Haskell Wins County Track Meet

The County Track Meet held here last Saturday found our school running away with the honors. The total points in the senior competition for Haskell was 68 and the juniors won 31 1-2 in their competition. The nearest opponent in the senior group was Rule, with 35 1-2 points, and in the junior group was O'Brien with 13 points. As you can see, our track squad was really the squad

of the day. Almost every girl who attended was "raving" about some one personality after the meet, and of course each one had a different hero. However, they all agreed, especially Mary Helen, that Jack Ford was "just wonderful." He really deserved this praise, though, as he won both the 100 and 220 yard dashes. And he ran both in less than the best at the Fat Stock Show meet. The 100 yard dash was gone in 10 flat and the 220 in 23.1. One amazed spectator was heard saying, "Why, his feet never touched the ground after he started." Also the time of the 880 yard dash was better than at the Fort Worth meet. This was won by Rule.

As you've certainly heard by now this was the very best meet we've had in several years and we all woke up to the fact that besides football and basketball our school indulges in track — "but definitely!"

Names of Former Students In Service To Be Posted

For several weeks a "Service Honor Roll" was published in the Warwhoop. Then it was discontinued. This was due to the fact that the Free Press began a column similar to this, and it was unnecessary to continue ours. Now it has been decided to compile for the school a list of all the boys who ever attended Haskell High School and are now in the service. This list is to be placed on the bulletin board, and should be as complete as possible. We are calling on the students to supply the names of the boys they know that are in the service. If any of the readers know of some boy that the students are not likely to remember because he attended school some years ago or because the family has since moved away, please send this information to Miss Jessie Vick. This information will be written to her, or telephoned to the high school. Your cooperation will be appreciated.

Band Master Goes To New Position

The band members are all regretful since they found that their band master, Mr. Kilgore is leaving them. He has found a better job in Wellington, and is to live there. The school is losing a good teacher as well as a friend among the students. The students have learned to admire him, and depend on him for many things. He was also the Freshman sponsor.

The members of the band can not say how much they appreciate him, or thank him enough for helping the band out this far this year. They had planned several things, but can go on with them since their new bandmaster, Mr. Elbert Fagan, has planned to help out. Mr. Fagan, also knows his music, and would appreciate it very much if the band members would join right in with him and help him out. As you know, a new teacher of any kind has to have co-operation from the students before he can do anything. So, let's all get in and help the new teacher, students, and also try to make friends as soon as possible to make him feel welcome into the school. Mr. Fagan can also play a piano well, and can help out in school affairs with his great talent.

All the band members surely hate to see Mr. Kilgore leave, and will really miss him. The band members and also the other students wish him the best of luck and would like for him to carry some of the thoughts of dear old Haskell with him.

Honor Roll Includes All Classes

The honor roll for the fourth six weeks consisted of ten seniors, three juniors, five sophomores, and three freshmen. Cecil Gholson made the highest average, which was 96. Listed below are the names of the ones on the honor roll:

Seniors—Dale Bartlett, Anna Mae Brooks, Annie Bess Gilliam, Florence Hammer, Roy McClintock, Dan Oates, Josephine Parish, Sam Smith, Allan Strickland and Ross Lowe.

Juniors—Marie Adams, Patsy Pearsey, and Shirley White.

Sophomores—Roy Adkins, Bobby Dulaney, Cecil Gholson, Herman McCurry and Mary Jo Zelisko.

Freshman—Joseph Hammer, Laverne Williams and Luvicia Williams.

Senior Spotlight

DAN OATES

Dan was elected the most popular boy in Haskell High School, and is the president of the Student Council. He is one of the five students chosen by the seniors to represent them in Who's Who, and he enjoys his work as Business Manager of the annual. Dan has been very active in sports—having won a letter two years in football and the same in basketball. He has lettered only one year in track so far, but he says, "I'm going to letter again this year—I hope."

When he was a sophomore, Dan was president of his class, and he is very proud of being an Eagle Scout. He doesn't have any hobbies, and is undecided about his future.

Mr. and Mrs. Hill Oates of this city are his parents.

RILEY JAMES PACE

Riley James, or Bud as everyone calls him is a blonde senior boy who is always on his job. He has the reputation of being "lots of fun" even though he is quiet about it.

Bud has reserved his entire education in Haskell schools. He has been in football one year, basketball two years, track two years, and has done F. F. A. work one year. Bud and his clarinet have been features of the Haskell High School band for four years.

He says he has no special hobby but likes to do lots of things other people call hobbies. Mr. and Mrs. Lynn Pace are his parents.

JOSEPHINE PARISH

Josephine is one of the most active members of the Senior Class. She was vice-president of the Freshman class in 1939. She is president of the Gypsy Ramblers and the La Conga Club this year, 1942.

Josephine is a member of other organizations also. She is a member of the "Young Defenders of America," and was a member of the Pep Squad in 1939 and '40.

Her hobby is tap-dancing, and she has put this hobby into something worthwhile. In 1940 she conducted a dancing class for small children and it was very successful.

Josephine's ambition is to be a director of dramas or a comedienne and she expects to further this ambition by attending TSCW in September.

Josephine is the daughter of Mr. and Mrs. Elam Parish.

New Desks and Tables Received

Some of the teachers have received their desks, and they are very pretty. All the students asked at once upon seeing them, "When did they come?" The teachers replied that they had just arrived—this was Tuesday morning. The desks are attractive and are made of oak with a natural finish. These were made in Ranger, Texas, at the N. Y. A. Shop. The shipment included three teachers desks and nineteen tables. These tables are of the same kind as those received a few weeks ago, and are for use in the classrooms and the library. A shipment of more desks is expected in the near future.

Mrs. Cox Begins Regular Teaching

Mrs. Wallace Cox, who has served for several years as substitute teacher in the high school, will teach Mr. Kilgore's social science classes the rest of this year. No single teacher was available at this time to serve both as band director and class room teacher, so we are fortunate to have one who is so familiar with the students and with the school system to take his classes. Mrs. Cox will have two freshman and two sophomore classes, and will be on regular duty until three each afternoon. We are glad to have her on our faculty.

Freshman Class Has Party

The Freshman class had a "Truth or Consequences" party on March 20. This party was planned by a committee of five. It was held in the activity building and over forty freshmen were present. Also at this party a farewell gift was given to Mr. Kilgore who left the following morning for his new position. The gift was a Schaeffer pencil matching the fountain pen given him by the Band students. The ones present at the party had a wonderful time despite the fact that they hated to see Mr. Kilgore leave.

Sale of Stamps Is Lower

"Buy as many as you can as often as you can"—have we forgotten this or something? Evidently we have, as last Friday's sales were again disappointingly low. The total was only \$79.05. If you haven't been buying any, try to buy at least one next week and if you have been buying every week, try sitting in the balcony when you go to the show, cut out a coke or two, and see if you can't buy more. Wouldn't it be nice if every class could be 100 per cent next Friday—let's try.

Nephew of Haskell Woman Attacks 54 Jap Bombers, Downs Two

A clipping from an Oklahoma newspaper received this week by Mrs. J. T. Ellis of this city, told of the heroic action of her nephew, Lieut. Morehead, American fighter pilot with the U. S. air forces in the Pacific war zone. Lieut. Morehead is the son of Mr. and Mrs. C. W. Morehead of Washington, Okla. Mrs. Morehead is the former Miss Ophelia James, daughter of an early-day Haskell minister who will be remembered by many old-timers still living here. Family of Lieut. Morehead had not heard from the young pilot since December 17, when a news story from "Somewhere in Java" told of his singlehandedly jumping a bevy of 54 Jap bombers.

The report read: "Morehead's three companions drew off the Jap fighter escort planes while he climbed to a level where three Jap formations, 18 bombers each were patrolling.

"Selecting the two foremost, Morehead attacked. Both instantly dropped their bombs. The others apparently not seeing that the cause was an attack, followed suit. All the bombs fell harmlessly on rice paddy fields."

Two bombers were shot down, one officially and the other unofficially by Morehead before making his escape, the report said. Morehead, a second lieutenant

Band Teacher Is Presented Gift

As a token of their appreciation the members of the band presented a gift of Mr. Kilgore at the last meeting they had with him. This gift, which was selected by a group of girls, was a black Shaeffer's fountain pen.

The band members certainly hate to see Mr. Kilgore leave. They are losing a good band master, but he is to be congratulated in having a will to gain a new and better job. Mr. Elbert Fagan is taking Mr. Kilgore's place.

Through the Looking Glass

All your life you have heard that there was a difference between a Freshman and a Senior. Most of the time, this difference is not tangible, but everyone knows it is there. I think after hearing the different way the two students talk, you will have no difficulty in explaining the difference.

A Senior would say, "Are you escorting a young lady to the dance tonight?" And a Freshman would say, "Hey, gate, are you taking a cat to the shindig tonight?"

Now do you get what I mean?

Billy Tinkle, you are entirely too reckless a driver to take seven young ladies riding in your trailer. The girls had great difficulty in even staying on the trailer. The morning after the night before, Jean Menefee came to school with small splinters generously sprinkled in her legs. "Ain't it a shame about Mame?" "Course she would not give out one bit of incriminating evidence, but I know where she got those splinters in her legs!"

Between the fresh-air fiends and Miss Riley, the in-betweeners are having a tough time of it. Miss Riley is attempting to adjust the temperature of the room as the teachers were advised to do, the fresh-air kids are trying to get more air before they smother, and the neutral are praying for peace. Any bets as to how the squabble will come out? Huh? I think Miss Riley will win, too.

The battle of the century is being fought. It is between Billie Jack and Ross. They have had a terrible quarrel. He refuses to forgive her, and she sends him the most pathetic poems, in which she declares her love is forever lasting. They are not even on speaking terms — tch, tch, what love won't do for you. Of course everyone that knows them realizes it is their regular monthly quarrel, but any one else would think that Billie Jack had committed murder to force Ross to be so angry with her. But then in the spring, a young man's fancy—so don't give up hope, Speer, spring is just around the corner.

The senior hayride must have been something! Snatches from here and there lead me to believe so. As I walked down the hall the next morning, I heard: "What a divine time I had last night—ho hum, I'm sleepy—and Snort was reeling off the bottom of the deck—wish I hadn't gone bowling afterwards, I'm so sore I can hardly move—the kids came to my house after the hayride, and is it a mess today—I could wring A. H.'s neck, everytime I got comfortable, he would start the Star Spangled Banner, and cause me to stand up—I think the students had a truly good time (Mr. Ramsey)—We'll never be the same as we uster since those whacky seniors drove us (the horses).

and former University of Oklahoma student got his baptism of action even before the war began. Twice in California he bailed out of army training planes—once when the craft caught fire and another time when two planes collided in mid-air. Still a third time he made a forced landing in the Arizona desert.

Parents of Lieut. Morehead have two other sons in service—one Capt. J. F. Morehead, an army doctor at Fort Dix, N. J. and C. W. Morehead Jr., an army flight instructor at an air corps field at Santa Maria, Calif.

Wants Gang to Know He's "Giving Japs Hell"

John Henry Withers, 1941 graduate of Paint Creek High School who enlisted in the Navy at Wichita Falls last Armistice Day and is now with the Pacific fleet in the combat zone, remembered his former classmates and friends in a letter received by his aunt, Mrs. Joe Ragsdale, last week. The letter postmarked March 14, came via Clipper Mail. In the letter young Withers told his aunt that he had been stationed at Pearl Harbor since January, and was now being sent to the fleet in the combat zone. In the closing paragraph of the letter young Withers said "Tell the gang that I am now giving the Japs hell!"

A Few Things About Our School That Will Interest The Prospective Student

Students Are Ambitious

We believe that never in the school's history have we had more ambitious, intelligent, industrious students than those in our school today. A group of happy, forward-looking students contribute much to the welfare of our school and that is what we have here.

Teachers Notice It

There is a busy school. The clicking typewriters announce themselves; the open and pencils, though not equally busy. Visitors to the school often comment on the fact that our students are deeply interested and are giving the closest attention to their work.

Method of Individual Teaching

Our courses of study and our plan of teaching are centered on the idea that each individual student is the important factor in this school. Students are taught from the viewpoint of their individual good. Each student is given the opportunity to make the most of his or her native ability, no matter how great it may be. No two students are alike, hence not all students can be taught in the same way, nor should they be expected to make the same rate of progress.

Students Who Are Successful

Look around you at the successful men and women in your community. How did they attain their station in life? You will conclude that they were industrious, thoughtful and quick to see and grasp an opportunity. We are sending you this message in

the belief that you will find in our school the real opportunity to seek to prepare for a useful and profitable business career.

We are always glad to consult with prospective students with respect to their courses of study. We offer several courses in order that we may be prepared to meet the requirements of individual students. We want our students to succeed because upon their success hinges ours.

How Would You Use Your Education?

As a people who are beginning to understand that an education should bear a definite relation to what the student is to do in after years. Too often boys and girls go to school to get what they call "education" with no idea about the use they may be able to make of it. We have no leisure classes in this country and everyone should be prepared to make a living. The kind of lives men and women live depends largely upon the way they make a living.

Much Work But Some Playing

Our students are happy in their work and in their place—for they do SOME PLAYING. A school should be made attractive, but it never reaches a high plane of usefulness if it is conducted largely as a glorified club in which students are amused and entertained rather than instructed. We maintain enough activities to relieve school life of this monotony but not enough to rob it of its practical value.

The service of our employment department is available to the graduate, not only once but as many times as he may need it.

Magazine Club Has Patriotic Program Friday

The Magazine Club had a patriotic program Friday afternoon with Mrs. Ben Charlie Chapman as director and Mrs. R. J. Reynolds as hostess. My Country 'Tis of Thee was the program subject for the afternoon.

Mrs. Reynolds had the club room attractive with bowls of almond blossoms for the meeting. Club members opened the program by singing America, following with the pledge of allegiance to the flag.

Mrs. E. M. Frierson had for her subject, How To Pay For The War. Mrs. Roy Sanders—Truth About Air Power and Mrs. J. G. Vaughtner—College in a Changing World.

The following ladies were present for the meeting: Mmes. W. Q. Casey, J. U. Fields, Ben Charlie Chapman, Hill Oates, John A. Couch, O. E. Patterson, R. C. Couch, R. H. Darnell, H. M. Smith, E. M. Frierson, R. J. Reynolds, John Rike, S. R. Rike, Roy Sanders, H. S. Wilson, J. G. Vaughtner, J. R. Coody, S. Hasen, W. M. Reid and Theron Cahill.

G. A. G. Club Meets In Home of Beverly King

The G. A. G. Club met in the home of Beverly King Wednesday night. The meeting was called to order by the president and business was discussed.

Refreshments of hamburgers, oranges and candy were served to the following: Josephine Parish, Jean Menefee, Annie Bess Gilliam, Sue Pate, Dale Bartlett, Freida Wheatley and the hostess.

Mary Jo Free Is Honored With Buffet Supper

Mary Jo Free whose engagement and approaching marriage to Paul Roberts has been announced was honored for a buffet supper Friday evening with Mrs. W. A. Lyles and Mrs. E. M. Frierson as hostesses. The wedding date is Easter Sunday, and the Lyles home carried out the Easter theme in party plans.

Before a background of pastel hand made paper flowers along the fireplace stood a huge pink Easter rabbit. Near it was a large pink Easter egg tied with white satin ribbon holding hostess gifts to the bride elect. Encircling this setting was a ring of greenery with tiny Easter eggs scattered at intervals. On the mantel were tall pink shell vases filled with peach blossoms.

Places were found at individual bridge tables centered with an Easter bunny dressed as brides. The bunny's net veil that extended into a train was held in place with tiny flowers made of ribbon. The bouquet was also hand made ribbon flowers. Place cards were tiny bunnies with lace skirts with a tiny white Easter egg with pink and green trim.

The supper was served from the dining table covered with a white linen cloth. The centerpiece was a flat green bowl with peach blossoms. An Easter bunny and eggs were placed near the centerpiece. Almond blossoms and snapdragons were other house decorations.

Nancy Free, sister of the honoree and Virginia Frierson dressed in all white rabbit costumes met the guests at the door and showed them to their places. The guest list included: Wynona Post of Stamford, Mrs. Joe Hyde of Goose Creek, Amelia Beth Hamner, Wanda Dulaney, Mrs. Marion Josselot, Mrs. Lynn Pace Jr., Wynelle Hellums, Mrs. Woodrow Frazier, Christine Lowe, Mrs. Charles Swenson and the honoree.

Mrs. O. E. Oates Entertains Luncheon Club Members

Methodist Women Meet In Home of Mrs. Patterson

On last Monday March 23rd the women of the Woman's Society of Christian Service met in the home of Mrs. O. E. Patterson for a continuation of the Bible Study with Mrs. Kenneth Copeland as director.

The president, Mrs. Graham being absent the director conducted a short business session after which with Mrs. Patterson at the piano all joined in singing "My Faith Looks Up To Thee."

Mrs. Hudson Pitman offered prayer. The director taught the lesson using the scripture and basing her comments on the book of Philippians. Assisting in the reading of the scripture were Mmes. Pitman, Breedlove and Darnell.

We do not have a regular meeting on next Monday but will join the other church societies in a union meeting at the Baptist Church. We hope our church will be well represented.

On Monday April 6th the Bible Study will be continued with Mesdames Hellums and Cahill acting as hostesses. At the conclusion of the program Mrs. Patterson served delicious refreshments of ginger bread topped with whipped cream and tea to the following members: Mesdames Minick, Hellums, Smith, P. D. Sanders, Lewis, Norris, Wyche, Cahill, B. Cox, Breedlove, Darnell and the director, Mrs. Copeland.

The Chatter Box (By BEA GAYER)

If you insist on spending your time criticizing our leaders and our allies, for goodness' sake, get in touch with Hitler and get yourself put on the payroll. It's absurd to give him such vital assistance and not even receive anything in exchange—especially when you're giving a type of aid for which he gladly pays quite sizeable salaries.

To more fully realize the awful vulnerability of an unprotected country, just let a yellow jacket into your bathroom and then get him after you just as you step out of the tub.

Well, our aspirants to various city and county offices are getting all lined up for the fray. We voters can begin looking over the prospects and deciding just what kind of place we want to live in for the next couple of years. We don't know yet exactly which candidate in each race will get our vote, but we are going to make it a point to vote for fellows who seem to realize that it's just as illegal for a white man to bootleg as it is for a negro.

ACK OF MINERALS

Very costly to livestock and poultry raisers. Peculiar growing conditions this past year, grass and feed grown in this section has been to contain much less than the normal amount of minerals. As a result of this lack of minerals the stock and poultry have not done as well as could be expected.

This lack of minerals can be offset by feeding mineral supplements to livestock and a well balanced ration containing the needed minerals to chickens. We keep on hand at all times a large stock of minerals and mineralized salt for livestock, and our RIGHT poultry feeds contain just the right amount of minerals and vitamins to procure the best results from your poultry.

We specialize in mixing your feed according to your own formula or will recommend a formula for your cows and poultry, that will contain your feed with the needed ingredients added.

America Must Work For Victory

In a recent issue, Life spoke of "America's chronic and catastrophic complacency." That memorable phrase accurately illustrates what has been wrong with this country. We were told that we could lick the Japanese in a matter of weeks, and we believed it. We were told the potential enemy was short on raw materials and natural resources and so were incapable of an extended offensive and we believed that too. We were told that the oceans were, in effect, fortifications which were certain to protect our shores in any extremity, and we also believed that. And so the inevitable happened. We and our government terribly underestimated the material strength and striking power of the foe. We thought in terms of "national defense" instead of in terms of "war." We turned our faces away from the unpleasant facts, and dreamed happy dreams of victory. Only lately have the American people and their government come to realize how hard it will be to win this war—how much work we must do if we are to escape the fate of France and the other subjugated countries, which the conquerors are literally using as slave markets. It does not serve the national interest to minimize the disasters which have befallen the United Nations in less than four months. Japan has attained mastery of the Pacific and is moving on Australia. She may turn at any minute on India, which is populated with 29 percent of the entire world's manpower; is rich in resources of many kinds, and is torn with internal dissension. Some authorities expect that Hitler may soon attempt to drive across the Middle East. If that drive were successful, he would make physical contact with Japan, and the Axis would be in a position to destroy vital United Nations' communication lines. It is clear that the Vichy Government, possessor of a large fleet, is coming closer and closer to all-out "collaboration" with the Nazis. There is a distinct possibility that the Axis may gain preponderance of the world's resources, human and material alike. In short the whole picture of the world has changed faithfully since December 7. There can be no question but what Japan and her partners counted heavily on that "catastrophic complacency" of which Life spoke. And so, the

job of this country and the other United Nations is simply that of revolutionizing our outlook toward war—and of producing and shipping the instruments of war necessary to make a revolution possible. Every military operation based on defensive strategy has failed—and failed with terrible losses of men and equipment and key positions. If we are to win, the war must be carried to the enemy and carried to him at the earliest possible time. We could attack Japan's concentrated industrial areas from Alaskan or Chinese bases—if we had enough planes of the right kind. We could crack her long-extended supply line—if we had sufficient equipment at the right place. These and similar "ifs" are today's great bottlenecks to the waging of successful war. They are not simply industrial problems. They are problems which were largely created by inefficiency in government and by work stoppage on the part of labor groups. Production chief Donald Nelson has called for an immensely extended effort all along the producing line. If that effort is made, it means that there must be an end to bickering between rival unions, and an end to work-weeks which were fought for and achieved in an era whose end began when Hitler became Chancellor of the Reich. There must be an end to waste, delay, and red tape in the government. We have no time or energy for reform for reform's sake. Those are the cold facts.

The American people clearly have a choice. They will work harder than they ever work in their lives—or they will lose a war whose loss can have no other conclusion but the death of freedom everywhere. None of the nations which are united with us in this epic struggle have the production capacity to turn the scales. The tools of war will come from us, and in ever-increasing quantity—or they will not come at all. We must supply the bulk of the ships, the tanks, the planes, the guns, the shells, and the bullets. And we must supply them now, not in years to come.

No Time To Waste

The cost of war has come home to many an American for the first time. The income taxes due in mid-March were the highest in our history. A new tax bill is being debated which will double the tax load. It has been necessary to raise the debt limit past the \$100,000,000 point. Every American, no matter how small his income, must and will help pay for war in one fashion or another. Congress must do more than raise taxes. It must take two definite steps to protect people and the national economy. First, something drastic must be done to pare non-defense spending. So far, there has been much talk and practically no action. Abnormal peacetime extravagance goes on "as usual." Congress must be told that the American people demand maximum retrenchment in every non-defense field. This should have a minimum of \$2,000,000,000 a year. Second, there must be an end to the idea that the government can pay for everything and finance everything. Government financial agencies proper job is to pay for military necessities which are outside the sphere of private enterprise. Only the government can build barracks, buy ships, planes, munitions, pay for the maintenance of troops, etc. In other fields private banking and other financial institutions can do the job. They have the money. They have the personnel. They are prepared to go the limit. Yet government, at the expense of all the people, has usurped a hundred and one fields of banking activity which properly belong in the field of private, self-sustaining enterprise. The government will act in these matters when, and only when, the people demand it. And there's no time to waste in making the demand.

Using Wood Gas Fuel

Above is shown an American-built tractor equipped with a wood-gas converter and used on a farm in Europe. More than 500,000 motor vehicles now are using a war-time gas extracted from chunks of wood, charcoal or sawdust, in converters of this general design.

KNOW YOUR NEIGHBOR CHILE—COASTAL EMPIRE

If that drop of iodine smeared over bruise or abrasion could share the intelligence and tendencies of its human beneficiary, it would, likely enough, have much to say of its unappreciated dignity and importance. In war as in peace, of its parent, nitrate of soda, of the nitrate's power in life and death in the human family; and, finally of the world's only producer of natural nitrates on a commercial scale—the Republic of Chile.

Chile, an empire in itself, a great ribbon of 286,396 square miles, spread along the rim of the Pacific for nearly 3,000 miles, reaches farther south than any other nation of the American Continent. It is sometimes referred to as "the California of South America." If there is some similarity as to relative location, shape and topography, the parallel cannot be carried far. Two Californias, nearly, could be contained within the boundaries of Chile. They would hold Germany, Belgium, Denmark, Holland and Switzerland, Cape Horn and the Chilean archipelago are about as far from the bleak desert country of the north, where are the nitrate fields, as San Francisco is from New York. The belt line, at its broadest, is about the distance from Washington to New York.

Stretched out between the great Andean mountain range and the Pacific, Chile has a climate varying from the heat of the baked northern desert to the snow and ice of the stormy deep south. Nature has partitioned the country, roughly, into three productive zones. In the extreme south, adjacent to the strait of Magellan, are good grazing areas where stock-raising is a rapidly developing industry. To the north is the great Central Valley, famed as one of the world's garden spots. Here all the products of the temperate zone and most of those of sub-tropical climates grow luxuriantly. This is the most thickly settled and the most highly cultivated part of the country. And here, in a fertile valley between mountains and sea, is the beautiful capital city of Santiago. On the coast only 116 miles away, is the equally famous port of Valparaiso.

And last, but by no means least is the zone of the nitrate fields. The eyes of the nations of a world at war, as the struggle in defense of the ideals of the New World moves toward decision, will turn with more and more eagerness toward Chile's desert storehouse. For nitrate, with its by-product, iodine, is a principal item in the manufacture of explosives. A necessity of war, both for the making and mending of wounds, it is priceless, too, as a

nutrient for man and his husbandry. In times of peace and normal demand, Chilean nitrate was second only to Chilean copper, another war need now. As a world-producer of this metal Chile is outranked only by the United States. The country has in addition, surpluses of iron and coal. After more than a hundred years, the mining of gold has been resumed. Recent discoveries of oil seepages may be herald of another great industry to come.

Chile is a republican form of government, with executive legislative and judicial branches. Its present constitution dates back only to September 18, 1925, but it retains many of the important features of one adopted nearly a hundred years before. This older constitution was largely the work of the great statesman Diego Portales, Minister of the State under President Prieto from 1831 to 1841. This constitution, in turn, superseded a still older one. Chile's first constitution was drafted by a committee appointed by the famous General O'Higgins shortly after the Chileans, with the help of the Argentine patriot and soldier, General San Martin, defeated

THE HOUSEWIVES OF AMERICA are a vital factor in this war. In the program to make America strong by making Americans stronger they are the guardians of the nation's health.

NUTRITION IS YOUR BUSINESS because good health and energy are imperative. To help do your bit toward building your family's health, serve well balanced vitamin rich meals. It isn't enough just to select the right foods at the market, for many of the health-giving vitamins may be lost if the food is cooked improperly.

"I WILL WASTE NOTHING"—Pledge yourself that the vitamins in the food you buy actually reach the family table and you'll be helping to win the war.

... after 10 years of perpetual e-motion

WASHINGTON officialdom complains that the public does not realize that the nation is engaged in war. A critical war. An all-out war. ... Washington chides the citizenry for its lethargy, its complacency.

"Where does the blame, if any, lie?"

Thus read the opening lines of an editorial in the official magazine of the United States Chamber of Commerce suggesting that the average citizen feels that the bureaucrats in Washington "are not taking the war seriously."

The average man, it is said, "has become impervious to 'emergency.' He has been exposed for ten years to perpetual emotion. It is natural that he ask his leaders for something more than words. ... He needs examples, actions, in high places."

But, it continues, "As far as the citizen can see, not one of the 150-odd peace-time bureaus, commissions and authorities has made any sacrifice. Not one. Rather, not a one but has found the war an excuse for expanding its personnel and 'services'."

The average man knows that wars are not won with words, piddling policies, or boondoggling. Wars are won with deeds, with production, and with the full cooperation of government, labor, industry, and of ALL the people.

He knows that to win the war there must be an end to petty politics while the battle rages. He knows that his country has no need for bogus reformers, hampering and reviling industry at a time when our greatest need is planes, tanks, ships—not ideologies.

The practical business men who built up and manage America's electric companies today are providing electric power where it's needed, when it's needed!

Despite the millions on millions of dollars spent for political power projects, business-operated companies are furnishing over 90 per cent of the nation's electric supply in the present emergency. Last year, they installed over 2 1/2 million more horsepower! We now have in the U. S. more electric power than all the enemy nations together.

Careful, efficient and economical production of electric power will continue, lighting air fields, army camps, industries, your home and business. The war will be won, not with words of abuse but by wholehearted cooperation!

Care of Your Car

By Smitty

Here is a simple way to accurately check your gas mileage: Fill your tank and then check your speedometer mileage. Keep a record of the gas added. After 1,000 or more miles fill the tank again and divide the mileage driven by the number of gallons added, plus the last tankful. In this way you can get a much more accurate figure than by checking single trips. If you find that your mileage is too low have it checked by a competent mechanic. Bad spark plugs waste as much as one gallon of gas in ten, car manufacturers say.

You will find at Smitty's the largest stock of standard brand spark plugs in west Texas. Our prices will beat your mail order catalog.

A good way to give your battery a lift is to depress the clutch pedal when you step on the starter. When you do this the battery doesn't have the extra work of turning over the transmission gears. This is a wonderful help on cold mornings.

A good way to be sure of satisfactory service from your car is to see that the parts needed are from Smitty's. You can't do better but you might do worse.

There has been some question as to how often your tires should be criss-crossed for maximum wear. Most experts (that includes Smitty) agree that it should be done every 5,000 miles.

There has never been any question where you get more for your money and top quality, too. That's at Smitty's.

Avoid continuous heavy pressure on the brake pedal. Hot brakes wear out very rapidly. Too much lubrication on the front wheel bearing may result in oil soaked brake lining. Watch this point.

Don't forget to warm the engine before draining the crankcase. Remember cold oil is like cold molasses.

Another thing to remember is that Smitty's is the best bet when you need anything for auto, truck or tractor.

Enjoy Overnight Fishing Trip

J. C. Schwartz, Truett Howard, Raymond Schwartz, E. A. Howard Jr., and Crawford Holloway spent the night fishing on Paint Creek Saturday. They report an enjoyable trip.

Germination tests of old garden seeds may be made by planting several kinds in boxes of moist dirt kept in a sunny place. Each lot should be numbered on box and package and a record made of the number of seed planted in each, which usually is 100. This is necessary to get the percentage of germination.

In coming months, ranchmen in the extreme west part of Texas may be asked to grow pilot plantings of gnyale, the plant from which rubber may be extracted. Areas in California, New Mexico, and Arizona also are said to be suited to the desert plant.

CITATION BY PUBLICATION

THE STATE OF TEXAS.

To Robert Penry, Greeting: You are commanded to appear and answer the plaintiff's petition at or before 10 o'clock A. M. of the first Monday after the expiration of 42 days from the date of issuance of this Citation, the same being Monday the 11th day of May, A. D. 1942, at or before 10 o'clock A. M. before the Honorable District Court of Haskell County, at the Court House in Haskell, Texas.

Said plaintiff's petition was filed on the 22nd day of December, 1941. The file number of said suit being No. 6012-A.

The names of the parties in said suit are: Opal Penry as Plaintiff, and Robert Penry as Defendant. The nature of said suit being substantially as follows to wit:

Being a suit for divorce and custody of Donald Ray Penry, son of plaintiff and defendant, plaintiff alleging that she is and has been for a period of 12 months prior to the filing of this suit a bona fide inhabitant of the State of Texas, and that she has resided in Haskell County, Texas, for at least 6 months prior to the filing of the same; that plaintiff and defendant were legally married in Jacksboro, Texas, on or about the 18th day of June 1939, continuing thereafter to live together as man and wife until on or about the 1st day of February A. D. 1940.

That during the time of their living together plaintiff had one son by defendant, Donald Ray Penry, about 2 years of age; that she treated defendant with kindness and attention but that defendant within a short time began a course of harsh and unkind treatment toward her. That defendant was extremely jealous of her and was continually accusing her of improper conduct, all of which charges were without basis in fact, addressing her in the same connection in the most obscene manner. That defendant on many occasions threatened her with personal violence and did on more than one occasion strike her with his fists, and with his hands. That 3 months prior to the birth of their said child, defendant having during all the period of plaintiff's pregnancy continued his cruel treatment of plaintiff, left the home of this plaintiff as if upon his usual business, same being on or about the 1st day of February A. D. 1940 and without cause permanently left plaintiff, plaintiff not having seen or heard from him since said time. That defendant on said occasion left plaintiff utterly destitute and without funds, forcing her to go to the home of her parents. That he has not since said date provided anything for her or for the support of their said son. That before said time and during the period of their living together defendant never at any time provided for plaintiff as befitted his earnings but wasted such sums as he did earn in useless extravagances.

WHEREFORE plaintiff prays the court that the defendant be cited to appear and answer this petition and that on final hearing hereof she have judgment dissolving the marriage contract now existing between plaintiff and defendant and that she have the care custody and education of their said child and for such other and further relief, special and general, in law and in equity as she may be entitled to.

Issued this the 25th day of March, 1942.

Given under my hand and seal of said Court, at office in Haskell, Texas, this the 25th day of March A. D. 1942.

MRS. HETTIE WILLIAMS, Clerk District Court, Haskell County, Texas. D17
