer tape to the real people affected by his budget cut proposals.

"He is the most ambitious person and the most accomplished technocrat ever to be named budget director," said a veteran Washington observer. "But I don't see any degree of humanity in what he does. It's all numbers."

But to Ronald Reagan, Stockman's strategy makes sense.

When the president called Stockman last fall to formally offer him the OMB job, Reagan told the young man: "Ever since the debates, I've been looking for a way to get back at you. I've found it. I'm offering you the toughest job in government

Stockman accepted quickly. Then he gave his girlfriend a huge hug.

David Stockman
