At NASA, they have 'stars in their eyes

SPACE CENTER, Houston (AP) - Columbia and its jubilant astronauts, back from a remarkable maiden voyage, dramatically advanced Ameri-ca's chances of gaining a working foothold in space by 1982 — and someday, said Commander John Young, for "going to the stars." The shuttle, resting comfortably in California, is A-OK.

The astronauts, exuberant after Tuesday's pinpoint landing, are healthy and eager to participate in future space projects. Today they began an exhaustive week of debriefings with space agency technicians.

When Young and Robert Crippen brought Columbia down from orbit to a rock-hard lake bed in California's Mojave Desert, they demonstrated that the United States has a space machine that makes all others obsolete - a machine that can fly into space and return to Earth like an airplane, ready to fly again, a hundred or more times.

The astronauts, in their own way, probably said it best.

"You can't believe what a flying machine this is," Young said. "I think we've got a fantastic and remarkable capability here. We're really not too far - the human race isn't - from going to the stars.'

Said Crippen: "We are really in the space business to stay." America had left manned space flight to the Soviet Union since 1975. Shortly after the wheels-down landing on Rogers Dry Lake, the two astronauts climbed aboard space agency executive jets for the trip back to the Johnson Space Center here.

For the next seven work days they will meet with National Aeronautics and Space Administration specialists, discussing in great detail every one of Columbia's systems to pinpoint any flaws in design or procedure.

They have few problems to analyze. From the moment of its fiery blast-off from launch pad 39A at Cape Canaveral, Fla., on Sunday, Columbia per-

Related stories and photos, Page 9A

formed almost flawlessly. The astronauts had only a few minor problems to tend to.

Columbia was parked today at Edwards Air Force Base, where technicians will carefully check it for the next week or so before it is returned to Cape Canaveral, buckled to the back of a special Boeing 747 jetliner.

Its next flight, a four-day mission, is scheduled for August or September, with rookie astronauts Joe Engle and Richard Truly at the controls.

Officials said initial inspection showed the spaceship to be in very good condition. There were indications a few non-critical thermal tiles. on the top of the vehicle suffered some damage. But the important ones, those that protected the underside from re-entry heat, were in good shape

Ground crew operations were stretched several hours longer than expected when toxic freon gas was detected around the ship. One NASA official the concentrations were small, perhaps from a vented cooling system.

If subsequent test flights are successful, officials may consider accelerating the shuttle program, perhaps cutting the last of three trial runs. That could advance to mid-1982 the date the ship can begin moving routinely into space, ferrying up payloads for military, scientific and commercial missions.

Donald K. Slayton, a former astronaut who heads the shuttle test flight program, said the desert landing at Edwards was so perfect that Columbia may return to Earth at a 15,000-foot runway at Cape Canaveral sooner than expected. The first landing near the launch site now is set for the fifth mission.

Group 'cares' to keep rental subsidies out

By ED TODD **Staff Writer**

Subsidized housing got snubbed and verbally thrown out of the neighborhood here Tuesday night by scores of Midlanders sporting "I CARE" golden yellow tags.

They were expressing fears that a proposed partially rent-subsidized apartment complex in far west Midland would transform their neighborhood into rioting slums and would slash their property values to zero.

They freely applauded when one of their numbers lambasted the opposi-tion's stand. But disapproval by the "I CARE" protesters was by silence no boos.

"I've seen them go straight to ruin," protester Laurence Lee said of tarnished neighborhoods which are bordered by and infiltrated by government-subsidized housing. Lee, who registered fairly high on the applause scale, said he believes in

the people-helping-people concept but only conditionally. "I am for local help," he said, "but I am not for federal-subsidy for any

thing.'

Lee, a retired accountant, was clearly in the majority, which made an en masse appearance in a 21/2-hour hearing before the Midland City Council in a vain effort to elicit official support to kill off the \$3 million project before any ground-breaking begins just off Delmar Street and Illinois Avenue.

THE PROPOSED apartment complex, which would include 40 rent-subsidized apartments out of 86 units, would be built by investors behind the K-Mart department store and would be ready for occupancy in about two years if the builders are intent on bucking the Delmar-area homeowners and get low (about 12 percent) bond money, which can be borrowed tax free:

"I'm not trying to defend subsidies," such as those in agri-

R. Kleindienst indicted

on 14 counts of perjury

Testimony focuses on condition of cancer machine

By SUE FAHLGREN Staff Writer

AUSTIN - In the second day of testimony at the Texas Health Facilities Commission, tempers of both Odessa and Midland hospital officials flared as the fight for the 6 Million **Electron Volt Linear Accelerator** continued.

Dr. Greg Garrett, radiation therapist at MCH, testified at length on why Odessa should be granted a cer-tificate of need for the cancer radiation machine.

Garrett said the hospital's current Teraton 80 cobalt unit is worn out. He discussed breakdowns of the machine and repairs made during the year and four months while he has been a radio-oncologist at MCH.

"We are dealing with an old ma-

chine. The effective mechanical life is approximately 11 years or so," Garrett explained. "I foresee more problems in the future. The linear accelerator offers overall what we are speaking ... to attain the improvement and quality that the 6MEV offers over the cobalt machine." The current cobalt machine has been in use at the hospital since 1971.

FREQUENTLY DURING Tuesday's testimony a comparison was made to automobiles.

Under cross-examination of Garrett, hearing Judge Kevin Reed asked "Right now you own a 1970 Ford. And instead of replacing it with a 1981 Ford, you want to replace it with a 1981 Lincoln, right?"

Garrett countered with "The Clinic 20 (MEV) would be more like a Lincoln. The AECL (Atomic Energy of Canada Limited) 6MEV would be more like a top-of-the-line Ford, compared to the Cobalt 80 which would be like a bottom-of-the-line Ford.

Throughout the rest of the day, the automobile comparison was alluded to under questioning of nine wit-

Reporter-Telegram staff writer Suc Fahlgren is in Austin covering the Texas Health Facilities Commission three-day hearings on the Midland and Odessa cancer treatment applications. This is her third report.

nesses. Joe Webber, attorney for the Odessa hospital, was not amused by the analogy. "I was somewhat taken aback by that analogy, Mr. Hearing Officer.

Reed emphasized he had not made a decision in the case. He was merely trying to elicit a true comparison

accepted the position with Odessa because he said the hospital "would pursue acquiring a linear accelerator. It was mentioned at the time," he said.

GARRETT EXPLAINED that be-

fore arriving at MCH in January 1980,

he had interviewed with Midland Me-

morial Hospital for a position as med-

ical director of the Allison Permian

Basin Cancer Therapy Center. He

Garrett emphasized when he joined MCH he went there not knowing whether or not they would get a

linear accelerator. However, under questioning by Reed, he said if the hospital did not get the machine, his resignation was "a very real possibil-

ity." Fred Davis, attorney representing Midland Memmorial Hospital, also grilled Garrett during his morningong testimony

Davis questioned Garrett about his affiliation with the radiologist group in Odessa. He asked Garrett if he had told Dr. Alvin Lee Schlitemeyer, medical director of the Allison Center, that Schlitemeyer could not practice at Odessa without affiliation with the group

"Isn't the point of this (questioning) that Dr. Schlitemeyer and others could not work at Medical Center Hospital unless they were a member of this group?" Davis asked.

AN ANGRY GARRETT answered. 'May I ask you a guestion?

Davis snapped back, "No, you may answer mine.

Garrett asked rehetorically if Schli temeyer had applied to the hospital for active staff credentials. He then said, "Then how does he know?

"He said you told him," Davis said.

"Then I believe Dr. Schlitemeyer is in error," Garrett said.

In later testimony, Schlitemeyer responded, "It was my impression that there is an agreement with the Odessa Radiologic Group for the exclusive right to provide services at Medical Center Hospital.

Testimony continued with other

'You can't have it both ways,' Hance wants to tell constituents

By CHARLES RICHARDS Associated Press Writer

WASHINGTON (AP) - A year ago, congressmen were getting letters from people who said, "We demand a balanced budget." This year, the letters say, "We demand a tax cut, like President Reagan is calling for." They're the same people who wrote a year ago.

'You want to write them back and ask, "What do you want - a balanced budget or a tax cut? You can't have both," said Rep. Kent Hance, D-Texas.

"There's no way you can have a balanced budget, a major tax cut and increased spending for defense, all at the same time," said Hance, 38, who is playing a major role in the tax cuts legislation being hammered out in the House Ways and Means Committee. Hance is one of 44 House Democrats

who belong to the Conservative Democratic Forum and is head of the organization's tax cut group.

The organization, formed to strengthen the conservative position in Congress, has lined up basically

behind Reagan's budget proposals.

The Republican Party has a majority of the Senate, while the Democratic Party has a 26-member edge in the House. But with 44 members, the CDF has found itself the subject of a lot of interest.

With the Republicans likely to vote together behind Reagan's proposal, the support of the CDF would give Reagan a victory in a situation that has become - to the chagrin of the Democratic Party leadership - to be a battle between the Conservatives and the Liberals rather than the Republicans and the Democrats.

The Democratic leadership has tried, with little success, to persuade the maverick Democrats to stay with the party position.

"I think the key vote of the next two years will be the first budget vote" on the floor of the House, Hance said.

But the support from the conservative Democrats for Reagan holds true only for his call for widespread budget cuts. The president isn't faring as well in his call for extensive tax cuts.

"The thing the general public

doesn't realize is that Reagan's proposal for \$54 billion in tax cuts would result in a \$45 billion deficit for 1982," Hance said.

"I don't know of five votes the president would get (from CDF members) for his tax cuts. I've only had two tell me they would vote for it."

But Hance, head of the CDF's tax cut group, says he also opposes the Democratic tax cut alternative offered by Rep. Dan Rostenkowski, D-Ill., the Ways and Means chairman.

"I'm for something that would create a smaller deficit than the president's bill, with incentives that would encourage people to put their money into savings," Hance said. Hance has introduced a bill that

would provide \$2,000 tax free for an individual and \$4,000 tax free on a joint return on interest earned on savings accounts or dividends.

"I think it's imperative something like that be in there. The economists have all said that for a tax cut not to create inflation it will have to generate more savings," Hance said. "If people just go out and spend their tax return, it'd be highly inflationary."

By LARRY LOPEZ Associated Press Writer

PHOENIX, Ariz. (AP) - Former U.S. Attorney General Richard Kleindienst, who resigned amid the Watergate scandal and later pleaded guilty to testifying falsely to the Senate, has been indicted on 14 counts of perjury, state officials say.

Kleindienst was named Tuesday in an indictment handed down by a Maricopa County grand jury alleging he lied to Arizona Bar Association panels investigating his role in an alleged Teamsters Union pensionmilking scheme.

Kleindienst, who maintained his innocence before the indictments were handed down, reacted to them by saying, "holy mackerel."

"I am not a liar," he said. The three-time state GOP chairman said he had not seen the charges and referred questions to his attorney, George Carlock.

Carlock said the case "will be defended as vigorously as we can." Kleindienst faces arraignment April 22

Phil MacDonnell of the state attorney general's office said pre-trial motions could last six months and the trial itself could last a month or more

"It's a very complex set of transactions," he said. "We'll have to explain it all to the jury."

The indictment capped a six-month investigation that started when Bar Association officials told prosecutors that Kleindienst allegedly lied to their administrative and disciplinary committees during their 1978 and 1980 inquiries.

The bar is recommending that the Arizona Supreme Court suspend Kleindienst from practicing law for one year because of his alleged perjury and unethical conduct during investigations of the alleged milking of \$7 million in Teamster Union health and welfare funds.

The charges stemmed from hearings by the state Insurance Department after the department agreed to settle a suit arising from the alleged fraud, V

Bradley wins again as L.A. mayor

LOS ANGELES (AP) - Despithallenges from 18 people, including a former mayor he had faced twice before. Tom Bradley won a landslide victory in his quest for a third term with the highest percentage of votes ever cast for a Los Angeles mayor.

With 99.2 percent of Tuesday's vote counted, Bradley had 63.6 percent, or 279,501 votes, to former Mayor Sam Yorty's 32.3 percent, or 142,204. Bradley had needed at least 50 percent to avoid what would have been his first runoff.

The previous percentage record was 60.8, set by Norris Poulson in 1957

A bare 4 percent of the vote was scattered among the other candidates, who ranged from a railroad switchman and a woman airline pilot to perennial candidate Eileen Anderson, a singer and dancer.

Yorty tried to win enough support to

force a runoff by portraying Bradley. a former police lieutenant, as a donothing mayor and a foe of the police and fire departments at a time when crime has been skyrocketing.

Bradley, a 63-year-old Democrat and the first black mayor of the nation's third largest city, had been widely favored to win the non-partisan election by at least several percentage points, but the larger-thanexpected margin bodes well for any hopes he may have of seeking the Democratic gubernatorial nomination in 1982.

Bradley has made no announcement on his political plans, but he refused during the campaign to promise that he would serve all four years of a third term. He remained non committal after victory.

"Let me savor this for a few days," he said. "I don't even want to think about of any other possible run, but

some time in the future I will." The possibility of Bradley's arriv-

ing in Sacramento appeared very much on the mind of one of the mayor's longtime political allies. Gov. Edmund G. Brown Jr., who is expected to seek a U.S. Senate seat in 1982

"We want to send a big signal to the rest of the state that Tom Bradley is a very popular candidate," Brown told a jubilant crowd of supporters at the downtown Biltmore.

As expected, 42 percent of all registered voters turned out for the municipal election, which also included races for city attorney and controller eight seats on the city council and three on the board of education.

In 1969, with the memory of the 1966 Watts riots and the 1968 assassination of Robert F. Kennedy still fresh in voters' minds. Mayor Yorty fended off Bradley's first bid for city hall

with'a campaign bristling with anti-Communist speeches and racial innuendo

Buyers check the WANT ADS first for antiques. 582-6222

But in the changed political climate of 1973, Yorty's approach failed and Bradley took office.

Four years later, Bradley faced state Sen. Alan Robbins, a long-time busing opponent.

Yorty, a longtime Democrat who became a Republican last year when he ran in the U.S. Senate primary won by Paul Gann, entered this year's mayoral race at the last minute after police Chief Daryl Gates decided not to pursue a Republican candidacy.

Yorty's low-budget campaign was financed mostly by the Police Protective League and the United Firefighters of Los Angeles. Bradley's coalition of labor, black and Jewish support contributed to a campaign chest that allowed him to outspend

Shooting of policeman brings curfew to town

and a curfew kept Oakdale's residents off the streets after dark as investigators delved today into a confrontation between about 100 angry blacks and police that left two black men and one white policeman wounded.

"We've been in contact with the black community and they want peace, just as I do," said Sheriff Claiborne Durio of Allen Parish, a remote, sparsely populated area of rural southwestern Louisiana.

Durio, who reported all was quiet Tuesday night, said he didn't believe Monday night's violence was racially motivated.

'Certainly, blacks and whites were involved, but I think my colleagues feel the same way I do," he said.

The shootings came just a few hours after teachers broke up a fight between some black and white students at Oakdale High School.

closed both the high school and Oakdale Junior High for the rest of the week. Mayor George Mowad imposed an 8 p.m. to 6 a.m. curfew that he said would

stomach.

Henry Green, 29, underwent surgery at Charity Hospital in New Orleans. He was in stable but guarded condition with buckshot wounds in the face, neck and hands.

Carlos Jackson, 20, was released from a hospital after being treated for a superficial gunshot wound in his left arm

Durio said he had no doubts that the Monday night violence was somehow related to the high school fighting and an intrusion by young whites into black neighborhoods last Saturday night. He said the whites fired some shots in the air and shouted insults, but no one was hurt in that incident. He would not say who did the shooting Monday.

Right at this point, no arrests have been made, said Durio. "We're trying to find out who was involved.

OAKDALE, La. (AP) - Schools were shuttered Tuesday with gunshot wounds in the chest and questioned and then released "because they didn't want to say anything."

Durio said someone blasted away at McCullough when the he tried to break up the mob at an abandoned service station in a black neighborhood on the south side of this community of about 10,000. Durio said the crowd disbursed when more than two dozen riot-equipped state police were rushed in from Lake Charles and other surrounding communi-

DEATHS Laura A. Lange

EXETER, Calif. - Services for Laura A. Lange, 102, of Exeter, Calif., mother of Dan Lange of Midland, were held here March 30. Burial was in Exeter Cemetery under the direction of Evans Miller Exeter Chapel.

She died March 27 in a Visalia, Calif., hospital.

She was born in Lange Mill and was married to Julius B. Lange in Fredericksburg in 1897. He died in 1948. She moved to Lakeport, Calif., in-1972 and to Exeter in 1976. She was a member of the Exeter Church of Christ.

Other survivors include a son, three daughters, a brother, 19 grandchildren, 24 great-grandchildren and six great-great-grandchildren.

Mrs. Mayberry

Services for Mrs. Dallas Mayberry, 72, of 2601 Terrace Ave., were to be at 2 p.m. today in the Newnie W. Ellis Funeral Home chapel. Burial was in Evergreen Cemetery in Stanton.

Mrs. Mayberry died Tuesday in a Midland hospital following a brief illness

She was born Oct. 12, 1908, in Colgate, Okla. She grew up in Seminole and Oklahoma City, Okla., moving to Midland in 1964 from Oklahoma City. She was a member of the Methodist Church.

Survivors include a daughter, Mrs. Phyllis Speight of Midland, and five grandchildren.

Mark E. Benton

Mark E. Benton, 17, of Route 1 Box 155, died Sunday from injuries received in a one-car accident 12.6 miles east of Midland.

Services were Tuesday at Greenwood Baptist Church with the Rev. Ralph Caffey officiating. Burial was in Resthaven North Cemetery.

Pallbearers were Todd Brooks, Larry Dickerson, Richard Morris, Phillip Higgins, Danny Williams, Gary Rogers, Donald Smith and Gary Don Ratliff.

Honorary pallbearers were Rex Evans, Mickey Sommers, Tommy Pyle, Oscar Lopez, Kevin Duke, Tito Boyce, Kit Fochee, Homer Lopez, Lance Cox, Roy McCullough, Perry Phillips and J. Bradley.

M. Whitmire

Services for Marshall Whitmire, 54, 2824 W. Shandon Ave., were Tuesday in Memorial Christian Church with Clark Ford officiating. Burial was in Resthaven Memorial Park directed by Newnie W. Ellis Funeral Home.

Whitmire died Sunday in Medical Center Hospital in Odessa.

Pailbearers were E.L. Shepherd, Keith Ward, Ike Fitzgerald, Tommy Miller, Bob Drummond and J.E. Bar rington

Honorary pallbearers were members of the Westside Lions Club.

Bertie Boone

Graveside services were Tuesday in Resthaven Memorial Park with the Rev. Robert Neumann officiating. Newnie W. Ellis Funeral Home was in charge of arrangements.

Pallbearers were Ed Darnell, Winston Elkin, Woody Hieddburg, George Corey, John George Byrne and Dr. Jack Walton.

Felipe Vargas

LAMESA - Services for Felipe "Phillip" Vargas, 28, of Odessa and formerly of Lamesa, were Saturday at St. Margaret Mary's Catholic Church here with the Rev. Pat Hoffman, pastor, officiating. Burial was in Lamesa Cemetery under the direction of Branon Funeral Home.

Vargas died Thursday in Odessa at his home

He graduated from Lamesa High School in 1971 and was a U.S. Navy veteran. He was employed as a meatcutter at Albertson's in Odessa.

Survivors include his wife, Nellie Vargas of Odessa; his parents, Mr. and Mrs. Manuel Vargas of Lamesa; his grandmother of Beeville; five sisters, Rosa Martinez of Alvarado, Lydia Alvarado of Sweetwater, and Andrea Medina, Yolanda Flores and Anita Carrion, all of Lamesa; and three brothers, Raymond Vargas of Lamesa, Martin Vargas of Weather ford and Ruben Vargas of Midland.

THE MIDLAND REPORTER-TELEGRAM, WED., APRIL 15, 1981 Hundreds honor Bradley

By STEVE BREWER Associated Press Writer

EL PASO, Texas (AP) - Hundreds of mourners braved damp, blustery winds to pay homage to "the soldier's general;" Omar N. Bradley, at a me-morial service at Fort Bliss, the fivestar general's home since 1977.

Bradley, who died April 8 in New York at the age of 88, was eulogized Tuesday as a "great protector of freedom," a "legend," and one of the "greats" during the service that drew a crowd of 500 to the El Paso Army base.

The services at Fort Bliss coincided with funeral services in Washington, D.C., where Bradley was buried in Arlington National Cemetery on a hillside overlooking the Pentagon.

From a bandstand wreathed by dozens of floral arrangements, Brig. Gen. Archie Cannon proclaimed the late World War II hero as "the soldier's general," and recalled stories reflecting Bradley's modesty and soft-spoken manner.

"Some of the stories may have been twisted in repeated telling, but seen as a group, they represent a man with a great heart and compassionate spirit." Cannon said.

One of those legends concerned the D-Day invasion of Normandy. Ac-

cording to the story, Bradley spotted a drenched, shivering soldier on the beach. Bradley took off his own field jacket and gave it to the young man. "Here son," he is said to have remarked, "I can get another one of these. You can't.'

"He was firm, to the point of rigidity; modest, almost to the edge of humility, he was a reassuring symbol of placid confidence in those sorely troubled days," Cannon said.

"Beneath that calm exterior there was a passionate wish, an almost pious hope, that the young men of our nation will someday enjoy peace the dream shared by all military men

Post Chaplain George V. Reswick said Bradley was a man who had joined the ranks of other great leaders in history.

"Death has conquered the greats," Reswick said. "Alexander, Caesar, Napolean, Washington, Roosevelt, Churchill, and now, Gen. Omar Bradlev.'

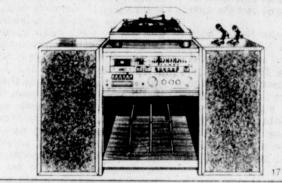

The services opened with a 19-gun salute and a fly-over by two jet fight-

Brisk winds whipped flags held by a color guard, while an organist played "A Mighty Fortress Is Our God," and "The Battle Hymn of the Republic.

Musters this year will range from Manama, Bahrain; Tokyo; Jakar-ta, Indonesia: Honduras

Start average billing before you start your air conditioner

If you use the same amount of electricity this summer Las you did last year, you're going to see a big increase in your summer bills.

Our Average Billing Plan can help, because it "averages out" your electric bills. You still pay for all the electricity you use, and your payments will still vary from month to month. But in high-use months you pay for less electricity than you use, and in low-use months you pay for more than you use.

Many customers find this helps ease the impact of high summer air conditioning bills. Our average billing

plan is available to both residential customers and churches. If you'd like to know more, give us a call at Texas Electric.

Proposals for laws against crime unlikely to pass

By WALTER R. MEARS

AP Special Correspondent WASHINGTON (AP) — The attempted assassination of President Reagan has produced a catalogue of congressional proposals for new laws to deal with violent crime in Ameri-

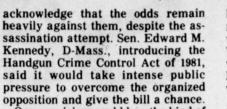

They range from familiar legislation like handgun control to new measures like televising punishment imposed on criminals.

And it is a pretty good bet that none of them will pass. That's the usual outcome

Actually, Congress did respond to the shooting that wounded Reagan and three other men on March 30. It praised the bodyguards and the aide who were hit.

The Senate and the House both commended Secret Service Agent Timothy J. McCarthy and District of Columbia policeman Thomas K. Delahanty "for their unselfish courage and patriotism." The Senate adopted another resolution honoring White House press secretary James S. Brady and expressing "the desire of the Senate for his speedy recovery." Those ceremonial gestures are it

for now Even the advocates of gun control

One provision would ban the kind of cheap handgun that was used in the Reagan shooting. "It is unacceptable that there are states today ... where

AP Analysis

the accused attacker of President Reagan could buy another Saturday Night Special," Kennedy said.

'We who propose a national handgun policy have been accused of knee-jerk response whenever a shooting tragedy or near-tragedy occurs,' said Rep. Peter Rodino, D-N.J., introducing the same bill in the House. "If that is true, I would suggest that the response of the opponents to these proposals has seemed the same."

The response is that gun control laws are not the right answer. The opponents say that episodes such as the Reagan shooting do not change that. Their argument has prevailed

before, when Gerald R. Ford was menaced twice by women with guns, when the campaigning George C. Wallace was crippled by a gunman, when Robert F. Kennedy, Martin Luther King Jr. and John F. Kennedy were assassinated.

There's no evidence to indicate that the outcome of the gun-control debate will be different this time. But there is an ample supply of alternative pro-posals. Among them:

-Sen. Strom Thurmond, R-S.C., has introduced bills to reinstate the death penalty in the District of Columbia, and to make it a federal crime to kill, kidnap or assault a Cabinet officer.

-Rep. Bill Young, R-Fla., would

Historic hotel sold

SAN ANTONIO, Texas (AP) - The stately St. Anthony Hotel, the first hotel in the world to be air conditioned, has been sold to an international hotel chain.

Inter-Continental Hotels, which owns 80 properties throughout the world, officially became the hotel's owner at midnight Tuesday, former owner William Ochse announced.

make it a federal offense to assault any law enforcement officer or fire-fighter during performance of his duties.

-Rep. James L. Nelligan, R-Pa., has proposed a bill to permit capital punishment for an attempt on the life of a president. "The unsuccessful assassin can lay little claim to mercy because his aim was not true," Nelligan said.

-Sen. Howell Heflin, D-Ala., is sponsoring the National War on Violent Crime Act, to include law en-forcement training and aid, create a new federal agency to oversee the effort, and provide for television and radio broadcast of the identities of wanted criminals.

-Rep. Mary Rose Oakar, D-Ohio, said Congress should set up a Nation-al Commission on Violent Crime. The

Events to mark Boys Club Week

The Midland Boys' Club will mark National Boys Club Week, April 19-25, with a series of special events beginning Monday.

1981 marks Boys' Clubs of America's Diamond Jubilee, commemorating the 75th anniversary of 53 independent Boys Club joining to form the national organization in 1906.

"Boys' Club Week and every week, the Midland Boys' Club and a thousand others across the country give youngsters the chance to connect with opportunities for personal growth through a variety of educational, vocational, recreational and guidance programs adapted to their interests and needs," said Nick Sanchez, executive director of the Midland Boys' Club.

The special activites begin Monday with a pool tournament for boys and girls (four divisions) beginnning at 3: 30 p.m. Other activities include a volleyball tournament, an arts and crafts show, a pee-wee softball game, a disco dance and roller skating.

For more information, contact the Boys' Club at 683-5297.

Justice Department already has a task force on violent crime, created shortly after the new administration took office.

Those are samples; there are many more

But the basic argument remains that between the advocates and opponents of controlling handguns by federal law. It is the debate that will continue when the rhetoric subsides.

Bill gets tentative OK

Austin Bureau

AUSTIN - The House of Representatives Thursday gave tentative approval to a bill by Midland Sen. W.E. proval to a bill by Midland Sen. W.E. "Pete" Snelson that would set up separate job category and pay grades for occupational and physical thera-pists in special education programs in the public school system. The bill, which was sponsored in the House by Carrollton Rep. Bill Slan-ton, sets up a salary range for occu-

ton, sets up a salary range for occupational and physical therapists from \$10,380 to \$19,280

The bill will still be passed on third reading.

Shuttle successfully launches new era in U.S. space travel

By ROBERT LOCKE AP Science Writer

EDWARDS AIR FORCE BASE, Calif. (AP) — The era of the space shuttle has begun.

Tuesday's near-perfect landing after a "100 percent successful flight" by the Columbia is testimony to the potential of the boxy, stubby-winged, spacegoing freighter, says Donald K. Slayton, shuttle flight test manager and a former astronaut himself.

It will, he said, become the workhorse of an era in which Americans will not only explore but exploit the unique properties of space for industrial, scientific and military gain that were impossible without low-cost round trips.

The shuttle's 60-foot cargo bay can'ferry up to 65,000 pounds of instruments and components that could be orbited as high-flying laboratories or factories to produce superior metal alloys, pharmaceuticals and other products that benefit from the weightlessness beyond Earth's gravity.

The military foresees a low-cost way to place ever-larger reconnaissance, navigation and communications satellites in orbit, and talks of space-borne weapons such as satellite killers and anti-missile laser beams.

In addition, the spacecraft has re-established America as a space-going nation. For nearly six years, the high frontier was the exclusive domain of Soviet cosmonauts.

Slayton, test manager at the Johnson Space Center in Houston, said at a post-landing news briefing here the historic voyage encountered no major problems and only a few minor aggravations. He said the ship seems in good shape after its 54½-hour journey.

"We've developed a transportation system that's going...to carry us out through the next 20 years," he said.

The Columbia, meanwhile, was already being reconditioned for its next flight: a leisurely two-day trip to Florida on the back of a specially equipped Boeing 747 jumbo jet.

Parked alongside the dry lake bed landing strip at NASA's Dryden Flight Research Center, the ship had its fuel lines cleansed, its surface examined. Other preparations also were being made for the piggy-back ride, expected in about six days.

At Florida's Kennedy Space Center, the Columbia will be checked and re-outfitted for yet another test flight this fall. That one, with astronauts Joe Engle and Richard Truly aboard, is to last four days.

"The schedule is optimistic," Slayton said, "but we hope to turn it around (and be ready to go) in the next six months."

And while the nation was celebrating, the sister ships for the world's first space fleet were taking shape in a desert hanger at nearby Palmdale. The Challenger so far is just wings and part of a fuselage. Construction of the Discovery and the Atlantis should begin in a year or so, said contractor Rockwell International.

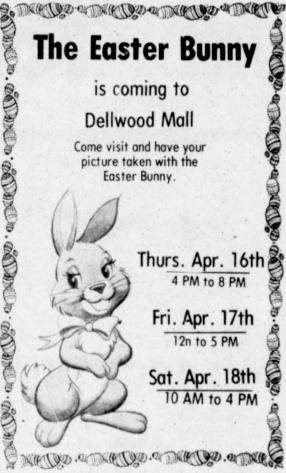

Each of them is to make 100 or more round trips into space.

"We're back in the space business to stay," said Columbia astronaut Robert Crippen.

And business, along with science and defense, is what the shuttle is all about. Though the reception has been lukewarm so far, NASA is offering shuttle flights to industry for \$35 million each and small caristers called Getaway Specials aboard shuttles for as little as \$3,000.

Slayton said the first of the cut-rate specials may fly on the third or fourth test flight.

John Young, who flew the Columbia — the biggest craft ever sent into orbit and the first one with wings — told mission control at the landing, "You can't believe what kind of flying machine this is. It is really something special.."

The space shuttle Columbia lands safetly at Edwards Air Force Base, Calif., Tuesday, successfully ending a 54½ hour mission and the maiden space flight of the nation's first reusable space vehicle.

What went right? The shuttle flight

By HARRY F. ROSENTHAL Associated Press Writer

CAPE CANAVERAL, Fla. (AP) — They were hoping for just two things here when they launched the space shuttle. Getting up and getting down.

Everything else was, well, out of this world.

All that mattered was to prove that this ungainly thing, this stub-winged Batmobile clinging to the back of a blimp-like tank, could be rocketed to the heavens like Apollo and brought down like TWA Flight 531 from Kansas City.

Space Shuttle Columbia had more than its share of growing pains and doubters. It grew to flight status ignored by the public, shortchanged by Congress and jinxed by technology.

Its engines blew up on the test stand; its protective tiles blew off as it was ferried from California to the Kennedy Space Center; its development fell two years and billions of dollars behind.

Reagan praises astronauts for ushering in 'a new era'

WASHINGTON (AP) — President Reagan says the successful flight of the space shuttle Columbia opened a new era in space travel, putting "new worlds within closer reach and more knowledge withour our grasp."

In a written statement after shuttle pilots John W. Young and Robert L. Crippen made a bullseye landing on a dry lake bed in California, Reagan said:

"Your brave adventure has opened a new era in space travel. You put new worlds within closer reach and more knowledge within our grasp.

"We thank God for your safe return.

"You were right. Captain Crippen, when you said the Columbia and her voyage would mean much to this country and to the world. Today the world watched us in triumph. Today our friends and adversaries are reminded that we are a free people capable of great deeds.

Even at \$10 billion, the shuttle was a bargain basement spacecraft. The National Aeronautics and Space Administration had to scrap plans to design a ship able to go into space under its own power and to come back like the Columbia did on Tuesday.

But who remembered all that after the ship rolled to a stop, the American flag prominent on its left side?

"We consider it 100 percent successful," said Donald K. Slayton one of the top shuttle program officials. "It went exactly

as predicted all the way through." Besides going and coming safely, what else went right?

A lot of people at emergency landing sites had nothing to do. The ejection seats, the slide wire, and the range destruct system were just as idle.

The solid rocket boosters, old standbys in space flight but never on a manned spacecraft, did their share in lifting the shuttle and did not turn it into an out-of-control cartwheel. They dropped off where they were expected to and did not sink. They were easily recovered to lift yet another and another after that. The shuttle's main engines didn't melt.

The cargo doors opened and closed. They did not warp in the 500-degree swing of temperatures. Their locks worked, and the Columbia did not have to return early.

Almost all of those worrisome tiles stayed on. So did the wings. The ship did not burn up in the atmosphere, and it did not spiral to a crash landing in the Pacific.

Rogers Dry Lake, the landing site, stayed dry.

And the cmputers which stopped the launch last Friday because they weren't talking to each other were practically holding hands the entire time.

The favorite word on this flight, from Shuttle Control to astronauts, was "beautiful" and "super."

"Nominal" was popular too. Everything was nominal — all right, fine, within the limits, working the way it should.

"You can't believe what a flying machine this is!" Young exulted. "It's really something special."

Engineers will spend months looking at data to find what went wrong. t

It was easy to tell what went right. The flight.

Americans, others cheer Columbia's safe landing By The Associated Press

From the stuffed couches of VIP lounges to American bars, from campers at a desert airbase to European capitals, whoops and cheers went up to herald the flawless landing of the first reusable rocketship.

"We are back in space...and proud of it," said Secretary of the Air Force Verne Orr.-

About 170,000 people in recreational vehicles and mobile homes congregated in a remote area near the desert landing strip to wait for the shuttle's return after two days in space. Millions more in the United States and abroad watched on television.

"It just makes you proud to be an American, that's all," said Warren Steinbach of Lake Los Angeles, Calif.

VIPs invited by the National Aeronautics and Space Administration were closer to the landing site than the campers.

"Come On, Come On" one person shouted from the VIP area, which was engulfed in whoops when the space shuttle finally came to a stop Tuesday. Celebrities on hand included actors Roy Rogers and Leonard Nimoy and former astronauts Scott Carpenter and Rusty Schweickart.

After the shuttle came to a stop, George Page, director at Kennedy Space Center in Florida, stood outside to bask in the congratulations of his co-workers.

"Over-all, one word describes it — fantastic!" Page said. "For a first-time in the mission, words are hard to come by to describe it."

PAGE 9A

Young, Crippen back in Texas for debriefing

SPACE CENTER, Houston (AP) — Astronauts John Young and Robert Crippen, awed by the success of their historic space adventure, were back in Texas today for several days of intense debriefing.

Young told a rousing, flag-waving crowd waiting to greet the astronauts at nearby Ellington Air Force Base Tuesday evening that the 54½-hour voyage and unprecedented landing by the Space Shuttle Columbia was "something just short of a miracle."

"Robert and I spent the most exciting 2½ days probably that we ever spent in our lives or ever will spend again," said the flight commander, wearing a blue flight suit and standing on a platform decked with red, white and blue banners.

About 1,500 onlookers whistled, clapped and let loose with yelps of glee. "It's always great to be back in Houston," said Young-with a wide grin.

He and shuttle pilot Crippen flew into Ellington just before nightfall, barely six hours after the pinpoint landing of their 80-ton spaceship in a California desert.

"The spaceship Columbia is phenomenal. It is an incredibly amazing piece of machinery," said Young. "Anytime you can take something that big and put it into space and bring it back and land it, you have accomplished something just short of a miracle.

"I think the American public is going to get their money's worth out of this baby," he said. "It will allow us to do in the '80s and '90s things we must do for defense and to advance science and technology. We've got the capability right now, and so I say let's just press on and do it."

Young, 50, a veteran of four previous trips into space and one of the handful of men to walk on the moon, suggested there might have been some perilous moments during the maiden voyage that perhaps went unnoticed in an almost flawless mission.

b

91

10

7(

"There were some moments up there where we had some very exciting...and complex tasks, and Robert did all those things...ignoring some potential personal risk," Young said without elaborating.

He said Crippen, 43, who was making his first space trip, "is a very smart man" who "kept me out of a lot of trouble on that flight."

As he spoke, Crippen stood behind Young grinning and shaking his head from side to side as his boss in space praised him.

"For me it was the darndest time I've ever had in my entire life," Crippen said. "I was just hanging on hoping he would point me in the right direction. I want to go back as soon as I can."

The astronauts and their wives were greeted here by a group of dignitaries including presidential adviser James Baker, who read a message from the president congratulating the spacemen on "your brilliant adventure."

"Today, both our friends and our adversaries are reminded that we are a free people, capable of great deeds," Reagan's message said.

The homecoming site was just a short hop from the sprawling Johnson Space Center, where the normally stoic men of Mission Control stood as one to cheer the shuttle's dramatic and safe return.

Astronauts John Young, left, and Bob Crippen smile as they recall their historic space shuttle flight.

Lawyer puzzled with cause of couple's self destruction

They had potential for everything and lost it all

CAMBRIDGE, Ill. (AP) — They disappeared sometime after daybreak, leaving a stack of love letters and their last chance behind them.

He was a doctor, a one-time honor student and Air Force flight surgeon with impeccable credentials. She once taught Sunday school.

Roger and Sharon Ihrig were young, bright and full of promise. And they were on the run, again.

"The technical term is folie a deux, a French phrase that means 'madness of two'," said psychologist Rip O'Keefe, director of the drug rehabilitation retreat the Ihrigs fled March 18. "You have two people who individually are marginal at best and who together bring out the worst in each other."

The Ihrigs' road to self-destruction

的复数的复数 化化学学 化化学学 化化学学 化化学学

began about 1979 — failed marriages, failed jobs, alcohol, drugs and finally "a string of motel rooms with bloody sheets and used syringes left behind," police said.

The road led to Galva, a little farm town where, last November, police arrested Sharon in a dime store for shoplifting some chocolate bars and a black blouse. In the car, police discovered a rainbow of capsules and bottles of prescription drugs, including injectable Valium.

When Roger learned his wife had been arrested, he filled 'a disposable syringe with Banadryl, stuck the needle in his arm and walked to the police station. "He was dressed in a sports coat, white shirt and tie that looked like they had been slept in for days," according to a police report. When he slipped off his jacket, everyone in the station saw that Dr. Roger Ihrig's right shirtsleeve was soaked with fresh, bright red arterial blood.

"I look at all the potential he had," said his lawyer, Dale Haake of Rock Island. "In med school and in the Air Force, he was living up to all the talents that he had and the result was quite remarkable. Somewhere, something happened."

Exactly what happened is not clear. But from police and military records and reports from officials and former colleagues there emerges a picture of an attractive, gifted young man who had everything, and lost it all.

Ihrig was born 31 years ago, the son of a wheat farmer in Goodland, Kan., where the earth lies as flat as a billiard table. He was an honor student through high school and college, earning his medical degree from Kansas University in 1974 and served his internship in the Air Force at Alamogordo, N.M.

"I've seen his Air Force records, 120 pages," Haake said. "He was on various safety boards, he stepped into responsible positions that in the past had three or four physicians, and he would do the job all by himself. And at the same time he would improve efficiency, improve patient relations and get nothing but outstanding comments."

Six feet tall, with sandy-colored hair, he jogged for health and read mysteries for fun. He joined the Elks and the Masons.

But about 1979, it all began to fall

apart. His seven-year marriage soured and by Christmas, his occasional injection of Benadryls, an antihistamine with sedative side effects, on sleepless nights had become a twice-a-day habit, police say he told them.

He tried to start a private pratice. He failed. He went to San Diego and joined the Navy. He was divorced. His wife got custody of their two sons. Shortly after that, he married Sharon Espinosa, 22, twice-married and someone who "gives me strength," he told police.

When he injected Benadryl, she injected Valium or a hypnotic pain killer, Stadol. They loved each other, fed off each other and were destroying each other.

"This is a very tragic situation

where a couple of clearly dependent sick people are using each other to stay ill," O'Keefe said. Ihrig ended his Navy career with five weeks at a military drug treatment center in-Long Beach, Calif.

After his discharge last August, he and Sharon searched for a practice. In Vaughn, N.M., a bank refused a loan. In Hoisington, Kan., he closed his office after one week. In Flagstaff, Ariz., police found blood-stained pillows and used syringes scattered about a motel room, blood smeared on the television screen.

The year before, Ihrig had made a good impression on visits to clinics in Illinois. But nobody wanted to hire him now.

Activities planned Barrining resumes with 19th day for RRC District 8

Wildcats and completions have been announced in Railroad Commission District 8.

PECOS WILDCAT:

Florida Exploration Co. of Midland has contracted to drill a 3,100 foot wildcat seven miles southeast of Fort Stockton.

The No. 1 Crawford "21" is located ,980 feet from the south and 660 feet from the east lines of section 21, block 131 of T&STL survey.

It is situated 2 1/2 miles west of 2,686 foot Queen gas production in Fort Stockton, South field.

C.F. Lawrence & Associates Inc. of Midland will drill a 1,200 foot location 14 miles west of Griffin in the Lehn Apco (Seven Rivers) field.

The No. 4 Cardova "F" is located 467 feet from the northeast and west lines of section 6, block 110 of TC&RR Co. survey

The location is one miles east of No. 1-N Wellaw, Crockett dry and abandoned project with a total depth of 1.610 feet.

HOWARD COMPLETION:

Amoco Production Co. of Odessa has potentialed a 8,962 foot Wolfcamp gas discovery in the Coahoma, North (Fusselman) field three miles southeast of Coahoma.

The No. 114 Texas Land & Mortgage 'A" R/A "B" of section 5, block 30 of T-1-S, T&P survey.

Perforations were made from 7,300-7.318 feet. The calculted absolute flow is 517,000 cubic feet of gas per day through a 21/64 inch choke. Flowing tube pressure was 223 psi. A 5 1/2 inch casing was set at 8,995 feet.

HOWARD WILDCAT:

Texaco Inc. of Midland has scheduled to drill a 8,835 foot wildcat seven miles south of Coahoma.

The No. 2 Dora Roberts Estate "C" is located 1,900 feet from the south and 938 feet from the east lines of section 69, block 29 of W&NW RR Co. survey

The location is 5,300 feet southwest of No. 1 Roalse, a drilled and abandoned location, drilled to 2,956 feet and abandoned on June 10, 1951. It is also 6.800 feet northwest of No. 1 Anderson & Pritcherd (Scott), another drilled and abandoned location. drilled to 3,032 feet and abandoned on October 12, 1938. Both these wells were dirlled by Mobil.

MITCHELL WILDCAT:

Rust Operating Co. of Fort Worth has contracted to drill a 7,600 foot probe six miles south of Colorado City.

The No. 1 Charles Williams is located 467 feet from the north line and 2,600 feet from the west lines of section 88, block 26 of T&P RR Co. survey

The location is 2,500 feet northwest

The location is one mile northwest of No. 1 Camp Wadley, a drilled and abandoned location drilled to 6,285 feet and abandoned on June 3, 1961 and 7,500 feet northwest of another drilled and abandoned location, No. 1 Camp Sparks with the ground-level elevation of 2,638 feet and the total depth of 5,143 feet. It was abandoned on June 3, 1961.

WARD WILDCATS:

Davis Oil Co. of Houston has staked a 7,000 foot wildcat location four miles northwest of Pyote.

It is located 1,980 feet from the south and east lines of section 17, block 17 of the University Lands Survey

The location is next to No. 1 Pan American (Delaware) discovery plugged on May 27, 1970. It is also one mile northwest of No. 1 Ohio with the ground level elevation of 2,669 feet and the total depth of 5,018 feet, a drilled and abandoned location on December 20, 1956.

There are two other drilled and abandoned locations in the vicinity. The No. 1 "17-K" University, drilled to 7,800 feet and abandoned on November 25, 1956 and No. 1 "17K" University JA. Both were drilled by Shell Oil Co. *****

Gulf Oil Co. of Monahans has plans to drill a 9,600 foot probe 1 1/2 miles northeast of Wickett.

The No. 1129 Hutchings Stock Association is located 1,880 feet from the north and 1,980 feet from the west lines of section 1, block F of G&MMB&A survey.

The location is 800 feet northwest of a drilled and abandoned location drilled to 3,325 feet. It is surrounded by depleted oil productions and completed oil productions in the Wickett field.

MARTIN OFFSET:

R.K. Petroleum Corp. of Midland will drill a second 11,200 foot well 2,000 feet southeast of an opener and lone producer No. 1 Phillips Gutherie, a fusselman discovery.

The No. 2 Phillips Gutherie is located 1,980 feet from the north and west lines of section 3, block 34 of T-2-N, T&P RR Co. survey two miles east of Knott.

The location is 1 1/2 miles northeast of No. 1 Baxter, a plugged and abandoned location and 1 3/4 miles south west of No. 1 Adams (Strawn) discovery, plugged and abandoned on Noyember 4, 1974.

ies that do not belong to the association but are covered by any national

coal contract.

miners.

sold.

food stamps, union and industry representatives are returning to the bargaining table in search of a contract settlement palatable to both

Negotiators for the United Mine Workers and Bituminous Coal Operators' Association were returning today to the same Washington hotel where two weeks ago they proudly announced agreement on a three-year contract. It was too late, however, to prevent a sixth consecutive UMW strike against the soft-coal industry.

Union president Sam Church and his top aides took the earlier accord to the coalfields, stumping confidently for its ratification in hopes of making the strike a short one. But the miners, by a better than a 2-to-1 margin, voted it down March 31.

Today's talks were the first since the contract was voted down, and chances for a quick settlement on a new proposal were uncertain as the strike in the coalfields of Appalchia and the Midwest entered its 19th day

Church and his negotiators will be trying to improve on a contract that the UMW president had praised - one which included a 36 percent increase in wages and benefits over the next three years, a first-time dental plan and new company contributions to the miners' pension plans

The BCOA, bargaining agent for some 130 member coal companies, has refused to speculate on contract changes that might emerge from the new talks

The BCOA negotiates simultaneously for some 980 small coal compan-

Tax collections being threatened

WASHINGTON (AP) - Some collections of the so-called windfall profits tax on crude oil may be in danger of going - if not gone - with the wind, a House subcommittee has been told.

Among those who have not settled their tax bill: the U.S. Geological Survey

ENERGY OIL & GAS

William J. Anderson, director of the general government division of the General Accounting Office, told the

House Government Operations subcommittee on monetary affairs Monday that the Internal Revenue Service had done only "a fair job" and still "clearly faces extraordinary problems.

The IRS, he said, has no single person responsible for ensuring that specific tasks are carried out and that 'an effectively coordinated compliance strategy" is developed for the tax.

As for the Geological Survey, which is part of the Interior Department, problems previously pinpointed by the GAO in collecting royalties on \$7.4 billion worth of oil produced on government land last year "have been compounded by an increasing workload including the added administrative burden associated with the windfall profit tax." said Anderson.

Irion, Tom Green plan three wildcats

Stanley Reber

Reber to be guest speaker at banquet

The Petroleum Accountants Society of Permian Basin will hold the Annual Bankers & Bosses night Wednesday at the Ranchland Hills Country Club.

The speaker will be Dr. Stanley R Reber.He is the senior Vice President for Funds Management and member of the Management and Investment Committees of the Fort Worth National Bank. He is also the Vice-President and Economist at Texas American Bancshares Inc.

His professional activites include faculty positions at SMU's Southwestern Graduate School of Banking where he teaches economics, asset and liability management; and he is a member of the American Bankers Association.

He holds a B.S. degree from the University of Pennsylvania and a Ph.D. n Economics from the University of Chicago.

The social hour begins at 6 p.m., dinner at 7 p.m. and the program at 8 p.m. For further information call H.S. Burney at 682-9715.

DETROIT (AP) - Offshore and frontier areas, especially Alaska, must be explored more if the United States is to halt the decline in domestic oil and natural gas production, the president of Shell Oil Co. said Monday.

"The problem is gaining prompt access to public lands held by the government," John F. Bookout told the Economic Club of Detroit.

In his speech, Bookout also called for increasing today's \$80 billion capital outlay for energy by about 5 percent annually during the 1980s.

Bookout said that U.S. production of oil and natural gas currently is 18.5 million barrels a day. But that despite efforts to find new sources of energy, production could fall by 15 percent by 1990.

Shell Oil president lists

major energy priorities

The president of the Houston-based oil company said that coal must be the "backbone for expanded domestic energy supply." But the problem, according to Bookout, is finding a method of burning coal cleanly.

He said the goal for coal must be to increase annual consumption from 700 million tons to 1.05 billion tons.

Bookout also cited a need to resolving "the uncertainty that clouds" the future of nuclear power in the United States. The alternative by 1990, he said, is "a couple of million barrels a day more oil imports."

Alternative forms of energy, such as synfuels and solar and wind power, are still in their infancy and are "some time off.

BUSINESS MIRROR Reagan's strength, Haig weakness

arket

By JOHN CUNNNIFF AP Business Analyst

NEW YORK (AP) - President Reagan's self-confidence, his ability to disengage his ego from the task, and his talent for intellectualizing crises will continue to serve him well, says a management authority

But, adds Prof. Eugene Jennings, author of "Exec-utives in Crisis," Secretary of State Alexander Haig has shown himself so deficient in these areas that his enemies "will pick apart everything he does."

Jennings, a psychologist and management professor at Michigan State, has spent his adult life analyzing, teaching and writing about corporate structures and people, especially as they involve power, and has been a personal adviser to chief executive officers.

Jennings studied the recent behavior of Reagan and Haig, and concludes that Reagan is prepared to sail through the post-trauma shock that sometimes

immobilizes people in leadership positions. "He has," says Jennings, "what Haig hasn't." First, "he has primary self confidence — a gut feeling he can take what the world throws," said Jennings of Reagan. "It isn't new. It's related to task; he had it as a union leader, and he has it now.'

According to Jennings, on a self-confidence scale of 1 to 10 Reagan scores 9 or 10 (compared to 5 for President Carter). "Just to believe he could be elected President at 69 demonstrates it," he said.

Secondly, he continued, Reagan shows he is able to separate his ego from events. "He doesn't take himself seriously. He can laugh, have fun, be witty and joke," Jennings observes, adding that anyone who takes himself seriously becomes seriously taken by the consequences. His ability to separate his ego from events

strengthens Reagan, he says. "It gives people the idea he is unattackable." In fact, "it even discour-

ages enemies from making an attack on him." And thirdly, Jennings observes, the ability to intellectualize crises seems to assure Reagan's ability to function. "He retains his rational faculties," the professor said. "One shooting will not cause him to think shootings are a part of the future."

These three qualities, concludes Jennings, "enable the President to get back on the horse after he has fallen.

In contrast, "whatever competency Alexander Haig has is becoming immobilized by his lack of primary self confidence.

The Secretary of State, he says, is always in a rush to be at the center of action, seeks maximum control at all times, and is on guard to prevent any invasion of his turf, all indicators of low self-confidence. "He takes himself far too seriously," says Jennings. In the view of his enemies, "it makes him worthy of attack."

Haig, said Jennings, appeared to be unable to view "as a mundane, logical act" the appointment of Vice President George Bush as crisis manager. "He could not see the move as having merit in itself." Unlike Reagan, said Jennings, Haig let his emotions rule his intellect.

The professor says similar behavior can be observed in the battles for top corporate jobs. Although Haig has help several high positions in his career, Jennings still identifies him with a type known in corporate life as "early arrivals," in that they move into top jobs quickly, often leapfrogging over older, more experienced candidates.

Early arrivals, he explained, sometimes rise to high positions despite experience gaps and without sufficient testing and, sensing this, seek to protect themselves. In Haig's case, Jennings said the Gener-
